The Sabbath Recorder.

SUNDAY IN PARLIAMENT.

We are indebted to the Rev. Wm. H. Black for a copy of the *London Times*, containing the following interesting report of a discussion in the House of Commons, March 20th, on the opening of Museums, &c., on Sunday.

Sir J. WALMSLEY, in moving the following resolution—"That, in the opinion of this House, it would promote the moral and intellectual improvement of the working classes of this metropolis if the collections of natural history and of art, in the British Museum and the National Gallery, were open to the public inspection after morning service on Sundays"—observed, that the motion was not intended to advance any speculative opinions, interfere with the observance of the Sabbath, or militate against religious feelings in any way, but was introduced at the earnest request of numerous bodies of workmen in the metropolis and young men in offices, who, in the petitions which they had presented to the House, had stated that it would be of great benefit that the British Museum and National Gallery should be thrown open upon Sundays after divine service. They looked upon those collections as public property, and thought they ought to be thrown open to the great bulk of the community on those days upon which alone they had leisure to examine them. No one could deny that it was most desirable that the working classes should be furnished with abundant means of recreation and improvement. The study of the works of creation would lead the minds of those men to the love and veneration of the Creator, and, therefore, he thought that throwing open such exhibitions as the British Museum, so far from injuring the morals and bringing religion into disrespect, would raise the people in the scale of human beings, render them thoughtful and observant, and, by leading them to the contemplation of the wonderful power, skill, and adaptation shown in the works of the Creator, would tend rather to the improvement of their moral and religious condition. Apart from the religious consideration of the question, there were many reasons why we should give to the workman the means of improving his knowledge, his science, or his taste. Why, he asked, were the ornamental productions of other countries so sought after in England, but from the fact that the workman of the continent, having more opportunities of improving his taste by the contemplation of the public collections, was able to produce designs of a more elegant character than our own workmen, with whom the struggle of life was so incessant that no other day but Sunday afforded them the least leisure to improve themselves. He admitted that considerable diversity of opinion might exist upon the religious view of the question, still he assured the House that it was from no indifference to religion, but because he believed it would promote the welfare and lead to the regeneration of the large class whose cause he was advocating that he had brought forward the motion. He would venture to urge upon those who enforced upon others the pharisaical observance of the Sabbath the divine doctrine of Him who taught that the Sabbath was made for man, and not man for the Sabbath. He was persuaded that great numbers of those who upon Sunday pursued a course of vice and dissipation might be saved from such degradation if fitting opportunities were afforded them. The proposal which he made involved in a very slight degree the attendance of the officials upon the Sabbath. A few police officers would be ample for the purpose, and not one individual would be deterred from attending divine service. Having quoted the opinion of Dr. Gray in 1841 in favor of this view, he reminded the House that the committee of last session upon public house licenses had urged the opening of these nurseries of science as calculated in a great degree to mitigate the evils of immorality, intemperance and crime; and he contended that the throwing open of Kew-gardens, Hampton-court Palace, and the Painted Hall at Greenwich afforded evidence of the wisdom of that recommendation. Many good, and wise, and pious ministers of the Gospel had declared their opinion that, so far from desecrating the Sabbath, such a measure as he proposed would hallow that day; and many most eminent living statesmen, of all views of politics, had recorded their opinions in favor of innocent recreation upon the Sabbath. (Hear, hear.) He had supplied himself with a great number of authorities upon this branch of the case, but he would only trouble the House with a few brief extracts. (The hon. member read extracts from the expressed opinions of Dr. Arnold, Archbishop Whately, the Rev. Mr. Holden, and the Rev. J. Griffiths, vicar of Aberdare.) It might have been observed that in some of the petitions which had been presented it was forcibly remarked, that a constant familiarity with beautiful forms was one of the readiest means of acquiring all that was graceful and most applicable to art, since it was through the eye that the perceptive and moral faculties were the most easily reached. Doubtless there were gentlemen in that house who would bear witness to the moral and religious influence which had been produced upon the minds of many who had flocked to witness the glories of the late Crystal Palace. Among them were men, who, sullen from suffering, were so ignorant as to confound order with oppression, and wealth with injustice; yet those men, whose minds religious teaching had never softened, were subdued at the grandeur of the sights which they there beheld, and, for the first time, they learned to reverence genius, intellect, and property. This question was one of high and growing importance, and whether the present motion succeeded or was rejected he had no doubt of its ultimate success. He asked the House, however, fairly to consider this question, and to decide in favor of a course which he believed would promote the moral, the intellectual, and the religious character of the people. (Hear.)

Mr. BIGGS seconded the motion, believing that the adaption of such a measure as that proposed would be to raise and refine popular taste, to reclaim the working classes from low and debased pursuits, and ultimately to insure a great moral and religious gain. The discussion of this matter would, no doubt, turn mainly upon religious considerations, and the point then to be kept in view was how far the obligation to observe a Jewish Sabbath formed an obligation to observe a Christian Sabbath. Now, all over Europe Christians of every denomination observed their Sabbath differently from the people of this country, who formed the exceptions and not the rule in this case; and after perusing the Scriptures most carefully he found—and it was with pain and regret that he did so find it—that there was no written injunction or command to keep the first day of the week as a Jewish Sabbath. He submitted this fact to the consideration of every Christian interested in the solution of this great social problem. (Hear, hear.) Not only, however, was there no written scriptural injunction of this sort, but there was no such injunction to keep the first day of the week as a Sabbath at all. To that statement he defied contradiction. (Laughter.) He was stating that fact in a spirit of seriousness and as the result of his own inquiry into the subject, and as it was necessary to come to close quarters, (laughter,) he would again state that the obligation upon Protestants to keep holy the first day of the week rested entirely upon the universal custom of the Christian church. He did not wish to be understood as in any way undervaluing the Sabbath; so far from doing so, he thought that if it were even a human institution, it was founded upon sound and wise principles, but at the same time he did not consider that that day was set apart for gloom and fanaticism, but rather for devotion and enjoyment. The Roman Catholic church in respect to the Sabbath acted upon a much better judgment of human nature; for, in his opinion, millions of the working people of this country were repelled from the Protestant church by the ill-judged asperity it displayed with regard to the observance of that day. It was not right, nor was it, he believed, in accordance with Holy Writ to deprive the working man of rational means of enjoyment and instruction on the only day of the week which was at his own disposal. He hoped that he should not be answered by vulgar declamation, but that the House would approach this subject with the desire of doing all that could be done to elevate the minds of the lower class, and to raise them from the state of wretchedness and debauchery in which too many of them were plunged.

Mr. DAVIES, after stating that he felt the subject was one of too sacred a character to be treated lightly by the House, read two extracts from the letters of clergymen complaining of the motion as an attempt to desecrate the Sabbath. He could not agree with the hon. gentleman who seconded the motion in the distinction he endeavored to make as to the day to be set apart for religious worship. We had the Divine command to set a day apart for the observance of the Sabbath, and whether the day to be set apart was the seventh or the first was not a question for discussion. (Hear, hear.) He hoped the House would be indisposed to entertain a motion so rashly brought in and so feebly sustained.

Mr. DRUMMOND said, for the first time in his life he now heard that which by the universal consent of all Christians had been called the Lord's day designated in a most extraordinary way the people's day. In the few words which he had to address to the House, he desired to speak of the subject as entirely a question of the Lord's day. He had always been as much convinced as the hon. gentleman who seconded the motion, of the impropriety of the puritanical way in which the Lord's day had been observed in Protestant countries—that was to say, that whereas it had been held in the universal Christian church as a festival, since the Reformation it had been considered as a fast. Of course it could not be called the Sabbath, because the word "Sabbath" meant the seventh day, and as Sunday was the first, it would be a great misnomer to call the first day the seventh. The principle, however, remained the same, and it was of no use hunting for a text. A text was very much like a precedent, and a precedent was very much like what Payne Knight said of a quotation—namely, that it was "the remembrance of the scholar and the oracle of a dunce." The principle was that the seventh part of every man's time and a tenth of his income were due to God. Now that the religious part of the question had been originated he certainly felt a great difficulty in saying what he thought ought to be the duty of hon. members, when he saw them night after night entertaining questions for refusing support to the national churches—those churches which were for the benefit almost exclusively of the people—and then substituting for churches, which they would not keep in repair, the going to the British Museum to see the gentlemen just arrived from Nineveh—red men with green beards. (Laughter.) When he saw the House engaged in the promotion of incestuous marriages—when he saw, night after night and year after year, hon. gentlemen bringing in bills to rob the church of its property—and he was ashamed to say that those who were the trustees of the property of the church defended it, not upon the ground that it belonged to the church, but as if it were their own private property—he was really at a loss to know what they ought to do upon such an occasion as this. But at the same time he thought there was a very great distinction between what each individual might feel in his own conscience right to do upon the Sunday—what he might consider to be a desecration and what not, and what was the duty of the nation to do in a matter concerning the interest of the nation.

The Marquis of BLANDFORD was not desirous of imputing any unworthy motives to the hon. gentlemen who had thought it their duty to bring forward a motion of this nature. Their opinions upon the subject might be peculiar, but, at the same time, he felt so convinced of the extraordinary nature of the conclusion to which they had arrived, that he must say the religious ground upon which they had argued the question was the very last they ought to have adopted. In his opinion it was a circuitous and rather subtle mode of introducing what was commonly called the thin end of the wedge into the desecration of an institution which was the pride and glory of the country. He felt that it was an important matter to consider in this case whether their acts would be in conformity with that religion they professed, and that Word of God they reverenced. He entirely agreed in the opinion expressed by his hon. friend the member for West Surrey, that the Sabbath meant the seventh day; but the Sabbath was the day of rest, and the fourth commandment was not, "Remember the seventh day to keep it holy;" but "Remember the Sabbath day to keep it holy." That commandment stood with the other commandments, "Thou shalt do no murder," "Honor thy father and thy mother," which appealed to man's nature, unconnected with any dispensation, being the great moral law of God. (Hear.) It was not said that the Christian dispensation did not bring with it a certain amount of liberty. That the Sabbath was made for man, not man for the Sabbath. But the purpose for which the Sabbath was made was to set apart a seventh of the week as a period of rest, and that institution extended to every period of history and every condition of man. (Hear.) With regard to the social grounds upon which the question has been urged, it must not be forgotton that during ten reigns, from Edward III. down to the present sovereign, nineteen different acts for the remedy of abuses showed how great was the anxiety of the legislature to keep sacred the day of rest. The late committee on the subject of public houses assumed that drunkenness would diminish if places of public amusement were opened on Sunday; but that appeared to him a most irrational conclusion. When the Crystal Palace was being built and parties went there out of mere curiosity to view the exterior, they remained in the public houses all night, and frequently created great disturbances when in a state of intoxication. Could it be supposed that, if a greater number of persons were drawn there by the attractions of the interior, the same scenes of riot would not occur? (Hear.) With regard to the opening of Kew-gardens on Sundays, a gentleman who had taken the trouble to observe the visitors remarked that they consisted of persons above the lower classes of life, who, tired of walking all the afternoon, refreshed themselves in the numerous public houses of Brentford, and often remained in them all the evening. (Cries of "Divide.") There was only one other subject to which he would call attention. Last session an important act passed for the closing of public houses for a greater number of hours on Sunday, and the effect in the metropolis had been an immense decrease in the number of drunken cases brought before the police magistrates on Monday morning. The effect in Scotland of closing public houses on Sunday, under the Forbes Mackenzie Act, had been most extraordinary, and had shown how remarkable a connection existed between crime and drunkenness. (Hear, hear.) The sanctity of the Sabbath was the ground on which the legislature interfered to close public houses on Sunday, but if the British Museum and the National Gallery opened their doors, every other place of amusement would follow their example, and the sanctity of the day would be destroyed. The motion before the House was specious in its appearance, but fatal in its results. (Hear.) He trusted that Parliament would never sanction such a measure, but would pursue the policy of sanctifying the Sunday as a day of rest, believing that such a policy would bring its abundant reward, according to the promise, "Them that honor me I will honor." (Cheers.)

Mr. PELLATT should regret exceedingly if this resolution, candidly brought forward and peculiarly seconded as it had been (a laugh) should diminish in the minds of the working classes that reverence for the sanctity of the Sabbath which was the honor of this country. (Hear, hear.) He had mixed a great deal with the working classes, and was of opinion that opening the British Museum and other places on Sundays was taking the wrong course in order to enlighten their minds. What was wanted was, that such places should be open in the evening, and on Saturdays and Mondays, but particularly on Saturday afternoons. (Hear, hear.) A movement for early closing in the city was in progress, and another movement was gaining ground for half a holiday on Saturday afternoon. (Cheers.) Unhappy should he be if we lowered ourselves to the standard of France and Germany in the reverence of the Lord's day, and happy should he be if we could raise them to our standard. (Hear, hear.) There was at present a movement in Paris to lessen the amount of Sunday trading, which was regarded with favor by the French government. (Hear.) The feeling of the working classes of this country was shown in 1853, when four times as many signatures and petitions were presented for closing the Crystal Palace on Sundays as were presented for keeping it open. He would move as an amendment to Sir J. Walmsley's motion, to leave out from the word "that" to the end of the question, in order to add the words "the National Gallery and the British Museum should remain closed on Sundays as heretofore, and that they should be opened every day in the week except Sundays; but, at all events, they should be open on Saturdays and Mondays, those days being most convenient for the working classes." (Cheers.)

Mr. KINNAIRD had persuaded his late hon. friend (Mr. Hume) not to bring forward this motion last session. He was glad he had done so, because the question in the hands of the present mover and seconder had received a blow from which it would not now recover. (Opposition cheers and laughter.) He would read to the House a few lines from *The Times*, which set this question at rest, and was perfectly satisfactory to his mind. *The Times* said:—

"The opening of museums on Sundays would preclude the possibility of closing other exhibitions equally innocent and attractive. Why should private collectors be debarred the license assumed by the nation? If Sunday visitors are able and willing to spend a shilling of their weekly earnings in the purchase of a harmless gratification, why should they not be as free to do so as to avail themselves of a gratuitous exhibition? Why should not Madame Tussaud's be open? Why not Vauxhall? The line of demarcation would grow more and more difficult to draw. Under our present institutions we can very justly close the theaters on a Sunday, but after the proposed infraction of them we should be in a strange dilemma even on this point. If scenic representations are abstractedly innocent, why proscribe them on a Sunday? If abstractedly otherwise, why encourage them on the other six days of the week? But each of these exhibitions would entail a proportionate extension of traffic and trade, till at last a closed shop on a Sunday would be a rarity resulting from the circumstances of the district or the position of the individual."

Let these hon. members look at Paris. He had been there during two Sundays, on both of which the building of the new street was going on. This was a question for the working men, and the result would be that they would have to give seven days' labor for six days' wages. (Opposition cheers.) This result might have been carried out in Paris, for there the working classes labored every day in the week, and the same effect would follow here if the government withdrew its protecting arm from the rapacity of individuals. The gentlemen who proposed this measure were those who had resisted every effort to protect the working man, and he distrusted their professions of attachment to the laboring classes. (Hear, hear.) He hoped his hon. friend would not withdraw his motion, after having kept members waiting, week after week, in expectation of it, (hear, hear,) but that he would allow the House at once to express a straight-forward English opinion upon a question which was of vital importance to the country. (Hear, hear.)

Lord STANLEY thought he was entitled to infer, from the last two speeches which had been delivered, that whatever considerations might be involved in this question it was not, at all events, one of a party nature. He was anxious to say a word or two upon it, because, if they came to a division, his would be a vote unpopular, he believed, in that House, and, perhaps, still more unpopular in the country (hear, hear;) but he conceived that a member of the House had no more important or sacred duty to perform than that of combating what he thought was a prejudice, although it might be entertained by persons for whom he had the sincerest respect and might be grounded upon the most conscientious motives. (Cheers.) All the arguments he had heard or read against the proposition of the right hon. gentleman might be summed up under two heads—first, the abstract argument of the sanctity of the Sabbath day, and, next, the argument, that by opening these institutions unnecessary labor would be thrown upon government officers. The most important of these questions was that which related to the desecration of the Sabbath, or, as it was called Sabbath-breaking; and, with respect to that question, he thought something too much had been conceded by the mover and seconder of the resolutions. They had argued the question as if it was in fact a question of the desecration of the Sabbath, and the dispute was whether that institution was binding upon us, and whether that desecration was permissible or not. He thought that idea belonged to a theory utterly false and unfounded, although not uncommon in this country, he meant the theory which attempted to establish a kind of antagonism between things secular and things sacred. (Hear, hear.) He did not mean to say that a man would learn in a museum or a picture-gallery that which would be so important or so valuable to him as what he could learn in church, but he said that, taking it for what it was worth, intellectual and moral improvement was itself a part of religion. (Cheers.) When he was told of the sanctity of the Sabbath, he would admit that he regarded that institution as, perhaps, the most venerable and valuable which had come down to us from past ages; but why was it so venerable and so valuable? No institution, however sacred, could be in itself an end; it must be a means to an end, and the end for which that sacred day was to be reverenced was the moral and intellectual improvement of those who observed it. (Hear, hear.) What was the leisure of a working man upon a week day? Out of the 168 hours which composed the week about 60 hours were employed by him in work, and at least two-thirds of his entire time would be taken up by the necessities of that labor by which he earned his bread, and by the repose necessary to recruit his strength after it. (Hear, hear.) When it was said that the working man ought to educate himself upon a week day, let any one consider what were his energies, what were his intellectual powers, and then ask himself what could be his capacities for self-improvement and self-education after ten hours of manual labor? It was perfectly true that mechanical improvements might in the progress of time operate to diminish the amount of human labor. That was a consideration for the future, as up to the present time they had certainly not operated in that direction, and he believed the amount of manual labor now performed was as great or greater than it had been at any previous period. Neither the laborer nor the employer had any option as to reducing the hours of labor; they were driven on by that competition which urged us all forward, man against man, in this country, nation against nation in the markets of the world. (Hear, hear.) As matters now stood, if they were to lay down the principle which lay at the bottom of all argument about the sanctity of the Sabbath, namely, that the whole of the day of rest was necessarily to be appropriated to subjects and studies of a theological character, they were thereby deciding that the education of the working man should virtually terminate in his youth, which was equivalent to saying that his intelligence and knowledge should in future remain upon their present footing. (Hear.) He believed that this exclusive appropriation of the day of rest, in popular opinion, to subjects exclusively theological, lay infinitely more than the want of education at the bottom of that ignorance which they all lamented (cheers;) and he believed that, unless they applied some remedy in this direction, all educational measures, even such as that which his right hon. friend had lately introduced, would be comparatively useless. (Hear, hear.) Was it asserted that the objects proposed by this resolution would necessarily interfere with the performance of any religious duties? Did it follow that the opening of a picture-gallery or a museum upon a Sunday afternoon would take away from the attendance at churches? What was done now? They allowed Hampton-court and Kew-gardens to be opened, they encouraged the inhabitants of the town upon their only holy day to breathe the fresh air of the country, but the argument of desecration of the Sabbath applied much more to the admission to those places, as a visit to them must occupy a whole day, than to the proposals contained in this resolution. This was not, however, a mere question of what had been permitted by previous legislation. Did hon. gentlemen mean to apply to themselves the same rules which they applied to working men? (Cheers.) If any gentlemen would say that they passed the Sabbath in such a manner that they should regard it as a comparatively profane occupation to visit a museum or to look at pictures, he would not dispute the question with them. (Hear, hear.) Although even in that case he might observe that there was a wide difference between doing that which we ourselves thought right, between obeying the dictates of our own consciences, and endeavoring to force others to obey them. (Hear, hear.) But to force on other persons, especially if they belonged to a class not represented in that House, the rules of a morality more strict than we ourselves practised, did not appear to him to be conduct which had in it much of religion or of honesty. (Cheers.) And who were to be the real gainers by the prohibition it was sought to enforce? Was it the belief of hon. gentlemen that they would either send to church or keep at church any man who would not be there if these institutions were opened? A man who went to a place of worship simply because he had no other place to go to was not likely to profit much by what he heard there. (Hear, hear.) An attempt had been made to close the public houses on Sundays, but he believed that the practical difficulty of the question of what constituted a traveler would be an obstacle in the way of such preventive legislation, and would compel them, whether they would or no, to keep the public houses open during a part of the day. Where this measure had the effect of taking one person from the church it would take ten from the public house. (Cheers.) If he wanted proof of this he found it in the nature of the opposition made to this resolution. This opposition came from perfectly opposite quarters. There were those who were anxious for the interests of religion, and on that ground voted against the resolution; and he had nothing to say against their sincerity; but there was also a large class who opposed this and similar resolutions, and though he did not regard their opposition with the same respect as he did that of the first class he had mentioned, yet he thought they were more correct in the results which they apprehended from these resolutions—he meant the publicans. (Cries of "Oh!" and cheers.) A circular had also been issued by a society for the due observance of the Sabbath which had threatened all persons who voted for this measure with public exposure. He was not acquainted with the working of this society, but if this was the way in which they carried on their proceedings he thought that they should change their name and call themselves a society for the promotion and encouragement of intemperance. (Hear, hear.) He had endeavored to speak on this matter without exaggeration, because he knew that in every part of England, especially in the manufacturing districts, if they asked a sensible man what was the great social evil of the time, 99 out of every 100 would give the same answer, "It is drunkenness." He knew from returns that in a single town in Lancashire, with between 70,000 and 80,000 inhabitants, 1,000*l* was daily spent in intoxicating drink. If they asked the judges what was the cause of the greatest amount of crime, they would answer, "Drunkenness." If they asked medical men what was the cause, directly or indirectly, of disease and of more than one-half of the cases of insanity in our hospitals and asylums, they would give the same answer—"Drunkenness." (Hear, hear.) He believed that the trouble of finding the cure for this evil was the great problem of our time. (Hear.) How were they to do this? Not by restrictive laws, though, perhaps, they were well enough in their way; but prohibitory legislation would not effect the cure. In order to apply the remedy, they must first find the cause, and he believed that, more than anything else, the great cause was the want of right intellectual occupation for the working classes. (Cheers.) It was hardly possible for hon. gentlemen, leading the lives they did, engaged as they were in intellectual pursuits, to conceive the intense, the utter weariness that came over a man without any intellectual pursuit—who was engaged in an unending and unvarying routine of bodily labor. (Hear, hear.) The first requirement they ought to have in view ought to be to afford some means of recreation and self-instruction to the people (hear;) he said, and he asserted it without fear of contradiction, that for such improvement and self-instruction time was not given in any week day. As regards the question of desecration, he did sincerely and earnestly say, with deep respect for the feelings of those who desired to see the Sabbath applied as a day of rest, that the purpose for which that day was intended was carried out when it was applied to any purpose of moral and mental improvement. (Cheers.) As to the labor question, he thought that he could easily show that the opening of a museum or picture-gallery required the employment of a very limited number of persons. All experience as to the conduct of the people in such instances always proved that they conducted themselves admirably, and that little mischief was ever done. The presence, therefore, of curators and managers would not be wanted; they would only require ordinary and simple instruction, and the supervision of a limited number of police. It was true that they had no more right to do an injustice to a few than they had to many; but, after all, this was only a question of degree; they knew that the same persons would not have to be employed Sunday after Sunday, and that relays could easily be obtained for the limited number that would be required. He did not know on what ground hon. gentlemen could argue against the employment of attendants in a national institution to wait on the public, because there was not a family or household in the country that altogether dispensed with domestic services on that day; even those who advocated the strictest observance of the Sabbath did not hesitate to employ a domestic servant; and if a family of eight or ten persons did not scruple to give employment to some one domestic servant during a part of that day, he did not see on what general ground or principle it could be contended that, perhaps, more than 20,000 persons who entered a museum or picture-gallery had not a right to command the services of the limited number of servants they required, as this would probably not amount to more than one attendant to every 500 persons, or not more than one-tenth of the labor, proportionate to the advantages and conveniences derived, which is required in every ordinary family. (Hear, hear.) He could only say that he should vote for this resolution, believing it to be, educationally and morally, a most important measure; believing it would be a precedent which would be applied not only to this metropolis, but to all the great towns of the country, and believing that the line of demarcation which an hon. gentleman had told them it was so difficult to draw between places of an innocent and improving recreation and those of a wholly opposite nature would be easily defined by those who were not willfully blind to it. (Loud cheers.)

Remainder next week.

THE ROBIN'S APPEAL.

As various methods are now resorted to, to prevent the killing of innocent and useful birds, we commend the follow lines to the attention of thoughtless boys:

O kill me not!
  Thou thoughtless boy,
While singing here
  In all my joy;
'Tis wicked thus
  To harm me now—
Still let me hop
  From bough to bough.

O kill me not!
  Life's dear to me
As 'tis to you,
  So wild and free—
Now poised in air,
  Then sailing low—
How full of glee
  We only know.

O kill us not!
  In yonder tree
My mate and I
  Have nurslings three;
You would not, sure,
  That these should die
For want of food,
  Up there so high.

O let us live!
  And day by day
We'll utter thanks
  In our own way;
We'll surely come
  Quite near your door,
And sweetest songs
  Sing o'er and o'er.

J. M. H.

THE EARNEST LISTENER.

A pious clergyman had a careless and idle son, who left his home, went on board a vessel, and sailed to a foreign land. His sorrowful parents could only pray for him, and send him good advice when they wrote to him. The ship which contained their boy reached a distant port, and was there waiting to take in a fresh cargo, when the sailors went on shore and brought back with them a little native boy, who could play some curious kinds of music. He amused them for a long time, but at last he said, "You must now take me on shore." The sailors told him that he must not go yet. "Oh, indeed, I cannot stay any longer," replied the little black boy, "and I will tell you why. A kind Christian missionary has come near the village where I live. From him I have learned all I know about Jesus Christ, in whom I now wish to believe. This is about the hour when he meets us, under the shade of a tree, to tell us more; I want to go to hear him." The sailors were quite evercome by the boy's cries, and at once rowed him ashore.

The clergyman's thoughtless son was struck with the words of the little heathen boy. He felt condemned by them. "Here am I," he said to himself, "the son of a minister in England, knowing far more about Jesus Christ than that boy, and yet caring far less about him! That little fellow is now earnestly listening to the word of life, while I am living quite careless about it!" In great distress of mind he retired that night to his hammock; but his pious father's instructions came back to his thoughts, and reminded him how he might seek and find that salvation which he so much needed. He became a real Christian; and great was the joy in his English home when the happy tidings reached his parents.

Are there none of our young readers to whom the desire of this heathen boy, to hear more of Christ should come with equal force? With so many more ways than he had of knowing the true God, and Jesus Christ his Son, how few children in our own land show half his eager desire for religious knowledge, or are so sincerely desirous to believe in the Saviour. PRESENTIMENTS OF DEATH.

We know not how it is, but there seems to be a somewhat prevalent impression that death never comes, in the most absolute sense, unawares. The number is not small (we are inclined to think) of those who believe in something like a *presentiment*—a previous apprehension that the dreaded event is near. How this presentiment obtains possession of the breast, no one undertakes to explain; but that it does so, in some mysterious manner, so that one who has not long to live feels differently from what is ordinary with him, and looks forward with something like certainty to the approaching catastrophe, is (we apprehend) an opinion of such extensive prevalence as to justify at least a passing notice.

It seems to be confirmed by testimony somewhat credible, that there have been a few rare instances, in which the presentiment we speak of has been both entertained and fulfilled. At all events, we do not care about disputing the fact at present. But that there is any thing in the constitution of nature, or in the inspired Scriptures, that gives the least reason for any body and every body to think that he will not be taken out of the world without some preädmonition mysteriously and extraordinarily impressed upon his mind, we cannot believe. To whatever extent the idea may prevail, it seems to be more like an outgrowth of human depravity than a suggestion of nature. We look upon it as one of those fascinating delusions, by which the sinner is induced to procrastinate his preparation for another world. He waits for this presentiment to take possession of his breast, and while waiting, is *suddenly* summoned to appear before God.

The Scriptures do certainly convey the idea, that the day of one's death cannot be foreseen by any but God. They teach that when the wicked are whispering to themselves peace and safety, then sudden destruction cometh upon them, (1 Thess. 5: 3)—that he who hardens himself against oft-repeated reproofs, shall suddenly be destroyed. (Prov. 29: 1.) And the probability is, that the more wicked people become, the more stupidly blind they are in reference to the calamity that is coming upon them. So far from their being favored with a presentiment of death, the tendency of this course of life is rather to obliterate any such feeling, even if there was something in the constitution of nature that otherwise led to it. As for the righteous, though their manner of life might be regarded as better calculated for entertaining and nurturing the feeling, we know of nothing in the Word of God to warrant the notion that death does not come upon them at an unexpected moment. Our Lord told his disciples to watch, because they could not know the day or the hour when He would come. And whether this admonition was given in view of their dying hour, and with particular reference to it, or primarily with reference to some other event, it is clear, from the context, that it was given in view of the winding up of some very important period of their probationary state. And if there is an analogy running through all the different dispensations of Providence—as from the immutability of the Divine Being we would naturally infer—it would seem to be implied, if not directly said, in the passage, that the time of winding up their entire probation was to be hid from them.

From a passage in the Book of Psalms, it has passed into a common saying, that the ordinary term of human life is three score years and ten; and perhaps most persons who enjoy a moderate share of health, hope to attain this period. Hence there is rarely a case of sickness so severe but what the subject of it hopes to recover, by the use of suitable remedies, and reach this age, notwithstanding there is, in the great majority of instances, an utter disappointment of such hope. The consumptive patient often thinks he will get well, when he has not an hour to live. We knew a person, once, so wasted by this disease that he could neither move his limbs, nor speak above a whisper, who felt confident of his recovery, to within an hour of decease. "It was true," he said, "the physicians told him he would die, but he thought he knew his own feelings best." We doubt not that thousands of similar cases have occurred.

Sick persons are often *afraid* of a fatal termination of their malady, but this fear is not what is usually understood by a *presentiment* of death. Their fears of death are often not realized; and even where they are, we cannot detect any thing in them which is essentially different from what is felt in cases where they are not. Their fears are seldom unaccompanied with the hope of recovery, and in the midst of all their distresses of mind and body, they are full of plans for the future. Some favorite scheme, or some undertaking upon which they had just entered, but which their sickness restrained them from finishing, still engrosses their hearts, and they will not give it up. The ante-diluvians ate and drank, bought and sold, planted and builded, till the day of their calamity came upon them; so they did in the days of Lot, not dreaming that destruction was impending. Human nature is the same still. Men often fear death, but have no such presentiment of it as amounts to a *special* admonition to hold themselves ready for its approach. It would probably answer no good purpose if they had; for "if they hear not Moses and the prophets, neither will they be persuaded though one rose from the dead." T. B. B.

LETTERS FROM PALESTINE—NO. 10.

The Climate--Sickness--Jews--Travelers--Land, how purchased--Missionary Labor--Sabbath Discussion--Tracts.

JAFFA, April 9, 1855.

The Jewish Passover closes to-day. The past week has been a time of many ceremonies and great display in Jerusalem, and in the neighboring towns, yea, throughout the Latin, Greek and Armenian churches. Even Mahommedans have spent five days in praying for the dead! Greeks, Catholics and Moslims still hold to salvation by works of self-righteousness—that the world to come is a state of probation, as well as the present. How slow are the nations to learn to trust in the ONLY NAME given under heaven whereby we can be saved! From the first to the fourth of February there was rain; also about the tenth of last month. The rest of the time, for two months, the weather has been very fine. At present the spring crops suffer from drouth. More rain is expected before the beginning of the dry season. The average of the thermometer for February was 50 at sunrise, 70 at one P. M., and 52 at eight P. M. For March 52, 72, and 60. This month the heat in the middle of the day is quite oppressive. From November to the present the health of our people has suffered considerable. Colds, chills and fevers have afflicted three families, as also typhoid fever and inflammation of the lungs. All are now convalescent. I think the sickness of each and all has been owing more to poor house accommodations, than to any unhealthiness of the climate. Thus far self and family have been favored with more than our usual health. Sir Montefiore is about establishing a weaving manufactory for the Jews at Jerusalem. His agent, Mr. Bradshaw, of Manchester, Eng., informs me that he has imported a dozen looms, of simple structure, and has already rented a building in a healthy part of the city, where he expects to be at work in a few days. He speaks very highly of Sir M., as very liberal in his views, and benevolent to the poor of all classes. This looks even so, as Mr. B. is a member of the Baptist persuasion. Let others come and aid in building up Zion. There is room enough for all, especially for those who come in the name of Christ the Lord.

Visitors and pilgrims are continually arriving from all parts; from the States, Lower Canada, England, France, Germany, Asia Minor, &c. The Prince of Belgium and suite arrived the 24th ult.; took lodgings in the Latin convent, but left the day following for Jerusalem. The "Ebuel Sultan," *son of the Sultan*, as the Fellahs called him, was all their talk for a few days. He appeared in plain citizen's dress, and is apparently about twenty-two years of age. Rev. Mr. Van Doren and lady, of the Dutch Reformed church, New York, arrived here the 17th ultimo, en route from Egypt and Jerusalem.

He preached for me on Sabbath, the 24th. Text 1 Cor. 1: 30. A good text and good sermon, which made a good meeting. Mr. Smith, ex-Consul General for Syria, has left for the U. S., his place being filled by Mr. Wood, lately arrived. Mr. Van Doren left the 28th, per French steamer, for Beirut. The same evening, self and family and sister Minor, went aboard the Austrian steamer and enjoyed a pleasant interview with Mr. Smith and family. He is a good man, has ably filled his office, and it is with deep regret that we part with him. May the winds and waves have charge of him and his on the voyage home. On the 2d inst., had a brief interview with Dr. Phillips, Scotch missionary at Alexandria. Also with Mr. Lounds, thirty-five years a missionary in the Mediterranean; now agent of the British and Foreign Bible Society.

A word here may not be out of place in answer to inquiries about obtaining a good title to land in Palestine. First, no foreigner can hold real estate in his own name. Second, it is said that a firman has been granted by the Turkish government granting this privilege to foreigners, but for reasons best known to himself, the Sultan has not proclaimed it as law. Third, foreigners buy land by means of the sum required, the land being given as a pledge for the redemption of the money within a given time. Still the deed must be and is made out in the name of the native. Yet, as the land is not redeemed, the former proprietor gives to the foreigner a paper surrendering the claim of the land to the latter. Fourth, they also buy in the name of the wife; her name being written in the deed as a citizen of the country! Several of those who are in this way owners of land inform me that they feel perfectly safe, and consider their titles good; and, though it may seem unsafe to the inexperienced, all appear to think the good time coming is near at hand, when the government will grant us all the rights we want.

The rains and sickness obliged us to cease from public worship for several Sabbaths during winter. Meetings on the Sabbath are now resumed. Worship on First-day has been laid aside since November. I expect to commence these meetings again in a few weeks. My time has been constantly occupied in the duties of the mission, and I am thankful to say, that my health has been adequate to the work. Studies, visiting the sick, calling upon the people, receiving calls from Jews, Arabs and foreigners, preaching and recommending the Saviour to dying men, &c., such are my labors, through which I sincerely hope some souls may be converted, saints edified, and God glorified. Of late, three Mahommedans have read the Gospel in my house. One of them, a bright youth, said he had never before looked into the New Testament. My plan is to introduce religion to all callers, and, as much as possible, bring their attention to the word of God. In this way Catholics and Greeks, and even Jews, have accepted my invitation to spend a portion of our time in searching the Scriptures. As much as possible I strive to call their attention to Christ. "Oh, your religion is good," say many; but alas, they are not ready to adopt it. Last summer I sent some French, German and English Sabbath tracts to Constantinople, by an Armenian friend. About the same time some were sent by a lady going to Mount Lebanon, and thence to England. Have not yet heard from these individuals. I rejoice, however, for the precious promise, "My word shall not return unto me void." A month ago, I was visited by Mr. H., missionary elect to Bona, Algeria, North Africa, from Jerusalem, where he had spent three years. He is sent out by the Church Missionary Society. We discussed the Sabbath question for nearly two hours. The discussion was conducted in a kind spirit, and the question as thoroughly investigated as time would permit. My heart rose to God in prayer that Bible truth might not be rejected. He accepted a couple of tracts in French, the "Appeal for the Restoration of the Sabbath," and "The True Sabbath Embraced." Perchance the blessed word may find its way into regions of darkness hitherto unknown. Last week two Parisian Jews called and spent an hour. They accepted a copy of each of the aforementioned tracts, as also one in French, entitled the "Fourth Commandment." Had never heard of us as a people, nor met with the writings of Christians setting forth the seventh-day Sabbath

They promised to read the tracts and give them to some of their Christian acquaintances in Paris. Perhaps they may think to fulfill their promise. I learned the next morning they had been reading them. Last First-day a Greek asked me if I did not know that that day was the Sabbath. I referred him to the Bible for the true Sabbath, but poor man, he cannot read, and withal is so prejudiced, he will not listen to truth. Thus, by humble efforts in public and private, the *word* and *will* of God is being made known to the ignorant and impenitent, and to the believer for his comfort, edification and instruction in the way of the Lord more perfectly. Pray, dear brethren and sisters, that our labor may not be in vain in the Lord. WM. M. JONES.

THE CENTRAL ASSOCIATION.

The Seventh-day Baptist Central Association held its twentieth annual meeting with the church in DeRuyter, Madison Co., N. Y., commencing on Fourth-day, June 6th, and closing on the following First-day.

Agreeable to appointment, James Summerbell, of Adams, preached the opening discourse, taking for his text, Acts 9: 31—"*Then had the churches rest throughout all Judea and Galilee and Samaria, and were edified; and walking in the fear of the Lord, and in the comfort of the Holy Ghost, were multiplied.*"

The discourse was followed by a brief intermission; after which the Association was organized by the appointment of JAMES R. IRISH, Moderator; JASON B. WELLS, Recording Secretary; and J. B. CLARKE, Assistant Recording Secretary.

Letters were received and read from thirteen of the eighteen churches of which the Association is composed. The churches at Newport, Richland, Pinckney, and Diana, have been so much reduced by removals and other causes, that they do not sustain regular meetings, and sent no communications to the Association. Of the letters received, several were very encouraging. The DeRuyter church reported an interesting revival within the past year, and 46 additions, of which 36 were by baptism. The Scott church reported 20 additions by baptism and 8 by letter; a good degree of harmony, and the cessation of trouble from "spirit manifestations." 2d Brookfield reported 37 additions; 3d Brookfield 19 additions, of which 11 were by baptism. The letters of two of the churches spoke of having "corrected" their lists of members by striking off the names of those whose present residence is not known; in one instance about forty were thus disposed of. This circumstance, together with the fact that in two or three cases different churches reported the same preachers or deacons, suggested the importance of some better system of dismissing and receiving members—a system which will make sure that a church granting letters to absent members will be notified when they are received into other churches.

The Committee which has charge of the Missionary Operations of the Association, reported that all they had done during the past year was to keep Bro. L. M. Cottrell at work a part of the time in Chenango County. Their report spoke of the difficulties with which they had to contend, mainly growing out of a restriction placed upon them not to create a debt, while the churches do not contribute the funds to enable them to carry on operations without running in debt to the missionary laborers. A plan was agreed upon to obviate this difficulty, and it is hoped that more will be accomplished during the coming year. In the discussion of the subject, a deep interest was expressed in the welfare of the feeble churches within the bounds of the Association—such an interest as will not be satisfied without more active and extensive efforts to benefit them.

Among the requests in the letters from the churches was one from the church in Scott, that Eld. John P. Hunting, formerly a minister of the Baptist denomination, but now a Sabbath-keeper and a member of the Scott church, be received as an Elder in the Association, after a satisfactory examination. Another request was from the 1st Verona church, for the examination by the Presbytery of David P. Curtis, with a view to his ordination at Verona by a committee of preachers whom the Association should appoint, if his ordination was recommended. Both these requests were referred to the Presbytery, and in compliance with their report, Eld. Hunting was received as a member of the Association and of the Presbytery, and the right-hand of fellowship was extended to him by Eld. Wm. B. Maxson. The examination of Bro. Curtis was sustained, and his ordination was recommended.

Several subjects of importance were brought before the Association by Reports and Resolutions, which elicited much interest and discussion. These Reports and Resolutions will be printed herewith. The Report on Education occupied the attention of the Association most of the afternoon of Fifth day, the discussion of it being participated in by W. B. Maxson, G. B. Utter, A. R. Cornwell, H. L. Jones, J. Summerbell, H. H. Baker, J. P. Hunting, L. M. Cottrell, Joshua Clarke, J. R. Irish, and others. The Resolutions were made the special order for the afternoon of Sixth day, and they were remarked upon by a large number of members of the Association. The discussions were of a deeply interesting character, and we regret that our notes are not sufficiently full to enable us to give an outline of the remarks of the different speakers.

The Association made arrangements to secure a number of essays to be read at its next session. J. R. Irish was appointed to write on Early Piety and the practical effect of an early inquiry and decision in relation to the field or department of labor to which a consecration should be made; Wm. B. Maxson on the Spiritual Improvement of the Lord's Supper, and whether any change is required among us in relation to the manner and frequency of observing it; James Summerbell on the importance and best method of conducting Sabbath Schools, and the early training of children in the principles of religion; John Maxson on Church Discipline, embracing an inquiry whether purely private difficulties should be brought into the church; J. P. Hunting on the Use of Tobacco.

The other appointments of the Association were as follows: John Maxson, of De Ruyter, Treasurer; A. R. Cornwell, Corresponding Secretary; H. L. Jones, Joshua Clarke, Willard D. Wilcox, with the other officers Executive Committee. James R. Irish was appointed delegate to the next meeting of the Eastern Association; A. W. Coon, H. L. Jones and Luke P. Babcock to the Western Association; and A. W. Coon to the North-Western Association.

The next meeting of the Association is to be held with the church in Adams, N. Y., commencing on the fifth day of the week before the second Sabbath in June, 1856. J. R. Irish was appointed to preach the Introductory Discourse; A. W. Coon, alternate.

The deliberations of the Association throughout were harmonious and more than usually interesting. The delegates and brethren generally felt that it was good to be there, and it is reasonable to hope that they will carry to their respective fields of labor a measure of the spirit which was excited by the exercises of the occasion. The only question brought before the Association which seemed likely to disturb its harmony, related to affairs in Jefferson County. One of the Council appointed last year to visit the churches in that region, made a written report of his labors, which was referred to a special committee. The committee advised that the Association take no farther steps in the matter at present, and that advice was adopted.

Of preaching during the meeting of the Association there was certainly no lack in quantity, nor in quality if we may judge from the general expression of those who listened to it. We are able now only to give a summary of the religious exercises. The evening following Fourth-day, a discourse was preached by L. M. Cottrell. On Fifth-day morning Elias Burdick preached, and in the evening D. P. Curtis. Sabbath evening was devoted to a conference and prayer meeting. On Sabbath morning there was a discourse by Wm. B. Maxson, followed by a collection for the Tract Society, and then by the administration of the Lord's Supper. In the afternoon preaching by G. B. Utter, and in the evening by J. P. Hunting. On First-day, the discourse in the morning was by A. W. Coon, followed by a collection for the Missionary Society; in the afternoon by Joshua Clarke, and in the evening by H. H. Baker. Several of the ministering brethren also preached in neighboring churches on First-day.

Resolutions.

1. *Resolved*, That our Foreign Missions, begun in obedience to the command of our blessed Redeemer, and the genius of our holy religion, now demand of us increased appropriations of our means, and more earnest prayers, that they may be prospered and blessed of Heaven, and triumph over the powers of darkness.

2. *Resolved*, That American Slavery is anti-Christian and anti-Republican in its character, and aggressive in its unrighteous demands; and that we feel bound, by every lawful means, religious, political, and social, to oppose unceasingly those unrighteous demands.

3. *Resolved*, That we sympathize deeply with our brother Pardon Davis, who is unrighteously doomed to imprisonment for the exercise of the nobler impulses of manhood, and a practical development of Christianity, in relieving the oppressed; that we are glad that our brethren of the Eastern Association have appointed a Committee of inquiry in relation to what may be done for his relief; and that our Corresponding Secretary be instructed to act in connection with that Committee, as far as may be to accomplish the object sought.

4. *Resolved*, That we request the churches of this Association to unite with the churches of the Eastern Association, on the last Sabbath in June, in earnest prayer to God for the deliverance of Brother Pardon Davis from prison; and that we urge them on that occasion to remember also any others who may be suffering imprisonment for aiding the panting fugitive in his flight from bondage, and above all to remember "as bound with them" the three millions of poor slaves who are wearing out their lives in the dark prison-house of Slavery.

5. *Resolved*, That we hail the passage of the Prohibitory Liquor Law in the State of New York as an event of great promise, and that, believing its influence will be salutary upon the religion, morality and well being of society, we will do our utmost to maintain and enforce it.

Report on Education.

The Committee on Education respectfully report, that after a careful examination of the information they could collect, they are grateful to learn that the Literary Institutions in which we are more directly interested have been unusually prosperous during the past year. They believe that the young men and young women in our Association who are aiming at a thorough course of education, are rapidly increasing. They are of the opinion that our Academies compare favorably with similar Institutions in the country. There is manifestly among the churches of our denomination a growing interest in the cause of education. Though we appreciate the schools already established, yet we trust the day is not distant when we may have a School of a higher grade, to which these shall be but auxiliaries. Your Committee find with pleasure, that there is an increasing degree of harmony and union of effort among the various Literary Institutions of our denomination. While we gratefully acknowledge and appreciate the persevering labors of our clergy for the support and encouragement of education, yet we firmly believe that they should put forth more vigorous efforts to encourage the rising generation to prepare themselves for future usefulness by a thorough course of study.

We submit the following resolutions:—

1. *Resolved*, That in view of the increasing demand for men and women of higher literary attainments, our brethren should earnestly and prayerfully devote themselves to our educational interests.

2. *Resolved*, That upon the Sabbath School rests, in an important sense, the prosperity of education and of the church; and therefore our churches should exhibit a lively interest in the encouragement of this important institution.

3. *Resolved*, That it is the duty of parents to give their children at least an academic education.

4. *Resolved*, That this Association hails with pleasure the proposition to establish among us, as early as practicable, a Collegiate and Theological Institution.

Report on the State of Religion.

Your Committee on the State of Religion report, that after a careful review of the communications from the churches, we feel that we have great cause of gratitude to our Heavenly Father, for the renewed tokens of his favor during the past year. Several of our churches have enjoyed the revival influence, by which Christians have been greatly refreshed, and sinners brought from darkness to light. These cheering considerations, and accessions to our numbers, have given a new impulse to our efforts in the cause of Christ. There is an increasing desire among our brethren for a higher state of holiness, and for the extension of the Redeemer's kingdom. We rejoice that the spirit of benevolence is rising, and that there is a fixed determination manifested to sustain our missionary operations. The children in the churches of this Association are, to a great extent, favored with Sabbath School instruction. Yet we mourn that some of our churches are without discipline, without the regular preaching of the Gospel, and the joys of social worship, and that prayer-meetings and family prayer have not a more prominent place in our communications. But we take courage in view of what the Lord has done for us, and from the strength gained, we resolve to make a more vigorous advance upon the kingdom of darkness. May the Lord imbue us more deeply with the spirit of our Divine Master, and crown our efforts with abundant success.

Report on Publications.

The Committee on Publications, in looking over the field which naturally comes within their observation, find much that is interesting, though but little that is probably new to the Association.

The denominational Tract Society continues to print and circulate its publications on the subject of the Sabbath—a work in the prosecution of which it has met with gratifying success, and is entitled to the continued sympathy and support of the churches. The Committee are sorry to learn, however, that the contributions to the funds of this Society during the past year have fallen considerably short of its expenses in printing and circulating Tracts; and we call attention to the fact in hope that it may not long exist. It should be remembered, that the Society is only the almoner of the churches, and that its duty is only to invest in the best manner what is committed to it. Upon the churches and individual contributors, therefore, rests the responsibility of the success or failure of its work.

The Seventh-day Baptist Publishing Society continues to supply the denomination with weekly and monthly periodicals well adapted to its wants, as a medium of communication, a bond of union, and a stimulant to increasing activity in the promotion of the interests of Christ's kingdom on earth. In this work the Society asks no donations, but relies for pecuniary means entirely on the receipts from subscribers to its publications. Under such circumstances, the duty of promptness in meeting all obligations to it, is imperative. The Society has also issued, within the past year, a volume of Music and Hymns for the use of Sabbath-Schools and Choirs, to which the Committee take the liberty of directing attention, and recommend its general circulation among the churches.

In conclusion, the Committee think there is occasion for congratulation on the part of the Association, in view of the regular issue and creditable appearance of our denominational publications. May they long continue to deserve and enjoy a liberal patronage.

AN OLD-FASHIONED REVIVAL.

The *Recorder* has already given some account of an interesting work of grace in the Presbyterian Church in Broome street, New York, of which Rev. Mr. Hatfield has long been pastor. In a recent number of the N. Y. *Evangelist*, the pastor himself narrates the facts in the case, which we copy in part, as an illustration of what may properly be called an old-fashioned revival:—

It was my privilege last Sunday, April 22d, to propound for admission to the church under my pastoral care, *one hundred and twenty-three* candidates.

The work of grace, of which we are reaping these abundant fruits, has been in progress for many months. As early as last August, during the fearful prevalence of the cholera, hopeful indications of a revival appeared. The first Sunday of the present year was marked by an evident movement on the hearts of the unconverted. The Annual Fast occurred the next day, January 8th, and was well observed by the more spiritual part of the church. It has been our uniform custom to meet in the lecture-room on Tuesday evening for prayer, and on Thursday evening to hear the word of God. On the following week, a sermon was substituted for the Tuesday evening prayer-meeting, and an additional preaching service appointed for Wednesday evening. This arrangement continued for the next three months, with no public service during the week, except on the Friday evening previous to the communion service in February.

Cases of religious interest began to appear from the first. The whole number who had conversed with the pastor in relation to their personal salvation, previous to the third week in February, was about fifty or sixty, several of whom had then begun to entertain a hope in Christ. On the third Sunday in February, the Holy Spirit was poured upon the congregation with great and manifest power. Scores of persons have since referred their awakening to that day. During the succeeding week, the work of conviction and conversion advanced greatly. As many as sixty were found at one time in the inquiry room, and the place of meeting was crowded. The interest now became general, spreading over the congregation, and affecting almost every family among us. The members of the church were greatly revived, and entered into the work with a deep and all pervading interest. At the administration of the Lord's Supper, on the last Sunday in February, a large number of non communicants were present, all of whom, with but very few exceptions, appeared to be much impressed with the solemn services. A conference meeting for personal conversation with inquirers and converts was appointed for the following evening, February 26th, and one hundred were present, the most of whom were beginning to cherish a hope in Christ. Similar meetings for this class have been held every Monday evening since, at which 120 or 130 have ordinarily gathered, to be personally addressed by the pastor and elders, who have been assisted by a few other brethren of the church.

In this manner the work has progressed to the present time, and is still in progress. The public services on Sunday are limited to the morning and evening. In the afternoon, the people meet in the lecture-room for prayer and exhortation. The room, though of more than ordinary capacity, is ordinarily filled and sometimes crowded. The meeting is conducted by the brethren of the church, and the interest manifested is often overpowering. The young people meet for prayer an hour before the Sunday evening service, and this meeting is attended with a like interest. The converts meet for prayer at private residences on Friday, the females in the afternoon, and the males in the evening.

In this whole work the pastor has had no ministerial assistance, in preaching. His ordinary engagements have required five sermons weekly, or seventy in all since the year commenced. The sermons in the lecture room have been entirely unwritten, and those on the Sunday from brief notes, with the exception of a few Sunday evening discourses on Inspiration, which were written in full. The subjects of discourse have been such as would naturally suggest themselves in a revival. The plain, simple, unadulterated truths of the Gospel have been presented as pointedly and as earnestly as he knew how to do it. Scarcely a sermon has been preached among us for the last three months that has not resulted in conviction and conversion.

INFLUENCE OF ONE SUNDAY SCHOOL.—The old scholars and teachers of Sunday Schools, at Stepney, England, held a meeting the last month. After singing and prayer, there was a brief history given of the church. It was formed in 1644; the Chapel erected in 1674, during the pastorate of Matthew Mead, one of whose books, the "Almost Christian," was well known years ago. The record of the dedication closed with this petition: "The Lord make it a place for the begetting of many souls unto Christ." And the account says, God heard the consecration prayer—a pleasant reminiscence to be called up at the end of one hundred and eighty years, and suggestive of the importance of commencing every such enterprise in the fear of God, and an absorbing desire of promoting his glory. The Sunday School was formed in 1820, and spacious rooms erected for its accommodation in 1824, more than one half the entire cost having been defrayed by an officer of the church. Since 1820, more than fourteen thousand children have been admitted into the schools taught in these rooms, and of these many have been scattered over all parts of the United Kingdom and the British colonies. Nine or ten scholars and teachers have become ministers and missionaries. There are now about eight hundred scholars and sixteen teachers connected with the schools. It was a place where many souls had been born into the kingdom of God. The wide-spread and beneficial influence of the institution were illustrated by facts communicated in letters from former scholars.

SUNDAY SHAVING IN BOSTON.—In the Police Court of Boston, recently, Justice Russell delivered the opinion of the Court in the case of E. C. Deming, barber. "In this case the defendant was charged with doing work on the Lord's Day, shaving other persons than himself, the same not being a work of necessity or charity; second, with keeping open his work-shop for the same purpose. On a former complaint, the defendant was acquitted on a technical point that his place of business was not a shop. In the present case the first point was whether shaving was a work of necessity or charity. On that point the Justices of the Court were all agreed that it was. If shaving by a barber of another person on the Sabbath is not a work of necessity or charity, then is a person who shaves himself liable, and even the cooking of food upon that day is illegal. The exchange of ministers, the celebration of the marriage rite, or the performance of the funeral ceremony, might be held as an infringement of the law. He cited the opinion of the Court, delivered by Chief Justice Parker, in favor of his decision. On the second point, the keeping open of a shop for such a purpose, the decision of the Court was, that it could not be the intention of the Legislature to bring such cases within the scope of the law in regard to the infringement of the Sabbath. He alluded to the more liberal sentiment prevailing in modern times in regard to the observance of the Sabbath, and in conclusion said he was aware that the most of those engaged in the business would greatly prefer to have their places closed, but that does not alter the law in the matter. In the decision of the point in regard to keeping open shops, Justice Rogers had doubts upon some parts of the decision. The result of the decision was that the defendant was ordered to be discharged."

THE HUGUENOT SPIRIT.—The old Huguenot spirit still lives and animates a few noble Frenchmen, as it has ever done since the days of the great massacre. The following incident, related by a correspondent of the *Crusader*, affords one of many recent proofs of its existence:—

"During the ceremony of jubilation over the announcement of the immaculate conception, being within St. Peter's, I witnessed a curious occurrence between a Papal major and a French officer. Major Casciani (father of that famous young Casciani who denounced to the Papal police several of his political friends) having ordered his soldiers to kneel down, perceived that a French officer was standing, Casciani commanded him *genou a terre*, but the foreign officer remained immovable. This irritated the Papal centurion to such a pitch that he drew his sword in the temple of the goddess of heaven, and was going to assail the French officer, when Col. Guglielmi interfered in time to prevent a collision. I learned afterwards that this officer is a Protestant, and when the ceremony of the Immaculate Conception was over, he asked the Papal major with what right he ordered him to kneel down before the holy wafer? "I am commanded by *my sovereign*," answered the Papal major. "Well," replied the stern Huguenot, "tell your sovereign that the French have no orders to receive from him, we being his protectors, and that, for myself, I kneel only to God."

IMPATIENCE FOR NOTORIETY.—The following remarks by a writer in the New York *Evangelist* strike at the vanity discovered in the restless desire for notoriety, too often seen in the pulpit:—

"One reason why there are so few really great men now-a-days, is the impatience for notoriety of young writers and speakers. They wish to rush into fame at once, and to be able to command the highest places in their profession. Even ministers of the gospel show an itching to appear on public platforms, and to have their names shine in the newspapers. To one who has seen much of the world, and is able to compare men with each other, nothing so surely indicates poverty and emptiness of mind as this buzzing to attract attention. A clergyman may indeed aspire to eminence. He may desire to be a truly great, as well as a good man, and so far, his ambition will but stimulate his mind, and make him the more useful. But for the sake of decency, let him drop this boyish fondness for appearing in a public exhibition."

REVIVAL AT ALFRED CENTER, N. Y.—A letter from N. V. Hull has the following:—

"As it is always refreshing to the Christian to hear of the advancement of the Redeemer's kingdom, and especially so when it occurs in an institution of learning where centers so much of interest, I take pleasure in being permitted to say to the readers of the *Recorder*, that during the present term of Alfred Academy God has been pleased to bless the word preached, and the supplications of his children, to the conversion, as it is believed, of a goodly number of the students; so that they now rejoice more in that knowledge which maketh wise unto salvation, than in that which only bringeth to them good things in this life."

CHURCH AT BERLIN, WIS.—There is a revival going forward in this Church, as will be seen by the following extract from a business letter of J. M. Todd:—

"When I last wrote to you we were making a special effort in the Master's cause. Since that eleven have been added to this church by baptism, one by recommend, and on our communion occasion, another offered himself as a candidate for baptism, and will be baptized soon. The principal part of the above number are the youth of our society. If any thing is cheering in this vale of tears to the heart of a minister, it is to see the children and youth of his congregation embracing the Saviour."

DRIVING A BARGAIN.—The following circumstance is said to have transpired not a hundred miles from New Haven. A minister having received a call to settle, was waited on by a committe, when the following dialogue was had:—"Have you a family?" "Yes, a wife and four children, besides an aged mother." "How small a salary would you be willing to work for?" "I desire a competence for my support; but as for that matter, I am willing to refer it to your ability and generosity." "What do you say to $250?" "Well, it is not as large as I had expected; but I might manage to live comfortably with it. You furnish a parsonage of course?" "O, the parsonage is included in the salary. We call the parsonage $200." "Surely, you do not expect me to live on $50 a year?" "Well, not exactly—but we won't be hard on you. You can make something outside. If you like you can preach half a day every Sunday—or you can preach *the whole day for half a year*, at your convenience. The rest of the time you can have for yourself! *We won't be hard on you!*"

European News.

The steamer Africa, from Liverpool, with news to the 26th of May, arrived at Halifax on the 5th June. Below is a summary of the news.

On the 16th of May, Count Buol, on behalf of Austria, had an interview with Lord Westmoreland and Count Bourqueney, and suggested that the members of the Conference should meet again. The French and Eng- understood that if they assent to a meeting, lish Ministers could not give a reply, but it is Count Buol will then again attempt to arrange the third point.

The recent arrival of three French Divisions makes the Allied force in the Crimea about 200,000, namely: 120,000 French; 30,000 British; 40,000 Turkish; 11,000 Sardinian.

The seige of Sebastopol is continued, but without any advantage to either party, so far

It is expected that by the 20th of June, every available man in Great Britain, belonging to the infantry regiments, will have embarked for the war.

A deputation had recently seen Lord Palmerston, and expected to obtain an unconditional pardon for Smith O'Brien.

The ship G. L. Lamson, Capt. Cobb, of New York, was burned at sea May 4. The master, crew and twelve passengers were rescued by the bark Cortages, of Amsterdam, and landed at Plymouth.

California News.

The steamer Northern Light arrived at New York on the 6th of June, with San Francisco dates to May 16.

Governor Bigler visited San Francisco on the 12th ult., and had a public reception. The Governor made a speech at the Merchants' Exchange.

An intense excitement was gotten up in San Francisco by the rumor that 280 convicts had escaped from the State Prison on the 12th May, and were making their way in a body into the interior. The statement proved to be unfounded. Only three prisoners had escaped.

The clipper ship Charmer, which had sailed from San Francisco, it was said had on board several thousand dozen shovels, on English account, destined for the Crimea.

The California *Express* says that the Treasurer of the Eureka Quartz Company had laid upon his table what rarely adorns an editor's sanctum, viz.: between nine and ten thousand dollars of pure gold, the product of five weeks' labor of their mills.

Dr. Marshal, of Sonora, has received a commission in the medical staff of the Russian army, and will depart for the Atlantic States *en route* for Russia, on the next steamer. Dr. Marshal has resided for the several years at Sonora, and has earned the reputation of a thorough and skillful physician.

The British frigate Pique was yet off the harbor on the lookout for the two Russian privateers (the Kamschatka and Nicholas I.) at anchor in the bay of San Francisco. The former mounts ten guns, and is in every way prepared for a marauding expedition on the English merchant vessels trading on the Pacific coast. They are both, however, effectually blockaded. On the receipt of the recent news of the Emperor's death the Kamschatka fired a number of guns in token of respect.

ATTEMPT TO DESTROY A RAILROAD TRAIN.—As the mail train from New York *viâ* New Haven was nearing the city of Worcester, on Tuesday night, June 5, the engineer suddenly discovered an obstacle upon the track. It appears that the rails had been pried up, and five or six large stones had been placed underneath. By the force of the collision, the whole train was thrown from the track. The engine was thrown into a ditch. The baggage car was thrown completely over and broken up. Six persons who were in that car were considerably bruised by the flying pieces of baggage, but fortunately escaped without very serious injury. The fore part of the passenger car was broken in, and the trucks of two passenger cars were torn off, but all of the passengers escaped without serious damage—a few only receiving trifling cuts. This attempt to destroy a passenger train is supposed to have been the work of robbers, who hoped during the confusion to rob it of a large amount of specie, which was known to be on board in charge of Adams & Co.'s express messenger. The specie on board is understood to have exceeded half a million of dollars, and though it was much scattered it was all recovered and has been safely delivered. The Western Railroad Company offer one thousand dollars reward for the conviction of the parties who placed the obstructions on the track.

A SPLENDID VESSEL.—The screw steam frigate Niagara, building at the Brooklyn navy yard, is said to be the largest ship in the world, except the English steamer Himalaya. Her tonnage will be 5200; extreme length, 345 feet; breadth, 55; load line, 323; depth of hold, 31. There are three decks besides the orlop. The armament will consist of 12 eleven inch pivot guns, to carry 170 lbs. shot and a charge of 15 lbs. of powder. She is to be full ship-rigged, her mainmast being 111 feet long and 3 feet 4 inches in diameter; the main yard will be 55 feet and the spanker boom 67 feet. The Niagara is constructed wholly of live oak. Congress appropriated one million of dollars for her construction, but her cost, it is thought, will not be over $900,000.

The Philadelphia *American* records the death of Matthew Gilfrey, who was the standard bearer of the First Pennsylvania Regiment in the Mexican war. He was in the battles of Vera Cruz, Cerro Gordo and Puebla. The flag, which was perforated with bullets, he planted upon the heights of Cerro Gordo, and it is reported that he was the first man of the regiment who reached the inside of the enemy's works. His age is not given.

SUMMARY.

Captain Nye, of the Pacific, has always on board of his noble ship a box for contributions to the Society on Staten Island, which has in charge the Orphan Children of Seamen. Among the passengers to Liverpool on board the Pacific on her last voyage, were Beneventano, the opera singer, and Miss McCauley, who, to aid the Society in which Captain Nye took so much interest, offered their services at a concert to be given for the benefit of the Seamen's Orphans' Charity Box. The passengers entered heartily into the arrangement, and the result was $200 for one of the most deserving charities.

Among the forty or fifty Episcopal clergymen who were assembled at the recent consecration of St. Thomas' Church, New Haven, one was a lineal descendant of the first Puritan minister of New Haven, and another was a lineal descendant of one of his leading elders. It is also a fact of interest that a descendant of Oliver Cromwell is now a clergyman of the Church of England in Canada; while the last lineal male descendant of Martin Luther was a few years ago received back into the Romish communion.

Rev. Theodore Parker, of Boston, addressed a large audience at Wilmington, (Delaware,) on the 18th ult. His subject was slavery. This was the first appearance of this celebrated champion of Freedom in a Slave State, and his eloquent discourse was listened to with the most intense interest. The Lecturer was greeted with frequent and hearty applause during the delivery of his discourse, and at its conclusion the audience complimented him by a vote of thanks. "The world does move!"

Horace Greeley, writing from Paris to the *Tribune*, says: "The attempt to kill the Emperor has not created one half the feeling here that the shooting of Bill Poole did in New York, nor as an ineffective attempt to take the life of any one of the two hundred of the best known citizens of our emporium would induce. Except in official or military quarters, the whole affair has been taken very coolly."

There are consumed annually in and around Boston about 700,000 lobsters, the prime cost of which is some $80 per thousand. This figures up the snug sum of $56,000. About 500,000 of these lobsters are brought from the State of Maine and the remaining 200,000 are taken from Massachusetts Bay. Nearly 700 men are engaged in taking the fish, and some 800 tons of shipping are engaged to bring them to Boston, exclusive of what are brought by other conveyances.

The State of New York will pay off on the 1st of July, in addition to $1,500,000 Canal Certificates, a six per cent. Canal Loan then due of $1,130,534, and a 5½ per cent. Canal Loan of $184,285—making altogether $2,814,819. The new Loans for $1,250,000 and $1,500,000, to be awarded to the highest bidders on the 20th and 21st inst., with the premium, will no doubt more than reimburse this sum, and leave the Treasury a surplus of $250,000.

The handsome sum of $53,000 has already been realized from the sale of pews in the new Presbyterian church, situated on Wood street, Pittsburgh, and about forty slips remain unsold. The original cost of this imposing church edifice was but $50,000 which amount has already been realized from the sale of pews, leaving a surplus for minister's salary and incidented expenses.

The *North American Review* says, with regard to the European complications:—"One thing appears certain, which is, that whoever may get safely out of this Eastern question, Turkey will not. Her last hour is near. She began her career with a sword; all she can ask is a burial with military honors. She is at present joining the allies in firing the last volley over her own grave."

The June number of *Dinsmore's American Railway Guide*, compiled from official timetables of the various railroad companies in the United States and Canadas, and corrected principally by the railroad superintendents themselves, is a very reliable and perfect work, and the only one containing the timetables of all the railroads in this country.

A gentleman who has tested his theory by experience, asks the New York *Courier & Enquirer* to advise its friends to shake their shade trees thoroughly, to clear them of worms. He thinks that the operation repeated at intervals of four or five days for the next three weeks, will abate the nuisance.

A brakeman named Bean, while unshackling a car of lumber next to the engine, at Collins' depot, near Springfield, Mass., on the Western Railroad, on the 2d instant, slipped beneath the tender, the wheels of which and the engine passed over him, cutting off both legs below the knee. It was feared he could not survive his injuries.

A dispatch dated Elmira, N. Y., June 10, 1855, says: The express train going north on the Canandaigua and Elmira railroad, was thrown off the track yesterday afternoon, killing a man named McKnight, who was riding on the engine, and injuring several others.

A boy seven years of age fell into the Connecticut River, at Haydensville, a day or two since, and was rescued by the Rev. Mr. Cook. On his way home a person remarked to him, "You got pretty wet, didn't you?" "Yes," said the little one, "but the man that came after me got as bad a ducking as I did!"

The schooner Julius Pringle, which was fitted out some ten months since, from San Francisco, to go in search of the treasure which was supposed to be buried on Cocos Islands, has returned to San Francisco, after an unsuccessful search.

Nearly one thousand dollars were subscribed and contributed for Foreign Missions on the Sunday morning succeeding the late meeting of the Union, by the First Baptist Church and congregations, Chicago, six hundred of the sum to be appropriated to the payment of the debt.

Mr. John Wysong informs the citizens of Winchester, Va., that he has associated with him in the mercantile business, his daughter, Virginia, and that hereafter business will be conducted under the style and firm of J. Wysong & Daughter.

The Common Council of Albany have passed an ordinance imposing a fine of $10 for each case, where martial music is plyed by a band accompanying military or other companies attending funerals on Sundays.

A dispatch dated Washington, June 3, 1855, says: The number of applications received for Bounty Lands during the month of May was 45,500. The total number of applications that have been received is 158,800. The total number acknowledged, 75,000, and the total number of warrants issued, 1,260.

The Hawsville (S. C.) *Herald* learns that in consequence of the present and prospective scarcity of breadstuffs in that State, a large cotton-planter has sowed all his land in corn, and will raise no cotton crop this season. This course is recommended to cotton-planters generally.

The Louisville *Journal* recommends the Legislatures of the Southern States to pass laws prohibiting the sale, within their limits, of any commodity of the growth or product of the State of Massachusetts, because the latter State has passed a law "practically nullifying the Fugitive Slave Act."

The proprietors of the Unitarian Church on Church Green, in Boston, have invited to their ministry, Rev. Geo. W. Briggs, of Salem, Mass., with a salary of $1,500 Rev. Alexander Young, the learned historical writer, now deceased, was his predecessor.

On the 30th ult., at Winchester, Clark Co., Ky., Patrick Kusick was stabbed and killed by James Reddy. The murderer had arrived in Winchester from Lexington only two hours before he committed the bloody deed. He was arrested and confined in jail.

A young couple recently ran away, near St. Louis, Mo., and going up to Alton, Ill., were married. The father of the young lady, after a diligent but unsuccessful search for her, met with the father of the bridegroom, and thereupon beat that gentleman most unmercifully.

The Philadelphia *Times* says it has good reasons to believe that the sale of the Canadas to the government of the United States is about to be taken into consideration by the British Cabinet, and to be submitted to Parliament.

The City Marshal of Bangor, Me., seeing a man drinking something out of a bottle, offered him $3 to tell him where he got it. The money was paid over and pocketed, and the Marshal was shown to the pump! The bottle contained water.

It is stated that three or four thousand hogs have lately been slaughtered in Greencastle, Ind., for the use of the army in the Crimea. Contracts for thirty thousand head for the same purpose have been made with different parties throughout the State.

Dr. C. Sharpe and James Sharpe, lately convicted of manslaughter, for killing their brother John, at Charlotte, N. C., have been sentenced to 12 months' imprisonment, and to be *branded* with the letter M on the thumb and palms of their left hands.

The schooner Wm. P. Dolliver, Captain Bailey, arrived at Nantucket, Mass., on the 24th ult., from a five months' whaling cruise, with a cargo of oil valued at $7,000—paying her owners more than 100 per cent. on their investment.

A layman in the Episcopal Church has offered to contribute $40,000 to establish an Episcopal Theological Seminary in Massachusetts, provided an equal sum shall be given within three months by one or more persons.

Capt. C. B. Pratt, with a gang of skillful and experienced divers are at New York, to renew the effort to recover a portion of the one million of treasure known to have been on board the Huzzar, sank at Hurlgate during the revolutionary war.

The Albany *Argus* states that a ship endeavoring to get up the Hudson, got aground, *with her bow on the Hudson River Railroad;* and that, in order to allow the trains to pass by, the fore part of the ship had to be sawed off!

The Rev. Mr. Chase, of Brunswick—a small village adjacent to Troy—has run away with another man's wife, a newly-married woman, and but 18 years of age, whereas the monster is over 50, and has a wife and 10 children.

The Rutland *Herald* says there are seven hundred men constantly employed quarrying marble in Rutland county, Vt.; and there will be raised during the present year not less than 1,100,000 feet of marble.

One of the justices of Detroit, Michigan, has decided that liquor in any quantity may be sold from an original imported package, and it is the opinion that the Supreme Court of the State will sustain the decision.

Mr. Wm. A. Thomas, of Savannah, says that he has made certain improvements in Water Filters, whereby river water is rendered not only clear and pure, but devoid of all unpleasantness of taste.

A minister by the name of John Cumming, has been lecturing in Glasgow, Scotland, to show that the end of the world will take place in 1865.

Milwaukie, the big town of Wisconsin, is only 20 years old, and it has a population of 40,000. Its imports are $11,000,000; the exports $7,709,000.

There has never been a conviction for murder, nor a person hanged, within the limits of Randolph county, N. C., although it is one of the oldest counties in that State.

There are one thousand acres more of hops in Otsego Co., N. Y., at this time, than there were last year. This seems singular, in view of the late passage of the liquor law.

There were two hundred and ninety-one deaths in Cincinnati during the month of May, six of which were from cholera, and thirty-one of consumption.

Dr. Browne, of Ipswich, has recovered $6,000 from the New Haven Railroad Company for injuries received at Norwalk, two years ago.

The New Jersey State Agricultural Society will hold its first annual exhibition at Camden, opposite Philadelphia, on the 19th, 20th, and 21st days of September.

As Dr. S. D. Beloate was smoking, at his residence, Florence, Alabama, a ruffian fired a gun at him, the ball from which cut off his pipe within two inches of his mouth.

The telegraph states that the impression gains ground that the new prohibitory law in Illinois, which was referred to the people, has been defeated.

The Rochester papers say that a Suspension bridge is to be constructed across the Genesee River, at the Lower Falls. It is to be a free bridge, to cost some $15,000.

Rev. L. P. Clover has been invited by the Free Masons of Johnstown to preach a sermon on Masonry, in St. John's Church, Johnstown, on the 24th of June, St. John's day.

New Orleans, which was recently threatened with that terrible scourge, the cholera, is now regarded as healthful, the Board of Health having rescinded the resolution declaring that an epidemic prevailed.

We continue to receive most favorable accounts of the condition and prospects of the crops from all sections of Illinois. Wheat is particularly promising, and corn and other spring grains look well.

Five thousand slaves who are professing Christians in the city of Charleston, S. C., have contributed the last year to benevolent objects $15,000, it being on an average $3 each.

One of the largest distilleries in Scotland, the Keith distillery, where one million two hundred thousand gallons of whiskey were made annually, has recently been converted into an extensive flouring mill.

The imports of foreign dry goods at the port of Philadelphia, since January last, show a falling off of about a million of dollars from those for the same period of last year—the sum total being $1,540,000.

The story that has been going the rounds of the papers about Miss Beecher being insulted in Virginia by the burning of her sister (Mrs. Stowe) in effigy, turns out to be an Abolition hoax, the lady herself denying that i ook place.

State taxes in Massachusetts this year will be increased 50 per cent., the expense being estimated at $449,986 over last year.

The State Idiot Asylum at Syracuse is to be open for the reception of pupils on the first of October.

A women's State Temperance Convention was held at Auburn last week, at which the strong minded rallied in respectable numbers.

A lady living near San Antonio, Texas, recently gave birth to two pairs of twins at one time—fine healthy babies.

J. P. Hale is to deliver the oration in Lawrence, Mass., on July 4th; arrangements are making there for quite a celebration.

Gov. Clarke recently visited his home in Canandaigua, and was greeted with a tin horn serenade in the evening.

Father Matthew is at Madeira in distress, in want of means to pay his board. His right hand is paralyzed.

The proprietors of the Cincinnati *Enquirer* have been forbidden to issue that paper on Sunday, by Mayor Farran.

Dr. Stone, a homeopathic physician in Medford, Mass., committed suicide on the 3d inst., by stabbing himself.

The Hudson River Railroad received in May, $130,448, against $123,271 the corresponding month last year.

The name of Brand's Iron Works, R. I, has been changed to Alton.

Of our fourteen Presidents, not one was a citizen of a great city!

MARRIED.

In the Seventh-day Baptist Church of Berlin, Wis., on Sunday, April 18th, 1855, by Eld. J. M. Todd, Mr. STEPHEN W. HICKOK, to Miss MARY A. BAKER, both of Berlin.

At the same time and place, and by the same, Mr. ALVAH R. UTLEY, to Miss SARAH E. HICKOK, both of Brooklyn.

In Church, June 2d, by Eld. J. M. Todd, Mr. A. H. LEWIS, to Miss AUGUSTA M. JOHNSON, all of Berlin, Wis.

At the same time and place, and by the same, Mr. A. W. CLARKE, to Miss MARIA DAVID, both of Berlin, Wis.

At Leonardsville, N. Y., June 5th, by Eld. Wm. B. Maxson, Mr. NOYES SPICER, of Indianapolis, Ind., to Miss L. ELEANOR CLARKE, of Leonardsville.

At South Groton, Mass., on the 25th of May, by Eld. J. M. Chick, JAMES L. BOYD, of Philadelphia, to LIZZIE CLARK, eldest daughter of Aaron Mason, of South Groton, Mass.

LETTERS.

N. B.—Passengers, on arrival of the steamers at Stonington, proceed immediately by Mail Train to Providence, Boston, Taunton, and New Bedford; or by Accommodation Train from Stonington at 7.30 A.M.

A Baggage Master accompanies the Steamer and Train through each way.

For passage, berths, state-rooms, or freight, application may be made at pier No. 2 North River, or at the office, No. 10 Battery-place.

New Steamboat Line for Albany and Troy.

From Pier 15, foot of Liberty-st., at 6 P. M.

STEAMER RIP VAN WINKLE, C. W. Farnham, Commander, Monday, Wednesday and Friday, at 6 o'clock, P. M.; steamer COMMODORE, L. Smith, Commander, Tuesday and Thursday, at 6 o'clock, P. M., and SUNDAY, at 5 P. M.

Fares: Saratoga, $1 50; Moreau, $2 15; Fort Edward, $2 15; Whitehall, $2 75; Castleton, $3 10; Rutland, $3; Burlington, $4; Rouses Point, $5 50; Montreal, $7 50.

These Boats will arrive in Albany or Troy in ample time to form connections with all the Railroads, North, East or West, enabling passengers to reach Montreal and intermediate points the same day.

Through tickets can be obtained on board the boats for Saratoga, Moreau, Fort Edward, Whitehall, Castleton, Rutland, Burlington, Rouse's Point and Montreal.

The Northern Freight Express will give Bills of Lading to all points as above named. Shippers who desire it, can have time receipts, by applying at the office on the Pier. A. A. DYKEMAN.

Magnificent Floral Gift.

SUBSCRIBERS to the "CHRISTIAN DIADEM" for 1855, are entitled to a splendid steel engraving, the ☞ LILLY AND THE ROSE PERSONIFIED, being given *gratis* to all old and new subscribers who send us only ONE DOLLAR, by mail or otherwise.

Six Copies for Five Dollars.

The Diadem is a strictly moral and religious work—designed for the Christian family without regard to any particular denomination.

FIFTY ENERGETIC BUSINESS MEN are wanted immediately to circulate the "Diadem" throughout the Eastern and Western States. To such as can send good references the very best inducements will be given. Address Z. P. HATCH, Publisher, 9 Spruce street, New York. May 24—3m.

The Good Time Come at Last.

Belcher's Religious Denominations in the United States

IS beyond all question the most popular subscription book now before the American people. Every body says so, and the united voice of the great public seldom errs. The northern farmer, the mechanic, the factory operative, the planter of the South, and the pioneer of the West, all want it, and when once properly introduced to their notice, are bound to have it. Let "Young America" arise in her might, and go into the work, and with the proper application of industry, energy, and enterprise, the result will prove beyond cavil, that Horace Greeley's comforting prediction of the "good time coming" is at last fully verified. For further information of this and other popular subscription works, book agents, and canvassers generally, will please address the publisher,

JOHN E. POTTER,
15 Sansom-st., above 6th, Philadelphia.
Or, NOYES SPICER, Indianapolis, Ind.

The very Book that every body has been Wanting.

The Book for the Parlor, the Book for the Fireside, the Book for the Professor, and the Book for the Non-Professor.

THE RELIGIOUS DENOMINATIONS OF THE UNITED STATES: Their History, Doctrine, Government, and Statistics; with a Preliminary Sketch of Judaism, Paganism, and Mohammedanism. By Rev. JOSEPH BELCHER, D. D., Honorary Member of the Historical Societies of Pennsylvania and Wisconsin, author of "William Carey, a Biography," etc., etc., and "Editor of the Complete Works of Andrew Fuller," "Works of Robert Hall," etc, etc. Large octavo, 1024 pages, handsomely embellished by nearly two hundred engravings.

This invaluable work is rapidly finding its way among all classes of the American people. The clear, comprehensive, and impartial manner in which the learned author treats each and every denomination, is winning for him golden opinions from the highest authorities in the land. The innumerable lively tales and anecdotes of ministers, churches, and laymen, which he introduces with the articles of faith and all important statistical information, give to the work a life, vigor, and spirit truly delightful. One cannot sit down to it without being convinced that his subject is in the hands of a master, nor rise but with kindlier and more liberal feelings towards the great brotherhood of Christians, under whatever name they bear. Ours is a great, growing, and glorious country, and every family, and every young man, throughout its length and breadth, should have a copy as a text book of all its denominations. Wherever known, it is read, and wherever read, admired. Look at the following from among the very many notices received:

It embodies a vast amount of information relative to the origin, history, and missionary operations of the different religious denominations in this country, presented in a remarkably interesting and attractive manner.—*Rev. John Dowling, D. D., Author of "The History of Romanism," "Judson Offering," etc.*

This is a large and beautiful volume, and will find a cordial welcome in every family.—*Philadelphia Christian Chronicle.*

So far as concerns independence of vision, there can be no question, as Dr. Belcher surveys each sect with the same dispassionate impartiality.—*Epis. Recorder.*

This massive volume embraces a vast fund of information.—*Presbyterian.*

The work is sold by agents, and will furnish a large amount of interesting and valuable information to the families into which it may be received.—*New York Recorder and Register.*

In the account given of the denominations, he is fair, and generally allows them to speak for themselves, as to their history and institutions.—*New York Christian Advocate and Journal.*

It contains a mass of interesting facts and statistics.—*Norton's Literary Gazette.*

Judging from the work, it would be difficult to say what are the religious views of the Editor, so fairly, so dispassionately, so charitably, has he treated each and every sect.—*Philadelphia City Item.*

We presume it will be a standard work in thousands of libraries.—*Littell's Living Age.*

Sold only by agents, to whom certain districts are allotted. For particulars address the publisher,

JOHN E. POTTER,

Miscellaneous.

From the Courier and Enquirer.

Facts about the Russian Army Service.

Discipline in the Russian army is more than severe—it is merciless, inhuman. The least inattention, the slightest fault, is visited with the most cruel corporeal chastisement.

Should the unhappy culprit who was sentenced to receive a thousand lashes, die under the infliction after having received the first five hundred, the remainder of the sentence is executed on his dead body. The writer has seen an officer deliberately pluck out by the roots one of the whiskers from the face of a soldier. The man did not stir. Constantine, the brother of the late Emperor, as deliberately, on parade, pierced with his sword the foot of a Colonel, and thus fastened it to the earth. The officer did not stir till the Prince had withdrawn his sword. He then fell and was removed. This feat was performed by that execrable tyrant to prove to a foreign officer the degree of perfection which discipline had obtained in the Russian army. On another occasion the Colonel of a regiment ordered four soldiers to stand forth. Having ordered them to kneel down, he beckoned to a party stationed at a distance to approach. He announced to the soldiers that they were about to be shot, and asked them to state any reasons why they should not undergo the sentence. "We are not aware of having done anything to deserve this punishment," was the reply, "but our commanding officer knows best." The party fired, one man fell dead, fright alone had killed him, as the guns had been loaded with only blank cartridges. "Well, what do you say to this," asked the Colonel, addressing the English officer for whose instruction this instance of military discipline was exhibited. They deserved to be shot, was the answer, for their cowardice—they ought to have bayoneted you before they knelt down.

When the order is issued from the highest quarter, the Governors of the Province issue theirs to their subordinates. These notify to the noble land-owners that a quota is expected, and fix the number of men each has to supply. The lord generally picks out the worst, the weakest, least useful portion of his unmarried serfs for the army, keeping in his service the strongest, healthiest, best conducted and most useful—a matter easily managed with the inspecting Commissary by means of a bribe.

Prior to their enlistment, very often these poor fellows must be married. A notice to that effect is sent to the priest, who appoints an early day for the ceremony. The young men and an equal number of young women are placed in two opposite rows, and, as the priest passes through the avenue just formed, he unites the two persons who happen to face each other. Proceeding to the church, the marriage ceremonies are performed.

Sometimes it happens that young men and women, between whom a mutual attachment exists, are thus separated; but an indulgent lord generally consults the inclinations of the parties. On the other hand, such marriages furnish a cruel and oppressive steward with frequent opportunities of gratifying pique or revenge.

After the wedding, the recruits are permitted to remain with their wives for some time, varying from a few days to even a few weeks, after which they join their regiments, leaving their wives behind; years may pass without a couple obtaining intelligence from each other. Sometimes the wife contrives to discover her husband's whereabouts, and if she can obtain permission from the lord or his representative, and a passport from the authorities, she goes in search of him, *accompanied by her children.*

In Poland the system of recruiting is very severe. Every son in a family, but one, must serve, and even the last is very often forcibly seized. Boys are registered when they attain the age of thirteen years. Unexpectedly, in the middle of the night, they are taken from their homes and conveyed to a place of safety, generally the barracks, where they are placed with their faces against the wall, and measured; should any look round for a moment he receives a slap in the face. After having gone through the process of measuring and medical examination, military clothing is distributed among them; they are kept close prisoners in the barracks till they are called out to march. Having been conducted to the market place or some large square, they are torn from the arms of their distracted mothers and weeping sisters, and marched off to the depot. There they are distributed to various stations, to be incorporated into regiments of infantry, cavalry, or the navy, according to their sizes. They are taught the rudiments of a Russian education, and many are taught trades. After having acquired a thorough knowledge of military exercises and a soldier's duties, after a few year's service they sometimes obtain a furlough, in virtue of which they enjoy the privilege of exercising some handicraft for their own benefit, though they must of course be ready to join their regiments at a moment's notice. For such a permit or "pass" they must pay to the government five silver roubles annually.

They are drilled into trades, as they are into the military exercises, by blows. By blows are taught the notes to those who are selected for military bands, and the manner in which these rude peasants execute the most difficult musical composition after a few months training (and *hard* practice) is really astonishing.

The manner in which the soldiers drafted for the artillery are trained to that arm is not a little original. When they hear a cannon fired for the first time they tremble with fear. To conquer this weakness in those who most exhibit it, they are tied astride upon a gun, which is then fired off. This experiment once or twice repeated never fails of the desired effect.

The length of service is twenty-five years, to reckon from the eighteenth year of the soldier's age, so that he is entitled to his discharge after having attained the age of forty-three. He has always some money to receive in the shape of arrears of pay, so that if he be a careful man he may *commence* life, for which it is not too late at that age. But unfortunately the Russian (whether soldier or civilian, whether freeman or slave) is too much addicted to drinking to do any good. Old soldiers are always provided for by the State in the way of inferior employments, such as messengers, servants, house-guardians, and the like. On the railway between Moscow and Petersburgh some thousands are employed to keep the road clear, act as guards, policemen, etc. Private families prefer them as servants, as they are civil, obedient, kind, sincerely attached to their masters, and far more honest than Russians generally are.

At the second coronation of the late Emperor at Moscow, in the year 1852—he having reigned twenty-five years—one of the Imperial Princes obtained his promise to reduce the term of service from twenty-five to fifteen years. This promise was not kept by the Emperor Nicholas, nor is his successor in a position at present to grant such an indulgence to the soldiers.

All nobles must serve in the army. Indeed, it is *chiefly* from that body that the army is officered. Military rank itself confers one of the fourteen degrees of nobility. No pains are taken, by means of preparatory education in the public institutions, and subsequent study and practice, to obtain efficient officers, but, with some exceptions, the Russian officer is not equal to the officers of the other nations. What the common Russian soldier is to the French, Prussian, or English soldier, so the Russian officer is to the French, &c., officer. The German and Swedish Provinces of the Russian Empire furnish good officers, Russia Proper few or none. Their besetting sins are extravagance; they indulge in excesses of every kind. They are much addicted to gaming, and this is carried to such excess that cavalry officers have been known to gamble away the horses belonging to their regiments.

The extravagance of some, and the miserable pay of all, cause much embarrassment and much poverty. Many military officers are so poor that they will stoop to almost any action by which they can put a few roubles in their pockets. A considerable number of poor officers are employed in government offices, and it is by no means difficult to obtain from them, with the use of a bribe, most important information on matters which it is for the interest of the government to keep secret. By such means copies are obtained of most important documents. Great caution and a good deal of management are required in opening negotiations with the employees, who may perhaps be government spies, or agents of the secret police.

Such, then, are the military resources of Russia, and we trust that enough has been shown to justify the application of the old proverb, that all that glitters is not gold. *The only superiority of the Russian army consists in its numerical strength, man for man, as compared with the armies of the other European powers;* IN EVERY OTHER RESPECT IT IS DECIDEDLY AND VERY GREATLY INFERIOR.

The Eruption of Vesuvius.

The best account of the eruption of Vesuvius we can find is in the following letters extracted from the London *Daily News*:—

NAPLES, Saturday, May 5, 1855.

Having purchased our torches at Resina, we turned out of the high road into the comparatively narrow and heavy route which begins the ascent. It is formed of loose volcanic dust and pulverized lava; and hard work it is indeed for the weary horses to get along. Ours acted most prudently by refusing to advance, so that, dismounting, we took to our legs. A woman might have gone up alone, so dense were the crowds either coming or going; for be it known that apart from curiosity many felt not a little relief at the eruption, as though it had saved them from the disasters of an earthquake, and were full therefore of joyousness. As we got close under the mountain we experienced something like disappointment, for the elevation on which the Hermitage stands hid from our view the fire and smoke and the streams of lava which even from Naples formed so magnificent a spectacle. As we got higher and higher the glare of light reflected on the sky became visible, and by the time we had got to the Hermitage the grandeur of the scene began to open upon us. Pushing on from this point through cicerones and donkeys, horses, carriages and Christians, as bipeds are styled in Naples, we traversed for some distance the road which leads to the cone, when, turning sharp off to the left, we arrived at a point on the stream of lava where it forms a cascade. This is about a mile or a mile and a half from its source; and here a vast crowd was assembled, as though it afforded the grandest *colpo d'occhio.* To tell the truth, your correspondent labors to write coolly, for such was the magnificence of the scene that were one to trust too much to his feelings he would be hurried into what might appear exaggeration. The lava on which we stood was yesterday a boiling, moving stream; it was still hot to our feet, and taking up the loose pieces of coke the glowing fire was clearly perceptible beneath; we lit our cigars at it, and played all kinds of practical jokes; and, jumping over the fiery tissures, stood by the side of the bed of moving lava. Imagine thousands of tuns of coke carted out together, and rolling mass over mass, and some idea may be formed of the noise—not that it was loud, but a wide-spread incessant sh—sh—sh—sh—like water over pebbles. When a great accumulation of materials had been formed at the edge of the precipice, the outer blackened crust broke up, and, rolling over into the abyss below, bounded from rock to rock down among the chestnut trees, which writhed and flamed up and then fell over. The immense body of heat and light which then burst forth nearly scorched and blinded us, and instinctively we held up our hands to ward it off. The breadth of the stream in this direction is 100 palms, says the Neapolitan journal; from my observation, I should say nearer 200 palms. Of course all calculation must be mere guess work, as who can measure a fiery flood? I never witnessed such mighty results of power apparently so unconnected with any cause. It produced the same impression upon me that the Toledo or Strand might do were either to take it into its head to walk. There was a solid plain which we might have crossed some eight and forty hours before, now going full drive over a precipice some thirty or forty feet deep, and then stealing onward, as it now is, through chestnut groves and vineyards and villages, and threatening places of some consideration. Above the precipice the stream—or rather two streams, which are united at the cataract—flows through a plain in a serpentine form, and following back its course we arrived at the foot of the cone. Half way up we came upon the first of seven mouths, all of which throw out either lava or stones, or both. Those which threw out lava bubbled and gurgled over, while those which made a greater effort and threw out stones, kept up an incessant noise, as that of a distant heavy cannonade. What a foreground was this! Behind these in the distance the background was formed of heavy masses of lurid clouds, showing off by a strong contrast the vivid flames in front. The lava flowed down the sides of the mountain in waves of fire, and rolling through the valley we had just passed, precipitated itself into the gulf above which we stood at first. Of course we ladled up some liquid lava and fixed some coppers in it, and then were glad to move off. The wind occasionally shifted, and with it that curtain of lurid clouds. Our guide warned us to be off on penalty of sharing the fate of Pliny, a consummation earnestly to be avoided, we thought, however great our respect for the old Roman. Since that evening the seven mouths have all resolved themselves into one. The lava still continues to pour down the mountain in the direction of San Sebastiano, Pollena, and Massa di Somme, being the same direction it took in 1822. It has already occupied the bed of a river, destroyed much plantation, and is threatening still greater injury. The Marchese St. Angelo, who has property in that direction, has been removing his furniture from his villa as a precautionary measure. In short, this eruption, though not so effective a spectacle at a distance as the last, is far more imposing when viewed close, and threatens to be much more destructive.

NAPLES, Thursday, May 10, 1855.

The lava has now advanced ten miles from its source and is doing terrible damage. I have before me the report of Cozzolino as to the latest changes which have taken place at the cone. Just at the base of it a lake of fire has been formed which looks like a red sea in an undulatory state. In the very center of this has opened another crater, which is throwing out red-hot stones. On the morning of the 7th the crater at the very summit fired, as it were, two heavy cannonades; and after sending forth lightning, flames and stones, broke up altogether. In the middle of the cone ten craters have been formed, and from these the lava pours forth like a river and runs on the side of the Cavallo as far as the Minatore. Here four other craters have been formed, which throw up bitumen in the manner of pyramids, and resemble gigantic exhibitions of fireworks. The whole of the summit of the crater is therefore like a sponge and must inevitably fall in. The thin crust trembles under your feet. You may see the stones dance with the tremulous movement; the part immediately round the crater looks like the sides of a heated copper boiler. Such is a true statement of what is going on on the summit. There are reports of an opening toward Pompeii, which is not unlikely, and of another toward Resina, but I have not been up for some days, as the danger is now very great. Before I write again I shall make the attempt. Last night I went to the scene of most stirring interest after an interval of two days. The whole length of this usually quiet road was like a fair, and such was the throng of carriages which were moving on in three lines that it was with difficulty we ever arrived at our destination. As we approached the menaced neighborhood the inhabitants were removing their goods, and on a bridge in the middle of the little township of Cercolo (through which in the winter time thunders down from the summit of Vesuvius one of those mountain rivers so well known in Italy) stood a company of Sappers. Creeping under the solid handsome bridge into the bed of the river, we went up in face of the lava, which was now coming rapidly down. Here again were Sappers, raising mounds on either side to divert the ruin from some private grounds and keep the lava in one straight course. The smoke which rose over the heads of the multitudes told us we were close on the spot, and climbing up the bank and walking along the top we looked down on this mighty mass of fire. How changed the neighborhood in two days? Where I walked on Sunday night was now a sea of fire. The side road by which I had come down into the main stream from Pollena and Massa di Somme was now full of blackened coke. The houses on the borders of the village had fallen—in one 30 poor people lived; a small chapel was swallowed up, a gentleman's villa, and a sad extent of vineyard and garden ground. On the other side of the great lava bed, another stream was branching off to San Sebastiano. We had hoped to cross it and ascended to the cascade again, but it was no longer possible; for as one says speaking of a marshy country in the winter, the lava was out. The fire here had begun to enter the burial ground of the little town, but was diverted from its course by a wall. On the opposite side of the stream were the King and all the Royal family. The banks on either side were thronged with curious and anxious multitudes, whose faces were lighted up with the blaze of hundreds of torches and with the more resplendent flame of the rapidly descending lava. Since the morning it had moved a mile. It was like a vast river of glowing coke. As it moved on, the tens of thousands of lumps rolled and tumbled one over the other, cracking and grinding and grating; and when from the very face of it a large lump fell off, the appearance was that of an iron-furnace when the iron is being drawn. To make the resemblance more complete, at such times men darted forward with long poles taken from the neighboring vineyards, and pulled out great masses of lava in which they imbedded money for sale. What struck me at first, and still strikes me as the most majestic feature in the whole scene, is the slow, silent, irresistible motion of that fiery flood. Active almighty power without an effort! Sweeping every thing before it, overcoming every obstacle, growing up against intervening walls or houses, and devouring them bodily, and then marching on in the same silent, unrelenting, irresistible manner as before. There was a spot beneath my feet where a fall of mason work had been built to break the violence of the winter floods; to this spot all eyes were directed. The fiery river would fall over it in an hour; as yet it was distant from it seventy yards, perhaps. Gradually it rose in hight and swelled out its vast proportions, and then vast masses fell off and rolled forward; then it swelled again as fresh matter came pressing down behind, and so it broke, and on it rolled again and again till it had arrived at the very edge. There was a general buzz and murmur of voices. The Royal family stood opposite to me, intermingled with the crowd, looking on with intense anxiety. At last it broke, not hurriedly, still with a certain show of majesty. At first a few small lumps fell down; then poured over a pure liquid of metal, like thick treacle, clinging sometimes mass to mass, from its glutinous character, and last of all tumbled over gigantic lumps of scoriæ. Then on it moved once more in its silent regular course, swelling up and spreading over the vineyards on either side; and now there was a rush for the road which traverses this lava-bed. Houses and the bridge bordered the road, the carriages had all been ordered off, and the bridge was being broken down—we were cut off completely. The sentinels would not let us pass, and struck us and drove us back; but we forced our way, and then found too surely that it was impossible to get on. The bridge was half demolished, and by the light of the torches we could see the soldiers above working away with the pick and the axe. We had therefore to retrace our steps, and making a long circuit through the open country and over walls, came round to the top of the bridge. "Run," said the sentinels, "or you will be too late" We crossed the narrow parapet which was still remaining, and soon afterward down went the whole fabric. In this way it is hoped that the lava will be diverted from the townships of St. Sebastiano, Massa di Somme and Pollena, which stand on either side and have as yet only suffered partially. Cercolo, through which, however, the stream is rolling, will be sacrificed. The expectation is that the lava, should the eruption continue, will flow down to the Ponte Maddaloni and into the sea. So grand and so destructive an eruption has not been known for many years, and even now we cannot tell how or when it will terminate. The mountain is literally seamed with lava and many fear a violent explosion as the final scene of the tragedy.

Midnight Rest.

Huferland, in his treatise on sleep, has some curious as well as forcible ideas on the necessity of devoting midnight to rest and sleep. He considers that the period of twenty-four hours, which is produced by the regular revolution of the earth on its axis, marks its influence most definitely on the physical economy of man. Diseases show this regular influence, in their daily rise and fall. Settled, regular fever exhibits a twenty-four hours' flux and reflux. In the healthful state there is manifest the same regular influence, and the more habitual our meals, our hours of exercise and employment, and our hours of sleep, the more power is there in the system to resist disease. In the morning the pulse is slow and the nerves calmer; and the mind and the body better fitted for labor. As we advance towards the evening of the day, the pulse becomes accelerated, and an almost feverish state is produced, which in excitable persons becomes an absolute evening fever. Rest carries off this fever by its sleep, and the refreshing opening of its pores which sleep produces. In this nightly respiration there is an absolute crisis of this evening fever, and this periodical crisis necessary to every one; for it carries off whatever useless or pernicious particles our bodies may have imbibed.

This evening fever, Huferland thinks, is not entirely owing to the accession of new chyle to the system, but to the departure of the sun and of the light. The crisis of this fever, to be most effective by its regularity, ought to take place at midnight, when the sun is in its madir, and then the body becomes refreshed for the early morning labor. Those who neglect this period, either push this diurnal crisis into the morning, and thus undermine the importance of its regularity, or lose it entirely, and arise to their labors unrefreshed by sleep; their bodies will not have been purified by the nightly crisis, and the seeds of disease will have thus been planted.

Nervous people are peculiarly subject to the influence of this evening fever, and think they cannot labor without its excitement. Hence their mental efforts are performed in the night alone; the important time for the crisis of their nervous excitement passes over in wakefulness, and no refreshing perspiration cleanses the body or strengthens the nerves. Such people will wear out soon, unless they change their habits and seek rest when nature and the human constitution dictate.

These considerations ought to be deeply studied and regarded by all who are in the ruinous habit of turning night into day and of changing the functions of each.

A failure of health will soon manifest the truth of these remarks. [Hartford Courant.

Catching Cold.

A word or two more in regard to 'catching cold.' It is generally thought that cold is taken by changing from a warm to a cold atmosphere. This is hardly so. A cold is more the result of *inequality* of temperature in different parts of the body. A person may go from a warm bed and plunge naked into a snow bank and not take cold, and yet become quite sick from merely holding one arm in warm and the other in cold water. The body may be warmly clothed, and yet a cold may be taken by leaving the feet, or a slight current of air blowing upon an arm or upon the head and neck. So a person may take cold by the side of a blazing fire, because the draft of air towards the chimney cools that part of the body away from the fire. One part of the body being clothed warmer than another part will disturb the circulation of the blood, and induce some form of disease classed under the general name of a "cold."

One of the most common sources of a cold is the getting of a part of the clothing wet, and thus cooling that part of the body below the general temperature of the system. On the contrary, a person may be entirely drenched with rain, and drying the clothes uniformly, or changing them entirely, no difficulty will be experienced. Let it be kept in mind that the greatest danger of 'catching cold,' is from an inequality of warmth in different parts of the body.

The Strawberry Bed.

Many of our readers are no doubt watching with some solicitude for our March and April strawberry culture. It is exceedingly simple. On the old fruit beds, go through with the hoes immediately and thin out to eight or ten inches, leaving all the vines to rot on the ground. When kept in drills, work the ground with the hoe, and cover all the intervening spaces with leaves, or partially decomposed straw. The last of this month the vines will show plenty of bloom. Now note whether your plants are staminate or pistillate. Frequent frosts will kill the pollen or the impregnating blossoms, which keeps the crop back. A strawberry bed may be in bloom, and the inexperienced look for a crop of fruit from it, when, if he examines the centre of the blossom, he will find the pollen, instead of being yellow, black; there will be no fruit from that blossoming. It takes a pretty heavy frost to kill the young fruit that is already formed; but if the pollen be destroyed, there is no chance to form any fruit until another blossoming. As soon as the weather becomes dry, water the plants, for the sake of the blossom and fruit; the water must come in the form of rain, from an engine or watering pot. Runners will hardly show themselves on bearing plants; should they do so, take them off as fast as they appear.

[Farmer's Banner.

Offices of the Atmosphere.

One need not go to sea to perceive the grand work which the clouds perform in collecting moisture from the crystal vaults of the sky, in sprinkling it upon the fields, and making the hills glad with showers of rain. Winter and summer "the clouds drop fatness upon the earth." This part of their office is obvious. But the sailor at sea observes phenomena, and witnesses operations in the terrestrial economy which tell him that in the beautiful and exquisite adjustment of the grand machinery of the atmosphere, the clouds have other important offices to perform besides those merely of dispensing showers, of producing the rains, and of wearing mantles of snow for the protection of our fields in winter. As important as are these offices, the philosophical mariner, as he changes his sky, is reminded that the clouds have commandments to fulfill, which, though less obvious, are not therefore the less benign in their influences, or the less worthy of his notice. He beholds them at work in moderating the extremes of heat and cold, and in mitigating climates. At one time they spread themselves out; they cover the earth as with a mantle; they prevent radiation from its crust and keep it warm. At another time, they interpose between it and the sun; they screen it from his scorching rays, and protect the tender plants from his heat—the land from the drought; or, like a garment, they overshadow the sea, defending its waters from the intense forces of evaporation. Having performed these offices for one place, they are evaporated and given up to the winds and the sunbeam again to be borne away to other places which stand in need of like offices.

Of all parts of the physical machinery, of all the contrivance in the mechanism of the universe, the atmosphere with its offices and adaptations, appears to me to be the most wonderful, sublime, and beautiful. In its construction the perfection of knowledge is involved. The perfect man of Uz, in a moment of inspiration, thus demands of his comforters: "But where shall wisdom be found, and where is the place of understanding? The depth saith, It is not in me, and the sea saith, It is not in me. It cannot be gotten for gold, neither shall silver be weighed for the price thereof. No mention shall be made of coral or of pearls, for the price of wisdom is above rubies.

"Whence then cometh wisdom, and where is the place of understanding? Destruction and death say, We have heard the fame thereof with our ears.

"God understandeth the way thereof, and he knoweth the place thereof; for he looketh to the ends of the earth, and seeth under the whole heaven; *to make the weight for the winds;* and he weigheth the waters by measure. When he made a decree for the rain, and a way for the lightning of the thunder; then did he see it and declared it; he prepared it, yea, and searched it out."

When the pump-maker came to ask Galileo to explain how it was that his pump would not lift water higher than thirty-two feet, the philosopher thought, but was afraid to say, it was owing to the "*weight of the winds,*" and though the fact that the air has weight is here so distinctly announced, philosophers never knew it until within comparatively a recent period, and then it was proclaimed by them as a great discovery. Nevertheless, the fact was set forth as distinctly in the book of nature as it is in the book of revelation; for the infant in availing itself of atmospherical pressure to suck the milk from its mother's breast, unconsciously proclaimed it.

[LIEUT. MAURY, Physical Geography of the Sea.

A NEW CURE FOR HYDROPHOBIA.—We make the following extract from a letter dated New Orleans, May 9, 1855, from an officer in the army;—"I send you herewith some seeds for distribution, used here in the cure of the bite of the mad dog. It is considered as an effectual remedy in the parish of St. Bernard, of this State, and the cures which are stated to have been effected from their use are certainly very remarkable. I regret not being able to give you their botanical name; but the plant is a tropical one, coming from Mexico—I believe from the department of Tobasco. The seeds are called here grainos contre la rage, and are used as follows:—Three of them are broken up or pounded into small pieces, and put into a wine glass of the best sherry (Xeres) and allowed to steep for about twenty-four hours, and then, being well stirred up, swallowed by the patient. This dose is repeated three times a day for about nine days, when the person or animal may be considered as cured. I am told that even dogs which have been bitten by a rabid animal have been cured by this treatment, or by putting a larger quantity of these seeds in their food. The seeds must be soaked in water twenty-four hours before planting, and the plant must be protected from the rays of the sun whilst still young and tender. It resembles much the okra plant, and should be planted late in the spring."

OKRA.—A correspondent of the *Soil of the South,* says, 'I planted but a few hills of okra in my garden; as soon as it began to bloom, I topped it. I selected one stalk to experiment on, which put out after the first topping, five vigorous shoots or branches. After the shoots had grown about eighteen inches in length, I topped them. Such a shooting and blooming as my okra had after the second topping, would be an ornament to any garden. But this is not all. The numerous and almost countless pods of okra in succession, were charming to the sight. This morning I counted the branches, pods and blooms. There were thirty-three branches, thirteen of them as high and higher than I can reach, one hundred and one pods of okra and twelve blooms. I cut off fourteen ripe for seed, leaving eighty-seven now on the stalk. The trunk or base of the stalk measured six inches in circumference. We had okra for dinner all the summer, and can have it yet, only from this stalk. I am satisfied that I can have okra bountifully from one or two stalks, and that too, till killing frost.

John Adams concludes a letter of April 26th, 1777, thus:—"Posterity! you will never know how much it has cost the present generation to preserve your freedom! I hope you will make good use of it. If you do not, I shall repent in Heaven that I have ever taken half the pains to procure it."

New York and Erie Railroad.

ON and after Monday, May 7, and until further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Dunkirk Express at 6 A. M. for Dunkirk.

Buffalo Express at 6 A. M. for Buffalo.

Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Accommodation at 12½ P. M. for Port Jervis and intermediate stations.

Rockland Passenger at 3 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.

Way Passenger at 4 P. M. for Newburgh and Otisville and intermediate stations.

Night Express at 5½ P. M. for Dunkirk and Buffalo.

Emigrant at 6 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5½ P. M.

These Express Trains connect at Elmira with the Elmira and Niagara Falls Railroad, for Niagara Falls, at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicago, &c., and with first-class splendid steamers for all ports on Lake Erie.

D. C. McCALLUM, General Sup't.

Ayer's Pills.

A NEW and singularly successful remedy for the cure of all Bilious diseases—Costiveness, Indigestion, Jaundice, Dropsy, Rheumatism, Fevers, Gout, Humors, Nervousness, Irritability, Inflammations, Headache, Pains in the Breast, Side, Back, and Limbs, Female Complaints, &c., &c. Indeed very few are the diseases in which a Purgative Medicine is not more or less required, and much sickness and suffering might be prevented, if a harmless but effectual Cathartic were more freely used. No person can feel well while a costive habit of body prevails; besides, it soon generates serious and often fatal diseases, which might have been avoided by the timely and judicious use of a good purgative. This is alike true of Colds, Feverish symptoms, and Bilious derangements. They all tend to become or produce the deep seated and formidable distempers which load the hearses all over the land. Hence a reliable family physic is of the first importance to the public health, and this Pill has been perfected with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing any thing hitherto known of any medicine. Cures have been effected beyond belief, were they not substantiated by persons of such exalted positions and character as to forbid the suspicion of untruth.

Among the eminent gentlemen who have testified in favor of these Pills, we may mention:

Doct. A. A. Hayes, Analytical Chemist of Boston, and State Assayer of Massachusetts, whose high professional character is endorsed by the—

Hon. Edward Everett, Senator of the United States.

Robert C. Winthrop, Ex-Speaker of the House of Representatives.

Abbott Lawrence, Minister Plen. to England.

†John B. Fitzpatrick, Catholic Bishop of Boston; also

Dr. J. R. Chilton, Practical Chemist of New York City; endorsed by

Hon. W. L. Marcy, Secretary of State.

Wm. B. Astor, the richest man in America.

S. Leland & Co., Proprietors of the Metropolitan Hotel, and others.

These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compounded not of the drugs themselves, but of the medicinal virtues only of Vegetable remedies extracted by Chemical process in a state of purity, and combined together in such a manner as to insure the best results. This system of composition for medicines has been found in Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any process. The reason is perfectly obvious. While by the old mode of composition, every medicine is burdened with more or less of acrimonious and injurious qualities, by this each individual virtue only that is desired for the curative effect is present. All the inert and obnoxious qualities of each substance employed are left behind, the curative virtues only being retained. Hence it is self-evident the effects should prove as they have proved, more purely remedial, and the Pills a more powerful antidote to disease than any other medicine known to the world.

As it is frequently expedient that many medicines should be taken under the counsel of an attending physician, and as he could not properly judge of a remedy without knowing its composition, I have supplied the accurate Formulæ by which both my Pectoral and Pills are made, to the whole body of Practitioners in the United States and British American Provinces. If however there should be any one who has not received them, they will be forwarded by mail to his request.

Of all the Patent Medicines that are offered, how few would be taken if their composition was known! Their life consists in their mystery. I have no mysteries.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject freely acknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many eminent Physicians have declared the same thing of my Pills, and even more confidently, and are willing to certify that their anticipations were more than realized by their effects upon trial.

They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.

Prepared by Dr. J. C. AYER, Chemist, Lowell, Mass. Price 25 Cents per Box. Five Boxes for $1 00.

Sold at wholesale in New York by A. B. & D. SANDS, retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere.

The Sabbath Recorder,

PUBLISHED WEEKLY

By the Seventh-day Baptist Publishing Society,

AT

NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the time to which they reach.

☞ No paper discontinued until arrearages are paid, except at the discretion of the publisher.

☞ Communications, orders, and remittances, should be directed, post paid, to

GEO. B. UTTER, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

WHOLE NO. 574.

The Sabbath Recorder.

SUNDAY IN PARLIAMENT.

Concluded from last week.

Mr. E. BALL, who arose amid cries of "Divide!" said that the hon. gentleman who brought forward this motion had very unfairly made use of Dr. Arnold's name in justification of a measure which would cause the violation of the Sabbath. He had many arguments to urge against the measure before the House; but he was warned against so doing by the time, as he perceived they had nearly approached the Fast-day. He had heard with deep sorrow the speech of the noble lord (Stanley), which he considered to be opposed to the interests of true religion and detrimental to the welfare of the community. ("Oh, oh!") He should have thought that the noble lord would have adduced some good reason for the desecration of the Lord's day, but he had only argued that the great body of the people were so hard worked during six days of the week that they had not time to instruct themselves, and that, therefore, instead of devoting the seventh day to religious purposes, they should be enabled to frequent public museums and exhibitions. He (Mr. Ball) certainly thought that Sabbath-schools and churches and chapels were much better places for the instruction of the people on Sunday than museums, crystal-palaces, or any similar places of public amusement. He believed that if the principles which had been advocated by the noble lord were carried out, society would be demoralized, and the greatest injury would be inflicted upon the working classes of the population.

Mr. GOULBURN observed, that the amendment of the hon. member for Southwark proposed that the British Museum should be opened every day in the week, except Sunday, or that it should, at all events, be opened on Saturdays and Mondays, those days, according to the views of the hon. gentleman, being most convenient for the working classes. As one of the trustees of the Museum, he (Mr. Goulburn) begged to say, that the great object of that body had been to regulate the admission to the institution in such a manner as might best meet the convenience of the public. The Museum was open to all classes on Mondays, Wednesdays and Fridays, and it was considered, from the testimony of persons who were well qualified to form an opinion on the subject, that Monday was the day on which the working classes could most conveniently visit establishments of this description. On Tuesdays and Thursdays admission to the Museum was restricted to artists, and on Saturdays the institution was closed to the public in order that the rooms might be cleaned; but he would undertake to say, on behalf of the trustees, that, if the arrangements to which some hon. gentlemen had alluded for giving more liberty to the working classes on Saturday afternoons were carried out, there would be no indisposition on their part to open the Museum on Saturdays, so far, at least, as it could be done consistently with the necessary arrangements for properly cleaning the apartments. (Hear, hear.) With respect to the main question at issue, he thought the House would form a very erroneous opinion if they considered that this motion was limited merely to the opening of the British Museum on Sundays. (Hear, hear.) Upon the showing of hon. members who advocated the motion it involved a very great extension of the principle of allowing public amusements to be part of the business of the Lord's day. Did those hon. gentlemen believe that, if they succeeded in obtaining for the people of the metropolis access to collections of natural history and art upon the Sunday, the inhabitants of Leicester, Manchester, Liverpool, and other large towns, would be satisfied if they were debarred from the moral and intellectual improvement which was supposed to be derived from the inspection of such exhibitions on the Sabbath? (Hear.) If they could not obtain access to public institutions, could they be prevented from resorting to private establishments, such as those exhibitions of animals, which were carried about in caravans, from town to town, for the amusement of the people? ("Hear," and a laugh.) He regarded this motion as the first step towards an authorized desecration of the Sabbath. (Hear, hear.) He had been surprised to hear the noble lord opposite declare his intention to vote for the resolution, which called upon the House to express an opinion expressly in the face of the existing law of the country. The law required the Sabbath to be observed, and provided that no works should be done on that day but works of necessity, charity, and piety. If, therefore, the House of Commons adopted this resolution, it would place itself in direct collision with the law of the land. No doubt there was a difference between one crime and another—murder was worse than robbery, and robbery worse than evil speaking, but only an unwise legislator would encourage robbery to prevent murder, or robbery to prevent slander. Whatever distinction there might be between different crimes, there was no question of degree admissible as regarded the violation of a Divine command such as that requiring us to keep the Sabbath holy; and, in a moral point of view, it would not do to permit a little sin in order to check a greater, for all experience of human society proved that the breach of minor restraints was but the precursor of the deepest aggravations of guilt. The mover of this resolution seemed to think that the British Museum was intended merely for the benefit of those who resided in its immediate neighborhood; but the fact was, it was also frequented by the people of Whitechapel on the one side, and those of Kensington and Hammersmith on the other; and if the inhabitants of these localities were to visit that institution on a Sunday they would have to travel such a distance as would necessitate leaving their homes at an hour that would be incompatible with their attendance at morning service; and, after spending the day partly in the Museum and partly in the refreshment houses adjacent to the Museum, they would return from their journey in the evening so fatigued and wearied, that even their moral or intellectual improvement would be out of the question. Again, if this resolution were adopted, and certain of the officers of these institutions should object to give their attendance on Sundays, were they to be visited with dismissal for their refusal to violate their own consciences and the law of the country? Any attempt to make a martyr of one of these persons would excite a storm of public indignation against its authors; and it was not to be supposed for a moment, that the trustees would act in such a manner. For these reasons the House would do well to reject this motion.

Mr. W. J. FOX, after the admirable speech of the noble lord, the member for Lynn, would not have intruded upon the attention of the House at that late hour, but that some remarks had been made in the course of the debate which ought not to go forth to the world unanswered. The supporters of this motion had been represented as being animated by a sordid desire to extend the hours of labor and grind down the operative classes; but surely when the hon. seconder had been distinguished by his liberal treatment of those in his employment, and when other advocates of the resolution had only the other night recorded their votes in favor of the protection of the working classes from excessive labor to a degree which the majority of the House thought too far for legislative enactment to go, accusations of this kind were the last that should be preferred against them. The right hon. gentleman who spoke last told them of the generous intentions of the trustees of the British Museum for the accommodation of the working classes; but the proposer of the amendment argued upon an assumption which was both a fallacy and a mockery, namely, that Saturday and Monday would be convenient days for this portion of the people to visit that institution. Why, this motion was only brought forward after repeated attempts had been unsuccessfully made to have the Museum opened in the evening, that those whose occupations prevented them from frequenting it in the day time might enjoy that privilege during their only hour of leisure. The noble lord the member for Woodstock (the Marquis of Blandford) rested his argument on the experience already acquired of the working of the Beer Bill, but if he had examined the returns from the Duchy of Lancaster he would have found that, although the amount of Sunday drunkenness might, perhaps, have diminished there under the operation of that measure, yet that the aggregate extent of drunkenness spread over the whole week had rather increased. Moreover, that bill checked the disposition of the people to make Sunday excursions, because it told them that if they went into the country on that day they could not obtain the refreshments they required; but surely if they were to be precluded from enjoying the grand and lovely scenes of nature, they ought not to be denied the other alternative of access to those marvels of antiquity and of art which they could find at home. It was to be regretted that the debate had taken so much of a theological turn—a thing totally unneccessary and very undesirable, because the first four or five speeches that had been made had developed as many different theories relative to the due observance of the Lord's day. An assembly like that, embodying so great a diversity of religious doctrine and opinion, was not a fit body to argue a question on peculiarly theological grounds. The motion did not necessarily involve such a discussion—indeed, it was only made to involve the assumed right of one man to impose his own theology upon another. The real question was chiefly one of property. The British Museum and the National Gallery were national institutions, and enriched by liberal donations of the public money—they were the people's collections and the people's treasuries of art, and yet they locked their doors against their rightful owners and contributors on the Sunday. The right hon. gentleman (Mr. Goulburn) said that the people of Manchester and Liverpool could not be prevented from seeing stuffed animals if this motion were adopted for London; but did he forget that a man might now see as many living specimens of wild beasts of different countries as he pleased in that metropolis, if he were only rich enough to afford 1s. or 1s. 6d., or to pay 20 guineas as fees or a five guinea annual subscription. It was contended that there was no gradation in the desecration of the Sabbath; but what must be said of this general practice which was now tolerated, and patronized by the aristocracy? It had been continually assumed in the discussion of this question, that there was some Divine law enjoining the strict observance of the Sabbath, which was contended for. That, however, was a matter of opinion. Sabbatarianism, in the modern sense of the word, never had been a doctrine of the universal Christian church. It was never a doctrine of the early Christians, of the Roman Catholic Church, or of the first Protestants. Luther exhorted—nay, even commanded his followers, if any one attempted to impose such a law on them, to walk, to ride, to dance, and to hunt, and to do anything on the Sabbath. Calvin, Cranmer, and most of the celebrated teachers of the early Protestant church, condemned the doctrine. The noble lord the member for Lynn had spoken of the natural tendency of the objects to which it was now sought to admit the working classes to visit on the Sabbath to elevate the religious feelings and associations of the people; and that it was so was evident from the fact that all religious bodies to the extent of their ability had availed themselves of associations similar to those produced by the great works of art and the curiosities of nature to awaken and keep alive religious feelings in the minds of their congregations. What church was there which had not availed itself, so far as it could, of the splendors of sublime architecture, and the power of statuary, painting, or music? He agreed with the right hon. gentleman who had spoken last, that it would be well if some law could be passed to define what could and what could not be done on a Sunday. At present, the strict observance of the Sabbath, as contended for by the extreme party, was notoriously set at nought in all classes of the community, and perhaps most of all by the rich. A rich man, by his Sunday wants, set at least ten persons to work, and the British Museum could be opened without imposing labor on any greater number, and that not for the enjoyment and accommodation of one man, but for the recreation and instruction of thousands. It certainly was discredable to see useful reforms of this nature opposed and defeated by prejudice, acting under the disguise of religious feeling.

Lord PALMERSTON—The House, I think, has pretty well made up its mind how to vote upon these two motions, but I wish shortly to state the grounds upon which I shall feel it necessary to vote against both. In the first place, this mode of putting questions before the House, of proposing motions in the shape of abstract resolutions (though certainly in this case there might have been a difficulty in placing the question directly before the House) is not one which it is desirable should be generally adopted. Without, however, entering into the theological discussion which has been raised to-night, we must all agree that the respectful observance of the Sabbath is a principle which it is highly desirable and necessary to encourage. (Hear, hear.) We must all admit, too, that in proportion as that observance prevails, we may expect to see the people of a country moral and well educated, (hear, hear,) and in proportion, on the contrary, as it is treated with disrespect, we may expect to see the conduct of the people such as we should not desire it to be. My opinion is that Sunday ought to be a day of rest, of devotion, and of cheerful and innocent recreation. (Hear, hear.) To enforce that strict observance of Sunday for which some persons contend is obviously impossible. That no work should be done on Sunday would stop the whole movement of social existence; but it is impossible for any law to define—and I think it would be inexpedient for Parliament to attempt to pass such a law—the precise degree to which that principle may properly be carried. That must be left to the conscience of each individual. (Hear.) Each man must be left to determine, according to his own position and circumstances, to what degree he can combine the ordinary and necessary occupations of life with what he considers the proper observance of Sunday. But when a matter is brought before Parliament in regard to which the religious feelings of a great portion of the community are deeply affected, it is highly inexpedient that Parliament should by any vote set itself in opposition to that which is the religious feeling of the people. I think Parliament would be doing an injudicious act if, by any vote of its own, or by any resolution, it should lead the country to think that it is less mindful of those religious principles which ought to govern the conduct of all men than the great mass of the community themselves are. For these reasons, thinking that the resolution would do violence to the feelings of a large portion of the community—feelings which we are bound to respect, and which it is highly desirable studiously to encourage—I shall give my opposition to the original motion. To the amendment I shall object, not, of course, on the same grounds as to the original motion, but for the technical reasons urged by my right hon. friend, that the opening of the Museum and the National Gallery on the Saturday as well as on the Monday would allow of no opportunity for keeping those buildings in proper order. (Hear, hear.)

Mr. BARROW, who spoke amid loud cries of "Divide," was understood to oppose the original motion and support the amendment.

Mr. HEYWOOD spoke in favor of the motion, but his observations were rendered inaudible by the general cries for a division.

Sir J. WALMSLEY said, he had brought forward the motion believing it would be practically useful, but he had no wish to press it, finding the great majority of the House to be of a different opinion. (Cries of "Oh!" and "Divide.") He still believed that his views were in accordance with those of a large portion of the public, and if it were the wish of the House he was quite willing to go to a division. (Hear, hear.) If his motion were rejected at the present moment, he was sure it would ultimately be carried.

The House then divided, when the numbers were: For the motion 48; against it 235; majority 187.

Mr. PELLATT said, after the pledge given by the right hon. gentleman (Mr. Goulburn), he would withdraw his amendment.

Mr. GOULBURN said he had given no pledge whatever. (Laughter.)

The amendment was then withdrawn.

PRAISE.—It is, undoubtedly, very pleasing to the natural vanity of our mind to recommend ourselves to the esteem of all men. To the pride of genius and of learning there is nothing so seductive as the praise of the learned. To be willing to become nothing, or even less than nothing, in suffering the scorn and reproaches of literary insolence, is truly not the least fearful kind of martyrdom. But freedom from vituperation has never been purchased by a disciple of Christ, but at the expense of cowardice or indecision. I challenge the records of the world to produce an instance in which the praise of *a Christian spirit* is conferred by the enemies of the Gospel on those who faithfully and explicitly denounce their condemnation. [Carson.

TEACH US TO PRAY.—I was sitting by Coleridge's bedside, when he said, "I do not reckon the most solemn faith in God as a real object the most arduous act of the reason and will. Oh, no! it is *to pray*, to pray as God would have us; that is what at times makes me turn cold to my soul. Believe me, to pray with all your heart and strength, with the reason and the will; to believe vividly that God will listen to your voice, through Christ, and verily do the thing He pleaseth thereupon—this is the last, the greatest achievement of the Christian warfare on earth: 'Teach us to pray, O Lord!'" And then he burst into a flood of tears, and asked me to pray for him. O what a sight was there!

A SUMMER MORNING IN THE COUNTRY.

How sweetly on the hill-side sleeps
 The sunlight with its quickening rays!
The verdant trees that crown the steeps,
 Grow greener in its quivering blaze;
While all the air that round us floats
 With subtle wing, breathes only life—
And, rising with a thousand notes,
 The woods with song are rife.

Why, this is Nature's holiday!
 She puts her gayest mantle on—
And, sparkling o'er their pebbly way,
 With gladder shouts the brooklets run;
The birds and breezes seem to give
 A sweeter cadence to their song—
A brighter life the insects live,
 That float in life along.

"The cattle on a thousand hills,"
 The fleecy flocks that dot the vale,
All joy alike in life, that fills
 The air, and breathes in every gale!
And who that has a heart and eye
 To feel the bliss and drink it in,
But pants, for scenes like these, to fly
 The city's smoke and din—

A sweet companionship to hold
 With Nature in her forest bowers,
And learn the gentle lesson told
 By singing birds and opening flowers!
Nor do they err who love her lore—
 Though books have power to stir the heart,
Yet Nature's varied page can more
 Of rapturous joy impart!

"THE REFINER OF SILVER."

Some years ago, a few ladies who met together in Dublin to read and study the Scriptures, were reading the third chapter of Malachi. One of the ladies gave it as her opinion, that in the passage: "For he is like a refiner's fire, and like fuller's soap; and he shall sit as a refiner and purifier of silver; and he shall purify the sons of Levi, and purge them as gold and silver," the fuller's soap and the refiner of silver were the same image, both intended to convey the same view of the sanctifying influences of the grace of Christ; while another observed, "There is something remarkable in the expression, 'he shall *sit* as a refiner and purifier of silver.'" They agreed that possibly it might be so, and one of the ladies promised to call upon a silversmith, and report what might be said upon the subject. She went, accordingly, and without telling the object of her errand, begged to know from him the process of refining silver, which he fully described. "But, sir," said she, "do you *sit* while the work of refining is going on?" "O yes, madam," he replied, "I *must* sit with my eye steadily fixed on the surface, for if the time necessary for refining be exceeded in the slightest degree, the silver is sure to be injured." At once she saw the beauty, and the comfort too, of the expression—"He shall sit as a refiner and purifier of silver." When we are in the furnace of trial, affliction, and temptation, the Lord *sits* by the side of the furnace, with his eyes steadily intent upon the work of purifying. Our trials do not come on at random; the very hairs of our head are all numbered.

As the lady was leaving the shop, the silversmith called her back, and said he had still further to mention, that he only knew when the process of purifying was complete by seeing *his own image* reflected in the silver.

Beautiful figure! when the Lord sees his own image reflected in us, His work of purifying is accomplished.

"But we all with open face, beholding as in a glass the glory of the Lord, are changed into the same image, from glory to glory, even as by the Spirit of the Lord."

"For we all, with unveiled face, reflecting as mirrors the glory of the Lord are transformed into the same image, from glory to glory, as from the Lord of the Spirit."

[Macknight.

CHURCH SLEEPERS *vs.* CHURCH PILLARS.

Selected for the Sabbath Recorder by a "Wide Awake."

In church architecture, pillars and sleepers are very necessary supports of the building. They have an important place in the framework, but serve distinct and different purposes. No architect ever confounds them, or thinks one can answer the end of the other. But in some of our country churches (perhaps it is sometimes so in the city) we see pillars and sleepers occupying very singular, and even ludicrous positions. Not unfrequently the *pillars* of the church are very irreverently transformed into sleepers, and the sleepers become a kind of support to the pillars. This position of the sleepers illustrates the expression, "Church Sleepers *vs.* Church Pillars." For, against the pillars which support the gallery, are leaned the sleepers which *support* the pews. It sometimes happens that there are not pillars enough, or they are not properly located, to *accommodate* all the sleepers which might be leaned against them. In such cases, the sleepers are seen in very awkward positions, like unshapely pieces of dead-wood scattered among the lively stones which compose the spiritual house.

It is a question of some interest—Why are there so many sleepers in our churches? Is it the fault of the preacher or the hearer? Some who are accustomed to sleep in the house of God say they do so because of the *dull preaching*. Dull indeed most preaching must be to the man who is asleep, or so near it as to be unable to determine whether he is in the body or out. Church Sleepers are not found only or abundantly in the presence of such as may perhaps be called dull preachers, "whose drowsy tinkling tends to lull the distant fold;" but those who are called the pillars of the church have been known to sleep before the most eloquent preachers. Some say they sleep because the *sermons are too long*. Possibly the preacher has not always time to write short ones. But if these sleepers under long sermons were obliged to do the labor of writing them, and endure the contempt of preaching them to a sleepy audience, they would not soon forget the punishment. Others say they sleep because the *sermon is an old one*. But it is a general truth, that the most attentive hearers of new sermons, are also the most attentive hearers of old ones. Most ministers are perhaps occasionally obliged to repeat their sermons. To do this is unpleasant enough, without the additional trial of preaching them to persons in a deep sleep. Nothing will put out the fire of animation in the preacher, or transform his strength to weakness, so quickly as the sight of one and another of his hearers dropping off to sleep. But however dull the preacher may be—however uninteresting his discourse, whether it be long or old, or both long and old—however much he may be at fault—all these things are not sufficient apology for the greater fault of sleeping in the house of God. Indeed, there can be no possible excuse for so bad a practice. An excuse for making a dormitory of God's house! Shame on the man who attempts an apology for it. It is an insult to the preacher and an insult to God; and is therefore both ungentlemanly and impious.

Though there may be no valid *excuse* for sleeping in the sanctuary, yet there may be some *reasons* for this bad habit. Let the three following be considered: 1. Too much labor during the week. 2. Too much dinner on the Sabbath. 3. Too much indifference respecting the worship of the sanctuary. Of these reasons it may be said, that God never requires his people to labor so severely for themselves during six days, as to unfit them for religious duties on the seventh. Will he bless the hard labors of those who thus rob him of spiritual offerings? Or if he does allow them some temporal prosperity, will not such prosperity greatly endanger their spiritual interests. Too much dinner on the Sabbath will almost invariably make the eye heavy, and the ear dull of hearing. "It is difficult to speak to the stomach, because it has no ears." In vain the preacher says, Awake, O sleeper! The *dinner* demands a little more sleep, a little more slumber—a demand difficult of denial, after a man has swallowed his conscience. "If thou be a man given to appetite (on Sabbaths,) put a knife to thy throat."

But if the hearts of those whose hands (and stomachs) are so full of labor, were deeply interested in the duties and privileges of the sanctuary, they would not go there to slumber and sleep. If they could say sincerely, with God's servant of old, "How amiable are thy tabernacles, O Lord of hosts! my soul longeth, yea, even fainteth for the courts of the Lord; my heart and my flesh crieth out for the living God!" then doubtless they would be wakeful hearers and devout worshipers.

TRUTH ABOUT DEATH.

The common mode of discoursing on this subject, so interesting to every one of us, is so stilted and over our heads, that we are glad to hear common sense have his say about it. Thus sensibly and wisely writes some able man in an *English Review:*

"It is a great thing—unutterably awful and thrilling—when for the first time in our lives, Death the conqueror makes himself known to us in all the mystery of his might and inexorableness. Every day the newspaper has its obituary; you are well aware that fifty people die in a minute; you have been in the habit of looking up at closed blinds in the street with some sort of awe; and hatchments in the great squares have touched you as might a baronial ruin; a newly-made grave has not been without a voice and a moral; funerals have intercepted your path in the thoroughfares; people have died next door to you. But even death next door is death afar aft—a vague, distant terror, and not a darkly awful presence. Stand—with suspended respiration and fevered temples—stand under the very flapping of his wings, as the inexorable stoops to breathe the last chill upon the forehead of some beloved one; feel that the solemn shadow in which you stand is deepening and deepening; kneel when the silver cord is snapped, kneel by a pale corpse in the hush of an hour before dawn, with no sounds to be heard but the sobs of passionate mourners and the ticking of a clock—kneel, and say to God, the 'Never more' of a bereaved heart, the 'Help, Lord, or I perish!' of a soul that is come into deep waters; so stand, so kneel, so cry to the Lord of life, and you will know what death is, and what a celestial hope may rise at last, luminous and large, out of the blackness of horror in that word—DEAD.

A simple child (says Wordsworth)—a simple child,
 That lightly draws its breath,
And feels its life in every limb,
 What should it know of death?

And it is beautifully said. But I was long, very long past the age of childhood, before I could bring myself to believe in dying. To this day, I can with difficulty only, and by a direct mental effort, conceive even of one dangerously sick as dying—dead! So completely does actual, present life, even when faint and fluttering, keep its negation out of my sight. That the beautiful flame which lights up the eye, and glows in the touch, should ever go out!—

 To die! . . . .
 To lie in cold obstruction and to rot;
 This sensible warm motion to become
 A kneaded clod!

And other pulses to go on beating; and the stars to keep step along the sky; and the south wind to ripple the rivers and stir the leaves of the trees; and little children to prattle and play; and the million fold hum of life to wake anew every morning; and the round impassive heaven to be blue as ever—O, it is strange, and was once stranger still to me!

"But if anything could be stranger than death itself, it would be the chatter, and idle, pompous cold-bloodedness with which coarse-minded persons seem to go about what are called 'the last marks of respect' to the departed. It may well strike you dumb with amazement to hear a widow, who has just lost an only son, call out sobbingly to some one to 'take care the funeral cake is made with currants, because she ca n't bear caraway seeds;' but I once heard that with my own ears. And what has put me into this mortuary train of thought is, that my door being ajar, I overheard a very sharp, rapid voice, addressing the servant thus: 'O, if you pleas 'm, could you tell me where a Miss Richards, a dress-maker, lives, somewheres about here, becos I want her to make me some mourning, which my husband died a fortnight ago of a hulcerated sore throat, and I've only got one gound and bonnet that 's fit to go hout in, and besides I know a young female who's just dead of being disappointed in love with my brother Holliver which he was married last week 'm, and a lock of his 'air and a piece of poetry was found in her work-box, and her relations is in want of some hextra mourning, and I've been hunting everywhere for Miss Richards, and I feels quite poorly myself, becos as I was passing by the Feathers they took in a little boy as had been found drowdid, and quite upset me, if you'd believe me 'm——.'

"O heavens and earth! Is it possible that a widow of fourteen days can rattle on in this fashion, taking for the starting-point of her talk the death of him who has lain in her bosom—and all to a stranger on the door-step? Is this mourning?"

ESTIMATE OF CALVIN'S LIFE.

From Bancroft's Miscellanies.

Calvin lived in the time when nations were shaken to their center by the excitement of the reformation; when the fields of Holland and France were wet with the carnage of persecution; when vindictive monarchs on the one side threatened all Protestants with outlawry and death, and the Vatican, on the other, sent forth its anathemas and its cry for blood. In that day, it is too true, the influence of an ancient, long established, hardly disputed error, the constant danger of his position, the intense desire to secure union among the antagonists of popery, the engrossing consciousness that his struggle was for the emancipation of the Christian world, induced the great reformer to defend the use of the sword for the extirpation of heresy. Reprobating and lamenting his adhesion to the cruel doctrine which all Christendom had for centuries implicitly received, we may, as republicans, remember that Calvin was not only the founder of a sect, but foremost among the most efficient of modern republican legislators. More truly benevolent to the human race than Solon, more self-denying than Lycurgus, the genius of Calvin infused enduring elements into the institutions of Geneva, and made it, for the modern world, the impregnable fortress of popular liberty, the fertile seed-plot of democracy.

We boast of our common schools; Calvin was the father of popular education, the inventor of the system of free schools. We are proud of the free States that fringe the Atlantic. The pilgrims of Plymouth were Calvinists; the best influence in South Carolina came from the Calvinists of France; William Penn was the disciple of the Huguenots; the ships from Holland that first brought colonists to Manhattan were filled with Calvinists. He that will not honor the memory, and respect the influence of Calvin, knows but little of the origin of American liberty.

If personal considerations chiefly win applause, then no one merits our sympathy and our admiration more than Calvin; the young exile from France, who achieved an immortality of fame before he was twenty eight years of age; now boldly reasoning with the king of France for religious liberty; now venturing as the apostle of truth to carry the new doctrines into the heart of Italy, and hardly escaping from the fury of the papal persecution; the purest writer, the keenest dialectician of his century; pushing free inquiry to its utmost verge, and yet valuing inquiry solely as the means of arriving at fixed conclusions. The light of his genius scattered the mask of darkness which superstition had held for centuries before the brow of religion. His probity was unquestioned, his morals spotless. His only happiness consisted in his "task of glory and of good;" for sorrow found its way into all his private relations. He was an exile from his country; he became for a season an exile from his place of exile. As a husband he was doomed to mourn the premature loss of his wife; as a father he felt the bitter pang of burying his only child. Alone in the world, alone in a strange land, he went forward in his career with serene resignation and inflexible firmness; no love of ease turned him aside from his vigils; no fear of danger relaxed the nerve of his eloquence; no bodily infirmities checked the incredible activity of his mind; and so he continued year after year, solitary and feeble, yet toiling for humanity, till, after a life of glory, he bequeathed to his personal heirs, a fortune, in books and furniture, stocks and money, not exceeding two hundred dollars, and to the world a purer reformation, a republican spirit in religion, with the kindred principles of republican liberty.

A VERY TROUBLESOME CHURCH MEMBER.—Spending a night in a certain neighborhood of A——, we inquired of our host, a fair, Christian man, how the church got on, for we passed a neglected frame chapel at the cross roads.

"Oh! poorly," said he, "poorly enough."

"Why, what's to pay? You are in a thick settlement of intelligent people; able to keep a congregation and support the gospel."

"Just so," says he, "but one troublesome man has broken up the society, and keeps it broke up. It was an unlucky day for the church when he moved here. Yet he is a person of good parts, and has an interesting family. Before he came here he had troubles in the same way."

We suggested that perhaps the troublesome man's peculiarities were not consulted; indulge him a little. Maybe he wants to lead.

"Oh! as to that, we've tried him in the lead, and every way. He is not satisfied with leading, but turns round and butts the wheel-horses."

We gave it up. Our host was a farmer, and the illustration cut like an argument. David had a few of this sort in his mind when he wrote the 12th Psalm. [N. O. Ch. Ad.

The fabric of our life is formed of necessity and chance. The reason of man takes its station between them, and may rule them both. It treats the necessary as the ground-work of its being; the accidental it can direct, and guide, and employ for its own purposes; and only while this principle of reason stands firm and impregnable does man deserve to be named the god of this lower world.—[Goethe.

"STATE OF THE DEAD"—NO. 3.

I apprehend that the decision of the question at issue between Bro. Brown and the Annihilationists, will rest upon the true meaning of the language used by the Scripture writers upon that subject. If the letter of that language is to be understood only according to what I will term its natural or material import, then annihilationism is the true doctrine. But such, I apprehend, is not the fact. And in this Bro. B. and myself agree to a certain extent. We agree, that the terms *life* and *death* are used in the Scriptures to represent states of mind, rather than duration or cessation of existence. These terms, like most of Scripture language, are representative terms. The sacred writers were necessitated to use language primarily applicable to *matter*, to describe or represent spiritual truths or ideas. Hence persons, things, places, &c., represented spiritual ideas. Melchizedek, a mere man, became a representative person; and the omission of his pedigree in the genealogical tables of the Jews, gave rise to Paul's remark, that he was fatherless and motherless, without beginning of days or end of time; and the circumstance that he officiated as a priest, without the Aaronic induction, was used to represent the priesthood of the Messiah. Thus the nation of Israel, in their deliverance from Egyptian servitude, their wanderings in the wilderness, their miraculous support, and their rest in Canaan, all represented spiritual truth. So of their ceremonial worship and observance. Thus the terms Life and Death, which apparently described existence and non-existence, were used to represent states of mind.

Bro. B. therefore most truly declares, "No part of the finally executed punishment consists in natural death; for, according to the original constitution under which man was placed, natural death, or the separation of the soul and the body, was not threatened, and could not have taken place. In the above I agree, so far as that no part of the threatened punishment for violation of the Adamic law was natural death; for natural death was evidently a consequent upon man's original constitution, and was made use of to represent the effect of moral disobedience on the soul, or spiritual death. Hence natural death is no part of the penalty which was or is attached to the violation of moral law; if we except cases under the Mosaic economy, which were merely representative. Hence the real *penalty proper* of the Divine law is to be found in the sad and terrible effects of sin in or on the soul, man's spiritual nature, the real man.

That this view of the subject is correct, may be shown from the nature of that salvation procured by Christ; for that salvation promises deliverance from the penalty of that law, and that deliverance does not include salvation from natural death, as salvation by Christ does not include preservation from natural death, and as that salvation *must* include deliverance from the penalty of the violation, it is certain that natural death forms no part of the penalty of the Adamic law. This Bro. B. admits, and argues, that "if natural death is the execution of the threatening, then no one escapes, not even the believer in Christ. Every one suffers the penalty of the law, and remission of the penalty is a boon granted to none. They may say what they please about the resurrection, and subsequent immortality, as the gift of Christ; it is clear, that believers obtain no gift at all, according to their scheme, till after they have *died*, been *annihilated*, and so satisfied the law's penalty in their own persons—a scheme which makes the whole system of redemption a perfect farce." Thus Bro. B. and myself agree, that natural death was no part of the penalty of the Adamic law.

But Bro. B. asks, "Why then is natural death inflicted, if it is not intended (in part at least) as the punishment of transgression?" And I wish the reader to weigh well the reason Bro. B. assigns why natural death is inflicted. His reason is this: "To render him (man) invisible, or to place him in prison, as a criminal (if finally impenitent) waiting for the execution of the sentence against him at the day of judgment; and natural death is the method of rendering him (mankind) invisible." The reason here given may be orthodox, but if it is, I frankly own that I am heterodox on that point.

But according to Bro. B.'s theory, that was the only way that death could enter this world; for Bro. B. expressly declares, that, if man had been punished for disobedience, according to the threatening, natural death could not have taken place at all. Therefore, according to Bro. B., natural death is neither the result of man's material constitution, nor the effect of the law of nature, nor is it the inflicted penalty entailed on man for disobedience; but it was introduced into the world merely for the purpose of arresting mankind and hailing them to prison to await their trial. Death, then, is a kind of high sheriff, commissioned to arrest and bind over to prison the race of mortals, while the resurrection must be the writ of habeas corpus for bringing the body forth to trial and judgment. "Death," says Bro. B., "was introduced under a new dispensation of grace; and when this new dispensation is finished, the separation of the soul and body will be ended, and men will be united to their bodies. When each person's probation under the new dispensation is finished, the next thing is to render him invisible, or to place him in prison as a criminal, (if finally impenitent,) waiting for the execution of the sentence against him at the day of judgment; and natural death is the method of rendering him invisible." This theory of Bro. B. seems to me as perfect a farce as that of annihilation does to him. If I understand Bro. B., he supposes that the real and proper penalty of the Adamic law was endless punishment of the soul and body here on this earth, without the possibility of dying. He says, "The constitution under which man was first placed did not recognize natural death, nor did it admit it. The death threatened was endless punishment in his (man's) whole person, soul and body; therefore natural death could not have taken place at all, had men been punished for disobedience according to the threatening." According to Bro. B., mankind would never have died, although sinners, if the Christian dispensation had not been introduced. Death, therefore, did not come by sin directly, but by Jesus Christ, or in order that the penal code of Christianity might be executed. This is surely a novel theory, but entirely without any foundation, in my opinion, either in Scripture, reason or philosophy.

Natural death is the legitimate effect of material organization, and is more or less premature, as such organization conforms to or violates the laws of its vitality. It neither destroys, annihilates, nor materially affects, the character or action of the soul, but only the mode of its existence and action. And I apprehend there is nothing in the nature of the resurrection which will ever counteract, repair, or restore natural death. (The elucidation of this I now reserve for future consideration.) But, according to Bro. B., will it not follow, that the resurrection of the body is the principal object to be attained by the mission of Christ? For, according to him, death natural was inflicted in order to make it possible for God to imprison mankind in an invisible place until the whole race had probationed themselves, when their bodies are to be raised, and then judgment is to proceed, and a final separation of the righteous and the wicked is to transpire.

Now it will be recollected, that Bro. B. maintained in his first article, that the Divine government would not have been so arranged as to require a miracle in order to execute it, as to its rewards and punishments; and yet the theory he has elaborated necessitates two miracles, of the most astounding and appalling character—one to kill every man, woman and child of the human race; the other, to raise all of them to life again. For Bro. B. expressly declares, that "the constitution under which man was first placed did not recognize natural death—nor did it admit it." Hence natural death must be a miracle. For if man's natural constitution did not admit death, then such constitution must be changed in order to permit death to enter. God, therefore, had in a miraculous manner to subvert or change man's first constitution, in order to render it possible for him to die. For, according to Bro. B.'s theory, natural death was impossible, according to the course of nature.

But farther, if the Divine government was so arranged as not to require a miracle in the case for its full execution, does not Bro. B. involve himself deeper in the mud than his annihilationist does in the mire? The annihilation theory necessitates a miracle in order to bring men to trial, judgment and punishment. But not so in Bro. B.'s. For, if I understood him, he maintains, that the full penalty threatened could have been inflicted on man, had he never died a natural death. He says, "The punishment threatened was evil to the whole man, as made up of soul and body." And, as he farther says, "Man's constitution did not admit of death," it follows of necessity, that the whole penalty could have been inflicted had man never died. According to Bro. B., man was created immortal in both soul and body, and had not God by a miracle counteracted the immortality of his body, or suspended it for a while, man would have lived here on earth for ever, suffering the penalty of the law. Therefore Bro. B.'s miraculous death of the race, was not in order to render it possible for God to punish his creatures, but to arrest and imprison them in the invisible world, for some future judgment day.

But as much as Bro. B. discards the idea of a miracle in order to execute the Divine government, his theory necessitates another, viz., for the purpose of raising to life those dead bodies which were killed by the first miracle. But even this miracle of the resurrection, Bro. B. admits, is not in order to render it possible for God to recompense his creatures, but in order that soul and body may be rewarded together. But, according to Bro. B., unless God had caused natural death, the separation of the soul and body in a miraculous manner, there would have been no need of the miraculous resurrection in order that soul and body might be rewarded together; for they were indissolubly united by their original constitution, or the course of nature. Hence, while Bro. B. ignores and discards all miracles in any case, as necessary to a full execution of the awards annexed to the Divine government, when arguing against the annihilationist, he nevertheless, in his theory, embraces two stupendous miracles—one for killing, and another for making alive—and these too when the *course of nature* would have fully executed the Divine government to all intents and purposes, had he not frustrated such execution by the interference of his miraculous death-penalty system. Now, while I truly believe the annihilation system to be based on error, and therefore not true, yet it does appear to me, that as far as consistency is concerned, it has the preference over that of Bro. B. I am, therefore, obliged to reject them both. They appear to bear a similar relation to each other that modern Calvinism does to hyper-Calvinism. One is materialism, the other materialism refined, or partly spiritualized. Both necessitate miraculous interference in order to administer the Divine government. Annihilation has one only. Bro. B. has two. Annihilationists admit the necessity of such miraculous interposition, while Bro. B. denies it.

S. S. Griswold.

Missionary Services.—Quite a large company, says the *Boston Journal*, gathered on board the fine barque Sultana, Capt. Watson, the other day, to engage in religious services appropriate to the departure of missionaries. The services were conducted by Rev. Mr. Beadle, of Hartford, and consisted of the singing of a hymn and prayer. The missionary was Rev. Mr. Pettibone. He is connected with the Armenian Mission. Miss Isabella Goodell, daughter of the well-known missionary of the American Board, goes out as a teacher in one of the mission schools. Another daughter, and also a son of Dr. Goodell, are also passengers on board the Sultana. The former goes out for health and to visit her relatives, and the latter to practice his profession—that of a physician.

FROM THE LAND OF CANAAN—NO. 1.

April 10, 1855.

My Dear Sisters,—As it is utterly impossible for me to write to all who have requested, and to whom *my heart would dictate*, I will, therefore, occasionally send a letter to the *Recorder* for you. And I am not without hope that a simple narrative of some of the events of our lives, travels, the customs and habits of the people, may give interest to the cause which is dear to my heart.

Sickness has interfered materially with our labors, wishes, and hopes; yet we feel a deepening, progressing interest in this work, as we each day witness the suffering scenes around us, and the moral and spiritual darkness which pervades the minds of this people. Mr. Saunders' health is now better; still, he is very weak, and unable to labor. I have been suffering much for several weeks past, with chills and fever; and we must inevitably leave our home for a time, hoping by this means soon to be restored, that we may resume our duties. To use every means for the preservation of our lives, is a Christian duty, which we owe to this people and to our God.

Beirut, April 14th, Hotel de Bellone,
One mile west of the city, on the sea shore.

Not having sufficient strength to ride to the mountains, we took the French steamer, at eight o'clock on the morning of the eleventh. At five o'clock on the morning of the twelfth, we were safely anchored in the bold and beautiful harbor of Beirut. At an early hour I was upon the deck, to view the surrounding scenery, which was most delightful. There lay Beirut, the ancient Berytas, surrounded by a forest of palms, cypress, mulberry, and olive groves, with the domes, minarets, and the tall stone buildings, rising in the midst of the deep green foliage of the city. On the south and east of the city are the mountains of Lebanon, with their towering heights, which are so rich in scriptural associations. The morning view of these mountains from the harbor was most charming. There they lay, with the vineyards and fields of lovely fertility upon their sides, with a wreath of snow upon their summits, tinged with the rosy tints of the early morn, which was soon illuminated by the glowing sun. As I gazed upon this wonderful picture, and its varied aspects, as the morning sun cast its "garniture of beauty" over this whole scene of grandeur and repose, I could see the true force and fitness of the figure used by the "poets of Israel and the prophets of God." How grand and suitable in its application is that used by Solomon, when, referring to our Saviour, he says: "His countenance is as Lebanon." How exalted and beautiful are the strains of Isaiah, when he compares the Gospel of Christ to the fruitfulness of these mountains, and says: "The glory of Lebanon shall be given unto it." How often David sang of these mountains, and of their fruits and cedars. Moses had heard of the beauty of these mountains, "and longed to see them before he died." How earnestly he prayed, "O Lord God, I pray thee let me go over and see the good land that is beyond Jordan, and that goodly mountain, Lebanon." Jeremiah and Hosea also use these mountains to illustrate the future glory of Israel, and the truths of Heaven.

April 17th.

We find the change a benefit, and our strength increasing. Mr. S. hopes to be able soon to visit Tyre and Sidon, which is about ten hours' ride from Beirut, and is said to be a fine section of country. It is also said that many of the plantations can be watered by the mountain streams. If this be true, it must save much expense in irrigation. To-day we have been to the city, to see some of the remains of antiquity. Saw an ancient castle, erected by Augustus, at the time he made this a Roman colony. Saw three ancient columns, enclosed by a high wall, called in Arabic, Rajal el Arbaron, or the forty men. Here one of the ancient guards was stationed. Saw some of the architectural remains which were erected under the Emperor Justinian, who styled this city "the nurse of law," on account of its excellent schools. From there we went to see one of the "magnificent baths erected by Agrippa, the grandson of Herod the Great." The floors of this bath are remarkably handsome; they are curiously laid in various figures, of variegated marble and other beautiful stones, highly polished. In the center of the first room which we entered was a beautiful marble fount, sending out jets of pure water, which is brought from the mountains of Lebanon. On our way to the south gate, we saw a number of rooms where the Arabs were weaving silk girdles for the waist. I can scarcely conceive how such beautiful textures can be produced by such coarse and clumsy machinery. We went into a little cemetery near the south gate, outside the wall; there I read the names of Mrs. Wolcot, Mrs. Smith, Rev. Pliny Fisk, and a number of other Americans. We took a circuitous path homeward through the gardens outside of the wall midst which are the dwellings of the French, English, and Americans. We saw a company of Druse women, who wear a most singular ornament on their heads, a conical tube of silver, from one and a half to two feet in length, set at an angle of about forty-five degrees, pointing forward; over it is thrown a white muslin, which they wear for a veil; this, falling over their shoulders, and reaching to their feet, entirely covering their form. They invited Martha and myself to a seat on a terrace with them. After assuring them that our gentlemen (Mr. S. and our teacher) would not come up without an invitation, they threw back their veils, to show us their jewels, diamonds, and strings of gold coins which they wear on their heads, necks, arms, and about their waists. I was surprised to see the value of the ornaments worn by these women. Passed a large barrack, where were many cannons, some of which were used yesterday for the purpose of saluting the Duke of Bravant, son of the Belgian King, who arrived here yesterday afternoon in an Austrian steamer furnished by the Pasha of Egypt for him, the Duchess, and his suite. We met him this morning, mounted upon a fine Arabian horse, in plain European dress, with his guard and a large procession of citizens on foot. He is young and prepossessing in his personal appearance.

April 23d.

We have had many kind invitations to vist the American missionaries here, but have hitherto declined them, on account of my having a return of chills and fever. This morning Dr. Smith called to see if I had strength to ride to his house. Soon the servant came with the donkeys, and took us up a narrow winding path to their beautiful residence on a hill south of the city. We met there the Rev. Isaac Lounds, agent of the British and Foreign Bible Society. Mr. Saunders gave him a list of Bibles of different languages, which he will send to us for distribution. Dr. Smith is now making a new translation of the Arabic Bible, those now in use being Catholic. He has published several controversial works in Arabic. Their printing press has been in operation about sixteen years; their fine steam press one year, which is a wonder to this people. The missionaries here are feeling rather depressed at present. The school at their female seminary is now suspended, on account of the ill health of Dr. De Forest, who is now absent with his family. Other members of the mission have been obliged to leave on account of sickness. The kind attention received from these missionaries in our loneliness and debility, has been very cheering to us. Mr. Smith, our former consul, whose residence was here, has left for America. Mr. Wood, our present consul, has gone to Jerusalem. He dined with us when on his way there. We were much pleased with his gentlemanly and Christian deportment.

Beirut is the seaport of Damascus, and indeed for all of this part of the coast. Silk, oil, and wheat, which are the product of the country, are brought from Damascus and the surrounding towns and cities on camels, and exported from here. Beirut is one hundred years at least in advance of Jaffa, in point of civilization and improvement. This is owing, no doubt, to the establishment of many European mercantile houses, and also to the direct effort of the American missionaries, who have been laboring here successfully for the last twenty-five years; during this time the population and the prosperity of the place have greatly increased. The number of inhabitants is estimated at present to be over forty thousand. It is our most earnest prayer, that God may soon give us strength to resume the labors which we love. We may not live to see the change in this people which we daily pray for, yet it will come; every promise of God is sure and steadfast, and the world will soon see that God rules, and this land will become the "glory of all lands."

Martha Saunders.

PRESBYTERIANISM AND CONGREGATIONALISM.

For some time past a spirit of rivalry has been growing among the Presbyterians and Congregationalists of this country. At the recent meeting of the New School General Assembly, in St. Louis, this spirit manifested itself, not only in the election of officers to take charge of the various denominational interests, but in the department of missions, as will be seen by the following paragraph, which we copy from a report of the meeting in the *Independent*:—

"There has been for some time a disposition to complain of the relations of the American Board of Foreign Missions with the Presbyterian Church; especially on the ground that sufficient facilities were not given for the formation of Presbyteries among the missionaries, and for the organization of Presbyterian churches among the converted heathen. These complaints came out to-day in full force, and occasioned quite a spirited debate. It was charged that, although the Presbyterians of this country have contributed about two millions of dollars to the treasury of the American Board, yet not a single Presbyterian church has been formed by the missionaries, but the mission churches are of a Congregational character; that an attempt by missionaries at Madras to form a Presbytery had been prevented by threats from the Board, that they should be scattered if they persisted in their design; that there was a ~~determination on the part of the Board~~ utterly to prevent the formation of Presbyterian organizations on missionary ground; and it was declared by several, that coöperation could not be continued unless the Board would consent to recognize the rights of the Presbyterian Church in these matters. A few persons replied, defending the course of the Board, and deprecating the sectarian spirit that was exhibited in the Assembly; but, although no definite action was taken, nor any indeed proposed at present, yet the weight of influence in the Assembly was decidedly in favor of the complaints that were made against the Board, and on the part of most—if, indeed, I should not rather say all—of the prominent members, there seemed to be an anticipation of the time when all the missionary labors of the Presbyterian Church, at home and abroad, should cease to bear any connection with Congregationalists, and be carried on by ecclesiastical and exclusively Presbyterian organizations."

DANGER OF CENTRALIZATION.

In the Baptist denomination, for some time past, there has been expressed much fear of the influence of Boards for carrying forward benevolent operations. In the Presbyterian Church, also, as we see by our exchanges, the subject is beginning to be agitated. *The Presbyterian*, a leading paper in the Old School interest, has an article upon the policy of the church in this respect, which sternly rebukes the fault-finders. The following paragraph will bear copying:—

"Then, again, it is urged that centralization of power must be the result of such institutions. This may be a good theme for verbose oratory, but in the view of common sense it has no weight. Where there is a Board, there must, of course, be influence; for it supposes the cordial and hearty coöperation of a body of skillful, practical men, who will strive to make the institutions entrusted to them powerful and influential. And is such centralization to be feared, so long as it is not abused? Is not its tendency to benefit the church at large? Is it not power, collected at a point, to be radiated to the circumference of the church? Would opponents be better pleased that the management of our Boards should be so slovenly and sleepy, that there should be no power to benefit the church and awaken their jealousy? All our Boards have power; if they had not, they should be abandoned; but has it ever been proved, or even alledged, that they have abused their power for personal or party purposes? If maladministration is charged upon them, that suggests a plain course, 'the law is open, and there are deputies; let them implead one another.' The charge may be made, the culprits arraigned, and the 'matter shall be determined in a lawful assembly.' In other words, the General Assembly has the full power to correct all abuses, although it may be unable to take cognizance of indistinct inuendoes and groundless complaints."

TO D. E. M.

Dear Sir,—In your dissertations on Geology, you have stated the following as demonstrated facts:—

1. That the stratified crust of the earth is at least ten miles thick.

2. That the solid crust is fifty miles thick, and below to the center the earth consists of melted lava.

3. That by the use of Wm. Herschel's telescope, stars can be seen so distant that their light would not have reached the earth short of two millions of years, which would place them distant from the earth something more than twelve quintillions, one hundred and nine quatrillions, eight hundred and twenty-four trillions, allowing light to travel one hundred and ninety-two thousand miles in a second of time.

As the above are declared to be demonstrated truths, and not theory, please to give the demonstration, and not hypothesis.

I would further ask, Does it follow, as a demonstration, that because trees now grow from seed, and a hundred years or more are required to bring them to maturity, that God did not create trees at maturity before they grew? See Genesis 2: 5. More anon.

No Scio.

The Case of Pardon Davis.—Attention is called to the resolutions of the Eastern and Central Associations, relating to Bro. Pardon Davis, that in our public congregations on the last Sabbath of this month special prayer should be offered in his behalf, that he may be restored to liberty. May we not presume, that all of our sister churches will join, with one heart and one voice, in earnest prayer to God, that he will interpose in behalf of our persecuted brother, and immediately bring him forth out of prison? We have good encouragement to pursue this course. Jesus Christ says, (Matt. 7: 7,) "Ask, and it shall be given you;" again, (Matt. 18: 19,) "I say unto you, that if two of you shall agree on earth as touching any thing that they shall ask, it shall be done for them of my Father which is in heaven." Yes, "*it shall be done.*" If we do our part, God will do his. 1 John 5: 14—"And this is the confidence that we have in him, that if we ask any thing according to his will, he heareth us." And James says, (ch. 5: 16, 17, 18,) "The effectual fervent prayer of a righteous man availeth much. Elias was a man subject to like passions as we are, and he prayed earnestly that it might not rain, and it rained not on the earth by the space of three years and six months; and he prayed again, and the heavens gave rain." We find also, Acts 12th, that Herod, in persecuting the church, imprisoned Peter. "But prayer was made without ceasing of the church unto God for him." God heard their prayers, and set him at liberty. God will still hear, and he will do whatever is for the best; and, if necessary, he will cause an earthquake or send an angel from heaven to accomplish his purpose. Let us then call upon God "*without ceasing*" in behalf of Bro. Davis, both in our congregations and in our closets, till he shall answer our importunities.

Resolution on the American Tract Society.—At the recent annual meeting of the Middlesex Association of Congregational Ministers, the following resolution was adopted:

Resolved, That while we entertain sentiments of the highest regard for the American Tract Society, we cannot, as friends of the Redeemer's Kingdom, but express our decided disapprobation of the policy of its present Executive Committee in regard to the sin of American Slavery.

The Anniversaries at Alfred Academy.—The approaching Anniversaries of Alfred Academy and the Literary Societies connected with it, are regarded with peculiar interest.

On Monday, the 2d day of July, the Literary Festival of the Alleganians will commence at 10 o'clock A. M. At 2 o'clock they will be addressed by the Rev. Mr. Beecher, of Elmira, N. Y. In the evening, the public examination of the Music Class will occur.

On Tuesday, the 3d of July, the Orophilians will hold a public session, commencing at 9 o'clock A. M. At 2 o'clock they will be addressed by the Hon. J. R. Giddings, of Ohio, on "*The Higher Law: its application to the whole conduct of man, with its rewards and penalties.*" The Society will also be addressed by Mr. Solon O. Thatcher, of Union College.

On Wednesday, the 4th, the usual anniversary exercises of the Academy will occur, which will be closed by an address to the graduating class by Prof. D. Picket, and the delivering to them severally their diplomas.

N. V. Hull.

De Ruyter Institute.—We have received a Catalogue of the Officers and Students in DeRuyter Institute during the year ending June 26, 1855, from which we learn that the number of students in attendance was 180, of whom 98 were ladies, and 82 gentlemen. The Faculty consists of Henry L. Jones, A. M., Amos R. Cornwall, A. B., Miss Josephine Wilcox, Mrs. Sarah E. Jones, Miss Sarah Elizabeth Shippey, and Mrs. Barbary A. Cornwall. The present term closes on the 26th inst., and the Fall Term commences August 29, 1855. The prospects of the school are said to be very encouraging.

Revision of the Scriptures.—The General Assembly of the Presbyterian Church, while in session at St. Louis, adopted the following Minute, prepared by a Committee, respecting the movements for a revision of the Scriptures:—

The committee had received an overture from the Synod of Missouri respecting the common version of the Bible. Said movement set forth the fact that strenuous efforts have been made for years, and are now made, especially in the West, to destroy confidence in and set aside our common and most excellent version of the Bible, as very defective and sectarian, and to introduce a new one. It moreover sets forth that we as Presbyterians, have been misrepresented, and the idea conveyed that some of our ministers favor the scheme. Our silence on the subject has resulted in creating the suspicion among some of our people that the common version of the Bible is not worthy of confidence. Therefore,

1. *Resolved*, That we have unshaked confidence in our common version, and our firm belief, that a better one is, on the whole, for common use, cannot be had.

2. *Resolved*, That we deprecate the incalculable evils that would inevitably result from such an attempt by any denomination or denominations, to introduce a new version; destroying as it would confidence in our common version; ejecting it from our schools; opening the way for conflicting, sectarian versions, and sadly wounding and marring our beautiful Protestantism.

3. *Resolved*, That in the judgment of this Assembly not one of our judicatories, and not one minister, approve or sympathize with this injudicious sectarian movement.

4. *Resolved*, That our ministers be careful in expounding the word publicly, so to expound as to inspire and sustain confidence in our excellent version, as truly the word of God; believing as we do that the honest hearted inquirer, searching after the truth with a teachable spirit, will find it.

The Law concerning Pews.—The following decision relates to the State of Pennsylvania, but the same principle would probably be adopted by the Courts in other States. As bearing upon questions often arising upon the repairing or removing a church building, it is worth remembering:—

"The Third Reformed Dutch Church of Pennsylvania, having brought an action against the executors of a deceased pew-holder for arrears of pew rent, an elaborate decision of the matter has been given by the Supreme Court of that State. The Court held that the English law relating to pews can have no general application here. Religious congregations were here all voluntary associations, and each governed by rules of their own, so that legal decisions generally took the laws and customs of a church as their guide. A pew right, it was further stated, is not of such a character as to prevent an absolute sale of the church edifice, either by contract or by judicial process; by itself it was never known as a subject of taxation; if the edifice burns down the pew right is gone; it does not prevent the society from tearing down and rebuilding the edifice, or from altering the whole interior arrangement of it; it does not authorize the pew-holder to change and decorate the pew according to his fancy, or to cut it down and carry it away; and it gives him no right to the ground on which it stands. As property, it is so conditional and impermanent that it cannot be called real estate, and it must necessarily pass to the personal representative."

Missionary for Jerusalem.—At the meeting of the Established Synod of Glasgow and Ayr, Dr. Ayton, Corresponding Member, submitted an overture to the General Assembly, praying that measures should be adopted with the view of appointing a missionary to labor at Jerusalem for the conversion of the Jews. The present was a favorable time for the establishment of such a mission; the Jews were pressing in great numbers into Jerusalem, and it was difficult to tell what the events of a few months might produce. The Reverend Doctor subscribes £100. The overture was unanimously adopted.

The Minutes of the Seventh-day Baptist Eastern Association are printed. Parcels will be put up for each church in the Association, and forwarded by the first opportunity. Meanwhile send for them if you can.

RELIGIOUS INTELLIGENCE.

Dr. Hall, in his medical journal, asserts that one great cause of dyspepsia in ministers is eating too soon after preaching. For two or three hours the tide of nervous energy has been setting in strongly towards the brain, and it cannot be suddenly turned towards the stomach; but the mental effort has occasioned a feeling of faintness or debility about the stomach, and a morbid appetite; and if food is taken at all largely, there is not the nervous energy there requisite to effect its digestion, for the brain will be running over the discourse.

Roman Catholic Governments are not the only ones guilty of religious intolerance. In Lutheran Sweden the Government has issued an edict against certain Baptists who have refused to have their children baptized, in which the gens d'armes are instructed to seize the infants and see that the rite is performed. A law has also been passed heavily fining any one who is not an ordained priest for administering the Lord's Supper, and also mulcting those who receive it from such a person.

The friends of Dr. Dick, the gifted author of the "Christian Philosopher," and kindred works, have been for some time assiduous in their efforts to get from Government a small annual tribute which might aid in comforting the declining years of one who has produced many works of enduring excellence, but which unfortunately are not so extensively read as their merits entitle them to be. The labors of these gentlemen have now been rewarded by the Lords of the Treasury conferring on the venerable Dr. Dick the munificent pension of ten pounds!

The Boston *Transcript* says: Rev. John Sawyer, of Garland, Me., who is now within a few months of one hundred years of age, is at the Marlboro' Hotel, in this city. He is on his way to revisit the scenes of his childhood, in Hebron, Connecticut, from whence he removed some eighty-eight years ago. "Father Sawyer," as he is called, is a graduate of Dartmouth College, of the class of 1783, and has been in the minisiry as pastor and missionary nearly seventy years.

The Rev. Dr. Todd, Cong., of Pittsfield, Mass., has been compelled by ill-health to suspend his pulpit labors, and his Society has voted him leave of absence for four or six months. He has gone to Saratoga, and may possibly take a trip abroad. Some members of the Society have made up a purse of $1100 as a present to the doctor, who has preached 27 years, 13 of them to the present congregation.

J. Hosford Smith, Esq., for many years Consul for Syria, resident at Beyrout, returned to this country with his family, recently. Mr. Smith has been greatly useful during his consulship abroad, and has secured the highest respect and regard of the missionaries and American travelers, who have enjoyed his assistance and society. He was dismissed by President Pierce, to give place to Rev. Henry Wood, of Concord.

The *Home and Foreign Record* states that there are now almost 300 theological students connected with the Old School Presbyterian Assembly, making a supply of about 100 per year. The average loss by death has been 40—leaving 60 as the actual annual increase of ministers. But the annual increase of churches is 97, so that nearly 40 churches a year will be unprovided with ministers, even if no provision be made for foreign lands.

In Glasgow and Edinburg, and in other parts of Scotland, where a Romish population is found, there is a general and happy movement going forward for making known the gospel to Romanists; tracts are prepared and distributed; theological students spend their long vacations in laboring for them, and associations are formed for the support of such movements.

The sum of fifteen thousand dollars has been raised to endow the Episcopal Theological School of Virginia. This institution has given a bishop to the diocese of Louisiana, and missionary bishops to China and Africa; has furnished clergymen for every diocese in the Union, and has sent forth all the American Episcopal missionaries now in foreign lands.

The following legacies to various Religious Societies have been left by Ansel Pratt, late of North Weymouth:—American Bible Society, $5,000; Massachusetts Bible Society, $3,000; American Tract Society, $2,000; and the residue of his estate, probably $8,000, to the American Board of Commissioners for Foreign Missions.

The late Abner McGhee, of Ala., previous to his death, made the following liberal donations:—American Bible Society, N. Y., $50,000; McGhee College, Ala., $10,000; Samaritan Fund, Alabama Conference, Methodist Protestant Church, $10,000; Alabama Bible Society, Montgomery, $10,000.

A letter from Camden N. J., speaks of a precious revival with which the Baptist church in that place has been recently favored. The pastor, Rev. John Duncan, formerly of Lowell, Mass., has baptized fifty-nine, and others are inquiring for the way of life.

The printing of the Protestant Bible, which had been commenced at Madrid, has just been prohibited by the authorities; while demonstrations are made in the northern provinces of the country against that part of the Constitution which sanctions liberty of worship.

A little church at Atlanta, Ill., consisting of only nineteen members, all in moderate circumstances, pledges itself to pay into the treasury of the American Missionary Association, yearly, toward the support of a missionary in Africa, $200.

The *Recorder and Register* reports interesting revivals in Clifton Park, and Fort Ann, N. Y. The church in Fort Ann has received to membership 84 interesting converts, 61 of whom were received by baptism.

The Mayor of St. Louis has issued a proclamation ordering the closing of all confectionary stores, barber shops and segar stores, and stopping the sale of Sunday papers on the Sunday.

Fifty-five young Abyssinians and negroes, selected by Austrian priests, have left Egypt for Italy, where they are to be educated as Roman Catholic missionaries.

Reuben Dunn, of Waterville, Me., has given $7000 to aid the Methodist Biblical Institute at Concord, N. H.

Anthony Burns has gone to Oberlin, Ohio, where he is to receive an education, in Oberlin College.

THE RIGHTS OF SCHOOL-MASTERS AND PARENTS.—A case of considerable interest was tried before Justice Ladd, of Cambridge, Mass., recently. A citizen of Newton, was complained of for an assault upon the master of a school of that place. It appeared that the master was in the habit, as is now the general custom, of keeping the child of defendant, with other scholars, after school hours, to learn her lessons, which had been imperfectly recited during school hours. The parent, believing that the detention was illegal, went to the school-house and demanded his child. This was after regular school hours. The master said the child should go as soon as she had recited her lesson. The parent attempted to enter the school room to take his child, but his entrance was resisted by the master, and the assault upon the master was the result. The court ruled that the keeping of a child until the lessons of the day had been perfected, was legal; that the parent, in attempting to enter the school room, in opposition to the will of the master, was in the wrong; that a child placed at school by the parents is under the control of the master until regularly dismissed; and that a parent cannot withdraw the child from school during the day against the master's will, except through the intervention of an officer and the school committee. The defendant was fined $30 and costs.

THE NEW SCHOOL PRESBYTERIAN ASSEMBLY AND SLAVERY.—An exciting discussion upon the subject of slavery occurred in the New School Presbyterian Assembly, which recently convened at St. Louis. The discussion arose upon the presentation of a report by a committee appointed at a meeting of the Assemby held at Buffalo last year. The report re affirms the declaration of previous General Assemblies as to the sinfulness of slavery; exhorts northern men to discuss it more temperately, and southern Christians to do all they can for its speedy removal; also provides for the appointment of a committee, to report at the next General Assembly, what are the constitutional powers of this body in regard to it. The question was upon the adoption of the report. Some gentlemen took the ground that slavery is not sinful; others, that the Assembly had no constitutional control of the matter, and others that the report was not so deprecatory as it ought to be upon the subject. Good feeling, however, prevailed throughout, and the report was finally adopted by a large majority.
[Watchman and Reflector.

THE LIQUOR EXCITEMENT AT PORTLAND, ME.—The Portland *Advertiser* contains a full report of the trial of Mayor Dow, on a charge, under the new law, of having liquor in his possession, with intent to sell the same in violation of law. The Justice, (Carter,) after a careful review of the testimony, gave his decision in the case as follows:—

"From the whole evidence, the Court finds that these liquors were ordered by a committee chosen by the Board of Aldermen for that purpose—that they were ordered for the City Agency and lawful sale; that they were sent marked and invoiced to the City Agency; that they were placed in the room which had been appropriated for the City Agency, and found in the possession of the City Agent, legally appointed previous to this complaint. From these facts the Court decides that they were not kept by the defendant with an intent to sell in violation of law, and that he is not guilty of the charge made against him in the complaint. It is ordered, therefore, that he be discharged, and that the liquors seized by the officer be returned to the City Agent from whom they were taken."

DECLINE OF UNITARIANISM.—The religious census of England gives 229 Unitarian congregations, with 29,612 hearers—about 120 each. The Secretary of the British Unitarian Association reports—"Not only are there upwards of thirty of our congregations of some standing in want of ministers, but the number of such vacancies is rapidly becoming greater, from the removal of some of our brethren by death, and the secession from the pastoral office of others, who seek in other professions and pursuits for employment more congenial with their tastes, or for the means of a decent livelihood, which their ministerial sphere seemed unable to yield them."

OPEN-AIR PREACHING.—It is expected that preaching in the open air will be quite common in England this summer. The Bishop of Winchester has recently recommended all his clergy who are able, to go out of their churches and preach to the people in the streets at suitable times; and Canon Miller has declared his belief that it is the only way of getting hold of the minds of the multitude. An "Open-air Mission" has been formed in London, with a barrister at its head, having for its object to employ working men to preach, paying them a small sum for each sermon. The London City Mission also allows a portion of its missionaries to preach in the open air.

EAST NEW JERSEY BAPTIST ASSOCIATION.—The annual meeting of this body closed at Holmdel, N. J., June 5th. The Association now embraces 42 churches, with a membership of more than 5,000. The increase in numbers during the year was 137, about 300 having been added by baptism. Upwards of $13,000 were reported as given to benevolent objects. The cause of ministerial education engages much attention, and after an appeal for increased contributions on behalf of the Education Society, a collection was made of more than $200. Next year the body holds its session with the church at Bloomfield.

PURCHASE OF AN EPISCOPAL MEETING-HOUSE.—The Baltimore *True Union* thus speaks of Baptist church extension in that city:—

"Our readers will be pleased to learn that the Executive Committee of the Baltimore Baptist Church Extension Society have agreed to purchase the Episcopal meeting-house in Lee Street, known as St. Stephen's. It is a neat edifice, 42 by 60 feet, with a recess pulpit, and dressing-rooms and lecture-room in the rear, 30 by 42 feet. It is furnished with gas, chandeliers, carpets and organ, and, what is strange, with a *Baptistry* beneath the pulpit."

European News.

The steamer Atlantic, with European news to June 2d, one week later, arrived at New York on the 13th inst.

The war news brought by this arrival is the most important that we have received since the passage of the Alma. Intelligence by last steamer announced that after two nights of sanguinary conflict, the French had driven the Russian garrison from a strong position of defense before Sevastopol, and had themselves occupied it. The loss of both sides was little less than eight thousand men. Since then, two most important strategic movements have been effected by the Allies, with complete success. The first was the seizure and occupation of the Russian position on the Tchernaya, which was effected with but little loss, the enemy retiring before the allied advance. The other success was yet more important, being nothing less than the capture of Kertsch, the destruction of the Russian squadron and fortifications there, and the obtaining of entire possession of the Sea of Azoff, on the waters of which the allies have now fourteen steamers. The enterprise was accomplished without the loss of a man, the Russians having themselves destroyed their defences and retired. The telegraph wires being exclusively in the hands of the Government, ten days must elapse ere the public can learn anything beyond what the War Department chooses to dole forth, but the possession by the Allies of the important station of Kertsch, whence the garrison of Sevastopol drew most of their supplies, must exercise a speedy influence on the siege. There were rumors of another great battle having been fought at Inkermann, but the statements want confirmation.

From Spain we have accounts that the Carlist insurrection is checked; but the Government has been compelled to apply to the Cortes for additional powers.

Seven hundred and forty-six Russians are prisoners in the hands of the English, while the Russians have but 108 private men and 10 officers belonging to the British.

Miss Nightingale had been laid up with fever, but was recovering.

Letters from the Sisters of Mercy, of which there are 63 within Sebastopol, portray in lively colors the scenes of carnage they have to witness, and give a romantic account of their celebrating divine worship in the Malakoff Tower, while it was under the fire of the enemy, in the recent bombardment.

The Russian Government has issued a supplementary ukase, which commands all the peasants in the State dominions, from 30 to 35 years of age, to be included in the levy lately ordered in the 17 Western Governments. The Emperor Alexander, in a speech to a deputation of the inhabitants of Cronstadt, said: "Pray the Almighty to grant us peace, and trade will flourish again."

The King of Portugal and his brother are in Paris. Victoria is also expected there very soon, with the Lord Mayor as her *avant-coureur*. Some signs of discontent and even partial riots for bread having manifested themselves in the *faubourgs*, Napoleon III. gives the *ouvriers* a free admission once a week, on Sundays, to the Exhibition; so the number of visitors, generally below 10,000, rose last Sunday above 100,000—a small number, after all, considering the *cheapness* of the admission.

Vesuvius is calm again. Its rage ruined some small farm-houses, a few cottages of the rich and the poor, and now all is quiet again.

Madrid dates of 30th state that the insurgents at Caspi and Alcanitz were defeated on the 28th. Two leaders and a priest were shot. The provinces were tranquil.

Intelligence from Burmah is unfavorable to the prospects of peace. Reports mention the occurrence of another Palace revolution, which terminated in unseating the King and elevating the heir-apparent to the throne.

Dates from Shanghai are to Feb. 9. All was quiet there, and the troops having been withdrawn toward Nankin, the country around was resuming its former tranquillity, and the city was being fast rebuilt. In the interior, however, matters had assumed an unfavorable change. The Nankin insurgents had commenced the season's operations by an inroad into the green tea districts, and the capital, Kwei-chow-foo, had fallen into their hands. Fears were entertained that they might continue their course to Hang Chow-foo, which would enable them to stop the export trade of Shanghai.

Said Pacha, Viceroy of Egypt, has given orders for the construction of the railway across the Isthmus of Suez—84 miles. The rails will be sent from England, and the work will be executed by the Pacha's own French engineers.

A contract is said to have been entered into with L. Gisborne, for a telegraph from Constantinople to Egypt.

Official accounts state the total number of lives lost in the earthquake at Broussa, Feb. 26, was 649, viz.: 445 in the first shock, and 204 in the second. Besides this loss of life, one-fifth of the city was destroyed by fire.

Know-Nothing Platform.

There was a National Convention of Know-Nothings in Philadelphia, last week, in which the question of North and South was agitated. A pro-slavery platform was first adopted; after which a large body of the northern delegates held a meeting and adopted the following platform, addressed to the people of the United States:—

The undersigned citizens of the various States, assembled at Philadelphia on this 14th day of June, 1855, feel constrained, under the existing state of affairs, to affirm the following principles:

First—The unconditional restoration of that time-honored Compromise known as the Missouri Prohibition, which was destroyed in utter disregard of the popular will—a wrong no lapse of time can palliate, and no plea for its continuance can justify; and that we will use all constitutional means to maintain the positive guarantee of its compact, until the object for which it was enacted has been consummated by the admission of Kansas and Nebraska as free States.

Second—That the rights of settlers in Territories to the free and undisturbed exercise of the elective franchise guaranteed to them by the laws under which they are organized, should be promptly protected by the National Executive, whenever violated or threatened, and that we cannot conscientiously act with those who will not aid us in the correction of these National wrongs, and will not even permit their fair consideration and full discussion.

Third—We further declare our continued and unalterable determination to use all honorable efforts to secure such a modification of the naturalization laws, aided by such elevation of public sentiment as shall preserve the true interests of the nation, and shall guarantee the three vital principles of a Republican Government, spiritual freedom, and free Bible schools—thereby promoting the great work of Americanizing America.

Fourth—That we invoke the arm of legislation to arrest that growing evil—the deportation by foreign authorities of paupers and convicts to our shores—and that, as our National Constitution requires the Chief Executive of our country to be of native birth, we deem it equally necessary and important that our diplomatic representatives abroad should also possess no foreign prejudices to bias their judgment or to influence their official action.

SUMMARY.

The State Auditor of Indiana notifies holders of the circulating notes of the Merchants' Bank of Lafayette, Merchants' Bank of Springfield, Green County Bank at Bloomfield, Government Stock Bank at Lafayette, Laurel Bank at Laurel, Bank of Connersville at Connersville, Wabash Valley Bank at Logansport, Bank of T. Wadsworth of Hartford, at Michigan City, to return the same to the office for cancellation, on or before the 15th day of July next, that the outstanding circulation may be determined as accurately as possible, and a *pro rata* dividend thereon declared. Certificates for the amount returned will be issued, and the dividend on the respective banks paid upon the presentation of the certificates at the Auditor's office, after the 15th of August next.

Prof. Agassiz announces his intention of publishing the results of his investigations into the Natural History of the United States, in ten quarto volumes, of three hundred pages or more each, copiously illustrated by plates and engravings, in the best style of American art. His unwearied studies and researches during the last eight years, have collected a vast amount of material but in order to give increased value to the great work in point of accuracy and completeness, he proposes to publish one volume annually for the next ten years.

A dispatch dated Lafayette, Ind., Wednesday, June 13, says: This being the day that the Prohibitory Liquor Law goes into effect, the Temperance party had a grand celebration in this city. The attendance from the surrounding counties was very largo, and the proceedings were exceedingly harmonious and enthusiastic. An oration was delivered by Rev. S. L. Breckenridge, and addresses were made by several other speakers. The city was illuminated, and there is every determination manifested to execute the law.

Among the cases recently tried in the Circuit Court of Botetrout, Va., was one for a breach of marriage contract between Miss Elizabeth Canode and George Robinson. The jury rendered a verdict of $1,500 damages in favor of the plaintiff; but the Judge considered the amount excessive, and required the plaintiff to remit $500. Judgment was therefore given against the defendant for $1,000.

The schooner Experiment capsized near St. Joseph Harbor, Lake Michigan, on the 1st. The Captain (Jennings) and two seamen were drowned. The wreck, bottom up, was discovered next day, and in chopping a hole into the cabin, Mrs. Capt. Napier, of St. Joseph, with her son, aged 15, and the mate, were rescued. They had been 15 hours in the water up to their waists. An infant of Mrs. N. was drowned.

Mr. Joseph Wilde, a dealer in confectionery, &c., in Lawrence, Mass., has been convicted of three sales of liquor and sentenced to pay the three fines named in the statute as the minimum, amounting to eighty dollars and the costs, and to be committed to the House of Correction 140 days. Mr. Wilde did not appeal, and was committed to serve out his sentence.

The drawings contributed by the royal children of England to the London exhibition of amateur works of art, in aid of the patriotic fund, were sold lately. The Princess Royal's drawing was purchased for 250 guineas. The Prince of Wales' brought 55 guineas, and the remaining drawings, by the Princess Alice, Princess Helena, and Prince Alfred, 30 guineas each.

We learn from a private letter from Martinsburg, Virginia, that some abolition emissaries succeeded, on Friday evening last, in enticing from the residence of Hon. C. J. Faulkner six of his slaves. After the slaves had been run off, the telegraph wires east and west of Martinsburg were cut, to prevent the transmission of intelligence.

An epidemic prevails among the horses in Maine, Canada, and the northern parts of Vermont and New Hampshire. It is called the Stomach Staggers, and is supposed to have originated from some poisonous plants mixed with the meadow hay which has been extensively used.

At a recent meeting of the Common Council of Boston, an order was passed whereby every member of the City Government was forbidden to order or furnish any spirituous liquors at any meeting or entertainment of any Committee or Board of the Government.

The number of applications received for Bounty Lands during the month of May was 45,500. The total number of applications that have been received is 158,800, the total number acknowledged 75,000—and the total number of warrants issued 1,260.

The balance in the national treasury is reduced to eighteen and a half millions of dollars, being a falling off from the highest point of accumulation last September of more than ten millions of dollars.

Dr. Mengan, of Vanderburg, Indiana, going home intoxicated, recently, accidentally fired his house, which was destroyed, and he perished in the ruins. His family was absent at the time.

The Cherokee Indians are said to be in great distress, from a scarcity in breadstuffs and other necessaries of life. A recent account mentions the death of three of them by starvation.

Six slaves, a woman and five children, belonging to the Hon. C. J. Faulkner, of Berkeley Co., Va., ran off last week, and are supposed to have gone to Ohio or Pennsylvania.

It is said that there are 400 men at work on the Hoosac Tunnel. In the meanwhile, the road between Troy and Greenfield is to be completed and run as soon as possible; passengers being carried by stages over the Hoosac mountains.

A man in Cincinnati pays $20 fine every Monday morning for selling soda on Sunday. His receipts on that day are something over $80, on which there is a profit of $60, which, after paying the fine, leaves a clear gain of $40.

Meetings have been held in Nebraska city, N. T., to consult upon measures to build a railroad from the eastern part of Iowa through the southern tier of counties in that State to the Missouri river, at some point opposite Nebraska.

The Presbyterian General Assemblies, both old and new school, have resolved to hold their next annual session in the city of New York. This conjunction has not occurred before since the dissolution.

Cronstadt, the Port of St. Petersburg, which lately had thirty thousand inhabitants, has been razed and leveled, none but public edifices remaining, and has been turned into one vast fortification and camp.

At Barnum's Baby Exhibition there were, on show, one hundred single babies, and forty-three twins, triplets and fat children. There were seven sets of triplets and eleven sets of twins.

A paper published at St. Catharines, Canada, states that Mr. Stevenson, of the Mineral Springs, has been notified to have rooms ready for President Pierce and family in July.

The commencement at Williams College occurs this year August 15. Prof. Park, of Andover, is to address the Mills Theological Society, and Henry Ward Beecher the undergraduates.

The New Jersey State Agricultural Society will hold its first annual exhibition at Camden, opposite Philadelphia, on the 19th, 20th, and 21st days of September.

John P. Hale is to deliver the oration in Lawrence, Mass., on July 4th; arrangements are making there for quite a celebration.

The Rutland *Herald* says there are seven hundred men constantly employed quarrying marble in Rutland county, Vt.

John Stetson, Jr., of Boston, ran five miles at Lawrence, on the 6th inst., in 27 minutes and 50 seconds, winning a purse of $200.

Two hundred and eighty-seven deaths by cholera occurred in New Orleans during the week ending the 4th inst.

New York Markets—June 18, 1855.

Ashes—Pots and Pearls $6 00.

Flour and Meal—Flour 9 00 a 9 50 for State, 9 37 a 9 62 for mixed Western, 9 50 a 9 75 for common to good Ohio, 11 00 a 12 75 for extra Genesee. Rye Flour 7 25 a 9 00. Jersey Meal 5 00.

Grain—Wheat 2 44 for white Canadian, 2 50 for white Michigan. Rye 1 80. Oats 58 a 64c. for State and Western. Corn 97 a 1 01 for common to good Western mixed.

Provisions—Pork 15 00 for new prime, 17 87 a 18 00 for new mess. Beef 9 25 a 10 00 for prime, 10 50 a 12 50 for country mess. Lard 10¼ a 10¾c. Butter 14 a 18c. for Ohio, 17 a 22c. for ordinary to good State. Cheese 5 a 10c.

Hay—1 00 a 1 12 per 100 lbs.

Potatoes—2 75 a 3 00 for common red, 3 00 a 3 25 for Carters, 3 75 a 4 25 for Mercers.

Seeds—Clover 10¼ a 11c.

Tallow—12c. per lb.

Wool—American native 30 a 33c., 37 a 39c. for Merino, 39 a 42c. for American Saxony Fleece.

DIED,

In Leonardsville, N. Y., June 12th, after a tedious illness of mellitic diabetes, ANNA LUCINDA, daughter of Eld. W. B. and A. G. Maxson, in the 21st year of her age. Anna L. was impressed with the hopeless nature of her disease as soon as she ascertained its character, and frequently spoke of herself as expecting soon to pass away. When a child she gave herself to Christ, and when thirteen years of age became a member of the First Seventh-day Baptist Church in Brookfield, in which she faithfully followed her Lord until she fell asleep in Christ. One circumstance indicates the state of her mind generally in regard to death. When asked by a pious friend who was about to offer prayer in her behalf, whether she desired him to pray for her recovery, she answered, "No, sir!" "What, then, do you wish me to pray for?" said he. "Pray," said she, "that the will of the Lord may be done, whether it be life or death." The night on which she died she said to her mother, that she could trust herself in the hands of her blessed Saviour, and was happy, for she had his presence with her in passing through the valley of the shadow of death, and she feared no evil. She selected for the funeral occasion Psalm 73: 26—"My flesh and my heart faileth; but God is the strength of my heart, and my portion forever."

In Berlin, Wis., June 2, 1855, LAMONT, infant son of Orenzo F. and Betsey Coon, aged nine days.

LETTERS.

Board Meetings.

THE next Quarterly Meetings of the Executive Boards of the Seventh-day Baptist Missionary Society, the American Sabbath Tract Society, and the Seventh-day Baptist Publishing Society, will be held at the meeting-house in Plainfield, N. J., on First-day, July 8th, commencing at 9 o'clock A. M.

Magnificent Floral Gift.

SUBSCRIBERS to the "CHRISTIAN DIADEM" for 1855, are entitled to a splendid steel engraving, the ☞ LILLY AND THE ROSE PERSONIFIED, being given *gratis* to all old and new subscribers who send us only ONE DOLLAR, by mail or otherwise.

Six Copies for Five Dollars.

The Diadem is a strictly moral and religious work—designed for the Christian family without regard to any particular denomination.

FIFTY ENERGETIC BUSINESS MEN are wanted immediately to circulate the "Diadem" throughout the Eastern and Western States. To such as can send good references the very best inducements will be given. Address Z. P. HATCH, Publisher, 9 Spruce street, New York. May 24—3m.

The very Book that every body has been Wanting.

The Book for the Parlor, the Book for the Fire-side, the Book for the Professor, and the Book for the Non-Professor.

THE RELIGIOUS DENOMINATIONS OF THE UNITED STATES: Their History, Doctrine, Government, and Statistics; with a Preliminary Sketch of Judaism, Paganism, and Mohammedanism. By Rev. JOSEPH BELCHER, D. D., Honorary Member of the Historical Societies of Pennsylvania and Wisconsin, author of "William Carey, a Biography," etc., etc., and "Editor of the Complete Works of Andrew Fuller," "Works of Robert Hall," etc, etc. Large octavo, 1024 pages, handsomely embellished by nearly two hundred engravings.

This invaluable work is rapidly finding its way among all classes of the American people. The clear, comprehensive, and impartial manner in which the learned author treats each and every denomination, is winning for him golden opinions from the highest authorities in the land. The innumerable lively tales and anecdotes of ministers, churches, and laymen, which he introduces with the articles of faith and all important statistical information, give to the work a life, vigor, and spirit truly delightful. One cannot sit down to it without being convinced that his subject is in the hands of a master, nor rise but with kindlier and more liberal feelings towards the great brotherhood of Christians, under whatever name they bear. Ours is a great, growing, and glorious country, and every family, and every young man, throughout its length and breadth, should have a copy as a text book of all its denominations. Wherever known, it is read, and wherever read, admired. Look at the following from among the very many notices received:

It embodies a vast amount of information relative to the origin, history, and missionary operations of the different religious denominations in this country, presented in a remarkably interesting and attractive manner.—*Rev. John Dowling, D. D., Author of "The History of Romanism," "Judson Offering," etc.*

This is a large and beautiful volume, and will find a cordial welcome in every family.—*Philadelphia Christian Chronicle.*

So far as concerns independence of vision, there can be no question, as Dr. Belcher surveys each sect with the same dispassionate impartiality.—*Epis. Recorder.*

This massive volume embraces a vast fund of information.—*Presbyterian.*

The work is sold by agents, and will furnish a large amount of interesting and valuable information to the families into which it may be received.—*New York Recorder and Register.*

In the account given of the denominations, he is fair, and generally allows them to speak for themselves, as to their history and institutions.—*New York Christian Advocate and Journal.*

It contains a mass of interesting facts and statistics.—*Norton's Literary Gazette.*

Judging from the work, it would be difficult to say what are the religious views of the Editor, so fairly, so dispassionately, so charitably, has he treated each and every sect.—*Philadelphia City Item.*

We presume it will be a standard work in thousands of libraries.—*Littell's Living Age.*

Sold only by agents, to whom certain districts are allotted. For particulars address the publisher,
JOHN E. POTTER,
15 Sansom-st., Philadelphia.
Or, NOYES SPICER, Indianapolis, Ind.

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c. *Spring Arrangements*, commencing April 2, 1855: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M. For Somerville, (way,) at 5.30 P. M.

The above trains connect at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 1, 4 and 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 6 and 9.45 A. M. and 3 P. M.; Somervill (way) at 6 A. M.

New York and Elizabethport.

Leave New York at 8 and 10 A. M., 1, 4 and 5 P. M.
Leave Elizabethport at 7.15 and 9.10 A. M., 1, 3.15 and 6 P. M. JOHN O. STERNS, Superintendent.

New York and Erie Railroad.

ON and after Monday, May 7, and until further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Dunkirk Express at 6 A. M. for Dunkirk.
Buffalo Express at 6 A. M. for Buffalo.
Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.
Accommodation at 12½ P. M. for Port Jervis and intermediate stations.
Rockland Passenger at 3 P. M. (from foot o Chambers-st.) via Piermont, for Suffern and intermediate stations.
Way Passenger at 4 P. M. for Newburgh and Otisville and intermediate stations.
Night Express at 5½ P. M. for Dunkirk and Buffalo.
Emigrant at 6 P. M. for Dunkirk and Buffalo and intermediate stations.
On Sundays only one express train, at 5½ P. M.

These Express Trains connect at Elmira with the Elmira and Niagara Falls Railroad, for Niagara Falls, at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicago, &c., and with first-class splendid steamers for all ports on Lake Erie.

D. C. McCALLUM, General Sup't.

Miscellaneous.

The Great West.

In recent numbers of the *Morning Star*, we find letters from F. MOULTON, giving some account of what he saw in a tour through "the great West." We copy the closing part of his last letter, which will interest the general reader, whether he subscribes to it fully, or not:—

In Minnesota Territory, the land is not yet in market, but it is most of it taken, that is, in the region of any near settlement, by "squatters." These are persons, men with their families, when they have any, and without, of course, when they have none, who go on to the land and commence improvements, which is taken as prima facie evidence of intention to settle; which establishes the claim at government price, $1 25 per acre, whenever it shall come into market. The improvement consists of building a hut in any shape that the family have a mind to put up with for one week's residence. The hut is to stand sentinel for the land against other squatters. It is the local evidence that the land is taken. The claimant has only to prove that he built the hut and resided there one week with his family, and his claim is considered good. He may of course stay as much longer as he pleases, and go on and make him a farm if he will, and generally he is safe. But with some of the claims there is and will be trouble. Not a foot of Minnesota is absolutely sure to its present occupants. There are disputes germinating about claims, and already the club law is resorted to to maintain them. Bands of desperadoes concert together to oust claimants whose lands may stir up their cupidity, and who have not the physical force to withstand them. Persons having a just right to the quarter section they occupy are often waited upon with a polite note informing them that if they do not leave with all their stuff in twenty-four hours the bullet of some rifle in ambush will put "day light" through them; this is not very pleasant information where there is no law except lynch and club law. The man who can beat out the most brains is the most likely to maintain his claim. This, and a worse state of things, must continue until State laws can be enacted and an authority able and willing to enforce them.

Speculators and rogues are doing a great amount of mischief in the West. Landing almost anywhere, you will be met with men with their "plats," that is, geographies of their lands, and the interrogation, "don't you want to buy a choice lot at a great bargain?" Well, on examination, you find the land located from ten to forty miles distant from not only where you are, but, as said the son of Erin, "surely a very great way from anywhere else!" These benevolent gentlemen have the magnanimity to ask from five to one hundred dollars per acre, simply because they happened to be there a week before you. In some cases they have the right to sell lots which they offer, but oftener by far they have none at all, and would sell you the land belonging to another. Lands which they never saw, and do not know whether they are taken or not, and lots that are merely imaginary, are palmed off upon the unwary emigrant, and their money worse than stole from them.

The land in Western Wisconsin, Eastern Minnesota, Northern and Central Iowa, is excellent beyond anything ever seen in the East, not excepting our richest gardens. It is a fact I think already demonstrated, that manure cannot enrich the most of the prairies of the West. Hence the crops there are enormous of every kind, compared with New England. Their durability is beyond any calculation of ours, and as a specimen soil it will be good for the next ten generations without much apparent exhaustion. It is however manifest that the direct cause of this deep soil accumulation has received a decided check. That cause no doubt is the annual decomposition of the vast burden of prairie grass, which grows from three to five tons to the acre. Since the practice of burning off this grass each year commenced, the soil accumulation in the same proportion ceases.

The best prairie for farming purposes is the rolling—that is, that which lays in gradual swells more or less undulating. The "bottom" land is too flat and unhealthy. That the land will ever "leach," as some have feared, is not very likely, since the present good quality of the land has for unnumbered years not diminished; for it seems quite impossible for the land to ever have been better than it is at present. Besides, in much of the west there is an under layer of lime-rock lying from six to ten feet below the surface, from which there is (it is said) a constant exhalation, that resists all drouth. This theory, however, needs a farther demonstration. That part of the West which we saw can never make great stock farms from the natural scarcity of water. This will ever remain one of the objectionables of the West. The scarcity of wood is also another.

The west is no doubt a healthy country after one gets inured to the climate, which takes from three to six weeks. The air is dry and bracing, and therefore most favorable for consumptives. We saw no one on our route sick with lung difficulties after leaving New England. I learned on inquiry, that the cases of consumption originating there are quite unknown. Fevers, of the intermittent and typhoid type, are the most common to the inhabitants who have been sometime there, while the cholera takes off great numbers of the unacclimated emigrants.

The greatest difficulty which stands in the way of making the west a desirable home for the present, is, that which follows almost all great moneyed undertakings in this age, viz.: it is overdone! The gold hunting project was driven to death before it was five years old. Indeed, the spasmodic jump of the Yankee for any new thing, especially where money, making is in prospect, has become fearfully contagious with all nations of the earth. The most distant tribes of men on the globe are feeling the impulse, and almost en masse are seeking the great Mississippi valley to make them a home and get rich. Yankees, especially, are working the western fever too hard. They are doing it to their hurt.

When Jenny Lind came to this country, because she could make a noise which sounded as a goose egg as big as a hogshead would look, she was lifted to the skies by the popular voice; and why? Not because she could sing so much better than every body else, but because she was Barnum's "Swedish Nightingale," and "bran new" at that! From three to five hundred dollars to hear her sing one evening was cheap enough for the mania that prevailed in certain quarters. Fifty per cent too many are rushing into the west. Many have spent all their money in getting there, and when they land from the boats they find themselves in the midst of a driving multitude, each anxious for himself and not caring what becomes of others, whether they live or die, whether the stranger, moneyless and friendless, sleeps in the street or in no place at all. Great suffering must be the result of this untimely rush of emigrants to the west. The country is prepared to receive a vast number, but not every body! Hundreds will break down under the toil and exposure of moving west, get discouraged, and die in vain attempts to secure themselves a home in that far off land.

As to business, there is plenty of it, but men to do it are much more plenty! Every thing is overdone, and therefore nothing is done at present to much advantage. Provisions are very high—higher than in the east as a whole, because of the great numbers to consume them.

Those who design to go west to find a home for the remainder of their days, had better wait a year or two, when a reaction will take place and land will be cheaper, unless they have sufficient funds to buy improved land wherever they desire—paying a great price for it.

The society in the west is of course very bad as yet, and is likely to be for a long time to come; for the reason that almost all who go out there are after money and its equivalent, and not after the good of men. School houses are very scarce, and meeting houses more so. In closing this long story I would say to those who are in comfortable circumstances here, and do not expect to live more than fifty years, that they had better "stay by the stuff," and be content. It will require from five to ten years in the west to get the comforts of life as we have them in New England. Those who have large families, especially of boys, may do well to go west in the course of two or three years.

Different Kinds of Food for Soiling.

WHEAT AND RYE.—The earliest food which can be depended upon in the spring, for soiling, is wheat or rye. We much prefer the former, as it is sweeter and more nutritious; nor does the straw become tough and harsh so soon as rye; it consequently lasts longer.

CULTIVATION.—If the ground be not already rich, it should be made so. It cannot be made too rich for this purpose. Plow deep, harrow fine, and then roll. Now take an extra quantity of seed, and sow broadcast, as early as the last of August or the first week in September. Plow this in about three inches deep with a three-furrow plow; leave this land in its rough state, without harrowing or rolling. By using an extra quantity of seed, the stalks grow finer, sweeter, and more tender; and by leaving the land rough, the plant is not so likely to winter kill. Plowing in the seed has a further advantage; the plant strikes a deeper root, and consequently grows stronger than if lightly harrowed in; it also comes up in rows, as if drilled, which gives the air a much better opportunity to circulate among the stalks; thus promoting a more rapid and better growth. However rank the grain may grow in the fall, it is not advisable to feed it off in the slightest degree, except in a southern climate. North, the grain requires all of its fall growth to protect it during the winter, and insure a vigorous and rapid start in the spring.

ORCHARD GRASS, LUCERNE, RAY GRASS, AND CLOVER.—These grasses come forward first in spring in the order mentioned, although they ripen for hay about the same time. In a very early season, we have had orchard grass in a dry, warm, rich soil, two feet high, and fit for soiling in the latitude of 40 30, by the last of April; it however cannot generally be depended upon in this latitude before the last of May.

CULTIVATION.—For Orchard and Ray grass the land must be rich, clean, and well pulverized. Sow each kind by itself, at the rate of at least two bushels of seed per acre, early in the fall or spring, then harrow and roll. Neither clover nor other seed should be sown with these grasses; and it is important that the seed be sown thick; otherwise it will come up in tufts, and in a few years be almost entirely rooted out by other grasses. The yield is very large when properly cultivated. We have taken upwards of three tons per acre of well-cured hay of the former. For hay neither of these grasses is quite so good as Timothy, herdsgrass or red top. This ray grass must not be confounded with rye grass nor oat grass. It is much superior to either, and makes the finest and best of lawns for our country. It is now in great request for the purpose of soiling.

Clover should be sown the last of February, or early in March, just after a fall of snow, if possible, at the rate of ten to sixteen pounds of seed per acre, at least. Whenever there is frost upon it, especially in the spring, not a hoof should be allowed to cross nor nibble it till the sun has dried off the frost. We have seen a small flock of sheep ruin a whole field in a single hour, by pasturing it on a frosty morning.

The cultivation of lucerne is attended with too much trouble to find favor at the high price of labor in the United States. It requires a very rich, deep, warm soil, prepared in the best manner. Sow fifteen to twenty pounds of seed per acre, in drills, nine to eighteen inches apart, the first of May, in this climate. Hoe it well during the summer, and keep it clear of weeds; otherwise they will check its growth, or almost entirely kill it. The following year, it may be cut several times during the season of its growth. After each cutting, liquid manure, or a light, rich compost spread over it, is very valuable.

INDIAN CORN.—By sowing the earlier varieties for the first sowings, this may be had from the fore part of July till late in November. The proper time for cutting corn for soiling, is when the ear is well set on the stalk, and the grain is in milk. If cut before this, it is not so nutritious for them.

CULTIVATION.—Plow very deep—subsoil if possible—you cannot make the land too rich. Sow the earlier varieties in drills from twelve to eighteen inches apart; the latter from eighteen to thirty inches; keep the ground clear of weeds, either by the hand cultivator or hoes. To sow in drills is far better than broadcast, as the air then circulates freely among the stalks, and makes a much healthier and better growth. The varieties of sweet corn are decidedly superior for soiling, as the stalks are sweeter and more nutritious. Not so great a growth of stalks, perhaps, can be got per acre; but the superior quality of the stalks and ears more than compensates for the deficiency in quantity.

MILLET.—Prepare the ground as for orchard grass, and sow broadcast, or in drills, six inches apart, from the last of April to the first of July. It may be harrowed, or plowed in like wheat, only not so deep by one inch. It should be cut for soiling when the stalks are in flower, or just as going out of flower.

OATS AND BUCKWHEAT.—Sow and cultivate the same as millet.

There are other grains and grasses which may be profitably cultivated for soiling, but the above are most important.

Of pumpkins, cymlins, squashes, sugar beets, and other beets which ripen in the fall, we shall not at present speak, as it would make this article too long.

TREATMENT OF STOCK UNDER THE SOILING SYSTEM.—Stock, when soiled, should have a free range of a few acres at least. Exercise in the open air, the greater part of the day, is essential to their good health and thrift. Their food may be thrown in small bundles on the clean grass ground; but a better manner for feeding is to place the food in common hay ricks, standing on legs two or three feet from the ground. There is much less waste by adopting this method. If fed in stalks, the corn stalks are better cut up fine before feeding, in a machine made expressly for this purpose. Every particle of them will then be consumed with avidity.

Green food should always be given fresh cut; if allowed to lie a few hours, and become half wilted, it is injurious to stock, causing disease, and sometimes death. Be very careful not to feed too much at a time, otherwise it may produce hoven. If soiled entirely, stock ought to be fed five times a day.

[American Agriculturist.

What the English think of Us.

In the Westminster *Review* we find the following just views of American progress and promise:—

"We need not wait to add to the whole civilized world our testimony of respect and gratitude to our brethren over the Atlantic, for what they are doing in education. They are exhibiting to us the glorious spectacle of a thoroughly national education; no State central machine for grinding out loyalty and religion from the mass, of a special kind and in fixed quantities; but something like a real training of mind and heart, for free use, personal and social. We, alas! have little to say that is creditable under this head, and not very much that is immediately hopeful. When we think of our thousands of town Arabs, and tens of thousands of our rural innocents, in a state next to idiotcy for want of education, we find our spirits decline rapidly from the sanguine pitch to which they had been raised by less important returns of the census. There can be no question of the advancement of the national intelligence on the whole. The spread of books and newspapers in spite of many disastrous restrictions; the spread of the associate principle, in regard to the purchase of land, the saving of funds, and the prosecution of business; and, yet more, the improved conduct manifested in the recent strikes—all testify to the improvement of popular intelligence. But still, we have 'death lists,' and an immense infant mortality in our burial-clubs: we have a complete population of delinquents, and the State has not yet desisted from its wrong—of first leaving the parent generation in the disqualification of ignorance, and then failing to stand in *loco parentis* to the children. However we may, on the instant, exert ourselves—however we may for the instant succeed, we must bear, for another generation, at least, the difficulty, burden, and shame thus resting upon us. In the United States nearly four millions of the youth of the nation were at school in June, 1850,—that is, nearly one in every five of the free population.

"As for what the American nation, as a whole, is to become, at its present rates in progress, it is really an overwhelming idea. Sir Charles Lyell, who has been four times to the United States within a dozen years or so, has said in a public speech, and on other occasions, that he had to open his mind and eyes afresh every time he went, as if to observe a new nation, so vast were the changes in every department of social life. The computation is, that at the present rate of progress, the United States will contain 100,000,000 at the end of the century. A democratic republic of 100,000,000 citizens will certainly be a new spectacle on our globe: and a rare privilege it will be to some of the youth now at our schools and universities to see it in their latter days. When we consider that, of this growing nation, the infirm and imperfect in body and mind are cared for, all the children educated, and all criminals to be taken in hand to be made the best of, we shall not wonder that there are so many expectants of a millennium on those shores. It is not a quarter of a century since the dim, solemn islands of Mantiou, in the great lakes, were like our Mona when the Romans were in our south-eastern district. There was the Great Spirit to be consulted and propitiated by the Druids of that western region, while the invaders lived afar off; and now the country has the aspect of ours, after a lapse of fifteen centuries, having good things to show which we do not possess."

Washington and Slavery.

The *Tribune* gives the following extract from Washington's will, which shows how that incomparable patriot looked upon human bondage, and shows which side of the Nebraska question he would be on, if he were still living:—

"Item—At the decease of my wife, it is my will and desire that all the slaves I hold in my own right shall receive their freedom. To emancipate them during her life would, though earnestly desired by me, be attended with such insurmountable difficulties, on account of their intermixture by marriage with her dower negroes, as to excite the most painful sensations, if not disagreeable consequences in the latter, while both descriptions are in the occupancy of the same proprietor; it not being in my power, under the tenure by which the negroes are held, to manumit them. And whereas, among those who will receive freedom according to this devise, there may be some who from old age or bodily infirmities, and others who on account of their infancy, will be unable to support themselves, it is my will and desire that all who come under the first and second description shall be comfortably clothed and fed by my heirs while they live, and that such of the latter description as have no parents living, or if living, are unable or, unwilling to provide for them, shall be bound by the Court until they shall arrive at the age of twenty-five years. * * * The negroes thus bound, are (by their masters or mistresses) to be taught to read and write, and to be brought up to some useful occupation, agreeably to the laws of the Commonwealth of Virginia, providing for the support of orphan and other poor children. And I do hereby expressly forbid the sale or transportation out of said Commonwealth of any slave I may die possessed of, under any pretense whatever. And I do, moreover, most pointedly and solemnly enjoin it upon my executors hereafter named, or the survivors of them, to see that this clause respecting slaves, and every part thereof, be religiously fulfilled at the epoch at which it is directed to take place, without evasion, neglect, or delay."

The Blunders of Painters.

Anachronisms, or, (more correctly speaking,) blunders, have been made by painters of celebrity, which upon the "living canvas" appear more palpable than those made by authors upon paper. Some of these transcend the simply ridiculous; they border closely upon the grotesque.

Tintoret, an Italian painter, in a picture of the children of Israel gathering manna, has taken the precaution to arm them with the modern invention of guns. Cigoli painted the aged Simeon at the circumcision of the infant Saviour, and as aged men in these days wear spectacles, the artist has shown his sagacity by placing them upon Simeon's nose. In a picture, by Verrio, of Christ healing the sick, the lookers on are represented as standing with periwigs on their heads. To match, or rather to exceed this ludicrous representation, Durer has painted the expulsion of Adam and Eve from the garden of Eden, by an angel in a dress fashionably trimmed with flounces. The same painter, in his scene of Peter denying Christ, represents a Roman soldier very comfortably smoking a pipe of tobacco.

A Dutch painter, in a picture of the wise men worshiping the Holy Child, has drawn one of them in a large white surplice, and in boots and spurs, and he is in the act of presenting to the the child a model of a Dutch man-of-war. In a Dutch picture of Abraham offering up his son, instead of the patriarch's "stretching forth his hand and taking the knife," as the Scriptures inform us, he is represented as using a more effectual and modern instrument. He is holding to Isaac's head a blunderbuss. Berlin represents in a picture the Virgin and Child listening to a violin, and in another picture he has drawn King David playing the harp at the marriage of Christ with St. Catherine. A French artist has drawn, with true French taste, the Lord's Supper, with the table ornamented with tumblers filled with cigar lighters; and as if to crown the list of these absurd and ludicrous anachronisms, the garden of Eden has been drawn with Adam and Eve, in all their primeval simplicity and virtue, while near them, in full costume, is seen a hunter with a gun shooting ducks.

Ledyard's Tribute to Woman.

Nor should it be forgotten, to the eternal honor of the noble and child-like spirit of the true traveler, no less than to the immortal and universal humanity of woman, that John Ledyard in Siberia, like Mungo Park in mid-Africa, celebrates the tenderness of female sympathy and the loveliness of female character.

"I have observed," says he, "among all nations, that the women ornament themselves more than the men; that wherever found, they are the same kind, civil, obliging, humane, tender beings; that they are ever inclined to be gay and cheerful, timerous and modest. They do not hesitate, like men, to perform a hospitable or generous action; not haughty, nor arrogant, nor supercilious, but full of courtesy; industrious, economical, ingenuous, more liable, in general, to err than man, but in general, more virtuous, and performing more good actions than he. I never addressed myself in the language of decency and friendship to a woman, whether civilized or savage, without receiving a decent and friendly answer. With man it has often been otherwise. In wandering over the barren plains of inhospitable Denmark, through honest Sweden, frozen Lapland, rude and churlish Finland, unprincipled Russia, and the wide-spread regions of the wandering Tartar, if hungry, thirsty, cold, wet, or sick, woman has ever been friendly to me, and uniformly so; and to add to this virtue, so worthy of the appellation of benevolence, these actions have been performed in so free and so kind a manner, that, if I was thirsty, I drank the sweet draught, and if I was hungry, I ate the coarse morsel, with a double relish."

[Putnam's Monthly.

A Story of the Revolution.

Lieut. J. Heath, patriot of the Revolution, aged 98 years, died recently at Windsor, Broome Co., N. Y. He was at the battle of Bunker Hill, and the following incident is related by the Binghamton *Democrat*. While Heath was at Bunker Hill, the enemy at one time received from the tories in that vicinity, a drove of stall-fed cattle, which they were pasturing just over a rise of ground, at a short distance from the American encampment, and opposite to where Lieut. Heath—then a private—was stationed as a picket guard. Heath, upon discovering the cattle, unable to resist the temptation, left his post, which was within range of the British guns, and went and drove into the American camp 44 head of the enemy's cattle, receiving, while in the act, the compliments of the British in the shape of two 24lb. shot, but without injury. On hearing the report of the British guns, General Washington dispatched one of his Colonels to reconnoitre, who met Mr. H. with the cattle, just as he had passed the summit of the hill. Mr. H. related to the Colonel what he had done; the Colonel told him to go along with his cattle, and he would take charge of his post till he came back. He was absent from his post only about half an hour. Heath heard nothing more in relation to his exploit, from the officers, till the next morning, when he was summoned to Gen. Washington's quarters. The General demanded to know of him how or why he dared to leave his post. Mr. H. replied that he knew he was guilty of violation of his duty; but the temptation was so strong he could not resist it. General Washington reprimanded him, said he must never be guilty of leaving his post again; that he would excuse him this time, and directed Maj. Humphrey to take down his name, and Heath to leave. In the course of that day, General Washington sent him thirty-nine silver dollars, and a hind quarter of beef that weighed 164 lbs.

Arab Oddities.

An Arab, entering a house, removes his shoes, but not his hat. He mounts his horse upon the right side, while his wife milks the cows upon the left side. Writing a letter, he puts nearly all the compliments on the outside. With him, the point of a pin is its head, whilst its head is made its heel. His head must be wrapped up warm, even in the summer, while his feet may well enough go naked in winter. Every article of merchandize which is liquid he weighs, but measures wheat, barley, and a few other articles. He reads and writes from left to right, but figures are read from right to left. He eats scarcely any thing for breakfast, about as much for dinner, but after the work of the day is done, sits down to a hot meal swimming in oil, or, better yet, boiled butter. His sons eat with him, but the females of the house wait till his lordship is done. He rides his donkey when traveling, his wife walking behind. He laughs at the idea of walking in the street with his wife, or of ever vacating his seat for a woman. He knows no use for chairs, tables, knives, forks, nor even spoons, unless they are wooden ones. Bedsteads, bureaus, and fire-places, may be placed in the same category. If he be an artizan, he does his work sitting, perhaps using his feet to hold what his hands are engaged upon. Drinks cold water with a sponge, but never bathes in it, unless his home be on the sea-shore. Is rarely seen drunk—too seldom speaks the truth—is deficient in affection for his kindred—has little curiosity and no imitation—no wish to improve his mind—no desire to surround himself with the comforts of life.

NUTRITIVE QUALITIES OF MILK.—In the Medical Convention recently held in Philadelphia, Dr. N. S. Davis, of Chicago, presented a report on the nutritive quilities of milk, and also on the question whether there is not some mode by which the nutritive constituents of milk can be preserved in their purity and sweetness, and furnished to the inhabitants of cities in such quantities as to supersede the present defective and often unwholesome modes of supply. The report says, that when the railroads were opened into the interior of the country, it was said that milk would be furnished to residents of cities in the purity that it was found on farms, but a sufficient time had elapsed to demonstrate that such is not the case. The conveyance of the milk from the farm to the cars, the transit on the railway, and the time lost in its delivery throughout the city, it was clearly shown, had the effect of making it unfit for the nourishment of a child. During the past half century experiments had been made with preserving milk in its pure state, yet it was but recently that a discovery had been made by a gentleman in New York, which was to evaporate the water and mix with white sugar, which rendered it what is termed solified milk. In his practice he had used this improved milk for the nourishment of infants with the most gratifying results, and after having kept it for three months; and he knew of its having been kept twelve months without any injury to its qualities.

CURIOUS TYPOGRAPHICAL ERROR.—Prof. Trench, in his latest work on the English language, points out in the 24th verse of the 23d chapter of Matthew, the words "which strain at a gnat and swallow a camel," the professor thinks contain a misprint, which having been passed over in the first edition of 1611, has held its ground ever since. The translators intended to say, "which strain out a gnat and swallow camel," that being the correct rendering of the original, as appears in Tyndale's and Crammer's translations, both of which have "strain out." It was the custom of the stricter Jews to strain their wines, vinegar, and other potables, through linen or gauze, lest unawares they should drink down some little, unclean insect, as a gnat, and thus transgress the Levitical law. It was to this custom the Saviour alluded, intending to say that the Scribes and Pharisees, while they strain out a gnat from their drink, would yet swallow a camel at a gulp.

SCHOOLS IN RHODE ISLAND.—The Report on Public Schools and education in Rhode Island, by the Commissioner of Public Schools, shows that the whole number of districts in the State is 382, with 337 school houses. The number of male scholars, is 13,776; female, 11,811, making a totol of 25,868, with 253 male and 364 female teachers. The number of scholars, in the State, between four and fifteen years of age, is 33,959, and 13,898 under four years of age; of which 108 are idiots, 68 deaf and dumb; 233 insane, and 55 blind. The amount of school funds in the State Treasury is $34,996 85; amount raised by town tax $61,013 01; by rate bills, $10,822 76; registry tax, $6,184 79; from other sources, $2,821 58; unexpended last year, $2,764 43; making the total resources for the year, $118,603 38, of which $103,049 59 has been expended for instruction, and $7,348, for school houses.

The English papers mention the suicide of a Mr. Roylstone, who ten years ago, was was worth one hundred and fifty thousand pounds sterling, which he has since squandered in the gratification of his appetite. He had agents in China, Mexico, Canada, and other places to supply him with the rarest delicacies; and a single dish sometimes cost him fifty pounds. At length, on the 15th of last April, nothing was left him but a single guinea, shirt and a battered hat. He bought a woodcock with the guinea, which he had served up in the highest style of art. He gave himself two hours for an easy digestion, and then jumped into the Thames from Westminster bridge.

Lucius S. Graves, farmer, of South Hadley, was killed recently, while carting rails from his house into the fields. Being gone from the house longer than usual, a search was instituted, and his body found about 6 o'clock, buried some two feet in the mire, with the horse also clogged in the mud, above him. His death is accounted for by the supposition, that while riding on his load near a deep ditch, the team was overturned, and he being thrown under the horse, was buried by the animal falling upon him. He was 29 years of age, and leaves a wife and two children.

Work has just been commenced on a railroad connecting Galveston, Texas, with the Red River, at Fulton.

New Steamboat Line for Albany and Troy.

From Pier 15, foot of Liberty-st., at 6 P. M.

STEAMER RIP VAN WINKLE, C. W. Farnham, Commander, Monday, Wednesday and Friday, at 6 o'clock, P. M.; steamer COMMODORE, L. Smith, Commander, Tuesday and Thursday, at 6 o'clock, P. M., and SUNDAY, at 5 P. M.

Fares: Saratoga, $1 50; Moreau, $2 15; Fort Edward, $2 15; Whitehall, $2 75; Castleton, $3 10; Rutland, $3; Burlington, $4; Rouses Point, $5 50; Montreal, $7 50.

These Boats will arrive in Albany or Troy in ample time to form connections with all the Railroads, North, East or West, enabling passengers to reach Montreal and intermediate points the same day.

These Steamers are of the first class for strength and speed—well known favorities of the public—having been thoroughly overhauled during the past winter, and offer every accommodation that can be desired by either freighter or traveler.

Through tickets can be obtained on board the boats for Saratoga, Moreau, Fort Edward, Whitehall, Castleton, Rutland, Burlington, Rouse's Point and Montreal.

The Northern Freight Express will give Bills of Lading to all points as above named. Shippers who desire it, can have time receipts, by applying at the office on the Pier. A. A. DYKEMAN.

Ayer's Pills.

A NEW and singularly successful remedy for the cure of all Bilious diseases—Costiveness, Indigestion, Jaundice, Dropsy, Rheumatism, Fevers, Gout, Humors, Nervousness, Irritability, Inflammations, Headache, Pains in the Breast, Side, Back, and Limbs, Female Complaints, &c., &c. Indeed very few are the diseases in which a Purgative Medicine is not more or less required, and much sickness and suffering might be prevented, if a harmless but effectual Cathartic were more freely used. No person can feel well while a costive habit of body prevails; besides, it soon generates serious and often fatal diseases, which might have been avoided by the timely and judicious use of a good purgative. This is alike true of Colds, Feverish symptoms, and Bilious derangements. They all tend to become or produce the deep seated and formidable distempers which load the hearses all over the land. Hence a reliable family physic is of the first importance to the public health, and this Pill has been perfected with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing any thing hitherto known of any medicine. Cures have been effected beyond belief, were they not substantiated by persons of such exalted positions and character as to forbid the suspicion of untruth.

Among the eminent gentlemen who have testified in favor of these Pills, we may mention:

Doct. A. A. Hayes, Analytical Chemist of Boston, and State Assayer of Massachusetts, whose high professional character is endorsed by the—

Hon. Edward Everett, Senator of the United States.

Robert C. Winthrop, Ex-Speaker of the House of Representatives.

Abbott Lawrence, Minister Plen. to England.

†John B. Fitzpatrick, Catholic Bishop of Boston; also

Dr. J. R. Chilton, Practical Chemist of New York City; endorsed by

Hon. W. L. Marcy, Secretary of State.

Wm. B. Astor, the richest man in America.

S. Leland & Co., Proprietors of the Metropolitan Hotel, and others.

These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compounded not of the drugs themselves, but of the medicinal virtues only of Vegetable remedies extracted by Chemical process in a state of purity, and combined together in such a manner as to insure the best results. This system of composition for medicines has been found in Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any process. The reason is perfectly obvious. While by the old mode of composition, every medicine is burdened with more or less of acrimonious and injurious qualities, by this each individual virtue only that is desired for the curative effect is present. All the inert and obnoxious qualities of each substance employed are left behind, the curative virtues only being retained. Hence it is self-evident the effects should prove as they have proved, more purely remedial, and the Pills a more powerful antidote to disease than any other medicine known to the world.

As it is frequently expedient that many medicines should be taken under the counsel of an attending physician, and as he could not properly judge of a remedy without knowing its composition, I have supplied the accurate Formulæ by which both my Pectoral and Pills are made, to the whole body of Practitioners in the United States and British American Provinces. If however there should be any one who has not received them, they will be forwarded by mail to his request.

Of all the Patent Medicines that are offered, how few would be taken if their composition was known! Their life consists in their mystery. I have no mysteries.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject freely acknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many eminent Physicians have declared the same thing of my Pills, and even more confidently, and are willing to certify that their anticipations were more than realized by their effects upon trial.

They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.

Prepared by Dr. J. C. AYER, Chemist, Lowell, Mass. Price 25 Cents per Box. Five Boxes for $1 00.

Sold at wholesale in New York by A. B. & D. SANDS, retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere.

The Sabbath Recorder,
PUBLISHED WEEKLY
By the Seventh-day Baptist Publishing Society,
AT
NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the time to which they reach.

☞ No paper discontinued until arrearages are paid, except at the discretion of the publisher.

☞ Communications, orders, and remittances, should be directed, post paid, to

GEO. B. UTTER, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

ESSAY ON TOBACCO.

Read before the Seventh-day Baptist Eastern Association, May 24, 1855, by H. H. Baker, and published by request of the Association.

Realizing that a more delicate subject could not have been selected, or one which would be more likely, were the truth outspoken, to destroy the popularity of the essayist. Indeed, I have been advised, by a prominent man in this Association, since my appointment, to decline the degradation (not honor) of presenting an essay upon this subject, remarking, at the same time, that he considered it "too small business to be noticed by an Association;" and there is not the least doubt but what he spoke the sentiments of many here to-day.

I shall not long detain you, at this time, with the discussion of this subject; not from any wish on my part to cut short the full development of all the sinful and abominable effects produced by the use of tobacco, or from any fear of suffering to any great extent from the sneers and scoffs of its votaries; but from the known hostility to the subject being here presented, and also from a manifest unwillingness here to listen to the publication and exposition of a habit or practice which develops a want of manly courage and fortitude to resist.

The early experience of every lover and user of tobacco, in any and every form, goes to prove that this plant was never designed by our Creator to be used other than for medicinal purposes. Every one bears testimony, that when first taken into the mouth, or received in vapor, it is very repulsive, both to the senses of taste and smell. Indeed, a young gentleman told me the other day, that in the commencement of his using tobacco, a short time since, he had to add cloves and other aromatics, it was so offensive; but now he had become very fond of it. Notwithstanding its nauseating and disgusting effects when first introduced into the system, and the long train of evils and known diseases that follow in its course, yet, as a stimulant, it has come into general use among all the nations of the earth, and constitutes, at the present day, one of the most remarkable features in the history of man.

This plant is indigenous to most of Central America, and was cultivated by the natives to some extent before the discovery of this continent; but from 1492, when a savage chief on the island of Cuba presented Columbus with a tobacco leaf rolled in the form of a cigar, and invited him to smoke, every one has seemed to vie with each other to see who could commence the earliest, use the most, and stand it the longest, before nature herself should interfere and forbid its further use.

As early as 1611, it was cultivated in Virginia by the spade, and so rapid was the demand, that in 1616, the streets of Jamestown were planted with tobacco, and it became necessary for the colony to enact laws to restrain its cultivation. King James I., by repeated proclamations and orders, attempted at various times to interdict its use, but to very little purpose; and even before the Revolution, it was largely cultivated in four of the colonies, from which Europe was supplied to a limited extent; but such has been its growth and progress, among the commercial products of the earth, that, at the present, no inconsiderable part of the revenue of the world is derived from the sale of this plant, for it is cultivated in almost every country on the globe inhabited by man.

There was raised, in the United States alone, in 1840, one hundred and nine thousand five hundred and eighty-one *tons* of tobacco. Only think for a moment what a vast funeral pile this would make; and then, all this to be chewed, smoked, and snuffed, in a single year. What extra labor must here be performed! How many become dyspeptic! How many engender consumption! How many destroy that beautiful voice given us to praise our Creator! The oil expressed from seven a thousand tuns would be sufficient to destroy them all in a short space of time, if destruction was what was sought. For some cause, (we hope one of reform,) there was only raised in the United States, in 1850, ninety-nine thousand eight hundred and seventy-six tons, showing a decrease in its culture of nine thousand seven hundred and five tuns. It is to be hoped that its further diminution will be seen, and that those fair fields, now degraded and destroyed by the cultivation of this poisonous weed, to feed the depraved appetites of man—that they may yet grow the waving corn, to feed the starving millions of the earth, and cheapen the staff of life, which is now being eked out to the hungry and famishing at such exorbitant prices.

It is astonishing to see with what universal favor it is received in this country, not only by the rich, but also the poor, the high and also the low, the learned and the ignorant, the lawyer as well as the divine; and to see how strong it fixes its iron grasp upon them.

Nearly all acknowledge that it is useless, and many, its poisoning and destructive qualities; yet of the great number who are now in the daily use of tobacco, and acknowledge the habit to be injurious and an evil, not one-fourth abandon its use, compared with those who have been inebriates, but who now voluntarily abstain from strong drinks; and yet, if the testimony of our most eminent physicians can be relied on, it is quite evident, take the masses as a whole, that the use of tobacco shortens the days of more persons than intemperance. It is true, it acts with less violence upon the system, yet it makes up its losses by the greater number of its victims. If this be a fact, why should not the powerful influence of both the pulpit and the press be raised against it? Why should we not now, as in former days, put forth an effort to arrest the attention of the rising generation, and save them from its direful effects?

On the first introduction of tobacco in almost every country, except Spain, it was regarded as directly opposed to the health and happiness of man. No sooner did its pernicious and deadly effects begin to be seen and realized, than many, on both continents, raised their warning voice against its use. It appears to have met a violent opposer on its introduction into England, in the person of King James I., who thus gives a description of the plant, in a work which he called a "Counter-blaste on Tobacco." "Tobacco," says King James, "is the lively image and pattern of hell, to wit, first, it is a smoke; secondly, it delighteth them that take it; thirdly, it maketh men drunken and light in the head; fourthly, he that taketh tobacco cannot leave it, it doth bewitch him. And, further, besides all this, it is like hell in the very substance of it; for it is a stinking, loathsome thing, and so is hell. And, finally, were I to invite the devil to dinner, he should have three dishes, first, a pig; second, a poll and ling of mustard; and, third, a pipe of tobacco for digesture." The king closes his Counter blaste as follows: "It is a custom loathsome to the eye, hateful to the nose, harmful to the brain, dangerous to the lungs, and in the black, stinking fumes thereof nearest resembling the horrible stygian smoke of the pit that is bottomless."

In Switzerland, at one time, the public authorities placed the sin of smoking among the ten commandments, and directly opposite that of adultery. Several of the popes have issued their powerful anathemas against those who were found using tobacco. At one time, in Russia, whoever was found smoking suffered the penalty of having his nose cut off, or being conveyed through the streets with a pipe bored through it. In the Puritanic days of New England, strict laws were enacted against its use on the first day of the week. But where is now the influence of those men who profess to shun not only the evil, but the appearance of it? Yes, echo answers, Where? No king can now be found so fool-hardy as to risk his popularity by not using the "old soldier," as the sailors call it, in some form or other. No Puritan father is here now to guard with watchful eye the Sunday, and prevent its pollution by the use of tobacco; and but few of the many of God's ministers who are not contaminated by this life-destroying poison, dare lift up their voice and hold forth what their better judgment dictates, for fear that their numerous cigar consumers may be offended, and many of their chewers withdraw their support.

It is due here to say, however, that a few honorable names ought to be excepted as enrolled on the side of this glorious reform, among which I will only mention, for England, Dr. Lacocke, the present medical adviser of the Queen; Dr. Clay, of Manchester, &c. In this country, Dr. Wm. A. Alcott, Dr. Shew, Dr. Nott of Union College, Rev. Henry Ward Beecher, Horace Greeley, and others.

Now let us glance for a moment at the nature and properties of this wonderful, this much loved and everywhere admired plant. According to the botanical arrangement, it belongs to the same family of the *Belladouna* or deadly night shade, and *Stramonium* or poison thorn apple, both of which, as also an infusion from the leaves of tobacco, form one of the most violent and deadly poisons known in the vegetable kingdom; and when taken into the system, no animal is known which can resist its mortal effects. It is very evident that its destructive poison produces a great degeneration in our race; and the celebrated Dr. Waterhouse, who possessed every facility of observing its effects, declares, "he never observed so many pallid faces, and so many marks of declining health, nor ever knew so many hectical habits, and consumptive affections, as of late years; and I trace," says he, "this alarming inroad on young constitutions principally to the pernicious custom of smoking cigars." Who has not seen the pallid features of the cigar smoker? Who has not witnessed his trembling nerve and faltering step, and judged that he was rapidly going into a decline, never once dreaming that it was the effect of the poison of tobacco, which may, perhaps, have been directed by some indiscrimnate physician years before to be taken to aid degestion, but which has grown into a fixed and confirmed habit, and has thus depleted the system. A thousand witnesses can be brought that will testify that it is a poison, and will prove fatal if taken into the system. Dr. Mussey, a celebrated New England physician, says, "Two drops, placed on the tongue, destroyed the life of a cat, in four minutes, that had been brought up in the midst of tobacco smoke. One drop destroyed the life of a half-grown cat in five minutes. Three drops killed a full grown cat in three minutes; and a small puncture made in the end of the nose, with a needle, on which was the oil of tobacco, caused death in six minutes. It would be extremely hazardous to life to drink a tea made from a single cigar."

The fumes of tobacco, as taken into the system by smoking, has been known to be the procuring cause of many diseases, and in many instances to result in death. Of the latter, I will mention one or two. A case of this kind occurred in Salem, Mass., where a lad by the name of James Barry died from smoking. At Mystic, Conn., a few years since, a man died, and when near his end, stated that he had no doubt but what the cause of his death was his excessive smoking; but then it was too late to reform.

The effects of tobacco on the nervous system are very powerful, as most users of tobacco can testify. Indeed, I well recollect, myself, when but a lad, of trying an experiment with its use, which for the time cost me a severe sickness, and taught me to be careful ever afterwards how I handled edged tools.

It is a most remarkable phenomena in nature, that what at first is so loathsome, disgusting, and offensive, can by use come to be regarded as the most pleasant, agreeable and delicious Indeed, such are its powerful effects, that a gentleman with whom I was once laboring, and who was a great chewer of tobacco, but unfortunately "got out," was put to his ingenuity to relieve the horrible craving of the tobacco appetite. In vain did he *wish* for tobacco, or, for relief, put his hand in his pocket. In vain did he chew the ground sorrel, or twigs of birch, and leaves of other plants to relieve his suffering. At length, seeing his great trouble, and knowing that a little *snuff* was sometimes a great relief, I suggested that it might afford some pleasure to smell where it had once been; and accordingly advised him to take a snuff at his pockets. It took at once; he immediately took off his vest, that he might bring the pocket in contact with his nose. No sooner had he done so, than he exclaimed, "Ain't this delicious? O, don't this smell balmy? Wouldn't this taste good?" No sooner thought of than he out with his knife and cut off a part of the pocket and commenced chewing, declaring that he never tasted of anything so good in all his life. The pocket being woolen, my teeth were soon on edge, by associating the idea of eating a woolen pocket with that of filing a saw. It is evident, that no stimulant on earth possesses the power over its victims equaling that of tobacco, not excepting ardent spirits or opium. Our lamented brother J. H. Cochran frequently told me, that so far as his appetite was concerned, he would give ten dollars in a moment for the pleasure of smoking a single cigar; but his *religion* forbid his even smoking one that cost but two cents, and he prized the doctrine of self denial above the gratification of any pleasures here. One may, at the present day, see many fleeing from the pernicious and deadly effects of intoxicating drinks, but who ever saw one of the votaries of tobacco fleeing without his tobacco box, or cigars and matches? O that the sentiment of the great apostle, which was, "Let us lay aside every weight, and the sin that doth so easily beset us," and which was adopted by our brother, above alluded to, might become the adopted principles of every Christian.

I will not detain you with a description of its effects further upon the nervous system, suffice it to say, that no man ever had a nerve of sufficient strength to withstand the effects of tobacco. The hand of the smoker and chewer is tremulous, find them where you may. Its poisonous qualities engender diseases of the mouth and throat, palpitation of the heart, difficulty of breathing, consumption, or reducing of the flesh; it also produces great depression of spirits, hypochondria, hysteria, delirium tremens, insanity, and death.

But let us glance for a moment at a few of the many evils that stand connected with the use of tobacco. Is the evil questioned? While the church of God is famishing for want of knowledge; while millions of our fellow men are destitute of the Word of Life; while the Macedonian cry is heard throughout the length and breadth of the land, and while the report of the gospel treasurer shows that the treasury is well-nigh depleted, can there exist for a moment a doubt in the mind of any Christian, that the useless and unnecessary expenditure for tobacco is an alarming evil? Public journals declare, that the use of tobacco costs more than education or religion, the army or navy. It costs England and America a sum sufficient to support fifty thousand ministers, at a salary of a thousand dollars each, or more than one hundred thousand missionaries. The students in one college alone pay more than six thousand dollars for cigars yearly. Its use tends to idleness, poverty, strong drink, and the whole family of vices. It weaves a winding sheet around twenty thousand in our land every year.

But who are those that set the example, and foster these expensive habits? They are the first men of our age. Our governors must smoke; our legislators must be men of high rank and take a cigar; our ministers must use the "honey dew;" and our deacons must not be found wanting; our doctors must not lose their popularity, by not curing the acidity of the stomachs of our young men in refusing to direct them to chew tobacco, or smoke cigars, or by not recommending to the more gentle the world renowned remedy for curing catarrh; our lawyers invariably smoke; our fathers smoked the pipe, but now the boys smoke cigars and the young ladies their cigarettes; and thus the useless, ill-advised, wicked, and expensive nuisance goes on, year after year. One scarcely can be found at the present day to raise the simple question of its utility, or propriety, or even to favor its discussion, because, in general, they are in some way connected with the evil, or fear its popularity.

Believing it to be capable of demonstration, I venture the assertion, that the churches in this Association expend more for the use of tobacco yearly, than they pay for religious and benevolent purposes put together. The cases are rare, and are exceptions rather than common, where men are found whose tobacco bill will not exceed their acknowledged yearly indebtedness to God. Is it not then an evil, and a sore one? Should not the Christian church awake to this alarming state of things? The evil of cigar smoking is coming in upon us as a flood. It is estimated that the church in this country pays annually about five millions of dollars for the tobacco that it consumes, and the nation at large about thirty millions. What habit, or what evil, is more alarming? Look at the poverty, idleness, and vice, to say nothing of the disease, that this consumption of tobacco must induce. Is it not an unreasonable self-indulgence, at war with the very principles of self-denial taught in the word of God? What Christian can take his chew of tobacco, or light his cigar, and then say, holding up clean hands, "Dear Saviour, I have respected your instructions, I have come out from among them, and am now separate; I touch not, taste not, nor handle the unclean thing."

I am aware that there are those who really believe, that they could not exist long here without this stimulant It is sometimes not a little amusing to hear the various pleas put in for continuing its use. While one really believes that he is spitting himself away, and were it not for the dear tobacco, his corpulency would in a very short time exceed that of Daniel Lambert, another, equally as sincere, believes that were it not for the stimulus of tobacco, he would soon become as lean as Calvin Edson. Are both these men in their right minds? It is a question, in my mind at least, whether any man in the constant and habitual use of tobacco, possesses a sound mind. Is not the mind impaired just in proportion as it is stimulated, till it reaches that point where reason is dethroned? Is it not a fact, that the reason why a drunkard cannot be admitted to the favor of his God, is because of the unfitness of his mind to serve him. Then how can a man who is affected by this stimulant possess a "*sound mind?*"

A brother, and I hope a Christian, told me, not long since, that he had many a time been so drunk smoking cigars, that he could not walk straight to save his life. His testimony I have had corroborated by others. Looking at it in the light of drunkenness, I was led to inquire, Is there any difference between getting drunk on tobacco, or strong drink? Is not intoxication the same in the sight of God? Can a man use tobacco, and not be partially intoxicated? For what does he use it, if not for the stimulating effects? Is there any difference between being partially intoxicated on tobacco, or rum? All the difference that exists, in my opinion, exists here; for the one you would be degraded and excommunicated from the church, if not from the kingdom of heaven, while for the other, no accusation is ever brought against you. Is it less criminal in the sight of Him who sees not as man seeth, and who judges righteous judgment? Would it not better answer the Christian character to abandon, at once, an evil of such magnitude?

Another evil is seen in the example that is thus presented before the rising generation. No shrewd observer has failed to see, that the use of this stimulant calls for that of a greater. Who has ever known an inebriate that did not use tobacco? Pass through our penitentiaries, and you will find that nine-tenths use tobacco, and to be deprived of it constitutes no small portion of their punishment. Will we, in view of this state of things, longer foster and sustain a tobacco loving church? Can the influence of any man be of service in any self denying reform, so long as he does not engage in the reform himself? I chanced, a while since, to hear a father talking kindly to his son, a young man, advising him, with the affection of a father, to abandon the smoking of cigars. The young man listened, apparently not much affected, when, to my astonishment, I discovered that the father was giving his kind advice with a cigar in his own mouth. It reminded me of the father who said to his little son, "Stand aside, my boy. I want to pass." "Don't call me a boy, father," said the son, "I have smoked cigars these two years."

One remark more and I will dismiss this subject for the present. It is said by the lovers of tobacco, that it is a luxury, ranking it with tea and coffee; and those favoring a reform in this sinful habit are charged with wishing to dictate what we shall eat and what we shall drink. There are men here to-day who can well remember, that even those who favored the suppression of drunkenness by intoxicating drinks, were assailed in the same way. I hold, that any narcotic, or other stimulant, whatever it be, whether rum, gin, or brandy, tobacco, tea, or coffee, that produces a disarrangement of the physical system, a diseased and disordered brain, ought at once to be abandoned. Tea and coffee may perhaps produce a slight effect, but no one who will reflect for a moment, can fail to discover that tobacco differs as much from tea and coffee, in its properties and effects, as lobelia does from sage, and no one will ever feel his dear liberties assailed, unless he is a slave to its use.

I would, in conclusion, enjoin it upon you all, never to use it yourselves; banish it from your families, purify the church, and hereafter let no smoke of tobacco ascend as incense from her sacred altars. Rebuke its sale and use, wherever you meet it; make a desperate effort to save the young, and let your motto be that of a title given to a poem on this subject, by Joshua Sylvester, who was cotemporary with King James I., "Tobacco battered and the pipes shattered about their ears, that idly idolize so base and barbarous a weed, or, at leastwise over love so loathsome a vanitee, by a volley of holy shot thundered from Mount Helicon."

BEAUTIFUL STANZAS.

"I WILL LEAD THEM IN THE PATHS THEY HAVE NOT KNOWN."—Isaiah 42: 16.

How few who, from their youthful day,
Look on to what their life may be;
Painting the visions of the way
In colors soft, and bright, and free.
How few, who to such paths have brought
The hopes and dreams of early thought!
For God through ways they have not known,
Will lead His own.

The eager hearts, the souls of fire,
Who pant to toil for God and man;
And view with eyes of keen desire
The upland way of toil and pain;
Almost with scorn they think of rest,
Of holy calm, of tranquil breast,
But God, through ways they have not known,
Will lead them home.

A lowlier task on them is laid—
With love to make the labor light;
And there their beauty they must shed
On quiet homes and lost to sight.
Changed are their visions high and fair,
Yet, calm and still they labor there;
For God, through ways they have not known,
Will lead His own.

The gentle heart that thinks with pain,
It scarce can lowliest tasks fulfill;
And, if it dared its life to scan,
Would ask but pathway low and still,
Often such lowly heart is brought
To act with power beyond its thought;
For God, through ways they have not known,
Will lead His own.

And they, the bright, who long to prove,
In joyous path, in cloudless lot,
How fresh from earth their grateful love
Can spring without a stain or spot—
Often such youthful heart is given
The path of grief, to walk in heaven:
For God, through ways they have not known,
Will lead His own.

What matter what the path shall be?
The end is clear and bright to view;
We know that we a strength shall see,
Whate'er the day may bring to do.
We see the end, the house of God,
But not the path to that abode:
For God, through ways they have not known,
Will lead His own.

CHRISTIAN MINISTRY AS A CALLING.

There have been many pictures drawn, and some of them with much ability, of the hardships, sufferings and discouragements of the ministerial life. Stingy congregations, overbearing laymen, unpaid salaries, overwrought wives, shabbily clad children, burdensome debts, and, in a word, nearly all the ills that flesh is heir to, have been vividly portrayed as pertaining to the minister's lot, and weighing him and his to the dust. Now there is unhappily a great deal of truth in all this, and in many cases there is much to be remedied in the conduct of congregations towards ministers, which the publications and articles in question will, it is to be hoped, accomplish, but we doubt very much that they give a fair view in the matter, and fear that they are calculated unreasonably to deter young men from entering the ministry.

The pictures to which we refer, and they are widely scattered over religious newspapers, as well as in several popular tales, are, we doubt not, all true, and probably they might be indefinitely varied and multiplied; still we think, as they are set forth, they are calculated, though, doubtless, unintentionally, to convey an incorrect impression—namely, that these trials and hardships are peculiar to the profession or calling of the ministry; whilst the truth is, every picture of ministerial suffering could find its parallel quite as deeply shaded in every business of life. Nay, we would say more deeply shaded, for the minister has two sources of consolation and support which are not incidental to other professions. In his trials and crosses he has the sustaining thought that he is suffering directly for the Lord's sake and for the welfare of mankind; and if his case come in any way to be known he will have the consolation of much sympathy; whereas the farmer, or mechanic, or merchant, or lawyer, or doctor, may be as much straightened in circumstances, more deeply involved in debt, and equally reduced to shifts to support a family, without having either of these consolations to fall back upon. The shady side of any condition of life, except the ministerial or the missionary, may be quite as deep, but that is their own business, and nobody would think of publishing it to excite sympathy, or succeed if they did. These reflections are set forth, not with the intention of diminishing in the least the sympathy for the ministers of religion—we earnestly desire to see them better supported—but to remove what we consider groundless obstacles to entering that way of life.

It is a common assumption that a young man, by entering the ministry, sacrifices his worldly prospects, and that if he had devoted himself to commerce, for instance, or any other secular calling, he would have made a fortune, or at all events been much better off in a worldly point of view. But we need scarcely say that this is a great fallacy. The instances of success in other callings are the exceptions; the common lot is to toil and struggle amid trials and reverses, till the grave closes the scene, and to leave a family to tread the same path. If a minister is on the one hand shut out from making the fortune which sometimes crowns commercial enterprise, he is on the other saved from the bankruptcy with all its agonies, which is the much more common result. In fact the proportion of men in business who fail is much greater than is usually thought, and the number who, after a harrassing and anxious life, die no wealthier than they began, is greater still. In the legal and medical professions, poverty and disappointment are also the rule, success the exception; and the fagging and disagreeable nature of their work, would to some minds present quite a contrast to the office of the ministry. This, however, is a matter of taste. But what we contend for is, that nothing can be more absurd than to take it for granted, as is commonly done, that a young man would sacrifice his prospects by entering the ministry, and would attain a higher and more comfortable position if he followed another calling. The probabilities are rather, we think, on the other side. Take a few supposed cases, which our readers will admit are at all events likely enough to occur.

In a family of brothers, one follows commerce, one the law, one the ministry. The merchant fails, the lawyer is a loud but not successful party politician. The minister has more weight, influence and respect in society a dozen times over than them both put together. An affectionate congregation sustains him, and prays for him, and he is in a position not to instil right principles into them only, but, incidentally, and as occasion offers, into the whole community.

In another family, it may be two are farmers and one a minister. The farmers are hard working, excellent men, clad in home-spun, happy to be hired in winter to do teaming for village merchants, and in a word, exposed to all the hardships and self-denials of Canadian farmers. The minister moves in quite another sphere; occasionally travels about, at one time collecting to build a church, at another to attend some meeting, &c., and has perhaps a better income than both his brothers put together, with probably not one-tenth part of the physical work of either, whilst he has time and opportunity for literary studies and the gratification of tastes to which the others must necessarily be strangers.

Cases might be indefinitely multiplied, but we will only suppose one more. A young man of very good abilities and education enters into commerce. He is no way particularly distinguished as a merchant, and might, had he been moderately successful, have toiled on for life without anything to distinguish him from his competitors in commercial pursuits; but the company, of which he is a partner, fails, and he studies for the ministry. After a few years he comes forth as a powerful, eloquent, and accomplished preacher—ministers to a large and devoted congregation—has a comfortable support, and exerts a hundred times the influence over society that he could ever have done as a merchant, even had he been successful.

We shall suppose no more cases; but let our readers only think over the families of their own acquaintances in which one brother has entered the ministry, and say if, in the average of cases, he is not fully equal in all that makes life desirable, to his brothers or companions who sought other callings.

[Montreal Witness.

DO YOU CALL THAT PRAYER?

The late S. Kilpin, of Exeter, was one summer evening walking along the streets, when a party of men going from work passed him, one of whom was swearing dreadfully. Mr. Kilpin observed it, but said nothing. When he arrived at home, he began to think how wrong it was to allow a man to pass by, using such language, and not make an effort, at least, to convince him of the sin he was committing. It so disturbed him that he could not rest during the night, and he began to think if there was any way of remedying his neglect. He resolved to rise early enough in the morning to be at the corner of the street where the man passed, if possible, to meet him as he was going to his work. He did so, and after waiting anxiously for a time, he saw the man coming. When he approached, he said, "Good morning, my friend, you are the person I have been waiting for; I am very glad to meet with you." "Oh, sir," said the man, "you are mistaken, I think." "I do not know you, but I saw you last night when you were going home from work, and I have been waiting for some time to see you." "Oh, sir, you are mistaken; it could not be me; I never saw you in my life that I know of." "Well, my friend, I heard you pray last night." "Sir, I know that you are mistaken—I never prayed in all my life." "Oh!" said Mr. Kilpin, "if God had answered your prayer last night, you had not been seen here this morning. I heard you pray that God would blast your eyes, and damn your soul." The man turned pale, and trembling, said, "Oh, sir, do you call that prayer? I did, I did." "Well, then, my errand this morning is to request you from this day to pray as fervently for your salvation, as you have done for your damnation; and may God in mercy hear your prayer." The man from that time became an attendant on Mr. Kilpin's ministry, and it ended in his early conversion to God.

PAYING CHURCH DEBTS.

The counsel given in the following extract is worthy of the consideration of every parish in the land. *Debt* and *charity* will not live together—one must expel the other. They are mortal and deadly antagonists. As debt will kill charity, so will charity destroy debt. The motto of a congregation in debt is, *charity begins at home and stays there.* Debt digs a ditch, and plants a hedge around a parish, so that its sympathies cannot go beyond its own limits. It can give nothing to Diocesan, nothing to general objects. Its world, like Mr. Bumble's, is a "parochial one!" Most earnestly do we commend the following advice to general attention:—

"Debts against churches, especially when the amount is quite large, are notoriously very burdensome things to carry. In more ways than one they operate to the disadvantage of a religious congregation. Very frequently they keep the finances of a church in a state of continual perplexity and embarrassment. They affect injuriously the feelings, the energy, enjoyment, and even the spirituality of good men. The pulpit is not exempt from their debilitating power; and sometimes the minister's salary is unpaid, because interest money must have the precedence. Many people are also afraid of a congregation that is heavily in debt; they are afraid to become members, lest perchance their purses may be called on for some unwelcome duties. They are immensely conservative on the side of keeping their money, and hence do not like the perils of certain positions. On the whole, except in cases of absolute necessity, it is not best for Christian congregations to incur debts; and when they have done so, then let them shorten the days of that necessity as much as possible. The sooner they set about the work of payment the better. The sooner they earnestly attempt the thing, the sooner they will be likely to accomplish it."

THE WESTERN ASSOCIATION.

The Seventh-day Baptist Western Association closed a very interesting and harmonious session, last week, at Richburg, Allegany Co., N. Y. The number of delegates attending was not as large as on some former occasions, but the interest manifested on the part of those who did attend, as well as on the part of the inhabitants of Richburg and vicinity, was quite encouraging.

The opening sermon by Elder N. V. Hull, upon the *Ministry of Moses and of Christ*; or *the Old and New Covenants Contrasted*, (text 2 Cor. 3 : 14—17,) was one which embodied much valuable thought, and presented the subject in an interesting light to the hearers. The speaker commenced by showing, that all the various systems of religion received among men proceed upon the principle that man is a sinner; also that universal experience testifies that there is a universal helplessness with respect to man's sinfulness; that Christianity sets this matter in the clearest light, declaring that man is both guilty and helpless; that the Atonement of Christ is a provision for the removal of this helplessness, since it embodies a *power* by which the sinner is justified before God, the gospel being "the power of God unto salvation to every one that believeth." (Rom. 1: 16.) The Law's incompetency to deliver man from guilt was then shown, both as respects the moral precepts, and the ceremonies which were superadded; that the legal ceremonies were intended merely as an exhibition of God's purpose to show mercy through a Mediator. The object of the gospel was then explained and illustrated, and it was clearly shown, that it was never intended to set believers free from conformity to the duties of the Moral Law.

The State of Religion, as exhibited by the letters of the several churches, will be found in a Report of a Committee on the subject.

The Resolutions adopted, and the discussion they elicited, manifested a gratifying interest in the cause of Education, Missions, Temperance, Anti-Slavery, and the various benevolent reforms of the age we live in.

An able Essay, by Professor J. M. Allen, of the Alfred Institute, upon Ministerial Education, and the duty of the churches with respect to candidates for the ministry, was read before the Association. An Essay on the Immortality of the Soul, was also read by T. B. Brown. Measures will be taken to place both these essays before the public.

Among the letters was one requesting admission to the Association from a church recently organized at Wilson, Niagara Co., N. Y., where Eld. Rowse Babcock has preached occasionally for some time past. Six members composed the church at the time of its organization in August last, since which fifteen members have heen added. Their request was granted. There was also a communication from the Ohio Association, stating some of the difficulties in the way of keeping up that organization, and inquiring whether, in case of its disbanding, the churches would be received into the Western Association—a question to which an affirmative answer was given.

The officers of the Association at its present session were J. M. ALLEN, Moderator; E. A. GREEN and E. R. CLARKE, Clerks. The Treasurer for the ensuing year is D. R. Stillman, Alfred Center, N. Y.; Corresponding Secretary, Jared Kenyon, Independence. The delegate to the next meeting of the Eastern Association is J. M. Allen; to the Central, Jared Kenyon; to the North Western, Leman Andrus; to the Virginia and Ohio, Rowse Babcock.

The next meeting of the Association is to be held with the 2d Church in Alfred, commencing on the fifth day of the week before the fourth Sabbath in June, 1856. T. B. Brown was appointed to preach the Introductory Discourse; Leman Andrus alternate.

Of the Religious Exercises during the meeting of the Association we have to speak from memory, and may omit some. In the Seventh-day Baptist meeting-house, T. B. Brown preached on Sabbath morning, A. W. Coon in the afternoon, E. P. Larkin in the evening; G. B. Utter on First day morning, and H. W. Babcock in the afternoon. In the First-day Baptist meeting-house, N. V. Hull preached on Sabbath morning, Jared Kenyon in the afternoon, and E. P. Larkin on First-day morning. Collections were taken in both places, on Sabbath morning for the Associational Missions, and on First-day morning for Foreign Missions.

Resolutions.

1. *Resolved*, That we deem a religious basis the only true foundation on which to build institutions of learning; and that it is the duty of Christians to labor earnestly in rearing institutions on such a basis.

2. *Resolved*, That in the opinion of this Association, a Collegiate Institution, on a religious basis, is the *great want* of the Denomination—that it is needed, as one of the most important means of the church for blessing the world and promoting her own prosperity—that it is demanded of us by all of the benevolent and progressive enterprises of the age, as a means for furnishing men in carrying forward these enterprises—that it is needed as a means for educating our religious teachers and guides—that it is needed to save our youth from proving recreant to those principles which they profess to hold sacred—and that we may expect, therefore, to have inefficiency characterizing all of our operations, and a feeble and sickly growth, with a doubtful prosperity, attending us until this great want is satisfied.

3. *Resolved*, That we hail with pleasure the measures which have been taken by the General Conference, through its Educational Committee, to secure the founding and endowment of an Educational Institution on a religious and denominational basis, and we pledge our hearty co-operation, both by *influence* and *money*, in bringing about a result so essential to the life and prosperity of the denomination.

4. *Resolved*, That in the consideration of this whole question, the interests involved are of such vast magnitude and vital importance, that no personal considerations, local prejudices, or partial views, ought for a moment to influence any one, either in respect to *location* or with regard to the general features and conduct of the Institution contemplated; but that the whole question should be determined upon the broad basis of an enlightened Christian philanthropy, and the present and prospective well-being of the denomination.

5. Whereas, the *spirit* and *letter* of Christianity demand of its adherents a faithful devotion to its interests; and whereas the conversion of the world to God is its great and glorious object; therefore, *Resolved*, That this Association, in acknowledgment of this principle, pledges itself to renewed exertion in the field of missionary effort.

6. *Resolved*, That while we unite heartily in support of the missions to which the Association and the denomination are pledged, we call attention to the question of increased efforts in the Mississippi Valley, as suggested in the Report of our Delegate to the North-Western Association.

7. *Resolved*, That the attention of the churches is especially called to the interests of the American Sabbath Tract Society.

8. *Resolved*, That we recommend to the churches *system* in their contributions for benevolent purposes.

9. *Resolved*, That the neglect of Family Prayer, as indicated by the letters from several of the churches, is an alarming circumstance, and calls loudly for reform.

10. *Resolved*, That this Association re-affirms its settled conviction of the inhumanity of American Slavery, and that its workings in the case of Bro. Pardon Davis are only the legitimate fruits of the system.

11. *Resolved*, That we commend brother Davis for the course he pursued towards the suffering fugitives in furnishing them food and raiment, and that we earnestly pray God to grant him sustaining grace, that he may endure with true martyr-spirit the trials which his faithfulness to the instincts of humanity has subjected him to, and that we are ready to unite with our brethren in any effort that may tend to his relief.

12. *Resolved*, That the use of Tobacco, in its various forms, demands a sinful expenditure of money, is opposed to health, and to the cardinal virtue of neatness, and subjects one to a condition of slavery to a vitiated appetite, altogether inconsistent with the freedom of Christianity and the true dignity of human nature.

13. *Resolved*, That the passage of the Prohibitory Liquor Law by the Legislature of this State at its last session, is an occasion of thanksgiving to God, and that we pledge ourselves to its maintenance and support.

Report on the State of Religion.

Your Committee on the State of Religion would respectfully submit the following report:

We find from the communications of the different churches of the Association, not that cheering news which it has at times been our happiness to receive and communicate. There is not that general and manifest growth in vital piety which should distinguish those possessed with so many facilities to a growth in grace. Family prayer, although attended by many families, is by far too generally neglected by the families comprising our churches; while the prayer meetings of the churches, though generally maintained, are thinly attended, which indicates a want of deep and abiding interest in the duties of religion. There is a commendable liberality in the course pursued for contributing to benevolent purposes; yet not all is done that might be expected from a people alive to the interests of Zion. There is in the communications of some of the churches the welcome news of the gracious favor of God in the conversion of sinners, the reclaiming of the backslider, and the revival of the work of grace in the hearts of professors, which should be regarded as unmistakable evidence that "our labor is not in vain in the Lord." There is a prevalence of Christian fellowship, and in the interest manifested throughout the churches in Sabbath Schools and Bible Classes, we see hopeful prospects of an ample harvest in future.

In view of all the circumstances of the case, we are called upon to humble ourselves, as churches, families, and individuals, in prayer and consecration to our Heavenly Father, that Zion may prosper, and we all be made to rejoice at our next anniversary in God's renovating and reviving power manifested among us as a people.

Report of the Executive Committee.

Your Committee report concerning the Domestic Mission for the past year, that the labors of Bro. H. W. Babcock have been continued in Potter County, Pa., with the churches at Hebron and Ulysses, and at such other points as circumstances would admit and his judgment direct. He reports, in addition to the foregoing, that he has labored at Clara and Allegany townships and Oswayo, and that during his labor at the latter place, there was an unusual degree of religious interest manifest, and that the Sabbath-keeping friends in that community were very much revived in their religious enjoyments. He represents the church at Ulysses as being in a diminished and feeble condition. He reports a good attendance upon the preached word at all points of his labor.

The labors of Bro. Rowse Babcock have been expended with the Clarence and Pendleton churches and vicinity. He reports a regular and faithful attendance upon preaching occasions, and some additions to the Pendleton church. He also reports some labor with the church at Darien, and some in the town of Wilson, Niagara Co., N. Y., at which place a reviving influence has been experienced. The discussion of the Sabbath question, the missionary states, has seemed particularly to demand his attention, and much interest has been manifested in it, and many have acknowledged its claims. He reports the field as one of much promise, and in need of more labor than can be expected of one man.

Your Committee have responded pecuniarily to some extent to a call from Bro. A. A. F. Randolph, of Hayfield, for labor done within the bounds of that church, yet at so great a distance as to deprive them in a great measure of the privileges and benefits of church organization. Bro. Randolph reports that during a protracted effort there some twenty-five gave good evidence of being converted to God. Backsliders were reclaimed, the faithful Christian made to rejoice, and some few embraced the Sabbath. In keeping with the wishes of the people there, and the apparent necessity of the case, a church was organized in that place.

Brethren L. Andrus and H. P. Green have labored at different intervals with the church at Persia and vicinity, and their reports from that quarter are very encouraging. Their labors seem to have been abundantly blessed, the church having been generally revived, backsliders reclaimed, and sinners converted and added to the church. Bro. Green reports his visits there as among the richest and most precious seasons of his experience.

In view of all the reports from different fields, your Committee feel that their labor, together with that of the missionaries, has not been altogether in vain; for although dry and barren grounds seem so universally to overspread the vast expanse of Christendom, yet the weak and feeble efforts of the faithful seem in some cases to prevail with God, and here and there are seen springing up revivals and conversions, such as the Lord will own, and bless, and such as shall go to make up that sanctified company whom the Lord shall receive as his at his coming. Your Committee feel grateful while they indulge in reflections upon the past, and hope that the future may be blessed with more abundant good. In submitting to you our report, we likewise submit our convictions, that the work should still be prosecuted—that the destitute and the feeble should be cared for, the drooping and disconsolate comforted and encouraged, and invited to come to the "feast of love" with the full assurance that "earth has no sorrow but heaven can remove."

The Committee have appropriated during the last year—

To the Pennsylvania field	$100 00
To Hayfield	37 50
To Clarence, Pendleton and vicinity	50 00
To Persia and vicinity	24 75
Total	$212 25

E. R. CLARKE, Secretary.

Report of the Delegate to the North-Western Association.

To the Western Seventh-day Baptist Association:—

DEAR BRETHREN,—In fulfillment of the appointment I received from you at your last session, I visited the North-Western Seventh-day Baptist Association, convened at Milton, Rock Co., Wis., and was heartily welcomed by it. The Association was largely attended by delegates from the churches in that State, and the spirit manifested on that occasion showed a commendable zeal in the cause of the blessed Redeemer, as well as in those reforms which characterize the present age. Notwithstanding the earnestness with which the various questions brought before the Association were discussed, the transactions were harmonious, and indicated the presence equally of Christian generosity and forbearance.

It was to your delegate a matter of unfeigned rejoicing to witness the unquestionable evidences of the rapid increase of the churches in that new and fertile region, and their steadfastness in the great doctrines of our holy religion, and their liberality in building up those interests which are essential to the stability and prosperity of any people. Among the evidences of their far-seeing policy, none seemed more manifest to my mind than that of their devotion to the cause of education. I question whether history affords many instances of a people more earnestly engaged in behalf of the cause of education than are the Seventh-day Baptists embraced within the bounds of the North-Western Association, and I think I will be justified in saying, that in this respect they are far in the lead of all other denominations of Christians in that Eden of our nation.

Perhaps it would not be out of place for me also to say, that the Association being over, and having visited within the bounds of the Milton, Albion, Christiana, and Walworth churches, and participated in the opening services of the Albion Academy, I then visited the churches of Farmington and Southampton, Ill., the present field of Bro. Davison's labors. I found those churches trying to maintain their Christian integrity, although the first-mentioned church has passed for a season through trials of a most discouraging character. The brethren at Southampton are not only located upon a most beautiful prairie, but so compactly as to make it convenient to assemble for the worship of God—a circumstance of great importance, but not always regarded with due consideration by our brethren who have sought new homes in the West.

I will close this report by calling the attention of this Association—(and I would desire to that of the whole denomination)—to the West as a field for missionary labor. I do not believe there is any field that can be selected which presents such flattering prospects as that. It may truly be said of it, as Christ said when looking on the moving mass of Samaritans, "Behold, the fields are white, ready for the harvest;" and I cannot but sincerely hope, that more systematic, persevering, and vigorous efforts will be made by our people than have heretofore been made to break the bread of life to the destitute in that large and inviting field. N. V. HULL.

RESULTS OF MISSIONS.

The London *Patriot*, in its editorial allusion to the meeting of the London Missionary Society, has the following striking passage in regard to the success of missionary labors:

We are apt to speak of the romance of Missions as gone by; but the truth is, that they are only beginning to develop their wonder-working power. Where is the church that, like Mr. Scott's in Demerara, can number among the additions of a single year, accessions so strange and diverse as five captured and liberated Africans, a native of Madeira, and a native of Madras? But it is in China that the work of conversion is most cheering. In Hong-Kong thirteen, and in Amoy seventy-seven native converts have been added to the church. From every quarter, too, there is gratifying proof that these converts from heathenism are steadfast in the faith. The Rev. Henry Allen, we observe, did not hesitate to affirm, in the course of his eloquent and discriminating speech, that the history of modern missions surpasses the records of the Apostolic age. It is a bold assertion; but, assuredly, the converts of our missionaries, in point of consistency, need not shrink from comparison with those of the Apostles, as described in the Pauline Epistles. We find them aspiring to an honorable independence; and even in deep poverty, contributing largely to the diffusion of the gospel. How readily they pay for copies of the Scriptures, has been already seen; and it appears that the full fifth of the annual income of the London Missionary Society comes from mission stations. The report contains several remarkable instances of this reflex operation of the missionary spirit. The Christians of Raratonga send "to the receiver of property in England," as their contribution to the "Societe," for 1854, the value of £74 5s. 8d. The Hottentots, Fingoes, and Caffres, who compose the church at Oudtshorn and Dysalsdorp, have, during the past year, subscribed for various purposes £120, and are contemplating an announcement to the Directors of their intention to support their own ministers, and defray all the expenses of their religious worship. More striking still, a paid catechist in Southern India resolved to support himself, that with his salary another agent might be employed; and without suspending his missionary labors, he not merely provided for his own subsistence, but actually contributed £50 in one year for missionary purposes.

"STATE OF THE DEAD"—NO. 4.

No Future State without the Gospel.

According to Bro. B., mankind would not have had a future state, had they not enjoyed revealed religion. Had they been the subjects of natural religion only, they would have existed forever on this earth; and although they might have sought death ever so earnestly, they could not have found it. Had not the "*new dispensation of grace*" been introduced, Cain could not have killed Abel, nor Lamech have slain a young man to his hurt—Moses could not have killed the Egyptian, nor David Uriah. Men would have carried on war without death. Man could have laughed at Jupiter's thunderbolts, and his forked lightning. Mankind could have done business upon the mighty deep, and although they might sink beneath its roar, they would not have been drowned. Men could have walked in the midst of fiery furnaces without being consumed. No deadly poison could kill them. Rachel would not have wept over her murdered children. The martyrs would have had to *live* forever in a burning fire. Disease could not have killed its victim, nor the scaffold witnessed a death-groan. All capital punishment would have been impossible, and dueling unknown. Though under sentence of death, men would not have died. However great might have become the wickedness of mankind, however much they might have hated each other, or sought to kill each other, that would have been impossible. Dreadful seems the thought, that all the myriads of earth's inhabitants, quarreling, fighting, and seeking to kill each other, would have now been living, and not a good man among them. What a scene would earth now present. Millions upon millions of human, immortal beings, engaged in mortal (immortal) combat. Rivers of blood flow on forever and ever, and yet the race do live. Vast multitudes of men are walking up and down the earth whose bodies are perforated with bullets. Some are armless, some are legless, some headless, and yet they live. Here is one whose head was taken off by a cannon ball, there another all blown to atoms by a shell, both alive. Here is one who has swung on the gallows for years, and still not dead; there another still writhing in crucifixion, who was condemned by Nero. John Rogers would have been living now—a living specimen of human asbestos. Such or similar must have been, had not the "new dispensation of grace" been introduced, or had the threatening against Adam been executed without a remedy, viz., revealed religion. For if men could not have died, unless the new dispensation of grace (the only one under which they could die) had been introduced, something like what I have described must have followed as the natural consequence of sin.

Bro. B.'s theory respecting death is, I believe, neither orthodox nor heterodox, but *ab extra* to both. That I have not misunderstood him on that point, all will see by the following extract from his article of May 3d.:

> "But no part of the finally executed punishment consists in natural death. It is evident, therefore, that natural death, or the separation of soul and body could not have taken place at all, had men been punished for disobedience according to the threatening. But this dissolution of the body could not take place unless man had sinned; nor then, if the threatening had been executed without remedy. The constitution under which man was first placed did not recognize natural death—the separation of soul and body—nor did it admit of it."

From the above, all will see that Bro. B. only gets natural death into the world through the Gospel dispensation, for he adds, "Both of these must take place, the sin of man, and redemption by a mediator, in order that the separation of soul and body may be at all consistent with the nature of his (man's) accountability." Now, as men could not die, and as sin had entered, inciting men to hate each other, something, I repeat, like what I have suggested, would have followed, had no mediator appeared. But I ask, is Bro. B.'s view of death upheld either philosophical or scriptural? Reasonable philosophy would seem to teach, that natural death was the result of man's material organization. It is difficult to conceive how natural death could have been prevented, (without miracle,) even though man had not sinned. For natural death had existed in the animal world even prior to the birth of Adam. Fish had preyed on each other; birds had caught the fly as it sailed on azure wing; and even Adam himself had both ate and drank myriads of living animalculæ, as he partook of luscious fruit, or sipped the purling brook. Natural death, therefore, was all around him. He began to live in the midst of life pregnant with death. And, in fact, I am not certain but that natural death, even of Adam, had to inhere his constitution, as the symbol or representation of that spiritual death pronounced for transgressions. For the sacred writers were necessitated to use the *facts* of the physical world to represent spiritual, moral, and mental ideas as truths. Therefore the physical world was first ultimated, that it might be used to represent spiritual phenomena. Thus death in the natural world was used by the sacred penmen to represent those dreadful evils which, from the course of nature, followed man's transgression. Natural death, therefore, I apprehend, is the result of man's physical organization, according to the course of nature, and therefore, neither any part of the threatened penalty of the Adamic law, nor the sheriff of the new dispensation of grace, whereby men are arrested and confined in an invisible prison, awaiting a resurrection writ of habeas corpus to bring them to judgment and a final sentence. Reason and philosophy apparently reveal nothing of the kind. Nor does scripture afford evidence that natural death was an accident of the gospel dispensation. If the Bible anywhere teaches that natural death was the consequent of sin, it most expressly assigns it under the Adamic law, and not under gospel order. Death, we are told, entered by sin, and so death passed upon all, because all have sinned. The wages of sin is death. The devil is said to have the power of death. So, on the other hand, Christ came to abolish death, and to destroy him that had the power of death, that is, the devil, to bring life and immortality to light by the Gospel. It is, therefore, plain, that if the sacred writers intended to speak of natural death as entering this world under either Adam or Christ, they assigned it a place under Adam, and to Christ they assigned the power to deliver from such natural death. If this be true, does it not follow, that the position of Bro. B. respecting natural death is erroneous?

I have extended remarks upon this part of the subject, because of its importance. For unless we obtain correct views relative to the meaning of the terms Life and Death, and some other expressions, as used by the writer of the first part of Genesis, we shall begin the beginning erroneously. If materialism is to guide our interpretation in Eden's bower when Paradise was lost, materialism must guide us when Paradise is regained. The universe is a material and spiritual quality, one the cause, the other the effect, and man the microcosm. Created in the image and likeness of his Maker, man was constituted a spiritual intelligence, of which his earthly body was but a receptivity; one similar to that which, in the fullness of time, became receptive of the Infinite Spirit. Hence man is a dual being, a spiritual being, indwelling a material form. In his primal or normal state, he was a medium of both worlds, the spiritual and natural. By his spiritual nature he was in communion or intercourse with God, (who is a spirit,) and spiritual beings. By his natural nature, he held converse with the material world. Thus he was both the microcosm and macrocosm of all being.

The phenomena of the natural world became so many symbols, representative of the spiritual world. Hence the sacred penman had to *represent* pure spiritual ideas and things by natural ideas and things. Hence the scripture language is of necessity representative, figurative, symbolical, or typical. Hence its *letter* is sometimes contradictory, for it was not so much the object of the writer to conform to natural as to spiritual truth. Thus they represented the earth as resting on pillars, or stationary, and the universe as revolving round it; which is not an astronomical truth. Thus Jehovah is represented as having feathers, and horns, as riding on the wings of the wind, as journeying from Teman and Mount Paran. Thus the church is represented as being purchased by the blood of God; and his people as eating horses and mighty men. Thus the entrance of moral evil into the world, is represented by a snake enticing a woman to eat of fruit; while the final overthrow of evil, is represented by the seed of a woman bruising the head of a serpent. Thus man is represented as being bought. (Ireneus taught that God bought men of the devil.) In fact, the whole of the Mosaic economy, and much of all the rest of the Old Testament, particularly, was of a representative character. But I need not enlarge; I have already been too prolix; but the vast importance of the subject is my apology. If I can enlist the patience of readers, I intend to give what seems to me to be the true theory of the subjects under consideration.

I shall now proceed to examine Bro. B.'s theory of Natural and Revealed Religion, and the state of the Dead as affected thereby.

S. S. G.

To the Editors of the Sabbath Recorder:—

Will you do me the favor to present, through the columns of the *Recorder*, the following query: By what standard rule are we to be guided and governed in our investigations into the great truths of divine revelation? I am fully aware, that such a question may appear superfluous at first sight, and consequently that there can be no difficulty in determining a matter of this kind; but I shall attempt to show hereafter, if necessary, that the Bible is not taken as the direct or ultimate criterion by which to regulate our views as a denomination. The truth seems to be, that we are left to form conclusions, after hearing an almost endless variety of holdings, as interest or inclination may be most conveniently gratified; for we do know certainly, that ALL most strenuously maintain, even with an air of infallibility, that they have a "thus saith the Lord" upon the particular side of the subject presented. I feel deeply interested in having some of your many correspondents present their views upon this question, as we are anxious to see more light upon it.

A RHODE ISLANDER.

ROCKVILLE, June 15, 1855.

HAPPY TURN OF AFFAIRS.

The venerable Gideon Blackburn, D. D., one of the pioneers of Presbyterianism in the West, many years ago collected large donations in the East to found a Theological Seminary at Carlinsville, Ill. These funds (says the N. Y. *Evangelist*) were invested in lands in Carlinsville, in his own name, and were by him conveyed to fifteen trustees, some ten only of whom were named, however, in trust for the purpose of establishing a theological seminary at that place, and a large and beautiful lot, part of these lands, designated as its site. The deed was very imperfect in its description, and the only object precisely designated was, a Theological Seminary at Carlinsville—its theological character or denominational connection being left wholly uncertain. These lands, probably through inattention to the terms of the deed, were taken possession of by the Trustees of Illinois College, after Dr. Blackburn's death, and sold to a citizen of Jacksonville for about one-third of what Dr. B. gave for them, and the avails invested as a permanent endowment of the Blackburn Professorship of Theology in that College. President Sturtevant, as the incumbent of that professorship, has enjoyed the income of this ever since; and the lands were subsequently sold at a great advance, making a capital speculation for the purchaser. Thus the matter lay for many years, forgotten by every body, except perhaps the parties on the ground who were reaping the benefits of Dr. Blackburn's collection. The heirs of Dr. Blackburn, however, suspected that the sale was invalid, and supposing that if annulled the lands would revert to them, commenced suit for their recovery. The cause came before the Court, without any counsel except for the plaintiffs, and it was decided that neither Illinois College, nor the heirs of Dr. Blackburn, were entitled to the lands, but that they must be held for the use of a theological seminary at Carlinsville. It pronounced the sale null and void, and re-invested such of the trustees as survived, or could be found, with their original trusts, filling the vacancies, so as to enable them to act under the deed. As no denomination of Christians were designated in the deed, the Court was guided in the choice of trustees by Dr. Blackburn's well-known position and views; and we believe the trustees appointed were all, or mostly, connected with the Presbyterian church. These trustees were empowered by the deed to elect five other trustees, who should together possess full powers to determine the theological and ecclesiastical character of the proposed seminary.

The lands sold by the Trustees of Illinois College for fifty cents an acre, at a very moderate estimate, are now worth from seventy-five to one hundred thousand dollars, and are rapidly increasing in value. A more beautiful tract hardly lies out of doors. In the center of one of the grandest prairies in Illinois, on the line of the Railroad from Chicago to St. Louis, healthy, pleasant, and accessible, it will finely answer the intended purpose, and prove a source of strength and benefit to the interests of sound religious truth and church polity in the West, which no mind can compute.

◆

METHODIST MISSIONS.—The Methodist Church South has just published the tenth annual report of its Missionary Society, from which we learn that the society has under its care 368 missions, 311 missionaries, 128 churches, 79,050 church members, 185 Sunday schools, 25,034 children under religious instructions, 9 manual labor schools, and 485 Indian pupils. These are distributed thus: In the destitute portion of the regular work, 157 missions, 142 missionaries, 26,337 white members and 1,385 colored, 61 churches, 137 Sunday schools, and 5,526 scholars; among the people of color, 170 missions, 124 missionaries, 46,577 colored members, 43 churches, and 17,883 children under religious instruction; among the Germans, 11 missions, 11 missionaries, 483 members, 6 churches, 10 Sunday schools, and 244 scholars; among the Indian tribes, 30 missions, 28 missionaries, 4,364 members, 18 churches, 38 Sunday schools, 1,381 scholars, 9 manual labor schools, and 485 pupils. The contributions for the year 1854, amounted to $164,366, of which $22,772, the largest amount, was received from the South Carolina Conference, $20,970, the next in size, from the Alabama Conference, and $19,083 47 from the United States government. When or how this last sum was contributed, we do not find stated, but unexplained it is somewhat of an anomaly.

◆

GEORGIA BAPTISTS.—The Georgia Baptist Convention held its annual meeting April 20th. The Treasurer's report showed funds on hand amounting to $47,542. The appropriations of the Convention for Foreign Missions during the last two years have been $14,000. An appeal was made in behalf of Indian missions, which was followed by a contribution for this object of $1,700. The Savannah *Journal and Enquirer*, alluding to the meeting, says:—

> "The Baptist denomination is the largest in the State of Georgia—comprising as it does eighty thousand communicants. Of these, nearly four-fifths are whites. A portion of the denomination termed Primitive Baptists, numbering, it is said, about ten thousand, are not connected with the Baptist State Convention. The ratio of increase in the denomination is shown in the fact that in 1830 it numbered only thirty thousand. Since that date its communion have nearly trebled. Nor has the increase been alone in its numbers. There has been a corresponding increase in the intelligence of the ministry, the wealth and liberality of its churches, and its missionary, educational, and other benevolent efforts."

RELIGIOUS INTELLIGENCE.

Miss Mary Lamb, of Boston, whose death occurred some weeks since, left a will, in which, after making bequests to twenty-two of her cousins, relatives and friends, she gives twelve donations of one thousand dollars each to benevolent societies in the vicinity of Boston. These organizations are as follows:—Seaman's Aid Society; Needle Woman's Friend Society; Unitarian Benevolent Fraternity of Churches; Association for Aged Indigent Females; Society for Prevention of Pauperism; Asylum for Girls; Farm School at East Boston; State Reform School; Asylum for the Blind; Warren street Chapel; Girl's Reform School; Home Society for Destitute Children.

The late Melville Wilson, Esq., of Baltimore, made the following bequests: To the American Baptist Publication Society, $2,000; to the Maryland Baptist Union Association, $2,000; to the Widows' and Superannuated Ministers' Fund, $1,000; to the S. Baptist Convention Foreign Missions, $1,000; to ditto. ditto. Home Missions, $400; to the Maryland Tract Society, $1,000; to the Maryland State Colonization Society, $800; to the American Sunday School Union, $1,000; to the American Indian Missionary Society, $400; to the Trustees of Huntingdon chapel, Baltimore county, $400.

A Scotchman, named William Maclure, recently deceased, left the bulk of his property, valued at $300,000, to be appropriated expressly for the purpose of the diffusion of useful knowledge and instruction amongst the institutions, libraries, clubs, or meetings for useful instruction of the working-classes or manual laborers in the United States.

The difficulties between the Executive Committee of the Baptist Missionary Union and its missionaries in Burmah, which were the occasion of the extra meeting of the Union in this city, in April last, were referred, at the annual meeting in Chicago, to a special committee of one from every State represented in the Union, to examine and report the facts in the case to the next meeting.

Gov. Pinney, while in Liberia, encountered a female emigrant who had been there with her children 18 years, whose husband is still a slave in Tennessee. By correspondence he has ascertained that he can be emancipated for $250, and is anxious to go to Liberia to join his family. Gov. P. makes an affecting appeal for means to reunite these whom God joined but man has put asunder.

Rev. Dr. Todd, of Pittsfield, says the Hampshire *Gazette*, is in ill health, and has been voted a vacation of from four to six weeks. He has gone to Saratoga, and may possibly visit Europe. A number of his parishioners have contributed $1,100 to be presented to him as a testimonial of their esteem. A few young men of the parish transmitted $50 to him before he left.

Rev. Dr. Wolff, the eccentric ex-missionary, who has lately tried on Puseyism, has written a letter declaring that Great Britain has degraded herself in waging war against "the most excellent, generous, civilization and freedom and religious liberty loving Emperor of Russia," whom he hopes to see among the glorified saints in heaven.

The friends of missions will be pained to learn that the Rev. Henry Lobdell, M. D., Missionary of the A. B. C. F. M. at Mosul, died in that city on the 25th of March last. Following so soon the announcement that Benjamin, Scudder, and Poor have ceased from their labors, the intelligence is calculated to awaken profoundest feeling.

The bark Cora Burnham left Norfolk a few days since for Liberia. She took out three missionaries of the Protestant Episcopal Church, several other cabin passengers and emigrants, amounting in the whole to one hundred and six. Forty of the emigrants were from Kentucky, twenty-five from Virginia, and some from Maryland.

The Methodists of Cincinnati are agitating the subject of a College for Colored People, under the auspices of that denaminotion. The *Advocate* recommends its location to be as far south as the southern verge of Pennsylvania or Ohio, for the purpose of placing the colored man as far as possible in the climate to which his constitution is adapted.

The General Association of Illinois, at its meeting on the 17th ult., at Chicago, adopted a series of resolutions, reported by President Sturtevant, censuring the American Tract Society for its silence on the subject of slavery. The American Sunday School Union was also condemned for the same reason.

A Methodist minister, Rev. Mr. Collins, is soliciting subscriptions for the speedy erection of a church for his denomination, on the two choice lots, long since selected and donated by the company, near the center of the city plat in Omaha City, Nebraska Territory.

A preacher took passage on one of the Lake Erie steamers on a Sunday lately, and before he had been long on board, he applied to the captain for leave to hold a religious meeting. The captain replied, "No—for any minister who would travel on Sunday is not fit to preach on board my boat."

Died, in Brewer, 16th inst., Rev. Nathan Dole, connected with the Missionary Rooms, Boston, as editor of the publications of the American Board C. F. M., and formerly pastor of the First Congregational church, Brewer. He was 44 years of age.

Bishop Potter, of Pennsylvania, is suffering from long continued ill health, to a degree that induces speculations respecting the appointment of an Assistant Bishop. A division of the diocese is also agitated.

The Presbytery of New Orleans, at their late meeting, suspended Rev. Dr. Richards from the ministry, and cited him to appear at their next meeting, to answer the charge of intemperance.

Three young men in the Rutgers Theological Seminary have offered themselves to the American Board as missionaries to the Dutch Missions—two of whom are sons of the late Dr. Scudder.

On May 23d, the First church of New Orleans accepted the resignation of Rev. Dr. W. A. Scott, and took measures to secure a a successor to the pastoral work.

On the 16th inst., the corner stone of the new "Catholic Congregational church" was laid at Bristol, R. I.

The University of Virginia now contains five hundred and fourteen students.

European News.

By the arrival of the steamer St. Louis at New York, and the Asia at Halifax, we have one week later news from Europe. The principal items will be found below.

The bombardment of Sevastopol was recommenced on the 6th instant, and on the day the steamer sailed a dispatch was received from Lord Raglan, announcing that after a fierce bombardment, the French attacked and carried the "Mamelon" and the "White Tower." The loss both to the Russians and the French was very great, but no figures are given.

Later advices from the Sea of Azoff state that the steam flotilla of the Allies has destroyed above 200 vessels and six millions of rations of corn and flour destined for the Russian army at Sevastopol.

Prussian correspondence says that Austria considers herself released from all engagements to the Western Powers, the latter having refused to conclude peace on reasonable terms.

Americans have recently made money by running cargoes of salt to the Russian Baltic ports, but the speculation is now attended with danger.

A telegraphic dispatch from Cagliarni announces the death of the Bey of Tunis, on the night of the 1st of June. His successor and cousin, Sidi Mohammed Bey, ascended the throne without obstacle.

Horace Greeley was arrested in Paris on Saturday, June 2, and kept in Clichy, the debtor's prison, till Monday, at the instance of a French exhibitor of *objets d'arts* at the New York Crystal Palace, whose goods being broken and injured, he thought proper to sue for damages; the first Director who presented himself being Greeley, he was arrested, after having been in Paris a fortnight. The suit was heard on the 4th of June, when Greeley was, of course, set at liberty.

It will be satisfactory to the world wide circle of admirers of the heroic and devoted Miss Nightingale to learn that, though much weakened by her attack of fever, she is reported to be progressing favorably towards recovery.

California News.

The steamer Star of the West has arrived at New York, bringing California dates to June 1st.

There has been a large fire in San Francisco, destroying some thirty buildings.

The gambling law went into operation on the 17th of May, when all the gambling saloons in the State were shut up forever.

A shocking murder has been committed at Contra Costa, the perpetrators of which have not yet been apprehended. Mr. J. P. Gelmore, residing about 8 miles from Oakland, was the victim.

A fight between two men named Francisco Cruciana and Charles Lambert took place on the Pulgas Rauch, on the 21st ult., in which the former was instantly killed.

The big nugget discovered in Calaveras county last fall, and weighing 160½ lbs., is to be on exhibition at the industrial Fair at Paris.

A sail boat was capsized on the 17th of May in the harbor, and a man named H. J. Mullen, cook of the U. S. cutter Ewing, was drowned. His body was found floating near Mare Island a few days after, and was decently interred.

The total amount of gold bullion deposited in the mint for coinage since May 8th, 1855, is 123,656 08 ounces; number of deposits, 1,118—showing an average of 110 08 ounces from each depositor—value of deposits, $2,230,860. During eight days, counting from May 8th, 40,302 77 ounces of gold were deposited at the United States Branch Mint in San Francisco, valued at about a million of dollars.

SUMMARY.

The misunderstanding between the New York Central and Erie Railroads in regard to passenger fares is likely to come to an open fight—in other words, to a radical reduction of the through rates between this City and Lake Erie on nearly all the trains. The Central managers, we understand, have determined to run an express train from Buffalo, to connect with the Hudson River Railroad at Albany, for $7 50, instead of $9, as heretofore. Other first class express trains will run in connection with the Hudson River Boats, for $6 50; and a second class train is to be put on, to connect with the Boats, for $4. These terms will of course compel the Erie to something like a corresponding reduction, in order to compete with the rival route.

A dispatch dated Troy, June 19, 1855, says: The notorious Henrietta Robinson, convicted in the Rensselaer County Court of the murder of Timothy Lanigan, was this afternoon sentenced, by Judge Harris, to be hung on the 3d of August next. At the conclusion of her sentence, when the Judge commended her soul to God's mercy, she told him he had better pray for his own soul, declaring she was the victim of a political conspiracy, which was calculated to crush a man. She was about to speak further, when her counsel desired her to remain quiet. When about to leave the court room she turned, and pointing her finger towards Judge Harris, solemnly exclaimed—"Judge Harris, may the Judge of Judges be your Judge." Considerable excitement was manifested by the spectators during the time occupied in the passing of the sentence.

Albert J. Tirrell was examined in the Police Court in Portsmouth, N. H., on the 18th inst., on a charge of swindling some sailors belonging to the United States frigate Constitution. The testimony being insufficient, Tirrell was acquitted. The excitement among the sailors was very great, and a number of young men of Portsmouth sympathized with them. Tirrell was escorted to the cars for Boston by a few policemen. A crowd of some four hundred followed, declaring their design to seize and lynch Tirrell. The general cry was, "Kill him!" "kill him!" By extraordinary exertions, he was placed in the cars, escaping with a few bruises.

The President has called Governor Reeder, and other Kansas Territorial officials, to account for speculations in Kansas lands with half-breeds, in violation of the acts of Congress, and tells them they cannot be kept in office unless the impressions now on his mind shall be removed by satisfactory explanations. Governor Reeder has promised to reply when he shall have reached Kansas.

The Connecticut House of Representatives killed off all but one of the proposed amendments to the Constitution. The one striking out the word *white*, so that negroes could vote, was defeated by 20 majority; the one providing that each town should have one and only one representative, was also defeated; but the one which provides that Education shall be the basis of suffrage, passed by a vote of about 3 to 1, and will be submitted to the people for their approval.

The New England Emigrant Aid Society held their first annual meeting at their head quarters, Boston, recently. J. M. S. Williams, of Cambridge, in the chair. A. A. Lawrence, Treasurer, made his report, in which it i stated that the total amount received since the commencement of the Society, was $39,000, of which $10,000 has been received since the fifth of March last, when the society was reorganized under the new act of incorporation.

The number of convicts in Connecticut State prison on the 31st of March last, was 174. Of these 135 were white, and 28 were colored males; 6 white and 5 colored females; 132 born in the United States; 30 in Ireland; 7 in England; 2 in Germany; and 1 each in Switzerland, Poland, and the Island of St. Jago. There are five confined for life for the crime of murder. The directors report the earnings of the prison for the eight months ending 31st of March last, at $12,252 53. Expenditures, $10,299 66. Net revenue, $1,052 87.

The total amount of funds and property appropriated to the purposes of education in Ohio during the year 1854, is $2,266,457 12. The enumeration of youth of the school age, as certified by the county auditors, furnishes an aggregate of 816,400, or 4,451 more than for 1853. The number of schoolhouses in the State is about 10,300, estimated to be worth $3,704,720. Of these 770 have been constructed during the past year, at a cost of $346,944, being an average of $451. The amount paid to teachers is set down at $1,364,431 21.

Mrs. Hitchcock, of Amherst, Mass., wife of Ex-President Hitchcock, is slowly recovering from the effects of her recent fall. For three weeks a set of four teeth, on a gold plate, which she swallowed at the time of the accident, were lodged in her throat, rendering swallowing very difficult, and producing severe spasmodic pains. After three weeks, the teeth passed into the stomach, where they lay for a week, and then passed off.

In the pockets of some dirty clothes which were sent recently to be washed at a public washing-house in Glasgow, there were found £30 in bank notes, upwards of £300 in bank books and bills, besides the title deeds of a valuable property. Fortunately for the party whose carelessness thus exposed valuable property to so much risk, it fell into honest hands, and was immediately restored to the owner.

A society has been established at Manchester, England, to support a mission to the deaf and dumb. A missionary has commenced his labors among his interesting charge; and the other night a lecture was delivered by signs to an audience of these unfortunates. The lookers-on seemed fully to comprehend the instructions addressed to them.

A. A. Lawrence, of Boston, has subscribed $1000 to furnish arms to the free-state settlers in Kansas, and it is said that a quantity of arms and ammunition has been forwarded, including 60 Sharp's rifles. If the Government refuses to protect the settlers in Kansas, these weapons will be useful in vindicating the doctrine of squatter sovereignty.

A. M. Lewellen, who was wounded at the battle of Waterloo, where he was an officer under Wellington, was buried at Ellsworth, Maine, recently, where he had resided for several years in humble circumstances. The Ellsworth papers say he was own brother to lady Raglan, wife of the British commander in the Crimea.

There are large stocks of potatoes in the hands of dealers in Boston at the present time, notwithstanding which, prices are exorbitant. Thousands of bushels will be thrown away, a complete loss, rather than be sold at a price within reach of the poor, half-famished creatures who stay in cellars, attics, etc.

In Toronto, on a recent Sunday morning, in the Church of the Holy Trinity, the creed was chanted instead of being repeated in the usual manner. More than half the congregation immediately left the church, and many more were much dissatisfied at this attempt to introduce Puseyistic observances into the worship.

The Connecticut House of Representatives have voted to repeal the Free Banking Law of the State, and it is understood that the Senate will concur therein. There are thirteen banks in the State organized under the law. It is proposed to give these banks special charters for the price of 2 per cent. upon their capital.

Murders have become so frequent in Mississippi, that the clergy are strenuously urging the more rigid enforcement of capital punishment. Governor Foote once said, that for every two days of his term of two years as Governor of Mississippi, there was a murder perpetrated in the State.

Driscoll, one of the murderers of Fahrenburgh, at Lafayette, Indiana, has been found guilty, and sentenced to be hung. This is the second of the Fahrenburgh murderers who has been convicted. Five others yet remain to be tried.

Thursday, the 14th inst., was observed in New Brunswick as a day of humiliation and prayer for the success of British arms. All business was suspended and the different places of public worship were well attended.

At the late term of the Supreme Court of Rhode Island there were forty-nine petitions for divorce. Thirty-nine of the applications were granted, and of these twenty-nine were from wives. There must be a terrible state of family affairs in Rhode Island.

Mrs. Pauline W. Davis and Mrs. Lucy Stone Blackwell officially announce that the next woman's rights convention will be held in Cincinnati on the 17th and 18th days of October next.

In the Circuit Court for Lewis Co., Kentucky, last week, a suit of slander—Miss Eliza Barkeley vs. William Giddings—was tried, and a verdict rendered for $10,000 damages.

Griffith Roberts, aged 30 years, attendant at the Graefenburg Water Cure at Utica, died very suddenly on the 20th instant, from injuries received while wrestling with a patient.

The Chicago *Democrat* says that immense numbers of cattle and hogs are now being shipped from that city for Eastern markets. The cattle have been brought from Texas and wintered, and are now being sent forward over the Michigan Central and Great Western railroads. A day or two since one train left Chicago with 418 cattle and 1,165 hogs.

The wife of Wm. Olmstead, of Bloomfield, Monroe county, Ohio, on the 3d of June presented to her husband three fine children—one boy and two girls. Weight—five pounds twelve ounces, five pounds four ounces, and five pounds fifteen ounces. One has a white head, one a black head, and the other a red head.

A census of Boston has been completed by order of the city authorities. The result has not been published, but the *Traveler* tells us that the aggregate population will probably not much exceed, if it reaches, 150,000. This is by no means as large as has been expected, and shows a very inconsiderable increase over the census of 1850, which was 136,881.

The Methodist Conference at its late meeting passed a resolution expressing great apprehension that the practice of reading written sermons is on the increase, and recommending all its ministers to continue in the good old method of their fathers, of extemporaneous preaching.

A duel is said to have come off, recently, somewhere in Canada, between Mr. Breckenridge, a relation of *the* Breckenridge of Kentucky, and a Mr. Leavenworth, growing out of a dispute occurring in the Shakspeare Club in this city. The rumor is that both are hit—Leavenworth probably fatally, and Breckenridge bad in the leg.

The Cincinnati *Gazette* relates that a farmer named Robert Truesdale was robbed of $800 by highwaymen, on the road between Covington and Williamstown. He was seriously beaten by the robbers, and a large bull-dog which accompanied him and fought nobly for him, was killed. The villains have not been apprehended.

In Levant, Me., recently, Mr. and Mrs. Twombly went out into a field and took with them their child, in a willow cradle. They built a fire near to the cradle to drive away the insects, and during their temporary absence, the fire spread to the cradle, ignited it, and the child was burned to death.

The election returns from all the Counties in Illinois are now received, and show a majority of 14,060 against the Prohibitory Liquor Law. The total vote was 167,366, the largest vote ever polled in the State. The official returns will probably vary these figures somewhat.

Most of the potatoes brought to Buffalo this spring, from Canada, were from the vicinity of Brantford. They were bought at from four to five shillings per bushel, while they have been sold at from eight to eleven shillings. The cost of transportation is twelve cents per bushel.

The Princeton, N. J., *Press* newspaper office, with the machine shop, iron foundry, and adjoining dwellings, were entirely destroyed by fire on Thursday, June 21. The loss is reported to be very heavy. Insurance small. The fire is attributed to an incendiary.

A Parliamentary return shows that, of the jurymen on coroners' inquests in England, 11,214 were "unable to sign their own names," and 11,336 "had marks opposite their names," the proportions being nearly the same in the two preceding years.

Wm. Franklin Carr, convicted of the murder of his father in Holmesville, Miss., was executed on the 6th instant. He admitted having committed the deed, but said he thought the gun which he fired at his father was empty.

There are but four regularly chartered and recognized cities of New Hampshire, but a fifth is about to be added to the list, as the flourishing town of Dover has made application to the State Legislature for a city charter, and it will no doubt be granted.

Gen. Thomas L. Price, of Jefferson city, who is a contractor on the Pacific Railroad, was robbed a few days since of $8,000, on board the steamboat Sonora. He had just procured the money in St. Louis to pay off the laborers on the road.

Harrison Foster, eldest son of A. Lawrence Foster, of Peach Grove, Va., but formerly member of Congress from Madison county, in this State, was drowned at Oneida Castle on the 16th inst. He was aged seventeen years.

The aggregate population of Kansas is stated at 8,461, whereof 5,088 are males and 3,373 are females. The number of legal votes is 2,877; number of natives of the United States, 7,171; of foreigners 308, and of slaves 192.

In Rutland County, Vt., at this time, not less than 700 men are constantly employed in quarrying marble. And there will be raised, during the present year, not less than 1,000,000 feet of marble.

Col. Nathaniel Buckmaster, who died at his residence in Alton, Ill., last week, was one of the pioneers of Illinois, having moved into the territory in the year 1816, when it was a vast wilderness.

Rev. Dr. Parker, missionary, having at present the charge of the diplomatic relations of our government in China, writes that he will be in this country in about a month to recruit his health.

The Oswego Common Council have invited the Mayors and Councils of Toronto, Hamilton, and Kingston, to participate with them in celebrating the Fourth.

The Springfield *Republican* is informed that the Hadley Manufacturing Company have just succeeded in making a nice article of paper from broom corn stalks.

Mrs. Slingerland, a crazy woman, who murdered her child last fall, in Bethlehem, N. Y., has been sentenced to one year's confinement in the Penitentiary, and to a fine of $500.

The unmarried lady who exhibits the best horsemanship at the next Crawford Co., Pa., fair is to receive a beautiful silk dress from the young men of Conneautville.

A negro woman belonging to Henry E. Williamson, near Griffin, Ga., last week became dissatisfied with working on the farm and hung herself and her two little children.

The First Methodist Episcopal Church in Germany, a really beautiful building, has been completed, dedicated, and occupied.

Barnums' Baby Show was visited on Tuesday (the first day) by 11,867; on Wednesday by 17,940; on Thursday by 14,368, and on Friday (the last day) by 16,745. The aggregate receipts of the five days named, it will be thus seen, amount to $17,395.

A beautiful little girl, 14 months old, daughter of Hon. Albert Alden, of East Cambridge, Mass., was killed recently by falling behind a bed. After lying an hour, her mother found her suspended with the back of her head against the wall, and her chin resting upon the mattress.

The New-Side Covenanters at their late Synod in Pittsburgh, took the initiative step towards displacing the venerable Rouse's Psalmody from their worship. They propose to confine its use to chanting, and to make some amendments.

Rev. David Herron and Rev. Wm. Calderwood have been designated as missionaries to India, by the Reformed Presbyterian Church. A farewell meeting was held in Pittsburgh, in view of their departure, recently.

The suit of Cornutt vs. the citizens of Grayson county, (Va.) for publicly whipping him on suspicion of his tampering with slaves, has been withdrawn, the plaintiff paying costs, amounting to $2,000.

The Garret Biblical Institute, is the designation of a Methodist Theological Seminary, a few miles north of Chicago, lately chartered by the Illinois Legislature. A substantial edifice is already erected, and a full course of study announced.

S. B. Chittenden & Co. are about to build a marble store, at a cost of about $100,000, which will be the largest dry-goods store in New York City, with the exception of Stewart's.

All the members of the Syracuse Annual Conference—Wesleyan Methodists—pledged themselves at a recent session to abstain entirely from smoking, chewing, and snuffing tobacco.

The Nuremberg (Germany) *Courier* states, under the head of Stuttgard, that the corporation of Baisingen, in the province of Horb, have sold their poor-houses to the Jews, and sent their poor to America.

The Emperor of the French has offered 1000 guineas, open to Great Britain and Ireland, for a perfect broke charger for the Empress. He must be thoroughbred, quiet with troops, and stand fire.

Board Meetings.

THE next Quarterly Meetings of the Executive Boards of the Seventh-day Baptist Missionary Society, the American Sabbath Tract Society, and the Seventh-day Baptist Publishing Society, will be held at the meeting-house in Plainfield, N. J., on First-day, July 8th, commencing at 9 o'clock A. M.

Magnificent Floral Gift.

SUBSCRIBERS to the "CHRISTIAN DIADEM" for 1855, are entitled to a splendid steel engraving, the ☞ LILLY AND THE ROSE PERSONIFIED, being given *gratis* to all old and new subscribers who send us only ONE DOLLAR, by mail or otherwise.

Six Copies for Five Dollars.

The Diadem is a strictly moral and religious work—designed for the Christian family without regard to any particular denomination.

FIFTY ENERGETIC BUSINESS MEN are wanted immediately to circulate the "Diadem" throughout the Eastern and Western States. To such as can send good references the very best inducements will be given. Address Z. P. HATCH, Publisher, 9 Spruce street, New York. May 24—3m.

The very Book that every body has been Wanting.

The Book for the Parlor, the Book for the Fireside, the Book for the Professor, and the Book for the Non-Professor.

THE RELIGIOUS DENOMINATIONS OF THE UNITED STATES: Their History, Doctrine, Government, and Statistics; with a Preliminary Sketch of Judaism, Paganism, and Mohammedanism. By Rev. JOSEPH BELCHER, D. D., Honorary Member of the Historical Societies of Pennsylvania and Wisconsin, author of "William Carey, a Biography," etc., etc., and "Editor of the Complete Works of Andrew Fuller," "Works of Robert Hall," etc, etc. Large octavo, 1024 pages, handsomely embellished by nearly two hundred engravings.

This invaluable work is rapidly finding its way among all classes of the American people. The clear, comprehensive, and impartial manner in which the learned author treats each and every denomination, is winning for him golden opinions from the highest authorities in the land. The innumerable lively tales and anecdotes of ministers, churches, and laymen, which he introduces with the articles of faith and all important statistical information, give to the work a life, vigor, and spirit truly delightful. One cannot sit down to it without being convinced that his subject is in the hands of a master, nor rise but with kindlier and more liberal feelings towards the great brotherhood of Christians, under whatever name they bear. Ours is a great, growing, and glorious country, and every family, and every young man, throughout its length and breadth, should have a copy as a text book of all its denominations. Wherever known, it is read, and wherever read, admired. Look at the following from among the very many notices received:

It embodies a vast amount of information relative to the origin, history, and missionary operations of the different religious denominations in this country, presented in a remarkably interesting and attractive manner.—*Rev. John Dowling, D. D., Author of "The History of Romanism," "Judson Offering," etc.*

This is a large and beautiful volume, and will find a cordial welcome in every family.—*Philadelphia Christian Chronicle.*

So far as concerns independence of vision, there can be no question, as Dr. Belcher surveys each sect with the same dispassionate impartiality.—*Epis. Recorder.*

This massive volume embraces a vast fund of information.—*Presbyterian.*

The work is sold by agents, and will furnish a large amount of interesting and valuable information to the families into which it may be received.—*New York Recorder and Register.*

In the account given of the denominations, he is fair, and generally allows them to speak for themselves, as to their history and institutions.—*New York Christian Advocate and Journal.*

It contains a mass of interesting facts and statistics.—*Norton's Literary Gazette.*

Judging from the work, it would be difficult to say what are the religious views of the Editor, so fairly, so dispassionately, so charitably, has he treated each and every sect.—*Philadelphia City Item.*

We presume it will be a standard work in thousands of libraries.—*Littell's Living Age.*

Sold only by agents, to whom certain districts are allotted. For particulars address the publisher,

JOHN E. POTTER,
15 Sansom-st., Philadelphia.

Or, NOYES SPICER, Indianapolis, Ind.

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c. *Spring Arrangements*, commencing April 2, 1855: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M. For Somerville, (way,) at 5.30 P. M.

The above trains connect at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 1, 4 and 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 6 and 9.45 A. M. and 3 P. M.; Somervill (way) at 6 A. M.

New York and Elizabethport.

Leave New York at 8 and 10 A. M., 1, 4 and 5 P. M.

Leave Elizabethport at 7.15 and 9.10 A. M., 1, 3.15 and 6 P. M. JOHN O. STERNS, Superintendent.

New York and Erie Railroad.

ON and after Monday, May 7, and until further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Dunkirk Express at 6 A. M. for Dunkirk.

Buffalo Express at 6 A. M. for Buffalo.

Mail at 8¼ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Accommodation at 12¼ P. M. for Port Jervis and intermediate stations.

Rockland Passenger at 3 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.

Way Passenger at 4 P. M. for Newburgh and Otisville and intermediate stations.

Night Express at 5½ P. M. for Dunkirk and Buffalo.

Emigrant at 6 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5½ P. M.

These Express Trains connect at Elmira with the Elmira and Niagara Falls Railroad, for Niagara Falls, at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicago, &c., and with first-class splendid steamers for all ports on Lake Erie.

D. C. McCALLUM, General Sup't.

Miscellaneous.

The License Law.

BY REV. JOHN PIERPONT.

"For so much gold we license thee,"
So say our laws, "a draught to sell,
That bows the strong, enslaves the free,
And opens wide the gates of hell;
For 'public good' requires that some
Should live, since many die, by rum."

Ye civil fathers! while the foes
Of this destroyer seize their swords,
And Heaven's own hail is in the blows
They're dealing—will ye cut the cords
That 'round the falling fiend they draw—
And o'er him hold your shield of law?

And will ye give to man a bill
Divorcing him from Heaven's high sway,
And while God says, "Thou shalt not kill,"
Say ye, for gold, "Ye may—ye may?"
Compare the body with the soul!
Compare the bullets with the bowl!

Are ye not fathers? When your sons
Look to you for their daily bread,
Dare ye, in mockery, load with stones
The table that for them ye spread?
How can ye hope your souls will live,
If ye for fish a serpent give?

O, holy God! let light divine
Break forth more broadly from above,
'Till we conform our laws to thine,
The perfect law of truth and love;
For truth and love alone can save
Thy children from the hopeless grave.

Foreign Manures.

We are daily making the subject of fertilizers or manures our chief study. How to better husband and apply the stores of the farm yard, is a question of the highest importance to every farmer; and next to this is one every day put to us, viz: "What foreign fertilizers do you advise us to procure?" To the former question we shall often recur in a future series of articles now in course of preparation. The latter we will now briefly advert to. But first let us give one article of our creed, to wit:

No intelligent farmer can afford to buy any foreign fertilizer, until he has first used those produced upon his own farm.

Of foreign manures there are four classes:

1. Those of which the general utility for most kinds of crops and soils has been established.
2. Those which are applicable to special soils or crops.
3. Those worthy of experiments.
4. Those which for at least some crops or soils are valuable in themselves, but whose market value depends upon the honesty of the manufacturers.

1st Class—In this catalogue we can only place unburned bones, ground or dissolved; and genuine Peruvian guano. Leaving out of the question the real or supposed value of the mineral portion of bones, [the phosphate of lime,] we know that they contain a large amount of animal matter, and that there is hardly a plant or crop that grows which is not more or less nourished, fed, or stimulated, by the products of decaying animals. When bones are finely ground, or dissolved in an acid, the animal matter is reduced to a state in which it becomes immediately available. Let the crop be wheat, corn, rye, oats, or other cereals; turnips, carrots, beets, or other roots; the various grasses; or any of the garden plants or vegetables, finely ground unburned bones, or those dissolved, will not fail to increase the growth in a soil properly prepared, whether applied directly to the seed, put on as a top-dressing, or mingled with the soil. The degree of benefit immediately derived will depend much upon the completeness of the grinding, or dissolving, and the consequent readiness of the materials to at once supply the wants of the growing plant. This will also be governed by the amount of the application, the time and mode of using, the sterility of the soil, and the physical condition as respects pulverization, dryness, compactness, &c.

There is at the present time a supply of bone-dust in the principal markets, which can be purchased at prices varying from $2 to $3 50 per barrel of 150 to 300 lbs. The variation in price depends chiefly upon the quality. It is economy always to get the best that can be procured. Bear in mind what we have said about fineness of grinding, if immediate effect is desired. The more coarsely ground will operate less speedily, and last longer. If a soil is comparatively poor, it should be entirely treated to a dose of the fertilizer, and an additional application be made to the seed to supply its first wants, which is a matter of paramount importance, since the first organs being developed, the plant will afterwards better provide for its own wants. If the soil is comparatively rich in vegetable or organic materials, it will then be better to make the application near the seed to supply the first wants alluded to.

We do not know of any artificial preparation in the market, which is manufactured from unburned bones.

Guano.—There are various kinds of this in the market, such as the Peruvian, Mexican, Chilian, African, Patagonian, &c., but our experience and observation is, that none of these except the first named, (and of this only that procured direct from the agents of the Peruvian government,) have a character sufficiently high and definite to warrant farmers in purchasing them. A considerable quantity of some of the others, has been manufactured or revamped in this country, and when brought from abroad there is no guarantee that they are much superior to washed barn yard manure.

Peruvian guano, as usually sent to this country by the authorized agents of the government, consists of the remains of birds and their droppings, which have been dried under a tropical sun, where no rain falls to wash away the more valuable soluble portions. It is much such a compound as would be formed by shutting up in a warm dry roost a number of fowls, and allowing them—well fed the while—to die and dry up, mingled with their droppings. The experience of every farmer is sufficient to convince him, that the compound thus formed would be a valuable fertilizer for any crop. Just such a compound is good Peruvian guano.

What we have said of the manner of using bone-dust, applies to guano, with this exception, that guano is a more caustic substance, and it should never be put directly in contact with plants or seeds. It may be first mingled with a considerable quantity of muck, earth, or manure in the compost heap or otherwise; or it may be mingled with soil by plowing in previous to planting or sowing, or it may be put near the hill and mingled with a quantity of earth, but separated from the seed by a layer of soil; or, finally, where it has not been practicable to mingle it with the soil before, it may be sown broadcast upon the surface after the seed is in the ground. In this case it should be worked into the soil with the cultivator or hoe.

The most effectual mode on poor soil is, to divide it into two portions, plowing the larger portion into the soil for some time previous to sowing or planting, and at the same time intimately mix the other portion with a large quantity of muck or manure, to be applied with seed, after it has lain for a time and lost its causticity. In this way the first wants of the plant are supplied at once, and there still remains another portion for the future nourishment of the extending roots.

Of the exhausting effects of guano upon the soil, we have not room here to enter into the discussion. Suffice it to say, that we have not yet found sufficient reasons, derived from theory or experiment, to believe that guano is ever exhausting, in the proper sense of that word. That, when applied to crops, it supplies their first immediate wants, and developes larger organs for appropriating more speedily what of organic there is in the soil originally, there is little doubt. This is a matter of time and economy. If, for example, a soil contains only organic food for fifty bushels of wheat, and five successive crops of ten bushels each would, by the ordinary course of cultivation, be required to use up all that organic matter, it would certainly be economical to stimulate two crops by an application of guano and get the whole 50 bushels in the two crops, even though the soil should be exhausted at the end of two years instead of five. [Am. Agriculturist.

Guano for Insects.

A correspondent of the *Horticulturist* says: "Some time last summer, while budding some young Peaches I found that ants had taken possession of some ten feet in one row. They very earnestly resisted my attempts to inoculate the trees, inflicting many unpleasant wounds on my hands and arms. In order to disperse the warlike little nation, I sprinkled near a pint of fine guano along the little ridges. This threw them into immediate consternation. I noticed little collections of winged ants huddled close together, and seeming to be quiet, while those without wings ran about in great agitation. The following day not a single insect could be found where the day previous they appeared to be innumerable."

To which we add the following from an unknown source—"We had a very fine melon patch which was well nigh destroyed by the striped bug. The vines had commenced running, and in two or three days the bugs had stripped nearly every leaf. As a desperate remedy, we applied a handful of guano on the top of the hill as far as the vines had run, taking care that it did not fall on the leaf. In twenty-four hours not a bug was to be seen; the vines had assumed a healthy and vigorous growth, and are now loaded with fruit."

Miss Nightingale.

We have in this lady an example of philanthropy worthy of the deepest regard. Says a cotemporary:—"Miss Florence Nightingale is the youngest daughter and presumptive co-heiress of Wm. Shore Nightingale, of Embley Park, Hampshire, and the Lea Hurst, Derbyshire, England. She is, moreover, a young lady of singular endowments, both natural and acquired. In a knowledge of the ancient languages, and of the higher branches of mathematics, in general art, science and literature, her attainments are extraordinary. There is scarcely a modern language which she does not understand, and she speaks French, German, and Italian as fluently as her native English. She has visited and studied the various nations of Europe and has, asceeded the Nile to its remotest cataract. Young, (about the age of the Queen,) graceful, feminine, rich, and popular, she holds a singularly gentle and persuasive influence over all with whom she comes in contact. Her friends and acquaintances are of all classes and persuasions, but her happiest place is at home, in the center of a very large band of accomplished relatives, and in simple obedience to her admiring parents."

She spent several seasons amid the fashionable society of London, but was not satisfied. Her noble heart yearned for a more congenial sphere. She had previously endeared herself to the people of her neighborhood by her labors of love in their behalf, where now her name is cherished as a household word. Therefore quitting the brilliant circles of London, she visited the schools, hospitals, and reformatory institutions of her own country and the continent. Afterwards she spent three months in a German hospital for the cure and reformation of the lost and infirm, attending to its duties day and night and accumulating experience.

Soon after the allied army entered upon their campaign in the Crimea, a cry for help came from the sick and wounded soldiers. A request was sent to Miss Nightingale to form and control the entire nursing establishment of the hospitals at Scutari; and with the most praiseworthy self-denial and devotion, in the face of inconceivable hardships, dangers, toils, and at the risk of health and life, she at once accepted the request, repaired to the scene of suffering, where she still continues, rendering her name illustrious by her energy and heroism. The following incident is related by a correspondent:

"Lately a transport of sick arrived at Scutari. In the hospital, where no bedding could be provided for them, they were laid on the wooden floor of the corridor. Miss Nightingale immediately sent to the pueveyor for beds and mattrasses, but got the answer that no stores could be delivered by him unless he got a regular order on foolscap, signed by the two respective officers and physicians of the hospital. Miss Nightingale sent him word again that she must have the bedding immediately, but promised that the necessary formalities should be complied with as soon as the officers and physicians should return and find time for writing. Meeting with a second refusal, she ordered some twenty convalescents to follow her; went straight to the storehouse, had its doors forced open, and carried away the necessary articles. The store-keeper stood aghast at such unceremonious infraction of his authority, and of all official routine; but the lady said coolly: 'Report to head-quarters that Miss Nightingale has forced open the door, and carried away what was wanted for the protection of the life of her Majesty's sick soldiers on her own responsibility.'"

War, with all its horrors, has indeed some alleviation, when it becomes the occasion of such heroic self-devotion, especially on the part of those not only moving in the highest circles, but also so richly endowed by nature and education. It is rare for nature's nobility to be found coincident with the nobility of fashion. Those who, by their means and opportunities, might be expected to be most useful, are generally found most insensible to the call of charity, and supremely selfish. But such examples as the above should not be rare. It ought to be esteemed by all the highest privilege to do good. It is more blessed to give than to receive. [Morn. Star.

Look into the Cellars.

We hear not a little said of the superiority of country over city residences. Much of this is doubtless true, and yet we think there are some advantages enjoyed by the denizens of many parts of New York city, which are not found generally in the country. We refer more particularly to the freedom from noxious vapors and malaria arising from decaying vegetable matter. Where the streets are supplied with sewers and an abundance of Croton water to wash away all organic matters, including the washes from the sinks, privies, &c., the air is pure compared with that around many farm-dwellings near which are located the barnyards and outhouses.

One of the most fruitful sources of ill health connected with country residences, however, is the impure air from cellars which rises through the different rooms above, and really renders them unfit for occupation during the day, and especially at night. The effluvia from the remains of a heap of potatoes, cabbages, or others vegetables, is quite sufficient to breed a pestilence. At the earliest possible opportunity in the spring the cellars should be freed from every particle of vegetable matter likely to decay. The bottom should be supplied with pulverized freshly-burned charcoal, or chloride of lime; or, in the absence of these, with common lime. Not only health but neatness and comfort will be greatly promoted by white-washing the walls and ceiling. Let cellars also be frequently opened and ventilated. A little early attention to these matters may save you a large doctor's bill, to say nothing of loss and suffering from poor health.

Advantages of Manuring.

In the columns of the London *Times* we find a statement of the results of some experiments made by a distinguished agriculturist on the application of manure to wheat. In the center of a fifty acre field, one acre was left without manure; all the rest of the field receiving 2 cwt. of Peruvian guano per acre in autumn, at the time the seed was sown. The produce of the acre undressed was tested against that of the adjoining one, which had received Peruvian guano, and the result was that one acre with guano yielded 32 bushels of 63 lbs. per bushel, while the acre without manure yielded 25½ bushels of 60 lbs. to the bushel. The difference in money value amounted to £2 12s. 7d., or about $13; while the cost of 2 cwt. of guano in 1853, when applied, was £1, or about $5. There was in this case, then, a profit of $8 from every acre to which the guano was applied, or $400 if the fifty acres had been manured. There was also a superior quality of wheat produced on the manured portion, as shown by the weight per bushel; and this additional advantage also, that the wheat on the manured portion was a week earlier in ripening than the other.

A second experiment is related, which was made to test the value of nitrate of soda and common salt, as a top dressing to wheat in spring. A whole field save one acre in the center, was top dressed in April with 1 cwt. of nitrate of soda and 1 cwt. of salt per acre, given in two applications at the interval of two weeks. The result in this case was also extremely profitable. One acre, with nitrate of soda and salt, yielded 42 bushels, worth £13 13s.; while the acre without manure yielded only 30 bushels, worth £9 15s. The difference between the two acres tested, was greater in this than in the former case. The difference in money value was nearly $15, while the 1 cwt. of nitrate of soda, and the 1 cwt. of salt, together, cost only $5. The profit per acre, in this case was nearly $10.

These experiments are not singular, or beyond ordinary in their results. They corroborate hundreds of others made in this country, and in Great Britain. But they are well entitled to attention, as they may serve to fix upon many minds the impression that farmers possess the power of greatly increasing both the produce and the profit of their crops. Independently of the consideration of profit, the results of the above experiments are interesting. Here are two substances, the application of which, in certain quantities, gives an increase, which may be stated, on an average, of nearly one-fourth to the natural produce.

The Garden.

Few persons who have not been in the habit of cultivating and gathering the products of the garden, are aware how much may be obtained from one, well managed, towards supplying the table, and furnishing a large amount of seasonable, nutritious and, wholesome food for the family. The vegetables and fruits which may be obtained are numerous, and when the management of the garden is reduced to a system, so that a spot is designated for each particular plant it, will be found easy to get it into order in the spring. Constant attention will be necessary to see that the cultivated plants occupy the whole space, and are not left to struggle with weeds and other plants not desired. A few general maxims may be observed with profit.

"Grow nothing carelessly; whatever is worth growing at all, is worth growing well."

Plants when exposed to the action of light, transmit moisture copiously through their leaves; transplanted seedlings, therefore, and cuttings, should be shaded from the sun until their roots are strong enough to supply moisture as rapidly as it is thrown off.

Leaves absorb and give out moisture, and inhale and exhale air; they are, consequently, the most important organs of the plant, and if they are destroyed or injured, the whole plant suffers.

Light is necessary to flowers, that they may acquire their proper hues; when kept in rooms, their places should be as near to the windows as possible.

Lettuce and radishes may be sown each week in the month, which will yield a constant supply for many weeks. Cabbages may be transplanted towards the close of the month for autumn and winter use. Celery may be set in the trench; but if the sun is hot, they should be protected by boards or something else, until they have fairly taken root. Watering with water which has stood in the sun through the day will forward them considerably.

Farming in Illinois.

A correspondent of the Vermont *Chronicle*, who writes from Macoupin County, Illinois, a section of country about sixty miles from St. Louis, says:—

"President Sturtevant, of Illinois College—the most intelligent man with whom I have conversed in the State—expresses the opinion that farming in this region is as profitable as wholesaling in New York city. One thing is certain, the latter would not stand a single day if it were carried on as loosely and with as niggardly a use of capital. Many farmers in Central Illinois are clearing their thousands and tens of thousands per annum. It is said that one in an adjoining County, (recently, if not now, living in an old log house scarcely fit for a railroad shanty,) has received a barrel of silver coin for a single crop. Mr. Strong, of Morgan County, has one farm of eight thousand acres, and another of five thousand, under most judicious cultivation. His profits are estimated at $50,000 to $100,000. Should present prices and facilities for transportation continue, there is no limit to the wealth to be poured into Central Illinois. A man of the least energy can scarcely fail to share in the profits of such a state of things; while industry, intelligence, enterprise, thrift, and capital, are at an enormous premium."

Curious Calculations.

What else could have been done, with the amount of iron fired into Sebastopol in the shape of cannon balls, in the late thirteen days' bombardment? If rolled into bars, those cannon balls would form a railroad from New York to Albany. Now we have our little addition to make to these double-view statistics. A young lady, some time since, sent us one of her hairs, as a curiosity of length. It was wound round a card, and the two ends fastened with sealing-wax; and we never had thought of unwinding it, till, at the suggestion of some friends chatting in our library the other evening, we did so—finding, to our surprise and theirs, that it is of the wonderful length of seven feet and one inch! It is of the most beautiful auburn golden. We will show it to any friend who has the curiosity to see and measure it. But what length of electric telegraph would this lady's hair make if extended in a line? The average number of hairs in a head has been stated at two hundred thousand. Her golden locks, therefore, would reach, like the Sebastopol iron, from New York to Albany, and a little over. A lady's head may make a one hair telegraph of two hundred and sixty-eight miles! We shall hear next, how many of the poet's "burning words" would propel a steamboat of the "People's Line." And, P. S. We have just recalled another specimen of the double view, which we clipped from the *Transcript*, a week or two since:—"Mr. Ewbank, in one of his mechanical essays, thus speaks of the miles of clothes we wear. He says: 'In winter a lady is enwrapped in a hundred miles of thread; she throws over her shoulders from thirty to fifty in a shawl. A gentleman winds between three and four miles around his neck, and uses four more in a pocket handkerchief. At night he throws off his clothing and buries himself like a larva in four or five hundred miles of convolved filaments." [Home Jour.

The Camel Expedition.

The long talked of expedition has at length been organized and is about to sail from New York. Lieut. D. D. Porter, United States Navy, has command of the ship which is to transport the camels and stores; and we believe Major Wayne, of the Army, is in charge of the party which is to procure the animals.

It is the intention of the latter officer to visit Egypt, Nubia, Arabia, and such other countries of the East as produce the camel, where he will examine the different varieties, study their habits, and select such as, in his opinion, are best adapted to the climate and food of the district where it is proposed to introduce them. The camel is as greatly improved by careful raising, and by the selection of good varieties, as the horse is; hence, it may not be in the countries originally indigenous to these animals that those best suited to our wants will be found.

The camel of Egypt, used to a hot, dry and little varying climate, would not be adapted to the changeable climate and cutting northers of Texas. Yet it might answer well for the region on the Pacific slope of the Rocky Mountain range bordering on Mexico, where the arid deserts occur. The Persian or Bactrian camel, which is used on the steppes of Siberia and the plateaus of Central Asia, will doubtless be found the best adapted for our prairies and the Rocky Mountains. The experiment is a most important one, and if successful will revolutionize the present mode of traveling across the prairies, but more particularly the desert regions, where water and grass are scarce. It is not to be supposed that the use of wagons is to be dispensed with, for we believe that where there are roads, good grass and plenty of water, there is nothing so convenient or so economical for transporting heavy goods or army supplies as the large Pennsylvania wagons. [Prov. Jour.

A New Mode of Taking Impressions of Plants, Insects, or Flowers.

Mr. Loosey, the Austrian Consul General, recently presented to the Farmer's Club a book containing several beautiful and striking impressions of plants and flowers, which have been taken by a singular process discovered in the Imperial printing establishment in Vienna. The likeness produced by this original and clever method is wonderfully correct. Nature, in fine, is copied to the utmost perfection. The mode of procedure is aptly termed, in the German language, "Natur selb stdruck," or Nature's self-printing process. If the original, of which a copy is to be taken, be a plant, flower, insect, or any vegetable substance, it is placed between a copper and lead plate, brought close together with screws, when two heavy rollers are passed over them. The original leaves itself impressed on the lead plate with its whole surface.

If the colors are applied to the lead, as in printing copper plate, then a striking resemblance is got in one impression; but if a great number of copies be required, the lead plate will not give it, on account of its softness. However, if the impressions are to be printed on a typographical press, it is stereotyped from the lead plate, and as many copies produced as may be required. If it is to be multiplied by copper plate printing, the galvanizing process is had recourse to. The originals are covered with dissolved gutta percha, which, when removed, is covered with a solution of silver—thus rendering it fit for a matrix for galvanic multiplication.

This new discovery is of great importance for scientific purposes, as students in natural history will be enabled to obtain the most accurate copies of plants, insects and other things relating to that branch of study.

Eyes and Cold Water.

The aquatic furor has become so general, that for the simple reason that cold water is a pure, natural product, it is claimed to be a universal and beneficial application. Arsenic is a pure, natural, and simple product; so is prussic acid, as obtained from a peach kernel. A single drop of tobacco oil will kill a cat or dog in five minutes.

Many persons are daily ruining their eyes by opening them in cold water of mornings. Cold water will harden or roughen the hands, and much more will it do so to the many-fold more delicate covering of the eye, or, the eye will, in self-defense, become scaly in the manner of a fish; that is, the coats of the eye will thicken, constituting a species of cataract which must impair the sight. That water, cold and harsh as it is, should be applied to the eye for curative purposes, in place of that soft, warm, lubricating fluid, which nature manufactures for just such purposes, indicates great thoughtlessness or great mental obliquity. Nothing stronger than lukewarm water should ever be applied to the eye, except by special medical advice, and under special medical supervision; for we have only one pair to lose. Even warm water should be applied only by closing the eye and flapping it against the lid with the had, patiently, scarcely letting the fingers touch the lid. This cools the eye more rapidly than cold water does, and without the shock, while its soothing effect is delightful, dissolving or washing out the yellow or other matter which may have accumulated over night, in half the time required by cold water. [Journal of Health.

SUBSOILING AND CHARCOAL FOR STRAWBERRIES.—Mr. W. Saunders, in a recent number of the Germantown *Telegraph*, in an excellent article on "Strawberry Culture," says:—

"This leads us again to the foundation of all permanent improvement—*Subsoil Culture.* Trench the soil at least eighteen inches in depth, incorporating a heavy dressing of well decomposed manure, and if the soil is clayey, or adhesive in its nature, an application of charcoal dust will be highly beneficial. As a corrective for clayey soils, charcoal cannot be too highly recommended. In a physical view, it renders the soil porous and permeable to gases; and chemically, its absorbing and disinfecting properties are equally valuable, the amount of ammonia, and other gases which it is capable of absorbing giving it a value as a fertiliser. On a soil thus treated, there will be no danger of defective, half-ripened crops, or the plants burning out, as frequently happens on shallow soil, for although the strawberry is a plant of small structure, I have traced the roots in favorable soils a distance of three feet from the surface.

VARIETY.

Professor Bierordt has been exhibiting a machine at Frankfort, Germany, to record on paper, the beatings of the pulse. The arm of the patient is placed on a longitudinal cradle, and screwed down to keep it sufficiently steady. A small erection on one side holds a sort of lever worked on a hinge, at the end of which a pencil is inserted, the point of which has been dipped in India ink. This goes into a cylinder upon which paper has been stretched. The lever rests upon the pulse, and at every moment records the action upon the paper. If the pulse is steady a regular zig-zag line is drawn on the paper, but in cases where the pulse is rapid and jerking, the line goes up and down, making long and uneven marks.

Mr. Thomas Wilson, formerly a Dutch merchant, has propounded a plan for opening canal communication between the Black Sea and the Danube, from a point in the Bay of Kostendje to a part of the river between Chernavoda and Rassova. The line followed being nearly identical with that of the remains of Trajan's Wall. The distance would be little more than 30 miles, and would save about 250 miles. It is said the Turkish authorities in London look favorably on the project.

It is said of Dr. Emmons, that, having invited a clerical friend to preach his funeral sermon, he one day expressed a wish to hear the discourse, which had been for a long time ready and awaiting his tardy demise. As the reader proceeded, Dr. Emmons, with his habitual fondness for criticism, interrupted him with some slight correction; whereupon the author rejoined in a solemn tone—"Hush, hush! Dr. Emmons; you forget, sir, that you are *dead.*"

A Scotch lady, who had risen rapidly from the kitchen to grace the head of her master's table, was one day entertaining a large party, when the conversation happening to flag, one of the guests remarked—"*Awful pause!*" "And what's your business with my *awful paws?*" in wrath retorted the landlady; "if you had scrubbed the house as long as I hae done, your *paws* would nae hae been sae bonnie and white as they are."

Sir Walter Scott, in his article in the *Quarterly Review*, on the Culloden papers, mentions a characteristic instance of an old Highland warrior's mode of pardon. "You must forgive even your bitterest enemy, Kenmuir, now," said the confessor to him, as he lay gasping on his death-bed. "Well, if I must, I must," replied the chieftain; "but my curse be on you, Donald," turning towards his son, "if you forgive him."

Louis the Fourteenth once desired Fagon, the physician of the court, to deliver a philippic against the use of tobacco. The learned doctor proceeded with due solemnity with his task, but astonished the multitude, amidst one of his grandest flights of eloquence, by producing his box, and taking a lusty pinch; and then, evidently unconscious of his inconsistency, he resumed the thread of his denunciations with increased vigor.

If any author is wise, (and we never met with an author who was not one of the wisest of men,) he would never write a Preface; for in that preface he generally tells what his book is about, and the critic, knowing that, never reads his book.

During a period of 138 years the first born of the Austrian royal family has, it is said, always been a girl.

New Steamboat Line for Albany and Troy.

From Pier 15, foot of Liberty-st., at 6 P. M.

STEAMER RIP VAN WINKLE, C. W. Farnham, Commander, Monday, Wednesday and Friday, at 6 o'clock, P. M.; steamer COMMODORE, L. Smith, Commander, Tuesday and Thursday, at 6 o'clock, P. M., and SUNDAY, at 5 P. M.

Fares: Saratoga, $1 50; Moreau, $2 15; Fort Edward, $2 15; Whitehall, $2 75; Castleton, $3 10; Rutland, $3; Burlington, $4; Rouses Point, $5 50; Montreal, $7 50.

These Boats will arrive in Albany or Troy in ample time to form connections with all the Railroads, North, East or West, enabling passengers to reach Montreal and intermediate points the same day.

These Steamers are of the first class for strength and speed—well known favorities of the public—having been thoroughly overhauled during the past winter, and offer every accommodation that can be desired by either freighter or traveler.

Through tickets can be obtained on board the boats for Saratoga, Moreau, Fort Edward, Whitehall, Castleton, Rutland, Burlington, Rouse's Point and Montreal.

The Northern Freight Express will give Bills of Lading to all points as above named. Shippers who desire it, can have time receipts, by applying at the office on the Pier. A. A. DYKEMAN.

Ayer's Pills.

A NEW and singularly successful remedy for the cure of all Bilious diseases—Costiveness, Indigestion, Jaundice, Dropsy, Rheumatism, Fevers, Gout, Humors, Nervousness, Irritability, Inflammations, Headache, Pains in the Breast, Side, Back, and Limbs, Female Complaints, &c., &c. Indeed very few are the diseases in which a Purgative Medicine is not more or less required, and much sickness and suffering might be prevented; if a harmless but effectual Cathartic were more freely used. No person can feel well while a costive habit of body prevails; besides, it soon generates serious and often fatal diseases, which might have been avoided by the timely and judicious use of a good purgative. This is alike true of Colds, Feverish symptoms, and Bilious derangements. They all tend to become or produce the deep seated and formidable distempers which load the hearses all over the land. Hence a reliable family physic is of the first importance to the public health, and this Pill has been perfected with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing any thing hitherto known of any medicine. Cures have been effected beyond belief, were they not substantiated by persons of such exalted positions and character as to forbid the suspicion of untruth.

Among the eminent gentlemen who have testified in favor of these Pills, we may mention:

Doct. A. A. Hayes, Analytical Chemist of Boston, and State Assayer of Massachusetts, whose high professional character is endorsed by the—

Hon. Edward Everett, Senator of the United States.

Robert C. Winthrop, Ex-Speaker of the House of Representatives.

Abbott Lawrence, Minister Plen. to England.

†John B. Fitzpatrick, Catholic Bishop of Boston; also

Dr. J. R. Chilton, Practical Chemist of New York City; endorsed by

Hon. W. L. Marcy, Secretary of State.

Wm. B. Astor, the richest man in America.

S. Leland & Co., Proprietors of the Metropolitan Hotel, and others.

These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compounded not of the drugs themselves, but of the medicinal virtues only of Vegetable remedies extracted by Chemical process in a state of purity, and combined together in such a manner as to insure the best results. This system of composition for medicines has been found in Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any process. The reason is perfectly obvious. While by the old mode of composition, every medicine is burdened with more or less of acrimonious and injurious qualities, by this each individual virtue only that is desired for the curative effect is present. All the inert and obnoxious qualities of each substance employed are left behind, the curative virtues only being retained. Hence it is self-evident the effects should prove as they have proved, more purely remedial, and the Pills a more powerful antidote to disease than any other medicine known to the world.

As it is frequently expedient that many medicines should be taken under the counsel of an attending physician, and as he could not properly judge of a remedy without knowing its composition, I have supplied the accurate Formulæ by which both my Pectoral and Pills are made, to the whole body of Practitioners in the United States and British American Provinces. If however there should be any one who has not received them, they will be forwarded by mail to his request.

Of all the Patent Medicines that are offered, how few would be taken if their composition was known! Their life consists in their mystery. I have no mysteries.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject freely acknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many eminent Physicians have declared the same thing of my Pills, and even more confidently, and are willing to certify that their anticipations were more than realized by their effects upon trial.

They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.

Prepared by Dr. J. C. AYER, Chemist, Lowell, Mass. Price 25 Cents per Box. Five Boxes for $1 00.

Sold at wholesale in New York by A. B. & D. SANDS, retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere.

The Sabbath Recorder,

PUBLISHED WEEKLY
By the Seventh-day Baptist Publishing Society,
AT
NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the time to which they reach.

☞ No paper discontinued until arrearages are paid, except at the discretion of the publisher.

☞ Communications, orders, and remittances, should be directed, post paid, to

GEO. B. UTTER, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

VOL. XII.—NO. 4. NEW YORK, FIFTH-DAY, JULY 5, 1855. WHOLE NO. 576.

The Sabbath Recorder.

TO "D. E. M."

Allow me to ask an explanation of some of your statements made in defense of the science of Geology.

First—You say that the earth was once in a state of igneous fluidity (liquid fire.) Was that before or after the waters were commanded to be gathered together into one place, and the dry land to appear. Gen. 1: 9. And how could it be called dry land, while it was molten lava? And why did not that vast body of liquid fire boil away the entire ocean, and convert it into salt?

Second—I understand you to say, that the crust of the earth is fifty miles thick; that the stratified rocks are ten miles deep. How were these facts (if they are facts) ascertained? I understand you to say, that this crust was formed by the cooling of the earth, which commenced on the outside; and that this crust is, in fact, composed of and contains the remains of vegetables and animals to its entire depth—those of the lowest organization lying lowest in the rocks; that it contains seven distinct groups, comprising 30,000 different species of plants and animals. You say that when, by the cooling of the crust of the earth, it was no longer adapted to their organization, they died and were buried, became petrified, and produced the appearances which the rocks now exhibit. Do you wish to be understood, that all these plants and animals existed in melted lava (liquid fire) until, by the cooling of the crust, they of necessity died and formed a part of said crust; and by parity of reasoning, shall we understand that the center of the earth, which you say is now molten lava, 7,900 miles in diameter, is now teeming with vegetable and animal life, and as it continues to cool and add to the crust below, it will exhibit similar appearances as the rocks do at present? Or would you wish to be understood, that the fifty miles of crust has accumulated since creation? The Irishman, when asked to explain how a chipmuck dug his hole without fetching out any dirt, said he began at the lower end to dig. How you are to explain the above, and make it appear reasonable, is a problem not so easy to solve. If this earth has increased 100 miles in diameter since its creation, I ask where the materials came from to enlarge it? And if it was once in a state of igneous fluidity, what is the reason that the lava thrown from volcanos, after cooling, does not exhibit the same appearances as the rocks do, which you contend were formed in a similar way, by the cooling of the outside of that body of liquid fire?

I am willing that geology should have its full due;
I will believe all I can, to accommodate you;
But that you are in a tight place, where it's not easy to get out,
After looking it all over, I have no reason to doubt.

It will be recollected, that the separation of land and water took place on the third day of creation; and that on the same day God commanded the earth to bring forth grass, and herbs, and trees yielding fruit after their kind, whose seed was in itself, and it was so. I think it must be admitted, that grass, herbs, and trees, came into existence, and came to maturity, bearing seeds and fruit, the same day. Now, how can it be shown that hundreds of years intervened between the second and fourth days of creation, and so give time for the crust spoken of to form by cooling, and soil to accumulate, and fit up the earth for the reception of grass, herbs and trees, and produce the same? Is there any good reason to expect or believe that the earth, on the third day of creation, was materially different from what it now is? On the fourth day the lights were created and placed in the firmament of heaven, &c. On the fifth day, God commanded the waters to bring forth the moving creature that had life, and fowl, &c., to fly above the earth; and God created great whales. Are we to understand that they were created very small at first, or grew from spawns, &c. I had always supposed that the waters on the fifth day exhibited similar appearances to what they now do, containing the living creatures of all sizes and descriptions. On the sixth day God created the beasts of the earth, and creeping things, &c., and on the same day he made man, male and female, and we are told that Adam gave names to all the beasts of the earth, &c. Are we to understand that the beasts and man were created of full size, or are we to understand that Adam and Eve were created little children?

With regard to the caves of the earth spoken of, were they created so with the earth, or have they been produced by natural causes; which, continuing to operate, will produce more. I had supposed that the stratified rocks, the marble quarries, the limestone quarries, the coal beds, the metalic ores, the mountains of chalk, both red and white, and the soil of different countries used for paint and other purposes, were all created, in great wisdom and foreknowledge, for the special use of man; that Adam, by digging, could have found stratified rocks, or stone quarries, and loose stone in the soil and on the surface of the earth without digging. I have no doubt that beds of coal, and all the different ores, existed in his time; that the natural bridges and the caves existed, and Niagara Falls were there, or near where they now are; that the lakes were located where they now are, and that St. Lawrence river emptied then into the ocean; I think very few men will ever doubt. That the process of petrification is going on to some extent in certain places, is not doubted nor disputed; but that fifty miles of the surface of the earth is made up of decayed and petrified vegetable and animal substances, is not only improbable, but very unreasonable to ask any one to believe. That Mr. M. is candid in his belief of the great antiquity of the earth, I do not doubt; I think hypothesis has taken the place of reason, and led him astray; his suppositions are somewhat plausible, at first view, but do not seem to bear the test of examination in reason or scripture. In reading the history of creation we may notice, that about so much was created and done each day for six days; setting us an example of industry and perseverence, a steady, progressive, onward course in business.

SECUNDUM NATURUM.

TO "NO SCIO."

In the *Recorder* of June 21st, a writer over the above signature addresses a note to me, attempting to rehearse certain propositions of mine in relation to "*Geology and the Bible*," and asking me "to give the demonstration, and not hypothesis." As the request seems to be made in the spirit of candid inquiry, and is in itself proper, I take great pleasure in complying with it. As the writer promises "more anon," it will be but reasonable in me to ask a favor in return. That favor is, simply, that he will subscribe his own name to what he writes. This request is reasonable, in the first place, because it is always unpleasant to hold correspondence with an incog. writer; and, in the second place, because what he writes will have more force, backed up by a responsible name, than when subscribed by no name at all. I have just received a letter, without name or date, from some good friend, no doubt, declaring that he can "stand it no longer," without giving vent to the disgust he feels at my writings, and his holy horror at their atheistical and infidel tendencies. This good friend even suggests, that I had better go down to old Virginia, and occupy the place among the spiritual rappers lately vacated by Elder Scott; and thinks I might get an interview with the spirit of Moses, and learn something new about the creation of the world. To all such *opponents (?)* I say, Hold your temper, good friends, and don't be alarmed about my taking what you say as an insult; O, no! *such communications* are the last *things* in the world that I should take as an insult. Allow me, good friends, however, just to hint, that you had better come up *manfully*, and openly take the bull by the horns, or else keep out of the arena. It does look *a little* cowardly to skulk behind fictitious names and anonymous letters.

But to the request of "No Scio" I most cheerfully respond, hoping that his "more anon" may shed new light on a subject so deeply interesting to the lover of nature and revelation.

The writer states three propositions, which he affirms I have declared to be demonstrated truths, and his request is, that I "give the *demonstrations*." Those propositions are—

1st. That the stratified crust of the earth is at least ten miles thick.

2d. That the solid crust is fifty miles thick, and below to the center of the earth consists of melted lava.

3d. That by the use of Wm. Herschel's telescope, stars can be seen so distant, that their light would not have reached the earth short of two million years, which would place them distant from the earth something more than twelve quintillions one hundred and nine quatrillions eight hundred and twenty trillions, allowing light to travel one hundred and ninety-two thousand miles in a second of time.

The manner in which my correspondent has stated these propositions, indicates that he has not *carefully* read my articles. The *first* and *third* of the above statements are not given as "*hypotheses*," to be demonstrated by any course of reasoning, but as actual facts, arrived at by accurate measurement.

On the first point, my statement was this, (see *Recorder*, May 31st,) "The rocks which compose the solid crust of the earth exist in two forms, *unstratified* and stratified. The stratified rock covers the greater part of the earth's surface to an average depth of about ten miles. If I affirm that the monument on Grotan Heights is 127 feet high, and my friend "No Scio" demands "demonstration, not hypothesis," my reply is, I have given no hypothesis, but stated a fact, ascertained by *actual measurement*. Now, if "No Scio" disbelieves the statement, let him go and measure it himself, and that will be all the demonstration he will need. When I stated that the stratified rock was about ten miles thick, it was no *hypothesis to be demonstrated*, but a *fact* to be believed. If "No Scio" don't believe it, let him measure it himself, and show how far my statement differs from the result of his measurement. If he wishes to know *how to measure the thickness of the stratified rock*, let him ask, and it shall be given; but let him no longer confound a *fact* to be arrived at by *actual observation*, with an hypothesis to be proven by the process of demonstrative reasoning.

My statement referred to in "No Scio's" third head, is of precisely the same character. It is *no hypothesis* that there are stars at given distances from the earth. The distance of a star from the earth can be measured as accurately as the distance of one city from another on the earth's surface. If "No Scio" doubts the *fact* that Sir Wm. Herschel saw stars through his telescope so distant that it required millions of years for their light to reach the earth, let him go and look for himself, and having thoroughly learned the principles of astronomical science, let him measure the distance to the most remote stars which the telescope reveals, and see how long it must have taken their light to reach the earth.

In relation to these two points, then, I have no "demonstrations" to give, for the statements I have made are *facts*, and not "*hypotheses*." All my correspondent has to do in the premises is, to show that I have given a wrong measurement to the thickness of the stratified rocks, and the distance of stars; or, the facts being admitted, that my inference of the great age of the earth is incorrect. If I am incorrect in either particular, I shall be happy to be corrected.

The writer closes by saying, "I would further ask, does it follow as a demonstration, that because trees now grow from seed, and a hundred years or more are required to bring them to maturity, that God did not create trees at maturity before they grew?" To this inquiry it is sufficient to reply, that since I have made no affirmation such as it implies, it is irrelevant to the subject, and demands no "demonstration" from me. When I affirm, that "God did not create trees at maturity before they grew," it will be time enough for me to be called upon for "demonstrations."

It only remains, then, for me to notice the second item in my correspondent's list of things to be demonstrated. I have reserved this for the last, because it refers to an hypothesis which I put forth, and is *really* a thing to be "demonstrated."

What I have said on this subject was in the following words, (*Sabbath Recorder*, May 31st): "Its (the earth's) surface, after the passage through a few feet of loose soil and water, is composed of solid rock, to the depth of about fifty miles, when the solid, by insensible degrees, becomes fluid, and all the vast cavity beneath is filled with melted lava, such as is thrown from volcanoes during eruptions. This solid crust is constantly growing thicker by the radiation of internal heat, which passes into the space around the earth. Now evidence is abundant that the solid crust was once fluid, and hence, that it has become solid by this process of radiation, as the law of radiation is universal, and must have acted in all times." I further stated, that "I deemed the above statement susceptible of the most ample demonstration. To that demonstration I now most cheerfully proceed.

The *facts* which confirm the above hypothesis are numerous and well attested, among which are the following:

1st. The earth is flattened at the poles about thirty miles. This flattening is the result of its rotary motion on its axis, in consequence of the greater centrifugal motion at the equator. This would not have occurred, had it always been solid, as it now is, on its surface. The same thing will occur if a ball of putty, or any soft substance, be rapidly revolved around its axis. The amount of depression from this cause will be proportionate to the velocity of rotation. Now, the depression of the earth at the poles is just such as its velocity would produce if it were in a melted state. This fact, I think, has some weight, and indicates with some certainty the former fluid state of the earth.

2d. The chrystaline character of the unstratified rocks shows most unmistakably that they were once in a melted state. No scientific observer can look upon the structure of these rocks for a moment, and fail to see the evidence of fire on them. This feature becomes more marked as we descend towards the center of the earth, thus showing a gradual cooling of the surface.

3d. Intimately connected with the last fact is this, that the vegetation embedded in the most ancient and lowest fossiliferous rocks, shows most strikingly, that the climate, even in the frigid zones, was warmer than that in the present torrid zones.

4th. The evidences of vast and tremendous convulsion, seen in the rupture and upheaving of the stratified rocks, and in the elevation of the present continents from under the waters of the ocean, are just such as would result from a mass of liquid fire gradually cooling down. These convulsions, which have left their terrible footprints on the crust of the earth, were on a scale of magnificence which demands no less a cause than is found in the hypothesis under consideration.

5th. Earthquakes and volcanos now existing exhibit evidences of the same tremendous ocean of fire beneath our feet. There are now existing over three hundred active volcanos, some of which periodically, and others continually, vomit up from their subterranean depth oceans of liquid fire, which often run over fertile fields, drying up rivers, and burying cities in their devastating course. Three of the most magnificent cities of Italy now lie buried beneath the dreadful rivers of fire which Vesuvius has thrown up from her exhaustless reservoir in the bowels of the earth. But still Vesuvius cannot rest, but is at this very moment disgorging vast oceans of fire, and developing more tangible evidence of the truth of the hypothesis under consideration than my poor pen can indite. Beside this, Etna and Stromboli, and hundreds of others, are active in giving ventilation to the dreadful depths of fire that still rage beneath the earth's surface. And besides these three hundred active volcanos, there are a still greater number which have become extinct, showing that the earth is gradually cooling off. These ancient volcanos were of much more gigantic proportions than those now active, as is shown by the vast amount of lava which they disgorge, and the size of the craters which are still discernible, both on land and beneath the sea. This is just as might be expected, since the crust was then thinner, and the boiling mass burst out more frequently and in large quantities. Will "No Scio" please "demonstrate" what is the cause of these vast and numerous furnaces of fire, if they do not proceed from the melted interior of the earth, and why they are less numerous now than in former times, if the earth is not cooling off, as my hypothesis claims?

6th. But there is one other fact which I will adduce, which is alone, in my estimation, ample proof of the hypothesis of internal heat. By experiments made in all parts of Europe and America, and under every possible precaution, it has been found, that the temperature of the earth actually increases rapidly as we descend into it. The mean rate of increase has been stated by the British Association to be one degree of Fahrenheit for every forty five feet of descent. No exception has ever occurred to this general fact. Now, at this rate of increase, all known rocks would be melted at the depth of a little more than fifty miles. This simple fact amounts to little less than proof positive of the doctrine; but when taken in connection with the foregoing, and others not mentioned, the proof is highly conclusive. In dealing with the last fact, the opposer has to show cause why this increase of heat, as we descend into the earth, ceases at some point below that already explored. To the depth of several thousand feet, this increase is uniformly observed, and under circumstances to preclude the possibility of being caused by anything above the earth. Now, can "No Scio" demonstrate that this increase ceases below the point of observation? The inference is almost inevitable, that it continues right on below that point the same as above it. It must, then, be sufficient to melt all the rocks at the depths above specified.

Such is the demonstration I offer of the hypothesis I have put forth. These facts impress the hypothesis on my own mind with all the force of demonstrated truth. If these facts do not appear so conclusive to my interrogator, will he please explain them, singly and collectively, on some other hypothesis? They are facts which demand explanation. Come, then, let us reason together.

I wish, in closing, to call the reader's attention to the bearing of the points above referred to on the discussion of the world's age; for *that* is the real question at issue. I have affirmed, that the earth bears evidence of great age, and adduced the hypothesis that it was once in a melted state, from which it is now gradually cooling off, and that the amount *already* cooled off and consolidated has required vast ages of time. I have stated, that I did not deem this necessary to sustain my position, although it seems very conclusive. The principal proof on which I relied, was the deposition of the stratified rocks to the depth of about ten miles, and the imbedding of numerous races of plants and animals to the depth of about seven miles. All this vast deposit must have occupied an immense length of time; but all this time was subsequent to the time employed in cooling the crust sufficiently for water to accumulate on the surface to commence the process of denudation and stratification.

I shall be most happy to throw any further light which I may be able to, on any points involved in the discussion, and will most gladly retract any position which may be shown contrary to nature or revelation. D. E. MAXSON.

Waterford, Ct., June 25th, 1855.

THOUGHTS OF HEAVEN.

If heaven doth not enter into us by way of holiness, we shall never enter heaven by way of happiness. If you would lay up a treasure of glory in heaven, lay up a treasure of grace in your hearts. If your souls are rich in grace, they will be rich in glory. The more you do for God in this world, the more God will do for you in the world to come. As heaven is kept for the saints by Christ, so they are kept for heaven by the Spirit. In heaven all God's servants will be abundantly satisfied with his dealings and dispensations with them; and shall see how all conduced, like so many winds, to bring them to their haven; and how even the roughest blasts helped to bring them homewards. How can we expect to live with God in heaven, if we love not to live with him on earth? If thou lovest to worship God here below, God will take thee up to worship him above. Thou shalt change thy place, but not thy employment. Heaven is a day without a cloud to darken it, and without a night to end. We would be seated in the heavenly Canaan, but are loath to be sacrificed with the briers and thorns of the wilderness. [Mason.

COMMONPLACE WOMEN.—Heaven knows how many simple letters, from simple-minded women, have been kissed, cherished, and wept over by men of far loftier intellect So it will always be to the end of time. It is a lesson worth learning by these young creatures who seek to allure by their accomplishments, or dazzle by their genius, that though he may admire, no man ever loves a woman for these things. He loves her for what is essentially distinct from, though not incompatible with them—her woman's nature and her woman's heart. This is why we so often see a man of high genius or intellectual power pass by the De Staels and the Corinnes, to take unto his bosom some wayside flower, who has nothing on earth to make her worthy of him, except that she is—what so few of your "female celebrities" are—a true woman.

LIFE'S BETTER MOMENTS.

Life has its moments
Of beauty and bloom;
But they hang like sweet roses
On the edge of the tomb.
Blessings they bring us,
As lovely as brief;
They meet us when happy,
And leave us in grief.

Hues of the morning
Tinging the sky,
Come on the sunbeams,
And off with them fly.
Shadows of evening
Hang soft on the shore;
Darkness enwraps them,
We see them no more.

So life's better moments
In brilliance appear,
Dawning in beauty,
Our journey to cheer.
Round us they linger,
Like shadows of even;
Would that we, like them,
Might melt into heaven.

To the Editors of the Sabbath Recorder:—

I find the following article in the New York *Chronicle*, Vol. 6, No. 30. The only changes I have made in it, are to make it read *Sunday-keeping* instead of *Infant Baptism*, and omit a single paragraph on infant communion, and put one papist in the place of another. The conscientiousness of the writer, and the purity of his motives, are sufficiently apparent to be allowed by all candid readers; but I would be glad to know how he can maintain either, if, when he looks again into the great mirror of truth, he looks exclusively on the anti-Protestant appearance of Infant Baptism and refuses to look on the anti-Protestant appearance of Sunday-keeping? S. D.

SUNDAY-KEEPING *vs.* PROTESTANTISM.

It is truly deplorable that men, Christian men, holding the fundamental doctrines of the Gospel, and who, on every other point of revealed truth, are sound in the faith, should, on the subject of Sunday-keeping,* betray that want of judgment and logical acumen which invariably characterize their general exposition of biblical truth; men, too, who readily adopt the noble aphorism of the renowned Chillingworth, "The Bible, the Bible alone, is the religion of Protestants." Would that they were willing to abide by such a glorious principle, and subject their practice to this infallible test. What is its import? Does it not mean that Protestants derive their religion from the Bible alone?—that they admit nothing into their religious faith and practice, but what they find in the Bible? If this be its import, ought not those who inscribe it on their banners, to exemplify it in their practice? Ought they not to be careful that they believe nothing as a religious doctrine, and that they practice nothing as a religious rite, but what the Scriptures teach? To adopt this aphorism, and at the same time admit into their religion what is not found in the Bible, is to proclaim to the world that they are not Protestants. And yet this is done by the advocates and practicers of Sunday-keeping.

What an unspeakable relief to the laboring intellect it would be, if the Scriptures had contained but *one* single *command*, or had furnished but one single *example* of Sunday-keeping; but alas, they are not to be found. Persons deeply interested in the research, and ardently desirous to make the discovery, have completely failed in the attempt to find such a command. How many longing eyes have pried into the sacred history to find but *one example* of Sunday-keeping, yet how inexorable the sacred page! Neither diligence, nor learning, nor criticism, nor prayers, nor tears, can extort from it the confession that *one* Sunday was kept in the days of Jesus and his apostles. This being the case, the Protestant principle disallows its authority, and the consistent Protestant must reject it as no part of his religion. To bolster up the unscriptural practice of Sunday-keeping, its advocates are obliged to go out of the record, and have recourse to the writings of the *Fathers*, thus substituting the traditions of men for the commandment of God; and with an air of complacent assurance they tell us that "Sunday-keeping was practiced at a very early period of the church's history." But what avails this statement, if it be not in the Scriptures? It matters not how *long* the practice has prevailed, it matters not how *extensively* it has prevailed, it matters not if it be patronized by the *great, the wise, and the good*—if it be not in the Scriptures, it is not a Christian ordinance. Earthly patronage cannot make it a heavenly institution. Patronage may be a passport for error, from one generation to another, yet it does not convert error into truth, nor does it give such *sanctity* to error as to make it *profane* to touch it.

It may be true that Sunday-keeping is found in the beginning of the third century, but can this add the weight of a feather to the argument for it? Certainly not, in the opinion of any consistent Protestant. If Sunday-keeping be in the Scriptures, this discovery from the writings of the Fathers is not needed; if it be not in the Scriptures, a thousand such discoveries will give it no claim to a place amongst Christian observances.

In what an awkward dilemma do the advocates of Sunday-keeping place themselves in practicing that which only has tradition for its authority, by attempting to vindicate their conduct from Scripture. Thus shorn of their strength, in vain do they thunder their anathemas against the Church of Rome on account of her traditionary character, for it is well known that the Roman Catholics maintain that there is no authority in the Scriptures for Sunday-keeping. "A great papist, going to hear a discussion about Sunday-keeping, told his friend 'he was going to hear a MIRACLE, namely, Sunday-keeping proved from Scripture.'"

"Happy is he who condemneth not himself in the thing which he alloweth."

It is deeply to be regretted that so large a portion of the Protestant Church, losing sight of the fundamental principle, namely, the sole sufficiency and sole authority of the Scriptures to determine all matters of faith and practice, should be placed in the anomalous position we find them, especially in the present day, when there are evident indications of an approaching conflict between Protestantism and Popery. Does it not behoove Protestants of *every class* seriously to consider whether they be prepared for the encounter, and we earnestly ask, are the Protestant advocates of Sunday-keeping in a right position for the conflict? Are they prepared to prove that the Scriptures, and not tradition, the Apostles, and not the Fathers, are the only authority on which they found their practice? If they be not prepared to avow, and to prove this, will not their inconsistency enfeeble their efforts, and prove a tower of strength to their adversaries? The cause of truth and righteousness demands this at their hands. This is no controversy between sect and sect, but between truth and error—the commandments of God and the traditions of men. Look at "the truth, on this subject, with open face," without the spectacles of a system. We invite appeal "to the law and to the testimony" for

"This is the judge which ends the strife
Where wit and reason fail.
Our *guide* to everlasting life,
Through all this gloomy vale." W. H.

WILLIAMSBURGH, April 23, 1855.

* Alias Christian Sabbath, alias Lord's day, i. e., first day of the week.

LIFE IN AFRICA.

Rev. Mr. Beachman, of the "London Wesleyan Mission," recently returned from a visit to Africa, gives the following sketch of the social condition of the negroes inhabiting the Gold Coast and its vicinity. It is an awful picture:—

Scarcely has one of their barbarous and bloody customs been abandoned, from the earliest period of which anything is known of them. They will even pave the court-yards, palaces, and even the streets or market-places of their villages or towns, with skulls of those butchered in the wars, at feasts, funerals, or as sacrifices to Bossum.

Still their wives and slaves are buried alive with their deceased husbands or mates. When Adahanzen died, two hundred and eighty of his wives were butchered before the arrival of his successor, which put a stop to it, only to increase the flow of blood and the number of deaths in other ways. The remaining living wives were buried alive, amidst dancing, singing, and bewailing, the noise of muskets, horns, drums, yells, groans, and scratches, the women marching by headless trunks, bedaubed themselves with mud and blood. Their victims were marched along with large knives passed through their checks. The executioners struggle for the bloody office, while the victims look on and endure with apathy. They were too familiar with the horrid sacrifice to show terror, or to imagine that all was not what it should be. Their hands were chopped off, and then their legs sawed off, to prolong the amusement. Even some who assisted to fill the grave were then hustled in alive, in order to add to the sport or solemnity of the scene. Upon the death of the king's brother, four thousand victims were thus sacrificed. These ceremonies are often repeated, and hundreds slaughtered at every rehearsal. Upon the death of a king of Ashantee, a general massacre takes place, in which there can be no computation of the many victims.

At their Yam customs, Mr. Bowditch witnessed spectacles of the most appalling kind. Every cabocer, or noble, sacrificed a slave as he entered the gate. Heads and skulls formed the ornaments in their processions. Hundreds were slain; and the streaming and teeming blood of the victims was mingled in one vast brass pan, with various vegetable and animal matter, fresh as well as putrid, to compose a powerful Fetchie. At these customs the same scenes of butchery and slaughter occur. The king's executioners traverse the city, killing all they meet. The next day desolation reigns over the land. The king, during the bloody saturnalia, looked on eagerly, and danced in his chair with delight.

The king of Dohoney paves the approaches to his residence, and ornaments the battlements of his palace, with the skulls of his victims; and the great Fetiche tree, at Badagry, has its wide spread limbs laden with human carcases and limbs. There the want of chastity is no disgrace, and the priests are employed as pimps.

"Murder, adultery and thievery," says Bosman, "are no sin."

THE MINISTER'S RECIPE.

"Our excellent minister, possessing much knowledge of human nature, instructed his large family of daughters in the theory and practice of music. They were all observed to be exceedingly amiable and happy. A friend inquired if there was any secret in his mode of education. He replied, 'When anything disturbs their temper, I say to them, Sing, and if I hear them speak against any person, I call them to sing to me, and so they have sung away all causes of discontent, and every disposition to scandal.' Such a use of this accomplishment might serve to fit a family for the company of angels."

Such a practice would sweeten many sour dispositions. It would annihilate that morbid love of tattling and scandal that often embroils a community and involves it in personal and family feuds. If there were more singing there might be less tale-bearing and slander.

If you find yourself speaking against any person, try the minister's recipe, and it will act as a sovereign remedy. Do you allow your temper to be disturbed? Try the minister's recipe, and it will calm you into a placid spirit. Indeed, the clergyman's recipe is a panacea for many of the ills and disturbing causes of life.

Try it, for it may be had without money and without price. And its application is very simple and harmless, pleasant to the taste and melodious to the ear. [Cong. Journal.

"STATE OF THE DEAD."

Some complaint is made—we expected that it would be so—that the *Recorder* has not published whatever has been sent for insertion in its columns on the subject of Annihilation. The advocates of this doctrine seem really to think that their views are of some importance, and that the world will suffer immense loss, if their lucubrations are kept back from the public. The trickery of telling us that we are afraid of open discussion, and that by refusing to print what is sent to us, we only multiply converts to the doctrine we oppose, has been resorted to, in the hope, probably, of cozening us into a compliance with their wishes. But we have lived long enough to understand all such artifices; they weigh nothing with us.

It is not because we are afraid of free discussion that certain productions are withheld from the public. In this respect we flatter ourselves that we lie under no necessity of vindicating our character. Our past course is proof enough to every candid mind, that whenever a disputant worthy of the cause he advocates seeks opportunity, through our columns, to communicate with our readers, the door is not closed against him. But to expect us to publish what we look upon as diametrically opposed to Bible truth, without passing any strictures upon it, would be ungenerous; and we consider it equally ungenerous to expect us to waste our time in replying to what evinces neither ability to argue the point, nor a disposition to be instructed, to say nothing of the violations of taste, of punctuation, of grammar, of logic, and of every other requisite to a good composition. The *Recorder* (as we conceive) was not established for the purpose of heralding to the world such anti-evangelical doctrine as the annihilation of accountable beings. For though the different sources whence the people of our denomination have been gathered may imply a diversity of doctrinal views, and hence the expediency of indulging all parties, to a reasonable extent, in the opportunity of expressing themselves through the columns of the denominational paper, yet to make the paper the medium of circulating every excreation of a corrupt age, because some have been beguiled into the notion that it is of nutritious tendency, would not be in accordance with the feelings of our patrons generally, any more than with our own. At the same time, any communication which appears to spring from a desire to know the truth, or which appears to be the offspring of a mind clear enough to state its own views intelligibly, and to defend them with ability, shall not be despised, notwithstanding its contrariety to sound doctrine.

We have been censured for our *manner* of handling this question. It has been said, that we have classed the advocates of annihilation with *infidels*. But faulty as our manner may have been, we do not think we have said any thing which can be fairly construed as charging the advocates of annihilation with an *intention* to identify themselves with infidels. We have always *supposed* they intended to uphold the truth, though we may not have *said* so pleasant a thing before. Nevertheless, we do most conscientiously believe, that their doctrine is founded in the philosophy of the infidel, and we feel it a solemn duty to warn them of it. We do not think that *all* who have embraced it will turn out infidels, in the end, but we very much fear that *some* will. The professor of religion in whose heart the love of God does not dwell, and who is of a philosophizing, speculative turn, will not stop with the idea that death is the extinction of being. His next inference—one which he cannot avoid—a necessary one from the premise—is that man is not accountable, hereafter, for the sins of this life. For if death is the extinction of being—if this premise is settled conclusively, beyond all doubt—there can be no existence hereafter. It is useless to talk to him about the resurrection—about any re-organization of his corporiety—about the power of God to bring him into existence again—when you have once proved that death makes an end of him. He knows it cannot be, for two different and distinct existences of one and the same person is a contradiction. There can be neither heaven nor hell for him—nothing but an everlasting *nothing*. Such a professor, therefore, lands on infidelity; he cannot stop short.

Others will not go so far. "The hope of eternal life," the fondest hope of a renewed heart, will be a check upon their daring speculations. They will shrink from pushing the premise with which they have started to its impious conclusion, for they fear God; they know that there is a hereafter. But though they labor to persuade themselves that their recently adopted opinion is favorable to the hope inspired by the Gospel, the tendency of it is really to a lulling of their anxieties. They view the recompenses of eternity as far distant. A vast extent of duration stretches between their dying hour and the judgment, during which they are to cease from all consciousness. The things which are unseen and eternal being regarded as things a great way off, make too feeble an impression on the conscience. They are allured, therefore, to indulge a sinful negligence, and they remain at ease till their probation is closed.

Nor are they distressed in view of the destiny of the wicked. They cannot feel for them as they would, if the initial recompenses of the future were to commence as soon as this life is ended; and when they consider that the sorrows of the lost will eventuate in their entire annihilation, and in the consequent cessation of sin from the universe, they feel that the motives to labor for the salvation of souls are greatly diminished. Hence, when the novelty of this scheme has worn away, and controversy in reference to it no longer finds any thing to feed upon, they will have become meagre in soul, dwarfed in spirituality, and incapacitated for the high and holy exercises of the Christian life. Saved they may be, yet it will be so as by fire.

We know our manner is earnest; perhaps it is severe. But desperate maladies require violent remedies. This fearful doctrine is eating in upon us like a gangrene. Already one or two of our churches have been nearly destroyed by it; yet where is the man, or the woman, that has been made better by it? Whose hope of heaven has been cheered by it? Whose longings after Christ have been increased by it? Or what sinner's dread of divine wrath has been roused to healthy action by it? Does the belief of it render eternal life more desirable? Does it render one more afraid to displease God? Does it quicken one's earnestness to save his soul? Does it make one more earnest for the salvation of others? In what possible way does it, or can it, serve the cause of piety? We can see that immense mischief is likely to result from the prevalence of this doctrine, but what good it will do is utterly beyond our power to discern.

T. B. B.

LETTERS FROM PALESTINE—NO 11.

Notes of Journey from Jaffa to Jerusalem, Bethlehem, and Artas.

April 10, 1855.

Have been nearly eleven months within thirty-six miles of the Holy City, yet have not till now found it in my way to visit it. The reader may wonder at this; well, so have neighbors and travelers. Have not been indifferent to the great interest there is about the metropolis of Canaan, but have been unwilling to move in that direction till *duty*, not *pleasure* nor *curiosity*, seemed to call. Duty first and pleasure afterwards. The path of duty is the path of safety, of pleasure and peace. All this forenoon was busily employed in getting ready for the journey, and even then, the last few minutes were bustle and hurry; not confusion, for that is dangerous in this country. Your whereabouts once lost, and you may say good-bye to some of your notions; your money, little valuables, and provisions, or your keys, will slip away, as if magic had given them wings. Among the Arabs, you need to look many ways at once, take good care of your asheras, (*ashera*, one-fourth of a piastre,) keep good natured, be generous, and you are comparatively safe. There are eight of us in company. We agreed for nine donkeys, and were to pay one hundred and fifty piastres, six dollars; not reckoning the difference of exchange which is about ten per cent. They agreed to take us through to Jerusalem in a day and a half. Eight donkeys and two horses were brought—all for the same price. Four men were sent as drivers, and to care for the animals. We are ready and started, when up comes the pretended owner of the animals, and demands a bucksheesh—present. He is only following a common custom of his people on the conclusion of a bargain of this kind with Franks. The Arabs expect it, and will be angry if he does not receive it. Gave him two piastres, and told him not to expect any at Jerusalem. "No, no, will not ask you for any more." But the drivers were ahead, and did not hear their master; so we are taken in, for they will surely clamor for a liberal present at the end of the route. A mile and a half on the road brought us to brother Dickson's, who, with his wife and youngest daughter, joins us. The carpet sacks, valises, sack of provisions, &c., are bound to the donkeys, and at two P. M. we are fairly on our journey. But pause; are we not a motley group? Verily, in such a fix I would not like to go up Broadway, nor down Chesnut; but here we have no fear, excite no curiosity, for we are in fashion, save our Frank costume, in the eyes of the Arabs from the interior. There is Bro. R., mounted in a huge native saddle, his great trunk, mattress and bedding loaded upon a horse, and a driver on top of all. The ladies are each furnished with an American side-saddle; the rest ride upon large pads; there is but one bridle in the company, but rope halters do as well where we have footmen to urge on and help guide the animals; we are, while on the road, about as orderly in our march as a flock of sheep. Here are two little girls, seated as best they can on the baggage, happy as morning larks, and, children-like, pleased with the idea of a trip to the mountains, and especially that each has the sole command of a donkey. Ah! little do they realize how fatigued they will be to-morrow evening. Joseph, too, the Jewish servant, is full as conspicuous as any of the party, particularly when an opportunity offers to tell the fellahs, or strangers, that he is dragoman to the party. Let him enjoy the honor, for he is an honest fellow, and helps us many a time out of difficulty with the rogues and harpies. Truly, in appearance we are quite primitive—not much in advance of the times of Abraham.

We were accompanied an hour on the way by a son and daughter of Bro. D.; many were the hearty *khatraps* and *mah-salamies*—good-bye and with peace—that we interchanged at parting. Many the fervent prayers which will be offered that we may meet again in peace. The country through which we passed appeared, as far as we could see, like one extensive field of wheat. On the distant knolls and uncultivated patches shepherds were seen feeding their flocks; now a company of city gentry pass us, and then we meet a line of camels laden with oil; here comes a monk, seated sideways on his donkey, attired in a coarse frock, and girded with a cord—all outside humility—how much in the heart God only knows; we exchanged a few words in Italian—"how do you do? Where are you going?" Earth has many languages; heaven knows but one. The Gospel makes all understand the language of heaven. The time will come when the Gospel shall be preached among all nations, and then we shall all be brethren. Christ is our Redeemer. A few more words and he passed ahead of us. How seldom it is that one of these professed ministers can be drawn into a conversation on evangelical religion. After three hours and a half ride, we arrived at Ramlah, i. e. sand, and directing our steps to the Latin convent, knocked at the gate and were soon admitted to comfortable quarters. Two rooms with beds were furnished us, also a small dining-room, all within massive stone walls, on the first floor. The dining-room was furnished with benches, instead of chairs, and a rough-made table. Before taking the beasts to the khan (inn) the drivers appeared very anxious to be up and off at two A. M. We promised to be ready as early as they wished, and sent them away. After supper we read the scriptures and prayed—no man forbidding us! Protestants praying, yea, reading the Bible, in a Catholic convent! If Rome was advised of it, how soon would she set a watch and interdict it. The Lord grant that millions may come out of her into the liberty of the Gospel. Having retired to rest, I tried to sleep, but in vain. The musquitoes, fleas and sand flies kept me awake till half-past one, when I rose and routed the company for the morning ride. The drivers had lost some of their zeal for an early start, but with some urging, breakfast, if such it may be called, and all were ready, so that we were off at half-past three. The porter and waiter stood at the gate to receive whatever was given—no prices being fixed for the accommodation of travelers. A bucksheesh to the servants and to the superior is expected. We wished to pay the cost and the trouble. Gave them twenty-eight and a half piastres, which were received with evident satisfaction. The light of the moon gave a faint view of the mountains of Ephraim, four hours ahead of us. The thousands of Ramlah were yet sleeping, as we wormed our way, in the beautiful stillness of night, through the strangely narrow, crooked streets, and high, prison-like walls, now passing into darkness under some ancient arch, then emerging into the silver light to crook and turn and lose "the four points," till at length we come out upon the open plain covered with wheat. Here we are joined by some fellahs on donkeys, evidently desirous of company. We move forward with the same gentle pace and irregular march as yesterday; neither in single file nor abreast, nor in any kind of order. Donkeys are donkeys, and nothing else, very useful, but inclined to their own way, and ever refusing to be led! For an easy gait, we prefer them to horses.

For an hour before reaching the mountains, we ascended a rising, undulating plain, which, wherever arable, was green with wheat and barley. Passed a village on our left, situated upon a hill. Shortly after, the English vice-consul and suite joined us, and kept our company for a couple of hours. At seven A. M. we entered a ravine in the mountains. Every where we look upon these huge elevations, nature seems to have been lavish with rocks and stones. I was reminded of Jack's and Tussey's mountains in Central Pennsylvania, except that these, besides being all lime-stone, are in horizontal strata; thus providing countless natural terraces for trees and for grain. In some places, looking upward, the mountains appear all rock; in others, looking downward, but comparatively little rock is to be seen. Saw an abundance of shrub oak growing, and patches of olive trees on the mountain sides, even to the top—also in the ravine. The latter is so narrow, for the most part, as to admit only the stony path of goats, which were skipping from rock to rock, always on the run while feeding. In one place, during the day, we saw hundreds of them feeding thus, some several hundred feet above us; it was a novel sight. At nine A. M. we reached the top of a dividing ridge, between two gorges or deep ravines, with high mountain peaks on our right and left. We dismounted here, and lunched under some stately olives. Indeed, olive trees are here seen in all directions. To trim, plow, gather out the stones, and care for them, as well as they appeared to be, must require a great many laborers, yet no habitations were in sight. We rested ourselves for an hour, and then continued our journey. Our path curved around the head of the deep valley which lay before us at the plateau, and soon led us to the top of another ridge, whence, on looking back, we saw a village on the top of the mountain, hid from our view at our right when under the olives; and further on, at a great depth below, lay the vale of Sharon, and still beyond, westward, the Mediterranean. Before us another romantic scene presented itself; a large irregular basin or valley in the mountains, running south; a large village on the mountain side near the road; ravines diverging in various directions; the mountains sending up their peaks, as if to gaze at each other, which, though rocky, rugged and wild in the extreme, were dotted with olive orchards, and cut into thousands of rudely cultivated terraces, with the remains of others that had seen better days; as a whole, the view was grand, majestic, sublime. In one respect I was happily disappointed—I had not expected to see so many signs of life and culture at so great an elevation, among rocks and stones. There is one peak which cannot fail to arrest the attention of the traveler. It lies apparently south of the road, and east of the mountain vale, and rises far above all the rest, crowning its summit with a village and town, while around and below it is covered with fruitful terraces. As soon as I saw it, the words of Jesus came with indescribable force to my mind, "A city set on a hill cannot be hid," and truly, I can conceive of no work or art of man that could ever put it out of sight. It is there on a hill, mountain high, founded on a rock, against which the storms of ages have thundered and spent their fury, and yet it falls not, for its foundation is sure. Mat. 7: 25. In the midst of all this grandeur, I involuntarily exclaimed: *There is a God*, and with Him there is all power, wisdom, love, majesty. I wondered that any mortal could deny his existence, and felt in my heart, that none but a *fool* could say "in his heart, there is no God." Ps. 53: 1.

Passing down the mountain into the valley, we came to a small brook used to irrigate several small gardens. Close to our left were the ruins of a building whose foundation stones answer the description given by antiquarians as belonging to the times of Solomon. At our left, half a mile distant, was a small village, which, like all that we saw on the mountains, was strongly built of stone. Met many pilgrims, chiefly Armenians, returning from Jerusalem, whither they had been to spend Easter-week. Said a friend, "These have been to see the holy fire." What do you mean? "Why, the Catholics, Greeks, and Armenians act a farce at the Holy Sepulchre, and pretend to show the holy fire which descended on the day of Pentecost." He further added, that these pilgrims considered themselves to have acquired great merit by their pilgrimage, and would be regarded at their homes as peculiarly favored beings, on account of their visit to Jerusalem. Met a company of sixty or seventy soldiers, returning from an escort of the Prince of Belgium to Jerusalem. With this exception, we saw no military on the road, nor were we troubled with military posts and passports. In the valley aforesaid, the road was walled in for a few rods, and reminded us of fenced roads at home, also of the scripture, "Prepare ye the way of the people; cast up, cast up the highway; *gather out the stones*; lift up a standard for the people." Isaiah 62: 10. As to the possibility of making a good stage road over the mountains, I think it perfectly practicable. No formidable obstacle is in the way. A little Yankee enterprise would do it in a few months. One thousand dollars would gather out the stones, turn the water-courses, and shorten the distance an hour or more between the two cities. It is really a wonder how the people content themselves to travel year after year over this rough path, carrying all sorts of burdens at great inconvenience, and not so much as lift a stone to make the way more easy. The route of the old Roman road by the way of Lydda, three hours further, is said to be practicable for a railroad. The people are talking of a change for the better at the close of the present war. Certain it is, that some easier mode of reaching the capital is anticipated by prophecy. "And they shall bring all your brethren for an offering unto the Lord, out of all nations, upon horses, *and in chariots*, and in litters, and upon mules, *and upon swift beasts*, to my holy mountain Jerusalem, saith the Lord." Isaiah 66: 20.

Wm. M. Jones.

THE CASE OF PARDON DAVIS.

In the *Recorder* of June 21st, attention was called to "the resolutions of the Eastern and Central Associations, relating to Bro. Pardon Davis," and the churches were particularly called to the exercise of faith in their prayers in his behalf. We deeply sympathize with the sufferings of our brother; we believe it our duty to do all in our power to relieve him—to restore him to liberty; and we believe our first and greatest duty to be the exercise of prayer, of the prayer of faith. We must believe that God will grant us what we humbly ask him; and, so believing, and so asking, we shall obtain the blessing; for "it shall be done of my Father which is in heaven."

But where is our duty to the poor slave? Is not *he* our *brother?* Is not *he* also in chains and suffering? Nay, is not his "case" far more deplorable than that of our other brother, Pardon Davis? The slave is degraded, demoralized, ruined, not merely in body, but infinitely worse in soul. Pardon Davis is *not* so. Chains and slavery cannot degrade him; the stinging lash, galling his quivering flesh, has failed to demoralize him—to make him a traitor to the cause of truth. All the cruelties, all the torture and humiliation which wicked men may heap upon him, cannot *ruin* him, for his soul is strong in the hope of a glorious immortality. But *our brother slave*—where, alas, are our prayers for *him?* Must *he* perish, not merely in this life, but in the life hereafter, *for the want of the prayers of Christians?* Are not we "our brother's keeper?" If united prayers will burst the prison-house whose vile walls confine Pardon Davis, will they not also break the galling fetters of the degraded, the down-trodden slave? Is it indeed true—do we *believe*—that "God will still hear, will do what is for the best, and, if necessary, will cause an earthquake or send an angel from heaven to accomplish his purpose?" "If we do our part, God will do his." Hence, if we will only pray in faith, God will free America's millions of slaves; for, "it shall be done." If, then, it is not done, shall we be found guiltless?

Geneva.

June 25th, 1855.

ORDINATION AT VERONA.

By request of the First Seventh-day Baptist Church of Verona, and in conformity with the advice of the Presbytery of the Seventh-day Baptist Central Association, brother David Porter Curtis was ordained to the work of the gospel ministry, at Verona, June 24, in connection with the following religious services: After the usual exercises of reading the Scriptures and singing, a sermon was preached by James R. Irish, from Rom. 8: 31—"*If God be for us, who can be against us?*" Consecrating prayer and hand of fellowship by Eld. Joshua Clarke; charge by J. R. Irish; charge to the church by Eld. J. Clarke; after which the choir and congregation sung, with something more than unmeaning form, "*the Pastor's Welcome*," found in the 917th number of the Christian Psalmody. Benediction by the pastor. Although a drenching rain was falling, a full congregation was in attendance, manifesting that interest so indicative of good in the relations of pastor and people. The church and congregation not only felt disappointment at the absence of our beloved brother and venerable counsellor, Eld. Wm. B. Maxson, but deeply sympathize with him in the great afflictions which were the occasion of that absence.

J. R. I.

RELIGION IN MISSOURI AND KANSAS.

Rev. Frederick Starr, the clergyman who was recently driven from his home in Weston by the guardians of slavery, delivered a lecture at the Broadway Tabernacle, Sunday evening, June 24th, on the "Moral and Religious condition of Missouri and Kansas." One of the daily papers gives the following report:—

Mr. Starr said that first among the religious denominations in Missouri was the Catholic Church. In St. Louis there were 50,000 Catholics, and they had a college with 27 professors. In Kansas the nine best lots in Leavenworth were lately bought, and a Catholic Church and Nunnery were being erected. Next to the Catholic was the Methodist Church South. They always pronounced it the Methodist Church South, and sometimes emphasized the last word with a clap of the hands. He had lately heard from a very reliable source, that when once the discipline of the Methodist Church was reprinted in that city, the sentence "No member of this church shall engage in buying or selling men, women *or* children," was changed so as to read, "men, women *and* children," and his informant assured him that it was an absolute fact that some men in the South would sell men and women without children, or men and children without women, saving the other third until the next sale. Wherever churches divided on the question of Slavery ground was lost. It was a good thing to have the Union continued. There were some eight or ten churches which adhered to the Methodist Episcopal Church North. A charter for a school of this denomination had been refused by the Missouri Legislature. In addition, there were some seventy German Churches, all of which adhered to the Northern Church. The late Platte County fulmination against Northern Methodist ministers was directed against a fine old man who confined himself principally to cultivating a very fine farm he had about four miles from Weston, and a poor German preacher who might perhaps get $100 a year for preaching to three or four congregations. Then came the Baptists, divided into two classes. The first believed in fate, and practiced their belief so far as to be entirely inactive in relation to Missions, Slavery, and Temperance. They were called Hard Sides. He had heard of seven ministers in the same town being drunk on one day. The next were the Campbellites, numbering two hundred thousand. The arrangements of this church were to take in everything. It had no particular doctrines, but if a man would say, "I believe Jesus Christ is the Son of God," and would carry out his belief and be baptized by immersion, he would be saved. He had studied this system for five years and this he thought to be the essence of it. He considered that to be a doctrine more debauching to religious sentiments than any other. It was making the way of salvation too easy. The effect was most disastrous upon other denominations, especially the Methodist Church. In the South there was a greater strife among denominations than in the North, and other churches took in members who were insufficiently converted. The Presbyterian Church had adopted Methodist doctrines, and were far more efficient there than the Old or the New School. In emotional meetings the Cumberland Church could lead everything. They preached the longest sermons, prayed the longest prayers and spatted their hands the hardest of all. The Old and New School Presbyterians were about equal and they grew slowly and solidly. Their churches were the most influential. The Old School in the South was par excellence the Pro-Slavery, and the New School was driven into Anti-Slavery any way. The terrible word "Abolitionist" was used in the South as an instrument to murder men with. Put all the crimes in the New York State statute book together, and represent the aggregate of their turpitude by some one word if possible, and that word would be to Abolitionist as clean paper to blackest night. When this terrible stigma was affixed to those churches who adhered to the New School, many of their members flinched. He had never preached Abolition. When he went there he had a little Sunday-school of some fifteen or eighteen scholars, and some of the slaves wanted to come to school to see the pictures and see what was going on. He spoke to the master of a slave whom he intended to emancipate about fitting him for entering upon his freedom, and offered to teach him to read and write if he would consent. The master consented, the slave desired it, and he commenced teaching him. Soon two girls who lived in the same house wanted to come, and obtained permission of their master; by and by two men came, and then two more girls. He thought that as it was done with the written permission of their masters he should get along well enough. But after a while he went down to Parkville to a protracted meeting, and one morning he was reading a newspaper there and his eye caught an article—a regular Southern article—an article which without saying anything said everything. It was after this fashion: "Is it true that a certain individual is teaching the nigger population to read and write? If it is true we would advise men to be up and doing." He showed it to Mr. Park, the man whose press was thrown into the river, an elder in that church, a man of wealth and a slaveholder, and he advised him to put a letter in the paper. So while the excitement was up he wrote a letter. But in that country it was always safest to speak No. 2. On his way home he called on the Justice of the Circuit Court at Platte City and explained the whole matter to him. The Judge's wife was present and listened with great interest. She said at the close: "That's too bad! If we hadn't moved over that very week we did, I was going to send my two girls over to you." Mr. Starr said that he had had some thirty applications, but had received only the seven who brought the written permission of their masters. The Judge considered the matter and told him that he had done what was right. He showed him the letter, and asked him if he should publish it. "Oh, no," said the Judge, "if you print that in the paper they will reply and get up a fight. Go home, and if any of your friends, if any member of your church, wishes to talk to you about it, don't say a word; but go home and provide yourself with the best bowie-knife and the best revolver that you can, and then if any man touches you just make a specimen of him." That same Judge, at the polls in Kansas, while making a Pro-Slavery speech—he is an elder in the Old School Church—said, "We must make Kansas a Slave State—peaceably if we can, forcibly if we must." Mr. Starr proceeded to say, that he went home; he had a big jack-knife, and he took it out and laid it on the bureau and slept with it there two nights. It was Saturday that he went home. He loitered on the way so as to enter the town just about dusk. On Tuesday he had an engagement to go to St. Joseph's. He found that his wife had received two letters for him, one of them promising him a very peculiar kind of a ride on a very peculiar kind of a colt, and he went to the stage office and told them to stop Monday morning instead of Tuesday. As his wife was quite timid he took her with him. He preached that Sunday as though nothing had happened, and nothing was said to him about it. At St. Joseph's they had a most gracious meeting for four weeks, and one hundred and sixty members were added to the church there, and after they got home they had a meeting, and the membership of his church was doubled, so that that was a bad time to make up the matter. But that little thing gave his opponents a handle, and they did not forget it. In conclusion, he exhorted Christians not to treat their Southern brethren harshly—many of them were more thoroughly enslaved than their servants. Let them pray for them, but let not the fact that they belonged to the same church with slaveholders make them speak in favor of slavery. That was more than even slaveholders demanded.

THE LIQUOR LAW IN NEW YORK.

The worst fears of the friends of Prohibition have been realized in the course of Mayor Wood. He has issued a proclamation to the people, and his instructions to the Police Department, from which it is clear, that without further action by the Courts or the Legislature, the law will be an absolute nullity so far as New York city is concerned.

It appears that there are two loop holes in the law, through which the Mayor escapes all personal responsibility for its execution. First, he falls upon his counsel's interpretation of the clause exempting foreign liquors from the operation of section first. That interpretation is, that foreign liquor may be freely sold when once it has passed the Custom House. But the right to sell in original packages, is the right of the importer to sell a case, or whatever the wholesale form may be—not the right of the jobber to retail a bottle from that case. No court, it seems to us, can possibly sustain the Mayor's interpretation. But that interpretation is a plea for not executing the law, which will avail until the matter is brought before the courts, where it will be kept in litigation until the next session of the Legislature.

The second loop-hole through which the Mayor escapes from the pressure of the law, is the phraseology which requires that the liquor-seller shall be *seen* violating the law by the officer who makes the seizure or arrest. His instructions to the police show clearly his leaning in the matter. The policemen are now the persons to be watched, and not the liquor dealers! The general result may be very briefly stated. They are to be specially careful *not* to seize any liquors that may have been imported:—and they are warned, that any error in this particular will make them liable to severe personal responsibility. The law directs them to arrest any person seen to be engaged in the prohibited sale of liquor: they are directed by the Mayor to bear in mind, that they must not make arrests under this provision, unless *the whole* offense falls under their personal observation. The law requires them, moreover, to seize all liquor kept for sale, or with intent to be sold:—the Mayor instructs them that they are not to judge of this themselves, but are to make the seizure only on complaint of other parties. They are to make complaint before the proper magistrate when seizures are made, and are to arrest persons found intoxicated in public places, as now required by the regulations of the Police Department. It is very plain, that under these directions, the vigilance of the Police is to be mainly expended in not going *too far* in the enforcement of the law. They are to be especially careful not to do anything which the strictest construction of the law will not fully warrant;—and a great deal more stress is laid on those clauses of the law which are construed to protect, than on those which plainly prohibit the sale of liquor.

The Religious Societies.—The reports of the Religious Publication Societies of the country, as rendered at their anniversaries, show a great degree of activity. The Bible Society has issued 901,400 volumes, and received from all sources, $346,811; the Tract Society, 961,365 volumes, and received $413,173; the Baptist Bible Society has received $40,335; the American Sunday School Union has received $248,604; the Baptist Publication Society, $52,705; the Massachusetts Sunday School Society, $33,720; the Presbyterian Board of Publication, $87,599.

The Late Amos Lawrence.—It has already been stated, that the Diary and Correspondence of the late Amos Lawrence of Boston has been printed for private distribution among the relatives and personal friends of the deceased. A correspondent of the *Transcript* gives a brief sketch of the contents of this volume, which furnishes the secret of the good man's success in business, and of the universal respect in which he was held by his fellow citizens. The Diary says, "I have never in my life smoked a cigar, never chewed but one quid, and that before I was fifteen, and never took an ounce of snuff." In 1807 he came to Boston with $20 in his pocket, feeling, as he says, "richer than I had ever felt before or have felt since;" and he gave the neighbor who drove him to the city $2 of his $20. During the first seven years of his mercantile life he never allowed a bill to stand unsettled over the Sabbath. He kept an accurate account of the merchandize bought and sold each day, avoided excessive credits, and practiced the most rigid economy—never, as he says, "*allowing* himself to spend a fourpence for unnecessary objects till he had acquired it." During the first year he made $1,500, and the second $4,000. In January, 1808, his whole profits were $175; but at successive intervals of six years from that time he became worth (1814) $60,000, (1820) $112,000, (1826) $280,000, and (1832) $427,000. In 1829 Mr. Lawrence commenced a memorandum-book, (continued to his death, Dec. 30, 1852) containing a statement of all his donations in money or other articles, charged at the cost. They, within this period, amounted to $639,000; and, added to his prior unrecorded charities, probably make a total of $700,000. The volume contains portraits of Mr. Lawrence and his brother Hon. Abbott Lawrence, and a view of the old "home" in Groton.

The Catholic Council on the Temperance Question.—The Pastoral Letter of the Archbishop of Cincinnati, signed also by the Bishops of Cleveland, Louisville, Vincennes and Covington, and the Vicar and Coadjutor of Michigan, recently issued, contains the following passage:—

"In the ordinary discharge of our pastoral office, we, aided by our faithful clergy, have not ceased, beloved brethren, to warn you earnestly against all sin and all scandal, and particularly against this horrible vice of intemperance, which is the fruitful mother of so many other evils, affecting both the body and the soul. In order the more effectually to check the evil, we strongly advise you to discountenance and discontinue altogether the practice of retailing intoxicating drinks as a means of obtaining a livelihood. We do not wish to pronounce that it is always sinful to engage in this traffic, but we feel it to be our duty earnestly to dissuade you from it, as being dangerous to yourselves, to the morals of your children, and to others, to whom it presents numerous and often fatal temptations; and as being finally both discreditable in public estimation and unneccessary as a means of obtaining a living."

Union Theological Seminary.—The *Evangelist* has good news for this Seminary. It says:—

"At the last meeting of the Board of Directors, a communication was received from Mrs. Bell, formerly a member of Dr. Hatfield's Church, though now connected, we believe, with Rev. Dr. Alexander's, tendering the munificent offer of a sum of money sufficient to completely endow the Professorship of Ecclesiastical History, viz: $25,000, if the privilege of naming the Professorship and of recommending the first incumbent of it, be allowed. The Board unanimously accepted the generous offer, and, in accordance with the donors's preference, elected, also unanimously, Rev. Roswell D. Hitchcock, D. D., of Bowdoin College, as the first Professor. A Committee to correspond with Professor Hitchcock, was appointed, who have learned from him, as we understand, that he knows of no impediment in the way of accepting the appointment. The choice has also the entire approbation of the Faculty, and we doubt not will be most heartily welcome to the friends of the Seminary."

Anti-Slavery Convention at Syracuse. The Convention of Radical Abolitionists, a call for which we published some weeks ago, was held at Syracuse, N. Y., on the third, fourth, and fifth days of last week. It was well attended, and its deliberations are spoken of as interesting and important. James McCune Smith, a colored man from New York, presided; Wm. Goodell, C. C. Foote, J. McFarland, J. W. North, A. B. Burdick, Gerrit Smith, and Frederick Douglass, were the Business Committee. This committee reported a series of resolutions and a declaration of sentiments, which were thoroughly discussed, and finally adopted with slight modifications. The great idea of the platform, or declaration of sentiments, is stated to be, that the institution of Human Slavery is unconstitutional, illegal, and wicked, wherever it may exist. The question whether the Federal Constitution is a pro-slavery or an anti-slavery document, was a prominent topic of discussion in the Convention.

The Clay Monument.—The Committee appointed to decide upon a design for the monument to be erected to the memory of Henry Clay, at Lexington, Kentucky, have selected one by an architect of Cincinnati, Mr. J. R. Hamilton. There were over one hundred plans sent in for approval by architects and sculptors in every State in the Union. It is intended to be, and if the design selected is carried out will be, by far the finest thing of the kind in the country. Mr. Hamilton's design is a gothic temple of circular form with thirteen sides, intended to illustrate the thirteen original States of the Confederacy. The statue, designed by Bellew, occupies the center of the building, much in the same way as that of Sir Walter Scott does in the Edinburgh monument. The upper portion of the building is to be used as a record room to contain relics of the great statesman, an original and admirable idea.

Minutes of the Central Association.—The Minutes of the late meeting of the Seventh-day Baptist Central Association are printed, and will be sent to the several churches by the first opportunity.

Collegiate Education in Liberia.—"The Board of Trustees for Education in Liberia," incorporated in 1850, by the Legislature of Massachusetts, with power to hold personal and real estate to the amount of $100,000, report that about $22,000 have already been received and profitably invested, for the establishment and support of a college in the Republic of Liberia. The Government of that vigorous young commonwealth approves the college plan, and has made a most liberal grant of land on the St. Paul's river, about fifteen miles in the rear of Monrovia. The Trustees purpose to commence the Institution, but a great difficulty arises from the scarcity of suitable men to form the faculty. White men are necessary at the outset, while adequately educated colored men are not to be found; but men of any or no color, must risk health and life in the attempt to rear and manage a model Institution of this sort in Liberia.

Doctors of Divinity.—The anniversary exercises of New York University took place last week, at which *eight* doctors of divinity were made. If all of the colleges about to hold their anniversaries should follow this lead, the year will be a fruitful one. Of the doctors made by the University, the following is a list:—

Rev. Alex. Munroe, pastor of the Free Church, Manchester, England; Rev. Eli H. Canfield, Rector of Christ Church, Brooklyn; Rev. William T. Sprole, Chaplain in the Military Academy at West Point, and Professor of Ethics and English Literature; Rev. W. G. Schauffer, Missionary of the American Board to the Jews, Constantinople; Rev. Robert Boyd Prescott, C. W., Master of Arts, (Honorary;) Augustine José Morales, Professor of Spanish in the Free Academy; Solomon Jenner, New York.

Pastoral Industry.—The late Rev. Ichabod S. Spencer, pastor of a Presbyterian church in Brooklyn, was distinguished as a faithful and diligent pastor. In his biography it is stated that his labors for the year 1851 sum up as follows: "Preached 209 sermons; made 421 calls upon the families of the congregation; made 121 calls upon the sick and dying; had 259 conversations—some of them protracted—with the impenitent; attended 446 prayer-meetings; attended 62 other religious meetings; officiated at 34 funerals; searched out and assisted the poor in 72 instances." Mr. Sherwood, his biographer, remarks on this: "If *he* had occasion to mourn and accuse himself while passing such a year's labor in review, alas for most of us!" As the direct results of his ministry of twenty-six years, 682 persons were received into his own church on profession of their faith.

Church Missionary Society.—The Annual Meeting of the English Church Missionary Society was held in Exeter Hall on Tuesday, May 1st. The Society has connected with it, in various heathen districts, 121 stations, 189 clergymen, 39 schoolmasters, &c.; 11 European female teachers (exclusive of missionaries' wives;) 1,697 native and country-born catechists and teachers of all classes, and 17,890 communicants. The income for the year had been £107,343, and the expenditures £116,256. This Society is sustained by the evangelical portion of the Church of England; while the "High Church" party operate through the "Society for the Propagation of the Gospel in Foreign Parts."

A Very Good Move.—The Providence *Journal* says:—We understand that the Executive Board of Brown University have determined to furnish rooms in the college buildings, free of charge, to candidates for the ministry, of all denominations, and such other deserving young men as the President may select. Some measure of this kind has long been desired by all the friends of the Institution. The cost of residence in college will then be materially diminished to those whose circumstances require it, while those whose means are ample will easily provide themselves with rooms in private families in the city.

A Very Nice Question.—It is said that the suspended Bishop Onderdonk, who is allowed a salary of $2,500, instead of $6,000, which was his salary before his suspension, does not give his receipt in full, but on account, when payments are made. In the mean time, if he has a right to the whole former salary, the debt is constantly increasing, and he or his heirs may bring a suit at law to recover it with interest. The diocese has an Episcopal fund invested of about $80,000, which it would be glad to increase, but so long as there is any chance of its being seized for the suspended Bishop's back pay, it will not be augmented.

Flood in Allegany Co., N. Y.—A letter from Nathan V. Hull, of Alfred, informs us that on the night of June 27th that region was visited by a heavy rain, producing a destructive flood. Many bridges were carried away, crops of all kinds were damaged, the beds of streams were in some instances changed, and large deposits of flood-wood and gravel were made in places not used to such things. The whole extent of country from Alfred to Hornellsville, and on the several streams emptying into the Canisteo River, suffered severely from the storm. Three persons—two adults and one child—are known to have perished in the water.

Accident on Panama Railroad.—The passengers from San Francisco June 2, started from Panama for Aspinwall late in the afternoon of 15th ult. Just after dark, when the last train had crossed the "Summit," and was descending a very steep grade, the coupling of one of the forward cars either broke or became disconnected. This created a space between the separated cars, and consequently rung the Engineer's bell a signal to stop—which he obeyed. In an instant after, the balance of the cars which were only a short distance behind, came rushing upon those stationary. A severe crash was the result, in which two or three cars were injured, and a man named Samuel Anderson, from Jefferson County, N. Y., who was sitting on the platform, was killed. He was decently buried about two miles distant from the place where the accident occurred.

European News.

One week later news from Europe has come to hand since our last.

By this arrival we have some further information respecting the Allied successes before Sebastopol, but as letters lag ten days behind the telegraphic dispatches, we know nothing beyond the few words published by Government. From these it would appear that the fight for the Mamelon was obstinate, not fewer than 5,000 men being put *hors de combat*, and the success was complete, 62 guns having fallen into the hands of the French. An important element in the victory is that the French from their new position can reach the ships in the harbor of Sebastopol.

Copious details are to hand of the attack on Kertch, also telegraphic announcements of further successes in the Sea of Azoff, where the fleets attacked and destroyed the stores at Taganrog, Marioupol and Genitsch.

A boat expedition, to be conveyed in steamers to the shallow water, is fitting out in all haste at Portsmouth—destination supposed to be Perekop.

In the Tchernaya and in the Baltic we have no new movements. The Russians are stated to have evacuated the whole of their Circassian territory.

Duke Constantine is appointed Regent of Russia in the event of Alexander's decease.

Mr. Fillmore has been presented to Queen Victoria at the English court.

A dispatch, anticipatory of the overland mail, mentions that the Imperialists in China have gained some trifling advantages over the insurgents.

More Post Office Developments.—The Baltimore *Patriot* says that Mr. D. B. Wilheim, who owns a paper mill near Uniontown, Md., purchased in Baltimore, last November, a lot of waste paper, and in it was found a letter containing $25 in bank notes, and in a package a large number of bills were found, in all $434. In tearing open the package, with the wrapper came out a check for $10,000, which was supposed to be a canceled one, "many such having been found among the old paper." The wrapper and the check went into the mill, but the money was taken by the workman to Mr. Wilhelm, who advertised it in a Baltimore paper. The money was afterwards claimed by Mr. Maguire, a post office agent, who said that the letters or packages containing it were missing from the Baltimore post office. The $25 was given up on the production of a letter from a lady stating that she had mailed such an amount to the office in Baltimore, and Mr. Wilhelm is ready to give up the $434 when he receives reasonable proof that it will go into the right hands.

Two Boys Drowned.—Two interesting boys were drowned in Claverack Creek, near Hudson, Tuesday, June 26th, under the most painful circumstances. A number of pupils of the Academy were bathing in the Creek, which was considerably swollen. A son of the Principal, Prof. Macbeth, waded out into the stream, when he met the full force of the current, and was unable to return, or, indeed, to move in any direction, except with the current. It was known that that would be fatal, for the water was beyond his depth a short distance below him. Seeing his danger, a fellow pupil—a gallant little fellow by the name of Percival Shipley, of Philadelphia—went to his rescue; and taking him by the hand, attempted to return. But the water was rising rapidly, and the boys were raised from their feet and carried down the stream, where, hand in-hand, they sank together. Their dead bodies were soon afterwards recovered.

SUMMARY.

The Sandusky (Ohio) *Register* says: "A gentleman from the country informs us that a whole family were drowned in attempting to cross a creek, in Greenfield township, Huron County, on Friday, June 22d. The stream was very high, and the bridge gone. The father waded across it, however, and concluded it was safe to drive over his buggy, in which were his wife and two children. When midway across the stream the current was so strong as to sweep the buggy down the creek. The horse made the bank, but at a spot where it was miry, and in his efforts to free himself from the harness he overturned the buggy, burying the whole four persons in the water, drowning them all.

The San Antonio *Texan* says that it is a well known fact, that the Indians on our Texas frontier are frequently seen having in their possession gold; this is sometimes in small lumps, as taken from the mines, and sometimes they have it hammered in the shape of ornaments, but without alloy. When they are asked where they obtained it, their answer is very indefinite. Many of them say if they tell this secret they will die immediately, and they have other superstitious ideas in regard to the danger of disclosing this secret. There is but little doubt but there are mines of gold, and various other valuable metals, within the territory of Texas.

The Newburyport *Herald* says that Mr. Joseph Hiss, late Representative of Boston, came near suffering serious injury, if not death. Mr. H. was in town preparatory to lecturing upon the doings of the Legislature, stopping at the Ocean House, and retired at night, leaving a spirit lamp burning with the wick well up. In the morning the room was full of smoke, and Mr. Hiss himself the color of a coalman. He was awakened with extreme difficulty, but not until the condition of the room had caused the blood to settle about his eyes. One of the windows was slightly raised, otherwise he would have died.

Mr. Heath, an English antiquarian, who has devoted much study to the Hieratic Papyri deposited in the British Museum, professes to have translated one of them, which proves to be an Egyptian song, alluding concisely, but accurately, to the slavery, rebellion, and exodus of the Jews, and to the ascent of Mount Sinai by Moses. He admits that great uncertainty hangs over these old records, but places considerable confidence in the substantial correctness of his translation.

The abolition of the Newspaper Stamp in England has already begun to yield fruit. Cheap papers of all descriptions are projected. Charles Knight will publish a weekly paper, to be called *Charles Knight's Town and Country Paper*; and a flaming announcement is made of a new illustrated paper to be called the *Illustrated Times*, employing first rate editorial and artistic talent, and containing sixteen pages as large as the *Illustrated News*, and all for two-pence!

The inhabitants of Carejan, in the Pyrenees, on the Spanish side of the frontier, seeing some weeks ago that an avalanche of snow was about to fall, assembled in houses which they thought the least exposed to danger. Unfortunately, the snow came down upon those very houses, leaving almost untouched several others which had been abandoned. By the fall fourteen houses and fourteen barns were completely destroyed. Seventy-two persons were buried in the ruins, and sixty of them were killed on the spot. The remaining twelve, though got out alive, were so dreadfully injured that some of them died soon after, and others were considered in a desperate state. The loss of cattle was very considerable.

The New Orleans papers for some time past, says the Providence *Journal*, have spoken very despondingly of the business interests of that city. Trade has fallen off, real estate has declined in value, and the burdensome rate of taxation consequent upon the enormous debt of the city, drives away capital, and prevents a permanently resident population. As an evidence of the great depreciation in the value of property, the *Bee* records a late sale of real estate for $93,000, which fifteen years ago was appraised at $340,000. The rent then was $34,000 a year; now the same property yields only $16,000.

A dispatch dated Portland, Saturday, June 30, says: At the law term of the Supreme Court at Augusta, in the case of John Hersham, sentenced in the Police Court to fine and imprisonment for selling a glass of liquor, Chief Justice Shepley discharged the prisoner on a writ of *habeas corpus*, deciding that Municipal Judges and Justices of the Peace have no jurisdiction for punishing liquor sellers under the second section of the law, which can only be done by indictment and trial by jury in the Supreme Court. The effect of this decision is to completely nullify the law so far as the manner and form of its execution has been attempted.

A silver medal has been cast by the Government, which is to be presented to masters and crews of vessels rescuing Americans from shipwreck on the ocean. One face represents a sailor clinging to a broken mast, with the waves are dashing round him, and gulls hovering over him, the rescuing ship being seen sailing up, in the background. On the reverse side is a wreath of laurel and ivy, encircling thirty-one stars at the head and the American eagle at its base, with space enough between them in which to engrave the inscription the medal is to bear.

Watches, equal to the best imported, says the Boston *Bee*, are manufactured in the suburban town of Waltham. The prices for which these are sold range from $20 to $200 each, at retail. A large building has been erected on the south side of Charles River, which is kept closed against intrusive eyes. The company is doing a large business, and the day is not far distant, we apprehend, when Waltham watches will be as famous and valuable as the best from London, Paris, and the European cities generally.

A fiend in the shape of a colored man, named George Parker, near Dover, Del., lately murdered two of his own children, in the presence of some eight or ten men, then set fire to his house and threw the bodies into the flames. This man is a desperado, of immense strength, and of such agility as to be a match for half a score of ordinary men. He was not secured until he had been shot three times; and though ironed feet and hands, could be got into prison only by means of a halter round his neck, by which he was dragged head-foremost down the prison stairs.

Mayor Hall, in an address delivered by him at a temperance meeting in the Eastern District of Brooklyn, made the following statement:—"More than three hundred ill used wives have called upon me since the first of January, to complain of their drunken husbands, who squandered all their money in rum, and left them without the means of support." He estimated the total expenditure for rum in Brooklyn, during the course of a year, at near three millions of dollars.

The Church of England has now no less than thirty Colonial Bishoprics. The last established is for Borneo, to which the Rev. Dr. McDougall, who has been for some years a missionary in that island, has been appointed, under the title of "Bishop of Labuan." Some of these colonial bishops are of a Catholic and some are rather of a Roman Catholic spirit, keeping aloof from, and ignoring, if not openly opposing, the missionaries of other churches.

A dispatch dated Rochester, Friday, June 29, says: Two horses were rode into the current above Genesee Falls to-day, and both of them were taken over the Falls. Their riders escaped by means of the bridge. One of the horses was instantly killed; the other, strange to say, received no other injury than two or three slight flesh bruises, and is now being exhibited in the streets as a curiosity. The Falls are 92 feet high.

The Connecticut Historical Society proposes presently to commence the issue of a series of publications, embracing documents relating to the civic and ecclesiastical history of the State, towns, public institutions, and education, with biographies and genealogies. It is intended to publish these in annual volumes, and to furnish copies to every town and public library in the State, where they may be accessible to all.

The San Antonio *Herald* learns that the Indians located near Fort Belknap have planted 300 acres of corn, which looks remarkably well. This, the *Herald* remarks, is truly good news, and gives rise to the hope that the Indians of Texas will soon be able to subsist on plenty, and be no longer compelled to plunder the frontier settlers and emigrants in order to obtain a scanty living.

A dispatch dated Albany, Wednesday, June 27, says: This morning a gentleman named Fagg, of Herkimer County, had his pocket picked of $2,500, but fortunately the thief was arrested a few minutes afterwards, and all the money recovered. The thief gave his name as Platt, and is supposed to be an Englishman.

The proprietors of nearly all the drinking houses and hotels of Galveston, Texas, have united to make common cause, in an endeavor to try the validity of the late ordinance closing up such establishments on Sundays.

The Central Presbyterian Church in Brooklyn, (O. S.) of which Rev. Mr. Rockwell is pastor, recently admitted fifty to the communion, the fruits of a revival.

Queen Victoria's State coach is bullet-proof, and the glass of the windows is six inches thick. When George IV. was fired at the glass was only broken by the ball. In this coach, for some reason, and not as had been expected, in an open one, Louis Napoleon proceeded on his late visit to the Guildhall to receive the address of the corporation of London.

The Rev. Dr. Brace, of Newington, Conn., in speaking of the Rev. Mr. Backus, one of his predecessors, says: "His wife was one of ten daughters, every one of which has been said to be six feet tall—making sixty feet of daughters, and all of them strong in mind—children of Rev. Timothy Edwards, of East Windsor."

An English ship which recently left New Orleans for Liverpool, discovered a couple of runaway slaves stowed away on board, just after the tow-boat had left her outside of the Balize. The Captain immediately hoisted a signal, and the tow-boat returned, took the negroes on board, and brought them up to the city.

The *Journal* is informed that Miss Harriett S. Russell has received the appointment of Postmaster at Great Falls, N. H., in place of Hon. Richard Russell, deceased. Miss Russell has had the charge of the office during the time her father held the appointment, and has proved herself a faithful and efficient public servant.

A dispatch dated Buffalo, Friday, June 26, says: Welland County, Canada West, was visited on Saturday and Sunday last by a terrible rain storm, which swept away all the bridges on the Welland and Oswego Creeks, and destroyed eight or ten milldams. The crops of oats and corn on the flats are entirely destroyed.

A dispatch dated Loydville, Friday, June 29, says:—The suspension turnpike bridge being built across the Delaware River at Equinunk, on the line of the Erie Railroad, fell this evening. Ten men were engaged on the bridge at the time, six of whom were seriously injured.

A dispatch dated Easton, Pa., Tuesday, June 26, says: All the prisoners in our jail, seven in number, broke out last night and made good their escape.

It is stated in the Detroit papers, that the dividend on the broken Bank Notes of the Michigan Stock Bank will be about 40 cents on the dollar.

Rev. W. Walker, editor of the *American Baptist*, is obliged by poor health to relinquish temporarily the duties of his position.

Rev. Sereno Howe, of Lowell, Mass., declines accepting the Secretaryship of the American Baptist Free Mission Society.

Flour is falling yet, slowly but surely. A month ago the brands sold at $10 50 which now are to be had at $8 50.

J. W. Boynton of South Coventry, has preserved quinces through the winter by simply keeping them under water.

The crop and harvest news from nearly every section of the country continues to look well.

New York Markets—July 2, 1855.

Ashes—Pearls and Pots $6 50.

Flour and Meal—Flour 8 00 a 8 87 for various grades of State, 8 50 a 8 62 for Western mixed, 8 87 a 9 25 for common to good Ohio, 11 00 a 12 50 for extra Genesee. Rye Flour 7 00 a 8 75. Jersey Meal 4 87.

Grain—Wheat, not much doing, but a lot of Southern red sold for 2 42, and of Michigan white for 2 52 Rye 1 55. Oats 60 a 65c. for State and Western. Corn 90 a 93c. for Western mixed.

Provisions—Pork 16 50 for new prime, 19 50 for new mess. Beef 9 75 a 11 25 for prime, 11 00 a 13 00 for country mess. Butter 15 a 18c. for Ohio, 18 a 22c. for ordinary to good State, 23 a 25c. for choice. Cheese 5 a 9c.

Hay—1 00 a 1 12 per 100 lbs.

Tallow—12c. per lb.

MARRIED.

In Dakota, Waushara Co., Wis., May 26, 1855, by M. Dodge, Esq., Harvey B. Chase to Elizabeth Shay, daughter of Silas Shay, both of that place.

In Rockville, R. I., June 24, 1855, by Eld. P. S. Crandall, Mr. Ezra F. Barber, of Richmond, to Miss Lucy A. Richmond, of Hopkinton.

In Plainfield, N. Y., by Eld. W. B. Maxson, June 22d, Mr S. M. Palmer of Columbus, N. Y., to Miss Frances Jane Davis, of the former place.

DIED.

In Leonardsville, N. Y., on the 20th June, Mrs. Nancy Palmiter, consort of Mr. Greene Palmiter, in the 84th year of her age. Sister P. was a mother in Israel, having been connected with the church of Christ nearly seventy years. She embraced the Saviour when about sixteen years of age. Her early connection with the church was with the free communion Baptists; but in maturer years, and upon more extensive reflection, she saw her inconsistency in living in covenant relation with those who disregarded the Sabbath of the Lord, for which she had uniformly entertained a sacred regard, and religiously observed. She therefore left her free-communion brethren, and united with the Seventh-day Baptist Church in Scott, Cortland Co., N. Y., in the vicinity of which she resided, and of which she remained a member until her removal to the general assembly and church of the first-born which are written in heaven. By the steadfastness of her faith, and her stable piety, she enjoyed the Christian confidence of all who knew her. "The memory of the just is blessed."

In Georgetown, N. Y., June 15, Elisha Stillman, a member of the Seventh-day Baptist Church of Lincklaen. He was humble and faithful in efforts to use his small talents to lead others to love the Saviour.

In Hartsville, N. Y., June 24th, after a brief period of sickness, in the 31st year of her age, Clarinda S. Wilcox, wife of Mr — Wilcox, and daughter of Dea. Nathan Truman. She had for several years been a member of the Seventh-day Baptist Church of Hartsville. N. V. H.

Board Meetings.

THE next Quarterly Meetings of the Executive Boards of the Seventh-day Baptist Missionary Society, the American Sabbath Tract Society, and the Seventh-day Baptist Publishing Society, will be held at the meeting-house in Plainfield, N. J., on First-day, July 8th, commencing at 9 o'clock A. M.

Magnificent Floral Gift.

SUBSCRIBERS to the "CHRISTIAN DIADEM" for 1855, are entitled to a splendid steel engraving, the ☞ LILLY AND THE ROSE PERSONIFIED, being given *gratis* to all old and new subscribers who send us only ONE DOLLAR, by mail or otherwise.

Six Copies for Five Dollars.

The Diadem is a strictly moral and religious work—designed for the Christian family without regard to any particular denomination.

FIFTY ENERGETIC BUSINESS MEN are wanted immediately to circulate the "Diadem" throughout the Eastern and Western States. To such as can send good references the very best inducements will be given. Address Z. P. HATCH, Publisher, 9 Spruce street, New York. May 24—3m.

The very Book that every body has been Wanting.

The Book for the Parlor, the Book for the Fireside, the Book for the Professor, and the Book for the Non-Professor.

THE RELIGIOUS DENOMINATIONS OF THE UNITED STATES: Their History, Doctrine, Government, and Statistics; with a Preliminary Sketch of Judaism, Paganism, and Mohammedanism. By Rev. Joseph Belcher, D. D., Honorary Member of the Historical Societies of Pennsylvania and Wisconsin, author of "William Carey, a Biography," etc., etc., and "Editor of the Complete Works of Andrew Fuller," "Works of Robert Hall," etc, etc. Large octavo, 1024 pages, handsomely embellished by nearly two hundred engravings.

This invaluable work is rapidly finding its way among all classes of the American people. The clear, comprehensive, and impartial manner in which the learned author treats each and every denomination, is winning for him golden opinions from the highest authorities in the land. The innumerable lively tales and anecdotes of ministers, churches, and laymen, which he introduces with the articles of faith and all important statistical information, give to the work a life, vigor, and spirit truly delightful. One cannot sit down to it without being convinced that his subject is in the hands of a master, nor rise but with kindlier and more liberal feelings towards the great brotherhood of Christians, under whatever name they bear. Ours is a great, growing, and glorious country, and every family, and every young man, throughout its length and breadth, should have a copy as a text book of all its denominations. Wherever known, it is read, and wherever read, admired. Look at the following from among the very many notices received:

It embodies a vast amount of information relative to the origin, history, and missionary operations of the different religious denominations in this country, presented in a remarkably interesting and attractive manner.—*Rev. John Dowling, D. D., Author of "The History of Romanism," "Judson Offering," etc.*

This is a large and beautiful volume, and will find a cordial welcome in every family.—*Philadelphia Christian Chronicle.*

So far as concerns independence of vision, there can be no question, as Dr. Belcher surveys each sect with the same dispassionate impartiality.—*Epis. Recorder.*

This massive volume embraces a vast fund of information.—*Presbyterian.*

The work is sold by agents, and will furnish a large amount of interesting and valuable information to the families into which it may be received.—*New York Recorder and Register.*

In the account given of the denominations, he is fair, and generally allows them to speak for themselves, as to their history and institutions.—*New York Christian Advocate and Journal.*

It contains a mass of interesting facts and statistics.—*Norton's Literary Gazette.*

Judging from the work, it would be difficult to say what are the religious views of the Editor, so fairly, so dispassionately, so charitably, has he treated each and every sect.—*Philadelphia City Item.*

We presume it will be a standard work in thousands of libraries.—*Littell's Living Age.*

Sold only by agents, to whom certain districts are allotted. For particulars address the publisher,
JOHN E. POTTER,
15 Sansom-st., Philadelphia.
Or, Noyes Spicer, Indianapolis, Ind.

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c. *Spring Arrangements*, commencing April 2, 1855: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M. For Somerville, (way.) at 5 30 P. M.

The above trains connect at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 1, 4 and 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 6 and 9.45 A. M. and 3 P. M.; Somerville (way) at 6 A. M.

New York and Elizabethport.

Leave New York at 8 and 10 A. M., 1, 4 and 5 P. M.
Leave Elizabethport at 7.15 and 9.10 A. M., 1, 3.15 and 6 P. M. JOHN O. STERNS, Superintendent.

New York and Erie Railroad.

ON and after Monday, May 7, and until further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Dunkirk Express at 6 A. M. for Dunkirk.
Buffalo Express at 6 A. M. for Buffalo.
Mail at 8¼ A. M. for Dunkirk and Buffalo, and all intermediate stations.
Accommodation at 12¼ P. M. for Port Jervis and intermediate stations.
Rockland Passenger at 3 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.
Way Passenger at 4 P. M. for Newburgh and Otisville and intermediate stations.
Night Express at 5½ P. M. for Dunkirk and Buffalo.
Emigrant at 6 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5½ P. M.

These Express Trains connect at Elmira with the Elmira and Niagara Falls Railroad, for Niagara Falls, at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicago, &c., and with first-class splendid steamers for all ports on Lake Erie.

D. C. McCALLUM, General Sup't.

Miscellaneous.

An Engineer's Monument.

From the Buffalo Democracy.

Spanning from the chasm of the Niagara River, uniting the territories of two different Governments, and sustaining the uninterrupted Railroad traffic of the Provinces of Canada with the United States, 245 feet above a flood of water which man has never been able to ferry, stands the monument of Engineer John A. Roebling. The Niagara Railway Suspension Bridge is the grandest and most distinguishing achievement of Art in this world. It is the proudest, it is the most beautiful, and will prove to be the most enduring monument anywhere set up on this Continent.

Regard this wonderful product of engineering skill. Its span is 821 feet 4 inches. Yet an engine, tender, and passenger car, loaded with men, and weighing altogether 47 tuns, depress the long floor in the center but 5½ inches. The Bridge loaded with a loaded Freight Train covering its whole length and weighing 326 tuns, is deflected in the middle only 10 inches. This extreme depression is perceptible only to practiced eyes. The slighter changes of level require to be ascertained with instruments. Delicate as lace work, and seemingly light and airy, it hangs there high between heaven and the boiling flood below, more solid than the earthbed of the adjacent railways. The concussions of fast-moving trains are sensibly felt miles off through solid rocky soil. In cities, locomotives shake entire blocks of stone dwellings. The waters of the Cayuga Lake tremble under the wheels of the Express Trains a mile away from the bridge. But a Freight Train traversing John A. Roebling's Monument at the speed of five miles an hour, communicates no jar to passengers walking on the carriage way below. The land cables of the Bridge do not tremble under it—the slight concussions of the superstructure do not go over the summits of the towers. This last fact in the stiffness of the great work is of much importance. It furnishes a guaranty of the durability of the masonry. Fast anchored with stone and grouted in solid rock cut down to the depth of 25 feet, the great cables are immovable by any mechanical force incidental to the use of the Bridge or the natural influences it will be subject to. The ultimate strength of these cables is 12,000 tuns. The total weight of the material of the Bridge, and of the traffic to which it will ordinarily be subjected, is 2,262 tuns, to sustain which the engineer has provided, in his beautiful and scientific structure, a strength of 12,000 tuns. He demonstrates, too, that while the strength of the cables is nearly six times as great as their ordinary tension, that strength will never be impaired by vibration. This was the question raised by the *Democracy* a year ago, which excited such general and in some instances such angry discussion. Roebling treated our doubts with a cool reason and the stores of an extensive engineering experience, which gave us to believe that Art had at last attained to a method of suspending iron bridges for railroad use that should entirely obviate the objections to them felt by most of the ironmasters of the United States. He has since that demonstrated it in the wonderful structure which will make him famous.

There are in the Bridge 624 "suspenders," each capable of sustaining 30 tuns—and all of sustaining 18,720 tuns. The weight they have ordinarily to support is only 1,000 tuns. But the Engineer has skillfully distributed the weight of the burdens by the means of "girders" and "trusses." These spread the 34 tuns weight of a locomotive and tender over a length of 200 feet. How ample is this provision made for defective iron or sudden strains!

The anchor chains are composed of 9 links, each 7 feet long save the last which is 10 feet. The lowest link is made of 7 bars of iron, 7 inch by 1 1-2. It is secured to a cast-iron anchor-plate 3 1-2 inches thick, and 6 feet 6 inches square. The other links are equally strong. The iron used was all made from Pennsylvania charcoal, Ulster Co., N. Y., and Salisbury pig, and can be depended upon for a strength of 64,000 pounds to the square inch. The central portions of the anchor-plates through which the links pass is 12 inches thick. The excavations in the solid rock were not vertical. They inclined from the river. The rock upon which the work may rely on the New York side of the chasm is 100 feet long, 70 feet wide, and 20 feet deep. It weighs 160 pounds to the cubic foot, and presents a resistance of 14,000 tuns, exclusive of the weight of superincumbent masonry and embankment.

The Towers are each 15 feet square at the base, 60 feet high above the arch, and eight feet square at the top. The limestone of which they are built will support a pressure of 500 tuns on each square foot without crushing. While the greatest weight that can fall upon the tower will rarely exceed 600 tuns, a pressure of 32,000 tuns would be required to crush the top course. There are 4,000 tuns weight in each of the towers on the New York side.

The cables are four in number, 10 inches in diameter, and composed each of 3,640 small No. 9 wires. Sixty wires form one square inch of solid section, making the solid section of the entire cable 60.40 square inches, wrapping not included. These immense masses of wire are put together so that each individual wire performs its duty, and in a strain all work together. On this, Mr. Roebling, who is a moderate as well as a modest man, feels justified in speaking with the word "perfect." Each of the large cables is composed of 4 smaller ones called "strands." Each strand has 520 wires. One is placed in the center, the rest are placed around that. These strands were manufactured nearly in the same position the cables now occupy. The preparatory labors, such as oiling, straightening, splicing, and reeling, were done in a long shed on the Canada side. Two strands were made at the same time, one for each of the two cables under process of construction. On the completion of one set temporary wire bands were laid on about nine inches apart, for the purpose of the wires closely united and securing their relative position. They were then lowered to occupy their permanent position in the cable. On completion of the seven pair of strands, two platform carriages were mounted upon the cables for laying on a continuous wrapping by means of Roebling's patent wrapping machines. During this process the whole mass of wire was again saturated with oil and paint, which together with the wrapping will protect them effectually against oxydation. Five hundred tuns of this wire is English. American manufactures did not put in proposals. That used was remarkably uniform and most cerefully made.

The law deduced from large use of wire rope in Pennsylvania is, that its durability depends on its usage. It will last much longer under heavy strains moving slowly than it will under light strains moving rapidly. This law was borne constantly in mind by the engineer of the Niagara Railway Bridge. The cables and suspenders are, so to speak, at rest. They are so well protected too from rust that they may be regarded as eternally durable.

Among the interesting characteristics of this splendid architecture are its elasticity. The depression under a load commences at the end, of course, and goes rapidly across. After the passage of a train the equilibrium is perfectly restored. The elasticity of the cables is fully equal to this task, and will never be lost.

The equilibrium of the Bridge is less affected in cold weather than in warm. If a change of temperature of 100° should take place, the difference in the level of the floor would be 2 feet 3 inches.

So solid is this Bridge in its weight, its stiffness and its staying, that not the slightest motion is communicated to it by the severest gales of wind that blow up through the narrow gorge which it spans.

Next to violent winds, suspension-bridge builders dread the trotting of cattle across their structures. Mr. Roebling says that a heavy train running 20 miles an hour across his Bridge would do less injury to it than would 20 steers passing on a trot. It is the severest test, next to that of troops marching in time, to which bridges, iron or wooden, suspension or tubular, can be subjected. Strict regulations are enforced for the passage of hogs, horses, and oxen, in small bodies, and always on a walk.

This great work cost only $400,000. The same structure in England (if it could possibly have been built there) would have cost $4,000,000. It is unquestionably the most admirable work of art on this continent, and will make an imperishable monument to the memory of its Engineer, John A. Roebling.

We append a table of quantities for the convenience of our readers and the more easy comprehension of the character of the structure:

Length of Bridge from center to center of tower	821 ft. 4 in.
Length of Floors between towers	800 ft.
Number of Wire Cables	4
Diameter of each	10 in.
Solid Wire Section of each Cable	60.40 sq. in.
Aggregate Section of the four Cables	241.60 sq. in.
Aggregate Sec. of Anchor Chains, lowest links	276.00 sq. in.
Aggregate upper links	372.00 sq. in.
Ultimate strength of Chains	11.904 tuns.
Aggregate number of Wires in Cables	14,560
Average strength of one Wire	1,648 lbs.
Ultimate strength of four Cables	12,000 tuns.
Permanent weight supported by Cables	1,000 tuns.
Tension resulting	1,810 tuns.
Length of Anchor Chains	66 feet.
Length of upper Cables	1,261 feet.
Length of lower Cables	1,193 feet.
Deflections of upper Cables at medium temperature	54 feet.
Deflections of lower Cables at medium temperature	64 feet.
Average of deflection	59 feet.
Number of suspenders	624
Aggregate ultimate strength of suspenders	19,720 tuns.
Number of Overfloor Stays	46
Aggregate strength of Stays	1,929 tuns.
Number of River Stays	56
Aggregate strength of Stays	1,680 tuns.
Elevation of rail. track above the mid. stage of river	245 feet.

The Man-Monkey of Brazil.

The captain of the French schooner Adrienne, who last summer was stationed at Pernambuco, Brazil, gives the following sketch of a tame monkey:—

"A short time ago I dined at a Brazilian merchant's. The conversation turned upon the well-tutored chimpanze of Mr. Vanneck, a creole gentleman, whose slave had brought him the monkey, which he had caught in the woods. Every one praised the accomplished animal—giving accounts of its talents so wonderful that I could not help expressing some increduality. My host smiled—saying that I was not the first who would not believe in these results of animal education until he had seen it with his own eyes. He therefore proposed to me to call with him on Mr. Vanneck.

I gladly consented, and on the following morning we set out. The house of the creole lies on the road to Olinda, about an hour's ride from town. We proceeded along splendid hedges of cactus shaded by bananas and palm-trees, and at length observed its charming villa. A negro received us at the entrance and took us to the parlor—hastening to tell his master of our visit. The first object which caught our attention was the monkey seated on a stool and sewing with great industry. Much struck, I watched him attentively, while he, not paying any attention to us, proceeded with his work. The door opened; Mr. Vanneck, reclining on an easy chair, was wheeled in. Though his legs are paralyzed, he seemed bright and cheerful; he welcomed us most kindly. The monkey went on sewing with great zeal. I could not refrain from exclaiming, "How wonderful!" for the manner and process of the animal were those of a practical tailor. He was sewing a pair of striped pantaloons, the narrow shape of which showed that they were intended for himself.

A negro now appeared, announcing Madame Jasmin, whom Mr. Vanneck introduced as his neighbor. Madame Jasmin was accompanied by her little daughter, a girl of twelve years, who immediately ran to the monkey—greeting him as an old friend, and beginning to prattle with him. Jack furtively peeped at his master; but as Mr. Vanneck's glance was stern, the tailor went on sewing. Suddenly his thread broke; and he put the end to his mouth, smoothed it with his left paw, and threaded the needle again. Mr. Vanneck then turned to him, and, speaking in the same calm tone in which he had conversed with us, said:

"Jack, put your work aside and sweep the floor."

Jack hurried to the adjoining room and came back without delay, with a broom in his paw, and swept and dusted like a clean housemaid. I could not perfectly make out his size, as he walked upright, not on his four paws. He was about three feet high, but stooped a little. He was clad in linen pantaloons, a colored shirt, a jacket, and red neckerchief. At another hint from his master, Jack went and brought several glasses of lemonade on a tray. He first presented the tray to Madame Jasmin and her daughter, then to us, like a well-bred footman. When I had emptied my glass he hastened to relieve me from it—putting it back on the tray. Mr. Vanneck took out his watch, and showed it to the monkey; it was just three. Jack went and brought a cup of broth to his master, who remarked, that the monkey did not know the movements of the watch, but that he knew exactly the position of the hands when they pointed to three, and kept it in mind that it was then his master required his lunch. If the watch was shown to him at any other hour, he did not go to fetch the broth; while if three o'clock was past without the lunch being called for, he got fidgety and at last ran and brought it; in this case he was always rewarded with some sugar-plums.

"You have no notion," said Mr. Vanneck, "how much time and trouble, and especially how much patience, I have bestowed in the training of this animal. Confined to my chair, however, I continued my task methodically. Nothing was more difficult than to accustom Jack to don his clothes; he used to take off his pantaloons again and again, until at last I had them sewed to his shirt. When he walks out with me he wears a straw hat, but never without making fearful grimaces. He takes a bath every day, and is on the whole very cleanly." "Jack," exclaimed Mr. Vanneck, pointing to me, "this gentleman wants his handkerchief." The monkey drew it from my pocket and handed it to me. "Now show your room to my guests," continued his master; and he opened a door at which he stopped to let us pass, and then followed himself. Every thing was extremely tidy in the small room. There was a bed with a mattress; a table, some chairs, drawers, and various toys; a gun hung on the wall. The bell was rung; Jack went and reappeared with his master, wheeling in the chair. Meanwhile I had taken the gun from the wall; Mr. Vanneck handed it to the monkey, who fetched the powder-flask and shot-bag, and in the whole process of loading acquitted himself like a rifleman. I had already seen so much that was astonishing, that I hardly felt surprised at this feat. Jack now placed himself at the open window, took aim, and discharged the gun without being in the least startled by the report. He then went through sword-exercise with the same skill.

It would be too long to jot down all Mr. Vanneck told us about his method of education and training; the above facts, witnessed by myself, bear sufficient evidence of the abilities of the animal, and its master's talents for tuition. We stayed to supper, to which there came more ladies and gentlemen. Jack again exhibited his cleverness in waiting, at which he acquitted himself as well as any man servant. Going home my companion missed a small box of sweets, out of which he had regaled the monkey with almonds. Jack had managed to steal it from his pocket; and on being afterward convicted of the theft, he was severely punished by his master.

[Chamber's Journal.

What it Costs to Bombard a City.

That war is an expensive occupation, the British Government and people are beginning to understand by means of augmented taxes, and the opening of the fire of the Allies suggests a calculation as to the cost of the iron balls which have been thrown into Sebastopol by the five hundred cannon which have vomited them in what Gortschakoff called "an infernal fire." The accounts by the Asia represent that each of these guns fired 120 rounds a day, which gives a total for the five hundred of 60,000 rounds. This fire had been continued for thirteen days, making an aggregate of 780,000 missiles rained upon the city.

The weight of the shot fired from the guns of the Allies, varies probably from nineteen to one hundred and forty pounds, and of the shells from fifteen to one hundred and ten pounds—and forty-five pounds would probably be a low estimate for an average. This would give a daily delivery of iron to the Russians, amounting to two million seven hundred thousand pounds, and a total for the thirteen days, of thirty-five million one hundred thousand pounds—the prime cost of which, in the rough, at the average price of pig iron in England for the last year, was not less than three hundred and thirteen thousand three hundred and eighty dollars. This is, of course, without any regard to the enormous cost of transportation to the Crimea.

If the cannon balls fired from the Allied lines, during the thirteen days, were rolled into rail bars, weighing sixty pounds to the yard, the bars would extend three hundred and thirty-two miles; or if laid as a railroad would reach from New York to Albany, with all the necessary turn-outs.

The charge of powder for each gun would probably average about six pounds, which would show an expenditure for the thirteen days, of 4,680,000 pounds of powder. Such powder is worth here eighteen cents a pound, but in England would not, probably, cost more than fifteen cents, at which price the powder cost $702,000. [Courier.

A Successful Merchant's Experience.

A communication in *The Country Gentleman* has a word in season for those young men who hanker after tickets in the great lottery of mercantile life:—

I am a city merchant, having commenced my career as an adventurer from the farm, on a salary of $80 per year, and having passed through half a life time of incessant toil to reach the point where dependence ceases, and "dinner ahead" begins. I filled clerkships in several first class mercantile houses, and was associated with a very considerable number of salesmen, accountants and clerks generally. Near thirty years have passed since my city clerkship began, and the retrospect has developed the following results:

All the mercantile houses by whom I was employed, have since failed—one, after an eminently creditable career of fifteen years, was carried into hopeless bankruptcy by outside speculation, and another, after thirty-five years of undoubted success and credit, was, a few months since, involved in inextricable difficulties—the results of a single dash of the pen—and has forever closed its mercantile existence.

Of all the clerks with whom I have been associated, not one has achieved permanent success, equal to the value of a well-stocked 100 acre farm, while from the most brilliant of their number, the Penitentiary, the Hospital, and the drunkard's grave, have claimed their victims. Some embarked in business with lofty anticipations of success, but soon passed away in disaster, and the career of not a few would fill thrillingly illustrated chapters in the unwritten history of city merchants' clerks, and prove beyond question, that

> "Vice is a monster of such frightful mien,
> That to be hated, needs but to be seen.
> But seen too oft, familiar with its face,
> We first endure, then pity, then embrace."

Some sanguine youth may ask where the successful men originate. I answer, they are the one in one hundred of those who embark in business, and the one in several hundred of those who seek clerkships, with bright anticipations of fortune in prospect.

Personally, by a rare combination of favorable circumstances, those "wonder flowers that bloom but once in a life time," I am meeting with what is called success. The way to it was paved by years of incessant labor, of sixteen to eighteen hours per day, and such days and nights of toil as no farmer's man or boy that I have met with ever dreamed of in his rural labors, and which, if applied to the cultivation of a 100 acre farm, would have developed hidden treasures not dreamed of by the reluctant ploughman.

But as years pass, and develop, along with the vanities of life, the grey hairs which are stealing upon me, my thoughts often revert to the home scenes of my childhood in the country, and I feel tempted to shake off this artificial life, and seek for my declining years that repose and quiet which I imagine might be found in rural life, among an intelligent and open-hearted population, devoted to agriculture; and secure to my family those health-giving influences, both mental and physical, which cheerful country life must supply to genial minds.

Butter-Making.

Not one pound in five of the butter sold in our cities under the name of "Goshen," &c., and very little "country butter," is fit for human food. Butter makers should remember these few short rules:—

The newer and sweeter the cream, the sweeter, and higher flavored will be the butter.

The air must be fresh and pure in the room or cellar where the milk is set.

The cream should not remain on the milk over thirty-six hours.

Keep the cream in tin pails, or stone pots, into which put a spoonful of salt at the beginning, then stir the cream lightly each morning and evening; this will prevent the cream from molding or souring.

Churn as often as once a week, and as much oftener as circumstances will permit.

Upon churning, add the cream upon all the milk in the dairy.

Use nearly an ounce of salt to a pound of butter.

Work the butter over twice, to free it from the buttermilk and brine, before lumping and packing.

Be certain that it is entirely free from every particle of buttermilk, or coagulated milk, and it will keep sweet forever.

In Scotland, a syphon is sometimes used to separate the milk from the cream, instead of skimming the pans. [Southern Cultivator.

Modern Comforts.

It is very common to talk of the "good old times" of a few ceuturies back, and there are some who live so entirely in the romance of the past, that their eyes are shut to the conveniences and comforts that modern science, skill, and intelligence have provided. History seldom presents us with the details of the domestic life of our forefathers, and as poetry colors and groups them for her particular purpose, we insensibly become used to looking back upon the "olden time" with a reverence that hides its imperfections and exaggerates its virtues. But this "olden time" was without doubt vastly inferior to the present age, in morality, intelligence and refinement, whilst it was utterly destitute of the comforts and apppliances which now constitute so important an item in the aggregate of human happiness. Some of our most common enjoyments were in the middle age unprocurable even by the wealthy. Indeed, when we come to examine how our ancestors lived, we almost wonder why they lived.

A Roman Senator, who in the Empire's palmy days possessed estates in Naples and Britain from which he drew an income that would be equivalent to a royal revenue in this day, had neither glass to his windows nor a shirt to his back, and when he rode in his coach of solid gold, without spring or covering, might envy our laborer who goes out to his work in a railroad car. An Earl of Northumberland breakfasted off wooden trenchers and dined in state off of pewter, and when he was absent from Alnwick Castle, the glass was taken out of the windows and laid up in safety. Not a cabbage, carrot, turnip, or other edible root, grew in England during the early part of the reign of Henry the Eighth, and from the scarcity of fodder, fresh meat was only obtainable during the summer, salted hog's flesh being generally used by all classes the rest of the year. So important an article, then, was cattle, that it was known as "live money," and our word "capital," which signifies stock generally, was derived from the Latin word "capita," or heads of beasts. The etymology of the law term "chattels," is similar. Queen Elizabeth was satisfied to breakfast off of a tankard of ale, and dreamed not of the day when tea, coffee, and sugar would become necessaries to the poorest household in her kingdom. The cause of all the increased comforts which the most modest income will now procure, and many of which were formerly beyond the reach of even the richest, is found in the accumulation of commodities, and in the accumulation of capital, augmented and diversified in its employment by the security given to it, by the demand which it in turn produces for labor, and the reward it holds out for the discovery of the new and useful in science, arts and mechanics, and by the facility of exchange, by which all the products of labor and skill are bartered, directly or indirectly, for one another. Civilization and progress have brought to every country in which they have found lodgment, more real luxury and happiness than were to be found in any of the regions pictured by the poets; even though a fructuous fancy represented their rivers as flowing with milk, the trees dropping honey, and their acorns as edible as chestnuts. A single bright thought, worked out into the means of extending the happiness and dominion of man, does more for the world than all the fabled gifts of the gods of classic antiquity.

[Balt. American.

DINING AT SEA IN A GALE.—The following graphic scene on shipboard is depicted by a correspondent of the Philadelphia *Bulletin:*

"There is but a step from the sublime to the ridiculous, from the deck to the saloon. It is rather too much trouble for a lazy man to eat on shipboard in rough weather. It would require a man to have the hundred hands of Briareus and the hundred eyes of Argus, and to keep them all in constant occupation, too, to dine in safety, to say nothing of comfort—for that, under the circumstances, is totally out of the question. You have to hold on to your plate to keep it near you; to hold on to your glass of water to avoid the unnecessary luxury of an extempore shower-bath; to hold on to yourself to keep yourself at the table; to hold on to the table to keep yourself off of the top of it, and away from your neighbors. Besides this, to dodge or defend yourself, as the case may be, from the flying dishes that occasionally make little excursions on their own responsibility. A man that can get his victuals on board a ship in a storm, can get his living anywhere; he need have no fear of the future, so far at least as eating is concerned."

American Newspapers.

During the late debates in the British Parliament on the bill to abolish the newspaper stamp, Sir Edward Bulwer Lytton, the novelist, said:—

It is the taste of the public that forms the newspaper, not the newspaper that forms the taste of the public; and if the press is an honor to the country, it is because it represents what honors the country still more—the good sense and civilized humanity from which the press takes its color and its tone. Now, you have been told that this change will degrade our press to the level of the American, and you have been led to infer that the American press is left in the hands of ignorant adventurers, whereas the remarkable peculiarity of the American press is, that it absorbs nearly all the intellect of that country. There is scarcely a statesman of eminence, an author of fame, who does not contribute to the American periodical press; and, therefore, the editor of one of their journals says on this very subject, "If the American press is inferior to the English, it merely argues that the intellect of the country is inferior, for nearly all the available intellect of the United States is engaged in their press." This serves to show you, that if our press is superior to the American, it does not depend upon the fiscal laws, but upon the general standard of civilization; in other words, the press can but reflect the public.

Pins.

What becomes of all the Pins? [Ex.

There are not so many pins in the world as many imagine. The largest pin factory in the United States is in Waterbury, Conn. It manufactures at least one-third, if not one-half, of all consumed in the United States; and yet the result of its labors is but four millions of pins per day. Consequently it has to run six days to make one pin for each inhabitant! If to what this establishment produces, we add all made by other factories and all imported, the daily product is not half a pin to each person! So that, if every one lost or destroyed one pin a day, instead of one pin every two days, the whole world of pinned garments would fall to pieces!

The destruction of pins, therefore, is by no means as great as is generally supposed; and "What becomes of all the pins?"—not such a very difficult question to solve, after all.

And while talking of pins, it is a singular fact, that the Chinese have always refused to adopt the article. Various attempts have been made to overcome their prejudices, but without success. They adhere to the button and string—making the two supply the place of the more simple and ever-ready pin.

[Albany Journal.

SALT, PLASTER, AND ASHES FOR CORN.—Take a half bushel salt, one bushel plaster, two bushels leached or unleached ashes; mix thoroughly with a shovel upon the barn floor, and apply to the corn as soon as mixed, and as soon as the corn is planted, the same day if possible. I direct my hands to press the earth over the corn with the back of the hoe on covering it, so that its exact position may be known, and have boys to follow immediately after and scatter a small handful of the composition over the print of the hoe. I usually apply about three bushels of the mixture to the acre.

If by any accident any of the hills do not get their share, the color of the corn on coming up reveals the fact, being usually rather yellow, while all that receives the dressing is of a very dark green, and grows rapidly from the start—being little if any retarded by chilly, backward weather, which frequently occurs after corn planting, and very seldom "rolling" in the most severe droughts. For two years past I have commenced hoeing on the fourteenth day after planting.

I apply the same mixture, in the same manner, to potatoes, and with marked benefit.

WHITEWASH FOR OUTHOUSES AND FENCES.—Take a clean barrel that will hold water, put into it half a bushel of quicklime, and slack it by pouring over it boiling water sufficient to cover it four or five inches deep, and stirring it until slacked. When quite slacked, dissolve it in water, and add two pounds of sulphate of zinc, and one of common salt, which may be had at any of the druggists', and which in a few days will cause the whitewash to harden on the wood-work. Add sufficient water to bring it to the consistency of thick whitewash.

To make the above wash of a pleasant cream color, add 3 lbs. yellow ochre.

For fawn color, add 4 lbs. umber, 1 lb. Indian red, and 1 lb. lampblack.

For grey or stone color, add 4 lbs. raw umber, and 2 lbs. lampblack.

The color may be put on with a common whitewash brush, and will be found much more durable than common whitewash.

[Scientific American.

INCREASING THE SIZE OF FLOWERS.—From an exchange, we learn that a horticulturist of the suburbs of Versailles, in studying the physiology of the vegetable kingdom, conceived the idea that the smallness of certain plants—the violet, for example—was owing to an atmospheric pressure too great for their delicate organs. Having fixed this idea in his mind, the florist conceived the idea of putting his theory into practice. Providing himself with a small balloon, rendered sufficiently tight to prevent the escape of any gas, he launched it into the air, having attached to it a silken cord twelve hundred meters long. Instead of a car, the balloon sustained a flower-pot of Parma violets. This experiment has been going on about two months with the most wonderful results, in the shape of violets large as Bengal roses. It is expected that the above experiment may be turned to some account.

It is one of the most curious facts developed in statistics, that the exports of tobacco from this country have varied but very little in the last fifty years. In 1790 we sent abroad one hundred and eighteen thousand hogsheads, in 1840 one hundred and nineteen thousand.

New Steamboat Line for Albany and Troy.
From Pier 15, foot of Liberty-st., at 6 P. M.

STEAMER RIP VAN WINKLE, C. W. Farnham, Commander, Monday, Wednesday and Friday, at 6 o'clock, P. M.; steamer COMMODORE, L. Smith, Commander, Tuesday and Thursday, at 6 o'clock, P. M., and SUNDAY, at 5 P. M.

Fares: Saratoga, $1 50; Moreau, $2 15; Fort Edward, $2 15; Whitehall, $2 75; Castleton, $3 10; Rutland, $3; Burlington, $4; Rouses Point, $5 50; Montreal, $7 50.

These Boats will arrive in Albany or Troy in ample time to form connections with all the Railroads, North, East or West, enabling passengers to reach Montreal and intermediate points the same day.

These Steamers are of the first class for strength and speed—well known favorities of the public—having been thoroughly overhauled during the past winter, and offer every accommodation that can be desired by either freighter or traveler.

Through tickets can be obtained on board the boats for Saratoga, Moreau, Fort Edward, Whitehall, Castleton, Rutland, Burlington, Rouse's Point and Montreal.

The Northern Freight Express will give Bills of Lading to all points as above named. Shippers who desire it, can have time receipts, by applying at the office on the Pier. A. A. DYKEMAN.

Ayer's Pills.

A NEW and singularly successful remedy for the cure of all Bilious diseases—Costiveness, Indigestion, Jaundice, Dropsy, Rheumatism, Fevers, Gout, Humors, Nervousness, Irritability, Inflammations, Headache, Pains in the Breast, Side, Back, and Limbs, Female Complaints, &c., &c. Indeed very few are the diseases in which a Purgative Medicine is not more or less required, and much sickness and suffering might be prevented, if a harmless but effectual Cathartic were more freely used. No person can feel well while a costive habit of body prevails; besides it soon generates serious and often fatal diseases, which might have been avoided by the timely and judicious use of a good purgative. This is alike true of Colds, Feverish symptoms, and Bilious derangements. They all tend to become or produce the deep seated and formidable distempers which load the hearses all over the land. Hence a reliable family physic is of the first importance to the public health, and this Pill has been perfected with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing any thing hitherto known of any medicine. Cures have been effected beyond belief, were they not substantiated by persons of such exalted positions and character as to forbid the suspicion of untruth.

Among the eminent gentlemen who have testified in favor of these Pills, we may mention:

Doct. A. A. Hayes, Analytical Chemist of Boston, and State Assayer of Massachusetts, whose high professional character is endorsed by the—

Hon. Edward Everett, Senator of the United States.

Robert C. Winthrop, Ex-Speaker of the House of Representatives.

Abbott Lawrence, Minister Plen. to England.

†John B. Fitzpatrick, Catholic Bishop of Boston; also

Dr. J. R. Chilton, Practical Chemist of New York City; endorsed by

Hon. W. L. Marcy, Secretary of State.

Wm. B. Astor, the richest man in America.

S. Leland & Co., Proprietors of the Metropolitan Hotel, and others.

These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compounded not of the drugs themselves, but of the medicinal virtues only of Vegetable remedies extracted by Chemical process in a state of purity, and combined together in such a manner as to insure the best results. This system of composition for medicines has been found in Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any process. The reason is perfectly obvious. While by the old mode of composition, every medicine is burdened with more or less of acrimonious and injurious qualities, by this each individual virtue only that is desired for the curative effect is present. All the inert and obnoxious qualities of each substance employed are left behind, the curative virtues only being retained. Hence it is self-evident the effects should prove as they have proved, more purely remedial, and the Pills a more powerful antidote to disease than any other medicine known to the world.

As it is frequently expedient that many medicines should be taken under the counsel of an attending physician, and as he could not properly judge of a remedy without knowing its composition, I have supplied the accurate Formulæ by which both my Pectoral and Pills are made, to the whole body of Practitioners in the United States and British American Provinces. If however there should be any one who has not received them, they will be forwarded by mail to his request.

Of all the Patent Medicines that are offered, how few would be taken if their composition was known! Their life consists in their mystery. I have no mysteries.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject freely acknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many eminent Physicians have declared the same thing of my Pills, and even more confidently, and are willing to certify that their anticipations were more than realized by their effects upon trial.

They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.

Prepared by Dr. J. C. AYER, Chemist, Lowell, Mass.

Price 25 Cents per Box. Five Boxes for $1 00.

Sold at wholesale in New York by A. B. & D. SANDS, retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere.

The Sabbath Recorder,
PUBLISHED WEEKLY
By the Seventh-day Baptist Publishing Society,
AT
NO. 9 SPRUCE-STREET, NEW YORK.

Terms:
$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the time to which they reach.

☞ No paper discontinued until arrearages are paid, except at the discretion of the publisher.

☞ Communications, orders, and remittances, should be directed, post paid, to GEO. B. UTTER, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.
The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the publisher that he does not wish for it.
If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

Rates of Advertising.
For a square of 16 lines or less—one insertion $ 75
" " each subsequent insertion 50
" " six months 6 00
" " one year 10 00
For each additional square, two-thirds the above rates.

The Sabbath Recorder.

THE CHURCH AND THE MINISTRY.

Report on Ministerial Supply, read before the Seventh-day Baptist Western Association at its last session, and ordered to be published in the Sabbath Recorder.

INTRODUCTORY.

The Church, *ordained* and organized of God, is the great *spiritual* institution of humanity. It springs from the blood of Christ, its great Head and High Priest. The church, through Christ, is self-sustaining, self-developing. It is, likewise, aggressive, subduing all other institutions and kingdoms to itself. All of the means used for its prosperity, advancement, and ultimate triumph, spring from within itself. The Ministry is the highest official development of the church, and the most important agency for the fulfilling of its mission.

NECESSITY OF THE MINISTRY.

The necessity of this office lies deeply imbedded in the essential elements of Christianity. The stability, growth, and ultimate triumph of the church, depends in a very important sense upon the ministry. Ministers are the especial embassadors of Christ to the world, delegates of the church, heralds of the gospel, messengers of reconciliation, instructors of the world in spiritual knowledge, stewards of divine mysteries, master-builders in the great spiritual temple, leaders in the great army of the cross, shepherds of the flock. Without these spiritual leaders, the common soldiers would fear and flee before the enemy; without these master-builders, the temple would never be completed; without these shepherds to feed and guard, the sheep of the fold would be quickly scattered and destroyed; without these spiritual teachers and guides, the world would perish for the want of light and life. Around the ministry, then, cluster the interests of religion; in it center the highest present and eternal interests of man.

DUTIES OF THE CHURCH.

If such is the importance, the necessity of the ministry, it is of the utmost consequence that the supply of able, efficient ministers, should be commensurate to the demand; and if the church, through Christ, is self-developing, weighty responsibilities arise for the church to labor earnestly and faithfully to supply this demand. The church has a duty to do here as elsewhere. A state of supineness and passivity, a folding of the hands and waiting for the Lord to raise up laborers, to send whom he will, irrespective of prayer and effort, is opposed to all of the great principles upon which the church is founded. Effects follow causes in the spiritual as in the physical world, and vain are the desires of the church for the supply of the ministry, without corresponding effort. Instead of being in that vascillating and uncomfortable state where she dare not put forth any active effort to secure laborers, lest those unsent of God should be secured; neither dare she accept those offering themselves unsought, lest those uncalled should be received. It becomes the church to make the same effort in kind, to secure a full supply in the ministry, as is made to secure the conversion of sinners, the spread of the gospel, or the evangelization of the world.

PRAYER.

Prayer is one of the first and great duties of the church. The earnest and continued prayer should be, Lord, send forth more laborers into the world's great harvest field. This is the injunction of the Lord of the harvest, enforced by all the emphasis that can be given by a perishing world ever white for the harvesters. If the church feels any interest for the salvation of the world, she will pray earnestly for those who are to be the heralds of this salvation. If prayer is efficacious, through the Spirit, for the conversion of the sinner, why should it not be in sending forth laborers to gather in this spiritual harvest? Indeed, do not blessings generally attend such prayer? Have not those churches which have been most faithful in this respect, been also most graciously blest and highly honored in their sons going forth as the embassadors of Christ? How great, also, is the reflex influence upon the young and trembling seeker after duty? What strength, courage, and impetus, does the assurance of sympathy and prayer give to him that is struggling, and perhaps sinking under the sense of responsibility! If Christ has commanded the church to pray for laborers; if He hears the prayer of such as thus pray, blessing not only him who prays, but the one also for whom the prayer is offered—it becomes the church to comply most faithfully with this injunction. Indeed, prayer is the great central duty around which all other duties of the church, in respect to the ministry, cluster. This duty performed, and the way is prepared for abundant and rich blessings upon other efforts—but neglected, and all is lost.

THE VOCATION.

The church is obligated, as an inseparable accompaniment of prayer, to *search* for those who have a call of God to preach, and *call* them forth to their appropriate work. The ministry is emphatically a vocation—a calling. The candidate is to be in a state of passiveness. He is not to be self-called or self-sent, but is to be called and sent of Christ and His Church. The most he can do is to place himself in a state of submission and willingness. He can say, "Here am I, send me," and having done that, he must patiently wait until he receives the commission to go. But whence this commission, this vocation? It must come primarily from the great Head of the Church, through the influences and promptings of His Spirit; and, secondarily, through His Church. Hence the call is twofold—internal and external. Neither of these evidences alone should be deemed by the candidate as full and satisfactory; their union can be deemed the only full an sufficient evidence of a call, save, perhaps, in rare or extreme cases, where the candidate may be warranted in proceeding without the external vocation or call of the church. If this position be the correct one, it follows, that the church has important duties to perform, responsible obligations to fulfill, in searching out those called of the Spirit to the ministry. She is to act in harmony with the Spirit.

The first and great question of the church in respect to a candidate should be, Is he called of God? Is the ministry his vocation? This being determined, the whole is determined. But how shall the church know when it has found a man called of God, a proper candidate for the ministry? A great number of young men are at some time in their earlier Christian experience troubled about the question of preaching. How shall those truly called be separated from those that are not—the genuine from the spurious? In order to settle these questions, several others are necessary to be pre-determined.

THE IDEAL MINISTER.

In order to determine these questions intelligibly, it is necessary for the church to have some example, some model, some ideal, formed, if possible, after the Divine ideal.

Paul's ideal of a minister is the great ideal by which the church is ever to be guided. The candidate must be blameless, earnest, sober, vigilant, industrious, kind and hospitable, temperate, peaceable, patient, benevolent, apt to teach, apt to govern, blameless in character as in reputation, with piety deep and earnest.

With such an ideal to guide her search, the church is to seek earnestly and constantly for men for the ministry. While the candidate, when found, must be his own judge of his *convictions* of duty, the church must judge of his *qualifications*, his *fitness*, his *adaptability*; in short, whether he corresponds or not to Paul's ideal of a minister. The questions to be settled by the church, in order to arrive at an answer to the question, Is he called of God to the ministry? are, Is the ministry the ultimate object with the candidate? or is he seeking it as a means to something ulterior—seeking it because it is a profession of honor—because, it opens a broad and inviting field for the culture and display of eloquence and oratory, a power so enchanting to the young; or, is the moral dignity and grandeur of the vocation what attracts him; or, is it "a vague religious sentimentalism—the poetry of the thing?" Such signs are bad. On the other hand, is the desire of the candidate, accompanied by on humble, yet lively and spiritual frame, an earnest desire for the glory of God, the upbuilding and extension of his kingdom, a manifest willingness to be a servant of Christ in any sphere, however humiliating or laborious? Is the glory of God and the spiritual welfare of man evidently an all controlling, an all-absorbing motion with him? Such signs are good and valuable. Furthermore, does the mind of the candidate develop naturally, spontaneously in the direction of the ministry, or does it naturally tend to some other pursuit? Has he a taste, an inclination, a desire for the ministry? Is he adapted to this sphere of activity; is it his appropriate sphere? Will he be likely to succeed better, do more for the glory of God, in this calling than in any other? Is the candidate qualified, or capable of being qualified, intellectually and physically? Is he possessed of good sound common sense; a mind naturally adapted to teaching, governing, controlling; a taste for study and investigation; a progressive spirit; a mind with broad and comprehensive views, with noble and generous and benevolent impulses; a spirit temperate, industrious, peaceable, blameless, and devoted? Some of these questions belong more immediately to the candidate, as his internal convictions, than to the church; but they must be manifested more or less in his character, thus furnishing an answer to them. If the church receives a satisfactory answer to these questions—if not in all their details, nevertheless in their more important outlines—if the ideal is represented in the candidate, then she is bound to accept him as called of God, and treat him accordingly. And yet does she do it?

TIMOTHEUS.

Take, for example, a young man, Timotheus, if you please. He possesses a deep and fervent piety. In the prayer-meeting, and all other religious exercises in which he engages, a life-giving spirituality is manifested. He enters perhaps the seminary of learning, and his mind begins to develop in harmonious and beautiful proportions. The outlines of Paul's ideal minister reveal themselves from beneath the coatings of youth and inexperience. No one, however, inquires respecting his convictions of duty. No one suggests to him the propriety of his entering the ministry, or invites him to consider the subject. Meanwhile poverty has a firm and unrelenting grip upon him, neglect freezes him. Time passes. It at length transpires that he has gone over to some other denomination, or, perhaps, turned his back upon all religious organizations, and even upon religion, and given himself up to seeking riches and fame. We search for the cause and the responsibility. While it doubtless rests primarily with himself, yet the church has a heavy account in the matter. He has been struggling with duty on the one hand, and poverty and coldness, and perhaps neglect, on the other. None of his brethren sympathized with him, counseled or encouraged. He meets with sympathy from other denominations, and is led captive by it; or, perhaps, in his utter loneliness, gives himself up to seek that which he knows will make friends and sympathizers—*gold*. This is no fancy sketch; but, with slight modifications, to suit individualities, it is the biography in outline of hundreds of young men.

THE MINISTRY AND OTHER PROFESSIONS.

Why is it that the church is perishing for the want of shepherds? Is it because there are no young men competent for the office? Why is it that the other professions are burdened and groaning with the number of the young men pressing into their ranks? While these professions are crying out, Enough, enough, the sacred office is continually crying, Give, give. The great fault, if we mistake not, is in the church herself; and, as a great and fundamental requisition, she needs a deep and prevailing piety, a higher toned and more fervent religious sentiment, a more permanent revival spirit. Ministers are generally the outgrowth of a warm, a genial religious temperature. A state of lukewarmness, of coldness and inactivity, is not well suited to the development of the ministerial element. The church, likewise, does not supplicate the Lord of the harvest with sufficient importunity for laborers. She does not press the claims of the ministry with sufficient energy and perseverance upon the attention of her young men of piety and talent. The intrinsic importance of the ministry, considered in its far-reaching power and eternal consequences, and its relative importance compared with other professions, are not constantly kept in the foreground with that distinctness that is demanded. The claims and realities of the unseen world are not held up as they should be before the young in contrast with the fleeting verities of the present.

There is an anecdote related of the Italian reformer Filippo Neri, and the youthful student, which very finely illustrates the spirit, in this respect, by which the church needs to be animated. While he was living at one of the Italian universities, a young man came running up to him with a face full of delight, and told him that his parents had granted what he had long been wishing, and that he had come to commence his study of the law at the law school, and meant to spare no pains or labor in getting through his studies as quickly and as well as possible. "Well," inquired Filippo Neri, "and when you have got through your course of studies, what do you mean to do then?" "Then I shall take my doctor's degree," answered the young man. "And then?" asked Filippo Neri again. "And then," continued the youth, "I shall have a number of difficult and knotty cases to manage, shall attract people's notice by my eloquence, my zeal, my acuteness, and gain a great reputation." "And then?" repeated the holy man. "And then," replied the youth, "why, then there can't be a question, I shall be promoted to some high office or other; besides, I shall make money and grow rich." "And then?" repeated Filippo. "And then," pursued the young lawyer, "then I shall live comfortably and honorably, in health and dignity, and shall be able to look forward quietly to a happy old age." "And then?" added the holy man. "And then," said the youth, "and then—and then—then *I shall die*." Here Filippo lifted up his voice, and again asked, "And then?" Whereupon the young man made no answer, but cast down his head and went away. This last *And then?* had pierced like a flash of lightning into his soul, and he could not get rid of it. Soon after he forsook the study of the law, and gave himself up to the ministry of Christ, and spent the remainder of his days in godly words and works.

If the church would keep the *And then?* more clearly and constantly before the young, she would not have to lament so frequently the desertion to other pursuits of her most promising young men.

PASTORS.

The pastor occupies in respect to ministerial supply, a very important and responsible position. From his very relations, he is expected to be, and ought to be, acquainted with the powers, the tendencies and aspirations of the youth of his flock. Though old in years, yet he is ever to be young, genial and sympathizing in his feelings, so that the young can open their hearts freely to him, repose implicit confidence in him, and he in turn will be able to lead and direct their aspirations, and advise with them as a father would with a child in respect to duty. The spirit which ministers manifest in this respect, will influence very materially the ministerial supply. It is not meant by this, open opposition; that would hardly be expected from any true minister; yet much depends upon the spirit, the *animus* with which they meet their duties to the young seeker. They may meet the candidate indifferently, coldly, or in such a manner as to repel rather than attract, rather to discourage and dishearten than to cheer and encourage. Does the pastor heartily welcome every young Samuel, as from the Lord; or has he a preconceived pattern to which the young candidate must conform; an iron bedstead to which he must fit, though it be at the expense of limb and life? Does he hail him as a co-worker in the vineyard of the Lord, or does he view him askance, Esau-like, as a young Jacob—*a supplanter?* Does he wait in supineness for the Lord to send, or, as Diogones went about the streets of Athens at mid-day, with a lighted torch, searching for a *man*, so does he go about, in the light of prayer and the Divine Word, searching for laborers? If so, whether going out the third, sixth, ninth, or the eleventh hour, he will doubtless find the market-place and streets lined with laborers, standing idle, because no man hath hired them; find them in sufficient numbers to supply the vineyard of the Lord.

To be continued.

AMANDA'S DIRGE.

When fate unseemly blasts the bloom
Of lovely Virtue in her prime,
And Love and Friendship wail the doom
That bears her from the realms of time;
'Tis meet some solemn lyre should blend
With fond Affection's heart-wrung moan,
And Poesy, sympathetic, lend
A Requiem to the mournful tone.
The fair young form hath found its home,
Its home in Death's dark hermit cell,
From whence no *mortals* rise or roam,
But entering, there forever dwell.
When thou bestow'st a soul so kind,
Oh Heaven! on frail and fragile clay,
A model for all human kind,
Who could but mourn thou tak'st away!
Amanda, thus hast *thou* been called—
Back to thy native sphere received!
Look down, blest shade, in bliss installed!
See all who knew the erst bereaved.
Look down! but ah, no more thy eyes
Shall lively dwell upon our own;
No more thy harmless mirth arise,
And wild the music of each tone.

Ye village youth! ye maiden mates!
When ye shall wander 'mongst the tombs,
And swimming eyes shall scan the dates
Above the church-yard's silent rooms;
When ye shall tell around her head,
In whisper, how (blest solace given)
Ye loved her living—mourn her dead,
Oh, know, Amanda lists in heaven!

Little Genesee, N. Y., June 17, 1855. B. F. W.

REMONSTRANCE ON SLAVERY.

"The people of Scotland" have sent to the "People of the United States of America" a "Friendly Remonstrance on the Subject of Slavery." The document is signed by a large number of Ministers of the Gospel on behalf of their congregations, Chairmen of Public Meetings on behalf of their constituents, &c., showing that it may properly be described as a Remonstrance from "the People of Scotand." The first signature is that of "D. McLaren, Lord Provost, Chairman of Public Meeting, at which there were about 1,600 persons present, in the Rev. Dr. French's Church, Ediburg." It is also "signed on behalf of a great Public Meeting of the citizens of Glasgow, held in the City Hall, between three and four thousand persons being present, the 16th of Nov. 1852, by Wm. Smeal, Chairman." It is scarcely necessary for us to give the two columns of similar signatures; but we cheerfully make room for

The Remonstrance.

Americans: You acknowledge the Brotherhood of Nations. You avow the doctrines that the nations of the earth constitute one great family, and that, as such, they are bound to each other by common interests and common ties; and in avowing this, you grant the right of any one member of that brotherhood to lift up a calm and truthful testimony, before any other member, on behalf of humanity, justice and freedom, when these are assailed or outraged.

We are as one with you in the maintenance of this principle; and it is because we look to you as brethren, bound to us by the most endeared associations, that we now address you.

It is in no spirit of pride or fancied superiority that we make our appeal, but rather in a spirit of self-humiliation, calling to mind that we also were once partakers in this iniquity. And we hope that the fact of our having done what we could to wipe out our reproach as a nation once implicated in upholding slavery, will induce you to give the more willing and earnest heed to our remonstrance.

Americans: We plead with you on behalf of three millions of immortal beings, whom you hold in bondage. We plead for the removal of the curse from their brow, the gall from their earthly cup, the chain from their limbs, the iron from their souls. We plead for the immediate, unqualified and entire abolition of slavery throughout your land.

It is not necessary that we enter on any lengthened proof of the evils of this system. It carries its condemnation with it. That condemnation is heard in groans of anguish and written in tears of blood. It has been inscribed, as with letters of fire, on the desolated hearts and homes of millions. The voice of the Eternal proclaims it. A system which subjects three millions of human beings to the condition of mere "chattels personal" in the eye of the law—which deprives them of all their rights and privileges as intelligent and accountable creatures—which disallows or breaks asunder the most sacred ties of life—which virtually annuls the "higher law" of God, and substitutes in its stead the absolute will of a sinful man as a rule of obedience—which robs its victims of the fruits of their toil, and denies to them the means and opportunities of cultivating their deathless faculties—a system which sanctions atrocities like these must be essentially wrong and unutterably shameful, and cannot be mentioned in the same breath with truth, righteousness and freedom.

Americans: We appeal to you, on the ground of our common humanity, to abolish this system. We assert the manhood of the enslaved. These three millions who are in bondage are men and women like ourselves; gifted with like thoughts, like feelings, like aspirations; and like us, too, destined for immortality. Why, then, treat them as if they belonged not to human kind? That there are humane men among the upholders of the slave system, and slaves who receive humane treatment, we readily acknowledge; and yet we are compelled to say, the inevitable tendency of such a system must be to subject the enslaved to treatment that is anything but humane. Where is the humanity of treating men and women as if they were brute beasts or creeping things? of trampling in the dust the most sacred relationships of life? of rearing slaves like cattle for the market? of subjecting them to the lash and to numerous indignities and immoralities? and this according to the caprice or passion of an irresponsible owner. Is there even the semblance of humanity here? We plead with you to treat the slave as a man.

We appeal to you on the ground of Justice. Where is the justice that is dealt out to the slave? Where is there anything meriting the name? The system takes from the slave all that he has, all that he gains, from life's commencement even to its close. It strips him of money, house, wife, children. It deprives him of education, civil rights, liberty of conscience, the Bible. It condemns him without a hearing, and subjects him, without a trial, to bonds, imprisonment, and even death. In vain does he look for justice at the hand of his oppressor. There is no tribunal of righteousness to which he can appeal. In the preamble to your noble Constitution, it is affirmed that it was framed "to establish justice," and yet there are three millions of human beings at this hour, within the bounds of your republic, who may be treated with every indignity and cruelty, while the justice of your land extends no shield over their helpless heads.

We appeal to you on the ground of consistency. And is not this the fundamental principle set forth in your glorious Declaration of Independence—that "all men are born free and equal; that they are endowed by their Creator with certain unalienable rights; that among these are life, liberty, and the pursuit of happiness"? What means this language? Does it not mean that the man of color, as well as the white, is a man? That the black man is born free as well as the white? That God has given to the black man, as well as the white, those inalienable rights? Where, then, is the consistency between your profession and your practice as a people?

Again, in your past history, you have shown that you are ever ready to sympathize with the victims of despotism in other lands in their struggles for freedom. In this you do well. We mingle our sympathy with yours. But where is the consistency of having overflowing sympathies for the enslaved afar off, and bondage and oppression for millions in the bosom of your own land?

We appeal to you on the sacred ground of our common Christianity. Shall our appeal here be unheeded? America proclaims itself to be a Christian land. And is not the very spirit of Christianity one of love? But where is the manifestation of that spirit in the enslavement of three millions of your fellow-men? Is not this the teaching of Christianity's Divine Author, "Love thy neighbors as thyself"? And who is thy neighbor? That down-trodden slave is he. But where is your love, when you even deny him the right to be a man? Does not Christianity teach that God has "made of one blood all nations of men to dwell on all the face of the earth"? But how can you reconcile this great truth with your conduct in shutting out the poor slave from the brotherhood of humanity? Is not this the grand law for the regulation of conduct betwixt man and man, as laid down by the Great Teacher himself, "Whatsoever ye would that men should do unto you, do ye even so unto them"? But if that law be honored in the midst of you, does it not follow that you will bid every slave go free? As you would that men should bind no fetters on your limbs, does not that law demand that ye bind no fetters on theirs? As ye would not be enslaved, Christ bids you enslave none. Have you not Bible and Missionary Societies, and do you not regard them as the glory of your nation? But why send the Bible to slaves of Satan in other climes, and deny it to the slaves in your own land? Why illumine India or China, while you doom to heathen darkness millions in your own country? Americans, by everything that is sacred or awful in our holy religion, we appeal to you to be consistent here. As you professs to be Christian people, listen to the Word of the Most High, "Remember them that are in bonds, as bound with them"—"Proclaim liberty to the captives, and open the prison doors to them that are bound"—"Loose the bands of wickedness, undo the heavy burdens, break every yoke, and let the oppressed go free."

Americans: Shall slavery continue? Shall the accursed system still live under the shadow of law—still be tolerated, fostered, propagated? Shall the foul blot still remain on your national escutcheon? Will you still forsake the good old paths of your fathers, and act as if you sought to quench the altar fires of liberty which they enkindled? Will you continue to undo the work of patriots, reformers, philanthropists, and to affiliate with tyrants, traitors, usurpers and men-stealers? Surely it cannot be! Surely, an indignant nation will say, it shall not be!

Americans: Bear with us in our importunity. We love you as brethren; therefore do we plead with you. We love your magnificent country, your noble institutions, your spirit of progress; therefore do we plead with you. We love liberty, our dearest birthright and yours, for which our fathers and your fathers shed their blood—liberty, the birthright of all; therefore do we plead with you. We love the three millions who are enfettered in the midst of you; therefore do we plead with you. We love Religion, and would see her divine and glorious form making triumphant progress through your land; therefore do we plead with you. We love the image of Jesus, in his disciples of whatever color, and would not see that image in chains; therefore do we plead with you.

Americans: We know that there are difficulties in your way; but these are nothing in comparison with the measureless good to be achieved; your moral influence, your position among the nations, and your glory as a people, will be all the more eminent and enduring if, by one act of magnanimity, you trample these difficulties in the dust. Retrace, then, your steps, we entreat you! Give to the enslaved his inborn, inalienable rights. Give to the toiler the fruits of his toil. Give to the husband the wife of his bosom, and the wife the husband of her youth. Give to the fond mother the child whom God has given to her. Give to immortal minds the priceless blessing of education. Give to the weary, the wretched, and the lost, the light of life, and the hope of eternal repose. Give to man the right to be his own—free amongst his fellows, and accountable to his God. Then shall the Union Flag of Freedom float above a land without a Slave! and the good upon earth will rejoice, and the God of Heaven will bless you.

UNDEVELOPED GOOD.

BY JOHN BOWRING.

There is in every human heart
Some not completely barren part,
Where seeds of truth and love might grow,
And flowers of generous virtue blow;
To plant, to watch, to water there—
This, as our duty, be our care.

Hast thou e'er seen a garden clad
In all the robes that Eden had—
Or vale o'erspread with streams and trees,
A paradise of mysteries—
Plains with green hills adorning them,
Like jewels in a diadem?

These gardens, vales, and plains, and hills,
Which beauty gilds, and music fills,
Were once but deserts—culture's hand
Has scattered verdure o'er the land,
And smiles and fragrance rule serene,
Where barren wilds usurped the scene.

And such is man. A soil which breeds
Or sweetest flowers, or vilest weeds;
Flowers lovely as the morning's light,
Weeds deadly as the aconite;
Just as his heart is trained to bear
The poisonous weed, or flow'ret fair.

Thy outcast brother's blackest crime
May, in his Maker's eye sublime,
In spite of all thy pride, be less
Than e'en thy daily waywardness;
Than many a sin and many a stain
Forgotten—and impressed again.

CLAUDIUS BUCHANAN AND THE HIGHLANDER.

The late Rev. Claudius Buchanan, while a young man, and previous to his conversion, upon returning from a visit to the principal countries of Europe, met an old Highlander, an acquaintance of his father, in the city of London. Young Buchanan gave his countryman a very animated description of his tour and of the wonders that he had seen upon the continent. The old man listened with attention to his narrative, and then eagerly inquired whether his religious principles had not been materially injured by mixing among such a variety of characters and religions.

"Do you know what an infidel is?" said Buchanan.

"Yes," was the reply.

"Then," said he, "I am an infidel, and have seen the absurdity of all those nostrums my good old father used to teach me in the North; and can you," added he, "seriously believe that the Bible is a revelation from the Supreme Being?"

"I do."

"And pray tell me what may be your reasons."

"Claude," said the good old Highlander, "I know nothing about what learned men call the *external* evidences of Revelation, but I will tell you why I believe it to be from God. I have a most depraved and sinful nature, and, do what I will, I find I cannot make myself holy. My friends cannot for me; nor do I think all the angels in heaven could. One thing alone does it; the reading and believing what I read in that blessed book—that does it. Now, as I know that God must be holy, and a lover of holiness; and as I believe that that book is the only thing in the world that produces and promotes holiness, I conclude that it is from God, and that he is the author of it."

This was an argument that had never suggested itself to Buchanan's mind, and which he had no means whatever of meeting.

HOW CAN A MAN BE JUST WITH GOD?

Behold! "I bring near my righteousness." I provided it. I created it. I brought it in. I place it in Zion. It is my free gift. It is *mine exclusively*. It has no respect to human works, and receives no coöperation from them. It is *mine by way of eminence*. All my other works are as nothing compared with it. Their lustre is lost in the splendor of its glory. In it I am infinitely more visible than in them all.

I *bring it near* in the preaching of the Gospel, and in the powerful application of it by The Spirit. It is not the believer's inherent righteousness; for, it is *brought near*. It is not *wrought in him*, but made over to him as a *gift*, and *put upon him*. Rom. 5: 17, and 3: 22. It is not a *reformation* of nature and practice, but a *robe* to clothe the person, and procure acceptance with God. This is the way in which those who are far from righteousness are *justified*. Immanuel brings near his righteousness—the righteousness which, *as their surety*, he fulfilled in their name. He pleads it in their behalf, in answer to the claims of law and justice. His plea is admitted, and his people are justified and accepted in the Beloved. [Wm. S. Eccles.

A MINISTER'S MIGHT IN GOD.

The eminent author of "The Saint's Rest," being reminded of his labors on his deathbed, replied, "I was but a *pen* in God's hand, and what praise is due to a pen?"

"After having composed and delivered a sermon," says Bishop Horne, "I have often thought of and repeated the following lines of Thompson:

'Be gracious, Heaven! for now laborious man
Has done his part. Ye fostering breezes blow!
Ye softening dews, ye tender showers, descend!
And temper all, thou world-reviving sun,
Into a perfect year.'

"A minister has no ground to hope for fruits from his exertions until in himself he has no hope; but he has learned to put no faith in the point and energy of sentences, until he feels that a man may be mighty to compel the attention, and mighty to regale the imagination, and mighty to silence the gainsayer, and yet not mighty to the pulling down of strongholds." [Chalmers.

The Bible.—The Bible must be the invention of *good* men or angels; or *bad* men or devils; or of God.

It could not be the invention of *good* men or angels; for they neither would nor could make a book and tell lies all the time they were writing it, saying, "Thus saith the Lord," when it was their own invention.

It could not be the invention of *bad* men or devils; for they could not make a book which commands all duty, and forbids all sin, and condemns themselves to all eternity.

I therefore draw this conclusion: the Bible must be given by inspiration of God.

LOOK AT BOTH SIDES.

An old pioneer, of one of the western counties of Pennsylvania, in conversation with us some years ago, expressed himself somewhat as follows:—"You may send any two persons to a new settlement, and after they have been there a few years, let them come back and tell, each one his own story. The one will represent the country as the best of countries, the other as the worst; and, strange to say, each one will tell nothing but what is strictly true. The one will speak only of the good properties of the country; the other only of its bad properties. The one tells of its fertile soil, its noble streams well stocked with fish, its forests alive with game; the other of its unhealthy climate, or its secluded situation, its destitution of religious privileges and of schools. The one glories in the cheapness with which the necessaries of life may be obtained; the other tells a doleful story of the difficulty of obtaining money, and of the absence of all those luxuries and comforts which an advanced state of improvement brings. One talks about the rich bottom lands, where the soil is two feet deep, and fifty bushels of wheat to the acre; the other groans over the barrenness of the hills, the excessive labor required for their cultivation, and not more than fifteen bushels to the acre."

We have often thought of the old pioneer's conversation, and it recurs to us whenever we hear people speaking of the superior advantages which one country possesses over another, and magnifying the place of their choice, as if *there* all the blessings of Heaven were concentrated. There are differences between countries, it is true, and between different sections of the same country, but not *such* differences as make one absolutely better than another. From the time of the first transgression, the curse has been on the earth, and since the garden of Eden was shut up, no other place has ever been found possessing the fertility and beauty of that hallowed spot. Wherever man goes now, he finds that nothing short of toil will suffice to procure him his bread, and that, even then, the eating of it is attended with sorrow till he return to the ground.

There is no country so abundantly stocked with blessings, but that it is also afflicted with some discomforts, which an unthankful or discontented heart may magnify till all the good is lost sight of. There is none, indeed, so highly favored, but that it labors under some real disadvantages. It sounds well to hear of a region where the land is level, the soil deep and easy of cultivation, and the largest quantity of wheat or corn can be raised on an acre, while the expenditure of toil is far less than in other places is required to raise the smallest quantity. But it sounds very differently, when we are told of the absence of springs, the great depth to which wells must be sunk, the lack of timber for fencing and building, autumnal fevers, and many other annoyances.

On the other hand, there is no country so rugged, so forbidding in its general aspect, but what it is abundantly compensated for all disadvantages by some things which are not found elsewhere. The soil may be but poorly adapted for wheat and corn, but it yields abundance of grass, oats, potatoes. The hills present formidable barriers to tillage, but the living springs, the extensive water powers, and the healthy, invigorating atmosphere, are advantages not to be despised.

On the whole, we believe that the blessings of Providence are pretty evenly distributed. A person may, by reason of his peculiar employment, education, or constitutional temperament, be better *adapted* for one locality than another, but that the place where he can, because of this adaptation, succeed best, is actually better and more highly favored by the God of Nature, *on the whole*, is not always so apparent. Yet, of the thousands who emigrate from one part of the country to another, by far the greatest number are influenced by the expectation of finding some situation better in itself. They go, not for the sake of being more useful to others, but for the sake of rendering themselves more comfortable. They generally suffer disappointment. They may find a more fertile soil, but perhaps they find sickness also. They may rid themselves of some disagreeable neighbors, but they find that they have exiled themselves from the society of old, tried friends. They may gain more in dollars and cents, but they lose in regard to their social, moral, and religious advantages. Indeed, let their gains be what they may, they find that they have lost some things; and when both sides of the account are summed up, and the balance struck, they cannot find that they have improved their condition.

The practical lesson which this view furnishes, is that every one should study his own adaptation for the field, or location, where the providence of God has placed him, as compared with other places, and not undertake to locate himself differently, unless he thinks that by doing so he can be more useful to his fellow creatures. Let it be remembered, that there is no place where sorrow does not come, and where the words of the Preacher, "*vanity and vexation of spirit*," will not find their daily fulfillment. On the other hand, let it be remembered, that in every place God has deposited the materials which may subserve the comfort of his creatures, and that patient industry, joined with contentment and thankfulness, will ensure all the happiness that is allotted to mortals here below. T. B. B.

LETTERS FROM PALESTINE—NO. 12.

Notes of a Journey from Jaffa to Jerusalem, Bethlehem and Artas—Continued.

April 11, 1855.

We were now, at 2 P. M., approaching that most interesting of all earthly places to the people of God—Jerusalem. There was one more ascent, steep and winding, but once at the top, and we expected to behold the city. But we were disappointed. There was yet, beyond a slight depression, another ascent, which hid the town from our view. The scene around us was more wild and barren, presenting thousands of acres covered with rocks, yet in the distance were traces of walls around fields, and of terraces, with clusters of olives and patches of wheat. Truly, prophecy is verified: "Your house is left unto you desolate." We were reminded of the advice of a Philadelphia minister to some of our colony, that if agriculture was to be carried on here, they "had better bring a ship-load of soil." His impression was, that there was no soil on the mountains of Palestine. Another of the same class of unbelievers in prophecy, and, I may add, blind in part as to what every traveler may see, has remarked, that "in order to the redemption of the mountains of Israel, it must rain mud forty years." Yet our mind was not swayed by these flings of derision at the desolation of the land. There is abundant prophecy to encourage us in the belief that the former fruitfulness of the land will be exceeded by far, even beyond description, in the latter day. "Therefore, ye mountains of Israel, hear the word of the Lord God; thus saith the Lord God to the mountains, and to the hills, to the rivers and to the valleys, to the *desolate wastes*, and to the cities that are forsaken, which became a prey and derision to the residue of the heathen that are round about, * * * O mountains of Israel, ye shall shoot forth your branches and yield your fruit to my people Israel." Ezekiel 36: 4, 8. And again, "And I will make them and the places round about my hills a blessing; and I will cause the shower to come down in his season; there shall be showers of blessings." Chap. 34: 26. The desolation spoken of in the Bible is yet to be seen on these mountains, particularly in the neighborhood of Jerusalem. Notwithstanding the arid waste around us, the signs of life in the rude and scattered cultivation among the frowning rocks, make it seem possible for human agency, under God, to accomplish all needed change on the surface, and so transform the present wilderness into a fruitful garden. God has promised the deed, and he will perform it. As we drew near the great point of interest, our emotions, our thoughts, were such as the Christian reader may well imagine, but not describe. The sacred associations of childhood and youth, with points and dates of interest in our religious experience, as with others under the same circumstances, were now to be tested. I can say of a truth, that the reality more than answered the expectation. We were now looking upon the outline of a map of God's own making, and which the wrath of His enemies has not been able to annihilate. The mountains and valleys around in every direction seemed the same as described in the Bible. Then loomed in sight a minaret, then another, and another; then domes of houses and the wall of the city appeared, just as we have seen them in pictures at home. At the same time Mount Olivet, from the opposite side of the city, lifted its majestic, glorious head, as if to look upon the approaching traveler, and remind him of the affecting lamentation of Jesus over Jerusalem, and his ascension to heaven. We seemed to have awakened as from a dream. Jerusalem and Olivet were before us! the battle-field of redemption all around us! For the moment my eye rested upon Olivet, and gazed at it, as though it were actually speaking to me, while sensations of sorrow and solemn joy filled my soul. I could not refrain from tears. Yes, I wept, as in quick succession the words of the Holy Ghost were called to mind: "O Jerusalem, Jerusalem, thou that killest the prophets, &c., how often would I have gathered thy children together," &c. Mat. 23: 37. "And when he was come near, he beheld the city, and wept over it." Luke 19: 41. "Ye men of Galilee, why stand ye gazing up into heaven? This same Jesus, which is taken up from you into heaven, shall so come in like manner as ye have seen him go into heaven." Acts 1: 11. "His feet shall stand in that day upon the Mount of Olives, which is before Jerusalem, on the east." Zechariah 14: 4. "EVEN SO, COME LORD JESUS." Rev. 22: 20. On the left and north of us were seen heights, from whence we supposed the Roman general to have viewed the city and planned its destruction. At our right commenced the valley of the son of Hinnom. Here was a Mohammedan engaged in prayer, performing his genuflections upon his cloak, spread upon the ground, and apparently in devout supplication, with his face toward Mecca. It was now about 3 P. M., the hour of Moslem prayer. Close by the gate was a café, where was seated a company playing cards! Strange and unwelcome contrast! A sentry stood at the Jaffa gate. We entered the city and proceeded to the Latin convent, and were told that we could be entertained, but after unloading, were informed that there was no room for us! It was just after *Easter week*, and the travelers had not left. Leaving our families sitting upon the luggage in the door-way, brother D. and self went in search of lodgings. After two hours hard walking, we succeeded in renting an upper room, with inferior accommodations. We would have gone to the only hotel in the city, but could not afford to pay $2 25 per day apiece.

12th. Passed a very uncomfortable night. Too many musquetoes, fleas and other insects to allow much sleep. A Jew who had frequently called upon us at Jaffa, came and offered us a room in his house free of charge; it was without beds, but furnished with divans which looked clean and comfortable. In accepting his offer, we knew that a present amounting to the value of the use of the room would be expected. This is the sequel to most Eastern hospitality. Paid fifty-one and a quarter piastres for last night's *uneasiness*—rest I will not call it, and departed. As for food, we provide for ourselves, cook but little, live for the most part on cold lunches, thankful even that our Heavenly Father giveth the simple necessaries of life.

In the afternoon called upon Mr. Wood, American Consul General for Syria, resident at Beirut. Found him waiting a visit from the Pasha. He soon arrived, escorted by several officials. We were introduced to him as American citizens residing at Jaffa. Mr. Wood took occasion to compliment his excellency for opening the Mosque of Omar one day last week to Franks, consuls, &c., in number about one hundred. The Pasha proceeded in a very humorous strain to describe the way he took to break over the long-established adage of forbidding Christians to enter the mosque, and to favor foreigners, which he, no doubt, feels it his interest to do. "I called together the priests and inquired of them to whom the mosque belonged. They replied, to God. To whom has God given it in charge? To the Sultan. Right, and the Sultan has given it into my hands. I have some friends that I wish to invite to visit it, and accordingly shall take occasion to do so while the Prince of Belgium is here. I gave special orders to the soldiers to keep good order, and am happy if I have afforded any pleasure to my friends, with whom I hope always to live on peaceful terms." The Pasha expressed himself very freely in regard to the cunning, bungling manner in which persons in office attended to their business, showing that *they* gave him more trouble than the people themselves. While they were expected to *do* and make fast they were all the time undoing. He assured us that many a case that had been settled for the tenth time would again be undone, and the matter brought before him more complex than ever. We were not a little amused with a passing remark, in allusion to the extent of a certain district in the eastern part of Turkey. He said that it was forty hours in diameter and one hundred and fifty in circumference. After an hour's pleasant conversation, his excellency bade us individually a kind adieu, and in passing, bowed very politely to the ladies, who were seated in an adjoining apartment.

An hour before sun-set, we went out of the city at St. Stephen's gate, on the east. Saw the bed of the brook Kidron, (it is dry most of the year,) and the valley of Jehoshaphat. The place called by the Catholics Gethsemane, is on the opposite side of the Kidron, and at the foot of Olivet, which here towered high above us, with a cluster of houses and a minaret on the top. On its rugged sides were fields and terraces of wheat and barley, and a few scattered olives. A Mohammedan cemetery occupies most of the ground from the north end of the city wall southward to the south-east corner, and extends to the brow of the mountain overlooking the Kidron. On the east of Jehoshaphat is the Jewish cemetery. Close by at the bottom of the valley, on the same side, are Absalom's pillar, and the tomb of Hezekiah, and lower down is the village of Siloam. Turning south, we went to the south-east corner of the wall, passing some very ancient looking stones in the wall, and the Beautiful or Golden Gate, as it is called, which is now walled up. At the corner, the lower part of the wall appears very ancient. Indeed, it looks as though it had never been thrown down—that it was built by Solomon; which, I think, is the general impression of travelers. The valley of Jehoshaphat is not so deep as I expected to see it. Yet it is a yawning gulf, with formidable sides, and answering in the main to the idea I had of it from books and the Bible. According to the Union Bible Dictionary, the wall of this place was about five hundred feet high. If so, there has been a great deal of leveling down and filling up to reduce the summit of Moriah to less than two hundred feet. The make of the ground and the appearance of the soil seem to indicate the throwing down of a great mass of earth, rock and rubbish on the side of the mountain, and possibly into the bottom of the valley, thus lowering and widening the site of the Temple to the present area of the Mosque of Omar. That the wall on the Jehoshaphat side of the Temple was five hundred or even four hundred feet high, seems to the casual observer hardly possible; but then it will be recollected, that Jerusalem has been taken and pillaged *seventeen times*; that in these storms which have assailed her, the wrath of her enemies has spent itself with untold fury upon the Temple and its foundations, for the purpose of razing it and blotting it out of remembrance. From this interesting point, we ascended a rough, irregular path, along the wall to Zion Gate, where, with hurried step and panting for breath, we arrived just in time to save ourselves a night's lodging in the open air. The gates are shut at sun down, and opened at sun-rise. We were now on Mount Zion, with the tomb of David in view, and over the western mountains the setting sun, whose golden rays seemed to tarry that we might here pause and reflect upon the sacred associations around us. The vale of Hinnom was on our right, curving around Zion's brow to meet Jehoshaphat on the south-east, which was at our left, with Moriah on this side and Olivet beyond. We thought of Abraham, of David, of Christ, of the Millennium; and very naturally too, with a tearful eye, we remembered, that far over the great sea and the boisterous Atlantic, were beloved brethren and sisters and kindred, whose united evening prayer in our behalf would soon be offered to the great King of Zion. WM. M. JONES.

COLLEGE LOCATION.

The Educational Committee of the General Conference, at the Society Meetings held at Genesee last September, agreed upon a plan for determining the *location* of a Denominational Institution. That plan appeared in the *Recorder* shortly after; but as many failed to notice it at the time, or, if noticing it, have forgotten it, it is thought best to again call the attention of the Denomination to the proposed plan. It is as follows:—

Resolved, That we request the friends of the enterprise, either individually or by Church action, as they may deem proper, to send to the Secretary of the Committee, before the next Conference, their choice of the location for the Institution.

The method of taking this vote may, doubtless, be something like the following. Where it is taken by churches, it should be done by ballot, each individual expressing his preference in regard to the location, and the clerk, or some other one thus authorized, sending the result to the Secretary. The number of votes for each location is what is desired, not the simple majority for the location receiving the highest number of votes. For instance, if in any given church there should be five votes cast for A., ten for B., fifteen for C., and twenty for D., the fact should be thus stated in the report to the Secretary. Where individuals do not vote in church capacity, they can express their choice by letter directly to the Secretary.

It is of the utmost importance that the churches should take prompt action upon this matter, for it is essential to the success of the enterprise, that the location be determined at the next session of the Conference, which occurs the coming Fall. If the question of location can be *wisely* and *harmoniously* settled, there can be no insurmountable difficuly in raising, within a reasonable length of time, the one hundred thousand dollars, the amount necessary for the full and complete endowment of the proposed Institution. Perhaps the spirit which should actuate us as a denomination, in respect to this matter, cannot be better expressed than in the sentiment of a resolution passed at the late session of one of the Associations—that the interests involved being of such vast magnitude and vital importance, no personal consideration, local prejudices, or partial views, ought for a moment to influence us in respect to the *location*; but it should be determined by the prompting of an enlightened Christianity, and the present and prospective well-being of the denomination.

Please direct all communications upon this subject to the undersigned, Alfred Center, Allegany Co. N. Y.

J. M. ALLEN, Sec'y. of Com.

NEW MARKET SEMINARY.

The Second Anniversary of this Institution was held on the 4th inst., in a grove near the village of New Market, N. J. The interest of the occasion drew together a large concourse of people, who seemed to be well pleased with the exercises. The Students presented original essays and orations which reflected much credit upon themselves. Rev. J. Napier Husted, of Brooklyn, N. Y., delivered the Annual Address, the subject of which was the connection between the liberal education of our people and the preservation of their liberties. In a clear and forcible manner, he endeavored to impress upon the youth, and those having their education in charge, the great necessity of forming habits of close and continued thinking.

At the close of the exercises, D. Dunn, President of the Board of Trustees, stated that the Institution, during the past year, had been well sustained, having exceeded the expectations of its supporters, and solicited the patronage of those dwelling in the community who desire to procure for their children a good education. Mrs. Ruth H. Whitford is expected to superintend the instruction of the school another year. During the Fall Term, which commences about the first of September next, experiments will be performed in the school in connection with the study of Philosophy and Chemistry; also, a large library will be purchased for the use of the students. The following is a programm of the Essays and Orations:

1. The Fourth of July,	Charles Washington.
2. Self-Improvement,	Martin D. Titsworth.
3. The Past, Present, and Future,	Elizabeth A. Coriell.
4. The Sphere of Woman,	Catherine S. Ward.
5. Love not too well what Death may touch,	Emily M. Gaskill.
6. Wrongs inflicted upon the Indian,	Walter G. Ayres.
7. It is not always Night,	Mary F. Morgan.
8. Storms on Life's Dark Waters,	Lucy A. Darrow.
9. Industry,	Phidelio G. Dunn.
10. Earth hath rich Music,	Elizabeth G. Vaile.
11. Hope paints the Future with Bright but Fading Colors,	Louisa F. Randolph.
12. Liberty, the Gift of God,	Thomas B. Titsworth.
13. Leave me to my Thoughts,	N. Vandelia Baker.
14. Burial of Dr. Judson,	Cornelia Voorhees.
15. Decision of Character,	Charles T. Morgan.
16. Colloquy—THE INDIAN STUDENT.	
17. Temperance,	Ellis J. Dunn.
18. There is a Tongue in every Leaf,	Sarah Jane Ross.
19. Nature's Tear-Drops,	Kizzie D. Titsworth.
20. Every Man a Debtor to his Profession,	Allen W. Dunn.
21. I do not fear to grow Old,	Elizabeth S. Dunn.
22. Night, Nature's Great Ancestor,	Elizabeth F. Ross.
23. Our Country—its Destiny,	George Randall.
24. Privileges enjoyed by our Country,	Wm. H. Randall.

ALFRED ACADEMY.

ALFRED CENTER, July 6, 1855.

The exercises of our Academic Anniversaries, the examination of classes, and anniversaries of the several literary societies connected with the Seminary, which have just transpired, have been of the most acceptable character; of which it is enough to say, that in no respect were they inferior to those of any previous year, while in some respects they were superior to those of any former year. The order of exercises was as follows:

Examination of classes commenced June 27th, and continued for three days. On the evening of the 30th was held the anniversary of the Ladies' Literary Society, of which the following is a programm:—

Salutatory, Nellie Thomas.
French Essay, Napoleon et les Francais, A. M. Fenner.
Essay, Is it not beautiful to die? Mary Seeley.
Foreign Correspondence, read by Cynthia Babcock.
Declamation, Firmness in Duty, S. L. Langworthy.
Essay, Be great in deed, Mecia Maxson.
Declamation, Labor omnia vincit, Jane A. Stanton.
Mysterious Package, read by Jennie Campbell.
Valedictory. Excelsior, Sarah Brown.

July 2d, the Anniversary of the Alleganian Lyceum occurred. The exercises of which occupied the morning and afternoon, and were as follows:—

Salutatory, J. Stillman.
Oration, Intellectual Culture, T. Vincent.
Essay, The true source of happiness, S. Burdick.
Oration, Rewards of Labor, H. S. Almy.
Reading of the Literary Star, J. R. Armstrong, T. E. Stillman.
Essay, The world is moving, E. Burdick.
Oration, Pacific Railroad, G. B. Seaman.
Poem, Mirage, S. M. Thorp.
Address to the Faculty, A. W. Crandall.
Oration, Potency of Wealth, M. Balcom.
Essay, The Scholar's Duty, T. E. Stillman.
Valedictory, S. G. Nye.
Lecture, Rev. Thomas K. Beecher.

The evening was occupied by an examination of the Music Class, which attracted a large audience, that seemed highly delighted.

July 3d, the Orophilian Lyceum held their anniversary exercises, as follows:—

Salutatory, R. T. Baker.
Oration, Advantages of Early Poverty, J. Walbridge.
Essay, The Day dawns on the Morrow, B. H. Brasted.
Oration, Latin, D. F. Stillman.
Oration, The kind of men we want, W. V. Perry.
Discussion, Resolved, That War is a Curse to any Nation, H. C. Johns, D. D. McGibeny.
Poem, The Western Constellation, J. H. Van Allen.
Reading of the Radiator and Review, D. B Maxson.
Address by Hon J. R. Giddings, subject, "The Higher Law;" its application to the whole conduct of Man, with its Rewards and Penalties.
Oration, by S. O. Thatcher.
Evening Salute, Freedom of Opinion, R. Dennis.
Oration, Necessity of Christianity, E. Williams.
Poem, ['El Despecho 1'] Himno a Baco, Y. P. Carreno Gijon.
Oration, Popular Sovereignty, D. Beach.
Lecture, True Nationality, Solon O. Thacher.
Confessions of a Know-Nothing, J. W. Gillette.
Oration, Fallacies of the Age, D. D. Waldo.
Valedictory, In Union there is Strength, J. B. Cassaday.

July 4th, the Academic Anniversary exercises occurred.* N. V. HULL.

---

* The programm we are compelled to omit till next week.

BENEVOLENT SOCIETIES IN ENGLAND.

A correspondent of the *Christian Watchman and Reflector* furnishes the following statistics of some of the Societies which have recently held their anniversaries in London.

Baptist Foreign Missions.—These missions seem prosperous. Their receipts last year were a little over $100,000. Besides their missionaries, native preachers, and schools, there are nearly, or quite, 30,000 members in their churches, including Jamaica. The missionaries, also, "have published 14 grammars, 9 dictionaries, and translated the Word of God, in whole or in part, into nearly all the languages of India."

Baptist Home Missions.—These missions occupy 221 stations in destitute parts in England, and had an income, last year, of about $22,250.

Baptist Irish Society.—About $10,000 are annually spent in sustaining missionaries, Scripture readers, and establishing Scriptural schools in Ireland.

Bible Translation Society.—This is a Baptist Society. Its income last year was about $8,000, and "the circulation of the past year has been 21,419 copies of the smaller and larger portions of the sacred volume, from a single gospel to the entire Bible in Bengalee, Sanscrit, and other languages in India."

Baptist Tract Society.—This Society have published about 160 different tracts, besides a number of children's books and handbills. Grants have been made for England, Ireland, the continent of Europe, Africa, the East and West Indies. It is in the hands of strict Baptists, and is doing a good work in arresting the progress of open communion.

London Missionary Society.—This institution belongs to the Congregationalists. Last year their treasury received about $298,000, and a debt exists of about $75,000. They report above "330 churches; above 18,000 members, and more than 112,000 persons turned from idolatry."

Religious Tract Society.—The sales of this Society last year were a little over $335,505, and their total receipts $431,000. It circulated last year 28,292,194 publications in 112 languages; and from its commencement, 56 years ago, the large number of 673,000,000 of its tracts and publications have gone forth.

Irish Evangelical Society.—The managers spent about 10,000 last year to spread the gospel in Ireland. It belongs to the Congregationalists.

London City Mission.—The mission employs 328 missionaries. They have made 1,484,563 visits, circulated above 2,000,000 tracts, lent 50,458 religious books, gave away 8,155 Bibles, held 25,318 religious meetings for prayer and reading the Scripture, and nearly 10,000 children had been induced to go to school.

Ragged School Union.—The friends of this movement last year spent exactly $112,000, sustained 300 schools containing 17,600 scholars, a portion of whom are trained in some industrial pursuit.

British and Foreign School Society.—This organization establishes model schools, holds public meetings on education, sustains, helps, and establishes schools at home and abroad, trains teachers, makes grants of books, and had an income of about $86,000 last year.

London Society for Promoting Christianity among the Jews.—During the year the Society has issued nearly 20,000 copies of the Bible, in whole, or in part, in the Hebrew language, including liturgies, books and tracts. Its income was over $144,000.

Society for the Conversion of the Roman Catholics of Ireland by Missionary Efforts.—The society, last year, spent $200,000, and the report stated that a "regular income of $180,000 per annum might be relied on for this work."

Christian Instruction Society.—The committee of this society directed their attention this last year, "to tent and open-air preaching and distribution of tracts at the large fairs in the vicinity of London. Thirty of the most popular ministers lectured on these occasions," and $2,780 was spent in this work, and tract distribution.

London Female Dormitory.—This institution seeks to raise the fallen female, give them advice and aid, and provide suitable situations. These last three or four years nearly 600 females have been helped, and $11,680 was spent in this way, this last year.

Church Pastoral Aid Society.—The object is to help Episcopal clergymen in poor parishes, preach in the open air &c. Receipts last year were $190,865.

Colonial Church and School Society.—This society employs 38 clergymen. 98 lay missionaries and school-masters, and 36 female teachers. It operates on British North America, West Indies, South Africa, Australia, and other places. Income last year, $67,195.

Prayer Book and Homily Society.—This body last year received $13,385, and their agents visited 5,045 ships, sold 2,890 prayer books, distributed 9,954 family prayer-books, besides other works.

Chinese Evangelical Society.—This society employs 4 missionaries, 4 colporteurs, and 4 youths are training as native evangelists. During the past year the entire Scriptures have been printed in Chinese, and many thousands circulated. Receipts about $10,000.

Church of England Young Men's Society.—Their income is $2,505. They procure lecturers, rent reading rooms, establish libraries, and meet in Bible classes.

The Liberation of Religion Society.—The object of this society is to use all proper means to put down all State churches, and free religion from all State patronage and political control.

THE LIQUOR LAW.

The well-known opposition of the executive and judicial officers of New York city to the Liquor Law, is producing its natural effect. Throughout last week, the liquor shops generally continued in full blast, and the bars of most of the hotels were kept open as usual. As no licenses are now required, of course every body who chooses to do so opens a grogshop, and sells liquor without impediment. So it will probably continue in this city until decisions are obtained from some of the courts which will give vitality to the law. In the "rural districts," however, the law appears to be pretty generally obeyed. In Rochester, Utica, Syracuse, and Seneca Falls, the law has been enforced. In Albany, the Mayor has forbidden the Police to take any part in its execution.

TIME OF THE ANNIVERSARIES.—A letter from Eld. Thomas E. Babcock, of Albion, Wis., says:—

"It seems that the time of holding the Anniversaries at Brookfield is left for the Board to fix. The time for holding the North-Western Association is the Fifth-day before the fourth Sabbath in September. There are some here, besides myself, who feel interested in attending both; and if the meeting at Brookfield could come off during the week preceding the second Sabbath in September, I think we could do so. But if they should come as near together as they did last year, it could not be done."

At the meeting of the Board last First-day, they fixed upon the week before the third Sabbath in September, under the impression that the meeting of the North-Western Association came a week later than above stated. The appointment at Brookfield will doubtless be changed, so as to accommodate those wishing to attend the North-Western Association.

JEWISH DISABILITIES.—The prospect of the entire removal of the disabilities of the Jews in Great Britain, does not brighten. Lord John Russell has lately written a letter on the subject, in which he says that, as the House of Lords continue hostile to the removal of Jewish disablities, the Government "would be only throwing away time in attempting to carry a measure which one House of Parliament is sure to reject. Many liberal members of Parliament, while they would support a motion to relieve the Jews from their disabilities, would consider as inopportune a question which would not advance the object to be attained. I must, therefore, consider, that it would be inexpedient to stir the question of Jewish emancipation in the present session of Parliament. That claims so just can be permanently rejected, I will not believe. But the friends of intolerance naturally cling to this last vestige of religious persecution, and exult in the facility with which the exclusion of a body not formidable in numbers can be maintained."

One Hundred Dollars Premium.—The Directors of the American Reform Tract and Book Society are authorized to offer one hundred dollars premium for the best manuscript of a religious Anti-slavery Sabbath-School Book, of sufficient length to make not less than one hundred, nor over two hundred printed pages, 18 mo. Authors can treat the subject according to their own judgment and taste, in regard to the particular style or form; whether as a narrative or tale; historically or allegorically; or in any method in which they think the subject can be presented to make it interesting, and also to bring the truth to bear upon the conscience. Whatever form the writers may choose, the great moral truth that "American Chattel Slaveholding is a sign against God, and a crime, against man, and ought, therefore, to be immediately repented of and abolished," must be maintained, and the book must be imbued with the spirit of the Gospel. The manuscripts must be sent, post paid, to T. B Mason Secretary of the American Reform Tract and Book Society, Cincinnati, Ohio, previous to the first Monday in October next, with the author's name and residence in full, inclosed in a sealed envelop, which will not be opened until the premium is awarded.

The Bible in Schools.—The Supreme Court of Maine has pronounced in the case of Donohoe *vs.* Richards and others, which was argued at Bangor last summer. The suit was brought in behalf of a girl attending one of the public schools at Ellsworth, against the School Committee of the town, for prohibiting her attendance at the school. The Committee had directed the English Bible to be read in the school. Several children of Roman Catholic parents, of whom the plaintiff was one, refused to comply with the regulation, and were prohibited from attending the school. The case was argued by Mr. James S. Rowe, of Bangor, for the plaintiff, and Mr. R. H. Dana, Jr., of Boston, for defendants. The opinion was delivered by Judge Appleton, and occupies six columns of the Bangor *Courier*. The decision is in favor of the defendants.

A Munificent Gift.—Some seven years ago, M. Vassar, Esq., of Poughkeepsie, deeded the Central Baptist Chapel, with all its furniture and appurtenances, together with the lot on which it stands, to a committee of gentlemen, in trust for the society who worship there, with the understanding that if, at the expiration of that time, the church was in condition to sustain itself and support a gospel ministry, the entire property should then be made over to the Trustees of the Society. The term specified having expired, and the conditions upon which the property was given having been fulfilled, Mr. Vassar, a few days since, delivered up the deed to the Trustees of the church, and the property, worth some $20,000, has been transferred to their hands without incumbrance or reservation.

Excision.—The Old School Presbyterian Assembly have formally discontinued correspondence with the General Association of Connecticut, on the following grounds: The General Association of Connecticut adopted resolutions, wherein they charge that the "silence of the supreme judicatories of the Presbyterian Churches in correspondence with them," in regard to certain legislation of our National Government, "gives painful evidence of delinquency in respect to principles and sympathies that are essential to Christian integrity." The Association, by its steadfast refusal to investigate charges laid before it repeatedly, by large numbers of its own members, has made itself liable to the charge of espousing or protecting flagrant heresies in regard to the Trinity, Incarnation, and Atonement, and has greatly weakened the confidence of the Presbyterian Church in the fidelity of said Association to the first "principles of the doctrine of Christ."

Enforcing the New Popish Dogma.—A French clergyman, the Abbe Labord, has published a pamphlet which makes a great noise in the religions world, entitled, "A Memorandum of the Opponents of the New Dogma of the Immaculate Conception and of the Ineffable Bull." The author, immediately on his arrival at Rome, in November last, presented a petition to the Pope against what he terms "profane novelties" intended to be enforced upon the Church. The only answer made by his Holiness was a summons to attend the Segretaria; and there, in the dark chamber, he received from a monk the order to leave Rome immediately. He did not obey. Ultimately, after being compelled to appear before the Inquisition, he was conducted by the gendarmes to Civita Vecchia, and there put on board a vessel bound for France.

Arrival of Missionaries.—The *Independent* says, that Mrs. Benjamin, widow of the late Rev. Nathan Benjamin, of Constantinople, arrived with three children, at this port, on Friday, 22d ult., Mrs. Hinsdale, formerly of Mosul, came in company with Mrs. Benjamin. Mr. Henry A. Schauffler, son of the Rev. William G. Schauffler, of Constantinople, arrived the week before. He comes to pursue his collegiate education in this country. Mr. and Mrs. Goodell, of Trebizond, arrived on Monday, 18th ult., having returned on account of ill health. All these persons have been connected with the missions of the American Board in the Levant.

Gift to Harvard College.—The father of Ex-President Quincy, of Massachusetts, who died in 1775, made in his will a bequest of £2000 to Harvard College, in case his only son, Josiah died before he attained his majority. That son, now a man advanced in years, not willing that the college should suffer because his life has been preserved, recently gave the College $10,000, for the purpose of publishing the doings of the astronomical observers at the College Observatory. Each volume published from this fund is to be marked as having been published from the bequest of "Josiah Quincy, a patriot of the Revolution."

Eld. James R. Irish says that in DeRuyter the Fourth of July was celebrated, and the Maine Law *ratified.* "We had a grand time, with just opposition enough to make it interesting."

Two boys named Allen were drowned at Shedd's Corners, near DeRuyter, N. Y., on the 4th inst., while bathing.

RELIGIOUS INTELLIGENCE.

It is stated, as a very noticeable incident, that among the forty or fifty Episcopal clergymen who were assembled at the recent consecration of St. Thomas's Church, New Haven, one was a lineal descendant of the first Puritan minister of New Haven, and another was a lineal descendant of one of his leading elders. It is also a fact of some interest, that a descendant of Oliver Cromwell is now a clergyman of the Church of England in Canada; while the last lineal male descendant of Martin Luther, was a few years ago received back into the Romish communion.

The instability of the Pastoral Relation (says the Andover *Advocate*,) is becoming a subject for serious consideration, if not of alarming interest, to all who have the moral and religious welfare of the community at heart. We are told by a member, that in the "Andover Association of Congregational Ministers," embracing eighteen churches, fifteen of the number have dissolved their pastoral connections within less than five years, and four of them have changed twice within the same period.

The Seventeenth Class of Teachers of the Board of National Popular Education, will assemble at Hartford, Conn., on the 10th of August next, and leave for the West on the 22d of September. The usual preparatory course will be under the superintendence of Miss Hannah White. Ladies wishing to join the class will address written applications to Miss White, at Northampton, Mass., as soon as practicable. They should not be delayad beyond the middle, or at the farthest the 20th of July.

The statue which has recently been erected in St. Paul's Cathedral, London, to the memory of Bishop Heber, is said to be unsurpassed in beauty of design and excellence of execution. He is kneeling, attired in his robes, with one hand resting on the Bible, as his support, and the other upon his breast. On the pedestal, beautifully done in bas-relief, he is represented in the act of confirming two Indian converts.

From Poughkeepsie, Dutchess county, N. Y., a correspondent of the New York *Observer* writes under date of the 4th ult:—"We (the Rev. Dr. Ludlow's First Presbyterian church) had a most interesting communion season to-day. Twenty-seven, mostly young persons, were admitted to the church."

There is an advertisement in a Kentucky paper of a Minister for sale. He was a slave to a man recently deceased. It is stated in the advertisement, that he holds a license to preach. Churches in want of a pastor will take notice.

In a notice of the Bibliotheca Sacra, the Chinese *Spectator* (an English journal) says: "As a rule, we believe American theologica writers to be better versed in modern languages, and more deeply read in ancient literature, in other words, better and able scholars, than the majority of theological writers in this country."

The Congregational Society of North Stonington have increased the salary of their pastor (Rev. Mr. Hubbell) $100. He was a pastor of the church in East Avon when his wife wrote "Shady Side."

The Association in London, in aid of the American Mission in Turkey, have lately forwarded a considerable donation to that Mission. The Missionaries of the American Board have been laboring in that field for nearly thirty years; and at this moment there are more than eighty organized congregations in Turkey, and in some instances churches have been formed by a careful selection from those who profess scriptural doctrine.

Of the principal religious sects in the United States, that which has the smallest-sized edifices for worship is the Methodist, and those which have the largest are the Unitarians and Dutch Reformed. The smallest denomination is the Swedenborgian, and the next the Mennonities. There appear to be no less than 52 Tunker churches, and 35,000 worshipers. The Friends have accommodations for about 300,000.

Gorham College, Liverpool, Nova Scotia, some time since destroyed by fire, is put in a fair way of being restored to its beauty and usefulness, by the donations of numerous friends in Great Britain. The sum of one thousand pounds has been subscribed for rebuilding and furnishing the Institution.

Among the annual meetings held lately in London was that of the Jewish Operatives Institution. On that occasion six sons of Abraham made confession of their faith in the Gospel and were baptized by the venerable archdeacon Wigram. It is reported to have been a very interesting occasion.

Whilst Piedmont is secularizing the convent property, and Spain is setting up for sale the possessions of the Church, the Pope himself is doing the same thing under another form. He is contracting an exchequer loan with the house of Rothschild on mortmain property, that is to say, on "St. Peter's patrimony."

The Syracuse *Chronicle* understands that Rev. R. R. Raymond and wife have asked a dismission from the Baptist church, on the ground of opposition to the doctrine and practice of close communion, on which subject their views have undergone a change.

It is reported that the four Orthodox churches in Andover, are without pastors. Shoemakers' children go without shoes, and the churches in a town where they make ministers go without pastors.

The resolution passed at the late meeting of the Congregational Library Association, Boston, to raise by subscription the sum of $25,000 towards the erection of a Library Building, is likely to go into immediate effect.

Rev. Dr. Henry H. Yard and lady, and Mrs. J. Best, all of the American Board of Foreign Missions, have arrived at New York from Africa.

The Methodist Episcopal Church, South, Georgia, with all the aid of slave labor, is now unable to raise money enough to support her own missions; there is a regular and constant falling off in the contributions of the members since 1852.

The circuit court of Botetourt county, Va., have granted freedom to Eliza Crawford and her six children, the evidence being complete that she was born of a white woman, although she and her children are quite black. The traditional law of slavery is that the child follows the condition of the mother.

European News.

News from Europe to June 23d was received in New York on the 5th of July.

The Allies have made an unsuccessful attempt to storm Sebastopol. The accounts of the matter are conflicting, but all agree that both the French and English suffered severely. The French attacked the Melakoff Towers, while the English attacked the Redan. From the obstinacy and courage with which the combat was maintained by the British at the Redan, and the necessity of eventually retiring from the attack, the slaughter on all sides has been immense, and if the information be correct, the loss, in killed and wounded, of the British alone, amounts to very little short of four thousand. The greatest portion of the loss was experienced in a ravine, where a powerful and unexpected battery was opened on the troops. The Allies lost terribly by the Russians springing a mine, and during the confusion, they (the Russians) recaptured the Mamelon Tower.

The Russian account of the successes of the Allies in the Sea Azoff is published. Gortschakoff confirms the successes claimed by the Allies, but says that operations against the Sea of Azoff were expected—that not having means to oppose the hostile fleets, the garrison had orders to blow up the batteries and retire—that the grain stores burned by the Allies were mostly private property, and do not materially affect the supply of the army —inasmuch as, anticipating such an attack, supplies were mostly conveyed by land, notwithstanding the facilities offered by sea.

The correspondence relates horrible atrocities perpetrated by the French and Turks at the capture of Kertch.

Constantine Balshe, son of the reigning Prince, was killed at Jassy, in a duel, by the Austrian Major Stalberg. The affair had caused considerable sensation in the Principalities.

In the House of Commons, Sir C. Wood confirmed the murder of the crew of the Cossack's cutter, when landing some Russian prisoners at Hango, under a flag of truce. He stated that dispatches had been received from Admiral Dundas containing full particulars of the occurrence. Some short time ago H. M. ship Cossack took and destroyed some coasting vessels off Hango and carried off as prisoners the captain of one of the vessels, his son, and another Finnish sailor. Admiral Dundas, wishing not to visit with unnecessary severity the trade of the country so long as the communications and supplies between the Gulf of Finland and St. Petersburg were interrupted, directed that the Cossack should put back to Hango and restore to liberty the persons so captured, together with four others, who expected to be put ashore at that place. The Cossack accordingly returned for that purpose. A cutter was sent ashore from the ship, under the command of Lieut. Geneste, and a flag of truce was displayed half an hour before reaching the jetty. The officers and prisoners had, however, barely landed, when about 300 or 400 Russians came down upon them, and, although explanation of their visit was made, both in English and Finnish, the Russian soldiers said they did not care for the flag of truce, but that they would show how the Russians could fight. About one hundred Russian soldiers then immediately fired on the officer and the Finnish prisoners on the jetty, killing them all, and then fired into the boat until every man fell. They then rushed into the boat, dragged one wounded man out and bayoneted him on the jetty, and retired leaving five bodies for dead in the boat. One man only was picked up alive, by a gig from the Cossack, which was sent to ascertain the cause of the cutter's delay, and from whom these particulars were ascertained.

California News.

California dates to June 16th were received in New York on the 8th inst., 22 days from San Francisco.

The most important news is the confirmation of the Bolton and Barrow claim by the United States Land Commissioners, embracing 10.000 acres of land in the most eligible part of San Francisco, estimated to be worth $40,000,000. Palmer, Cook & Co. own the larger part of this claim. This land is occupied by about one thousand settlers, who lay claim to tracts of various sizes. The settlers have held several meetings in consequence of the decision of the U. S. Land Commissioners, and they purpose raising a fund in order to appeal the case to the Supreme Court.

The wheat crop is damaged by smut in many parts of the State. The barley crop is represented as being in a forward and flourishing condition.

A plague of grasshoppers has been experienced around Marysville, by which all green things are devoured. They have been collected and eaten by bushels by the Indians.

A horrible murder was committed at the Mission Dolores on the 3d inst., by which Mr. J. B. West, late of New York State, was killed by two men, named Brace and Marion.

Instructions to Liquor Dealers.—The Law Committee, as it is termed, of the General Liquor Dealers' Association, New York, have issued a circular of instructions to the various liquor dealers of the city, as to the action they are to take in meeting any efforts made toward the enforcement of the provisions of the Prohibitory Law. By this circular it is enjoined upon the members of the different Liquor Dealers' Associations not to resist any officer in the discharge of his duties, but treat him with respect, and on no account to oppose him with violence. Such conduct is dwelt upon as both reprehensible and impolitic. They are advised as possessing legal redress, and that upon this they should base their claims to justice and right. Meanwhile, if the officer calls to make seizure of their property, they are told to ask such officer to wait till they can call on their constituted legal adviser and get a writ of replevin and the necessary bonds signed as security; which to effect, it is only necessary to show their ticket of membership. Should the officer persist in immediate seizure, they are requested to deliver to him, forthwith, the key to their liquor cellar, and allow him to remain in possession until they can procure the writ referred to. If any member is arrested and also seizure made of his property at the same time, he is to proceed to the Magistrate with a friend who shall go his bail for appearance at Court, when, on no consideration, is he to fail to demand a trial by Jury.

A large quantity of spurious bills on the Montpelier Bank, Vermont, of the denomination of $10, are supposed to be in circulation.

SUMMARY.

A dispatch dated Boston, Monday, July 2, says: Judge Curtis, of the United States Circuit Court, to-day rendered a decision in the case of the brig Porpoise, seized for being engaged in the slave trade. It was held that a vessel which has acted as a tender upon slavers, and has carried merchandize which was used for the purchase of slaves, and had otherwise aided in the slave transportation, although she had not actually carried a single slave, was guilty of being engaged in the slave trade within the meaning of the statute. The brig was consequently declared forfeited.

A dispatch dated Springfield, Mass., July 3, says: The Gingham Establishment known as the Glasgow Mills, at South Hadley Falls, was burned this afternoon. The fire originated in a pile of yarn in the attic, and is supposed to have been the result of spontaneous combustion. The machinery and building, with much of the stock, were destroyed. Most of the manufactured goods were saved. The loss is estimated at $250,000. Insured for $150,000. Two men were injured by falling from ladders, and one man killed by the falling of a wall.

A dispatch dated Evansville, Ind., Monday, July 2, says: The steamer Lexington, running between Louisville and St. Louis, was blown to atoms near Stephensport, Ky., on the up trip. The packet Baltimore has just arrived from the scene of the disaster, with 20 officers and passengers of the Lexington, including the captain, Throop, the first clerk, and Mr. Davidson, both wounded. The captain thinks that there were not more than 35 wounded out of 100 who were on board.

The Connecticut Legislature has passed a special act, by way of amendment to the New York and New Haven Railroad Charter, which authorizes a compromise of the Schuyler difficulties; an increase of the Capital Stock is allowed, if deemed the best mode of adjusting the claims of the so-called Schuyler Stockholders. The act contemplates a vote of approval and acceptance of the act by the original Shareholders.

Several thousands of persons visited the Crystal Palace on the Fourth. The great object of attraction to most, was evidently the enormous California tree, which is erected under the dome to the height of 28 feet, and will be raised to the height of 116 feet. No one could be blamed for skepticism in reference to the probability of such a growth of forest tree unless the eye had actually seen it. The wood resembles red cedar. It is without odor, and the leaves are like those of the white cedar.

The wheat harvest in the Southern and Middle States has commenced. Accounts from a wide extent of country are in the highest degree favorable. There are a few locations where the yield has been small; but in the great aggregate, the harvest is most abundant. In Tennessee the wheat and rye crops are the heaviest ever known. The corn looks well, and promises all that the most extravagant can desire.

The next New York State Agricultural Fair is to be held in the thriving village of Elmira, in October, and will be the first one ever held in the Southern counties of this State. The list is understood to be very extensive, embracing the best cattle, vegetables, home manufactures, etc., in the State.

The Milwaukee *Wisconsin* of June 9th says that there are stored in the warehouses in that city 175,000 bushels of wheat. The shipments during the past week had exceeded the receipts only about 15,000, which accounts for this large storage.

The Albany papers mention the arrival in that city of a drove of Texas beeves, which have come all the way from their south-western grazing grounds by steam, and which were in prime slaughtering condition. This is a novel exemplification of the benefits of railroads and steamboats.

It is calculated that the German emigration to the United States this year, according to the rate at which it is going on, will number about 170,000 souls; and that the British emigration to the same parts will number about 70,000 souls.

Governor Clark of New York has pardoned a man named Higgins from the penitentiary of Rochester, on condition that he shall "wholly abstain from using intoxicating liquors, except in case of sickness, when prescribed by a regular practicing physician."

Burlington county, New Jersey, seems to abound in singular names, not always the most euphonious. For instance, there are Turpentine, Frogtown, Devil's Run, Skunk's Hollow, Mount Misery, Ong's Hat, Comical Corner, Tattletown, Gossipville, Scrabbletown, Foolstown, Poke Hill, and—that's enough for the present.

A large meeting was held on the 16th ult., at Green Castle, Ia., at which the Hon. J. Scott Harrison, son of the late Gen. Harrison, was unanimously nominated for the Presidency of the United States.

The Supreme Court of Rhode Island, at its late session, granted decrees of divorce in thirty-nine cases, twenty-nine of which were on petitions of wives to be divorced from their husbands.

A dispatch dated Cleveland, Ohio, Tuesday, July 3, says: The schooner Rialto was capsized on Sunday, off Long Point, and the mate drowned. The captain and remainder of the crew were saved. The captain's wife was in the cabin at the time of the disaster, and remained there for two hours, when the vessel partially righted, and she was providentially released just as the crew were on the point of abandoning the wreck.

On the 1st day of June a terrible storm visited the harbor of Mazatlan, on the Pacific coast of Mexico, causing great destruction of property. Six merchant vessels, with cargoes valued at over $1,000,000, were totally destroyed, and twenty-three men drowned. The only American vessel lost was the schooner Copeland, in ballast.

It is reported that a violent personal encounter had taken place in Kansas between Governor Reeder and Stringfellow, and that the Governor was badly beaten.

The ship Star Republic, bound from New York to Galveston, was burnt at sea on the 1st of July. Her passengers and crew took to the boats, and were picked up by the brig Rush.

The New Brunswick Legislature has adopted a very stringent Prohibitory Liquor Law, outlawing not only sale but importation. It goes into effect on the 1st of January next.

On the 11th inst., the members of the Methodist E. Church, assembled in mass meeting, at Centerville, Monroe County, Va., to take into consideration a letter recently written to the Richmond *Enquirer*, charging that the members of that and other churches of the Baltimore Conference, were controlled in their votes by the church. The meeting pronounced the statement false, asserted their belief that the author was aware of its falsity, and recommended him to the various churches of the Conference in Virginia, as a fit subject of prayer to God that he might "dispense him light both spiritual and intellectual."

On the 30th of June, Coroner Kimball, of Portland, Me., called a jury to hold an inquest on the body of a man who died in the cars. From the testimony it appeared that upon entering he was the "worse for drink" —that after the cars left Portsmouth, the conductor, Mr. Towle, discovered his situation and endeavored to relieve him—while in the act of doing so, the man gave a spring back and died. On examining his overcoat three bottles containing liquor were found, and one bottle of linament.

Active exertions are being made by the citizens of New Brunswick, N. J., to secure the location of the State Normal School in that city. A subscription paper has been circulated and some $3000 or $4000 already subscribed. Mr. F. S. Kinney has offered a lot worth one thousand dollars suitable for the buildings, and Mr. James Neilson and Mr. L. Kirkpatrick each one thousand dollars on condition that ten thousand is subscribed.

A dispatch dated Cleveland, Saturday, July 7, says: The propeller J. W. Brooks, hence for Ogdensburg, blew up, fifteen miles from Ashtabula, yesterday morning. Two engineers were badly scalded, and will probably die. One fireman and one deck hand jumped overboard and were drowned. There were ten or twelve passengers on board, but none of them were injured.

The pleasure yacht Grace, built by McMaun of New York, who is also owner, foundered on Sunday last on her trial trip when in the Narrows. The cabin lights were open, and owing to the shifting of ballast, she suddenly took in sufficient water to produce the accident. Five individuals were on board at the time, of whom three perished.

The price of Bounty Land Warrants in this City ranges from $1 09 to $1 12 the acre; the minimum Government price of the Public Lands, when entered with cash, being $1 25 the acre. Considering the large accession of Warrants under the recent Bounty Act, the price keeps up well, and we hear that the demand is constant and liberal.

The subscription to Agassiz's great work, Contributions to the Natural History of the United States, have reached about 150 in Boston alone, which is pretty well for the first week. The roll of subscribers contains already the most distinguished names in Massachusetts.

A dispatch dated Detroit, Friday, July 6, says: Last night a large crowd attacked a negro dance house in this city, and a fight ensuing one of the girls belonging to the house was killed with a brickbat. Several persons were wounded. The house was fired by the crowd, and burnt down.

The Old School Presbyterian Board of Missions has appointed four strong and devoted missionaries for California, and arrangements are in progress for the entrance of others into that promising and needy field of labor.

The Syracuse *Standard* says that a man named Vedder recovered a verdict of $700 against Edward L. Fellows, of that city, last week. Vedder was passenger on the cars, and refused to give up his ticket until he reached his destination, and defendant as conductor put him off.

A dispatch dated Providence, Friday, July 6, says: Mrs. James Lancelot, of Cranston, and Mrs. Stephen Sturgen, of New York, were drowned this afternoon while bathing at Field's Point, three miles below this city.

There are now in the United States thirty-two insane hospitals in active operation, and nine others are in course of construction. The number of insane persons in this country is estimated at 20,000.

New York Markets—July 9, 1855.

Ashes—Pots $7 00; Pearls 6 62.

Flour and Meal—Flour, 8 37 a 8 62 for ordinary and straight State, 8 56 a 8 68 for mixed Western, 8 87 a 9 25 for common to good Ohio, 10 75 a 12 50 for extra Genesee. Rye Flour 7 00 and 8 75 per bbl. Corn Meal, 4 87 for Jersey, 5 25 for Brandywine.

Hay—1 00 a 1 12 per 100 lbs.

Tallow—12c.

DIED.

In Brookfield, Madison Co., N. Y., May the 29th, of pulmonary consumption, Mr. Edwin K. Clark, aged 31 years. Brother Clark experienced religion when young and united with the Methodist Episcopal Church in Brookfield, of which he remained a devoted member until death. He proved the soundness of his piety by his conscientious observance of the Sabbath of the fourth commandment, and all the practical duties of religion. He died as he lived—in full hope of a glorious immortality beyond the grave. J. C.

In DeRuyter, N. Y., May 30, 1855, of consumption, Orson C. Coon, aged 28 years and 4 months. His exemplary and devoted life closed with confiding trust in a crucified and risen Saviour.

LETTERS.

Nathan V Hull, Augustus Barnes, Thomas E Babcock, J D Collins, C R Burdick, J R Irish, T F West, Albert Babcock, D C Long, John Parmalee, E R Clarke, C D Langworthy, Andrew Babcock, S May, Jr, R L Davis (sent from Western Association, by a delegate.)

100,000 lbs. Roman Type of new cut,
50,000 lbs. Fancy Type,
10,000 lbs. Scripts of various styles,
5,000 lbs. Germans,

Magnificent Floral Gift.

SUBSCRIBERS to the "CHRISTIAN DIADEM" for 1855, are entitled to a splendid steel engraving, the ☞ LILLY AND THE ROSE PERSONIFIED, being given *gratis* to all old and new subscribers who send us only ONE DOLLAR, by mail or otherwise.

Six Copies for Five Dollars.

The Diadem is a strictly moral and religious work —designed for the Christian family without regard to any particular denomination.

FIFTY ENERGETIC BUSINESS MEN are wanted immediately to circulate the "Diadem" throughout the Eastern and Western States. To such as can send good references the very best inducements will be given. Address Z. P. HATCH, Publisher, 9 Spruce street, New York. May 24—3m.

The very Book that every body has been Wanting.

The Book for the Parlor, the Book for the Fireside, the Book for the Professor, and the Book for the Non-Professor.

THE RELIGIOUS DENOMINATIONS OF THE UNITED STATES: Their History, Doctrine, Government, and Statistics; with a Preliminary Sketch of Judaism, Paganism, and Mohammedanism. By Rev. Joseph Belcher, D. D., Honorary Member of the Historical Societies of Pennsylvania and Wisconsin, author of "William Carey, a Biography," etc., etc., and "Editor of the Complete Works of Andrew Fuller," "Works of Robert Hall," etc, etc. Large octavo, 1024 pages, handsomely embellished by nearly two hundred engravings.

This invaluable work is rapidly finding its way among all classes of the American people. The clear, comprehensive, and impartial manner in which the learned author treats each and every denomination, is winning for him golden opinions from the highest authorities in the land. The innumerable lively tales and anecdotes of ministers, churches, and laymen, which he introduces with the articles of faith and all important statistical information, give to the work a life, vigor, and spirit truly delightful. One cannot sit down to it without being convinced that his subject is in the hands of a master, nor rise but with kindlier and more liberal feelings towards the great brotherhood of Christians, under whatever name they bear. Ours is a great, growing, and glorious country, and every family, and every young man, throughout its length and breadth, should have a copy as a text book of all its denominations. Wherever known, it is read, and wherever read, admired. Look at the following from among the very many notices received:

It embodies a vast amount of information relative to the origin, history, and missionary operations of the different religious denominations in this country, presented in a remarkably interesting and attractive manner.—*Rev. John Dowling, D. D., Author of "The History of Romanism," "Judson Offering," etc.*

This is a large and beautiful volume, and will find a cordial welcome in every family.—*Philadelphia Christian Chronicle.*

So far as concerns independence of vision, there can be no question, as Dr. Belcher surveys each sect with the same dispassionate impartiality.—*Epis. Recorder.*

This massive volume embraces a vast fund of information.—*Presbyterian.*

The work is sold by agents, and will furnish a large amount of interesting and valuable information to the families into which it may be received.—*New York Recorder and Register.*

In the account given of the denominations, he is fair, and generally allows them to speak for themselves, as to their history and institutions.—*New York Christian Advocate and Journal.*

It contains a mass of interesting facts and statistics. —*Norton's Literary Gazette.*

Judging from the work, it would be difficult to say what are the religious views of the Editor, so fairly, so dispassionately, so charitably, has he treated each and every sect.—*Philadelphia City Item.*

We presume it will be a standard work in thousands of libraries.—*Littell's Living Age.*

Sold only by agents, to whom certain districts are allotted. For particulars address the publisher,
JOHN E. POTTER,
15 Sansom-st., Philadelphia.
Or, Noyes Spicer, Indianapolis, Ind.

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c. *Spring Arrangements*, commencing April 2, 1855: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M. For Somerville, (way,) at 5.30 P. M.

The above trains connect at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 1, 4 and 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 6 and 9.45 A. M. and 3 P. M.; Somerville (way) at 6 A. M.

New York and Elizabethport.

Leave New York at 8 and 10 A. M., 1, 4 and 5 P. M.
Leave Elizabethport at 7.15 and 9.10 A. M., 1, 3.15 and 6 P. M. JOHN O. STERNS, Superintendent.

New York and Erie Railroad.

ON and after Monday, May 7, and until further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Dunkirk Express at 6 A. M. for Dunkirk.
Buffalo Express at 6 A. M. for Buffalo.
Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.
Accommodation at 12¼ P. M. for Port Jervis and intermediate stations.
Rockland Passenger at 3 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.
Way Passenger at 4 P. M. for Newburgh and Otisville and intermediate stations.
Night Express at 5½ P. M. for Dunkirk and Buffalo.
Emigrant at 6 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5½ P. M.

These Express Trains connect at Elmira with the Elmira and Niagara Falls Railroad, for Niagara Falls, at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicago, &c., and with first-class splendid steamers for all ports on Lake Erie.

D. C. McCALLUM, General Sup't.

Miscellaneous.

Advice to Consumptives.

In some good advice to consumptives, Dr. Hall says:—

Eat all you can digest, and exercise a great deal in the open air, to convert what you eat into pure healthful blood. Do not be afraid of out-door air, day or night. Do not be afraid of sudden changes of weather; let no change, hot or cold, keep you in doors. If it is rainy weather, the more need of your going out, because you eat as much upon a rainy day as upon a clear day, and if you exercise less, that much more remains in the system of what ought to be thrown off by exercise, and some ill results, some consequent symptom or ill feeling is the certain issue. If it is cold out of doors, do not muffle your eyes, mouth and nose, in furs, veils, woolen comforters, and the like; nature has supplied you with the best muffler, with the best inhaling regulator, that is, two lips; shut them before you step out of a warm into the cold air, and keep them shut until you have walked briskly a few rods and quickened the circulation a little; walk fast enough to keep off a feeling of chillness, and taking cold will be impossible. What are the facts of the case: Look at a railroad conductor's going out of a hot air into the piercing cold of winter, and in again, every five or ten minutes, and yet they do not take cold oftener than others; you will scarcely find a consumptive man in a thousand of them. It is wonderful how afraid consumptive folks are of fresh air, the very thing that would cure them, the only obstacle to a cure being that they do not get enough of it, especially if it is cold; when it is known that the colder the air is, the purer it must be; yet if people cannot get to a hot climate, they will make an artificial one, and imprison themselves for a whole winter in a warm room, with a temperature not varying ten degrees in six months; all such people die, yet we follow in their footsteps. If I was seriously ill of consumption, I would live out of doors day and night, except it was raining or mid-winter, then I would sleep in an unplastered log house. My consumptive friends, you want *air*, not physic; you want pure air, not medicated air; you want nutrition, such as plenty of meat and bread will give, and they alone; physic has no nutriment, gaspings for air cannot cure you; monkey capers in a gymnasium cannot cure you, and stimulants cannot cure you. If you want to get well, go in for *beef and out-door air*, and do not be deluded into the grave by advertisements and unfindable certifiers.

A Few Words on Summer Fallows.

The two principal objects of summer fallowing are, to clean the land, and to convert, by the admission of light and air, and by the comminution of the particles of the soil, its inert matter into available food for plants. In light sandy soils, which admit the air readily at all times—and in which, consequently, there is but little dormant matter capable of speedy decomposition—a fallow is not followed by that increase of crops so observable on rich clay loams, which, without constant working, are impervious to the atmosphere. Farmers in old countries are well satisfied on this point, while with us every year seems to convince multitudes of its truth.

We admit that sandy land produces better crops for a few years when first tilled, than clay land, and that summer fallowing on such lands is attended with better results for a few years than on heavy loams. But after the organic matter of these light soils is removed—as under a system of summer fallowing it soon will be—the increase of crops from this process is materially lessened. Summer fallowing on sandy soil is simply acclerating the decomposition of organic matter and the disintegration of the mineral elements of plants in the soil, rendering them available, without increasing the quantity. On such soils, therefore, it must be considered an exhausting system of cultivation.

On aluminous soils the case is different. Most clays naturally contain an almost inexhaustible amount of the elements of plants, and the principal aim of the cultivator is to render these elements assimilable. Thorough pulverization enables him to do this to the best advantage; and we may question whether the heavy land farmer will ever be able to dispense altogether with summer fallows.

Clay land possesses the power of retaining the ammonia contained in the rain-water which filters through it; while sandy soils possess this power only in a slight degree, if at all.

When an underdrained, rich clay soil is summer fallowed, therefore, not only is the food of plants locked up in it rendered available, but all the ammonia in the rain which falls during the year it is fallow, is retained for the use of the subsequent crop. If the rain which falls on an acre of land in a year contains fifty pounds of ammonia, a good summer fallow, on such soils as we have supposed, would increase the next wheat crop ten bushels per acre, or in other words, it would supply as much ammonia as three hundred weight of the best Peruvian guano.

On a sandy soil, especially one which has long been under such a system of tillage, little increase of fertility, is gained by the decomposition and disintegration of inert matter—since such soils contain comparatively little inert food for plants—and but a small proportion of the ammonia of rain-water is retained. So that, while the heavy land farmer is under the necessity of performing much more heavy work, and of raising fewer crops than his sandy soil neighborhood, yet he is not necessitated to use so much manure, and reaps frequently in one crop as much profit as other does in two. Each class of soils, however, has its advantages and disadvantages, and in Great Britain, since the extensive introduction of turnip culture, the light soils have been more profitable than the heavy soils which need summer fallowing.

Summer fallowing of sandy soils is unwise; now, then, should they be cultivated? Sow them to clover, peas, beans, lentils, rape, &c., and either plough in these crops or feed them to cattle or sheep and return the manure. These plants take up the ammonia brought to the soil in rain-water, and when ploughed in or eaten on the land, the ammonia is retained just as it is on the clays. In this way, clover, &c., is to the light soils what the double silicates are to the clays—the retainer of ammonia for the use of the following wheat crop.

On medium soils—such as abound in Western New York and Upper Canada—a blending of these two systems would appear judicious. This would be, growing as much clover, &c., as possible, eating a portion of it on the land, and breaking up about the last week in June, simply cultivating and harrowing it afterwards to keep it free from weeds and render it mellow. This practice is adopted to a great extent in Western New York, and is found much better and cheaper than several ploughings as in the old summer fallow system.

Even on heavy clay land many intelligent farmers prefer turning under a crop of clover when in bloom in this way, rather than to summer fallow proper. The clover keeps the land light, and the gases generatad duaing its decomposition serve both to enrich and ameliorate the soil. How far this practice is capable of superseding the old summer fallow, experience only can decide. English experience is against it; but our cold winters and hot summers, and above all the westerly winds which so constantly prevail, and which so astonish Europeans in licking up moisture, render the pulverization of the soil in this country a comparatively easy task, and enables us to dispense with much of the labor necessary on European, and especially on British farms.

And we may here say that such are the differences of climate that we are quite satisged that no English system of rotation, or of tillage, is applicable to this country, and that the only advantage to be expected from the experience of our trans-Atlantic cousins—admitting as we must, that they are the best farmers in the world—is from studying the principles on which their systems are founded; and thus while we may not be able to grow their turnips and vetches, and are not, perhaps, under the necessity of adopting their long or summer fallow, we may build up a system of agriculture adapted to our different circumstances, and yet having for its foundation, the same great laws which govern the processes sanctioned by their long experience.

One of the great wants of our system of rotation is a fallow crop. A crop which, while it impoverishes the soil but little, permits the free use of the cultivator and hoe during summer; a crop that shall be to us, what the turnip is to English farmers; a crop, in a word, that shall enable us to clean our land, as well as though it was summer fallowed, that furnishes a large amount of nutritious food, and which, when consumed on the farm, and the manure made from it returned to the soil, shall leave the land rich in ammonia for the use of the following cereal crops. Indian corn admirably answers the two first requisites, but we fear it consumes, or destroys as much ammonia as wheat, and that, therefore, it is not a true fallow crop. Beans come nearer our requirements than any other crop we are acquainted with, and it is surprising that they are not more extensively grown on all wheat farms. [Country Gentleman.

Hoeing in Dry Weather.

Experience has fully established the fact, that corn, and other crops, are essentially benefited by hoeing in dry weather, but the reason why, or the manner how it is done, is not so generally understood. That moisture is formed by stirring the dry particles of earth and changing their relative positions, is generally admitted.

Water is composed of oxygen and hydrogen. These substances are also contained in different proportions, in the earth and atmosphere, and are, to some extent, formed by the action of different particles of earthy matter upon each other, when brought into contact, as done by hoeing. Water acts as a solvent of other substances, and holds them in solution, so that they can be taken up by the roots, and made to nourish the growing plant. This is the reason why it is best to sow or plant your seeds as soon as possible after the land has been plowed or harrowed. The different particles of matter coming together, form new relations and chemical action, during which heat is evolved, and oxygen and hydrogen are generated and caused to unite, and form water; which with other substances acts upon the seeds and produces germination and gives to a new born plant a vigorous start into existence. After the soil has remained quiet for some time, these substances having exhausted their energy, by neutralizing the powers of each other, the plant having absorbed all the elements of nutrition within reach of its roots, its growth becomes retarded, and can only be restored by renewing the chemical action. This can be done by applying some compost manure, or by hoeing or stirring the earth, so as to bring different particles into contact with each other and forming new combinations, and consequently, thus producing a further supply of nutritious matter. Corn that is hoed every two or three weeks will come to maturity sooner, produce more, and be better filled on the cob, than it will when treated in the usual way. We would recommend to our farmers, to select two or three rows in the field, and hoe them regularly once in two weeks, and in the fall inform us of the results of their experiment. [Western Dispatch.

Planting an Orchard.

No branch of business in the West pays so well for the amount of money and labor invested as that of fruit growing, if properly managed.

Every man who sets a tree or plant should first procure some treatise on fruit raising, such as Downing on Fruit, Thomas' Fruit Culturist, or Barry's Fruit Garden, and there he will find every thing in the line of fruit-raising satisfactorily explained.

Dry ground should be selected for an orchard. The ground should be ploughed at least one foot deep; the holes should be dug considerably larger than the extent of the roots of the trees to be planted, and not less than eighteen inches deep; cut off all broken roots, and smooth with a sharp knife the ends of those that are mutilated by the spade in digging. If the tree is of any size, place the same side to the sun as it was in the nursery. It is readily distinguished; the south side is of a reddish brown color, and the north side of dark green. When transplanting the tree, extend the roots out to their natural position, and never set a tree deeper in the earth than it was before transplanting; then fill up the hole with the earth taken from the surface, well pulverized, and be sure that you leave no vacancies about the roots. If the ground be dry, when you get the roots covered, pour in half a bucket of water, and when it settles away, fill up the hole. Be careful not to tread the earth down too firm. Then mulch—that is, place coarse manure or straw one or two inches deep on the ground about the tree.

A young orchard should be by all means cultivated with a hoed crop, and never allow small grain or grass to be sown among them. If you wish your trees to fruit young, train the tops to branch within two or three feet of the ground, and keep your pruning knife in your pocket, and stock out of the orchard. It will soon pay you for your trouble.

Remedy for Grape Rot.

The *Tribune* translates the following from the *Kolnische Zeitung*:—

Dr. Franz Vulcan, of Eppan, in Tyrol, having learned by experience that the parasites of vegetables cannot exist on animal matter, has discovered a remedy for the grape disease. He dissolved 2½ pounds of common glue in 10 gallons of water, by boiling, and then cooled the solution until it was neither stiff nor yet too watery, but had the appearance of ley. Diseased grapes were dipped in this solution, and after 48 hours they assumed a lustrous, dark green color, like that of those which had not been attacked. In September they ripened into the finest fruit. To make sure that it was that solution which produced the desired result, he selected three bunches on the same branch; he dipped the whole of the first, half of the second, and the third not at all. The first was entirely untouched, the second as far as it had been dipped, the third remained diseased, and in four weeks burst and rotted. On another vine, where branches, leaves, and fruit, were infected in the highest degree, a similar experiment produced a similar result. In places where large tracts of vines were struck with the blight, single clusters were dipped, and these were healthy and gave very fine fruit, while all the rest rotted. Perhaps the sprinkling of potato vines might be equally successful. The cheapness of that remedy commends it to general use.

Feeling on the Battle Field.—The Crimea correspondent of the New York *Sun*, writing from Balaklava, gives, from the experience of a wounded Frenchman, an opinion with regard to the sensations felt by the soldier in time of conflict, which is something as follows:—

Before the battle begins, it is usual to feel no little tremor, and many cheeks, which are known to be in communication with stout hearts, blanch visibly. As the conflict becomes imminent, courage returns, and with the first flow of blood an enthusiasm is raised which constantly increases, and very seldom flags in the least until the last shot is fired. The effect of seeing a comrade shot down is generally to excite an inappeasable thirst for vengeance against the foe, though in the end one "gets used to it." When wounded less than mortally, it is not usual for the soldier to be immediately aware of the fact, unless some bones are broken. A sabre may be run through any fleshy part of the body, and even a bullet lodge in dangerous proximity to the vitals, and he, for a long time, be totally unconscious of even a scratch. When life is taken by a single blow, the effect varies with the nature of the wound, as well as with the temperament of the man. Sometimes the poor fellow will leap high in air, giving a piercing scream, and again he will lie down quietly. Oftener, however, he simply falls dead without a struggle. In most cases the features of the killed remain unchanged for a long time after death—eyes open and brilliant, and, perchance, a smile illuminating the face. To see such an one it is difficult indeed to realize the presence of the grim monster, Death.

Projected Railroad Round London.

From the London Times.

Much interest has been excited by the publication of the plan understood to have been in preparation for some time by Sir Joseph Paxton for effecting a new and thorough communication between the city and the West End, and its ultimate extension in the nature of a boulevard round London. The proposal embraces a carriage arcade of the same breadth as the transept in the old Crystal Palace, which was wider than that of the present one, starting from the Mansion House towards Southwark Bridge, crossing the river, running to the Southwestern Railway station, and thence again across the river near Hungerford Bridge to the Regent-circus—the communication by this route being nearly the same in point of distance as that by the Strand. At the same time a line of similar character would branch from a point near the Southwestern Railway to the Houses of Parliament and Victoria-street by a bridge at Lambeth, and, as at the back of the houses on each side atmospheric lines of railway are to be constructed, the transit between Belgravia and the Bank would thus be reduced to about eight minutes, and between the Bank and Charing-cross, or the Regent-circus, to about five or six minutes. This railway would be at an elevation to enable it to pass across the various streets which it would intersect without interfering with any of the existing roads, and the system would involve a constant succession of express trains as well as of stopping trains at every half mile or less, so arranged as to be perfectly noiseless. The carraigeway of the arcade, it is contemplated, should be closed against wagons between nine in the morning and nine at night, to insure the facilities for quick passenger traffic as well as for increasing the attraction of the costly shops on each side, and among the prominent recommendations of property on the line would be the protection afforded to all kinds of goods by its cleanliness, equable temperature, brightness of light, and immunity from weather as a promenade and drive in Summer and Winter. The estimated cost of this improvement, which Sir Joseph Paxton considers would be the largest thoroughfare in the world, and such as to make London the most magnificent and convenient city in existence, is £11,300,000, and the calculated returns from rents and railway avenue are £938,000, or between 8 and 9 per cent. To insure its completion, however, in the best manner for the interests of the nation, it is contended that the co-operation of Government should be obtained, and that this should consist in a guarantee of 4 per cent. interest for 60 years, on condition that a half of one per cent. should be set aside annually to redeem the capital within that period, and that all receipts above 4 per cent. should be equally divided between the State and the Company. Under this it would appear that, if the property were to yield the anticipated return of 8 per cent., the transaction would result in the nation receiving an annual payment of more than £200,000 for 60 years, and at the end of that time being put in the possession of the entire property without ever having incurred the expenditure of a shilling, while the public would gain three free bridges and the removal of delays and obstacles which have been estimated to cost an annual money loss of upwards of a million sterling to the trade of the kingdom. The ultimate extension of the undertaking as a boulevard encircling London, and connecting all the railway stations, would increase the total cost to £34,000,000, but it is obvious that the grand point of bringing the city and the west end into rapid communication should be the first to command attention, and it is an advantageous feature of the plan that this object, free from uncertainty, can be accomplished by itself, leaving the remainder to be carried out as a necessary consequence of its success.

A Magnetic Telegraph without Wires.

An Italian gentleman at Turin has just discovered and shown by numerous successful experiments, as is reported, that the railway track makes an excellent substitute for the telegraph wires, and that any train carrying along with it a small battery and apparatus can communicate to and fro with the stations before and behind while going at full speed. This application of the telegraph will probably be immediate, universal, and of immense value. One train meeting another can communicate directly with it, and though both approaching each other at the rate of sixty to a hundred miles an hour, they can herald their coming to each other at an infinitely greater speed, converse backward and forward, and make arrangements for stopping or passing as they draw near. If any thing detains a train they can telegraph its whereabouts; if an accident or obstruction occurs, it can send for assistance, and warn trains approaching or overtaking.

Properly managed this would make collisions almost impossible and the probabilities of accident infinitely less, since the moving train could then be communicated with at any moment and from any part of the track. There would then only require the discovery of some combination of substances sufficiently simple and universal by which a magnetic current can at any moment be communicated along the railroad track from any point, so as to excite the attention of the operator in the cars. A premium offered would without doubt soon secure the best method of effecting this.

Since writing the above, we learn that the method in which the Italian gentleman transmits his messages has not yet been made public. This, however, is of small matter if the above facts are true. If the magnetic fluid can be transmitted along an ordinary railroad, instead of passing down into the earth, our operators will find no difficulty in making it talk. The rails being laid on wooden sleepers, so long as they and the surrounding earth are dry we have little doubt that communication may be effected. Where, however, the iron touches the ground, naturally damp, or wet by a shower of rain, we doubt the success of the experiment. When the lines are out of order on the arrival of a steamer, it may prove possible sometimes to transmit the news along the railroad tracks past the break.

A Sad Tragedy in the Crimea.

The following is an extract of a letter from the camp before Sebastopol, dated May 22: "A sad tragedy occurred this morning at the entrance to Karabeluaia ravine. A body of French troops was marching down to furnish the usual relief to the picket in the ravine. The relief was composed of part of the 22d battalion of the 25th regiment of the line. On the way Lieut. Deiant, of the grenadier company, had occasion to check a soldier, who, being partly intoxicated, was marching very irregularly, and giving expression to angry sentiments in a loud tone. Scarcely had the reprimand been given when the man replied: 'Lieutenant, you've punished me often enough—you shall not punish me any more,' and on the instant leveling his musket, he fired and shot him through the body. The unfortunate officer, a man of powerful frame and popular in the regiment, at once fell. He was carried to one of the English hospitals near at hand, and died almost immediately after his arrival. The murderer was secured without delay, and was being taken back under escort to the head-quarters of his regiment, when a general murmur arose from the men for his instant punishment. The general in command of the trenches was in the ravine close by, and after a brief consultation between him and the commandant of the relief, a council was held, and the man condemned to be shot. About 200 yards down the ravine, and at a slight elevation above it on the side of Frenchman's-hill, a small heap of stones was observed with a clear space before it. To this the unhappy culprit was brought, while on either side the battalion was drawn up in companies, and here he received the fire of twelve muskets from a party placed on the opposite side of the ravine. He fell forward pierced by eight bullets, and after a short address from the general the regiment proceeded on its way. Half an hour scarcely elapsed between the perpetration of the crime and the execution of the criminal. The soldier had become sober immediately after committing the murder. He had seen 18 years' service, and was spoken of as a brave and able man."

The New Guano Island.

It is said that a new guano island, the locality of which has revealed by the discoveries only to a select few, has recently fallen into American hands, and that the owners have made arrangements to acquaint the United States Government confidentially with its character and position, and to solicit adequate protection in their enterprise of removing the guano. It is said that the island is not laid down in any chart, that it is uninhabited and belongs to no organized Government, and that the quantity of guano upon it exceeds two million tons, all of which can be brought to our ports and sold at the rate of twenty dollars a ton, or less than half the price of the Peruvian guano.

The *Journal of Commerce*, which professes to know "more of the circumstances connected with the discovery of this island than it will be expedient to disclose at present," says that it is represented to have been originally depressed in the center, and that there now exists on the borders of this depression, which is supposed to have been formerly a shallow lagoon, large quantities of pure salt of ammonia; and the guano in that vicinity is similar to some cargoes brought into this country some years since from Watchman's Cape, which is said to have contained between thirty and forty per cent. of ammonia, and from which there were taken a number of barrels of pure crystalized ammonia. If all these representations are true, the island will prove a very valuable possession.

Fat Men.

There is something cordial about a fat man. Everybody likes him, and he likes everybody. Your Ishmaelites are, in truth, a bareboned race; a lank tribe they are, skeleton and bile. Food does a fat man good; it clings to him; it fructifies on him; he swells nobly out; and fills a generous space in life. He is a living, walking minister of gratitude to the earth, and the fullness thereof; an incarnate testimony against the vanities of care; a radiant manifestation of the wisdom of good humor. A fat man is, *per se*, a popular man, and commonly he deserves his popularity. In a crowded vehicle, the fattest man will ever be the most ready to make room. Indeed, he seems to be half sorry for his size, lest it be in the way of others; but others would not have him less than he is, for his humanity is usually commensurate with his bulk. A fat man has abundance of rich juices. The hinges of his system are well oiled; the springs of his being are noiseless; and so he goes on his way rejoicing, in full contentment and placidity.

A fat man fills his position solid in the world; he knows that his being is cognizable; he knows that he has a marked place in the universe, and that he need take no extra pains to advertise mankind that he is among them; he knows that he is in no danger of being overlooked. It does really take a real wrong to make one really hate a fat man; and if we are not always as cordial to a thin man as we should be, Christian charity should take into account the force of prejudice which we have to overcome against his thinness. A fat man is nearest to that most perfect of figures, a mathematical sphere; a thin man to the most limited of conceivable dimensions, a simple line. A fat man is a being of harmonious volume, and holds relations to the material universe in every direction; a thin man has nothing but length; a thin man, in fact, is but the continuation of a point.

[Lectures of Henry Giles.

A French Woman.

The French woman's characteristics are generally that she is unexceptionally shod; that she wears inimitable gloves; that she has a toilet of two colors, only with a distracting way of wearing it; that her manners are bewitching—full of small grades and delicately shaped coquetries, and never wanting in the nicest appreciation of external proprieties, to which her flirtations are always subordinate—that she has a marvelous faculty of walking clean through the dirty streets of Paris. These are popular characteristics, and few people allow her any other; but those who know her know that other thoughts beside dress and flirting work beneath those smooth bands of glossy hair, which look as though they had taken a lifetime to bring them to their present high condition of polish and intricate arrangement, and that the hands in their close-fitting gloves can do something better than make up caps and crotchet-purses; that she is not only an agreeable woman of society, but also a careful housekeeper, an affectionate mother, and a submissive wife. A French woman cleans her gloves, light boots, silks and laces, at the cost of a few cents, and with a surprising success. They pass for new on any inspection but the closest, and are worthy to do so. A French woman never buys a lining for a new gown; she cuts up her old gowns and worn-out petticoats instead. She unpicks and stitches up again, turns, irons, and renews, until every inch of the stuff has served half-a-dozen purposes, and there is not an unworn thread in the whole garment. A French woman is always noticeable for her clean linen—cuffs and collars always white and fresh; but then she works them herself, and thus procures another large feminine luxury at small cost. It is the same with her table-linen. Napkins at breakfast, napkins at dinner, and fresh table-cloths or supper napkins are constantly renewed.

Washington in 1801.

One can scarcely credit the description of Washington City, as Mrs. Adams found it in 1801. "Here and there," she writes, "is a small cot, without a glass window, interspersed among the forests, through which you travel for miles without seeing a human being. The house is upon a grand and superb scale, requiring about thirty servants to attend and keep the apartments in proper order. I could content myself almost any where for three months; but surrounded by forests, can you believe that wood is not to be had, because people cannot be found to cut and cart it? The house is made habitable, but there is not a single apartment finished. We have not the least fence, yard, or other convenience without, and the great unfinished audience-room I make a drying room of, to hang up clothes in. It is a beautiful spot, capable of every improvement, and the more I view it, the more I am delighted with it."

The "great unfinished audience room," which Mrs. Adams speaks of, is the famous East Room of the White House.

An Anecdote from the Seat of War.—We copy the following from a letter from an officer in the Crimea to one of our citizens:

A curious thing occurred yesterday. A sapper was brought from the trenches with his jaw broken; and the doctor told me there was a piece of it sticking out half an inch from his face. The man said it was done by a round shot, which the doctor disbelieved; but the poor fellow insisted and said, "Yes, it took off the head of a man next me." This was conclusive, and the surgeon proceeded to remove the bone; it came out quite easy, when the doctor said to the man, whose face appeared to preserve its form pretty well, "Can you move your jaw?" "Oh yes, Sir," was the reply. The doctor then put his finger into the man's mouth and found that the teeth were there, and at length assured the soldier that it was no jaw of his that was broken, but that of his headless comrade, which had actually been driven into his face—inflicting a severe but not dangerous wound. Upon this the man's visage, which had been rather lengthened, rounded up most beautifully.

[Buff. Com. Adv.

Determination.—"The longer I live," says Sir T. F. Buxton, "the more I am certain, that the great difference between men—between the feeble and the powerful, the great and the insignificant—is energy, invincible determination, a purpose once fixed on; and then death or victory. That quality will do anything that can be done in the world; and no talents, no circumstances, no opportunities, will make a two-legged creature a man without it."

New Steamboat Line for Albany and Troy.
From Pier 15, foot of Liberty-st., at 6 P. M.

STEAMER RIP VAN WINKLE, C. W. Farnham, Commander, Monday, Wednesday and Friday, at 6 o'clock, P. M.; steamer COMMODORE, L. Smith, Commander, Tuesday and Thursday, at 6 o'clock, P. M., and Sunday, at 5 P. M.

Fares: Saratoga, $1 50; Moreau, $2 15; Fort Edward, $2 15; Whitehall, $2 75; Castleton, $3 10; Rutland, $3; Burlington, $4; Rouses Point, $5 50; Montreal, $7 50.

These Boats will arrive in Albany or Troy in ample time to form connections with all the Railroads, North, East or West, enabling passengers to reach Montreal and intermediate points the same day.

These Steamers are of the first class for strength and speed—well known favorities of the public—having been thoroughly overhauled during the past winter, and offer every accommodation that can be desired by either freighter or traveler.

Through tickets can be obtained on board the boats for Saratoga, Moreau, Fort Edward, Whitehall, Castleton, Rutland, Burlington, Rouse's Point and Montreal.

The Northern Freight Express will give Bills of Lading to all points as above named. Shippers who desire it, can have time receipts, by applying at the office on the Pier. A. A. DYKEMAN.

Ayer's Pills.

A NEW and singularly successful remedy for the cure of all Bilious diseases—Costiveness, Indigestion, Jaundice, Dropsy, Rheumatism, Fevers, Gout, Humors, Nervousness, Irritability, Inflammations, Headache, Pains in the Breast, Side, Back, and Limbs, Female Complaints, &c., &c. Indeed very few are the diseases in which a Purgative Medicine is not more or less required, and much sickness and suffering might be prevented, if a harmless but effectual Cathartic were more freely used. No person can feel well while a costive habit of body prevails; besides, it soon generates serious and often fatal diseases, which might have been avoided by the timely and judicious use of a good purgative. This is alike true of Colds, Feverish symptoms, and Bilious derangements. They all tend to become or produce the deep seated and formidable distempers which load the hearses all over the land. Hence a reliable family physic is of the first importance to the public health, and this Pill has been perfected with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing any thing hitherto known of any medicine. Cures have been effected beyond belief, were they not substantiated by persons of such exalted positions and character as to forbid the suspicion of untruth.

Among the eminent gentlemen who have testified in favor of these Pills, we may mention:

Doct. A. A. Hayes, Analytical Chemist of Boston, and State Assayer of Massachusetts, whose high professional character is endorsed by the—

Hon. Edward Everett, Senator of the United States.

Robert C. Winthrop, Ex-Speaker of the House of Representatives.

Abbott Lawrence, Minister Plen. to England.

†John B. Fitzpatrick, Catholic Bishop of Boston; also

Dr. J. R. Chilton, Practical Chemist of New York City; endorsed by

Hon. W. L. Marcy, Secretary of State.

Wm. B. Astor, the richest man in America.

S. Leland & Co., Proprietors of the Metropolitan Hotel, and others.

These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compounded not of the drugs themselves, but of the medicinal virtues only of Vegetable remedies extracted by Chemical process in a state of purity, and combined together in such a manner as to insure the best results. This system of composition for medicines has been found in Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any process. The reason is perfectly obvious. While by the old mode of composition, every medicine is burdened with more or less of acrimonious and injurious qualities, by this each individual virtue only that is desired for the curative effect is present. All the inert and obnoxious qualities of each substance employed are left behind, the curative virtues only being retained. Hence it is self-evident the effects should prove as they have proved, more purely remedial, and the Pills a more powerful antidote to disease than any other medicine known to the world.

As it is frequently expedient that many medicines should be taken under the counsel of an attending physician, and as he could not properly judge of a remedy without knowing its composition, I have supplied the accurate Formulæ by which both my Pectoral and Pills are made, to the whole body of Practitioners in the United States and British American Provinces. If however there should be any one who has not received them, they will be forwarded by mail to his request.

Of all the Patent Medicines that are offered, how few would be taken if their composition was known! Their life consists in their mystery. I have no mysteries.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject freely acknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many eminent Physicians have declared the same thing of my Pills, and even more confidently, and are willing to certify that their anticipations were more than realized by their effects upon trial.

They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.

Prepared by Dr. J. C. AYER, Chemist, Lowell, Mass. Price 25 Cents per Box. Five Boxes for $1 00.

Sold at wholesale in New York by A. B. & D. Sands, retail by Rushton, Clark & Co., and by all Druggists, everywhere.

The Sabbath Recorder,
PUBLISHED WEEKLY
By the Seventh-day Baptist Publishing Society,
AT
NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the time to which they reach.

☞ No paper discontinued until arrearages are paid, except at the discretion of the publisher.

☞ Communications, orders, and remittances, should be directed, post paid, to

Geo. B. Utter, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

THE CHURCH AND THE MINISTRY.

Report on Ministerial Supply, read before the Seventh-day Baptist Western Association at its last session, by J. M. Allen, and ordered to be published in the Sabbath Recorder.

[Continued.]

PARENTS.

If the church is properly supplied, there are, doubtless, some one or more Christian families, in almost every church, whose son or sons are to be devoted to this work. The Lord hath need of many of them for this work. And it is interesting to notice here, how frequently and how powerfully the biases and tendencies and pursuits, as well as the habits of the child, are affected and determined by the influences and teachings of home. The habits of the child are molded and patterned after those of the parents; his biases and beliefs, in his young days at least, are faithful daguerreotypes of the parental biases and beliefs. Indeed, it is in some sort a tendency, a law of nature, that the spiritual as well as the physical nature of the child should be but an image of the parent, and that the life of the one shall be reproduced, with more or less faithfulness, in that of the other. There is a natural tendency, for instance, that the children of whigs should be whigs, and those of democrats should be democrats; that the descendants of Presbyterians, Congregationalists, Baptists, Methodists or Catholics, should hold to the same creed as their fathers; likewise the sons of farmers and mechanics and merchants, fall naturally into like pursuits; and the sons of ministers have peculiar facilities for preparing for a like vocation. Dr. Spring remarks as follows on this subject:—

"To what extent the Christian ministry in other lands has been supplied from the families of Christian ministers, I am not extensively informed; the history of the American church abundantly indicates, that this has been one of the greatest sources of this supply. * * * Not far from seventy ministers in the American church can trace their lineage to the elder Edwards; he himself was the son of a clergyman; and his earliest known ancestor was a preacher of the gospel, settled in London, in the reign of Elizabeth. There are ministers now living among us, who can trace their genealogy to five, and some to six generations, in a direct, unbroken line, to the house of Levi. Others there are, who have been permitted to introduce, some two, some three, and some five of their sons to the same sacred vocation with themselves. We should probably be not a little surprised by our inquiries into the lineal descent of the living ministry, to ascertain that such multitudes of them are sons of those who themselves served at God's altars. After some considerable research and correspondence on this subject, I have come to the conclusion, that more than one-fifth part of all the ministers in the Presbyterian and Congregational churches in this land, are of ministerial descent."

What Dr. Spring thus affirms of the above-named denominations will, doubtless, hold true, to a greater or less extent, of other denominations. It is doubtless also true, that nearly all of those who prove worthless, or a disgrace to the ministry after entering it, are those whose early religious training has been neglected. If these remarks be true, they go to show how important it is, in order to the supplying the church with an able and pious ministry, that parents should make their homes nurseries of elevated piety and practical religion. It is not possible for water to rise higher than its fountain. Thus also from those homes where the standard of religion is low, the church cannot expect that there will proceed bright and shining religious lights. Indeed, ministers are, or ought to be, the products of genial culture and warm spiritual climes. The church need not look to those families where the domestic duties demanded by religion are neglected, nor to those families where the ministry is not held in esteem, not to speak of those families where both the ministry and ministers are ridiculed, despised; where the young grow up with feelings of bitterness or contempt towards ministers; to such, we say, the church need not look for ministerial supplies. But she is rather to look to those homes where childhood and youth are carefully nurtured in the pious principles of religion, where the young are taught to respect and love the institutions of religion, and to treat with especial honor those that minister in the sacred office. The church is to look, *not* to those families where the old Levitical law *is reversed*, and the spiritual dwarfs, and blind, and lame, and bruised, and deformed, and paralytic, and dyspeptic, are offered for the sacred ministrations—while the strong, and talented, and noble, and healthy in spirit are dedicated to the law, or medicine, or merchandize, or the farm; but she is to look, rather, to those families where all are unreservedly dedicated to the Lord and His service; to those families where the spiritual is of such a high and practical nature, that the young can pass from such training into the highest offices of the church, by natural and easy transitions; where they are carefully trained for the highest and holiest responsibilities of life, as well as the humblest. Do not parents too frequently fix too low and groveling an ideal according to which their children are being molded and educated? Do not parents too frequently predetermine, fore-ordain, that their children, at best, shall be but seekers of dollars and cents, and hence plan and shape their whole education accordingly? They too frequently starve, and shrivel, and cramp, and carve, and chisel those young spirits which God has given them to be trained for high and holy purposes, until they are dwarfed in spirit and hardened in heart, and become fit devotees to mammon. How often are the great ends and aims of life neglected and forgotten, and the all-absorbing love of money takes their place. And the young are early imbued with the same principles. By day and by night, as they sit in the house, and as they walk by the way, as they lie down and as they rise up, they hear the long, deep, all-absorbing cry, "Money, money" They see its image engraven upon the door posts, and upon the gates; they see it as a sign upon the hands, and as a frontlet between the eyes. Is it any wonder, then, that they fall down and worship? How often do parents, forgetting the high commission given them, to train and educate the spirits committed to their charge, for the highest and most responsible duties appertaining to man, train them as if all of life was summed up in dressing with primness, in measuring tape, balancing a ledger, or making out a bill with nimbleness and elegancy, and a due regard to custom, and in scrupulously observing the forms and ceremonies imposed by etiquette and fashion. Many are the parents who have children, endowed by nature with capacities for blessing the church and the world, who would, if properly educated, be strong champions in the cause of Christ;

> "But knowledge to their eyes her ample page,
> Rich with the spoils of time, did ne'er unroll;
> Chill avarice repressed their noble rays,
> And froze the genial current of the soul."

Let parents so educate their children, that if the Lord hath need of them for the highest offices in his church, or for standard-bearers in the world's progress, they can enter upon their mission unfettered by habits or prejudices, or the want of early mental or religious culture.

THE SPIRIT OF CRITICISM OR OF KINDNESS.

A young man approaching the ministry with the approval of the church, should be encouraged, assisted, confided in; not held back, restrained, kept down, even for the sake of seeing how much vital strength and energy he may possess, or how many difficulties he can surmount. Throw not too many barriers [illegible] walls around the ministry; nor yet urge the candidate on faster than he is able to go. In a matter so difficult, no arbitrary rules can be laid down for the guidance of the church; yet much prudence and wisdom, joined with kindness and sympathy, are necessary for the proper conducting of this matter. Perhaps the spirit manifested by the church is a safer and more infallible criterion than any other. The spirit is everything, the form but little. The spirit of kindness, rather than of criticism, is the spirit in which the church should meet and test the youthful candidate. Criticism is cold, is negative, is fault-finding. If we read or listen as a critic, in the spirit of a critic, we shall not sympathize with the writer or speaker. He cannot do us good. The spirit of love, of charity, on the other hand, is affirmative, is sympathizing, is genial and cordial. It falls in readily with the spirit and thoughts of the speaker. Guided by this spirit, we shall discover pure veins of precious gold; flashes of light, where the critic can see nothing but ashes and dross and rottenness. If the hearers encounter the young candidate as certain philosophers of the Stoics and Epicureans encountered Paul, with a quizical spirit, with a desire to hear what the young babbler can say, they will undoubtedly, like them, turn away to mock; but if they come with kindly hearts and sympathies, they will, most probably, return to pray. Meeting the candidate in a kindly and generous spirit, the judgment of the church will be charitable, and her decisions according to the best merits of the candidate; yet, even such decisions are not infallible, and must be considered only advisive, as counsel, but never to be disregarded by the candidate, save for the most weighty reasons. It is not infallible, we say, for who has not heard of instances where praying Christians, pillars of the church, have been greatly troubled in spirit and cast down, because some one deemed by them incompetent, had commenced preaching; yet that individual, perhaps, has proved to be one of the brightest ornaments of the church, one of the most polished shafts in the quiver of the Lord. On the other hand, individuals who were deemed in their youthful ministrations as "little lower than the angals," have, on farther trial, proved themselves unfit for the vocation, unworthy of all confidence, a disgrace to the sacred office.

A young man commencing to preach in his native place, will experience peculiar trials and difficulties, and a forbearing, charitable spirit should be exercised towards him. "A prophet is not without honor, save in is own country, and among his own kin, and in his own house." "We have known him from a boy," is not generally a recommendatory assertion. Possibly he has been somewhat wild in his younger days, or he may have descended from a family not held in the highest esteem, at least, not counted among the magnates of the realm He may be a carpenter, and the son of a carpenter, or blacksmith, or farmer; and his mother, is she not called Mary? and his brethren, are they not named James and John and Joseph? and his sisters, Anna and Dorcas and Abbey? Are they not all with us, and all young men and women of the common sort, as their common names imply?—all humble sons and daughters of toil? Whence then the presumption in this one of the humble group, that he should set himself up as a young teacher in Israel? These associations of home often weigh as heavily as unjustly upon the youthful preacher, and are made the occasion of offense and stumbling. The Saviour himself, with all the power of the Godhead with him, was so trammeled and opposed by this prejudice, that he could do no mighty works in the country of his childhood and youth, save that he healed a few sick folk; and he marveled because of their prejudices and unbelief. Human nature is the same in all times and places, and the youthful preacher must expect to meet now what Christ did then. This tendency should be guarded against by the church.

Every church of medium size ought to have at least one young man who is being trained for the ministry, assisted by prayer, by counsel, and by material aid, if need be. "That church," says a writer on this subject, "cannot be in a healthful condition, which, can find no individual of suitable character for the ministry of the gospel among them; or who, if found, is suffered to languish through lack of their Christian sympathy."

Does the young candidate have to elbow his way into the ministerial office, as he would have to work his way in the hard and jostling strife and rivalry of the world, or is he received with cordial hands and warm hearts? If unhappily the former is the spirit manifested, then two classes will in a great measure form the ministerial supply. The one composed of the bold, persevering, and talented, who undaunted would "rush through a troop or leap over a wall," to accomplish their object, will, with their own earnest effort, and without the thanks or favors of others, fulfill the mission whereunto they are called. The other class which will succeed will be composed of the brazen and the brainless, who, not possessing sufficient acumen or discernment to perceive that their aspirations lead them where they are not wanted, to positions for which they are not fitted, will, nevertheless, with their dearth of true merit, by dint of pertinacity, thrust themselves upon needy churches, and cling there, until the church, because of their importunity, will arise, like the unjust judge, and give him whatever he asketh, perhaps hoping thereby to supply in the official what is lacking in the man. If, on the other hand, the latter of the above named courses should be pursued, there would naturally be brought forward all true merit—the unobtrusive and diffident, with the dauntless—until the supply of the good would obviate the necessity for using the worthless.

GREAT WORDS AND LITTLE MEANING.

In the *Recorder* of July 5th, there appeared a somewhat *remarkable* production, over the decidedly *remarkable* signature "*Secundum Naturum.*" I do not deem it proper for me to occupy the columns of the *Recorder* in replying to such communications. I would not now take up the pen, did I not deem it my duty to expose and rebuke the ignorance and arrogance of the writer. He wishes to ask an explanation of some of my statements made in defense of geology." If he had done this *understandingly*, and shown himself capable of *understanding* my statements and explanations, I would most cheerfully comply with the request. But I cannot afford time to explain my statements to *such writers*; it won't pay. One of two things is true of this Mr. "Secundum Naturum;" he is either incapable of understanding statements clearly and definitely made in the *English language*, or he is guilty of the grossest and most palpable misrepresentation of what I have written. I am inclined to think the former is true, and would therefore advise the writer to abstain from attempts at criticism through public journals, until, by careful study and patient application, he becomes competent to understand the English language.

The first question propounded is in reference to the former melted state of the earth. No one who has carefully and understandingly perused what I have written, would need ask that question. The answer is clearly deducible from what I have already written. Let the writer study his lesson over again, and he will probably find the answer. If he does not, it is not my fault.

He next asks, "how it could be called dry land while it was molten lava?" It was *not* called dry land while it was molten lava.

"Why did not that vast body of liquid fire boil away the entire ocean, and convert it into salt?" Because there was no ocean on it, until the surface had sufficiently cooled for the vapors of the atmosphere to condense and settle upon it.

"How was it ascertained that the crust of the earth is fifty miles thick, and that the stratified rock is ten miles deep?" You will find that out by going to school and studying geology. I have already referred you to the standard works on geology, from which the *facts* of the science may be learned.

In my reply to "Ne Scio," I stated my reasons for the supposition that the earth was once in a melted state, and that its crust had cooled to the depth of about fifty miles, and also that the depth of the stratified rock was ascertained by actual measurement. This *fact* of geology is not questioned by any who *understand the seience*, any more than the fact that the earth is eight thousand miles in diameter is questioned by those who understand geography and astronomy. If I were writing a dissertation on astronomy, and should assume the fact to start with, that the earth is eight thousand miles in diameter, and revolves around the sun at a distance of ninety-five millions of miles, I should hardly consider him competent to criticize my production, who should persist in asking, "How do you know this, and how was this ascertained?" I should not be unkind in referring him to the school-room for information. The *truly modest man* will learn these *facts* before he essays to become a public critic.

My critic next proceeds to state: "I understand you to say, that this crust was formed by the cooling of the earth, which commenced on the outside, and that this crust is in fact composed of and contains the remains of vegetables and animals to its entire depth?" and then proceeds triumphantly to ask, "Do you wish to be understood, that all these plants and animals existed in melted lava, (liquid fire) until, by the cooling of the crust, they of necessity died, and formed a part of said crust; and, by parity of reasoning, shall we understand that the center of the earth, which you say is now molten lava, is now teeming with vegetable and animal life; or would you wish to be understood, that the fifty miles of crust has accumulated since creation? * * * If this earth has increased since creation 100 miles in diameter, I ask where the materials came from to enlarge it?" After propounding these pompous questions, and saying something about the chipmuck's hole dug wrong end foremost, our critic remarks. "How you are to explain the above, and make it appear reasonable, is a problem not easy to solve." And, to make the desperate dilemma in which he has placed me appear the more conspicuous, he has invoked one or *all* of the nine muses, and perpetrated the following *remarkable* specimen of poetry:—

> "I am willing that geology should have its full due;
> I will believe all I can, to accommodate you;
> But that you are in a tight place, where it's not easy to
> get out,
> After looking it all over, I have no reason to doubt."

It seems too bad to break in upon the ecstacy which this poetical effusion must have created in the poet's mind; but poets, like other folks, must have their reverses. When the writer affirms that he "understands me to say that this crust is, in fact, composed of and contains the remains of vegetables and animals to its entire depth," he does no credit to his *understanding* powers, for I have said nothing of the kind whatever, nor anything which could be thus construed, except by the most stupid ignorance or willful carelessness. It is an hallucination of his own brain, and all his questions about animals and vegetables living in liquid fire, and the earth increasing a hundred miles in diameter, fitly illustrate that hallucination. How I am to explain the above, and make it appear reasonable, he thinks "is a problem not easy to solve." I think so too, and shall leave the task of explanation to the one who has involved himself in the absurdities above transcribed. What I have affirmed concerning the existence of animal and vegetable remains in the *stratified fossiliferous* rocks, I am ready to explain to such as are capable of un- [illegible] Naturum" has [illegible] tables to the "entire depth" of the *crust* of [illegible], and therefore in liquid fire, he must explain himself, and the effort may show which "is in a tight place, where it is not easy to get out." His poetical genius may somewhat assist him.

In relation to the creation of the progenitors of the present races of men and animals and plants of full size, I have said nothing, nor do I intend to. Our "Ne Scio's" and "Secundum Naturum's" may enlighten us all they please on *that point*. *I* have not undertaken to discuss it. I do not wonder that the critic thinks "that it is very unreasonable to ask any one to believe, that fifty miles of the surface of the earth is made up of decayed and petrified vegetable and animal substances." *He alone* is responsible for the monstrosity. I have not asked any one to believe it. I do not believe it myself.

It is some comfort to be informed that a person so learned as to subscribe himself "Secundum Naturum" does not doubt "that Mr. M. is candid in his belief of the great antiquity of the earth." But still he thinks my "hypothesis has taken the place of reason, and led him astray;" and although "his suppositions are somewhat plausible at first view, yet they do not bear the test of examination, in reason or scripture." I wonder how "Secundum Naturum" found that out. Certainly, *he* has not applied the test of *reason* and *scripture*. His is the test of ignorance and conceit.

If my positions had been stated in language at all obscure or ambiguous, I would re-state them. But the language of my positions is clear and definite, and hence the greater condemnation on the writer under review, for so totally misrepresenting them.

The subscription of a *great Latin name* (as he supposed) to such a production, only makes the failure more glaring. He that understands the Latin language, is supposed to understand the English also; but this writer clearly evinces, that he is incapable of understanding plain English. Some more unassuming name would better befit a production so void of every characteristic of a just and able criticism. But this pompous name "Secundum Naturum," appears still more like the mountain laboring to bring forth a mouse, when it has a blunder on *its own face*. The writer evidently meant to give the appearance of great learning to his production by the use of this name; but aside from the fact that such a signature always savors more of *pedantry* than *learning*, here is the evidence of ignorance of the proper orthography of the terms employed. Our friend, no doubt, thought he had got some Latin words, by which to designate himself, but if he will inquire of somebody who knows, he will learn that there is no such word in the *Latin* language, or in *any other*, as "Natur*um*." It is a word which means nothing at all; and there is a significancy in such a word subscribed to such a production. I earnestly recommend to our friends who wish to belabor me on account of my views of "Geology and the Bible," to adopt my suggestions to "Ne Scio," on the use of such high sounding names. If you are ashamed of your own initials, you had better leave the place for the signature *blank*, and you will at least save yourself the mortification of *blundering* in the very effort to appear learned.

D. E. MAXSON.

WATERFORD, Ct., July 8th, 1855.

TO D. E. MAXSON.

DEAR SIR—In your reply to my communication of June 21st, you request that in my future communications I would give my proper name. Your request shall be complied with.

I wish to correct two errors of the press or the pen. 1st. The words "of miles" should have been inserted immediately after trillions. 2d. My signature should have been printed *Ne Scio* instead of *No Scio*, which is neither Latin nor English.

My reasons for using a fictitious, instead of my real name, were: 1. I thought it appropriate to the position I wished to occupy. 2. I have no ambition to spread my name before the public, unless circumstances render it imperious. In most of my communications for the press, I have used a fictitious signature. 3. I wish to have whatever I may write judged by its merits, rather than the character of the writer. 4. I have known some old men to be treated with rather more severity than I covet.

You stated in a former communication, that your views were not "theory but demonstration," and once, "mathematical demonstration." Believing, as I honestly did, that your views, without such demonstration, were calculated to shake the faith of weak believers in the divinity of the Scriptures, especially of the Mosaic records, and as I have no objection to receiving your views, if demonstrated, I therefore respectfully asked you to give the demonstration. Instead of this, you stated that you had given facts, and send me to measure the distance between Herschell's telescopic stars and the earth, a task which I believe never has been and never will be performed. In kindness to the illiterate Christian, whose faith you have shaken, you should have given the demonstration or proof requested, if in your power; instead of which, you have given a few facts, and your deductions from them; which, in my opinion, falls far short of demonstration, amounting at most to nothing more than probability, which is too weak a ground to overthrow the common acceptation of the Mosaic record.

You insinuate, that I have not carefully read your articles—that the first and third statements are not given as hypotheses, but as facts arrived at by accurate measurement. So I understood you; but I doubted the correctness of your statem[illegible] the demonstration, or proof; instead of which, you have reaffirmed the declaration, and tell me, if I don't believe it, to measure it myself. Rather a new method of demonstration.

In reply to my query concerning trees, you say you have made no such declaration, and of course it demands no reply. I admit you have not; but have you not made declarations involving the same principles in regard to rocks? The analogy is too striking not to be perceived.

You labor to avoid collision with the Mosaic record, by giving it a different version; but I conceive your effort a failure. Your criticism on the original Hebrew I am not qualified to judge of, not being a Hebrew scholar; but I judge by your own showing, that the common version is not a perversion of the Hebrew text; but you contend that it will admit of a different rendering.

You have given the names of a number of learned men who think that the Mosaic account does not fix the date of creation. Many of these men had a theory to defend, and, in my opinion, should be received with caution. A far larger number of learned men can be found who deny the scriptural authority for the Seventh-day Sabbath. Will brother Maxson yield his views of the Sabbath to their version of the Scriptures? I presume not.

Having disposed of your reply, I wish to revert to some of your former statements, and request you to explain certain facts in accordance with your theory. I think you contend, that primitive rocks were formed of melted lava, and that neither animals nor vegetables had any existence until a long, indefinite period of time had elapsed; of course no animals or vegetables were found in primitive rocks. I believe that granite is reckoned among primitive rocks. In the state of Rhode Island, between the villages of East Greenwich and Wickford, there is a large granite rock, known by the name of Devil's Foot. In this rock there are various indentations, resembling the tracks of animals. There is a perfect impression of a human foot, toes and all. There is likewise a perfect impression of the foot of an ox or cow. Now, if your theory of the formation of the earth be correct, how came these impressions there? If you say that the rock was the result of volcanic eruptions after animals and men were created, and the impressions were made by them, I ask, can men, or other animals, walk in melted lava, and leave impressions which will last for ages? If so, men and oxen were different beings from what they are now. Or were these tracks a mere freak of nature? Please to respond.

You perhaps will say, I am no geologist, and am ignorant of its facts I frankly confess I am not very learned in any thing, and yet I have read the productions of some of your learned authors, particularly Professor Hitchcock's Elementary Geology, and his Religion of Geology, and would state, that though he adopts the same theory with yourself, yet he is far from occupying that positive position you have assumed.

In my next I intend to notice your remarks on Niagara Falls.

Yours respectfully, ELI S. BAILEY.

From the American Messenger.

CHRIST IN THE STORM.

One dark, stormy night, we were tossing in a rude little native boat, near the coast of Ceylon. As I lay in my low bed in the bottom of the boat, and saw the red flashes of lightning through the thatched covering, and heard the rapid peals of thunder, while the rain was pouring in on all sides, and our boat tossing like a bubble on the angry waves, I could not but think of our danger, for I knew that the native boatmen were timid and ignorant, and that many such little barks go down every year on that coast.

Trembling and afraid, I raised my head to catch the words of my companion, as he inquired for the master of the boat. "He is in the hinder part of the ship, asleep," was the reply.

Little did the rude heathen who uttered these simple words, know how they made my very soul thrill. In a moment I was carried back to that night when Jesus, perhaps in just such a rude little boat as ours, lay tossing on the stormy lake of Gennesareth. Never did I so realize that our blessed Saviour was once a man, a suffering mortal, and one with us in nature.

Far from home and kindred, weak, helpless, and full of fear, for a moment I had forgotten that Jesus was just as near to us as he was to those fearing disciples, and that he could as easily say to the foaming billows about us, "Peace, be still," as he did on that night when they cried, "Master, carest thou not that we perish?"

My fears were gone. I felt that Jesus was near, that I could almost put my hand in his, and hear his voice, "It is I; be not afraid." Often since then, in hours of darkness and trial, have I lived over that night, and been comforted by the same sweet thoughts.

Afflicted, sorrowing child of God, forget not Him who was a man of sorrows and acquainted with grief. Do heavy burdens press you down? Fear not to carry them to Jesus. None are too heavy for him to bear, none so small as to be beneath his notice. In him all fullness dwells. Are we poor? he is rich. Are we weak? he is strong. Are we sinful and unworthy? he is righteous and infinitely worthy. If we are Christ's, then he is ours, and in him we are complete.

From the Central Christian Herald.

RELIGIOUS PAPERS.

There is one cause, and only one, for the struggles, trials, and pinching economy to which all our religious papers are subjected. The members of our several churches do not realize the value of these papers to the cause of Christ; they do not estimate, as they should [illegible] journal, published by their own church, as its organ, with a direct, earnest, and prayerful endeavor to do good, is to them nothing but a newspaper after all; and a political newspaper—a "Dollar Weekly," full of silly stories and sickening details of crime—will be preferred to it. While this spirit lasts, while Christian men care more for politics than religion, while Christian parents take papers because they are cheap, without regard to their moral character or poisonous influence on their families, we must abandon our religious papers, or expect to sustain them by a heavy sacrifice of toil and money. It is high time that there was a general waking up on this subject—that ministers began to preach about it more, and to inquire, in their pastoral visitation, what is being read in the families under their care.

Every day deepens our own conviction of two facts; first, that to try to make a paper to please Christians of one denomination is about the most arduous and thankless effort to which a minister can be called; and, second, that a paper circulated generally in the families attached to a particular denomination—a paper adapted to all the members of the family, and endeavoring to benefit each, is one of the cheapest and most hopeful means of doing good that God has ever put it into the hearts of his people to employ—that it is worth in each church half as much as the labors of an additional pastor, and that he who feels no interest in the success of such papers is sadly indifferent to the cause of Christ, or strangely blind to the teachings of Providence and the signs of the times.

REMORSE NOT REPENTANCE.

One test of acceptance with God is the estimate which we put upon our own sins. If they are equally hateful to us, whether public or private—if we loathe them for their sinfulness towards Him, and not for the disgrace of their discovery—we may believe, that God has imparted to us a godly repentance, and may take courage. But, on the other hand, we may well distrust ourselves when we find that on looking back we mourn only or chiefly for those sins that brought with them some consequent punishment. Such a feeling is *disappointment*, not *repentance*. It is the smart of the rod, not distress that the rod was deserved. Far different is the experience of the true Christian. He finds himself mourning with the deepest acuteness over the most secret sin, because it is that which betrays most strongly the innate corruption of his heart. Public sins cause him distress enough, God knows; but they are mostly the result of some extraneous temptation, and may in other cases be treated as disciplines sent by God himself. But the sinful thought that pervades the heart in the night watches, is the source of the most poignant misery, from the nakedness and gratuity of its ingratitude. "Against thee only have I sinned." And perhaps we may understand from this the sequence, "That thou mayest be justified in thy saying." It is this very penitence for secret sins which justifies God in the sinner's sight, and through our Lord's merits, the sinner in God's.

There is nothing which contributes more to the sweetness of life than friendship; there is nothing which disturbs our repose more than friends, if we have not discernment to choose them well.

A TALK WITH OUR FRIENDS.

Among the positions in life somewhat disagreeable, is that of an editor obliged to communicate with some hundreds or thousands of readers, at regular intervals, and always have his leading article ready at the time appointed, whether he has anything to say or not. No matter what may have been his hindrances, or what his lack of facilities for making up his usual discourse, sick or well, in a mood for writing or not, moved by the inspiration of exciting events or deprived of such incentives, he is nevertheless expected to be always ready, and always entertaining. Like the pastor, before whom regularly assembles his congregation, and who is expected to be always prepared with "things new and old," so the editor is required to be always on hand with some interesting topic of discussion.

It certainly ought not to be the object of the editor, any more than of the preacher, simply to utter a discourse of a given length. The minister of the gospel is recreant to his duty, who does not, in every sermon to dying men, propose to himself some definite object to be accomplished. And we conceive that an editor, of a religious paper especially, should aim, in every article, to say something useful to his readers. By *useful* we do not mearly mean that which is true, but that which is suitable to the occasion, and adapted to the circumstances of the people. The editor should aim at an object.

But what if, when the time comes round for him to communicate with his readers, the editor feels that he has nothing to say? Must he deliver the tale of bricks, as usual, though no straw has been furnished him, at the risk of being beaten for his neglect? Perhaps it is right that he should do so, for if he should be excused on this ground in one instance, the offense might be too often repeated. For, reader, the man who writes for you is oftener in this predicament than you have any idea of. Whether this is his misfortune, or his fault, he does not undertake to say, but his conscience fully justifies him in declaring that, as long as he has occupied his present post, he has made it his habitual aim to benefit the denomination of which he is a member, and to promote their conformity to Christ. He [illegible] sciousness of the dearth of his mind, and feeling that whatever he might say, under such an unfavorable condition, might be like water spilt on the ground, but in no instance has he labored without a sincere desire to advance the cause of truth.

We are well aware, that the salutary tendency of much that we have written has been called in question. And far be it from us to say, that we have not sometimes mistaken error for truth. Infallibility is, not the lot of mortals, and it would be presumption in us to affirm, that we have not, in the course of several years, written some things which might better be retracted, or at least greatly modified. We must be permitted to say, however, that, for the most part, those of our editorials which have called forth the most bitter opposition, do, upon a review of them, appear to be well based upon the foundation of truth. It is true, if we were to re-write them, in the light of all the strictures that have been passed, and of the additional experience that we have acquired, we would modify some expressions, and perhaps omit others altogether. But we think that we should reiterate substantially the same sentiments. We have really more suspicion of the soundness of some things which we have now and then said without so much as encountering the first whisper of opposition, than of what has rendered us so obnoxious to the criticism of those with whom we are sorry to differ.

If our articles have seemed dull and spiritless—perhaps to some of our readers they are always so—we cannot promise that they will not often seem so again. A writer cannot always be on fire. And though the passing events of the world may furnish such a rich variety of themes, that an editor should never complain of any want of excitement for his work, especially in this age so full of wonderful occurrences, yet it must be remembered, that the same events do not assume the same importance in the eyes of all persons. Even editors may be unmoved, or but feebly impressed, by things which agitate the community of their readers; and unless they are but the mere reflectors of public feeling, exerting no plastic influence themselves, but only moving as they are moved, it need not be very surprising if they sometimes fail to make as much of passing events as some would have them do. However, we do not intend this as an apology for our natural sluggishness.

Perhaps, if our denomination were more active; if, in this exciting age, our own people were doing more by way of fulfilling their mission; if we were exerting the power we ought, as a people to whom is entrusted an important branch of divine truth; we might find in this all the inspiration we would need for our weekly talk with those who read the *Recorder.* But if the heart of every one goeth after his covetousness, to the neglect of what is so evidently our denominational and Christian duty, in this important period of the world, it need not be wondered, if there should be even a greater lack of instruction than usual in our editorial column. T. B. B.

"STATE OF THE DEAD"—NO. 5.

Revealed Religion.

Bro. Brown, in his article of Feb. 15th, said, that mankind were recompensed in a future state according to the course of nature; but in his subsequent articles, has endeavored to show that such was not the fact, nor his meaning. Yet he admits, that had mankind enjoyed only natural religion, such would have been the case. But he thinks, that revealed religion, especially the mediation of Christ, has so modified the Divine government, that recompense, additional to the course of nature, will be awarded. In order to sustain his view, Bro. B., (April 26th,) assumes a distinction between the penalty or curse for violating the law of natural or revealed religion. Bro. B. there maintains, that "*Christ endured the curse—the penalty proper—of the revealed law of God.*" And yet Bro. B. acknowledges, that "what the constituent elements of this additional suffering *(the proper penalty of the law of revealed religion)* are, or in what manner it is brought about, he pretends not to say. But I ask, how does Bro. B. know that Christ suffered the identical and proper penalty of the law of revealed religion, if he does not know what that penalty was, nor even its constituent elements, nor how it was brought about. Bro B. surely cannot expect us to receive it on his mere ipse dixit. For one, I do not believe that Christ suffered the penalty proper of the revealed law of God. If the letter of Scripture is to be taken as to what the penalty proper of revealed religion is, but few, I think, will agree with Bro. B. That declares the penalty proper of the gospel, or revealed religion, to consist in worms that never die, in fires that never shall be quenched, in fire and brimstone, in hell fire, in everlasting punishment, in indignation and wrath, in being banished forever from the presence of the Lord, in being cast into a lake of fire burning with brimstone, the smoke of which ascendeth up forever and ever, everlasting destruction from the presence of the Lord. Such are the penalties proper of the revealed law of God; and if the letter alone is our guide, they are not according to the course of nature. It follows, then, that these penalties are the additional ones to the course of nature. Now Bro. B. maintains, that Christ suffered the penalty proper of revealed religion. But when did Christ ever suffer the above penalties? I know Calvin maintained that Christ actually went to hell three days and three nights, but I think Bro. B. will hardly face that music. If Bro. B. is correct, [illegible] punishments are those penalties, Christ himself is now in hell fire, in the lake of fire and brimstone, being punished with everlasting destruction from the presence of the Lord. For these penalties are eternal, unless restorationism may terminate them. For I cannot see how Bro. B. can escape these consequences, if he insists that Christ suffered the identical penalty proper of the revealed law of God. My sensibilities are shocked, horrified, at what seems to be the legitimate consequence of holding that Christ suffered the identical penalty proper of the revealed law of God. It is no wonder to me, that a "Conflict of Ages" has been going on. That conflict will continue to go on, until reason, common sense, man's intuition, and revealed religion, are explained more in harmony with each other.

To return, I am constrained, therefore, to believe that Christ did *not* suffer the penalty proper of revealed religion. Nor can I agree with Calvin, that Christ descended into hell, and suffered the pains of the damned three days, nor that Christ suffered exactly as much pain as all the redeemed would have suffered under the penalties of eternal justice, nor that it was requisite that Christ should feel the severity of the Divine vengeance in order to appease or cool off the wrath of God.

According to either of the above schemes, no suffering has been prevented, not a pang spared the universe. Just as great an amount of suffering and woe has transpired as if Christ had not come, and the whole race had been doomed to eternal woe. "The storm has had its way, and spent all its rage, and effected its ruin, only the scene of ruin was transferred to another field. The punishment has fallen in all its weight, and produced all its pangs, only it has taken a different direction. All the difference is this—that the guilty who deserved it would otherwise have borne it, whereas the innocent that did not deserve it bears it now." But, further, Bro. B.'s theory involves the suffering of two penalties, (in the case of the lost,) whereas, if Christ had not come, only one could have followed. Christ, as the substitute for the lost sinner, suffers the proper penalty of the law of revealed religion, which is one penalty, and the lost sinner has to suffer the same penalty himself. Thus, according to this theory, the mediation of Jesus Christ has so modified the Divine government, that misery has actually been doubled in the case of all the finally impenitent. The monstrosity of this theory drove Foster, Murray, and Ballou, to Universalism, which evidently is by far the more consistent conclusion. In fact, the limited atonement view saw that to extend the vicarious, satisfactory, or substitutionary atonement, so as to admit that Christ died for all mankind, Universalism followed of course. Therefore the limited atonement theory saves all for whom Christ paid the penalty. Such maintain, that Christ only laid down his life for the sheep, but not for the goats. All for whom Christ endured the penalty were saved. But the general atonement theory, which makes Christ die for all mankind, saves only the same number that the limited atonement view does. Therefore, soon after theologians admitted the atonement to be general, and that Christ suffered vicariously for all men, Universalism started up as from a hot-bed. For they reasoned, that if Christ paid the ransom for all, then all were redeemed—if Christ suffered the proper penalty of the law for us, then we must be let go free. And I confess, that I find it difficult to consistently controvert the argument. I have long thought that much of the current theology was chargeable for Universalism, if not Infidelity. Once Calvinism ignored a general atonement, and limited its elect to those only for whom Christ died, which elect were made up of here and there an individual adult or infant, while it reprobated all remaining adults and infants to perdition. But now, Fullerized Calvinism makes Christ's death to cover all mankind, while it only saves the same identical persons as before. Once it was maintained, that Christ suffered the identical penalty, in quantity and quality, which all the elect would have suffered had they been lost; again, that Christ suffered equally what all mankind would have endured had they all been lost; again, that what Christ suffered was an equivalent for the sufferings of the whole world, had all sunk to hell. Whether Bro. B. holds that Christ suffered the penalty proper of the revealed law of God for all mankind, or only for the elect, he has not definitely stated, although I supposed he held the former.

From the fact that so great a diversity of opinion has and does still obtain concerning the above subject, I more than suspect they cannot explain the plan of salvation consistent either with Scripture or reason, and I have been compelled to seek a different explanation, which will be given in its proper place. I will, however, remark, in passing, that the sufferings of Christ, I apprehend, were rather incidental than penal or inflictive. They lay along the pathway of the Redeemer, which he trod for the salvation of man. They were according to the course of nature, rather than miraculous. Hence nothing can be drawn therefrom as proof that the awards of a future state will not be according to the course of nature. S. S. G.

P. S. This article has been delayed on account of other engagements.

LETTER FROM CHARLES SAUNDERS.

JAFFA, May 20th, 1855.

To the Seventh-day Baptist Missionary Board:—

DEAR BRETHREN—It is a long time since I wrote to you. I trust you will excuse me, [illegible] I have had so much sick- [illegible] of December, 1854, to the 12th of March, 1855, I was confined to my bed. Mrs. S. and [illegible] have been sick much of the time for the last five [illegible] were all sick at one time with fever and chills for a number of weeks. It was thought best by our friends, that we should get another house. We have hired one about five minutes walk from Jaffa, and pay 3,000 piastres a year. It amounts to about $133, at the common rate of exchange. We moved about the middle of March, and as soon as we were able, we took the steamer for Beirut. Mrs. S. was very feeble at the time, and it was with difficulty that she rode to Jaffa. We could not get a private boarding place, consequently had to board at a hotel, and pay 75 piastres a day for the three, which was a considerable reduction from the common price, and the best that we could do in Beirut. After remaining in Beirut three weeks, finding our health somewhat improved, Mrs. S. and Martha took the steamer for Jaffa, and I took the land route for Kaiffa and Mount Carmel. I wanted to see the land through that part of the country. The land on the plains of Sidon, Tyre and Acre, is about the same quality as on the plains of Sharon—in several places having the advantage of water from the mountain streams to irrigate the lands. It is brought to the gardens at considerable expense; and I presume those gardens that have the water are in hands that wish to keep them. Having but little time at each place, and being much fatigued with the journey, I could not investigate so fully as I should have been glad to. The American Board have a station at Sidon. Eld. Thomson and Dr. Vandike are there. At Tyre there is no land within two miles of the city that is worth cultivating. At a place called Rass el Ain, one hour or a little more from Tyre, there is a small river, where they have a mill for grinding wheat. I was told that a rich man, a native, had bought a large tract of land, and was going to bring the water in an aqueduct, from quite a distance and at great expense, to irrigate the land. I do not know why it is, but there are many miles on the plains that there is not a house of any kind to be seen. I suppose it is not so healthy as in the mountains; yet they are mostly cultivated. I do not think I saw half a dozen houses in three days' ride, except in the cities. Probably the access to the people near Jaffa will more than outweigh the advantages of the water in those other places. The land about Acre is tolerably good; perhaps at Kaiffa the land is not quite so good as at other places, and no privilege for watering except from wells. But I think it is more healthy than any place along the coast, standing at the foot of Mount Carmel, having the wind either from the mountain or from the sea, which keeps the air quite comfortable. On the north-west end of Carmel, the Catholics have a large convent. The mountain is quite barren, with the exception of a vineyard of some four or five acres, which looks very well. I staid all night at the convent. Everything is kept clean and neat. Under one part of the convent, they showed me a cave, where they say Elijah the Prophet dwelt. We cannot have all the advantages at one place. Kaiffa has the advantage of being more healthy, (which is no small item in this country,) and the steamer stops there; whilst at Acre, Tyre, and Sidon, the steamer does not stop.

Whilst at Beirut, we visited the missionaries, conversed with them about their plan of operations, found that their main success had been through their schools, and their future hopes rested on them, together with the preaching of the Gospel. In Beirut they have a primary school, and a female seminary. At Aubay, on Mount Lebanon, they have an academy for young men; the course of study is four years. This place is five hours from Beirut. They have also a missionary station at Bjhamdoore, on Lebanon, (it is 3,600 feet above the level of the sea.) This place is five or six hours from Beirut. I visited both of the above places on Lebanon. I met with a kind reception from the missionaries at all the stations that I visited.

It is no doubt our duty to cultivate the soil in this country, and give employment to the poor, as a work of charity. But we cannot compete with the natives, at the present time, in the cultivation of this land, for several reasons. First—Americans cannot stand it to work but little under the burning sun, consequently will have to hire a great portion of their work done, and pay much higher for it than the natives pay. Secondly—The natives all work in the field, men, women, and children. It costs them next to nothing for their clothes. Their living is extremely simple—vegetables, fruit, and a little bread, is about all; much of it is eaten in a raw state by the poor, thus avoiding the expense of fuel. Thirdly—Their house-rent is not much of anything, so that what they raise is nearly all profit. My impression is, from what I have seen, that our main dependence for Christianizing the people of this land, is educating the young, making the Scriptures one branch of their regular study. *This done in connection with an industrial home,* which must be near some town or city, is perhaps the best plan that we can adopt. We have had a number of applications from young men to teach them English; but thus far our time has been so much broken up, that we could not take them. I have regretted that we had not left our daughter in America, so that she might have been thoroughly educated and qualified to teach in this land. It seems almost impossible to give that attention to her education that she needs, being so often interrupted by callers; and then she has so [illegible] her.

The Jews here say, that the Rothschilds have a mortgage on Palestine, and it may af[illegible] titles, but to what extent I am unable to learn. We have made as thorough inquiries in regard to holding land in this country as we could, and have ascertained, that foreigners cannot hold land here legally. It is the opinion of Bro. Jones and myself, that it is not safe for us to purchase land at this time. Mr. Dickson thinks the same; he has money to buy, but is afraid to risk it. We hope there will soon be some way provided whereby we can hold lands in safety. There are many that are very anxious to sell their land.

Our winter crops, that we hoped to realize something from, have done nothing. We shall not get more than our seed, with the exception of the wheat; that may do a little better. We got near two dollars' worth of oranges, and probably had near as many more carried off. We had planted a fine lot of sweet corn, but it has been so dry this spring that probably there will be no corn on it.

I am sorry to be under the necessity of speaking of our own necessities. But having so much sickness in our family, we were obliged to borrow $50 before our letter of credit came to hand. Then our voyage to Beirut, which was necessary; my tour to Sidon, Tyre, Acre and Kaiffa, on my way home, (which was accomplished with much less expense than it could have been to make the trip from Jaffa,) all together cost us $125; consequently we have but little left.

We hope to be able to remain here; but it may be necessary for us to go to some place in the mountains to spend the hot part of the season. Our prayer is that the work may prosper, and that our health may be such that we can labor successfully in this land.

Your brother in Christ,
CHARLES SAUNDERS.

THE CATHOLIC PRIESTHOOD.—The predominance of prelates of foreign birth in the Catholic Church of this country has been often noticed, and has been generally regarded as an indication of its un-American spirit. But the cause seems to lie deeper, and to spring from the unwillingness of American Catholics to enter the clerical ranks. The Catholic Herald of Philadelphia speaks despondingly of the future prospects of the priesthood:

"Whence come Roman Catholic priests to this diocese of Pennsylvania, or rather, from what quarter comes the material out of which they are fashioned? Few of these young men are from France, comparatively few are natives of this country, and without doubt the main portion of the supply is of Irish origin.

"Catholicity is not likely to be a very fashionable creed in this country for many years, if indeed it ever become so, and one of the last pursuits that Catholic parents, rich or poor, are likely to desire for their children, is the ministry of Roman Catholicism. Weak, well-meaning fathers and mothers won't encourage their sons to an avocation that will bring to their offspring obloquy along with it. So that the States are not likely to supply the ranks of the priesthood with many soldiers, and though hitherto Ireland, in the exuberance of its Catholicity, has been supplying us with as many priests as would meet the exigencies of the mission here, still it cannot be doubted that the Hibernian supply is on the decline—and every year brings us less priests from that country, and less young men desirous of becoming priests, than the preceding year did. The excellent Seminary of St. Charles, in this city, which had in it a year or so since nearly fifty students, does not now number half the amount."

THE CASE OF PARDON DAVIS.

BERLIN, Wis., July 4th, 1855.

To the Editors of the Sabbath Recorder:—

It has been with pleasure that I have noticed the action of the Eastern and Central Associations in relation to Bro. Pardon Davis; and I take this method of saying to our dear brethren at the East, that it is a matter of great satisfaction to us here, to know that you sympathize with our brother in his prison-house. His imprisonment on account of his kindness to the poor panting fugitive, has been to me a subject of deep and anxious solicitude, a subject over which I have often wept, and besought the guidance of that wisdom that cometh from above.

Dear brethren, the last Sabbath in June, the day appointed by you for especial prayer to God on his behalf, as well as on behalf of the bondmen of this Republic, the Berlin church did not forget; but a discourse was preached appropriate to the occasion, and at four o'clock, the usual hour of holding our prayer-meeting, many prayers, I trust in faith, were offered to God on behalf of our distressed brother, as well as the millions of bondmen in our land. This stroke falls heavily on his family, and the sorrowful looks and falling tears of his mother and sisters last Sabbath, almost unmanned me, while I was trying to preach; but in all their sorrows they do not forget to cast their care on Him who has promised rest to the weary and heavy-laden. This morning the booming cannon reminds me that another national jubilee has come; but my heart is so full of thoughts of the oppressed of our land, that I can scarce feel one pulsation of joy, but something seems to whisper in my ear, "Remember them that are in bonds, as bound with them." J. M. T.

PROPHETS AND PASTORS.

The following letter from a distinguished Unitarian preacher in New York to the Corresponding Secretary of the American Anti-Slavery Society, contains many original suggestions, which are "important if true." We copy them, because we believe that a careful reading of them, whether true or false, will be useful:—

NEW YORK, April 17th, 1855.

OLIVER JOHNSON, ESQ.—*Dear Sir:* I am much obliged by the invitation of the Executive Committee of the American Anti-Slavery Society, to share in the public exercises of their coming Anniversary. The honor of the call I fully appreciate, and the terms in which it is conveyed are generous and attractive; so much so, that I find great difficulty in resisting your complimentary appeal.

Yet, after careful consideration, I am compelled to decline your invitation; and out of respect to your Society, I wish to state frankly my reasons for doing so. I might shroud them in equivocation, or gloss them with courtesy; but this would neither become me, nor be just to you.

I decline your invitation explicitly on the ground of ministerial *prudence;* and this prudence I hold to be a more binding duty than the claims of your platform.

There are two classes of persons interested in the Anti-Slavery cause; those who make it the business of their lives, and who take it up as the Apostles took up the Gospel, determined to know nothing else, and those who make it subsidiary to other interests and aims, and urge and sustain it only as those other interests and aims allow.

Now, I rejoice in the existence of the *first* class, as one indispensable, and entitled to great gratitude—a class without which the cause could not move at all; but I belong to the second class, and for reasons entirely satisfactory to myself, reasons of providential position, temperament and convictions, expect to stay there, and perform only the offices which belong to that class.

I am a preacher of the Gospel, a pastor, the head of a religious congregation. The plan of my life is arranged with reference to its best guidance and patient instruction, and ultimate evangelization. I teach on a plan. I am to do in ten years, or twenty years, a certain work in my parish, and my system is based on a knowledge of the wants, prejudices and affections of my parishioners. Nothing can persuade me that it is pusillanimity, time-serving, the love of money or place, that restrains me from shocking, angering and dispersing them by statements on any subject wholly beyond their sympathies. It is the love of their souls, it is a sense of what is wise, kind, Christian, that induces me to study how to *commend* their duties to them; how to lead them gently into all truth. As the father of a family chooses his own times and seasons to win his children's hearts to duty, so a true pastor does by his flock. Taking this course, I feel that I have gradually planted my own sentiments on the subject of slavery in the hearts of perhaps a majority of my own congregation, and I hope, with prudence, to win more and more of them to a right feeling. All the action of a more direct sort in behalf of the Anti Slavery cause, which my more binding duties as a pastor allow, I avail myself of, just as fast as prudence justifies it—and beyond that justification I shall be neither tempted nor driven.

I do not feel that prudence would justify me in taking my place on your platform, on an occasion when what I regard as intemperate opinions, and others regard as blasphemous and treasonable sentiments, are not unlikely to be spoken. If I had committed myself to your cause, as to *the* great thing to be done, as to the prime object of my life, (and I can easily see how a man might do it, nay, how I might do it myself,) then I would work with anybody, and set all other things at naught, except faithfulness to this one cause, the slave's freedom. As a Christian minister, I will work with any and all Christian ministers, and count all differences of creed as naught. But, as a pastor, I cannot put all considerations of ministerial prudence aside for the Anti-Slavery cause, or any other cause; for that is *first* in my affections and on my conscience.

I hold that *prophets* and *pastors* have quite different functions. Prophets address communities; pastors, flocks; prophets cry aloud and spare not; pastors give milk to babes and meat to strong men; prophets obey a divine madness; pastors follow the rule of common sense and sober discretion. Every age hath need of both; this age in an especial manner; and I rejoice that prophets have been raised up to testify against the sin of Slavery—who have forgotten everything but their clear office to blow the trumpet against the walls of the doomed city. But I do not belong to their ranks. It is only when the pastor's and the prophet's duties run together, that I can temporarily occupy the prophet's place, and then, only haltingly, and in second-rate style—as a *minor* prophet indeed.

I hope this explanation of my views, and this account of the grounds on which I decline your invitation, may seem consistent with the views I have always expressed, and the course I have hitherto taken. I cannot expect the prophets of the Anti Slavery cause to think very highly of the pastors, or their views of duty; but that is of less concern than that the pastors should be faithful to their vows and their Master.

With great respect and cordiality,
Yours, truly, HENRY W. BELLOWS.

AMERICAN MISSIONARY ASSOCIATION.—This organization (which is strictly anti-slavery, and excludes all slaveholders) recently held a public meeting in Boston, at which the reports of the different officers were presented.

The Treasurer stated that the receipts for the fiscal year amounted to $48,000. Donations have been received from various persons in slave cities. One gentleman in Washington has offered to give $1,200.

The Corresponding Secretary of the Home Department stated that in this country one hundred and two missionaries are now employed by the Society, and three colporteurs. The field of operation is the West and North Western States, including Kentucky, North Carolina and Minnesota. There have been many revivals during the year, and a large number of conversions. One object of the Society is to plant churches in the West, particularly in Kansas, and also on the borders of the Slave States, and to extend the work as far as possible into the Slave States.

The Secretary of the Foreign Department in the Association, then gave an account of the operations of the Society abroad. There are now 80 missionaries in the foreign field. Since the last annual report, 16 have sailed to foreign ports. A number of stations are located on the coast of Africa. The intelligence from the missions is every way encouraging, especially from Africa. Cries of help are coming up from that country. Those who have gone there, say where we have one missionary now we should have twenty. The missions of Jamaica are progressing finely, having eight well-established churches.

KNOX COLLEGE.—One of the most successful experiments in the way of establishing a College at the West by a Colony from the East, is that at Galesburg, Ill., known as Knox College. The pupils in all of the departments last year was 400. In one of our exchanges we find it stated that the Trustees have resolved to erect a College edifice at an expense of thirty thousand dollars, and a building for the better accommodation of the Female Collegiate Department, at a cost of twenty-five thousand dollars, to be commenced this year, and completed next year following. The available or productive funds now in the hands of the Board, as reported by the treasurer, is *one hundred and ninety-four thousand five hundred and ninety eight dollars;* the property in real estate is estimated at *sixty two thousand one hundred and eleven dollars,* of which $22,322 is to be deducted for the present buildings, and site of the College, and the Academic Department. All of this, with the exception of twenty-five thousand dollars given recently by a gentleman in Cincinnati, is the product of the property placed in the hands of the Board at the founding of the College.

ALFRED ACADEMY.—Through Eld. N. V. Hull, we have received a Catalogue of the Officers and Students of Alfred Academy and Teachers' Seminary for the year ending July 4, 1855, from which we learn that the whole number of students in the institution last year was 387, of whom 149 were ladies and 2[illegible] gentlemen. The graduating class at the last anniversary consisted of 12 ladies and 1[illegible] gentlemen. The next term opens on the third Wednesday in August.

THE PROHIBITORY LIQUOR LAW appears to be pretty generally obeyed in the small towns throughout the State of New York. In the large towns, however, there is much difficulty in enforcing it, and will continue to be until decisions in its favor are obtained from the higher courts. Prosecutions have been commenced in Buffalo, Albany, and New York, which will doubtless soon settle the question what is and what is not legal. Meanwhile the drunkards all over the State are being arrested, fined ten dollars, and imprisoned for non-payment of the fine.

Dr. Wm. Terrell, of Sparta, Hancock Co., Ga., died on the Fourth of July. He donated some time before his death to the Athens College, $20,000, the interest of which is to be devoted forever toward procuring a course of lectures every year on "Agriculture as a Science and the practice and improvement of different People; on Chemistry and Geology, so far as they may be useful to Agriculture; on Manures, Analysis of Soils, and on Domestic Economy, particularly referring to the Southern States"—the lectures to be free. He had traveled much in this country and Europe and had seen what science can do in producing crops without wasting the soil.

RELIGIOUS INTELLIGENCE.

The *Examiner* says the Rev. Isaac Westcott, having resigned his charge of the Laight Street Baptist church, New York, took occasion, in a late discourse, to review the history of the church during his pastorate of four years, and said: "We have enjoyed four precious revivals of religion. I have baptized here 244 persons and added them to the membership of the church, besides 121 we received by letter—making in all 365 members added. Our net increase is 197 members. The Sabbath school in 1850 had an attendance of 275 children; now we have 350, with a faithful corps of teachers."

A curious sect of religionists has just arisen in England, called Disciples. They believe that Christ will appear in 1864; that the Russians will triumph over the Turks, and the Jews over the Russians; the latter event will happen in ten years' time, when the Jews will become a nation in the Holy Land, and that Christ will become their king; that Abraham, Isaac, and Jacob, and the rest of the righteous Jews of old, and the few elect among Christians, will rise from the dead, and live forever in Palestine; that the heathen and wicked Jews and Christians will sleep eternally.

The Virginia Colonizationist for May states that Mr. Frederick Bransford, of Richmond, emancipated and sent to Africa, (in company of the Rev. Mr. Hoffman, Mrs. Hoffman, and Miss Williford, missionaries of the Protestant Episcopal Church,) a colored family to which he and Mrs. Bransford were much attached, consisting of a man, his wife, and five children, all of whom had been partially educated, and had enjoyed the greatest care.

In the Province of Pegu, recently added to the territory of the East India Company, twenty-five hundred Karens have during the year past been added to the churches. The good work goes on spreading in every direction. The native preachers are beginning to multiply and to labor with greater efficiency than ever before. One of these, according to the Macedonian, has lately baptized five hundred converts.

Rev. Dr. Baird, late Corresponding Secretary of the American and Foreign Christian Union, sailed the other day in the Baltic, on a visit to Western Europe. He will visit the several missions, and also attend, as a delegate, the great meeting of the French Evangelical Alliance, to be held in Paris on the 23d of August.

The N. Y. *Recorder*, having undergone a change of editors and proprietors, is now issued under the name of the "Examiner," and is conducted by the Rev. S. S. Cutting and the Rev. Dr. Bright, late Secretary of the Baptist Board of Missions. The paper has also changed its form, and become a folio again.

Instances are cited of earnestness in preaching and persistent labors in the gospel, that appear at the present day almost incredible. Hooper, bishop of two dioceses, preached daily. Tobias Matthews, bishop of Durham, eighty years old, preached daily. John Wesley is said to have preached forty thousand times in fifty years.

The "Ohio *Observer*" has been transfered to the New York *Evangelist*. The paper, as well as the Church, sustained a great loss by the death of its Editor, Rev. Mr. Tracy.

The Pine-street Congregational Society in Boston have voted their pastor, Rev. Mr. Dexter, a three months' vacation, for recovery of his health.

CHINESE MATTERS.—A letter from Washington, dated July 10th, says:—

Mr. Wells Williams, nephew of Chancellor Walworth, has been appointed Secretary of Legation in China, where he will exercise the power and receive the salary of a *Chargé d'Affaires*.

Rev. Mr. Parker has written that his health will require his return. He would probably have been appointed successor to Mr. McLean had he desired it.

The trouble between the Legation and Mr. Murphy, the Consul at Shanghai, grows out of a section of the treaty of 1844, which gives the Minister exclusive jurisdiction over Americans in China. The payments of duties by American merchants to Mr. Murphy were made in consequence of an order made by Mr. McLean, which is contended to be irreversible by any other authority.

The breaking up of China will begin with the return of peace in Europe. Russia has already seized both banks of the Amoor, and when her military power shall be released from the struggle with the Western Powers, she will doubtless establish herself in all the Northern Provinces which may be considered convenient additions to her Empire.

DEATH CAUSED BY A CORPSE.—In a farmhouse near Liberty, Missouri, the mistress of the house became ill one morning, having, according to symptoms, received an attack of cholera. Her husband had left the house at daybreak, and her only daughter, who was then with her, sent for a physician. After a few hours, the latter arrived, but was met at the door and received by the sobbing girl with the cry, "She is dead!" He was conducted into the room where the corpse lay, examined it, and directed the daughter not to allow the interment until 24 hours had elapsed. He had scarcely done so when the corpse nodded significantly. The daughter saw this motion, and was so horrified that she fell down dead on the spot. It is a well known fact, that persons who die of cholera retain the warmth of the blood for a long time, frequently alarming bystanders by contraction of the muscles.

A SLAVE RELEASED BY THE BRITISH AUTHORITIES IN JAMAICA.—Intelligence has been received at Baltimore, that the cook of the Young America, a Baltimore vessel, has been released at Savannah la Mar, in the island of Jamaica, by the negroes, while the authorities coolly looked on and countenanced the act. Another account says that the slave had shipped under an assumed name, and with a borrowed free paper; that the captain tried to conceal him, but the blacks bore him off in triumph. When he reached the shore, a magistrate asked him if he were free, or a slave, to which he replied, "I am a slave." "Then," replied the magistrate, "in the name of Her Majesty, the Queen, I now declare that you are free and at liberty, having landed on British soil." The decision was fully confirmed on the next day.

European News.

By the steamer Pacific, European news to June 30th was received in New York on the 11th inst.

The intelligence from Great Britain by this arrival possesses many features of interest. In the House of Peers, Lord Lyndhurst called the attention of Parliament to the attitude of Austria, and her disregard of the treaty of the 2d of December, 1854. In the House of Commons, Sir C. Wood made another official statement in relation to the Hango outrage. It seems now that several of the British seamen, supposed to have been killed, were only wounded, and that others, not wounded, were made prisoners.

The loss of the Allies in their attack on the Malakoff and Redan Towers was greatly exaggerated. The details of those desperate fights had not reached Liverpool at the time the Pacific sailed, but from the telegraphic dispatches we learn that on the side of the Allies only 4,776 men, including 93 English and 150 French officers, were killed, wounded, or made prisoners. This check—so say the accounts—had not depressed the spirits of the army. On the [illegible], the siege was kept up with unaba[illegible], and, in a late communication to the [illegible]press, the British Government states that the English and French were erecting new batteries and pushing their approaches against the enemy's works, with the intention, no doubt, of shortly making another assault on the Malakoff and the Great Redan. Some outer works were taken by the Allies in the battle of the 18th, and the Mamelon still remains in possession of the French. Beyond this, the war news from the Crimea is wholly devoid of incident.

In the mean time other accounts, not very favorable to the Allies, reach us from Sebastopol. The Cholera is on the increase. Lord Raglan, and that excellent officer, Sir George Brown, have both been taken ill; the former, it is said, is about to resign his command, which will be given to General Simpson. There are also rumors of dissensions in the Camp between the French and English Chiefs. The French allege that the failure in the late assault was principally owing to the slowness or carelessness of the British, and the British, retorting, assert that they carried the Redan, but could not hold it because the French failed to silence the guns of the Malakoff.

From the North, we learn that Hango and Sweaborg have been bombarded, and that large stores in the latter place were burnt. Forty-six infernal machines, discovered in the Baltic by part of the English fleet, were successfully destroyed.

Brigandage is prevalent in the immediate environs of Smyrna. A party of robbers have carried off an English surgeon named McCraith, and some other persons, and demand a large ransom for their release.

Captain Lyons, of the Miranda, a most efficient officer, is dead. He was struck by a rifle ball while on the paddlebox of his ship, and was taken to the Hospital at Scutari, where he died.

Brigadier Estcourt, of Constantinople, Adjutant-General of the forces in the Crimea, is also dead. Date of June 21st, mentions the arrival of 2,000 wounded, and adds that cholera had reappeared.

Some disturbance was lately created in London, in consequence of placards displayed throughout the metropolis, inviting the working classes to attend in Hyde Park, on Sunday the 26th June, and see how the aristocracy observed the Sunday. In obedience to the call, many thousands attended, and as the carriages of the great rolled by, their inmates were received with shouts of "Go to Church!" "Shame on you!" "Down with Sabbatarians!"

Four Days Later.

The steamer Arago, with four days later news from Europe, arrived on the 16th inst. The principal item is that Lord Raglan is dead, and is succeeded in the command of the British forces before Sevastopol by General Simpson. There had been farther demonstrations in London against the Sunday Trading Bill, and the Bill had been withdrawn from Parliament.

Education in New Jersey.

From the report of John H. Phillips, State Superintendent of Public Schools in New Jersey, it appears that there are 190 Townships, Cities, Towns, &c., 1,426 School Districts, containing 168,031 children, between the ages of five and eighteen years. Of these, 105,040 have attended school some portion of the last year, which is an increase of almost 8,000 over the attendance the previous year. The amount raised and appropriated to school purposes during the last year was $388,571; of this, about $221,000 was raised by tax. The Townships have raised $53,000 more for school purposes than during the year previous, "furnishing abundant proof that the people estimate the importance and value of education, and are willing voluntarily to tax themselves liberally for its support. Eight years ago the amount appropriated for school purposes was $67,940; now it is nearly six times that amount—a gain of $320,000 in the last eight years. During the same period the number of scholars has increased from 91,430 to 168,031."

Eight Teachers' Institutes have been held in Essex, Hunterdon, Mercer, Morris, Somerset, Sussex, and Warren Counties; 356 Teachers attended these Conventions.

Of the Common School Teachers employed the last year, 1,201 were males and 780 were females. The average salary per annum of the former was $347, and of the latter $203.

The last census shows that 6,007 white men, 8,241 women, 2,167 colored men, 2,250 colored women, adults, in New Jersey, cannot read or write, making an aggregate of 18,665. Of these, 12,787 are natives and 5,878 are foreigners, which is about in the ratio of two natives to one foreigner who cannot read or write. At the taking of the census the population of New Jersey was 489,319, of which number 23,810 were colored, 465,509 whites. The ratio of colored adults who cannot read or write to the whole colored population is *one in every five*, the ratio of white adults who cannot read or write to the white population is *one in every twenty-two*. The ratio of adult white men who cannot read or write to the male population, is one in every thirty-eight, while the ratio among the white females is one in every twenty-eight. The ratio among the colored males and females is about equal.

Taking the whole population, the ratio of adults who cannot read or write is one in every twenty-six. The ratio of native Americans who cannot read or write is one in every thirty-two (almost,) and among the foreign population the ratio is one in every ten. From this it will appear, that the ratio of those who cannot read or write is one in every five of the colored, one in every ten of the foreign, and one in every thirty-two of the native population.

INGENIOUS SPECULATION.—The New York *Times* says that Barnum has another project to draw the "quarters" from the pockets of the people, which is as follows:—

He invites all to lend him the daguerreotypes of their lady friends. These will be numbered and hung up in his Museum. On the 15th of October they will be open for exhibition. The good natured public will flock in to see the portraits, and each visitor may write down the hundred of them that nearest suit his notions of beauty. These votes are to be deposited in a box. In three months all are to be counted, and the hundred that have the most votes will each receive a premium of $10 to start with. These hundred handsome ladies will then be painted on canvass, life size—from life where it is practicable, from the daguerreotype where it is not—at the Showman's expense. The hundred portraits will be hung in the Museum. Each visitor will, if so disposed, write down the twenty that he deems the handsomest of these, and deposit his vote in a box. After three months of admiring and voting upon these, the box of votes will be opened, and the premiums awarded: $1,000 to the original of the portrait that has the highest vote; $300 to the second, $200 to the third, &c., until $5,000 have been awarded to the hundred. The portraits receiving the ten highest premiums will be engraved and sent on to be published in the French *World's Book of Beauty*.

THE FIRST FEMALE COLLEGE IN NEW YORK.—In 1831, a Committee, consisting of Dr. Mandeville, Luther Tucker, Dr. Wyckoff, B. P. Johnson, and one or two others, addressed a Circular to the friends of female education, asking counsel and aid in the work of erecting a State Female Seminary. As the result of the labors growing out of this movement, we believe the Elmira Female College has been established. A building has been erected, almost completed, in that beautiful village, and the first term will open in October. The regular collegiate course is to be departed from, in that more attention is to be given to natural science and less to the ancient classics, than is common in the male colleges. Two years are given to the "Academic course," four to the "Collegiate" within the walls. Terms, for board and tuition, $110 per year. Prof. Boyd, of Geneva, is President elect, though his letter of acceptance has not yet been received. Mrs. Mason, of Canandaigua, is invited to the Domestic and Social Department; Miss Nutting, of the Maine Female Seminary, superintends the school arrangements, and Miss Woodman, of Portland, takes the chair of Mathematics.

NEW USE OF DAGUERREOTYPING.—Here is one of the latest, most amusing, and ingenious of the uses to which a remarkable discovery of our times has been put:

Barney Smith, a well-to-do Irishman at Chicago, Ill., wished to return to swate Ireland and take back his pile of $3,000 by draft. The only difficulty was how to establish his identity at the bank of Ireland. The difficulty was overcome by taking daguerreotypes of Barney and his banker on one plate, and on a half sheet of paper pinned on the banker's draft was written in a bold hand—"The likeness on my left represents Barney Smith of this city, now about to leave for Dublin, Ireland. R. K. Swift, Banker."

SUMMARY

The St. Petersburg "Naval Magazine" publishes a report from Dr. Peragoff, chief army surgeon at Sebastopol, in which it is said that never in the history of surgery were such frightful wounds known as those which came under the treatment of the Russian surgeons during the bombardment which commenced April 9, and caused by the sixty-five-pounder shot and 200-pound shell of the beseigers. On the 9th, besides all operations of surgery, 300 amputations were performed in only three of the operating rooms. In the chief depot of wounded, ten surgeons were continuously occupied, and a large assembly room was four times successively filled with wounded.

A dispatch dated Boston, Monday, July 9, says: At the annual meeting of the Eastern Railroad Company, to-day, the President made a report to the effect that Mr. Tuckerman, the late Treasurer, has confessed that he has embezzled the funds of the Road to the amount of $207,000. His defalcations have been going on for several years. It is reported that Tuckerman had invested largely in sustaining Dr. Morton's claim to the ether discovery some two years since at Washington.

The President has issued his proclamation prescribing the following frontier posts through which bonded merchandize may be exported to Canada in addition to those now designated by law, under the Reciprocity Treaty: Rouse's Point, Cape Vincent, Suspension Bridge and Dunkirk, New York; Swanton, Albury and Island Pond, Vermont; Toledo, Ohio; Chicago, Illinois; Milwaukee, Wisconsin; Mackinac, Michigan; Eastport, Maine; and Pembina, Minnesota.

Says the *Scientific American*: "We have been informed by a manufacturer of agricultural implements, one who is excellent authority, that between fifteen and sixteen thousand reaping-machines will be manufactured and sold this year in this country. The demand is so great, that manufacturers cannot make them fast enough for their orders. This affords evidence of agricultural prosperity, as the cost of these machines will amount to nearly two millions of dollars.

J. N. T. Tucker, under indictment in Kings County for murdering his own child in Brooklyn, last Summer, and who, after a trial and the Jury being unable to agree, was sent to the State Asylum at Utica, as of unsound mind, made his escape from that Institution on Wednesday, July 11.

The robes worn by Archbishop Hughes, at the late dedication of St. Paul's Cathedral, at Pittsburg, cost $3,000. So it is said in the Pittsburg papers.

The second Coroner's Jury of investigation into the cause of the death of Robbins, who was killed during the late riot in Portland, Me., have rendered a lengthy verdict, in which, after reviewing the evidence, they declare that the deceased came to his death by the rash and illegal orders of Mayor Dow. They leave it for the Courts to determine "whether the Mayor is guilty of murder or manslaughter."

Five Generals recently sentenced to death in St. Domingo for conspiracy were pardoned just as the soldiers prepared to execute the sentence. Francisco Ruiz, one of them, rose from from his knees an idiot, his nervous system having given way under the horror of the moment. One of his daughters had previously lost her reason upon learning that he had been condemned to death.

General Lane, the Democratic nominee in Oregon, has been reëlected to Congress by nearly 2,000 majority. The most important question (says the *Oregonian*) submitted to the people at this election, was that of the Convention to form a State Government. The returns on this are very imperfect; but we think enough have been received to indicate that it has been decreed that Oregon shall cease to be a Territory.

It is said that, but for the Mormon emigration and commerce, and the movement of Government troops and stores, the Plains would present a desolate appearance this season—very different from any thing that has been seen since 1849. There is not known to be any overland travel to California or Oregon, nor is any stock being driven in those directions.

The removal of the compulsory penny stamp upon newspapers in England went into effect on the 30th ult., and has caused a great flurry among publishers. An immense number of new cheap papers have sprung into existence in London and some of the Provincial towns, and a reduction of price, equal to the removed tax, has taken place with the high-priced papers.

A dispatch dated St. Louis, Wednesday, July 11, says:—On Saturday night a young man named Blessing, of good family, took his sister, who has been leading a dissolute life, out riding into the country, and there shot her. He then returned to the Hotel where he was staying, and on Sunday shot himself.

The Columbus (Ohio) *Journal* relates witnessing some singular experiments by which mercury had been extracted from the body of a sick man in the form of quicksilver, by placing him in an electric bath. He had, while suffering from chronic rheumatism, taken vast quantities of mercury in the shape of calomel and blue pills, from the effects of which he had almost lost the use of his limbs.

A dispatch dated Milwaukee, Friday, July 13, says, Yesterday, at Janesville, Wis., during the trial of a man named Mayberry, for the murder of a raftsman named Alger, a defect in the proceedings and the impeachment of the principal witness, so exasperated a crowd of Peek River raftsmen, that they took the prisoner from the Sheriff, and hanged him.

Three Bermuda vessels which arrived at this port not long since, brought 4,100 barrels, eighteen half barrels, and 1,600 bushels of potatoes, 100 barrels and 20,000 pounds of onions, and 280 boxes of tomatoes. Probably a total of 25,000 bushels of potatoes from the Bermuda aloe, ha[illegible] rived here this season.

Viscount Canning has drawn the great prize in the Governmental lottery of Great Britain. He has jumped from the office of Postmaster General to the Viceroyalty of India—a transition which involved the pecuniary difference between £2,500 a year and not much less than £100,000.

A French chemist says that he has discovered that by grinding tea in the same manner as coffee, before infusion, the quantity of exhilarating fluid obtained is nearly doubled.

An Aberdeen paper states that in the beautiful town of Tain, with a population of some 4,000 souls, there has not been a single marriage for twelve months.

We learn from Piedmont that advices had been received from the Crimea, stating that from May 13 to June 8, no less than 869 cases of cholera had occurred in the Sardinian army, out of which 382 had died.

Greenwich Hospital has just received the relics lately brought to England of Sir John Franklin and his companions. They are placed next to the coat in which Lord Nelson received his death wound at Trafalgar.

Mr. E. H. Ludlow sold at auction, the other day, at the Merchants' Exchange, the lot and buildings No. 5 Broadway, running through to Greenwich-st., for eighty-six thousand dollars. The lot is about 174 feet in depth and 42 in width.

A dispatch dated Poughkeepsie, N. Y., Wednesday, July 11, says: Berberick, who was arrested on Monday last for selling lager bier, was tried yesterday, by a jury, before the County Judge, found guilty, and fined fifty dollars.

There is a great deal of poetry about "dying for one's country," the glory of a "death-bed on the battle-field," and all that, but statistical returns show that the great majority of soldiers die of the dysentery, which must be a very different affair.

Six slaves who had been concerned in the murder of an overseer were executed in Alexandria, La., on the 22d ult. About a thousand persons were present, including the slaves from the neighboring plantations.

The Cleveland (Ohio) *Herald* of July 2, says: Ten paupers arriving at Indianapolis from the Ward Island Hospital, New York, were reshipped by the trustees of the former city to their old quarters East.

According to the Census Marshal, the population of Syracese will be 27,000, being an increase of 1,000 a year, the census of 1850 giving that city a population of about 22,000.

Comparing the figures already made by the Census Marshals with those of 1850, the Albany *Argus* estimates the population of this State at four millions.

A complaint has been preferred against the Sexton of the New Cemetery at Dundas, C. W., of 'dunning' the mourners for his pay while the funeral was actually going on!

Mrs. Catherine Scholey, the largest woman in the world, died in Sciota Township, Piqua County, Ohio, while sitting in her chair, on the 5th inst.

An honest German down South being asked to explain the difference between a native and a naturalized citizen, said that a native American came into the country naked, while a naturalized citizen comes into it with his clothes all on.

The Law of Libel in Connecticut was materially modified by an act of the recent Legislature, by which the defendant may show the intention with which he made the publication, and the plaintiff must prove malice before he can recover damages.

A dispatch dated New Orleans, Monday, July 9, says: The steamer Magnolia, with a cargo of 1,000 bales of cotton, was destroyed by fire a little below Baton Rouge, and eight lives were lost.

New York Markets—July 16, 1855.

Ashes—Pearls and Pots $5 50 a 5 62.

Flour and Meal—Flour, 8 37 a 8 75 for State, 8 87 a 9 12 for mixed Western, 9 18 a 9 50 for Ohio, 11 00 a 12 75 for Extra Genesee. Rye Flour 7 37 a 8 87. Corn Meal, 4 75 for Pennsylvania, 4 87 for Jersey, 5 25 for Brandywine.

Grain—Wheat, 2 37 for red and white Southern, 2 50 for white Michigan. Rye 1 43 a 1 45. Barley Malt 1 40. Oats, 61 a 65c. for State and Western. Corn, 89 a 91c. for Western mixed.

Provisions—Pork, 16 50 for new prime, 19 37 for new mess. Beef, 9 75 a 10 25 for prime, 11 00 a 13 00 for country mess. Butter, 13 a 17c. for Ohio, 16 a 20c. for ordinary to good State, 21 a 23c. for choice. Cheese 4 to 9c.

Hay—1 00 a 1 18 per 100 lbs.

Potatoes—Scarcely any but new used. From Bermuda, 4 50 a 5 00 per bbl. Long Island 1 00 a 1 12 per bushel.

Wool—40 a 44c. for Saxony Fleece, 37 a 40c. for full blood Merino, 32 or 35c. for American and half Merino.

MARRIED,

At Groton Center, June 28th, by Eld. S. S. Griswold, Mr. NELSON MARYON, of Noank, (Groton,) Ct., to Miss VIRGINIA HALY, of the former place.

In Albion, Wis., June 28th, 1855, by Eld. T. E. Babcock, Mr. GILES F. LAWTON to Miss ALICE M. WEBSTER, all of Albion.

In Berlin, Wis., July 3d, 1855, by Eld. J. M. Todd, Mr. HENRY CLARKE to Miss HARRIET A. CHAMPLIN, all of Berlin.

DIED,

In Westerly, R. I., July 9, FRANC ENRIQUE, son of Edwin G. and Mary A. G. Champlin, aged 3 years, 6 months, and 6 days.

In Albion, Wis., March 27th, 1855, NANCY M., daughter of Albert and Louisa Palmer, aged 6 months.

At Shiloh, N. J., April 23d, Mrs. LUCY ANN EWING, wife of Thomas Ewing, and daughter of Isaac West, Esq., aged 29 years. She had been for many years a professed follower of Jesus, and was comforted and supported in her severe sufferings by that in which she had long trusted.

In Albion, Wis., June 4th, 1855, JAMES E., son of James and Lois Knight, in the 10th year of his age.

In Petersburgh, N. Y., on the 24th June, Mrs. OLIVE MAXSON, wife of Mr. Horace Maxson, in the thirtieth year of her age. She died of consumption, after an illness of several months. Sister Maxson embraced religion in early life, and at the time of her decease was a member of the Seventh-day Baptist Church in Petersburgh. She was patient in suffering, calm in prospect of death, and resigned to the will of God, whether she might live or die. She fell asleep in Jesus, with the bright hope of a blessed immortality. A. E.

In the township of Stow Creek, N. J., June 28th, GEORGE W., son of Belford Burnham, Esq., aged 4 months.

SUBSCRIBERS to the "CHRISTIAN DIADEM" for 1855, are entitled to a splendid steel engraving, the ☞ LILLY AND THE ROSE PERSONIFIED, being given *gratis* to all old and new subscribers who send us only ONE DOLLAR, by mail or otherwise.
Six Copies for Five Dollars.
The Diadem is a strictly moral and religious work—designed for the Christian family without regard to any particular denomination.
FIFTY ENERGETIC BUSINESS MEN are wanted immediately to circulate the "Diadem" throughout the Eastern and Western States. To such as can send good references the very best inducements will be given. Address Z. P. HATCH, Publisher, 9 Spruce street, New York. May 24—3m.

The very Book that every body has been Wanting.
The Book for the Parlor, the Book for the Fire-side, the Book for the Professor, and the Book for the Non-Professor.
THE RELIGIOUS DENOMINATIONS OF THE UNITED STATES: Their History, Doctrine, Government, and Statistics; with a Preliminary Sketch of Judaism, Paganism, and Mohammedanism. By Rev. JOSEPH BELCHER, D. D., Honorary Member of the Historical Societies of Pennsylvania and Wisconsin, author of "William Carey, a Biography," etc., etc., and "Editor of the Complete Works of Andrew Fuller," "Works of Robert Hall," etc, etc. Large octavo, 1024 pages, handsomely embellished by nearly two hundred engravings.
This invaluable work is rapidly finding its way among all classes of the American people. The clear, comprehensive, and impartial manner in which the learned author treats each and every denomination, is winning for him golden opinions from the highest authorities in the land. The innumerable lively tales and anecdotes of ministers, churches, and laymen, which he introduces with the articles of faith and all important statistical information, give to the work a life, vigor, and spirit truly delightful. One cannot sit down to it without being convinced that his subject is in the hands of a master, nor rise but with kindlier and more liberal feelings towards the great brotherhood of Christians, under whatever name they bear. Ours is a great, growing, and glorious country, and every family, and every young man, throughout its length and breadth, should have a copy as a text book of all its denominations. Wherever known, it is read, and wherever read, admired. Look at the following from among the very many notices received:
It embodies a vast amount of information relative to the origin, history, and missionary operations of the different religious denominations in this country, presented in a remarkably interesting and attractive manner.—*Rev. John Dowling, D. D., Author of "The History of Romanism," "Judson Offering," etc.*
This is a large and beautiful volume, and will find a cordial welcome in every family.—*Philadelphia Christian Chronicle.*
So far as concerns independence of vision, there can be no question, as Dr. Belcher surveys each sect with the same dispassionate impartiality.—*Epis. Recorder.*
This massive volume embraces a vast fund of information.—*Presbyterian.*
The work is sold by agents, and will furnish a large amount of interesting and valuable information to the families into which it may be received.—*New York Recorder and Register.*
In the account given of the denominations, he is fair, and generally allows them to speak for themselves, as to their history and institutions.—*New York Christian Advocate and Journal.*
It contains a mass of interesting facts and statistics.—*Norton's Literary Gazette.*
Judging from the work, it would be difficult to say what are the religious views of the Editor, so fairly, so dispassionately, so charitably, has he treated each and every sect.—*Philadelphia City Item.*
We presume it will be a standard work in thousands of libraries.—*Littell's Living Age.*
Sold only by agents, to whom certain districts are allotted. For particulars address the publisher,
JOHN E. POTTER,
15 Sansom-st., Philadelphia.
Or, NOYES SPICER, Indianapolis, Ind.

Central Railroad Company of New Jersey.
NEW YORK, SOMERVILLE, EASTON, &c. *Spring Arrangements*, commencing April 2, 1855: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M. For Somerville, (way,) at 5.30 P. M.
The above trains connect at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 1, 4 and 5 P. M.
Returning—leave Phillipsburg (opposite Easton) at 6 and 9.45 A. M. and 3 P. M.; Somerville (way) at 6 A. M.
New York and Elizabethport.
Leave New York at 8 and 10 A. M., 1, 4 and 5 P. M.
Leave Elizabethport at 7.15 and 9.10 A. M., 1, 3.15 and 6 P. M. JOHN O. STERNS, Superintendent.

New York and Erie Railroad.
ON and after Monday, May 7, and until further notice, Trains will leave the pier foot of Duane-st., New York, as follows:
Dunkirk Express at 6 A. M. for Dunkirk.
Buffalo Express at 6 A. M. for Buffalo.
Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.
Accommodation at 12½ P. M. for Port Jervis and intermediate stations.
Rockland Passenger at 3 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.
Way Passenger at 4 P. M. for Newburgh and Otisville and intermediate stations.
Night Express at 5½ P. M. for Dunkirk and Buffalo.
Emigrant at 6 P. M. for Dunkirk and Buffalo and intermediate stations.
On Sundays only one express train, at 5½ P. M.
These Express Trains connect at Elmira with the Elmira and Niagara Falls Railroad, for Niagara Falls, at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicago, &c., and with first-class splendid steamers for all ports on Lake Erie.
D. C. McCALLUM, General Sup't.

Miscellaneous.

Don't Shoot the Birds.

BY ALFRED B. KEYES.

Don't shoot the birds, the warbling birds,
That cheer you with their song,
That fill the air with melodies,
A bright and happy throng;
That carol forth their native lays
From shrub and lofty limb,
And gaily sing their tuneful strains
From morn till evening dim.

Don't shoot the birds, the joyous birds,
That charm the traveler's way;
That nestle round the poor man's cot,
And princely mansion gay;
Whose merry notes, so blithe and free,
They chant alike for all,
And ask of what you do not want,
E'en but a pittance small.

Don't shoot the birds, the harmless birds,
That come with buds and flowers,
That soothe the farmer's weary toil
Through summer's sultry hours;
That build their nests and brood their young
Beside your cottage door,
And linger near from early spring
Till autumn's golden store.

Don't shoot the birds, the sportive birds,
That flit o'er hill and plain,
That leave when chilling winter comes,
But soon return again;
That warble out their hymns of praise
With many a gleeful voice,
Which calms the daily cares of life,
And bids the heart rejoice.

From "The Crayon."

Wanderings in the Southwest.

TEXAS, May 18th.

A few days since, I left the New Orleans steamer at the terminus of her route, and deposited myself, with my baggage, in a yacht for Indianola. Arriving there, I found a long pier running out into the shoal, milky water, and thereon sitting a few men and boys, fishing, but apparently with little success. I walked up into the town—a few frame houses prematurely old, two or three stores, a tavern-stand deserted, a mule with a saddle on and head hanging low and drowsily, half-a-dozen idle men sitting on boxes, and the whole surrounded by an illimitable expanse of water and prairie, was the sum total of Indianola. I returned to the yacht, and had my baggage put on board again to go to Port Lavacca. A gentle southern breeze wafted us slowly along thitherwards. A long file of pelicans, aparently encumbered by the weight of their enormous bills, were slowly flapping their silent way from their hunting-grounds near the sea-shore, and numerous blackheaded gulls followed us with a shrill cry for small favors from the galley. The shore everywhere presents a bank twelve or fifteen feet high, abrupt, from the constant invasion of the waves. The water is shoal, leaving, when the tide is out, light-colored mud flats.

Another pier, built on piles, with several schooners loading with cotton; another collection of pine board houses; many clumsy, broad-wheeled, covered carts, with a small drove of cattle before each of them—we are at Port Lavacca. I decided to send my baggage by one of the Mexican carts, and to purchase a horse, and travel at my leisure out of the beaten road. My object being to enjoy and commune with Nature, I shall travel alone, that even the sound of another's voice may not disturb the harmony. I went to a stable to get a horse. There was one which was very highly recommended to me. It was the property of a Mexican, and was of a light dun color. Age and hard service protruded with each particular bone—his fore feet spread apart, while his knees nearly rubbed each other—the hoofs were flat and much split. I am but a poor judge of horse-flesh, but I was not favorably impressed with the first sight of this Buono Caballo, but this was of Spanish stock, and there was no knowing what he might do, so I requested the owner to mount and show him up. He walked, he trotted, and, animated by the zeal of the rider, he did make a faint effort to gallop, but it was a melancholy display of spirit. But, said the owner, the chief quality in a horse was to be a good walker. I could have him for just forty-five dollars, and I must close at once, as the owner would leave town with him in an hour if he was not sold. I went to another stable, where I found "a mountain pony," of fine qualities, which could endure any kind of usage, and live on grass exclusively. He was already saddled, and I might have him for forty dollars, saddle included. I had thought that one of the distinguishing qualities of the mountain pony was the high, small hoof, similar to the mule's, but this specimen had them more spreading than the first horse, and as badly split. His weight was about that of a Mexican mule, and his chest so narrow that a common dinner-knife could reach through it. His face was covered with incrustations, and, although I did not know what quality the muscle of a mountain pony might have, it appeared to me that the question might be raised by the natives on the road, why I did not "pack" the horse and carry him, rather than permit him to carry me. I directed the saddle to be removed, and a red, quivering denudation came to sight. Generous fellow, he would have given me the saddle on the horse's back! But this was nothing at all—in two or three days that would all be well, and he poured from a bottle some unctuous matter which was to heal it up at once. This was the end of a day spent among the horse-jockeys in Texas, who, I venture to say, will sustain the reputation of the fraternity in any part of the world.

I next applied to one of the old Texans, whom I have generally found to be a superior class of men. He sent his Mexican vaccaro out to the ranch, where he had a herd of two hundred, to bring some in. He returned the next morning with three, from which I might choose, the prices ranging from forty-five to sixty-five dollars. I made choice of a fine specimen of the native Mexican wild stock, bearing the token of a former possession in a curious hieroglyphic, branded on his left thigh. From his dark brown color, the Mexicans call him "Pelicano," the pelican. His tail reaches quite to the ground, and his mane is long, hanging wildly about his face. His nostrils are wide, as is the space between his eyes, which are so quick in their movements, and yet so kind and confiding, that no sooner had they looked into mine than a mutual attachment sprang up between us, and I resolved to become the proprietor of Pelicano. His life has been spent on the prairie—his little round hoof, smooth as polished horn, had never had its normal proportions marred by the blacksmith's knife or nails, nor have his morals been corrupted by intercourse with jockeys, or his self-respect impaired by bad oats or corn. Such is the companion I have chosen for my journeyings, and in case of danger, I must depend upon his legs for safety, for I have no means of defense.

Early on the 4th inst., I took leave of my friends at Port Lavacca. Major G., the grey-haired Texan who sold me my horse, was there to see me start, and to give me some counsel, and selected for me a Mexican saddle, such as are generally adopted here. I placed a loose coffee sack next to the horse's back, as he said, to prevent "scalding," then a pair of blankets, and upon these the saddle, strongly girted, and over this a surcingle. A hair rope, about six rods long, called a cabris, to stake out the horse in the grass, a pair of saddle-bags, and a great-coat lashed to the saddle, completed my equipage. I rode some miles to a line of trees marking the course of the Chocolate Creek. Notwithstanding that it had not rained for more than four months, the grass here was rank and of a bright green, and the flowers, though few, were showy. Two species of the mimosa, or sensitive plant, were plentiful, one bearing a red, the other a yellow flower. The clouds which overcast the sky when I started, broke away, about nine o'clock, into floating fragments, and the sun shone down with great power. Cattle, with unusually large horns, and very docile, were scattered about, and ash-colored doves flew up at every few paces. These are called coro camino by the Mexicans, and are very numerous. They closely resemble the turtle dove, and when one is on a tree alone, it utters the same plaintiff note that the turtle does. There were meadow-larks identical in appearance with those in the northern States, and towards evening they seem determined to attract attention, flying before the traveler from one dead stalk to another, uttering, as it alights, a strain so sad, that you wonder if it is not tired of living on these prairies. The soil is a black loam, fissured every where by the drouth, and bearing deep impressions of cattle's feet made during the rains. The roads, at such times, must be very heavy. I stopped a short time at the house built by Dr. Taylor, who died at Port Lavacca two years since. It is built on piles ten or twelve feet from the ground, as a protection from the malaria, and surrounded by a grove of live oaks, which, at the moment, were filled with blackbirds, and the garden attached was hedged in by thrifty osage orange. I spent an hour in conversation with the intelligent lady of the house, after which I resumed the same obscure trail I had been following, until the grove I had left had sunk below the horizon, and I was in a sea of deep green, on which cattle were no longer to be seen, no tree for shelter, or stream for refreshment—the sun all the time pouring down a blistering heat upon horse and rider, until the horizon dances from its effect.

Yet is the prairie no desert—one sees many familiar faces among the flowers there, and the chirp of the cricket and the locust sound as familiar as if you were harvesting in our northern fields. The night-hawk, startled from its covert, soars blindly into the sunlight—the whistling of the swift wings of turtle doves—the startling whirr of the grouse, and uninterrupted songs of larks and sparrows, all were sounds so familiar as to make me forget that I was on the borders of the torrid zone. Nor was I altogether unobserved, for, wherever I cast my eyes, the red deer were watching me, but so distant, that one seeing them for the first time could not be sure they were deer without a glass, but by its aid I could distinguish the horns plainly. As I rode along a fawn started from the long grass, where its mother had left it, probably, to go for water, and the sight of the beautiful creature bounding away before me, so animated me, that I started Pelicano in pursuit, without any intention, however, of catching the animal, but the horse had been reared to the chase, and went in to win. For a while it was an even race, but the fawn began to lag, and we were close upon it, when it doubled, and Pelicano shot by it so far that, before I could turn him again, the fawn was almost out of sight. These evolutions were repeated, until the fawn, exhausted, lay down, and Pelicano stood astride of it—when, dismounting, I took it up and threw it across the saddle, too weary to make any resistance. It was a beautiful creature. It made no effort to escape, but lay panting before me, its black eyes turned to me so gently—its well-turned head and limbs so expressive of innocence and grace, that, instead of being the capturer, I was captivated. I was perplexed to determine what to do with it—should I carry it to the next ranch, about six miles further on, I might subject it to cruelty, and, perhaps, death. I had carried it about a mile, when it made a slight effort to escape, and, at the same time, uttered a cry so human, that it pierced my very soul, and I removed all restraint from it. With a bound it struck the turf, and was away retracing its steps. "Go!" I said, "make the best of your brief life—the white man is on your track, a foe more ruthless than the savage—this kills only to supply his wants, but that destroys to gratify a passion."

About the middle of the afternoon I halted at a little well, dug at the base of a sandy knoll, and, having staked out Pelicano to browse, I posted myself under the shade of a live oak. I had ridden eighteen miles, and was anxious to find the house at which I was advised to spend the first night. The prairie was more rolling than that portion which I had passed; and, in the vicinity of the Gaudaloupe, little sandy knolls, destitute of grass, offered as compensation fine clusters of oak and hackberry trees. The live oaks grow to a large size, with branches much knarled, and draped with the Spanish moss in large masses, hanging not only from the twigs, but from all the large branches, in many places completely concealing the limbs, except from below. The moss, like the bark, is of a light grey. I stopped that night at an inn kept by a widow lady and her sons.

I resumed my way at a late hour the next morning, in order to favor the horse, and because I also was not a little wearied. My road led through a low bottom, with coarse grass and rushes, some prickly pears, with flowers, orange-colored, striped with red like a bizarre tulip, then into a thicket of a great variety of trees, of which I recognized none as species common to the north, though many, if not all, belonging to genera commonly distributed. I noticed the sycamore, three species of the elm, one of maple, and four of oak. In one respect only, does the forest take a tropical aspect, and that is in the number of climbers and vines that hang on the trunks of the trees, and often load down their tops. These, with the Spanish moss, give a very singular effect to the scenery. I crossed the bed of a stream, nearly dry now, but showing that the bottom is subject to inundations, and as I rode in, a huge blue heron, fishing in a muddy pool near by, rose and flapped away into security. He need not have troubled himself—I did not come to destroy. Leaving this thicket, whose shade had been very grateful to me for an hour, the road skirted a beautiful prairie about four miles long and two broad, whose clayey soil, of a dark blue color, was covered with a growth of grass green as young corn, but was entirely devoid of living inhabitants—not a moving creature was to be seen on it, save my horse and myself. I reached the Guadaloupe about noon. It is there about thirty yards wide, and flows with a speed of about five miles an hour, and turbid with the clay of its banks, which were overhung with willows. I spent the heat of the day sitting on the river bank, watching the fish playing and pursuing each other, listening to the songs of many strange birds, brushing the little black flies from my face, and drinking tepid water from the river. I am startled by the humming bird, which shoots by like an Indian's arrow, and high up, the vulture, with wing feathers spread like the fingers of an open hand, sails in majestic circles; for the vulture family, though obscene and disgusting birds on the ground, are unsurpassed in the grace and ease of their flight. They seem to have studied great circle sailing. Pelicano bites alternately the grass and the great green flies that are biting him, and waits my motions.

About three o'clock I resaddled, and ascended an abrupt elevation of about one hundred feet, to an extensive prairie extending further than the eye could reach. The soil was a dark loam, with fresh water bivalves of the genus anodonta showing in the water-worn ravines. Here was the cabin of the man who keeps the ferry. Many cattle were scattered over the prairie, and droves of horses and herds of deer were always in sight. The scene was so novel and beautiful, that I paid too little attention to the road, which was but a trail or bridle-path, and as the sun went down, I could see no signs of a settlement, while the continued presence of deer made me fearful that I should be compelled to pass the night on the plain. I concluded to push on for a clump of trees to the left, and was urging my horse to a gallop, when I saw a solitary horse and rider on the horizon, just where the sun had gone down. I rode towards him, and when I had approached within hailing distance, he called to me—"Well, Dr., how do you fare on God's prairies." He was a man whom I had met at Port Lavacca, and was going back to that place. He directed me to follow the path till I found one leaving it at right angles, which would lead me to the house of Mr. Cromwell. I hurried on until it was so dark that I could no longer see the path, when I gave up all hopes of finding the house. I looked for something to fasten the horse to, but not a stake or bush was in sight. I would have laid down and held the horse, so that he might graze, but I knew that in spite of our new-formed mutual regard, he would escape if I fell asleep, and if I tied him to my foot, he might, in case of fright, injure me severely. I had no choice but to travel. At length I discovered, by the deepening twilight, a bush, but preceeding towards it, discovered that it grew from the side of a ravine, and was unapproachable. One who has been thus alone in a strange, wild prairie, will understand my feelings. It grew very dark, and the fire-flies flashed around me as if in merry mockery, only making the way more dark. The night-hawk swooped down to me with a sound that I interpreted to a prolonged boo-oo, and I plodded along cautiously, leading the horse. I thought I discovered a house, but on approaching it, found it to be a cluster of small trees. Here was a fastening point, but now I concluded to keep on still further. I seemed to be on the summit of a declivity, and peered earnestly along the undistinguishable horizon, but as I walked along, could not perceive that my steps descended. I was still on the summit, and the prairie led down every way from me. At length I caught a glimpse of a light, and as I approached it I heard the sound of a hand-mill. I soon distinguished a cluster of huts, and led Pelicano into the enclosure. Several negroes appeared and took my horse, when I found that I had, as it were by chance, stumbled upon the place I was in search of, but which I supposed I had passed hours before. Mr. Cromwell had also been belated looking for cattle, and had but just returned to a late supper, which I was happy to be permitted to share with him.

J. D. B. S.

The Circassian Slave Trade.

It is not generally known in America, that one of the causes of the dissatisfaction of the Circassians with the Government of the Czar, was the abolition by him of girl-selling. Fathers insisted upon selling their daughters to the Turks; but the Czar would not allow the unnatural commerce. Policy may have induced the Russian Government from time to time to wink at or even openly to permit the continuance of the traffic; but it is well understood, that if they had full sway in Circassia, there would be no more daughter-selling.

It is, however, said, that Circassian maidens willingly suffer themselves to be sold as slaves to Turkey, and to Constantinople especially, where their personal attractions and mental superiority often enable them to obtain considerable influence; and many examples have been known of their returning to their native country with considerable fortunes. Circassian beauty is proverbial; but a glance at a cargo of Circassian girls, as they arrive at Constantinople after their voyage from Trebisond, would at once dispel the poetical halo which has in our minds ever encircled them. The object of the parents in selling them being profit, they would lessen their gain by clothing them well; hence a ragged garment, with a piece of linen to wrap round their shoulders, is often their only covering. The slave-merchant, intent upon profit, and with that narrow-mindedness and stupidity which prevents his seeing that the price of his wares would be proportionate to their good condition, feeds them only on water and a kind of millet pap. During the voyage they are separated from the other passengers, and huddled together in filth and abominations between the decks, like a cargo of negro-slaves. The result may be easily imagined. They arrive at Constantinople in a disgusting state, affected with diseases of the skin and infested with vermin. If the seller wishes to turn his wares into money as speedily as possible, which is not unfrequently the case, he merely throws a cloak over their shoulders and takes them at once to the market. The purchasers keep at a respectful distance from their bargain, and drive them before them, like sheep, to one of the many establishments kept by old women, whose profession it is to cleanse these unfortunate creatures. It is only on quitting these establishments, cured of all cutaneous disease, clean, and well dressed, that is to be detected some of that beauty in face and figure which is of such extended renown. Measures have recently been taken for putting a stop altogether to this nefarious traffic.

A Mode of Embalming in France.

A corrnspondent of the Newark *Advertser*, writing from Paris, gives the following: "I have lately witnessed the process of embalming as practiced here. It was on the person of a young American, whose friends wished the body preserved as perfectly as possible, in order to its being sent home. The law requires that 24 hours notice of the decease shall be given to the police by the attending physician, before either autopsy or embalming shall be practiced. The design is to give certainty that death has really taken place, and in a legitamate manner. Embalmers are prohibited from employing arsenic, an excellent antiseptic, because in cases of death from that poison, administered willfully, their use of it would defeat the ends of justice. The mode of procedure in this case was as follows. The operator first filled two vials with his preparation, and gave them to a police officer, who was present, to be sealed and subsequently analyzed by a competent chemist. If the least trace of the prohibited article should be found, the embalmer would be liable to severe punishment. He then, through the carotid artery, and by means of a large syringe, furnished with a detached stop-cock, injected about a gallon of reddish fluid, which I have since learned had probably chloride of zinc for its base. As the vessels became distended, this fluid permeated the capillaries, making its passage by arborescent white lines, until gradually a considerable portion of the skin assumed a clear pearly lustre, which I was informed would after a time be the case with the whole surface. The body then, after being washed in Cologne water, having the nostrils and ears stuffed with cotton dipped in some extract of a musky odor, the cheeks and lips painted, the eyeballs fitted with glass fronts of the natural shade, and the hands and feet clad in silk gloves and stockings, was surrounded with four coffins, the inner shell being lined with lead, and the outer one having the appearance of a box containing goods. And so our friend was transported to his mourning relatives. The same steamer that carried this, took out also two other American corpses.

Simple as is the process of embalming, it is very costly. For that and the four coffins, I believe the demand was two thousand francs. In reply to some questions as to the efficacy of this process, the embalmer declared that he had known bodies preserved by it perfectly during five years, and he thought the time of its action might be extended greatly beyond that time.

DIRECTIONS FOR AIDING PERSONS TO ESCAPE FROM PREMISES ON FIRE.—1. Be careful to acquaint yourself with the best means of exit from the house both at the top and bottom.

2. On the first alarm reflect before you act. If in bed at the time, wrap yourself in a blanket or bedside carpet; open no more doors or windows than are absolutely necessary, and shut every door after you.

3. There is always from eight to twelve inches of pure air close to the ground; if you cannot therefore walk upright through the smoke, drop on your hands and knees, and thus progress. A wetted silk handkerchief, a piece of flannel, or a worsted stocking, drawn over the face, permits breathing, and, to a great extent, excludes the smoke.

4. If you can neither make your way upward nor downward, get into a front room; if there is a family, see that they are all collect here, and keep the door closed as much as possible, for remember that smoke always follows a draught, and fire always rushes after smoke.

5. On no account throw yourself, or allow others to throw themselves, from the window. If no assistance is at hand, and you are in extremity, tie the sheets together, and having fastened one end to some heavy piece of furniture, let down the women and children one by one, by tying the end of the line of sheets around the waist and lowering them through the window that is over the door, rather than through one that is over the area. You can easily let yourself down after the helpless are saved.

6. If a woman's clothes should catch fire, let her instantly roll herself over and over on the ground; if a man be present, let him throw her down and do the like, and then wrap her in a rug, coat, or the first woolen thing that is at hand.

THE CAROB TREE, OR ST. JOHN'S BREAD.—Among the recent importation of seeds from Alcanti, Spain, were those of the Carob tree, the pods of which, when ripe, contain a few drops of a substance resembling honey. From this circumstance, it is supposed that this tree is identical with the one upon which St. John fed while in the wilderness, and hence it is sometimes called St. John's Bread. It blooms twice a year—at the end of January or the first of February, and about the middle of September—and when well watered grows to a considerable height and size, sometimes spreading to such a degree as to have a circumference of from two hundred to three hundred feet, and bearing upwards of a ton of pods. Young trees, only a year old, often have stems eight or ten inches thick, with branches ten or twelve feet long. Cattle, horses, and mules, devour the pods with avidity, and if well fed upon them will become extremely fat, or in a good condition to work. This tree, doubtless, will succeed well in the southern, and perhaps in the middle States. Thus it is that the interest the government takes in the success of the science of agriculture not only tends to improve the science at home, but collects the seeds of all climes to swell its own products. [Washington Union

KNOWLEDGE.—How beautiful and exalted are the following sentiments of De Witt Clinton:—

"Pleasure is a shadow, wealth is vanity, and power a pageant; but knowledge is ecstatic in enjoyment, perennial in fame, unlimited in space, and infinite in duration. In the performance of its sacred offices it fears no danger, spares no expense, omits no exertion. It scales the mountain, looks into the volcano, dives into the ocean, perforates the earth, encircles the globe, explores sea and land, contemplates the distant, ascends to the sublime! No place too remote for its grasp, no heaven too exalted for its reach!"

INFLUENCE OF SLAVERY ON FREE LABOR.—Philanthropy, when it contemplates a slaveholding country, may have its first sympathies excited for the slaves; but it is a narrow benevolence which stops there. The needy freeman is in a worse condition. The slave has his task, and also his home and his bread. He is the member of a wealthy family. The indigent freeman has neither labor nor house nor food; and divided by a broad gulf from the upper class, he has neither hope nor ambition. He is so abject that even the slave despi es him. For the interest of the slaveholder is diametrically opposite to that of the free laborer. The slaveholder is the competitor of the free laborer, and by the lease of slaves takes the bread from his mouth. The wealthiest man in Rome was the competitor of the poorest free carpenter. The patricians took away the business of the sandal-maker. The existence of slavery made the opulent owners of bondmen the rivals of the poor—greedy after the profits of their labor, and monopolizing those profits through their slaves. In every community where slavery is tolerated, the poor freeman will always be found complaining of hard times.

[Bancroft.

NOTIONS OF BEAUTY.—The Japanese wo[illegible] gild their teeth, the Indians paint the[illegible] whilst in Guzurat the pearl of the teeth [illegible] beautiful, must be dyed black. The ladies of Arabia stain their fingers and toes red, their eyebrows black, and their lips blue. In Persia, they paint a black streak round the eyes, and ornament their faces with various figures. In Greenland, the women color their faces with blue and yellow, whilst the Hottentot women paint in compartments of red and black. Hindoo females, when desirous of appearing particularly lovely smear themselves with a mixture of saffron, trumeric, and grease. In ancient Persia, an acquiline nose was thought worthy of the crown; but the Sumatra mother carefully flattened the nose of her daughter. An African beauty must have small eyes, thick lips, and a flat nose.

A CAUTION TO SCOLDS.—The following Act of Assembly was passed in Virginia in 1663:

"*An Act for the Punishment of Scandalous Persons.*—Whereas, many vaporing women slander and scandalize their neighbors, for which their poor husbands are often involved in chargeable and vexatious suits and costs in great damages—

"Be it therefore enacted, by the authority aforesaid, that in actions of slander, occasioned by the wife, after judgment passed for damages, the woman should be punished by ducking; and if the slander should be so enormous as to be adjudged at greater damages than five hundred pounds of tobacco, then the woman to suffer a ducking for each five hundred pounds of tobacco adjudged against the husband, if he refuse to pay the tobacco."

VARIETY.

Ohio is the greatest corn growing State—growing in 1850 upwards of 590,000,000 bushels, and it need not be wondered at when we find such fields of maize as the following: On the west side of the Scioto, just below Columbus, there is planted 600 acres of bottom. 15 shovel ploughs and 3 cultivators, worked by 18 men and 25 horses, are kept in constant requisition; and the result is that scarcely a weed can be found in the well plowed furrows. Twenty-five German girls follow the ploughs, and do the hoeing, for which they receive 62½ cents per day. The men receive $20 per month. The Licking Bottoms are more prolific in that article than any other portion of the country, frequently yielding 75 bushels to the acre. Kentucky ranks next after Ohio, yielding for the year ending 30th of June, 1850, upwards of 58,000,000 bushels.

When a violin was first introduced into the choir of the Rev. Dr. Allyn's church, the innovation gave great offence to some of the parishioners. Especially was the player of the bass viol exercised with sorrow and indignation, when the frivolous and profane fiddle first took its place in the house of God, by the side of his sedate and portly instrument. He accordingly laid the case before the Doctor, who, after listening soberly to his complaints, replied:—"It may be as you say, Sir; I don't know but you are right; but if you are, it strikes me the greater the fiddle, the greater the sin!"

The following is from the pen of Dr. Channing: "The moment a man parts with moral independence; the moment he judges of duty, not from the inward voice, but from the interests and will of a party; the moment he commits himself to a leader or a body, and winks at evil because division would hurt the cause; the moment he shakes off his particular responsibility, because he is but one of the thousand or million by whom the evil is done—that moment he parts with his moral power. He is shorn of the energy of a single-hearted faith in the right and true."

The following was told by the late eminent poet Wordsworth to a gentleman who happened to quote from his (Wordsworth's) beautiful address to the stock-dove:—"He said once in a wood, Mrs. Wordsworth and a lady were walking, when the stock-dove was cooing. A farmer's wife coming by, said to herself, 'Oh! I do like stock-doves!' Mrs. Wordsworth, in all her enthusiasm for Wordsworth's poetry, took the old woman to her heart; 'but,' continued the old woman, 'some like 'em in a pie; for my part, there's nothing like 'em stewed in onions!'"

That the color of the eyes should affect their strength may seem strange; yet that such is the case need not at this time of day be proved; and those whose eyes are brown or dark colored should be informed that they are weaker and more susceptible of injury, from various causes, than gray or blue eyes. Light blue eyes are *cæteris paribus* generally the most powerful, and next to these are gray. The lighter the pupil, the greater and longer-continued is the degree of tension the eye can sustain.

The London Punch gets off a good thing for some of the English admirals, whose tardiness astonishes the whole world. It says, if the "race is not to the swift," why wonder at the *tardiness* of the *fleet?*

The happiness of man arises more from his inward than his outward condition; and the amount of good in the world cannot be much increased but by increasing the amount of goodness.

Base all your actions on the principle of right; preserve your integrity of character, and in doing this never count the cost.

New Steamboat Line for Albany and Troy.

From Pier 15, foot of Liberty-st., at 6 P. M.

STEAMER RIP VAN WINKLE, C. W. Farnham, Commander, Monday, Wednesday and Friday, at 6 o'clock, P. M.; steamer COMMODORE, L. Smith, Commander, Tuesday and Thursday, at 6 o'clock, P. M., and SUNDAY, at 5 P. M.

Fares: Saratoga, $1 50; Moreau, $2 15; Fort Edward, $2 15; Whitehall, $2 75; Castleton, $3 10; Rutland, $3; Burlington, $4; Rouses Point, $5 50; Montreal, $7 50.

These Boats will arrive in Albany or Troy in ample time to form connections with all the Railroads, North, East or West, enabling passengers to reach Montreal and intermediate points the same day.

These Steamers are of the first class for strength and speed—well known favorities of the public—having been thoroughly overhauled during the past winter, and offer every accommodation that can be desired by either freighter or traveler.

Through tickets can be obtained on board the boats for Saratoga, Moreau, Fort Edward, Whitehall, Castleton, Rutland, Burlington, Rouse's Point and Montreal.

The Northern Freight Express will give Bills of Lading to all points as above named. Shippers who desire it, can have time receipts, by applying at the office on the Pier. A. A. DYKEMAN.

Ayer's Pills.

A NEW and singularly successful remedy for the cure of all Bilious diseases—Costiveness, Indigestion, Jaundice, Dropsy, Rheumatism, Fevers, Gout, Humors, Nervousness, Irritability, Inflammations, Headache, Pains in the Breast, Side, Back, and Limbs, Female Complaints, &c., &c. Indeed very few are the diseases in which a Purgative Medicine is not more or less required, and much sickness and suffering might be prevented, if a harmless but effectual Cathartic were more freely used. No person can feel well while a costive habit of body prevails; besides, it soon generates serious and often fatal diseases, which might have been avoided by the timely and judicious use of a good purgative. This is alike true of Colds, Feverish symptoms, and Bilious derangements. They all tend to become or produce the deep seated and formidable distempers which load the hearses all over the land. Hence a reliable family physic is of the first importance to the public health, and this Pill has been perfected with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing any thing hitherto known of any medicine. Cures have been effected beyond belief, were they not substantiated by persons of such exalted positions and character as to forbid the suspicion of untruth.

Among the eminent gentlemen who have testified in favor of these Pills, we may mention:

Doct. A. A. Hayes, Analytical Chemist of Boston, and State Assayer of Massachusetts, whose high professional character is endorsed by the—

Hon. Edward Everett, Senator of the United States.

Robert C. Winthrop, Ex-Speaker of the House of Representatives.

Abbott Lawrence, Minister Plen. to England.

†John B. Fitzpatrick, Catholic Bishop of Boston; also

Dr. J. R. Chilton, Practical Chemist of New York City; endorsed by

Hon. W. L. Marcy, Secretary of State.

Wm. B. Astor, the richest man in America.

S. Leland & Co., Proprietors of the Metropolitan Hotel, and others.

These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compounded not of the drugs themselves, but of the medicinal virtues only of Vegetable remedies extracted by Chemical process in a state of purity, and combined together in such a manner as to insure the best results. This system of composition for medicines has been found in Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any process. The reason is perfectly obvious. While by the old mode of composition, every medicine is burdened with more or less of acrimonious and injurious qualities, by this each individual virtue only that is desired for the curative effect is present. All the inert and obnoxious qualities of each substance employed are left behind, the curative virtues only being retained. Hence it is self-evident the effects should prove as they have proved, more purely remedial, and the Pills a more powerful antidote to disease than any other medicine known to the world.

As it is frequently expedient that many medicines should be taken under the counsel of an attending physician, and as he could not properly judge of a remedy without knowing its composition, I have supplied the accurate Formulæ by which both my Pectoral and Pills are made, to the whole body of Practitioners in the United States and British American Provinces. If however there should be any one who has not received them, they will be forwarded by mail to his request.

Of all the Patent Medicines that are offered, how few would be taken if their composition was known! Their life consists in their mystery. I have no mysteries.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject freely acknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many eminent Physicians have declared the same thing of my Pills, and even more confidently, and are willing to certify that their anticipations were more than realized by their effects upon trial.

They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.

Prepared by Dr. J. C. AYER, Chemist, Lowell, Mass. Price 25 Cents per Box. Five Boxes for $1 00.

Sold at wholesale in New York by A. B. & D. SANDS, retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere.

The Sabbath Recorder,

PUBLISHED WEEKLY

By the Seventh-day Baptist Publishing Society,

AT

NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the time to which they reach.

☞ No paper discontinued until arrearages are paid, except at the discretion of the publisher.

☞ Communications, orders, and remittances, should be directed, post paid, to

GEO. B. UTTER, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

Rates of Advertising.

For a square of 16 lines or less	one insertion	$ 75
"	each subsequent insertion	50
"	six months	6 00
"	one year	10 00

For each additional square, two-thirds the above rates.

The Sabbath Recorder.

THE CHURCH AND THE MINISTRY.

Report on Ministerial Supply, read before the Seventh-day Baptist Western Association at its last session, by J. M. Allen, and ordered to be published in the Sabbath Recorder.
[Concluded.]

EMPLOYMENT.

The church should not only seek out and encourage the youthful candidate, but should also place him in positions where he can develop his energies, and form those habits so essential for success in his future activities. There is abundant employment in almost every church for such young men. There is need of Sabbath Schools and Bible Classes, prayer and conference meetings, and meetings for preaching in the various districts within or near the bounds of the church. Now, it may by very pleasing and interestiing to have all these conducted in person by the pastor, but that is impossible if the church is of much size, or covers any great extent of territory. Nor is such a course always desirable, however small the church. There are talents in almost every church, which it is a sin to let rust out in inactivity. Too long already has it been sung—

'Full many a gem of purest ray serene,
The dark, unfathomed caves of ocean bear;
Full many a flower is born to blush unseen,
And waste its sweetness on the desert air."

Let the hidden talents be developed. Let Bible classes and prayer meetings be entrusted to the care of such men. And, furthermore, we cannot see any objection to their being permitted now and then to preach. Suppose, for instance, there are from five to ten stations within the pastor's circuit, where afternoon or evening meetings might be held with profit, but where the pastor cannot preach oftener than once in three to six weeks, or even months; which is the better, to have meetings only when he can thus preach, or to have them often and regular, though the intervals between the pastor's visits were supplied by more inexperience, if not inferior talent? It is very true, there might not be as much rhetoric and oratory and learning and tact of practice, as in the pastor's preaching, yet there might be as much of the spirit of Christ, and the true and earnest utterings of piety—might be, indeed, in rich profusion, all of the essential elements of doing good. How many a precious revival has sprung up, how many souls have been converted, by means of just such instrumentalities, through the preaching of those to whom fastidious ears could not listen without murmuring or ridiculing! Many a redeemed soul could bear witness to the truthfulness of this remark. And that minister who panders to such fastidiousness, and does not bring forward the talent which is rusting within his charge, proves recreant to the great commission entrusted to him; while the pastor who carefully develops all such talent, who wisely employs all such aid, will, doubtless, find his efforts heartily seconded by his people, and the church growing in strength, efficiency, and grace.

MINISTERIAL EDUCATION.

Again, if the ministerial talent thus being developed by the church, is to accomplish its mission in fullness and completeness, it must have much and long preparatory training, culture, discipline; in short, it must be *educated*, theoretically and practically educated for the vocation. Hence it becomes us to briefly consider that much-discussed and all-absorbing question—*ministerial education*. It is the duty of every individual to improve upon the talents which God has given him. If this is true of every individual, how weighty is the responsibility resting upon those who are to be spiritual lights and guides in Israel!

The Bible throws light upon this subject. Passing over the schools of the prophets, founded by Samuel, for the education of those who were to be the religious instructors in Israel, let us come directly to our great exemplar, Jesus Christ. The method pursued by him in the preparatory discipline of the apostles, is worthy of careful and diligent study by the church, and of imitation, as far as practicable in the nature of the circumstances. For three long years He sedulously trained and instructed the apostles. He spared neither time nor pains to indoctrinate them into the spirit and principles of his new kingdom, and to form in them habits adapted to their future mission. He united theory and practice, with instruction harmoniously blending practice, illustration and example.

Against this expenditure of time and care, methinks one could almost hear those old conservative Scribes and Pharisees exclaiming, "Why this idle wandering up and down the country? Why spend so much time in this preparatory exercise and training? If thou be the Son of God, thou canst supply by miraculous gifts whatever of knowledge or experience may be wanting to thy disciples. Thou sayest that the fields are already white to the harvesting, and thou commandest thy followers to pray for more laborers. Send forth now these laborers. Let them enter at once upon their mission. Let them commence immediately to gather in these perishing souls, which otherwise must be lost. Neither thou nor thy disciples are engaged in any employment for making money or getting a living, but live on the bounty of others. Thou, with thy disciples, enterest uninvited our corn fields, even on the Sabbath-day, and pluckest our corn. Indeed, thou art consuming the fat of the land." And those who find fault with young men who are carefully preparing themselves for the ministry, according to the example of Christ, have not yet all departed from off the face of the earth.

But Christ seems to have had a view different from such of the importance and responsibility of the ministerial office, and of the careful training necessary to fit men for meeting the duties of the office with efficiency and success. He, accordingly, trained them by careful and slow processes for their mission, changing their old habits and forming new ones, sending them forth on little missions from time to time, for them to practice upon their new acquisitions. And after having completed his personal instruction, and ascended on high, his disciples were not yet prepared to enter upon their great mission. They were to tarry yet longer, until they should be endued with farther and greater power. And when, on that Pentecostal day, they were filled with the Holy Ghost, and began to speak with other tongues, then it was that they were prepared to enter directly upon their great work. Did not Peter, as he stood up before the assembled multitudes from many nations, with his heart full of the Spirit, and endued with the power of speaking in many languages, represent the great ministerial ideal—the ideal after which every minister should strive? The spirit of Christ filling and energizing the soul, and the power conferred, at the present, not by miracle, but by much learning, are essential requisites for any one striving to accomplish the most possible in the sacred office. If the power to speak in different languages was of so great importance as to be conferred by miracle in the early ages of the church, and none of the apostles were fully prepared for their mission without it, is it not at the present day of sufficient importance for the youthful candidate to obtain the same power by much study? Farthermore, the apostles, with all the power with which they were thus miraculously endued, did not seem to possess within their number all of the requisites essential for the full and complete development of the gospel plan for carrying the news of salvation into the higher spheres of philosophy and civilization; hence we find another man added to their number by miraculous power, smitten down of the Spirit in the midst of his persecuting career, and made the chiefest of the apostles. To Paul, learned in all of the wisdom and philosophy of his times, was given the especial commission of preaching Christ amid the learning, luxuries and refinement of Greece and Rome; not only this, but to him was delegated the power of reducing the great doctrinal points of Christianity to form and system. The other apostles could talk of Christ and Him crucified, of love and the practicalities of religion, but Paul looked into the deep and hidden mysteries of redemption and godliness, molded and systematized the fundamental principles.

Thus has it ever been in the history of the church. Those with the best intellectual culture, other things being equal, have been the great lights in the church, have been the leaders, have stood on the headlands of progress, beckoning their fellow men on to a nobler and holier destiny. It becomes the young man approaching the ministry to imitate, as far as he may, such examples. It is very true, that the youth of the present cannot enjoy the personal instruction and example of Christ, and thus fall far short of that perfect schooling enjoyed by the apostles, for such an other theological school as that in which Christ was instructor has never existed; but not possessing such privileges, it becomes them to seek the best substitute possible. It is not meant by this, that no individual should enter upon the ministry unless he has completed a certain routine of study; that all shall have been through college and a theological seminary. The circumstances of life connected with the individual must determine somewhat his preparatory discipline. It may, doubtless, be laid down as a universal rule, that the candidate should make the best preparation possible under the circumstances, and that the church should expect it of him, and assist him, if need be, in making it. In the language of Dr. Wayland:—

"If we are willing to follow, and not lead, the Spirit of God—that is, if we educate no man for the ministry until we are satisfied, not that he *may be*, but that he *has been*, called of God to the work of preaching the gospel—we shall always have among our candidates a large number of those who have passed the period of youth, and for whom the studies of youth would be unsuitable, if not useless. Yet these are the men to whom appropriate culture would be specially valuable. Others, in various degrees, have been more favored with preparatory education, and the means for more extended discipline. The means and advantages of our candidates must, therefore, be exceedingly dissimilar. If, then, we would labor to give to the ministry the means of improvement, we must provide those means for them all. A system of ministerial education, adapted to the condition of but one in twenty of our candidates, commences with the avowed intention of doing but one-twentieth part of its work, and of helping those only who have the least need of its assistance. We should provide for all our brethren whom God has called to this service, the best instruction in our power; adapted, as far as possible, not to any theoretical view, but to the actual condition of the mass of our candidates, leaving each individual in the exercise of a sound and pious discretion to determine the extent to which he is able to avail himself of our services. While means should be fully provided for pursuing an extended course of education, we must never lose sight of the large number of our brethren to whom an extended course would be impossible."

With the qualifications indicated in the above extract, it is the duty of the church to do all in her power in preparing those of her sons that are to devote their lives to her service, to enter on this service. Modern philosophy and modern progress have decided it to be the duty of the State to educate her future citizens sufficiently to enable them to discharge all of the cardinal duties of the state. Thus far they are considered as belonging to the state, and the state is responsible for their training, and for the character of their future citizenship. We find the federal government also training, at its own expense, its warriors; those who are to spend their lives in their country's service. Why should not the church adopt the same principle? Candidates for the ministry are almost universally poor. Well may they say, from experimental knowledge of poverty and want, "O thy numberless torments, who can tell! Yet thou seemest destined to dwell with me, intruding each day, careful to mark each hour, and seeking with thy slow torture to drive from my brain everything like thought. Each pleasing aspiration by thee is quickly dispersed, oft feeling for the life-strings of the heart, threatening to part soul and body. When learning, with her clear and rich musical voice, whispers in my ear, or science beckons me onward, to darkness thou turnest the brightest vision. When wisdom wishes to open her glowing pages, or hope points to the good and the glory of the coming age, thou unsheathest thy cutting blade, or blastests all with thy poisonous breath." With such difficulties around about them, with such burdens pressing them down, they need some one to lend a helping hand. The church stands as a guardian angel to protect, to cheer and assist onward and upward.

It is very difficult to determine just how much the church should assist a young man in his preparatory studies. That young men entering upon such a course without any aid, save their natural powers, generally need more or less assistance, is an undisputed fact; yet how, and when, and to what extent, this aid should be rendered, is a nice problem. Hard buffetings in the rough stream of life, tend to develop in man, as in certain lower animals, pearls of great price. The latent powers that poverty and difficulty tend to develop, need to be brought out; but the laborer should not be left to sink under his burden. He is to be encouraged and assisted sufficiently to enable him to move on his way freely, to develop his mind naturally and fully. When *privation cramps development*, then that privation is an injury. When the physical frame of man or brute is overworked, or pinched by poverty, the growth is stunted, sickly, or calloused. So with the spiritual. A dwarfed and imperfect, a gnarled or sickly growth, is the result. It is the duty of the church to see that her candidates are furnished with the means suitable for a harmonious, beautiful and powerful spiritual development. This aid should come in a manner not to injure the independence or self-reliance of the recipient.

Our limits forbid a detailed description of the methods by which this may be accomplished. A simple hint, a brief outline, is all that can be given. Let tuition be free to all in our higher seminaries of learning, or, at least, grant free tuition for excellence of scholorship. It will thus come as a mark of honor, not of charity. Let the church, or a society organized for that purpose, furnish the candidate with funds, especially in the closing years of his study, when the expenses are heavy. The funds should generally be lent rather than donated; lent without interest, to be repaid into the treasury of the society within a stipulated period. This will not subject the personal independence and respect of the candidate to severe tests. It will not be likely to enervate his manhood, or weaken effort. Let him, also, be rewarded for all labor spent in the service of the church. The church should not think of calling on him to preach, or conduct a Sabbath School, without remunerating him for what costs him days and perhaps weeks of labor. This need not be done in the sense of hire and pay; but receiving a free-will offering, let a free-will offering be returned. With such rules, growing out of a kindly and generous spirit, a spirit desirous of doing her whole duty, the church need find no insurmountable difficulties in the way of procuring a full and rich *ministerial supply*.

Your Committee to whom was referred the subject of the *Duty of the church in calling out, ordaining, and supporting men for the Ministry*, has thus imperfectly considered only one branch of the very important subject. And your Committee would close with expressing the desire, that what has been thus imperfectly said, may lead to abler and fuller investigation, and also to action, on a subject of such vital importance to the church of Christ.

For the Sabbath Recorder.

CHANGE OF THE SABBATH.

Extracts from various Theological Writings.

~~Dr. Emmons, in his Works,~~ vol. 5, sermon 74, says:—

"The apostle expressly informs us, that the rites and the ceremonies of the Mosaic dispensation were superseded by the gospel, and became null and void after the death of Christ; but none of the inspired writers of the New Testament give us the least intimation of the weekly Sabbath being abolished. And if it were not abolished in the apostles' days, it could not have been abolished since. It must be, therefore, a divine institution, which is still binding upon all mankind. It was not a typical ordinance, and so could not cease by the appearance of an anti-type, as the typical sacrifices, rites and ceremonies under the law ceased by the appearance of Christ, whom they prefigured. There has been no substitute instituted in the room of the Sabbath, to supersede it. In a word, there is nothing said in the New Testament that affords the least reason to doubt of the perpetuity of the Sabbath.

"Besides, the practice of Christians from the apostles' days to this time, is a plain, positive evidence that the Sabbath is a divine ordinance, of perpetual obligation. We have an account of the primitive Christians meeting together for social and religious worship. And though Christians have since been divided into a great variety of denominations, yet they have all agreed to observe a weekly Sabbath, with a very few exceptions. Now, it is not easy to account for this general and uninterrupted practice of Christians in observing the Sabbath for nearly two thousand years, unless it has been founded on the first original institution of it, for the purpose which Christ mentions. If it was made for the benefit of man, this is a good reason why it is continued to the end of time. There are, moreover, new reasons for its perpetual continuance, which have occurred since its first appointment. It was then designed to be a memorial of the creation of the world. After that it became a memorial of the deliverance of Israel out of Egypt. And since that period it has become a memorial of the resurrection of Jesus Christ, and connected with the sacrament instituted to commemorate his death until his second coming.

"To curtail the Sabbath in the beginning and ending of it, is to profane it practically. This profanation has become very common and general. How many consider the Sabbath as the shortest day in the week! They mean to begin it at sun-rise, and to end it at sun-down. They feel themselves completely justified in cutting off from it the evening before and the evening following the Sabbath, and take full liberty to spend either of the two evenings in their own employments or recreations. This is a very gross and criminal profanation of the Sabbath, though the law of the land screens the guilty from human punishment. Others more boldly and daringly profane the Sabbath by spending the whole day in idleness, or laboring, or traveling, or visiting, or in unlawful amusement and dissipation.

"The Sabbath is as inseparably connected with the gospel as it ever was with the law, and must therefore continue as long as the gospel itself continues. There is as much ground to believe in the perpetuity of the Sabbath as the perpetuity of the Lord's Supper. Accordingly, we find none have denied the perpetuity of the Sabbath, but those who have denied the perpetuity of the gospel ordinances. We may be assured, that the Sabbath, which was made for man, will continue as long as it can be of any benefit to man, which will be as long as the human race shall continue in their present probationary state.

"It may be a duty for believers to baptize their infant seed, though it is not commanded in so many words. We have no express command for keeping the first day of the week as the Sabbath. We have no express command for family prayer, and we have no express precept nor example for admitting females to the sacrament of the Lord's Supper. But our brethren make a practice of praying in their families, of keeping the first day of the week as holy time, and of admitting females to the Lord's table. Hereby they practically acknowledge the obligation of performing those positive duties, though not enjoined by any positive precept."

Rev. Robert Walker, of Edinburgh, says, vol. 2, sermon 43, pages 119, 120:—

"Accordingly, we find the law hath received an alteration. The seventh or last day of the week is now become common; and in commemoration of our Saviour's resurrection from the dead, the holy rest is transferred to the first day of the week, which hath ever since been called the *Lord's day*. Whether this remarkable change is sufficiently supported by divine authority, admits of further inquiry. * * * We learn that this was the day on which the apostles and primitive Christians held their solemn assemblies for religious worship. 'When the disciples came together to break bread, Paul preached unto them.' It appears that this was the day on which they laid up their public charity, and contributed to the relief of their needy brethren. In the earliest times, this day was distinguished by the title '*Lord's-day*,' for this appears from Rev. 1: 10, where John informs us that 'he was in the spirit on the Lord's day,' that well-known day, on which He triumphed over death, and which He dignified by His resurrection. It appears, that this change took place in the apostles' days. Though we cannot find any express command, in so many words, yet we have the most convincing evidence that it was either part of the instructions which Christ gave to his disciples before his ascension, or else that it was enacted afterwards by the apostles, in virtue of their authority derived from Christ, and under the infallible direction of his Holy Spirit. God hath remarkably hallowed this day, by many acts of grace done to his people when employed in the religious observance of it. On this day, when 'the disciples were all of one accord in one place,' the Spirit of God descended upon them, insomuch that they were filled with the Holy Ghost.' On the same day the arm of the Lord was graciously revealed in the conversion of three thousand souls. On this day John was inspired with the spirit of prophecy. * * * The change of the day, which is only circumstantial, bears such evident marks of divine authority, as to sufficiently justify the uniform opinion and uninterrupted practice of all the Christian churches."

Will some able divine tells us, by what means they have learned, with Mr. Walker, that those acts of grace, as above quoted, took place upon the first day of the week? We have never been satisfied that such was the fact, from Bible testimony.

Robert Hall says, vol. 3, page 193:—

"The Lord's day is appointed to commemorate the resurrection of our Saviour, at which his kingdom commenced. I shall endeavor to invite your attention to those sources of religious joy which are opened by that event. The event which this day is designed to celebrate, is calculated to afford joy on the following accounts:

"1. On this day the purchase of our redemption was completed.

"2. On this day the character of Christ was illustriously vindicated.

"3. This day afforded to Christ a signal triumph over his enemies.

"4. On this day our Lord gained an everlasting victory over the last enemy, and triumphed over death, in that nature which had always been subject to its dominion before.

"5. On this day we are called to rejoice in that sure and certain prospect which the resurrection of Christ affords to all true believers."

The above are the assertions of a good man, whose fame is among all the churches; but alas! where is the proof that these things are so? Will we be led by the blind?

Hinton, in his History of Baptism, page 251, says:—

"The state in which history is left, is part of the providential arrangement of Him who is head over all things to the church; and had it been the design of Him in whose power it is to overrule all things, to strengthen our faith in infant baptism by the practice of the church in the first and second centuries, he would undoubtedly have taken care that satisfactory evidence should have been at hand. With respect to the observance of the first day of the week instead of the seventh, which is only occasionally alluded to in the New Testament, the most satisfactory evidence exists."

Will Mr. Hinton please give us that evidence that is so satisfactory to him and those to whom he alludes?

Dr. Chalmers says, sermon 10, page 430:

"In the practice of the Christian world, the Sabbath has been moved forward by one day, and the remembrance to which it is now consecrated is a different one from that of the creation of the world. For this change we can find no positive enactment, but we can quote the uncontrolled observance of it down from the period of the apostles' age. We are sure that a practice so early, and so universal, could not have been introduced without the sanction of Heaven's inspired messenger. And mark the limit of that liberty which has been taken with the fourth commandment. It amounts to nothing more than a circumstantial change of day."

And yet we find that Dr. Chalmers was willing to rest satisfied with mere circumstantial evidence, in changing one of God's positive and moral precepts.

W. B. G.

HOW TO BE HAPPY.

I will give you two or three good rules which may help you to become happier than you would be without knowing them; but as to being completely happy, that you can never be till you get to heaven.

The first is, "Try your best to make others happy." "I never was happy," said a certain king, "till I began to take pleasure in the welfare of my people; but ever since then, in the darkest day, I have had sunshine in my heart."

My second rule is, "Be content with little." There are many good reasons for this rule. We deserve but little, we require but little, and "better is little, with the fear of God, than great treasures and trouble therewith." Two men were determined to be rich, and they set about it in different ways; for the one strove to raise up his means to his desires, while the other did his best to bring down his desires to his means. The result was, the one who coveted much was always repining, while he who desired but little was always contented.

My third rule is, "Look on the sunny side of things."

Look up with hopeful eyes,
  Though all things seem forlorn;
The sun that sets to-night will rise
  Again to-morrow morn.

The skipping lamb, the singing lark, and the leaping fish, tell us that happiness is not confined to one place. God in his goodness has spread it abroad on the earth, in the air, and in the waters. Two aged women lived in the same cottage; one was always fearing a storm, and the other was always looking for sunshine. Hardly need I say which it was wore a forbidding frown, or which it was whose face was lighted up with joy.

MOVE ON.

The march of life should never stay—
  All things should onward tend;
Man should not clog progression's way,
  But strive to move and mend.
The waters move in depths of ocean,
  The streams along the dales,
And rivulets with onward motion,
  Through sweet and verdant vales
    Move on!

The clouds move gently through the sky,
  The earth rolls ever on;
Time swiftly in its course runs by,
  And years pass one by one.
Men, too, should strive to follow th[illegible]
  In this their onward way
Permitting naught the tide to stem,
  But ever, day by day,
    Move on

Men may be wiser, if they strive—
  More virtuous, if they will;
And who, within this world, would thrive,
  Must aim at higher still!
Let bigots stand by doctrines old,
  The wise will pass them by;
Weak minds may cling with subtle hold,
  But strong ones valiantly
    Move on!

Like waters rolling to the ocean,
  Down mountains piled on high—
Like clouds forever in commotion,
  That move across the sky—
Will we forever onward press,
  Thus fetterless and free;
And deeming virtue happiness,
  Our watchword ever be,
    Move on!

NEWSPAPER PATRONS.

The thing called patronage is a queer thing. It is very correctly remarked by some one, that it is composed of as many colors as the rainbow, and is as changeable as the hues of the chameleon.

One man subscribes for a paper, and pays for it in advance—he goes home and reads it the year round with the proud satisfaction that it is his own. He hands in an advertisement—asks the price, and pays for it. This is patronage.

Another man says, "Put my name on your list of subscribers;" without as much as having said pay once. He asks you to advertize, but says nothing about paying for it. Time passes—your patience is exhausted, you dun him, he flies into a passion—perhaps he pays you, perhaps not.

Another man has been a subscriber some time. He becomes tired of you, and wants a change. Thinks he wants another journal. Gives it up, and gives you a bad name. One of his papers is returned to you marked "refused." Paying for it is among the last of his thoughts. After a time you look for his account, and send him a bill of "balance due." But he does not pay it—treats you with silent contempt. This, too, some call patronage.

Another man lives near you—never took your paper—it is too small—don't like the editor—don't like its principles—too whigish, too democratic—its leaders too strong, tales too dry, or vice versa, or something else—yet he goes regularly to his neighbor's, and reads it, finds fault with its contents, disputes its positions, and quarrels with type, ink, or paper. Occasionally sees an article he likes; buys a number per quarter. This, too, is patronage.

Another (bless you, it does us good to see such a man) comes and says, "The year for which I paid is about to expire; I want to pay you for another." He does so and retires. This is patronage; but oh, how rare!

Another man subscribes—wants you to give it to him on advance terms; he gets it regularly, reads it carefully, praises it every time he sees you as being a good paper, wishes you success, hopes others will subscribe and encourage it, feels disappointed if it is not issued regularly, and is the first to complain of non-appearance—all this he can do—yet he never dreams of paying, unless you dun him, and then with good promises he will put you off. This, too, is very common patronage.

Is not patronage a curious thing? And in that great day, when honest men get the reward due to honesty, which of those enumerated above, will get the reward? Now, it will be seen, that while certain kinds of patronage are the very life and essence of a newspaper, there are certain other kinds that will kill a paper stone dead. [Halifax Sun.

PAUL ALONE IN ATHENS.

It is his tenderness of affection which first strikes us, when we turn from the manifold wonders of Athens to look upon the Apostle himself. The existence of this feeling is revealed to us in a few words in the Epistle to the Thessalonians. He was filled with anxious thoughts concerning those whom he had left in Macedonia, and the sense of solitude weighed upon his spirit. Silas and Timotheus were not arrived, and it was a burden and a grief to him to be "*left in Athens alone*." Modern travelers have often felt, when wandering alone through the streets of a foreign city, what it is to be out of sympathy with the place and the people. The heart is with friends afar off; and nothing that is merely beautiful or curious can effectually disperse the clouds of sadness. *If*, in addition to this instinctive melancholy, the thought of an irreligious world, of evil abounding in all classes of society, and of evil following everywhere in its train—if this thought also presses heavily on the spirit—a state of mind is realized which may be some feeble approximation to what was experienced by the Apostle Paul in his hour of *defection*. But with us such feelings are often *morbid* and allied to discontent. We *travel* for pleasure, for curiosity, for *excitement*. It is well if we take such *depressions* thankfully, as the discipline of a *worldly* spirit. Paul traveled that he *might* give to others the knowledge of *salvation*. His sorrow was only the cloud that kindled up into the bright pillar of Divine presence. He ever forgot himself in his Master's cause. He gloried that God's strength was made perfect in his weakness. It is useful, however, to us to be aware of the human weakness of that heart which God has made strong. Paul was indeed one of us. He loved his friends, and knew the trials both of anxiety and loneliness.

HONESTY IN RELIGION.

We never had any sympathy with those who profess to be alike friendly to all denominations of Christians. We doubt the honesty of such professions. When a person attaches himself to a Presbyterian, or Methodist, or Baptist church, we take for granted, in the absence of all proof to the contrary, that he acts honestly in so doing. We understand him to enter into such a connection, not as a mere matter of convenience, but because, in his opinion, the Word of God [illegible] him. In other words, we suppose [illegible] is a Presbyterian, he continues [illegible] cause the church of the New [illegible] appears to him to agree more nearly with a Presbyterian organization than with any other. If he is a Methodist, it is because a society organized according to the Methodist platform seems to him to be the counterpart of what is set forth in the New Testament. Or if he is a Baptist, it is because the church of the Scripture appears to be, to all intents and purposes, a Baptist church. If, therefore, he is what he professes to be, a lover of God's truth, he cannot love all these different organizations alike. His preference must be, decidedly, for the communion to which he belongs.

Our suspicions are always excited, when a person of different communion from ourselves comes along, and endeavors to ingratiate himself, on the ground that he knows no difference between one denomination and another—that they are all alike dear to him; for we cannot believe him to be honest. Yet we have not unfrequently met with such persons. Indeed, it has not been a thing of very rare occurrence, that a minister of the gospel identified with the observers of the first day of the week has been seated in our pulpits, on the Sabbath-day, and to manifest his accommodating spirit, has introduced his services with

"Another six days work is done,
Another Sabbath is begun,"

or some other hymn equally expressive of our peculiar sentiments; as if he would thus show that he loved the Sabbath as well as the "Lord's-day," and that he could fellowship our views as readily as those of the people to whom he belonged. Such a time-serving spirit always excites our loathing. We would rather, a hundred times, that a man would tell us plainly that he considers us in error, and would undertake to lead us out of it. For then he would, at least, show his sincerity, and if he accomplished nothing else, he would commend himself to our regard as a man who was determined to do right as far as he had knowledge. At all events, if he does not choose to involve himself in controversy, he can hold his tongue, and not pretend to be our friend, while his constant practice shows him to be in fellowship with those who oppose us.

For our own part, we make no loud profession of fraternal feeling for other persuasions. Our life, our preaching, our writings, are evidence enough of what we like and what we dislike. We observe the seventh day of the week as the Sabbath, because we honestly think the Word of God requires us to do so. The Sunday observance we believe to be unauthorized by the Scriptures—a mere tradition of men, and therefore to be repudiated. We are perfectly willing to preach the gospel on Sunday, as we are on any day; but when we are introduced into a pulpit that keeps the first day of the week, and are caught giving out the hymn,

"This is the day the Lord hath made;
He calls the hours his own,"

or any other hymn that emphatically breathes out Sunday theology, then let our friends rebuke us for our inconsistency.

Certainly, we love what we can see of divine truth in all other denominations. Keeping those points out of sight in which they differ from us, we can heartily fraternize with them. We love to hear the ministers of other orders preach. Many times, the sermons of Presbyterian, Baptist, Dutch-Reformed, and other ministers, have furnished food for our soul. We doubt not they are accomplishing much good; perhaps far more, even proportionally, than the ministers of our own denomination. At the same time, we must say, that all those church organizations which involve a repudiation of the Bible Sabbath, and the substitution of another institution in lieu of it, are not the objects of our admiration. We have no love for them *as such.*

This denominational spirit may be carried to an extreme, and we believe that many of our brethren have laid themselves open to censure on this ground. Bigotry is hateful, wherever it may be found. But in the present condition of the Christian world, it is impossible to discharge our whole duty to the God of truth, without evincing something of a decided leaning to that form of doctrine which appears to harmonize most perfectly with the Scriptures. T. B. B.

Home Missions.—Rev. Mr. Clarke, the Secretary of the Massachusetts Home Missionary Society, preached recently at the Congregational Church, Jamaica Plains, and stated some interesting facts in relation to the progress of the work of Home Missions. Sixteen years ago there were 665 missionaries employed; now there are 1032. Then there were 160 in the West; now there are 537 there. Only fifteen then had gone either west of the Mississippi or north of the Illinois; now there are between two and three hundred there. Sixteen years ago, $78,000 were raised for Home Missions; last year $180,000 were raised. There were then eighty feeble churches in Massachusetts depending on charity; now there are only thirty-eight. Never did the field of Home Missions present a more cheering prospect than at the present moment. In closing his remarks, Mr. Clarke stated that the Treasurer of the Massachusetts Society had received within the last week a donation of $5,000 for the use of the Society, from an unknown individual, who had taken such pains to conceal any knowledge as to who he is, that it will be forever impossible to ascertain. That is the largest sum ever given by one individual to this object, either at Boston or New York.

"STATE OF THE DEAD"—NO. 6.

Resurrection of the Body.

It will be remembered, that the occasion of my first strictures on Bro. B., was his declaration, (Feb. 15th,) that God recompensed his creatures in a future state according to the course of nature, and that it would not in any case require a miracle to bring man into a state where he could be recompensed; and then admitting that a miracle would be necessary in order to raise the body in the resurrection, so that the body and soul might be rewarded together. My stricture consisted in saying, that I thought Bro. B.'s views were antagonistic to each other, inconsistent, discrepant. Bro. B. has since endeavored to sustain his position, as consistent with itself, by showing that the mediation of Christ so modified the Divine government as to require additional reward in the future state. Admitting such to be the case, I cannot see how he has extricated himself from the dilemma. For, if man possesses a natural capacity of being rewarded or punished according to his works, (as Bro. B. admits he does,) according to the course of nature, why, it may be asked, does God resort to a miracle for the purpose of introducing the great day of accounts? And if men can be recompensed according to the course of nature, previous to this miracle of the resurrection, and without its taking place at all, why is it resorted to? *If it will not require, in any case, a miracle to bring man into a state of recompense,* can Bro. B. tell us in *what case* it will require a miracle? If Bro. B. knows from experience that man has a *natural* capacity of being rewarded for virtue and punished for vice, and that God does recompense his creatures according to the course of nature, how does Bro. B. know that even the resurrection of the body is not according to the course of nature, and therefore not a miracle? If Bro. B.'s resurrection theory requires a miracle in order to recompense the holy, how could he have thought that it would *not in any case* require a miracle in order that man be recompensed? Therefore, although man has such a natural capacity as not to require a miracle in any case, in order to his being recompensed, yet he does require a miracle in order to his whole being being recompensed. Such I understand to be the dilemma in which Bro. B.'s theory involves him.

But why does it so involve him? I answer, that it is necessitated by Bro. B.'s view of the resurrection of the body. Bro. B. assumes, that such is the nature of the resurrection of the body, as thus to require a miracle for its accomplishment. And yet Bro. B. assumes the transit of the soul from time to eternity without a miracle, and even that the soul can be fully recompensed in eternity according to the course of nature, and not by miracle. Can Bro. B. show that there is any more necessity of a miracle in the one case than in the other? As Bro. B. has assumed, that man has a natural capacity, as to his soul, to exist after natural death, and be recompensed according to the course of nature, but that the body has not, I wish he would give us his reasons and proofs.

April 5th, Bro. B. asks me, "How could the body be punished for its transgressions in a future world, *if it should never reach that world,* or how can the body be punished *hereafter,* if it should never be raised from the dead? I will ask Bro. B., how the soul could be recompensed in a future state, if it should not reach that state; or be recompensed hereafter, if it never rises from the dead? I am well aware, that in the case of the soul, Bro. B. assumes the course of nature as fully adequate; while in that of the body he resorts to miracle. But I think Bro. B. has not proved the last; I must, therefore, wait until he becomes more definite concerning that point.

April 5th, Bro. B. says he is not a little perplexed as to what Bro. G.'s theory of the future life is. I am equally perplexed as to what Bro. B.'s theory of the resurrection is, as well as of the soul in its intermediate state. For he says, "The soul may not be able to put forth its powers in another world and hold intercourse with and gain a knowledge of that world, without some kind of medium by and through which to operate;" and that such medium will be ready the moment that our earthly house of this tabernacle is dissolved. I wish Bro. B. would tell us what that medium is. I think, therefore, as Bro. B. has assumed a miraculous resurrection of the body, it is but right he should so elaborate that point as that we may be able to finally understand what his view is. Does Bro. B. believe in the resurrection of the identical material body which was buried at natural death, or some one of the many different atomic bodies which the soul inherits during its natural life? Or does he believe that when the earthly tabernacle is dissolved, the soul will come in possession of a house from heaven? Or that God will give the soul a body, as it may please him? Or does he believe with Paul, that the body sowed is not the body which shall be, and that there is a spiritual as well as a natural body?

I trust Bro. B. will yet explain himself. I wish to have him give his views fully before I do mine, in order that I may be able to correct my own by his, if I find myself in error. For I can cheerfully accord to my brother more thorough mental discipline, more and deeper research, and a more enlarged experience. And I have entered on this review with an earnest desire to ascertain the truth; and I hereby express my thanks to Bro. B., for the patient elucidation thus far of his views. Let us therefore prove all things, and hold fast the good and the true. I know some are opposed to discussion and investigation. But I also know, that there are many who are seeking after light; and from communications, both verbal and written, I am assured, that the subject under consideration is exciting deep interest. Truth, I admit, is always the same; yet our approximation to a discovery of it is quite relative. Many dogmas of theology, once thought to be immovable as the pillars of heaven, have vanished before the sun of truth. And it would not be a matter of wonder, that many more should experience the same fate. "Lord, open thou mine eyes, that I may see wondrous things out of thy law." S. S. G.

LETTER FROM NATHAN WARDNER.

Shanghae, April 6th, 1855.

To the Corresponding Secretary of the Seventh-day Baptist Missionary Society:—

As Bro. C. informed you, in his letter of last mail, of the re-taking of Shanghae, and accompanying circumstances of much importance, I will only make a few extracts from my journal of later date; though I may repeat some things which he wrote, as I did not see his letter.

On the 19th of February, soon after the city was taken, I went in, and happened round by Ng-hong-jaw just in time to rescue the wife of our next door neighbor. It appeared that a rebel had been found in her house, on which account a party of imperial soldiers were assembled, and had got a chain around her neck, and her hands tied, and had commenced the work of torture, by hacking her hands with their knives, demanding of her to deliver up the treasure, which they supposed was concealed there, threatening, if she did not, that they would serve her as they had done the rebel, taking it for granted that she was either his wife or his accomplice, although her own husband was present, who had just returned from the country, claiming her as his, and pleading earnestly that her life might be spared. She protested her innocence, and declared that this rebel forced his way into her house in spite of her and against her wishes. Seeing they were disposed to proceed to bloodshed, I ventured to interfere, assuring them that I had no disposition to contradict their statements, concerning the truth of which I knew nothing, but that I was acquainted with that family, who had lived there for years before the city was taken, and had never heard anything against them as citizens. As to her being the wife of a rebel, I had nothing to say, further than that her husband stood there before them. That a rebel should take shelter in her house to save his life, was nothing strange, and that it could not be expected that a lone woman could resist an armed man; and that, instead of proceeding upon mere suspicion to add to the sufferings which the innocent people had already endured from the hand of those who had lately held the city, they ought rather to treat them with compassion; that I myself had witnessed the barbarity of the latter, and the sufferings of the former, that were horrible to think of; and entreated them not to imitate the example of such lawless desperadoes by inflicting undeserved suffering upon a defenseless female, who had been so unfortunate as not to be able to get out of the city while their enemies held it. After a little conversation among themselves, they released her, and have not troubled her since.

After order had been restored in the city, the imperialists proceeded to empty all the rebels' coffins, and it is said they found several tens of live rebels thus concealed. Even lifeless bodies were most shamefully treated, doubtless to strike terror into the minds of the people, and also with an idea of tormenting the spirits of the dead, which they imagine linger about the body, and behold what is going on. The poor inhabitants, who had been employed by the rebels as cooks, servants, &c., they punished by hamstringing them, thus rendering them cripples for life. I have seen two who had been thus maimed, one of whom was sitting by the door of the magistrate's office, with his blood yet fresh upon the pavement. His only offense, he said, was cooking rice for a rebel as a means of support.

For a while, when the city was first taken, the authorities distributed rice to the destitute, at different locations. As soon as this was noised abroad, (and such news does not travel very slowly here,) the beggars flocked in by droves from the surrounding country, all pretending to be the unfortunates of Shanghae, each having a sad tale to tell about the rebels plundering and destroying their houses, and how long it had been since they had taken any food, &c., &c. Strange to say, the old beggars who were left in the city, many of whom have appeared to be on the point of starvation ever since we have been in Shanghae, came out alive and as flourishing as ever, though hundreds of the industrious, who were formerly in comfortable circumstances, starved to death.

On the 10th of March, Sabbath, we collected our households and a few of our neighbors at Ng-hong-jaw, for worship. On our way home we met two literary men, to the first of whom I offered a tract, which he scornfully refused, and when his companion accepted it, he turned round and tried to persuade him that it was a bad book. I asked how he could know it to be a bad book without reading it? He made me no reply, but repeated the assertion to his associate, and added, that it taught incendiary sentiments, which were subversive of government. This reminded me of the cold reception we met last winter, in our attempts to distribute tracts in the imperial camps, when we were even refused admittance into some of them. We were told at the time, that the imperialists attributed the insurrectionary movements now going on in China to the influence of foreign books. Should Tae-ping-wong finally fail of success, all toleration of Christianity will most likely be withheld as far as possible, and a bloody persecution follow.

We get but little news of late from the interior. The course pursued by the French in Shanghae, may perhaps be an indication that success is likely to turn on the side of the ruling power, as they are the tool of Catholics, who have their emissaries or spies scattered all over the empire, who of course keep them well informed in regard to facts and probabilities; and it seems always to be their policy to keep or make friends with the strongest party. The last *Pekin Gazette,* however, seems to indicate, that the patriots' power is not destroyed yet, if it is much weakened.

Bro. C. has probably informed you, that I have been repairing the house and chapel in the city, with the view of making it my place of residence, and that I have advanced to him most of the money I have received for my house, to pay up his debts and stop interest. On the 15th of last month, we moved for the tenth time within the last two years. I hope we may be permitted to remain here long enough, at least, to get a little rest. The expense of repairing this house and chapel, exclusive of my time, amounts to about eighty dollars.

On the 17th, Sabbath, we felt a slight shock of an earthquake, accompanied with a peculiar rumbling noise, resembling that of a train of cars.

On the 26th, my teacher, Chong-seen-sang, left, with the expectation of never returning. Consumption seems to be fast sifting out the sands of his existence. He appears to be in a very gratifying state of mind. "Death," he says, "has no terrors for me—my trust is in God; if it be His will that I live, I am willing to live; if not, I am willing to die." He used to speak with tears of the stubborn unbelief and wickedness of his wife and children and other friends, and expressed a hope that, by exhorting them with his dying breath, and showing them that a Christian can die with more resignation, and with more joyous prospects, than a heathen, they might be induced to believe. He was intending to write once more to his American brethren, but his strength failed so rapidly, that he felt the exertion would be too much, and left it for me to express his feelings for him. Although he has formerly shown himself not to be beyond the influence of human infirmities, and has at times caused us much solicitude and sadness, yet I have seen in him stronger evidences of a renewed heart than in any Chinese convert I have yet met with. He is the only one I ever knew to weep over his sins. The assurance I feel of his acceptance with God is a thousand fold reward for my poor labors and light sufferings. The thought that I may one day embrace him on the bright side of Jordan, gives me a thrill of joy which I am sure no monarch's crown could impart.

Since writing the above, I have received a note from Chong, in which he writes as follows: "I have been confined to my bed ever since I reached home. But notwithstanding the pain I suffer, I can clearly realize my sinfulness, and pray to my Heavenly Father for forgiveness. I am at present a little better. *Now,* my wife, my son, and my daughter, unite with me day and night in prayer to God that He would pardon my transgressions and preserve my life. My physician now speaks confidently that I shall not die. I desire you to pray God for me, that my needful wants may be supplied."

Last Sabbath we opened our chapel for the first time for public preaching, but had moderate congregations. Last First-day, Mrs. W. opened her girls' school, with tolerably fair prospects. Her earnest prayers for the last eight years are now beginning to be realized, though the answer has been long deferred. I am making an effort also to start a school of boys at Sea-jaw-du, but it is yet uncertain how I shall succeed. I am also laboring to secure a suitable piece of ground on which to build another small chapel. To me it seems VERY DESIRABLE that we be enabled to preach the word more frequently and extensively than is possible for us to do with only this chapel, located as it is. And now seems the most favorable time for securing building lots.

As ever, yours in the good cause,

N. Wardner.

Explorations in Africa.—Most interesting intelligence has just been received by the London Missionary Society from its devoted African laborer, Robert Moffat, whose enterprise has carried him again far into the interior of the savage continent in which his work lies. Though restrained during part of his journey by the jealousy of one of the chiefs from preaching to the barbarians whom he visited, he still found many precious opportunities of commending the truth to his sable fellow-men, and thousands who never had heard before the name of a Saviour, have thus been invited to the cross. He returned to Kuruman in December last, with his health materially improved, rejoicing in the enlarged field of missionary enterprise which he sees opening in this wide waste region of the world.

JUDGE LYNCH IN JANESVILLE.

From a Business Letter, dated Milton, Wis., July 12, 1855.

If you have not been informed relative to the above, perhaps a brief statement of the facts in the case would be interesting to your readers. On the 16th of June last, a man by the name of Algar was brutally murdered, and robbed (on the road leading from Janesville to Milton) of about six hundred dollars, by a man named David T. Mayberry, who had seen Mr. Algar receive the above sum at Beloit. Mayberry, on pretence of traveling the same road with Algar, asked permission to ride with him, which was granted. Stopping at Janesville, Mayberry purchased a hatchet. They then resumed their journey together, and when about four miles from Milton, Mayberry rose in the buggy and struck Algar three times on the head; then, taking the lines, drove a few rods from the road, and threw him out. Algar revived sufficiently to plead that his life might be spared for the sake of his wife and children, (seven in number;) but his throat was immediately cut from ear to ear, and he was brutally stabbed besides, his pockets rifled, and he stripped of his clothing, and left. Mayberry then, taking the horse and buggy, went to his home in Illinois. He immediately revealed the whole transaction to a Mr. McComb, a supposed friend. McComb informed the authorities, and Mayberry was arrested forthwith. He was then brought to Wisconsin on requisition. The Circuit Court of Rock County being in session, he was put on trial, the Hon. James R. Doolittle presiding; and on the 11th inst. the jury brought in a verdict of guilty. When removing him from the court-house to the jail, an attempt was made by the citizens to kidnap him, (the death penalty having been abolished by the legislature of this state,) but the attempt was foiled, and he safely lodged in jail for the night. On the 12th inst., (to-day,) he was taken to the court-house to receive his sentence, which was confinement in the State's-prison for life, twenty days in each year solitary confinement, on bread and water, also five days in each month. To-day, at two o'clock, he was taken from the court-house, and when he reached the yard, was lassoed by a man on horseback, but the rope was cut by the authorities. Again and again he was re-lassoed, and as often the ropes were cut by the officers; but he was finally wrested from their custody, and hanged on a tree near the court-house until dead. Thus terminated the life of a cruel murderer; and at his death the outraged feelings of the community were avenged, be it right or wrong. A. D. Bond.

THE SUNDAY IN ENGLAND.

A bill to promote "the better observance of the Sabbath," so called, introduced by Lord Robert Grosvernor, has been before the British Parliament, but had to be withdrawn in deference to "the people." It seems that the bill was so framed as greatly to restrict the Sunday amusements of the common people, but not materially to embarrass those who were able to take their amusements in a genteel way. During the week previous to Sunday, June 24th, placards were posted throughout London, inviting the people to visit Hyde Park on that day, and see how the aristocracy keep Sunday. The result was, that large numbers assembled, and when the carriages in which the gentry were taking their airing passed, the occupants were in several instances saluted with groans, and advised to go to church instead of "desecrating the Sabbath" after that fashion. In the course of the following week other bills were posted about the city, inviting another gathering in Hyde Park, on Sunday, July 1st. The assemblage on this occasion was larger than on the Sunday previous—estimated at 150,000. A few carriages appeared, and were received as before. Then upon a large body of policemen rushed from their place of concealment, and after making pretty free use of their clubs, arrested a part of the crowd, and "tranquility was finally restored." Of the transaction, and what followed it, the London *Times* of July 3d has the following notice:—

> The Londoners have thrown out Lord Robert Grosvernor's bill for the Better Observance of the Sabbath, without any of those dilatory proceedings which render Parliamentary deliberations so tedious to the bystanders. We have fallen back upon the customs of our Anglo-Saxon forefathers, who, in the last resort, assembled on some open plain, overruled the resolutions of the notables, and decided without appeal by the acclamations of the whole tribe. *Hyde Park on Sunday was the Champ de Mars of the English race,* and there, in the afternoon of that day, it was solemnly decided that the Sunday bill was not to pass, and that if Lord Robert Grosvenor persisted in running counter to the wishes of the people, *he had better retire for a season into some secluded and rural residence.* To do him but justice, he had the sense, at the eleventh hour, to take the hint in good part, and withdrew the bill. Now, the result obtained has just been as follows: The House of Commons has been driven from a course which they had deliberately adopted by the voice of a mob, and what is worse is this—*the mob were in the right, and the House of Commons in the wrong.* The next point is, that a scene of riot and confusion took place in the heart of the metropolis on a Sunday afternoon, that many of the Queen's subjects were most brutally handled by the police, and all because a foolish lord persisted in pressing on a foolish bill. One might have thought that here was the 10th of April come again, with the exception of the special constables, for no special constable would have accepted a truncheon in such a cause. Finally, incalculable mischief has been done by stirring up jealousies and heartburnings between the various classes of society. Contempt and hatred towards the law-givers pass rapidly into contempt and hatred of the law. A man of discretion and sound judgment would have seen at a glance, that this was not one of the occasions on which men will listen to anything, even to reason.
>
> The bill, however, is withdrawn, as may be seen by our Parliamentary report of last night. Lord Robert Grosvenor admitted that he was "in a most awkward predicament,"—which, no doubt, he is. He went on to say that his measure interfered with no man's recreation or religious convictions, but that, as it had been made the subject of misrepresentation and ridicule, and had caused much irritation, he was desirous of withdrawing it. Lord Robert Grosvenor, if he be a reasonable man, should admit a suspicion into his mind, that perhaps his bill was not exactly calculated to promote the end he had in view, since the persons for whose benefit it was intended revolted so violently against its provisions. Hyde Park on Sunday afternoon was certainly not filled with grateful citizens; on the contrary, not only were loud outcries raised against the particular measure, but indignation was expressed against the order to which Lord Robert Grosvenor belongs. They have him to thank for such a conclusion. The upper classes of this country are quite innocent of any participation in Lord Robert Grosvenor's legislative labors, but the people refuse to examine so closely into the niceties of the question. They only see that the upper classes are making laws which will interfere with their actions and with the exercise of their free will on every Sunday throughout the year. They see, moreover, that the day which they are called on to observe with such Puritanic strictness, is devoted by a very large section of the persons who pass the restrictive laws, to purposes of amusement and dissipation. After all,—and we appeal to Lord Robert Grosvenor's own candor,—must not a Sunday bill stink in the nostrils of an unshaved, hungry, exasperated artisan, who has been debarred from procuring any little comfort on the Sunday, save at hours most inconvenient to him? The best thing which can be done is to leave the question alone altogether—certainly for a time—for the people have been irritated beyond measure by the follies of these Sabbatical legislators. Lord Robert Grosvenor, complains that he does not like to be mobbed and bullied out of his bill; neither do the mob like to be bullied and "Grosvenored" out of their Sunday. One thing we promise him—that if he will leave the mob alone, they certainly will not interfere with him.

"THE FOURTH" AT MILTON, WIS.

Under date of Milton, Wisconsin, July 5th, we find in a Milwaukee paper the following notice of the Anniversary of Milton Academy:

> "The closing exercises of the Academy, and the celebration of the Fourth, passed off quietly and peaceably, and a glorious day it was at Milton. At an early hour the people began to pour into our town by cars and by carriages, and at 9 o'clock the procession extending far through the town marched to the grove, led by the Whitewater Band; and at 10 o'clock the exercises of the Academy commenced, consisting of orations, essays, discussions, and the reading of a paper, which were listened to by not less than 4000 people with profound attention.
>
> "In the afternoon, the audience again assembled, with increased numbers, when, after the reading of the Declaration of 1776, by Prof. O. Allen, of Milton, S. M. Booth, of Milwaukee, delivered one of the very best orations of the day and age, the people all listening with the most intense interest and profound silence. Better order never prevailed in so large an audience."

The following notice of Mr. Booth's address we find in the *Whitewater Gazette*:—

> We cannot give, for want of space, any considerable report of the address, but will content ourselves for the present with a mere outline. The orator based the great obstructions to the welfare and happiness of a country upon the grounds of Ignorance, Intemperance, and Slavery. Under the first division, he laid particular stress upon the support and encouragement of our Common School System, giving it the first place in the care of the State, as the great remedial of ignorance, and consequent protection against crime. Under the second division of his subject, Intemperance, he alluded briefly to its constant increase, laying down the position, that total abstinence is the only temperance, and citing the attention of the audience to the fact, that 300,000 graves are the monumental proofs that the traffic in Liquor is leagued with death, and with hell is at agreement. He said that the principle of Prohibition was recognized years ago by the General Government prohibiting the sale to Indians. On the third head—slavery—Mr. Booth stated, that he should not be governed by what he thought his audience would like to hear, but should say what they ought to hear. Our Government's chief object has been to promote Slavery. That Slavery makes *man*hood *thing*hood. He here entered into an argument in proof of the moral wrong of Slavery, and in connection therewith the political wrong. The doctrine that any State has a right to establish Slavery, he considered rankest heresy. Governments cannot take away the inalienable rights of the people; they can only protect these rights, protect the weak against the strong, the humblest as well as the greatest. He alluded to the fact that the Slave Trade on the high seas is piracy—that kidnapping on the coast of Guinea was the first link, transportation over the sea the second, sale in the southern slave marts the third, and the commerce carried on between the dealers of the South the fourth, in a chain where each successive transaction carried with it all the enormity of crime of the one preceding it, around which church and State have thrown their fostering and protecting power. He discussed the principle of trial by Jury, the boasted right of Americans, and stated that it was fast becoming subverted, by denying to the Jury the right of being judges of the law as well as of fact, showing that if the law was dictated to them by judges, they would not even be judges of fact, and verdicts be compelled upon partial evidence. He closed with a

short but beautiful appeal to the youth, alluding to their bright visions of the future, remarking that experience taught us the fact that wishing would accomplish nothiug—that we must work, be industrious, and with honesty of purpose and integrity of character we could not fail. The address was listened to throughout with earnest attention, and repeated demonstrations by the audience.

The ground was admirably selected, the platform being placed upon the lowest ground. All together, the celebration was worthy of the day it commemorated, and we returned to our home, satisfied that we never passed a pleasanter or more profitable "fourth." We did not see a drunken man in Milton!

ALFRED ACADEMY.

The following is the Order of Exercises at the Eighteenth Anniversary of Alfred Academy and Teachers' Seminary, held on the 4th of July inst.:—

Salutatory Oration,	Mr. J. R. Armstrong.
Salutatory Essay,	Miss I. Sellan.
Declaration of Independence,	Mr. H. C. Johns.
Excelsior,	Mr. J. W. Gillette.
Beauty,	Miss H. E. Scott.
Spirit of the 19th Century.	Mr. R. T. Baker.
The Immutability of Right,	Mr. B. H. Brasted.
Historia, (Spanish,)	Mr. Y. P. Carreno.
Dignity of Labor,	Miss E. Wright.
The Lower Deep,	Miss M. A. Seely.
Difficulties opposed to the Scholar,	Mr. H. S. Almy.
Progress and Claims of this Republic,	Mr. S. A. Holt.
De Antiquis Literatum Monumentis, (Latin,)	Mr. D. D. Waldo.
Slavery,	Mr. A. Wheeler.
Accomplish your destiny,	Miss C. A. Babcock.
Die Vortheile der Freundschaft, (German,)	Miss S. A. Dickenson.
King Alcohol,	Mr. W. V. Perry.
New England,	Mr. S. R. Maxson.
The Student's Mission,	Mr. J. Stillman.
The World's Mirror,	Mr. R. Dennis.
Something New,	Miss L. F. McQueen.
Head and Heart,	Miss J. A. Staunton.
Homeros, (Greek,)	Mr. D. F. Stillman.
Free Schools,	Mr. E. Burdick.
Power of Association,	Mr. J. Walbridge.
Earth and Heaven,	Mr. J. H. Vanallen.
Earth's Pilgrims,	Miss M. A. Fenner.
La Royauti, (French,)	Miss C. Beard.
Europe present and future,	Mr. A. W. Crandall.
Knownothingism,	Mr. D. D. McGibbany.
Learning and Religion,	Mr. T. E. Stillman.
Prepare for the Conflict,	Mr. S. G. Nye.
The combat deepens—on, ye brave,	Mr. D. B. Maxson.
Heroism, false and true,	Miss H. M. Thomas.
Creation's God,	Miss S. A. Brown.
The Rich and the Poor,	Mr. J. B. Cassoday.
Valedictory Essay,	Miss J. A. Maxson.
Valedictory Oration,	Mr. J. W. McNeil.
Address to the Graduating Class,	Prof. Daniel D. Picket.

Open air Preaching.—A correspondent of the *Watchman and Reflector* says that the missionaries of the London City Mission held 1,804 open air services during the last year, at which the average attendance was 102. The attendants were mostly idlers, who but for these services would not have heard the word of God preached.

Greenwich is a place of great resort on Sunday for London pleasure takers, and here the attendance was usually from 600 to 1000 persons. As the congregations were for the most part composed of persons from a distance, the good resulting from these services is not fully known, but many interesting cases have come to the knowledge of the missionaries. Four persons in one family were led to a regular attendance on public worship, and to a deep concern for their spiritual welfare, and cases are known in which females allured their husbands to walk in the park, and thus led them under the sound of the Gospel. Many Roman Catholics have attended these services, and have thus had an opportunity of hearing the pure Gospel.

The audiences have usually been orderly and attentive, these efforts being kindly received, and appreciated by those for whose benefit they are made. Opposition has seldom been manifested, and where it has been offered, it has usually been productive of good, as it has enlisted the sympathies of the people on behalf of the missionaries. These open air services have attracted so much attention, and have accomplished so much good in the two last years, that it is intended to pursue the same course during the present summer.

The Methodists in France.—A Methodist minister laboring in France, after describing, in a letter to this country, the various vexations encountered from the public functionaries, exclaims in bitterness:—

"Can it be well imagined, that such a state of things as I have described, really exists in civilized France—the land of revolutions and a pirations. Alas! this land is still the land of the shadow of death—a land full of infidelity, of Popery, and of irreligion. Hitherto, we, as Methodists, have not suffered to the same extent as our brethren of other societies. But our turn may be near. We had hoped to obtain authorization for our closed chapels, but have been refused. We must proceed, and look up to God. We feel encouraged; and truly, why should we be downcast? We have kind, sympathizing friends abroad, doors of usefulness at home, and, above all, fine spirits, energies, and the eternal arms of mercy and of love around us. Nor dare we flinch nor fly. No, we cannot, and, by God's blessing, we will not! Pray, pray for us, and for France!"

Churches in New York City.—A writer in the New York *Observer* states that there are 29 Baptist Churches in this city numbering 3,383 communicants, 8 Congregational Churches, with 1,050 communicants, 53 Dutch Reformed Churches, with 4,866 communicants, 5 Lutheran Churches, with 3,048 communicants, 35 Methodist Episcopal Churches, with 8,452 communicants, 48 Presbyterian Churches, with 14,947 communicants, and 38 Protestant Episcopal Churches, with 8,160 communicants. This makes an aggregate of 196 Churches, when there should be at least 300, if a place of religious worship were to be provided for all the inhabitants.

Missionary from India.—Rev. Jeremiah Phillips, the first missionary to India of the Free Will Baptist Board, has just returned home on a visit on account of impaired health, after a residence of twenty years in Orissa, in Southern India. In addition to his labors among the Hindoos, he has reduced the language of the Santals to writing, and translated portions of the Scriptures for their benefit. These Santals are supposed to be the descendants of the aboriginal inhabitants of India, who were driven to the jungle by the Hindoos when they took possession of the country, and have never had a written language.

RELIGIOUS INTELLIGENCE.

The Presbytery of New Castle—Old School—have undertaken the establishment of a school for the thorough training of colored men for the ministry, teaching and other departments, to be called the Ashmur Institute. The school is located at Chester County, Pennsylvania, and in the midst of a dense Presbyterian population. A charter conferring ample powers upon the Board of Trustees, has been granted by the Legislature of Pennsylvania. The necessary buildings are under contract, and the Institution will open as soon as these are ready for use.

Sardinia contains a population of a little less than five millions. It is therefore a small kingdom. It has, however, a large ecclesiastical establishment. This, which is popish, consists of 7 archbishops, 34 bishops, 860 cannons attached to bishoprics, and 4,267 parishes. There are 71 Religious Orders, with 604 houses, containing in all 8,563 monks and nuns! The year's revenue of the Church establishment is seventeen millions of francs, or about $3,400,000, and the capital from which it is derived about $80,000,000 An attempt is making to throw off a part of this incubus.

Rev. J. R Graves, editor of the Tennessee Baptist, has lately been mulcted in the sum of $7,500 for the publication of a libel. Mr. Graves states that the article containing the libel was sent to the paper and inserted while he was absent attending a protracted meeting; that he himself never read it until some months afterward, when he heard that a prosecution for libel had been commenced. The prosecutor is a Methodist preacher by the name of Jones, who, it is said, had threatened to break down the Tennessee Baptist.

Gerard Hallock, of New Haven, Conn., one of the editors of the *Journal of Commerce*, has loaned to the New School Presbyterian Church in Nashville, Tenn., twenty-five hundred dollars, at six per cent. interest, for five years, and taken a lien upon the property to secure himself. The sum will enable them to retain their house of worship, and the Southern Aid Society has given them four hundred dollars to aid in supporting a minister.

Samuel McDonald, a wealthy citizen of Baltimore, who died recently, leaving a fortune of $600,000, has bequeathed to the Second Presbyterian Church of that city $8500; to the Maryland Bible Society $2000; to the Baltimore Manual Labor School $1000; to the Maryland Tract Society $1000; to the Maryland Colonization Society $1000; besides various smaller bequests to charitable and benevolent purposes.

The men on board of the frigate Independence, stationed on the Pacific, received an order some time since, requiring them to labor on Sunday. The Chaplain, in one of his sermons, spoke against such labors, and as a reward Commodore Marvin ordered him to desist from preaching. The chaplain, it is said, is coming to Washington to have the question decided.

Rev. I. J. Roberts, for many years a Baptist Missionary to China, claiming to have been the teacher of the insurgents, was dismissed, two years since, from the service of the Southern Baptist Board of Missions, on account of imprudence and misconduct. The late General Convention decided, not only that the Board had acted wisely in dismissing Mr. Roberts from its patronage, but they were only astonished at their singular forbearance in the premises.

The American Sunday School Union has employed for terms varying from one to four months each, no less than 256 student missionaries in the prosecution of its labors; they came from thirty different colleges and seminaries, and through their efforts 909 Sunday schools have been organized, and 1545 others have been visited, supplied with books, or otherwise aided.

There were present at the last meeting of the Mass. Gen. Association of Congaegationalists, several venerable ministers, among whom were Rev. Payson Williston, D. D., aged 91; Rev. T. M. Cooley, D. D., aged 83; Rev. Heman Humphrey, D. D., aged 77; Rev. Dr. Allen, 72; Rev. Dr. Woodbridge, 70.

It is stated that Sir Samuel Morton Peto, the Treasurer of the English Baptist Missionary Society, gives away annually, from his own resources, about $170,000. The greater portion of this is devoted to the building of churches. He must have a large income, and, what is better still, a large heart.

The Baptist Memorial reports three thousand three hundred and sixty-eight baptisms, twenty-five churches constituted, five deaths of Baptist ministers, fourteen new church edifices, and sixteen ordinations, in various sections of the Union, during the month of May.

Vermont must have a remarkably moral and law-obeying population, for it seems that the jails of that State average only three occupants each. Three are entirely empty, two have but one prisoner each, two others have four each, one has six, and another seven.

The total amount of contributions to the American Board from the churches in Boston this year, including the contributions received at the united monthly concert, is $26,488 30. The amount last year was $24,532 13, showing an increase, notwithstanding the dull times, of nearly $2,000.

The Library of Rev. Wm. A. Thompson, late of Port Byron, Ill., has been donated by his widow, Mrs. H. B. Thompson, to Iowa College. It numbers 412 volumes, and is a valuable addition to the library of that College.

The salary of the Professors in the Theological Seminary at Princeton, was fixed at $2200 by the General Assembly of the Presbyterian Church, at its late session in Nashville.

The income of the Toronto University and Upper Canada College, as reported to the Legislature, amounts to $75,200 per annum.

A New Methodist College, it is stated, is to be established in Troy, N. Y., for which $100,000 has already been secured.

Rev. Mr. Parsons has given ten thousand dollars for the endowment of the Biblical School at New Hampton, N. H. The Professorship thus provided for is to be entitled the Parsons Professorship.

The Library of the late Levi Tucker, D. D., over 1000 volumes in all, has been purchased by the Trustees of Burlington University, Iowa.

Kansas.—A dispatch from Kansas, dated July 16th, says that Governor Reeder's Message to the Legislature of Kansas is published. He contends for the right of the people to settle their own affairs, uninfluenced by other States. He says the Territorial Legislature may act on the question of Slavery to a limited and partial extent, and temporarily regulate it in the Territory; shows what laws are now in force; directs attention to a definition of the boundaries of counties and districts and the qualifications of voters; recommends a stringent Liquor Law on account of the Indians; thinks that a light tax only is required. He contends that the preëmptions may be taxed; recommends the immediate establishment of a seat of Government, and announces that the population of the Territory was 3,383 females, and 5,133 males.

The Legislature fixed on Shawnee Mission as the temporary seat of Government. The Governor vetoed the same, when the Legislature passed it over the veto and adjourned to meet at Shawnee Mission.

SUMMARY.

On the 15th of July, between one and two o'clock in the morning, James Thompson, of Braut, Erie Co., N. Y., a farmer in good circumstances, was awakened by an alarm of fire, and discovered his house to be in flames, having been fired by an incendiary in three places. Mr. Thompson—who is an aged gentleman—rushed up stairs immediately on discovering what was the matter, to alarm his daughters, when, becoming overpowered by the smoke, he was unable to return, and himself, his three daughters—Julia, Mary, and Mrs. Elizabeth Carr, with the two little children of the latter—perished in the flames. The ages of the unfortunate ladies ranged from eighteen to twenty-four years. The rest of the inmates of the house, twelve in number, escaped with much difficulty.

On the 16th of July, as the workmen engaged in the erection of the bridge over Ridley's Creek, on the West Chester and Philadelphia Railroad, were about commencing work, the temporary framing gave way, and, falling, carried away the entire superstructure. Five workmen employed on the upper chord, and the foreman and two workmen on the lower chord, perceiving something giving way, sprang for the nearest pier, a distance of fifteen feet. Three escaped uninjured, three were killed, and two are so badly hurt as to leave no hope of their recovery.

A dispatch dated Philadelphia, July 17th, says: The splendid steamer John Stevens, belonging to the Camden and Amboy Line, was destroyed by fire at 2 o'clock this morning, while lying at Whitehall Landing, below Bordentown. The entire woodwork was burned, but the hull being iron, and the machinery, are probably not much damaged. She was the largest and most expensive boat on the river, and was built in 1846. Six persons were sleeping on the boat. The pilot, one deck hand, and a chambermaid, were saved, but three female cooks were lost.

The Romney (Fa.) *Intelligencer*, speaking of the murder of Orndorff by M'Donald, a few weeks ago, in Hampshire County, relates a strange coincidence. M'Donald was robbing Lockmiller's house when Orndoff came up, and he shot him for fear of being detected. Fifty years ago M'Donald's grandfather, near the identical spot, was robbing the house of a Mr. Lupton, when Lupton's three children came upon him, and for fear of detection, he murdered, as he supposed, all of them, but fortunately one lived to testify against him, and he was hung.

We learn from the Indianapolis *Journal*, that a locomotive descending the inclined plane at Madison, Indiana, owing to the wet track, got beyond the control of the brakes, and went down the plane with fearful velocity. When within a hundred yards of a freight train that was standing on the track, the engineer, Samuel Idler, and the fireman, Samuel Bizette, took a desperate leap for life from the flying engine. Mr. Idler was dashed against a switch signal and was instantly killed. Mr. Bizette struck the ground and instantly expired. Mr. E. J. Robinson, a clerk of the Company, who was also on the engine, clung to it, and by the collision with the freight train was shockingly mangled.

The New Haven *Journal* has an account of a horrible death by intoxication in the town of Bethany, Conn. It appears that Mr. David Carrington, of Bethany, being troubled with a disagreeable scent about his premises, made search for the cause, and found behind some brush, in a sitting posture, the dead body of a man in a state of decomposition. It was ascertained to be the body of Henry Collyer, of Woodbury, who left his home on the 4th. He went to the town of Seymour on the morning of that day, where he procured a tin pail filled with liquor, stolen at the distillery of Mr. Chatfield. He was seen grossly intoxicated in the evening, and when found his head was completely immersed in the pail of liquor.

The Whig and the Republican New York State Central Committees, have each issued a separate call for a State Convention of the parties they respectively represent, to be held at Syracuse at noon on the 26th day of September next. The Soft Shells or Administration Democrats hold theirs on the 29th of August, and the Hard Shells hold theirs on the 5th of September. Thus it will be seen that all the great political parties are fairly in the field for the Fall campaign. In addition to these, we shall undoubtedly have a State Convention of the Temperance party, and one of the Free Democracy—together with a State Council of the Know Nothings, the Radical Abolitionists, the Know Somethings and the Choctaws. If the State, therefore, should be unable to form a government next Fall, it is not likely to be from any lack of candidates.

On Saturday week, the Sheriff of Allegany County, G. Benjamin, Esq., was handling a large dog of his, when it suddenly bit him in the hand, and ran off. Being alarmed, Mr. B. applied his mouth to the wound and removed what he could of the virus, by suction. On Monday the dog appeared in Almond, and bit everything in his way. Among the victims was an aged negro, named McClelland, some dozen cows, and as many dogs. The suspense of the bitten individuals must of course be most painful.

A man living about forty miles from Cairo, named Evans, was bitten by a mad dog recently; during his paroxysms five men were unable to hold him, and, in compliance with his earnest entreaties, a number of persons placed him between two feather beds, and smothered him to death.

A little daughter of Dr. Brenna, living at No. 70 State street, New Haven, fell on Wednesday morning, about 6 o'clock, while asleep, from her chamber window, down on the awning of Mr. Tyler's shoe store beneath. George T. Trowbridge, clerk at Thomson Brothers' store, saw her fall, and observing that she did not move upon the awning, ran to her rescue, and found her asleep—as she was when she rolled out of the bed by the open window. Her fall had broken the cloth slightly, but she was entirely uninjured, from a fall of twenty-five feet.

The *American Railroad Journal*, for this week, gives an interesting sketch of the Michigan Southern and Northern Indiana Railroad, and a condensed statement of its present financial condition, adding that it understands, that the Company's forthcoming report, for their fiscal year ending with 30th ult.—as yet unpublished—will contain a proposition to consolidate their several issues of bonds by an issue upon their whole property of $8,000,000.

A dispatch dated Syracuse, Friday, July 20, says: The night express train going west on the Central Railroad, ran off the track at 12 o'clock last night, about three miles west of this place, owing to some villains having misplaced a rail. Mr. Devo, of Springfield Mass., had a shoulder broken; Henry Stearns, the conductor, was badly cut and bruised about the head and face; Mr. Harrison, the engineer, had an arm broken; and a number of others were more or less bruised, but none seriously. The President of the New-York Central Railroad offers a reward of $5,000 for the apprehension and conviction of the perpetrators of this outrage.

A dispatch dated Philadelphia, Friday, July 20, says: Passmore Williamson, a prominent Abolitionist, and five negroes, are having a hearing to day before Judge Kane, in the United States District Court, on a writ of *habeas corpus*. They are charged with forcibly seizing and carrying off, on Wednes day last, a female servant and her two children, the property of Col. Wheeler, of North Carolina, our Minister to Central America, as he was about leaving here for New York.

In Wisconsin the fields give promise of a most abundant harvest. Corn is rather backward, and "sod" corn especially is quite small; but there is ample time yet, with favorable weather, for a large yield. Wheat is nearly ready for the reaper. Oats are also coming forward finely. Potatoes look well. The breadth of grain sown is much wider than we heretofore noticed. Never was there a better prospect that "the garners" of the people will be full to overflowing.

A dispatch dated Oswego, Friday, July 20, says: The steamer America, of the International Line, when opposite the Genesee River this morning, ran into the schooner Emblem, of Wilson, cutting her in two. Five of the crew, including the captain and mate, and one passenger, all of the Emblem, were drowned.

James Myers, the clown, one of the proprietors of Myers & Madigan's Circus Company, met with an untimely death while performing on the slack rope at Geneva a few days since. The ring by which the rope was fastened gave way, throwing him to the ground with so much force as to dash his brains out.

B. S. Garland, of Missouri, the owner of the fugitive slave who was rescued from jail in Milwaukee in March last by a body of men acting under the leadership of S. M. Booth, sued Booth for $1,000, the value of his slave, and has recently recovered that amount. Booth, it will be remembered, was convicted on a criminal trial for having aided in the rescue, and was sentenced to fine and imprisonment, but was released on a writ of *habeas corpus* by the Supreme Court of the State. The suit for damages will very probably be carried up to the same Court on appeal.

We learn from the Hamilton (N. Y.) *Journal* of the 3d inst., that Mrs. Chubbuck died in that village on the evening of the 2d, at the good old age of 70 years. Mrs. Chubbuck was one of a type of women whose passing away we greatly regret—the old-fashioned mother. She was the mother of her who is known to the literary world as Fanny Forrester, and to the religious as the wife of the great missionary to Burmah.

It is said that Hon. Henry S. Randall, of Cortlandville, is engaged in writing a Life of Thomas Jefferson. Valuable letters and papers have been placed in his hands for this purpose by Jefferson's descendants. As no other author has had access to these materials, the work will be looked for with much interest.

A dispatch dated Reading, Pa., Thursday, July 19, says: Arthur Hughes, a special agent of the Post Office Department, arrested yesterday afternoon Adams H. Smith, a clerk in the Post-Office at Richmond, Northampton County, on the charge of robbing the mails. Smith confessed taking one letter containing four hundred dollars, mailed at Stroudsburg for the Easton Bank.

The children of Noah Davenport, eight in number, all met on the 28th June, 1855, at William Davenport's house in Spencertown, Columbia County, N. Y., in the same house where they were all born, after a separation of over fifty years. Their average age was sixty. The house they met in is the same house the father first took for a home over seventy years ago. It has been occupied by the family ever since, and probably will be held by the fourth generation.

The Baltimore *Sun* states that Rev. Mr. Jones, a chaplain in the navy, is the discoverer of the fact that the zodiacal light is a ring around the earth inside the moon's orbit, and probably in the same plane with that orbit. Mr. Jones was on the Japan expedition, and he embraced the occasion to make observations every morning and evening, for two or three years.

Mr. Weaver, of Pomfret, Ct., bought a slave in Cuba, brought him to Connecticut, and set him to work on his farm. Mahedo complained of the hard work to which he was subjected, and gave "leg bail" last week. Mr. Weaver followed him to Killingly, with a writ of habeas corpus, but the people defeated him, and slipped Mahedo off on the "underground railroad."

We hear from Illinois, that the product of wheat in that State is expected to be at least 25,000,000 the present year, which gives a bushel to every inhabitant of the United States—young and old. The largest product of Illinois hitherto has been not more than 16,000,000 bushels.

Messrs. Chas. Spencer and Prof. A. K. Eaton of Canastota, N. Y., are now engaged in manufacturing the first Equatorial Telescope ever made in this country. It is designed for the Hamilton College Observatory, and when finished will be one of the best, if not the best, in America.

It is estimated that this year the crop of wheat will reach the aggregate of 115,000,000 bushels in the United States. In 1850 it was 92,000,000, and last year but 70,000,000. This would give an increase over last year of 45,000,000 bushels.

The heat of the weather was the principal topic of discusion in New York last week. On Thursday the temperature ranged from 90 to 98 degrees, and maintained for eleven hours an average of 94¼ degrees.

Dr Hyndshaw, of Plainfield, N. J. was nearly kicked to death by a vicious horse on Friday, July 14th. He was picked up insensible and for several minutes it was supposed he was dead. The wounds were in the head and abdomen.

On the Vermont Central Railroad, when near Milton, July 19th, the engine of a passenger-train exploded and was completely demolished. Among the ruins, the dead bodies of the engineer and fireman, and Mr. Brush the conductor, were discovered.

Seventeen towns of Chenango County, according to the present census, show a falling off in population for five years of 503. Norwich is the only town that shows an increase.

The President and Faculty of Madison College, Pa., have resigned, and their resignations have been accepted by the Trustees. Difference of opinion on slavery is the cause.

During the month of April the Illinois Central Railroad Company sold 18,660 acres for $250,847; the cheapest kind averaging $12 10 to the acre, and the best averaging $20.

The population of Niagara Falls village, as shown by the Census, is 2,976—an increase within the last two years of about 1,500. Niagara City has 1,365.

The people of Fon-du-Lac have raised $500 for the benefit of Mr. Beaver, who had an arm shot off on the fourth of July by the accidental discharge of a cannon.

Up to noon on the 2d inst., there had been eight deaths by cholera at Lexington, Ky. The fatal cases were all Irish and blacks.

A Protestant lady in St. Louis, with seven of her children, has joined the Hebrew congregation there.

New York Markets—July 23, 1855.

Ashes—Pearls and Pots $6 50 a 6 62.

Flour and Meal—Flour, 7 75 a 8 00 for State, 8 50 a 8 75 for mixed Western, 10 75 a 12 50 for extra Genesee. Rye Flour 7 25 a 8 50. Jersey Meal 4 50 a 4 62.

Grain—Wheat, 1 71 for red Canadian, 1 80 for red New Jersey. Rye 1 30. Barley 1 10 a 1 15. Barley Malt 1 37 a 1 40. Oats, 60 a 63c. for State and Western. Corn, 89 a 90c. for Western mixed. White Beans 3 00 a 3 25 per bushel.

WILLIAM M. ROGERS, Treasurer.

The General Conference.

The Seventh-day Baptist General Conference will hold its triennial session with the first church in Brookfield, Madison Co., N. Y., commencing on the fourth day of the week before the third Sabbath in September next, (12th of the month,) at 10 o'clock, A. M. Introductory discourse by Lucius Crandall; T. E. Babcock, alternate. H. H. Baker, Secretary.

Milton Academy.

Male and Female Teacher's Seminary.

A. C. Spicer, A. M., Principal, and Professor of Mathematics, Natural, Intellectual, and Moral Sciences.

A. Whitford, Professor of Greek and Latin Languages, and Rhetoric.

J. F. Pease, Professor of Instrumental and Vocal Music.

J. F. Wood, Teacher of Penmanship and Book-keeping.

Mrs. S. M. Spicer, Preceptress, and teacher of Modern Languages, Painting and Penciling.

(Other teachers will be engaged as occasion may require.)

Calendar for 1855–6.

First term opens Wednesday, August 29th; closes Wednesday, December 5th.

Second term opens Wednesday, December 12th; closes Wednesday, March 19th, 1856.

Third term opens Wednesday, March 26th; closes Wednesday, July 2d, 1856.

(The school will open, this year, in the New and Spacious Hall just erected.)

Tuition per term of 14 weeks, from $4 00 to $6 00. Music, Painting, and Penciling, extra. Board at the least possible price, not exceeding $2 00. Refer to the principal; Hon. J. Goodrich, President of Trustees; to M. T. Walker, Esq., or to J. C. Culver, Esq.

Magnificent Floral Gift.

SUBSCRIBERS to the "CHRISTIAN DIADEM" for 1855, are entitled to a splendid steel engraving, the ☞ LILLY AND THE ROSE PERSONIFIED, being given *gratis* to all old and new subscribers who send us only ONE DOLLAR, by mail or otherwise.

Six Copies for Five Dollars.

The Diadem is a strictly moral and religious work—designed for the Christian family without regard to any particular denomination.

FIFTY ENERGETIC BUSINESS MEN are wanted immediately to circulate the "Diadem" throughout the Eastern and Western States. To such as can send good references the very best inducements will be given. Address Z. P. HATCH, Publisher, 9 Spruce street, New York. May 24—3m.

The very Book that every body has been Wanting.

The Book for the Parlor, the Book for the Fireside, the Book for the Professor, and the Book for the Non-Professor.

THE RELIGIOUS DENOMINATIONS OF THE UNITED STATES: Their History, Doctrine, Government, and Statistics; with a Preliminary Sketch of Judaism, Paganism, and Mohammedanism. By Rev. Joseph Belcher, D. D., Honorary Member of the Historical Societies of Pennsylvania and Wisconsin, author of "William Carey, a Biography," etc., etc., and "Editor of the Complete Works of Andrew Fuller," "Works of Robert Hall," etc, etc. Large octavo, 1024 pages, handsomely embellished by nearly two hundred engravings.

This invaluable work is rapidly finding its way among all classes of the American people. The clear, comprehensive, and impartial manner in which the learned author treats each and every denomination, is winning for him golden opinions from the highest authorities in the land. The innumerable lively tales and anecdotes of ministers, churches, and laymen, which he introduces with the articles of faith and all-important statistical information, give to the work a life, vigor, and spirit truly delightful. One cannot sit down to it without being convinced that his subject is in the hands of a master, nor rise but with kindlier and more liberal feelings towards the great brotherhood of Christians, under whatever name they bear. Ours is a great, growing, and glorious country, and every family, and every young man, throughout its length and breadth, should have a copy as a text book of all its denominations. Wherever known, it is read, and wherever read, admired. Look at the following from among the very many notices received:

It embodies a vast amount of information relative to the origin, history, and missionary operations of the different religious denominations in this country, presented in a remarkably interesting and attractive manner.—*Rev. John Dowling, D. D., Author of "The History of Romanism," "Judson Offering," etc.*

This is a large and beautiful volume, and will find a cordial welcome in every family.—*Philadelphia Christian Chronicle.*

So far as concerns independence of vision, there can be no question, as Dr. Belcher surveys each sect with the same dispassionate impartiality.—*Epis. Recorder.*

This massive volume embraces a vast fund of information.—*Presbyterian.*

The work is sold by agents, and will furnish a large amount of interesting and valuable information to the families into which it may be received.—*New York Recorder and Register.*

In the account given of the denominations, he is fair, and generally allows them to speak for themselves, as to their history and institutions.—*New York Christian Advocate and Journal.*

It contains a mass of interesting facts and statistics.—*Norton's Literary Gazette.*

Judging from the work, it would be difficult to say what are the religious views of the Editor, so fairly, so dispassionately, so charitably, has he treated each and every sect.—*Philadelphia City Item.*

We presume it will be a standard work in thousands of libraries.—*Littell's Living Age.*

Sold only by agents, to whom certain districts are allotted. For particulars address the publisher,

JOHN E. POTTER,
15 Sansom-st., Philadelphia.

Or, Noyes Spicer, Indianapolis, Ind.

Michigan Southern Railroad Line.

TRAVELERS for Chicago, St. Louis, Kansas, and all points West and Southwest, can obtain through tickets, and all information concerning routes, fare, &c., either by the New York and Erie Railroad, or the New York Central Railroad, by application at the Company's Office, No. 192 Broadway, corner Dey-st., to

JOHN F. PORTER, General Agent.

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c. *Spring Arrangements*, commencing April 2, 1855: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M. For Somerville, (way,) at 5.30 P. M.

The above trains connect at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 1, 4 and 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 6 and 9.45 A. M. and 3 P. M.; Somervill (way) at 6 A. M.

New York and Elizabethport.

Leave New York at 8 and 10 A. M., 1, 4 and 5 P. M.

Leave Elizabethport at 7.15 and 9.10 A. M., 1, 3.15 and 6 P. M. JOHN O. STERNS, Superintendent.

New York and Erie Railroad.

ON and after Monday, May 7, and until further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Dunkirk Express at 6 A. M. for Dunkirk.

Buffalo Express at 6 A. M. for Buffalo.

Mail at 8¼ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Accommodation at 12¼ P. M. for Port Jervis and intermediate stations.

Rockland Passenger at 3 P. M. (from foot o Chambers-st.) via Piermont, for Suffern and intermediate stations.

Way Passenger at 4 P. M. for Newburgh and Otisville and intermediate stations.

Night Express at 5½ P. M. for Dunkirk and Buffalo.

Emigrant at 6 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5½ P. M.

These Express Trains connect at Elmira with the Elmira and Niagara Falls Railroad, for Niagara Falls, at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicago, &c., and with first-class splendid steamers for all ports on Lake Erie.

D. C. McCALLUM, General Sup't.

Miscellaneous.

From "The Crayon."

Wanderings in the Southwest—No. 2.

San Antonio, June 1st, 1855.

I wrote in my last of my arrival at the town of Anaqua, the residence of Mr. Cromwell and family, black and white. Mr. C. is chief magistrate, post-master, and the only free white man in the place, which, with one exception, is the smallest place that I ever saw; that was a town in Georgia, where the cars stopped a moment, and I was unable to institute any comparison, for it was fastened with a padlock. I was glad to find a place where I could sleep under a roof, for it seemed a severe trial to lie down under the open sky on the bare ground, where I had heard there were so many poisonous insects and reptiles; but I had something to learn. The sun had risen before me the next morning, when I strolled down to the San Antonio river. It is here about one half the size of the Guadaloupe, where I crossed it the day before. In other respects, the characteristics are much the same—turbid, winding, with a current of about five miles an hour. Its channel is about fifty feet below the level of the prairie, and the banks, often precipitous, where the water has undermined them, show sand, with a deep black alluvium overlying it, and containing shells of Anodonta, Bulime and Helics of species now living, and found in great abundance on the uplands. I have seen no pebbles or stones as yet in Texas. Grapes of three species I saw growing on its banks, and the pecan tree I saw here for the first time. It is a tree very much resembling the pig-nut hickory of the North, but its branches make an angle more acute, and arched like the elm. Of the elm I saw three species.

I spent most of the forenoon on the banks of the river, shadowed by the mossdraped trees, and lulled by the murmur of the water among the fallen trunks. The cardinal grosbeak showed its scarlet plumage in the light green of the willow that dabbled its leaves in the river just where it took a short turn under a high, thicket-crowned, caving bank. A negro came down with two fish-lines, with enormous hooks, and after baiting them with the entrails of a fowl, he drove the sharpened ends of the poles into the bank, and sat down to wait the result. "What sort of fish do you catch here?" I asked. "Cat, sah." "No other kind do you catch in dis river?" "Oh, yes, sah, buffalo-fish, but dem we don't catch." Soon the fellow drew out a cat-fish, weighing about six pounds, of a species he called a yellow cat, and soon after I helped him with the other line to another of smaller size, which he called the blue cat. The river abounded, he said, in gars and alligators, and no one dared to bathe in it. Mr. C. moved from East Tennessee three years since, is well satisfied with the country, has had less sickness than in Tennessee. He has a very good garden, and his table at dinner was well supplied with peas, beans, and beets, and it was but the fourth of May. He told me that the Irish potatoe, though it grows well, loses its eyes after the third year, and it is necessary to use new stock from the North. He showed me the persimmon tree, which grows here twenty feet high. The anaqua tree bears a berry about as large as a garden currant, and much esteemed for food. These trees grow in clusters on the prairies bordering the streams, in company with the hackberry, are generally of the same height, and unite their tops so close as to appear like one tree with many trunks. These furnish a grateful shade for cattle. Sometimes the oaks are found grouped in this way, and they are all known as "motts" in this country. A little boy brought to me the passion flower (*P. incarnata,*) which seems to be spread widely over the country on the borders of the prairies. The root of a shrub called the Spanish apple was shown to me. It is long and succulent, and may be almost entirely reduced to a paste by pounding. It is much esteemed as an emolient application as a substitute for slippery elm, and I do not doubt could be used as a valuable article of diet for the sick-room. After dinner I resumed my journey. The road led up the left bank of the river, but far enough from it to avoid the ravines and wooded bottoms. The rich, level prairie, is left on the right, and here it is rolling and interspersed with "motts" and trees as tastefully as they could be arranged by Art, and it was so decidedly English that it would not have been difficult to have fancied that I stood on Hampstead heath again, and was looking off towards Highgate.

There are no wild cattle on these prairies; they are all thoroughly domesticated, and are often quite indisposed to get out of your path. The droves of horses, though no less sleek and gentle, seem to have less inertia to overcome. An ass and her hopeful full-grown, burly-headed son, plant themselves by the path, and regard you with a curiosity so green as to make you laugh. I was passing a pond of standing water; the road led along that side of it which had been in more prosperous times its outlet, and I turned my horse's head to go around it. It was the first and the last collection of standing water I have seen in Texas. Alders grew in the mud, on the west side, and black-birds were holding a convocation there, with a solemn white crane (ardea occidentalis,) perched upon a tree in the center as a presiding elder. I thought of an ornithological friend in New York, who wished the skin of that very bird, and was sorry it was so inconvenient for him to get it. Plover were feeding along the margin of the water, and they seemed to know I had no gun; at a ravine, green and smooth, was another assemblage of cattle. I have not seen as many grouse or prairie fowl as I expected, but this is their breeding season, and they have left for parts unknown. The cactus (opuntia) shows itself in the sandy margins of the motts, where the red-ants have prepared the soil for them. As the sun went down, its low horizontal rays threw into relief the undulations of the prairie, with the deeper valleys in shadow running into the sombre green of the river bottoms. I thought I never saw a landscape more harmonious. There seemed to be nothing out of place, not a bush or weed, not a dead leaf or a dry blade of grass was any where to be seen. All was young, strong life, just passing into the "twilight of repose." I could but pass on the brow of a hill and wonder that so beautiful a scene should be without human habitation, and that fire and flood had made it what it was. It was nearly dark when I reached the domicile I had been looking for. It was built like an overseer's house, two cabins under one roof, a popular style in Texas, and one which gives a fine space under cover, yet open to the breezes, and there the table is set. This serves as a general assembly-room. Sometimes it has a floor, oftener not. The proprietor was an old Texan, and his son, now seventeen years of age, was a native of the State. Cotton had been grown in a field adjoining the estate, but it did not turn out a profitable crop, and his attention was directed exclusively to stock, of which he had about two thousand head. He was living with but few comforts, you would say with but few necessaries. In a cabin adjoining the one I have mentioned, a wretched hovel, lived a large family of blacks, and in the evening the males danced a "break-down" for our amusement, while the females, made visible by the flame of a small fire on the heath, sat on the ground, not seeming to take any interest in the "fun." When I rose the next morning, a heavy fog enveloped the place. I saddled my horse, and, waiting for breakfast, took a look at the premises. Two black pigs, a strutting turkey, and an old calico dress, were in the yard, and some fine peach trees in the garden, with an acre or two of thrifty-looking corn beyond. They had not attempted to raise garden vegetables.

The fog was lifting from the ground, but the crystal drops were thick upon the grass, when I was again in the saddle. Many deer were near the road, and two allowed me to approach within two hundred yards of them. I left the straight road to follow the windings of the river. I crossed a stream of clear water running over a sandy bed, with fragments of rock from limestone beds, which here have been exposed by the running water. My horse took deep draughts, and when he had finished I did likewise. The banks were high, and the trees that grew at the water's edge had masses of rubbish in their tops, borne there by floods. I could not determine so well to-day the course of the river by the trees, for the whole country seemed to be covered with them, and the larger growth of the pecans, poplar, and elms, which grow only along water-courses, were obscured by smaller trees growing on higher ground. It was necessary, therefore, to travel as near as I could by the compass. This brought me again to the bank of the stream I had just crossed. A large turtle with a thin shell (T. Ferox,) paddled with much noise over a wet sand-bar into deeper water, and two black ducks were floating in the shadow of a limestone ledge. The soil appeared not so good, grass was thinner, and flowering plants more abundant, the motts are more numerous and of smaller growth, degenerating into thickets. The carcass of a grey wolf lay in my way. The scenery changed to an oak opening with trees from eighteen inches to two feet in diameter, and from 30 to 50 feet high. I passed a spring, the rocks in which were stained white with sulphur, and around which many doves were gathered to drink.

About half-past ten the sun shone so hot that I was induced to tie my horse by the cabris to the branch of a tree, and lie down in the shade. It was one of those rare occasions which I have seen in Texas, when there was no refreshing breeze, and which, so far as my observation goes, indicates a storm. Not a cloud appeared to move, or a leaf to stir upon the trees; invisible sparrows were singing; I heard the forsaken dove calling in its plaintive note, and the buzz of the horse-fly, that pesty little cosmopolite. A little way off comes an agitation in the grass, and a whirling of the dried leaves. I step out into the miniature whirlwind, and I have to hold my hat on my head; by and by it moves on and dies out, when it is still and fiery as before. As I had designed to dine at Goliad, I was forced to resume the journey, hot as it was. The scenery here loses its prairie character, although the term prairie does not seem to be used in the same restricted sense that it is in many parts of the great valley; but of the general topography of the country, I shall write in future. The surface is more rolling, limestone crops out of the hill-sides, whose surfaces are covered with scrubby bushes eight or ten feet high, thorny, small leaved, and of a great variety of forms. Among them, I saw one which bears a berry in color like the red currant, and of a very agreeable flavor; they crowd the branches in umbells, and are gathered by placing a sheet under the bushes and beating them. Its leaves are prickly, like the holly, and its wood is a fine yellow dye. On a hill commanding a view of the old city and mission buildings, and a region of country many miles in extent, stands the newly-erected academy. Here I saw the first muskeet trees, which form so important a feature in the landscape of western Texas. It appears to be an accacia, closely resembling the thorny locust in foliage, being thin, and of a light green, but the branchlets were drooping like a willow. It branches low, and is generally deformed by prairie fire or storms. It is very brittle, but is said to be almost imperishable by decay. It is rare to find it exceeding a foot in diameter, but in favorable localities it will attain twice that size. Goliad, the new town on the left bank of the San Antonio, has a very thrifty appearance; the houses are mostly built of a yellow sand-stone, containing lime. But little attention has been paid to the cultivation of the ground, and few of the houses have gardens attached. I stopped at the only hotel in the place. The county court was sitting, and at the moment of my arrival, were at dinner, so that I waited for the second table. I did not wait long; the company soon filled the porch where I was sitting. A more motley company could hardly be imagined, and costumes to match—silk stove-pipe hats, black Kossuth hats, white ditto, straw, palm-leaf, and Panama, and no hats; one lights a cigar, another a pipe. A huge fellow with black broad-brimmed hat, and hickory shirt all unbuttoned, and blue cotton pants well buttoned, is saluted as judge; he turns around, exposing a bronzed face, neck, and bosom, and takes out a large double edged knife, with which he proceeds to pry the venison from between his teeth. There was something in his *tout ensemble* that excited my admiration. Quite otherwise was it with the man who addressed him, a miserable caricature of gentility, who had not sense enough to see that all his affectation of professional dignity, and his offcast costume of conventional life, were entirely out of place.

The dinner table was well supplied with meats, but there were no vegetables.

I left Goliad with the intention of reaching a house nine miles distant, where I could pass the night. I was soon after joined by several men journeying the same way, and had gone about seven miles through a charming rolling country, with rich grass and frost-oaks, when my companions stopped by a log cabin, with a fine corn-field adjoining. I inquired how much further it was to the terminus of my day's journey, when they told me that I had taken the wrong road, that this was the "settlement road," and that I must return. I inquired whether I could not find my way by striking a given course. I could, in about four miles, reach the San Antonio road by a direction which he indicated with his hand. The sun was about an hour high, and clouds were rising from the west to meet it. I rode fast through a country where there was no obstruction, over hills and through valleys which vied with each other in beauty, and only deviated from the direction given, to avoid the branches of the oaks, until it began to grow dark, and flashes of lightning alternated with the rumble of the threatening storm. I thought I had gone twice the distance required to find the road, but I had seen no traces of man. I saw cattle, but they were astonished to see me there, and fled with their tails in the air; a herd of deer started up before me, and seemed less wild than the cattle; they would allow me to get near them, and running a few rods, would face about and present a front of bristling horns, and again I would see a line of white tails bobbing in the gloom. I was convinced, that by following the direction of the clouds when other things failed me, I had lost my course. The storm had shifted more to the west, it grew very dark, and the frequent flashes of lightning only blinded me. I dismounted, and led my horse, in order that I might not pass the road, until it began to rain. I had thought of the contingency of being compelled to spend the night alone in the wilderness, but now the necessitiy was upon me in its most appalling form.

I could no longer distinguish the road if I were crossing it. I found a small muskeet tree, to which I made the horse fast, and stripped him, for which he was very grateful, and rolled himself upon the grass. I cut off the ends of the branches, and drew the saddle-blankets ever the tree, and, placing the saddle in the crotch, I mounted it, and for a moment felt that I was well protected from the rains above and the wolves below; but I was soon made aware that it was not a position for repose, it was but a prolongation of the labors of the day, while the woolen canopy made it oppressively warm. Something stung me on the leg, and I crushed the offender, which I think was a cantharis, for the crushed insect retaliated by blistering me the next day, wherever it touched my skin in its descent, as thoroughly as could be done by the official preparation. I endured my position as long as possible. I could hear no sound of wolves, nor the growl of a panther, and the rain did not come very hard, while the thunder and lightning grew more distant; at the same time I felt that over-powering tendency to sleep that made it imperative upon me to lie down; so I spread the blanket upon the ground, placed my saddle for a pillow, and fell asleep listening to Pelicano cropping the grass. Once he awaked me by lying down too familiarly near me; all was silent but the sound of the mocking bird, and I thought I never heard any thing so melodious, as it warbled on in the still night, while the stars were shining out where the dark clouds had been. It was cooler, and I wrapped my coat close about me and laid down again. In the morning, I found that I had crossed the road, and a Mexican cart had stopped for the night not far off. I lost that night my fear of "camping out" alone, and I prefer to do so now to staying in the houses of the settlers.

Remainder of No. 2 next week.

Texan Staple Productions.

A letter from a sojourner in the Lone Star State to a friend at the North, gives a glowing description of the natural productions of that favored region—camp and traveling life must there be delightful—more particularly to one the least bit nervous. The letter says:—

"Texas is the paradise of reptiles and creeping things. Rattle and maccasin snakes are too numerous even to shake a stick at; the bite of the former is easily cured by drinking raw whiskey till it produces complete intoxication; but for the latter there is no cure. The tarantula is a pleasant institution to get into a quarrel with. He is a spider, with a body about the size of a hen's egg, and legs five or six inches long, and covered with long, coarse black hair. He lies in the cattle tracks, and if you see him, move out of his path, as his bite is absolutely certain death, and he never gets out of any one's way, but can jump eight or ten feet to inflict his deadly bite. Then there is the centipede, furnished with an unlimited number of legs, each leg armed with a claw, and each claw inflicting a separate wound. If he walks over you at night, you will have cause to remember him for many months to come, as the wound is of a particularly poisonous nature and is very difficult to heal. The stinging lizard is a lesser evil, the sensation of its wound being likened to the application of a red hot iron to the person; but one is too thankful to escape with life to consider these lesser evils any annoyance. But the insects! flying, creeping, jumping, running, digging, buzzing, stinging, they are every where. Ask for a cup of water, and the rejoinder in our camp is, 'Will you have it with a bug or without?' The horned-frog is one of the greatest curiosisies here, and is perfectly harmless. It has none of the cold, slimy qualities of his northern brother, but is frequently made a pet of. Chameleons are innumerable, darting over the prairie in every direction with inconceivable swiftness, and undergoing their peculiar changing of color, corresponding to the color of the object under which they may be. The woods on the banks of the bayous are perfectly alive with mocking birds singing most beautifully, and feathered game is abundant and very tame, as it is scarcely ever sought after. The only varieties that I have seen are the quail, partridge, snipe, mallard, plover, and prairie hen."

Poultry Manure.—The horticulturist cannot value too highly the droppings of poultry. For the past two or three years I have tested fully its properties, and feel satisfied that one bushel of poultry manure mixed with plaster, and used as a top dressing, is equivalent to ten bushels of stable manure put into the ground in the usual manner. It is particularly valuable for onion sets, as well as for almost every other garden vegetable. My process for its use is this, I dig and plant my seed, and in course of a few days, or about the time I think the seed is beginning to germinate, I take the manure, previously mixed with a small portion of plaster, and put it upon the hills or beds containing the seed. By the time the shoots come up the manure is in a proper state for working, it having decomposed by losing much of its ammonia, and I find it requires less labor to keep the ground loose than when not used, to say nothing of its effects upon vegetation, which are incalculable. The season for saving this manure is now at hand, and I feel satisfied that if once tried it will never be abandoned, if the manure can be had. [Am. Agricul.

First Impressions of a Dance.

A correspondent of an exchange describes his impressions on witnessing for the first time the performances of a dancing party. When a youth of fifteen, he stopped at a hotel in Rhode Island, after a fatiguing day's ride, and put up for the night. Having seated himself at the fire, he heard a thumping sound in a distant part of the house, and his curiosity was excited to ascertain the cause. Opening the door which led into a long entry, he observed a light at the farther end, whence the noise seemed to issue. Proceeding slowly to the door, it presented a spacious apartment, in which, he says, I noticed several elderly gentlemen, and a few matrons, but by far the largest portion were young people of both sexes. The thumping ceased just before I arrived at the door. They were all well dressed, but seemed to be doing nothing in particular, and were sauntering about in clusters, in a sort of careless, undervoice conversation. As I was a stranger and greenhorn, no one seemed to notice me as an intruder, and I was therefore inclined to tarry until I could learn the object of the assemblage.

At length, a young man, well-dressed, and of respectable deportment, stepped into the center of the room, and stood erect and speechless. While I was looking and momentarily expecting some dexterous feat, a young lady, beautifully costumed, walked deliberately towards him, and halted when about six feet from where he stood. They stood facing each other, and exchanged significant glances for the space of about two minutes, when, suddenly, the young man sprang up some twelve or fourteen inches into the air, and while up and descending, shook the right foot violently. Scarcely had he reached the floor when the young lady, forsooth, springing up about half the distance, shook her right foot alse, violently, as if stung by a hornet. He then jumped up and shook his left foot, and the lady did so too. Well, thought I, she is a match for you. They both ran backward, say about half a rod apiece, and then ran towards each other so rapidly as created anything but pleasurable sensations, as I apprehended a smash-up. They stopped when about three feet from each other, and after a momentary look of reciprocal defiance, they simultaneously sprung up and shook both feet, and striking the floor together, jarred the whole house. My curiosity was on tiptoe to learn what was next. They next whirled round on the left heel and stood facing each other. I said to myself, I do not see what you have gained by all this exertion, as you stand in the same position you occupied in the outset. Just at this moment a gentleman stepped up to the door; I asked him if he could tell me what all this was done for. He answered, "*It is because Cato sits in the corner of the room, drawing horse-hair across cat-gut!*"

The "Great Eastern" Steamship.

A gentleman of this city who visited the ship yard of Messrs. Scott, Russell & Co., in London, has favored us with the following memoranda of the dimensions of the stupendous iron steamship now building at that place for the Australian trade, and is expected to be launched about next Christmas:

The hull measures in length 675 feet; greatest breadth of beam 83 feet; depth of hold 63. The hull even with the upper deck is to be iron plate; and from the keel to eight feet above the water line she will be double, or two hulls, one within the other, leaving 36 inches space between the walls. The hull is built in ten water-tight compartments, 60 feet each, all of iron an inch in thickness, with two longitudinal iron walls extending the whole length of the ship. Her bottom is flat, fourteen feet on either side of the keel. Her capacity by measurement is 25,000 tons; draft 20 feet, and when loaded 30 feet. She has four decks, and saloons to accommodate 600 first class; and 1,800 second class passengers, and 10,000 troops.

Her engine will be of 3,000 horse power, with four cylinders, each of which will require 35 tons of melted metal, and when clean will weigh about 30 tons each; 20 flue boilers, 6 by 30 feet in length. He engines are low pressure, and will give motion to side wheels or paddles, and screw propellor. The engine when put together will be 54 feet in heighth. The weight of her machinery will be about 300 tons, hull 10,000; making an aggregate of about 13,000 tons of iron employed in her construction.

The "Great Eastern" will be rigged with six masts with fore and aft sails, and is expected will be capable of a speed of from 18 to 20 knots—enabling her to make the passage from London to Australia in 30 days, and to return by the way of Cape Horn in an equal time. She is building by a company at an estimated cost of £400,000, or $2,000,000; and when completed will be launched broadside to the water. Her architect is I. K. Brunel, and about 500 men are now employployed upon her in various departments.

[New Bedford Mercury.

The Northwest Passage.

A select committee has been appointed by the British House of Commons, to inquire into the propriety of making Capt. McClure some reward for having discovered the Northwest passage. Up to 1828 there was a standing offer from the British Government of £20,000 to any one who should succeed in solving this long vexed problem. In that year the offer expired, and was not afterwards renewed. Capt. McClure commanded the Investigator, which, in company with the Enterprise, started in January, 1850, in search of Sir John Franklin. They kept together until off Cape Horn, when they parted company. The Investigator in due time passed Behring's Straits, and reached the ice on the 2d of August in the same year, without any tidings of her consort. Captain McClure resolved to proceed, because it was hoped at the time that some tidings of Sir John Franklin and his party might be obtained in the region which he had then reached. He took the Investigator accordingly up Prince of Wales' Strait, and in a sledge reached Banks' Land. Opposite his position at this point lay Melville Island—so that at that very moment the problem of a northwestern passage was solved for all practical purposes. Although the discovery was utterly useless so far as commerce is concerned, it is urged that it has been customary to bestow a reward, either in honor or money, or both, upon all persons who have distinguished themselves upon these perilous expeditions. Sir Edward Parry, who reached 110° west longitude, received £5,000 and knighthood. Sir John Ross was rewarded in a similar manner for his discoveries in Boothia Felix. Sir G. Back was knighted on his return from Hudson's Bay; so was Sir James Richardson. Sir James C. Ross received the same honor for his adventurous expedition to the Antarctic Seas.

Extraordinary Case of Fascination.

About two weeks since (says the Concord, (N. H.) *Patriot*, July 12,) a little girl, near six years of age, named Collista Hill, of Gilmanton Center, was searching for berries in the field, when her attention was arrested by a peculiar singing noise, and on looking up she perceived two large black snakes, one of which was in an erect attitude and gazing fixedly upon her, accompanying its vibratory motions by, as she says, "a most beautiful singing." She first attempted to run, but found herself utterly incapable of doing so. She then looked at the snake until she became so pleased with it that she took it into her lap, and held it until she thought it asleep, and then fled to the house. For a number of days she visited the snake, unknown to her parents, who finally discovered her feeding it from her hands. She continued feeding it every day, becoming more and more attached to it, until it would wind itself about her arms and neck, and even take food from her mouth. Finally, she was prevailed upon to place it in a box, and in that it is still kept, except when being fed. Hundreds in the vicinity have been to see it, and it is the opinion of medical men who have seen her, that she is completely fascinated, and that the death of the reptile would prove fatal to her. Her parents have had many tempting offers to permit her to be taken about and exhibited with the snake, but, though they are poor, they have sense enough to refuse such offers. The snake is over four feet long. We have the above from a gentleman who has visited the girl and received the facts from her and her parents, and of course it may be relied upon as substantially correct.

The Value of Statistics.—Nature seems to have her forces arranged on a sort of averaging system, any over-action at one time in a particular direction, being corrected by counteraction at another. The statistics in relation to the rate of mortality in England, afford a proof of this principle of compensation. Dr. Granville, in the *Medical Times,* states that it appears that the total number of deaths in the cholera year (1849,) for all England and Wales, was 440,839; but in 1850 the number of deaths fell to 368,995, being not only 71,844 less than in the cholera year, but even less than the number of deaths of the year preceding that of the cholera, by as many as 30,833. If we take the deaths of two years together which preceded the cholera, and strike the mean, and treat the year of the cholera, and the compensating year that follows, in the same manner, we shall find that the four years present nearly the same average.... So that in reality, it is found, when the aggregate of the four years is taken, either for the whole of England, or for the metropolis only, that no greater number of people died in those years because of the cholera intervening, than if the cholera had not visited us.

Philopœna.—A correspondent of the Taunton *Gazette* writes from Berlin the following account of this game as practiced among the Germans:—Here, when a couple exchange philopœnas, the object of each is not mainly to be the first to pronounce the common word at their next meeting, but with the exchange, the sport has but begun. The after object of each is to draw the other into accepting some favor, and if that is done, the word philopœna is spoken, and a forfeit required. To illustrate it by example: A and B exchange philopœnas at a party; and a few days after B calls upon A at his or her house. A, instead of waiting to be asked in, enters just before the invitation is given; if offered a chair, takes a seat upon the sofa; if B passes the butter to A at the tea table, A takes cheese instead, and so on—always taking care to accept nothing, but in a quiet way endeavoring to force the other party into the acceptance of some offer on his own side. If at that visit either is successful, he immediately says "philopœna," but if both should always be on the guard, the thing may pass on to a subsequent occasion.

Habits and Character.—Little Habits drive "nails into our coffins." They more than make up in their number what they seem to lack in individual importance. They are true seeds of character. We might as well plant acorns and not expect them to grow, as cherish small vices and not calculate on their increase; or as reasonably hope to see the firm and noble oak where no acorns ever were planted, as true greatness and success in life, where the seedlings of a thousand little habits of industry and virtue had not been first carefully cherished.

In a word, character is a sum of little things, rather than great ones. The true estimate of an individual is not ascertained by his accidental or occasional achievements, but his every day habits. A nation's character is not determined by its famous men, but by the habits of its masses, and the character of the ages by the vices and virtues that were so inherent as to be unnoticed.

In taking bodily nourishment, we examine whether our food be clean and wholesome, and commonly supplicate the Divine blessing; in taking mental and spiritual nourishment, which is far more important than that of the body, we are frequently careless both as to its cleanliness and wholesomeness, and also as to the Divine blessing; how few, for instance, before they read a book, or hear a conversation, think it necessary either to ask a blessing of God, or to examine whether what they read and hear be clean and salutary!

Henry Ward Beecher says: "I never knew an early rising, hard working, prudent man, careful of his earnings, and strictly honest, who complained of bad luck. A good character, good habits of industry, are impregnable to the assaults of all the ill luck that fools ever dreamed of."

Two things to be kept—your word and your temper. The former when dealing with a printer, and the latter when disputing with a woman. This may be difficult, but it can be done by getting a couple of chapters of Job by heart.

New Steamboat Line for Albany and Troy.
From Pier 15, foot of Liberty-st., at 6 P. M.
STEAMER RIP VAN WINKLE, O. W. Farnham, Commander, Monday, Wednesday and Friday, at 6 o'clock, P. M.; steamer COMMODORE, L. Smith, Commander, Tuesday and Thursday, at 6 o'clock, P. M., and SUNDAY, at 5 P. M.

Fares: Saratoga, $1 50; Moreau, $2 15; Fort Edward, $2 15; Whitehall, $2 75; Castleton, $3 10; Rutland, $3; Burlington, $4; Rouses Point, $5 50; Montreal, $7 50.

These Boats will arrive in Albany or Troy in ample time to form connections with all the Railroads, North, East or West, enabling passengers to reach Montreal and intermediate points the same day.

These Steamers are of the first class for strength and speed—well known favorities of the public—having been thoroughly overhauled during the past winter, and offer every accommodation that can be desired by either freighter or traveler.

Through tickets can be obtained on board the boats for Saratoga, Moreau, Fort Edward, Whitehall, Castleton, Rutland, Burlington, Rouse's Point and Montreal.

The Northern Freight Express will give Bills of Lading to all points as above named. Shippers who desire it, can have time receipts, by applying at the office on the Pier. A. A. DYKEMAN.

Ayer's Pills.
A NEW and singularly successful remedy for the cure of all Bilious diseases—Costiveness, Indigestion, Jaundice, Dropsy, Rheumatism, Fevers, Gout, Humors, Nervousness, Irritability, Inflammations, Headache, Pains in the Breast, Side, Back, and Limbs, Female Complaints, &c., &c. Indeed very few are the diseases in which a Purgative Medicine is not more or less required, and much sickness and suffering might be prevented, if a harmless but effectual Cathartic were more freely used. No person can feel well while a costive habit of body prevails; besides, it soon generates serious and often fatal diseases, which might have been avoided by the timely and judicious use of a good purgative. This is alike true of Colds, Feverish symptoms, and Bilious derangements. They all tend to become or produce the deep seated and formidable distempers which load the hearses all over the land. Hence a reliable family physic is of the first importance to the public health, and this Pill has been perfected with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing any thing hitherto known of any medicine. Cures have been effected beyond belief, were they not substantiated by persons of such exalted positions and character as to forbid the suspicion of untruth.

Among the eminent gentlemen who have testified in favor of these Pills, we may mention:

Doct. A. A. Hayes, Analytical Chemist of Boston, and State Assayer of Massachusetts, whose high professional character is endorsed by the—
Hon. Edward Everett, Senator of the United States.
Robert C. Winthrop, Ex-Speaker of the House of Representatives.
Abbott Lawrence, Minister Plen. to England.
†John B. Fitzpatrick, Catholic Bishop of Boston; also
Dr. J. R. Chilton, Practical Chemist of New York City; endorsed by
Hon. W. L. Marcy, Secretary of State.
Wm. B. Astor, the richest man in America.
S. Leland & Co., Proprietors of the Metropolitan Hotel, and others.

These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compounded not of the drugs themselves, but of the medicinal virtues only of Vegetable remedies extracted by Chemical process in a state of purity, and combined together in such a manner as to insure the best results. This system of composition for medicines has been found in Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any process. The reason is perfectly obvious. While by the old mode of composition, every medicine is burdened with more or less of acrimonious and injurious qualities, by this each individual virtue only that is desired for the curative effect is present. All the inert and obnoxious qualities of each substance employed are left behind, the curative virtues only being retained. Hence it is self-evident the effects should prove as they have proved, more purely remedial, and the Pills a more powerful antidote to disease than any other medicine known to the world.

As it is frequently expedient that many medicines should be taken under the counsel of an attending physician, and as he could not properly judge of a remedy without knowing its composition, I have supplied the accurate Formulæ by which both my Pectoral and Pills are made, to the whole body of Practitioners in the United States and British American Provinces. If however there should be any one who has not received them, they will be forwarded by mail to his request.

Of all the Patent Medicines that are offered, how few would be taken if their composition was known! Their life consists in their mystery. I have no mysteries.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject freely acknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many eminent Physicians have declared the same thing of my Pills, and even more confidently, and are willing to certify that their anticipations were more than realized by their effects upon trial.

They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.

Prepared by Dr. J. C. AYER, Chemist, Lowell, Mass. Price 25 Cents per Box. Five Boxes for $1 00.
Sold at wholesale in New York by A. B. & D. Sands retail by Rushton, Clark & Co., and by all Druggists, everywhere.

The Sabbath Recorder,
PUBLISHED WEEKLY
By the Seventh-day Baptist Publishing Society,
AT
NO. 9 SPRUCE-STREET, NEW YORK.

Terms:
$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the time to which they reach.

☞ No paper discontinued until arrearages are paid, except at the discretion of the publisher.

☞ Communications, orders, and remittances, should be directed, post paid, to
Geo. B. Utter, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.
The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

NORTHERN EDUCATION.

Valedictory Oration of the Anniversary Exercises of Alfred Academy, July 4, 1855, by J. W. McNeil, of Mississippi.

It is predicted that the American Republic must fall. We grant that the prediction will be true, if her acts of vice and violence are not checked. In this great political and moral crisis, it behooves men of judgment, and as lovers of right and justice, to look to the eradication of these evils, and her preservation. But all great reforms must have time for completion; they are not the work of months, but of years. And what are the means by which this great reform is to be effected? It has been said, that vice is the offspring of ignorance. But we do not attribute the vices of our country so much to ignorance as wrong instruction. If this is true, which we think no one will doubt, the system of education essential to accomplish this end, must embrace, not the cultivation of the *mental* man alone, but the *moral*. In the elucidation of this proposition, we have chosen for our theme *Northern Education*, as being the embodiment of these two great qualities.

Man has a threefold nature—physical, intellectual, and moral. The moral, which is far superior in its tenuous structure, and which demands our strictest attention, is often neglected in the cultivation of the others. For this reason avaricious men have blighted all moral aspirations, all feelings of sacredness, by overwhelming our country with vice, in order to satiate their voracious passions. The neglect of any one of these fundamental qualities of man, will destroy the beauty and power of the whole. The cultivation of the moral alone, leads to superstition and bigotry; and no class of individuals are so much used against the cause of religion. Yet without moral instruction the highest intellectual attainments become finally allied to infidelity and skepticism, and are only weapons placed in the hands of wild maniacs, who, in their raging madness, pierce their own hearts, and diffuse their poisonous blood through peaceful communities, to pollute all whom it may touch.

Many who have written and spoken on education in its general acceptation, have limited it simply to mental discipline. This, evidently, is not a true education; for, pluck the flower from the violet, and you destroy its beauty; so, likewise, deprive man of his moral principles, and you not only destroy his beauty, but true greatness; and he who relies wholly upon his intellectual powers, will soon be absorbed in the misty doctrines of Atheism; and far better is it to grovel in ignorance, than to grow in immorality equally with knowledge. Hence, any system of education which does not assist in developing the whole nature of man, is, in a certain sense, false; and no system will supply the demands of a true education, unless it contains the elements of freedom, morality, and truth. This we claim for *northern education*; and to those doubting it, we only have to refer to its influence upon northern citizens. For where is there a higher cast of intelligence, of morality, and where are the principles of freedom better understood, and more extensively practiced? But the great and destructive evil of our nation first originated from a misconstruction of Divine revelation, and as the people have become enlightened in the correct and just views of truth, much of this evil, and others of a similar character, have been eradicated. The North, by a superior discernment, discovered one of the grand and principal means of extirpating vice, and therefore established free institutions, and now she proposes to infuse into her citizens the accurate conceptions of morality and truth, and teach them their obligations to God and man. Until this is done, every effort will fail successfully to extirpate error. In the hoary-headed despotisms of the past, the minds and souls of men grow only as the oak would in the rocky depths of the Mammoth cave, deprived of the balmy breezes and refreshing showers so essential to its vitality; and thus it always has been, and always will be, in despotic governments; but free education, unmonopolized by a few, has been the fairest and foremost victim of despotism—the very life-sustainer of our republican principles. For if we were to attempt to adopt the system that has been practiced through all time, and by nearly all nations, our Republic would fly like ashes to the four winds. The strongest ligament that holds her together amid her political broils and feuds, is the morally educated few, who are devoting their whole energies in perpetuating the great democratic principle, "The greatest good to all."

In looking again at this system, we find it not only adapted to the welfare and prosperity of a Republic, but to the natural wants and nature of man. Every man has an intuitive love of freedom. This, like his other powers, is susceptible of cultivation, and in our age, in our country, by the aid of education, it has unmanacled itself, and is now walking forth in new life and freshly-discovered energies. Few nations, however, have succeeded in cultivating this attribute of their nature to any great extent. Greece and Rome boasted of their freedom; Poland flourished a few days in what she called freedom; but they, like the flower crushed by the footstep of the heedless savage, soon faded and passed away. The defects were, that free education never was introduced into their governments, and they continued to obey castes, submit to the delusive doctrines of paganism, and look back with increasing wonder, magnifying through the mysty past the deeds of their ancestors, until they were hurled into the pit of despotism. Every effort at improvement, every effort to carve human equality from its rude quarry and polish it by instruction, was stigmatized by their aristocracy. But Plato has well remarked, that to have a perfect people, we must have perfect institutions; and we add, to have a *free*, energetic, and progressive people, we must have *free* institutions. All history unites in confirmation of this. But we need not refer to the past to prove it. The North, in which all nature sparkles with intelligence, in which the gentle flame of genius sheds down its light, guiding the young to virtue and wisdom, in which the wheels of progress have increased in velocity, until heated with motion; upon whose mountain-tops the banner of liberty is unfurled to the gaze of the world, displaying those significant words *E pluribus unum*,—all these prove that a nation must have free institutions to have a free and perfect people. This is not mere delusion; for who can view the acts of the North without reading her highest aspirations? The bright-eyed boy, from his first dawnings of reason until he arrives to the age of manhood, is taught the elements of freedom, benevolence, love and reciprocity. Imbued with such principles, guided by such lights, the North has never lost sight of the polar star of our forefathers. Onward and upward she has marched, until, arrived at a proud eminence, she is now becoming the university of the world, in which the rich gems of science and literature are free for all, irrespective of color, sex, or age.

Such, my friends, is your condition, such your advantages The hearts and minds that are to regulate your state, your church, and all other affairs, are powerful, being intensely stimulated and supplied with the most formidable means against vice and error. But the time is not far distant when these hoary-headed fathers, who have labored so arduously in constructing this great social and religious fabric, will pass from their stage of action; then who are to take the responsibilities of perpetuating this system of education? Fellow classmates, we are to assume this responsibility; we who have finished our course in this institution, and similar bodies, are to be the conservators of liberty and learning. Then how can we leave these walls, this altar from which a daily prayer has ascended to the high throne of Omnipotence in our behalf; how can we leave these kind teachers, whose countenances bespeak their arduous toil and anxiety for our prosperity and happiness; that one with pallid cheeks and trembling nerves, who has sacrificed himself in building up this great bulwark of our nation, and now, though tottering with disease, still whispers a silent prayer to our Father who is in heaven, that He will enable us to fill our stations nobly as citizens and immortal beings—can we, I say, leave all these without feeling our obligations to God, to man, and to ourselves—without resolving to use our first, our last, and whole energies, in perpetuating this system of education. Then, classmates, let us go and fight the great battles of freedom and progression. The East calls us; the South needs us; the West *demands* us. But as we go, let the leading motives of our actions ever be controlled by a clear appreciation and full conviction of our duty in all stations. Study profoundly and reverentially the Will of God. Let truth be our guiding star, ever remembering that evil is punished and virtue rewarded.

And now, kind teachers, we take our leave of you; but how can we express our emotions on separating? O that I could portray before your eyes our inward feelings, that when we are gone they might be a consolation to your care-worn spirits, and cheer you on in your worthy efforts. But, alas! the noblest powers can give but a faint shadow of our emotions. We now separate, perhaps never to receive another word of counsel, another word of instruction, from you. But be assured, as we go, that your teachings will be our guide to happiness and renown. Should misfortune meet us, we will refer to your examples for guidance. Should prosperity be our happy lot, and fortune smile upon us, our happiest moments of reflection will be when we recall the remembrance of your associations. And, finally, for your assistance in difficulties, for your kindness in times of need, for the patience with which you have borne our imperfections; for all these, we most heartily thank you. Then continue in your noble cause; continue to enlighten and guide the young; and when you are called from this earthly pilgrimage, may you meet with your reward, by receiving a crown of eternal glory. Farewell!

For the Sabbath Recorder.

EVIDENCES OF PERSONAL RELIGION.

"Man, know thyself; all knowledge centers here," is one of the most important pieces of advice ever presented to an eternity-bound creature. To know ourselves is a difficult acquirement, from the fact of there being an unwillingness to look deep enough into our own hearts. The investigation of our real character must be attended with some painful sensations, if that investigation be faithful. Man would fain throw a cover over his moral deformities, even to his own sight. The best of men see enough in themselves to loathe and abhor, and prostrate their souls in the very dust; and the more their minds are enlightened by the Spirit of God, the more they discover the abomination of their depraved nature. Persons of holy living and lovely demeanor are disgusted with the praises of others who can only look at the outer man. These very persons know experimentally the dreadful struggle within, between the two great principles of good and evil. They know the crowds of evil thoughts, desires, and purposes, which rise up in fearful array in the soul, and threaten their downfall and ruin.

After all, however, there is a way of ascertaining what we are in the sight of God. We may fairly recognize the *opposition* to that mass of corruption and abomination rising up in the soul, as one evidence of a divine change. How comes it to pass that there is opposition? Human nature cannot be opposed to itself, any more than the devil can be his own antagonist. The moment we take up arms against the wickedness within, we have an evidence of a principle the very reverse. It may be true, that an individual may refrain externally from those vices to which his vile inclinations would induce him from selfish ends, but a consciousness of inward hatred and opposition to sin, is a far different thing. It is a grief to the renewed soul, that there should be such a vile principle within; hence we find *sorrow* for sin a prominent feature in the Christian character; not the kind of sorrow experienced by the culprit, because his crimes have brought him to justice, and exposed him to a fearful condemnation; but because sin is an evil in itself, being at war with God and his holy government. Why, the revelation of the Spirit to the soul in reference to the supreme and perfect beauties, the Divine glories, the spotless purity of God, must awaken the deepest sensations of grief on account of such an antagonistic principle in existence within. As sure, therefore, as this kind of sorrow is experienced, is the evidence of such a Divine revelation to the soul. As the Christian advances in the Divine life, and still more light breaks in upon him, improving his perceptions of the Divine excellencies, will he see sin as exceeding sinful, and more deeply mourn on account of its indwelling. This sorrow for sin, which we have considered, is not confined to self, though it commences there; for all the manifestations of this vile principle in the world fill the soul with pain and holy indignation. The oaths, the blasphemies, and all the infernal language uttered by the wicked, are so many darts of anguish piercing the heart. A Christian's views of sin, however, are not merely apprehensive of the evil in this light, but its results as it regards the transgressor; and hence we have another evidence of personal Christianity brought before us—*compassion* for a lost and guilty world. This is the natural consequence and a veritable evidence of the possession of a Divine nature. It is the same mind as the Divine Being possesses. It is the same disposition as is beautifully described by the Incarnate Deity, "God so loved the world that he gave his only begotten Son, that whosoever believeth in Him might not perish but have everlasting life." This love could not be the love of complacency, for there were no moral excellencies to love, but the tone of compassion and pity on account of the miserable condition of the human race. A true Christian looks upon the world of mankind, groaning under the curse attached to it, as the natural result of violated law in every shape and degree in this life, and extended on to the future life, where it will fall, with all its terrors and woes, without intermission or cessation; and his soul is moved with the tenderest compassion for his fellow man. This Divine emotion is not a dormant principle in the renewed soul, but develops itself in active efforts to save and bless. Hence, as soon as spiritual life begins in the soul, its possessor enlists his talent and time and influence, and all his energies, in the various departments of labor attached to the church of Christ.

These few remarks may suffice for the present on the subject of Christian evidences, leaving room for extension at a future time. May the Lord help us all to possess a more deep, sound, and practical Christianity.

GEORGE R. WHEELER.

Salem, N. J.

FAITH'S ANSWER.

Still, as of old, Thy precious word
Is by the nations dimly heard;
The hearts its holiness hath stirred
Are weak and few.
Wise men the secret dare not tell,
Still in thy temple slumbers well
Good Eli; O, like Samuel,
Lord, here am I!

Few years, no wisdom, no renown,
Only my life can I lay down;
Only my heart, Lord, to thy throne
I bring; and pray
That child of thine I may go forth,
And spread glad tidings through the earth,
And teach sad hearts to know thy worth.
Lord, here am I!

Thy Messenger, all-loving One!
The errands of thy truth to run,
The wisdom of thy holy Son
To teach and live!
No purse or scrip, no staff or sword;
Be pure intent my wings, O Lord!
Lord, here am I!

Young lips may teach the wise, Christ said;
Weak feet sad wanderers home have led,
Small hands have cheered the sick one's bed
With freshest flowers;
Yet teach me, Father! heed their sighs,
While many a soul in darkness lies,
And waits thy message; make me wise!
Lord, here am I!

And make me strong; that, staff and stay
And guide and guardian of the way,
To thee-ward I may bear, each day,
Some precious soul.
"Speak, for I hear!" make "pure in heart"
Thy face to see Thy truth impart
In hut and hall, in church and mart.
Lord, here am I!

I ask no heaven till earth be thine,
Nor glory-crown while work of mine
Remaineth here; when earth shall shine
Among the stars,
Her sins wiped out, her captives free,
Her voice a music unto thee,
For crown, new work give thou to me;
Lord, here am I! [Religious Mag.

PRESIDENT DAVIES IN LONDON.

In the year 1753, Rev. Gilbert Tennent, of Philadelphia, and Rev. Samuel Davies, then of Hanover, Virginia, afterwards President of Princeton College, visited England to solicit aid for the then new collegiate institution in New Jersey—a mission in which they met with much success. From a manuscript volume containing the diary of Mr. Davies, Dr. Belcher, of Philadelphia, has copied for the *Christian Watchman and Reflector* some passages to show the kind feeling of the Baptists of London towards the College. We reprint the article for the additional purpose of showing the standing at that time of the Stennetts and Robert Cornthwaite, all of whom were Seventh-day Baptists.

Sunday, Dec. 30, 1753.—In the afternoon I preached for one Mr. Dews, who was indisposed, in a Baptist congregation, with some freedom, on Jeremiah 31 : 18—20. It is grievous to see how small the congregations are in this vast city. Spent the evening at one Mr. Edwards', a Turkish merchant, who treated me very kindly. He is a member of the committee for managing the civil affairs of the Dissenters. I find Mr. Stennett, a Baptist minister, has most influence at court of any of the Dissenting ministers. I find it is the custom here for the clerk to choose the psalms.

Dec. 31.—There are so many parties here, that it is very perplexing to us, how to behave so as to avoid offense, and not injure the business of our embassy. The Independents (Congregationalists) and Baptists are more generally Calvinists than the Presbyterians; though I fear some of them are tainted with Antinomianism.

Tuesday, Jan. 1, 1754.—Went to the Amsterdam coffee house, where the Congregational and Baptist ministers meet on Tuesdays.

Tuesday, Jan. 8.—Dined at Mr. Eleazer Edwards', a Turkish merchant, in Devonshire Square, of the Baptist persuasion. There we enjoyed Mr. Stennett's company, and his son's. He is a judicious, prudent, and candid gentleman, and has more influence at Court than any [other] Dissenting minister in London. Mr. Tennent having visited Mr. Partridge, the agent of Pennsylvania, was advised to apply to some of the Court, particularly to the Lord Chancellor, Lord Halifax, and Mr. Pelham, and he seemed inclined to do it; but to me it appeared very doubtful. I was afraid that in case the college should be discountenanced by them, they would find some flaw in the charter, and so overset it; and that a refusal at Court would have a bad influence on those that might otherwise contribute to it. We consulted Mr. Stennett, and he was fully of my mind. He gave us an account of the affair of the Glebe in New England, in which the Episcopal party was cast, after a trial of some hours in the privy council. He also related a conference he had with the Duke of Newcastle, and [the] Archbishop of York, about the Mission of Bishops into America, which was very entertaining, but I have no time to relate such things.

Sunday, Jan. 13.—Mr. Tennent preached for Mr. Gibbons, A. M., and for Mr. Stennett, P. M. I find a good number of people are displeased with his using notes.

Wednesday, Jan. 30.—We waited upon Dr. Gill, the celebrated Baptist minister. He is a serious, grave little man, and looks young and hearty, though I suppose near sixty. He signed our petition, [appeal in behalf of the college,] though he modestly pleaded that his name would be of little service, and that the Baptists in general were unhappily ignorant of the importance of learning.

Wednesday, Feb. 6.—Went to Mr. Stennett's, who went with us to introduce us to the Duke of Argyle, to deliver Governor Belcher's letter. We found eight or ten gentlemen and noblemen waiting in his Grace's levee. His Grace took us into his library, a spacious, elegant room, about forty feet long, and twenty broad, furnished all round with books, philosophical instruments, curiosities, etc. His Grace told us, after reading the letter, that as the College related to the Plantations, we ought first to apply to the Lords of Trade and Plantations; and if they approved of it, he would willingly countenance it, both here and in Scotland. He advised us to apply to Lord Halifax, or Lord Duplin; and Mr. Stennett accordingly went to the latter, while we stayed at a coffee house, and showed him our instructions from the Trustees, and the petition we had drawn up. Mr. Stennett told him that he applied to his lordship in *confidence*; and his lordship assured him that he would do nothing to injure us. He thereupon told him we had our charter only from a Governor, and asked him whether he thought it would be deemed valid in Court. His Lordship replied, that he doubted it; but he would soon satisfy himself, by inquiring into the extent of the Governor's commission; and in case it appeared valid, he would advise us to lay the matter before the Archbishop of Canterbury, and he himself would go with Mr. Stennett to Mr. Pelham in our favor, and so introduce the matter in Court. For my part, I am afraid of all applications to that quarter, lest we should lose our charter, and stir up an opposition; and it is against my mind that the matter has been carried so far. Dined at Mr. Stennett's, who gave us five guineas for the College.

Sunday, Feb. 10.—Preached in a vacant Baptist congregation, who formerly had one Mr. Bently for their minister. They have generally, as I am informed, imbibed some antinomian notions; particularly that no offers of grace should be made to the unconverted, because they are dead in sin, and incapable to receive them. I preached before and after noon on Isa. 45 : 22, with some freedom; but as my sermon was full of exhortation to sinners to look to Christ, I suppose it did not well suit the taste of the people. Dined with good Mr. Savage, who used a very inoffensive freedom in making remarks upon my sermon, which he seemed to think was not sufficiently evangelical.

Thursday, Feb. 14.—Waited on Mr. Stennett to hear Lord Duplin's opinion of the validity of our charter; but he was indisposed, and had not waited on his Lordship. Visited Mr. Brine, a Baptist minister, who is reputed a speculative Antimonian, though a good man. Spent the evening with Mr. Thompson, Jr., [of Clapham] an ingenious young Baptist minister, who, though educated a strict Calvinist, has imbibed the modern latitudinarian principles. I had an amicable dispute with him about the lawfulness and expediency of subscribing tests of orthodoxy besides the Scriptures.

Saturday, Feb 23.—Spent last Wednesday night very agreeably with Mr. Stennett, Jr., an affectionate Baptist minister. Dined last Thursday at Mr. Brine's, a Baptist minister, and a warm advocate for the doctrines of Calvinism, with something of an Antinomian tincture.

Saturday, March 16.—Last Sunday I preached A. M. for Mr. Gibbons, on the words, "So then neither is he that planteth anything," etc., and as I was deeply sensible of the withdrawing of Divine influences, and the inefficaciousness of the means of grace without them, my tender passions were greatly moved throughout the sermon, and in the conclusion burst out into a flood of tears. Sundry of the hearers were tenderly affected, particularly Mr. Cromwell, great-grand-son of the famous Oliver; who gave Mr. Gibbons three guineas for the college after sermon, and thanked me for my discourse with tears in his eyes. He afterwards conducted me to Dr. Stennett's, and talked freely and warmly of experimental religion Dined at Mr. Samuel Stennett's in company with his brother, who is also a minister. Preached P. M. for Dr. Stennett, and my spirits were so exhausted with my forenoon discourse, that I had not much tender solemnity. Spent the evening with Mr. Stennett, Jr., who seems a pious, ingenious youth.

As Dr. Stennett has a great deal of influence in Court, I gave him last night a particular account of the rise and progress of the Dissenting interest in Virginia, and the restraints and embarrassments the people labored under from the government. He was very much moved with the account, and promised me his utmost influence in their favor. He had been yesterday waiting upon the Duke of Newcastle to condole the death of his brother, and told me that it was the most tragical scene he ever witnessed.

Dined to-day at Mr. William Stead's, in company with Cornthwaite, his minister, a Seventh-day Baptist Socinian *minister*.

Tuesday, March 19.—Went to the Amsterdam coffee house among the Baptist and Independent ministers, where I enjoy most satisfaction. Received the thanks of the Governors of the Charity school in Bartholomew Close for my sermon there, which were presented to me in a very respectful manner by Dr. Guyse as their deputy. Though it be hard to repress the workings of vanity, even in a creature so unworthy as I, under so much applause; yet I think my heart rises in sincere gratitude to God for advancing me from a mean family and utter obscurity, into some importance in the world, and giving me so many advantages of public usefulness. Indeed, I hardly think there is a greater instance of this in the present age. Alas, that I do not better improve my opportunities.

Sunday, March 24.—Preached yesterday P. M., for Dr. Stennett, in a small congregation of Seven Day Baptists, who seem very serious people.

[After an absence of several months, traveling in the Provinces, where he generally met with kindness, the worthy man returned to London, and writes:]

Oct. 20.—Since I have been in London, I have moved in the same circle [as before] and nothing new has occurred, but that I find by conversation with Dr. Stennett, there is a prospect of obtaining licenses in the Bishop of London's Court for meeting-houses in Virginia.

Monday, Nov. 18.—We came yesterday to Gravesend. [On his return to this country.] * * * Since Oct. 27th, I have preached for Mr. Hall, Mr. Winter, Dr. Stennett, Mr. Lawson, Dr. Gifford, etc. I cannot but observe, that I found unexpected freedom and solemnity in preaching a neglected old sermon that I thought not worthy of hearing, from Heb. 11 : 1. I have met with so many solicitations, both in conversation and by letters, to publish some of my sermons, that I continue my purpose of finishing some of them for that purpose.

Now, when I have parted with London forever, I cannot but think with affection upon the many friends I have left behind me; who are entitled to my warmest gratitude. I have preached in many of the pulpits of the three denominations, and from the warm approbation of a number, I cannot but hope I have been of some service in that way; though alas, nothing to what might be expected or wished.

The Petition from Virginia [for the increase of their religious freedom,] being returned, I waited with it on Dr. Avery, Mr. Manduit, etc., and communicated it also to Dr. Stennett, and begged he would act in concert with the Committee, which he cheerfully promised. And indeed, I expect more from his influence and zeal than from the Committee, that seem very slow and dilatory in their motions. As the majority of them are of the new scheme, they cannot look upon the Dissenting interest in Virginia as a religious interest, because founded upon principles which they disapprove; and therefore they can only espouse it as the cause of liberty. But a zeal for it in this view, is not so vigorous a principle as in the other. The courtiers are so regardless of religion abstracted from politics, that it will be difficult to carry such a point with them; especially as the whole weight of the government in Virginia will lie on the other side. However, I am in hopes the alternative of taking out licenses in the Bishop's Court, or of presenting the petition, will succeed; and I have begged the Committee and Dr. Stennett to take one or the other method, as they think most expedient.

A PERSONAL SERMON.

Mr. Jay had become aware of a growing evil among his brethren, arising from a cause with which, being familiar, he determined upon rebuking and denouncing. When in the midst of an ordination discourse he said:

My young brother, it is to be regretted that many enter the ministry after they have been educated, to whose services the church has a claim: they look around and select a lady for their wife, but they are careful she possesses a fortune. After a time they begin to get weary in well doing. They take cold, it results in a cough, they are so weak that they cannot attend to the duties of their office. They resign, and live upon their wife's fortune. I know five cases of this kind—may it never be your lot."

During the delivery of this keen rebuke, there was a young minister, or rather an ex-minister, who did not seem very comfortable. After the service was closed, the merits of the discourse were canvassed, and the general opinion was, that it was only such a one as could be delivered by Mr. Jay. Said one to the ex-pastor:

"How did you like Mr. Jay? it was fine, quite a treat, wasn't it?"

"Well, I liked him very well, but I think he was rather personal."

"Personal, eh? how so?"

"Why, you must have noticed his reference to ministers out of health resigning."

"Yes, yes, he was a little close there, I must admit."

"I shall speak to him about it," said the delicate, fastidious ex-minister.

He sought the vestry, and found Mr. Jay there. He congratulated him on his health and discourse, but hinted that he was personal in his remarks, and would like to know if he referred to him.

"Personal?" said the patriarch; "personal, eh! in what part of the discourse?"

"When you were speaking about ministers resigning."

"Oh," said Mr. Jay, "I see; yes, have you resigned?"

"Yes, sir."

"Did you marry a rich wife?"

"Yes, sir."

"Did you have a cough and become disabled for service?"

"Yes, sir."

"Ah! my friend, yours is the sixth case, then!"

This young man reaped the reward of his *folly*, and retired, confused and abashed, from the presence of Mr. Jay.

HOW TO BE HAPPIER.

Said a venerable farmer, some eighty years of age, to a relative who lately visited him: "I have lived on this farm for over half a century. I have no desire to change my residence as long as I live on earth. I have no desire to be any richer than I now am. I have worshiped the God of my fathers with the same people for more than forty years. During that period I have rarely been absent from the sanctuary on the Sabbath, and have lost but one communion season. I have never been confined to my bed by sickness a single day. The blessings of God have been richly spread around me, and I made up my mind long ago, that if I wished to be any happier, I must have more religion."

CHRIST IS ALL.—The following lines were taken from a very old grave-stone in Devonshire, England:

"Christ is the Way, the Truth, the Life Divine;
Seek thou on earth to take the Christ as thine;
For he that lives in Christ, in Christ shall die,
And dwell with Christ in heaven eternally."

To talk well is a gift, just as much as a taste for music is. But fine talkers are seldom good thinkers. They like to float on the surface—not dive into the depths of the sea of existence.

With love, the heart becomes a fair and fertile garden, glowing with sunshine and warm hues, and exhaling sweet odors, but without it, it is a bleak desert, parched and fruitless.

"THE WORLD OWES ME A LIVING."

And how came the world to be so much in debt to you? What did you ever do for it? What mighty favor have you conferred upon it, that it should be obliged to provide for you, the rest of your life? The first man was directed to replenish the earth, and subdue it; and he was promised his living, on that condition. But as for you, it would seem that you consider yourself placed upon a different footing. We never heard of your lifting a finger towards subduing the earth, or improving its condition. You never took a spade in your hand; you never turned up a furrow; you never chopped down a tree; you never dug minerals out of the ground, nor forged them into any useful shape after they were dug; you never instructed the ignorant; and for all we have been able to learn, the world is not one whit the better for your having lived in it. How, then, came the world to be so much in your debt? By what rule do you make out that it "owes you a living?"

We think it altogether likely, that the balance is on the other side. You have drawn your living from the world, thus far, and have done nothing in return. You are the debtor, not the world. Unless you show a better spirit about it, and do a little in the way of discharging the obligation, we venture to say that a very unpleasant reckoning will be had with you, after a while. An idler may pass along smoothly for a season, but at length the world's patience becomes exhausted, and gives him many hard knocks. You will, perhaps, look upon the rough usage which you will finally receive as persecution, and cry out, 'Injustice.' But, depend on it, it will be nothing but the world's way of taking revenge for the useless life you have led. Did you ever know an idler who enjoyed a pleasant, serene old age? 'Kick him out of the way; he has never done anything to entitle him to sympathy, or protection,—is the language of almost every body.

If the world owes you a living, how much does it owe those who are always toiling in works of usefulness? Employ yourself on this question for a while; see if you can work out the answer. Then inquire whether the world, after paying its debts to those who have toiled for its good, will have anything left to provide the living which, you say, it owes you. We think you hazard a great deal; for the world will certainly make its first payments to those who have labored for its benefit.

The truth is, the world has nothing to bestow upon those who will not labor. If you get a living without work, you get it dishonestly. You get it by robbing those whose hard industry has procured for them a surplus above the bare necessaries of life. If you do not rob them, in the sense of downright stealing, you do, nevertheless, what amounts to the same thing. You overreach them by your cunning, or perhaps, by what is commonly called '*sponging*,' you procure your bread here and there. It makes no difference, however, what the process is; you do not earn what you get; somebody else has toiled for it, and you receive it. We call it robbery; you may call it what you like.

We sometimes find fault with those who toil for the things of this world as if their salvation depended on it. They rise up early, and sit up late, and eat the bread of sorrows, that they may amass property. But after all, it takes their surplus earnings to feed and clothe the lazy drones who never contribute anything to the good of society. If every body was engaged in some useful employment, probably two or three hours a day, devoted to labor by each one, would suffice to keep the business of the world moving as actively as it now does. But such is the number of idlers—gamblers, pleasure-seekers, sportsmen, loafers, and the like—that the utmost exertions of those who are willing to work are required to meet the wants of the world. Thus, some are *worn* out by excessive drudgery, while the rest are *rusted* out, and *eaten* up, by their own laziness.

No doubt, you have often uttered this maxim of the idolent man, in a jocular way, without meaning to intimate your belief of it. But experience shows, that exceptionable expressions, often indulged in, come at last to make more or less of an impression on the mind. Many of our young men, who are naturally fond of their ease, accustom themselves to fend off reproof by the use of this maxim, and so continue to indulge their idolent spirit, till it seems as if they really thought the word did owe them a living. Let them remember, that the world merely owes them a chance to live. T. B. B.

SCOTTISH MUNIFICENCE.—We observe, from the proceedings in the Free Church General Assembly, that Dr. Wm. Clark, of Wester Moffat, has placed at the disposal of the church the munificent sum of $100,000 for the erection and endowment of a Free Theological College in Glasgow, provided other parties in Glasgow should provide a similar sum, so that $200,000 should be immediately available for the purpose in view. The subscriptions in Glasgow towards this second sum already amount to $70,000, and the major sum of $200,000 may thus be considered as secure. But Dr. Clark's liberality does not stop here. He offers to pay down or secure an additional sum of $50,000 for the same object, provided a like sum of $50,000 additional should be guaranteed by responsible parties within the next twelve months.

EDUCATION—DISCIPLINARY.

When the young spirit has awaked to the realities of self—its power, its relations, and its destiny—when it begins to turn the reflecting eye within, and perceives its latent powers—when it looks out upon the world as its field of activity—when it begins to look forward to eternity as the play-ground of its deathless power—then it is there is prone to come over the young spirit wild dreamings, vague longings, fitful, wayward activities. The untrained appetites and passions sing their siren song—the sensibilities are keen, propensities strong, reason is weak, experience wanting—and the untried soul is prone to submit passively to the guidance of dream and passion and circumstance.

A spirit thus conditioned, is like a ship in a night of storm—its compass unboxed—its rudder gone—its lights extinguished. It is drifting amid the fitful glare of the moon, the shriek of winds, and the howl of waves, drifting hard upon destruction. All is lost unless the circumstances are speedily changed, new power granted, the light of a new and serene day ushered in. So likewise some celestial fire must be dropt into the wayward soul—some latent power awakened—or all is lost; a new and higher life enkindled, earnest longings after right and truth and wisdom, ceaseless strivings after perfection, implanted.

No one is safe, has started on the sure and right course, until, from strong promptings within, he has firmly, solemnly resolved to improve—*to make the best of the powers God has given him.* With such a resolution, as the energizing, self-impelling principle of our nature—as the bright polar star of our efforts and aspirations—we shall stand up in our manhood, and seek its appropriate culture—we shall have insatiable promptings to improve our nature, our whole being. The primal education of such an one, in order to satisfy the cravings of his being, must not be partial or superficial, or merely professional; but it must be general, thorough, genial and comprehensive. It must be an education that will give health, growth, habitudes—the whole tending to a character, full truthful, symmetrical, individual, and perfect.

Youthful education should be disciplinary, preparatory, restraining, and developing. It should lay broad foundations. It should give a quick and comprehensive grasp. It should be many-sided, versatile. It should develop the full manhood of man. It should prepare a man, not so much to be a successful farmer, or mechanic, or tradesman, or a professional man, as to be a successful *man*—a man developed and perfected—prepared for immortal progress and pleasure. This is the generic idea of education—all others are specific, partial, one-sided. This education must develop the individual, in body and intellect and affections and will, in harmonious and full proportions, giving the candidate a character meet for a higher sphere of activities.

Education, at this period, needs the experience and guidance of able instructors, the genial culture and enthusiasm of schools. It needs theory and practice, precept and example. There must be abundant and self-denying effort on the part of parents, patrons, and teachers, for the advancement, the elevation of educational systems, and the proper instruction of the young. Notwithstanding what has already been done for the elevation of our educational interests, giving them power and importance, yet the great work of educational reform and progress, has but just commenced, and that it may be carried forward in a manner correspondent to its importance, there must be greater exertions than heretofore on the part of its supporters. The friends of education must use their best endeavors to sustain and advance its interests. This advancement can take place, not by partial views and efforts, but it must be the result of a broad and comprehensive system, adapted to the training, the discipline, the education of the whole man, not for any particular time or relations, but for all relations and positions, and for eternity.

CHINESE REVOLUTION.

The following is an extract of a letter written by O. E. Roberts, Esq., of Canton, China, dated March 30th, to a friend in Boston, and kindly furnished for the columns of the *Christian Watchman and Reflector*:—

"Political matters are now quiet, and the people in and around Canton feel very comfortable and safe, which is doubtless a great luxury to them after ten months' of harrassing anxiety and fear of being sacked and murdered. The Mandarins, about three weeks ago, obtained a victory over a large rebel force about twelve miles from here, which had long threatened to attack Canton but failed for want of courage. The prisoners were all beheaded. At the execution yard, a mile from us down the river, seventeen hundred men were beheaded within the past month. Sometimes one hundred, sometimes two hundred in a day, were decapitated. Foreigners can go to see if they choose; I have not chosen yet. A military gentleman stopping with us went down and saw one hundred executed. The poor wretches are carried to the place in baskets, tipped out very unceremoniously, and made to kneel in rows, and the executioners with short swords make quick work of it. None of the people here sympathize with these rebels, for though the authorities are a hard-hearted set, and tyrannical enough, yet these rebels have committed greater atrocities. Murders, conflagrations, and all manner of distress, have been produced by their proceedings; no principle seems to have governed them but the hope of plunder.

The rebels here and at Shanghae have nothing to do with the rebel forces now at Nankin or marching towards Pekin. Those who held possession of Shanghae for eighteen months, were full of all wickedness. They lately evacuated the place, being hard-pressed by famine, and being scattered in small parties, were mostly caught and beheaded. In fact, at Canton and Shanghae there have been no rebellions, but a sort of rising of bad charters for the sake plunder doubtless stimulated thereto by the success of the Nankin rebels, which showed the people the weakness of the goverment. It is still very doubtful how much true religion is mingled in the Nankin rebel movement. I give it that name, because their head quarters are at Nankin, but the vast districts over which they passed are said to have quietly returned to their old allegiance, excepting certain predatory bands, which are plentiful in China at all times. I shall not be surprised if in a few years the whole thing dies away and the country resumes its original state.

"Yet amid all these confusions, a revival, as it may be called, commenced at Amoy, a city on the coast, and some two hundred converts sat down to a communion table not long ago, as a person told me who had just come from there. Yet that city not many months before had been captured and recaptured by the rebels and Mandarins, and men had been slaughtered before the missionaries' houses. When I was there last October, I was shown piles of balls and grape shot that had gone through their houses. The missionaries were obliged to go into the cellars or get behind bales of cotton which the merchants had stored in their houses. This is a vast country, full of sin, ignorance and misery, and when it is ever to be improved, is more than man can tell."

THE PALESTINE MISSION.

Extracts from a letter of Eld. Wm. Jones to the Corresponding Secretary of the Seventh-day Baptist Missionary Society, dated Jaffa, Syria, April 30, 1855.

In regard to the purchase of land. I know nothing only report of any mortgage of Palestine to the Rothschilds. If true, it is not yet believed in this country. I have taken some pains, by request of Mrs. Minor, who has bought, and of Mr. Dickson, who wishes to buy, to inform myself as thoroughly as possible concerning a good title to land. I have spent some hours with Consuls Murad and Kyatt, American and English for Jaffa; both are natives, and are doubtless well posted on this subject. 1st. No foreigner can hold real estate in his own name. 2d. It is said that a firman has been granted by the Turkish government, giving this privilege to foreigners, but for reasons best known to itself, has not become a law. 3d. Foreigners buy land by means of the required sum, the land being given as a pledge—to be redeemed within one, two, or three or four months or more, but which is not expected; still, the deed must be made out in the name of the native. 4th. Land is also bought in the name of the wife; her name being written in the deed as a subject of the government. Sister Minor's is bought in this way. Bro. Dickson hesitates, and is inclined to wait. He is a man of good judgment—an excellent farmer and mechanic—withal pious and intelligent, and has an interesting family. Several foreigners, who are in this indirect way owners of land, inform me that they feel perfectly safe, and consider their title good. All foreigners say the good time coming is not far off, when the government will grant us all the privileges we want.

As to "the ownership of the profits or income from the labor of our missionaries," I would say, if they have fixed salaries, the profits or income belong to the society—that is just and equal.

In regard to the ownership of outfit and salary. I believe both belong to the missionary, though the Secretary has expressed himself otherwise in regard to the outfit, in the *Recorder* of Dec. 14, 1854. See 1st. article, "all property," &c. You say, "Any views you have upon this question we should be glad to learn." But you have already published your views in the *Recorder*, and the terms are there laid down as though there could be no appeal from them. Some of our friends here think our hands are completely tied. I must confess my surprise on reading that Circular. To me it is a new and hard thing, to be told that books, furniture, and property designed for personal use, bought by the Society's money, belong to the Board, and not to the missionary. The Free Mission Society never intimated such a thing to me. Pastors are not so treated by their churches, and I have yet to learn why a Board should exercise more control in this case than a church, or why the right of property is granted to the pastor. but denied to the missionary. If, however, such terms are to obtain as Seventh-day Baptist law, I shall then inquire whether the Board intend to remunerate me for my household goods and library on hand when I entered their service, as also the loss of my life policy; and further, what provision they expect to make for orphans, widows, and superannuated missionaries. I think the just view of the case is this: The outfit and salary of the missionary are his—as also such donations as from time to time may be sent him for his personal comfort—a report of which he should make to the Board. Further, if ever it is his duty to return home, the Board are bound to pay his expenses home, as they paid them in going out. As to taking care of the superannuated, the widow and the orphan, it is a subject in which every minister, at home and abroad, feels deeply interested, but which, however much desired, is not likely to be very soon realized. It has always been my practice to give to the poor; I find this very necessary in this land. All that I receive I wish to use for the glory of the Lord our Redeemer. The foregoing views are expressive of my past action in relation to outfit, donations and salary, and I intend them as a guide for my course in the future.

My expenses thus far have been managed in the most economical manner possible—even in several instances to the injury of my health, especially in my late tour to Jerusalem. Rather than go to a hotel, I took a room where I was obliged to sleep on the cold cement floor, and suffer horribly from bed-bugs. Fortunately, after three nights spent in this way, I succeeded in renting a more comfortable room, furnished with bed and bedstead. Our living for ten days consisted of bread, a very little milk, occasionally a little butter, an orange, or a few dried dates, and sometimes a little broiled meat. I do not state the above by way of complaint. For the time being I never had more blessed seasons of spiritual enjoyment. I could truly say, my meat was to do the will of my Heavenly Father. The experience of the past has taught me something of the sweetness of the expression of David, "The Lord is my Shepherd, I shall not want."

When I forwarded my bills of purchases to the Treasurer, I was not aware that a published account of them was to appear in the *Recorder*. Had I been apprized of it, I should have prepared a statement showing at one view the amount I had spent for myself. In the report of those expenses in the *Recorder*, No. 15, Sept. 21, 1854, I find the following *inaccuracies*, which I have carefully corrected from duplicate copies of the bills, which [the corrected account] I wish the Board to publish in the *Recorder*. "Wardrobe of Bro. Jones and family $191 47;" corrected $178 35. "Passport," supposed to be mine, $5 25; corrected, $4 25. "Boxing goods," $27 59; corrected, $38 71. This includes trunks, repairing do., repairing and making boxes, and furnishing them with hinges and locks, and making them of small size for greater convenience at custom houses, carrying on animals, and domestic use where houses are very destitute of closets and clothes-rooms. It may be interesting to the Board to state, that under the article of "provisions" marked $92 02, my portion was $36 89; that of "household goods," $73 27, my portion was $66 94; that of "books and stationary" $100 97, my part was $61 80.

The cost of food of all kinds has been gradually increasing for some months past. My house rent remains the same as at the first, £25, or 3000 piastres, per annum. But if I occupy this house another winter, I shall have extra expense in repairs necessary for health and comfort. The selection I made in taking this house has proved to be the best I could do for the present. Rents are considered high in Jaffa and vicinity.

My labors and studies do not vary much from those last reported, save that I have less manual labor, and much more to do in the way of conversational preaching in English, French, Italian, and Arabic, and sometimes in German, through an interpreter. I have just returned from an interesting visit to Jerusalem. I left home on the 10th, and returned the 26th instant. While there I conversed with several Jews about the Saviour, the Sabbath, &c., and was listened to with respect. The Sabbath was discussed with three ministers and several other persons, and several tracts distributed. Had a brief interview with Lord Napier, Secretary to the British ambassador at Constantinople, sent him a note and several tracts, and received a polite answer, promising "to read them with all the attention they deserve." May the Holy Spirit accompany the word to his heart.

You will see by my published letters, that the Sabbath is frequently up for private discussion here at Jaffa. I should not be surprised to have an opportunity for its public discussion, or to give a lecture at Jerusalem. Tracts have been sent to different parts in the Mediterranean. A German Jew at J. informed me that some thirty years ago there existed thousands of Sabbath-keeping Christians in Russia, that they had been suppressed, and that six or seven had come to the Holy City, that part had become Jews, and part Episcopalians. I found two Sabbath-keeping Christians—Mr. Kraus and Mr. Johnston—who informed me that there were some in the city inquiring on the subject of the Sabbath. These things are deeply interesting to me, and I doubt not they will be to you. Several appear quite anxious for me to locate in Jerusalem. Although hitherto disinclined to the place as a place for me, I must confess there are many things favorable to such a step. To appearances, there is more of an open door there than I expected to find, and for this I do most devoutly thank God, and pray that I may know what is my duty in the case. I shall be able to write more satisfactorily upon this point after another visit to Jerusalem.

Since I commenced the study of the Arabic, I have labored to great disadvantage for want of a competent teacher. For three months I was destitute of suitable books, but am now supplid. Joseph, the Jew, continues with us as our help for the market, the kitchen, and assistant teacher, chiefly for the pronunciation. From August to November, inclusive, I hired a more competent teacher than Joseph, for one hour per day, five days per week, at one hundred piastres per month. This spring I had three-quarters of a month's teaching from a Mahommedan priest, at the rate of one hundred piastres per month, one-hour per day, five days per week. My text books are a large Arabic Latin dictionary, an Italian and Arabic grammar (of the vulgar language,) and I have the loan of DeSacy's large grammar, in two volumes, in French and Arabic, which I use the most; also a French Arabic grammar, vulgar language. Rev. Mr. Kruse, Church Missionary at Jaffa, and thirty years in the East, lent me these books, and has occasionally given me many valuable suggestions on the language. I could have a competent teacher by going to Beirut, but my salary is not sufficient to incur the expense and carry out other necessary plans for the prosperity of the mission. By dint of personal effort I am acquiring a critical knowledge of the language, and hope ere long to speak it fluently. Having been obliged to pay some attention to the study of Latin, or to revive a former acquaintance with it, I have given but little attention to Hebrew, but to which I now feel it necessary to devote a few months; and to do so more effectually, have concluded to go to Jerusalem for three months, and take lessons of Bro. Kraus, who is reputed to be an excellent teacher. He speaks Hebrew quite fluently, is teacher to Bishop Gobat's son, an Oxford graduate. I am strongly impressed that I shall find an open door for the gospel in that interesting city. Three months' residence there will show more certainly what can be done, and my absence from Jaffa will not materially affect the state of things with our Sabbatarian friends at this post. I take my family with me. As heretofore, so in future, I devote the forenoon of the day to study, and the afternoon to missionary labor. In all my plans, labors and expenses, I endeavor to unite all the experience, wisdom and prudence possible, in order that in all that is done souls may be saved, and God glorified. May the presence of the Lord of missions be with you in your labors of love, uniting and strengthening your hearts and hands to give the bread of life to the nations.

Affectionately and truly,
Your brother in Christ.
WM. M. JONES.

THE WEST.

DOUGLASS, IOWA, July 1, 1855.

To the Editors of the Sabbath Recorder:—

In the *Recorder* of June 21st, I noticed an extract from the letters of F. MOULTON, containing some remarks which I apprehend have a tendency to mislead those wishing to settle in "the great West."

The first questionable statement that I noticed, was that the land was mostly taken in the region of any near settlements. I concluded from this extract, that the writer was traveling through Minnesota, for the purpose of viewing the natural advantages of the country, landing perhaps at St. Paul's, or some landing below on the Mississippi. From this point he goes into the interior as far as he can find staging (or perhaps teamsters) to carry him, stopping at little villages on the route for an hour or two, or perhaps less. Of course his information must be obtained from "mine host," who perhaps is as unqualified to give correct information on this subject as any one in town. If not of the landlord, perhaps he inquires of the driver, who, from the nature of his business, is quite as incompetent; still, all tell him that the land is all taken, perhaps they tell him the truth. But how is it claimed? By the father's claiming a half section (when the law allows him only a quarter) for himself, and marking a quarter section for each son, if he has half a score, and perhaps only two or three of them are of age. But each must have a quarter, and if they do not run to suit his idea of convenience, he takes another "forty." This is the way numbers of worthy men from the East have been "bluffed off," to use a very common but expressive phrase, and have gone back to their homes perfectly satisfied with the adventages of the country, but "the land is all claimed." This is so common an expression, that it has become almost a by-word. The way to find locations is to have a conveyance of our own, and take our own time for it. Foot it through the country, if no other chance offers, which (by-the-by) will give you more advantages in regard to correct information than any other way you can travel. By traveling on foot you will come in contact with those who are better acquainted with the situation of the country, understanding the geographical advantages of different locations, the various streams, and the water privileges found upon them. The residents freely impart their information, being anxious to get in settlers. You will find a majority of "speculators and rogues" locating themselves in or near the villages, ready to pounce upon the stranger, judging sometimes quite accurately, from his general appearance, whether he has or has not been initiated into the mysteries of the West. If they find him "green," they will "sell" him to the extent of their ability. But there is no more need of being swindled by those mock plats of the West, than by the mock auctions of the East.

In regard to disputes about claims, there is no danger of a man's losing his claim, provided he contents himself with the quarter section guranteed to him by law, stays upon it, and improves it. But if he intends to get his living by speculating on claims, he must of course risk his claim.

As to the matter of waiting a year or two in hope that the land will fall below government price, it is in my opinion improbable; claims may be a shade lower. But my advice is not to buy claims, but come and make them yourselves, as there are plenty and good. Yours, E. S. DUNN.

Thirty-six persons joined the Congregational church in Burlington, Vt., on the 1st July. Eleven of them were students in the University. Two were recent converts from Romanism. These are a portion of the fruits of the **recent revival.**

THE NEWSPAPER BUSINESS.

Joseph Medill, Esq., has sold out the Cleveland *Leader*, and has bought an interest in the Chicago *Tribune*. In taking leave of the readers of the *Leader*, Mr. Medill makes the following most truthful remarks on the business of publishing newspapers:—

"It is said that he that putteth on his armor should not boast, but he that taketh it off. In laying down the editorial armor, I will not make it the occasion of boasting; but I may be pardoned for offering a few remarks in relation to the business in which I have been engaged for the past six years. During this time I profess to have acquired a pretty thorough insight into the newspaper business and the state of the craft, and to know something of its difficulties, its labors, and its recompense. The result of my observations enables me to state, as a fact, that publishers of newspapers are more poorly rewarded than any other class of men in the United States who invest an equal amount of labor, capital, and thought. They are expected to do more service for less pay—to stand more sponging and 'dead-heading'—to puff and defend more people, without fee or hope of reward, than any other class. They credit wider and longer; get oftener cheated; suffer more pecuniary loss; and are oftener the victims of misplaced confidence, than any other calling in the community. People pay a printer's bill more reluctantly than any other. It goes harder with them to spend a dollar on a valuable newspaper than ten on a useless gew-gaw; yet everybody avails himself of the services of the editor and printer's ink. How many professional and political reputations and fortunes have been created and sustained by the friendly, though unrequited, pen of the editor? How many embryo towns and cities have been brought into notice, and puffed into prosperity, by the press? How many railroads, now in successful operation, would have foundered but for the assistance of the lever that moves the world? In short, what branch of American industry or activity, has not been promoted, stimulated and defended by the press? And who has tendered it more than a miserable pittance for its mighty services? The bazaars of fashion and folly, the haunts of appetite and dissipation, are thronged with an eager crowd bearing gold in their palms, and the commodities there vended are sold at enormous profits, though intrinsically worthless, and paid for with scrupulous punctuality; whilst the counting room of the newspaper is the seat of Jewing, cheapening, trade-orders and pennies. It is made a point of honor to liquidate a grog bill, but not of dishonor to repudiate a printer's bill."

GERMINATING OF LONG-BURIED SEED.—The New York *Chronicle* states that Rev. A. D. Gillette lately baptized, in the Calvary church, of which he is pastor, two persons, one of whom, a venerable merchant of New York, was a member of Dr. Stillman's congregation, in Boston, ten years, he being at the time a clerk in that city. He refers to words he heard that distinguished man utter in private and in the pulpit, as having deeply impressed his mind with the importance of religion—convictions which he has carried with him to the present time. He says that, in a sermon which Dr. S. preached to the young, at the close he looked over the assembly, and said, "My dear young friends, if you do not early give your hearts to the love and service of Jesus Christ, I shall be obliged to bear witness in the judgment, that you were warned and entreated so to do." Thus the promise has in this case been remarkably realized, "Cast thy bread upon the waters, for thou shalt find it after many days."

THE ACADEMY AT ALBION, WIS.—We have received a twenty-four page "Catalogue of the Officers and Students of Albion Academy and Teacher's Seminary, for the year ending July 4, 1855," from which it appears that the whole number of students in the preparatory course is 45, and in the academic course 100, making a total of 145. T. R. Williams is Principal of the Institution; D. L. Hicok, B. P., Associate Principal; John F. Pease, Teacher of Music; Mrs. Sarah Williams, Preceptress; Miss Eliza O. Merrill, Teacher of French, &c. The course of study set forth in the catalogue is thorough for an institution of the kind. The accommodations in the institution are stated to be ample for 100 students, while an indefinite number can be accommodated in private families.

"**THE MASSACHUSETTS GUARDIAN**" is the title of an industriously-edited and neatly-printed temperance paper just started at Worcester, Mass. Rev. P. Crandall is its editor; H. J. Howland & Co, Publishers. In addition to its own list of subscribers, it proposes to supply the subscribers of the *Independent Journal*, which was suspended a short time ago.

THE MINUTES OF THE WESTERN ASSOCIATION have been delayed in consequence of the copy having been lost or stolen from the pocket of the messenger by whom it was sent. They are now ready, however, and will be sent to the several churches by the first opportunity.

THE THIRD BROOKFIELD CHURCH AND SOCIETY have recently paid to the Treasurer of the Seventh-day Baptist Missionary Society $62 65, being the avails of selling their old meeting-house—a better way of disposing of the money than to put it at interest, or invest it in a new house at the expense of dissatisfaction.

To the Editors of the Sabbath Recorder:

Is the law that was given to the children of Israel, as recorded in the eleventh chapter of Leviticus, binding on us? Would it not be well to discuss this subject in the columns of the *Recorder*? I would be pleased to see a few pieces on the subject.

ONE WHO WISHES TO LEARN.

Alexander Campbell, the founder of the denomination of Christians known as "Disciples," died at New Orleans, June 27th, of a disease of the heart.

RELIGIOUS INTELLIGENCE.

A clergyman in Texas says of that country: We have here an immense field, and we have every thing to begin. Our population is a mixed multitude, from almost every part of the world, and of every variety of character. And they are pouring in with a rapidity unprecedented. We want men and also means. If our friends at the North were sufficiently informed of the real state of things here, they would certainly feel and act differently. They withhold from us the bread of life because we are guilty of living in a slave State! And yet not one in twenty of us owns a slave. A very large portion of Texas is now, and ever must be, almost as free from slavery as Connecticut.

Speaking of Rev. Dr. Babcock's leaving the Secretaryship of the American and Foreign Bible Society, a New York city pastor says in a letter to the *Christian Secretary*: "Dr. B. retires from that office meriting and receiving the gratitude of all true friends of the Society, for the able, efficient, and discreet manner in which he has conducted its affairs during a stormy period of controversy and strife, which has made his duties most laborious and unpleasant often, and secured to himself a large amount of personal odium from the opposers of the Society, which he has not deserved, but which any faithful officer in his position must necessarily have borne."

A correspondent of the *Presbyterian* states that the influence of the King of Prussia is imperative on "the highest authorities under his crown," in the matter of religious persecutions and intolerance. The police are let loose on colporteurs and others, and Christians are doomed to fines and imprisonments for no other reason than because they are more zealous in the service of Christ than their church and State neighbors.

The Methodists of Canada West, at their late meeting, made two important changes in their church policy. They have consented to extend the period of a minister's residence on a circuit from two to five years, in any case where a request to that effect emanates from a quarterly meeting of the circuit. They have also consented to admit an equal representation of clerical and lay members at the annual district meeting of the convention.

The Texas *Baptist* states that Gen. Sam. Houston has deposited as a donation in the Treasury of Baylor University in that State, between $450 and $500 as the avails in part of the lectures delivered by him last winter, while visiting the Northern cities. The remaining proceeds of the lectures when received will probably make the whole amount about $700.

The editors of the New York *Evangelist* have bought up the Syracuse *Religious Recorder*, the Ohio *Observer*, and the Chicago *Evangelist*. Four papers are thus united in one, and the *Evangelist* expresses the hope, that other journals of the denomination will soon see their way clear to add their strength to the common enterprise.

Bishop Doane, of New Jersey, has confirmed more than 600 persons during the last ecclesiastical year, an increase of 40 per cent. over any previous year. Bishop Whittingham, of Maryland, confirmed 953 the last year, more than twice the average number of previous years. The membership of the Episcopal church in Maryland has doubled in fifteen years.

The Bishop of the Abyssinian Church has invited the return of Protestant missionaries to Abyssinia. The King of one of the districts has also written to Bishop Gobat, of Jerusalem, and to the Queen of England, inviting the resumption of missionary labor. The Jesuits have been expelled from the country.

European News.

The steamer Atlantic, with one week later news from Europe, arrived at New York July 25th.

The most important feature in the news is the imminence of another ministerial crisis in England. The difficulty, it is said, is caused by Lord John Russell's insufficient and contradictory explanation, in his speech in Parliament on the 6th July, of his conduct at the Vienna Conferences. He has been unmercifully attacked by the whole British Press, which accuses him of being actuated solely by personal ambition, while the country is in the crisis of a great war. On Monday, the 16th, Sir Edward Bulwer Lytton was to move in the House of Commons, "that the conduct of the Minister, charged with the negotiations at Vienna, and his continuance in office as a responsible adviser of the Crown, have shaken the confidence which the country should place in those to whom the administration of public affairs is entrusted." In anticipation of this debate and the censure that would be hurled at him, Lord John Russell resigned his office shortly before the steamer left Liverpool.

Latest accounts from the Crimea say that the bombardment of Sebastopol has been again commenced. The Redan had been silenced after two days' fire, and the French were about to renew the bombardment of the Malakoff. Against both these fortifications the besiegers were erecting immense works, and another assault within a brief space of time was anticipated. General Simpson, who has now been duly installed in the late Lord Raglan's place, telegraphs that the Cholera was on the decrease.

Several minor places in the Baltic have been bombarded by the British squadron.

It seems that Lord Raglan was several days laboring under a malady which nearly resembled cholera, without having all the symptoms of it; but the physicians, on the very morning of his death, had given it as their opinion, that he was better, and that his state no longer caused uneasiness. His voice had regained its strength; he had been able to eat, and during the day hopes were entertained that his indisposition would soon disappear. Lord Raglan himself said he felt nearly well, but about six in the evening he was seized with a sudden faintness, and without suffering the slightest pain, gradually sank, and in two hours expired calmly and tranquilly. His body will be removed to England in a war-steamer, in charge of his Aides-de-camp, Lord Burghersh, Col. Somerset, Major Kingscote and Lieut. Calthorpe. A mausoleum is being prepared on his family estate.

Lord Raglan's last dispatch was announcing the death of General Estercourt. A postscript by General Simpson, announced Lord Raglan's own decease.

The pensions granted for Lord Raglan's services are £1,000 sterling per annum to his widow, and £2,000 per annum to his son and son's son.

It is positively stated in the English papers, that the Emperor Alexander is in a bad state of health. Consumption is his reputed malady. The same papers used to report that the Emperor Nicholas was insane. Private letters from Russian sources in Belgium deny Alexander's ailment.

The subject of a general exchange of prisoners is in the hands of a Board of French and English officers, in session in Paris.

The Paris *Moniteur* states the total number of deaths from battle and disease in the French army since it left France, thirteen months ago, as 14,200, up to June 1, and the number of killed since then at not more than 2,300—figures manifestly much under the mark.

California News.

Two weeks later news from California, and nearly two million dollars in gold dust, were received in New York, July 25th.

The accounts from the mines continue to be of the most encouraging nature. Tunneling and quartz crushing are being prosecuted with extraordinary activity, and the interior press teems with flattering notices of the discovery of new and rich leads. Every day's experience seems to point out the fact that the placers of California are inexhaustible.

Gold has been discovered near the levee in the city of Sacramento, and many persons have staked out claims there. Eight men took out $197 in one day, and on another over $80. The gold was probably buried there by some miner in the early days of California, and never returned for, and the washing of the river eating away the banks brought it to light.

The flourishing towns of Auburn and Angel's Camp have been entirely destroyed by fire.

The land ordinance, which has been before the Common Council of San Francisco for some months, has passed both Boards, and been approved by the Mayor. The ordinance provides for the quieting of land claims in that city, the city relinquishing her title to all lands under the Pueblo claim, to the actual occupants. A vast deal of expensive litigation is hereby saved the city, and the settlers upon certain lands will live in greater security.

Several exciting meetings have been held by the settlers upon the Boulton & Barron claim in San Francisco, that claim having been confirmed by the Board of United States Land Commissioners.

From Oregon, we learn that the majority for Gen. Lane, as delegate to Congress, is 2,644. The Legislature is said to be largely Democratic. On Sunday afternoon, June 24, the splendid steamer America was totally destroyed by fire in Crescent City Bay, Oregon. Providentially no lives were lost. Capt. Wright, owner of the vessel, on which there was no insurance, has estimated his loss at $140,000. Some excitement had been created in consequence of rumors that gold in great quantities had been found up the Columbia River, in the region of Fort Coville, situated in latitude 48° 15′ north, and longitude 118° west.

Will of Mrs. DeWitt Clinton.—The late Mrs. DeWitt Clinton is said to have bequeathed half her fortune, which was considerably reduced by the great fire in New York, to Mrs. David S. Jones, Governor C.'s daughter, $5,000 to Augusta, a daughter of C. A. Clinton, and nothing to the other daughter, who married a New York gentleman without her consent. Her wardrobe and $1,000 she gave to Miss Cornelia Western, an intimate friend, and the remainder of her property went to her nephews and nieces. The superb vases of silver which were presented to DeWitt Clinton are to be sold, by the will of Mrs. Clinton, which some of her kinsfolk object to, and will prevent it if they can. The gift came from merchants of New York, and the vase was presented in their behalf by Isaac Hone.

Kansas Affairs.—The Legislature of Kansas met at Pawnee and adjourned to the Shawnee Mission. The Governor gave them notice that he should not go to the latter place, and has vetoed all the bills passed there, not because he objects to the bills, but because he considers the removal in contravention of the provisions of the Kansas-Nebraska Bill. Among the bills introduced was one "requiring citizens emigrating from Massachusetts and other States which have annulled or may nullify the laws of the United States, to take the oath of allegiance to Kansas." Another provided that no person be permitted to take a seat in the Legislature without taking an oath to support the Fugitive Slave Law, and that all persons convicted of propagating or in any way circulating contrary sentiments or opinions, be ineligible to any office of honor, trust, or profit, in the Territory. A bill was passed to prevent the sale of liquors and games of chance within one mile of the Shawnee Mission; also, a bill providing that every man who shall pay the sum of one dollar poll-tax, and produce the receipt of the same to Judges at any election, shall be a legal voter, provided he is a citizen of the United States, and has taken oath to support the Constitution of the United States, and the act organizing the Territory of Kansas.

Great Gale at Mariette, Iowa.—Mariette, the county seat of Marshall County, Iowa, was visited by a terrible storm week before last, which blew down ten or twelve dwelling-houses, shops and stores, besides doing a great amount of damage in other respects. One man, whose house caught fire during the gale, and who attempted, with a child in his arms, to reach a neighboring house, was caught by the wind and carried over a mile? His wife, with another child, was fortunate in finding a temporary shelter on the leeward side of a barn, where she stood for hours exposed to a torrent of rain, not daring to venture forth from her hiding place till the wind subsided. One store was blown to atoms, and the goods scattered over the prairie in an easterly direction, for miles. Iron pots, tin kettles, and other heavy articles, were hurled a great distance. The rain in the meantime came down in torrents, threatening in one or two instances to drown whole families, and the accompanying thunder and lightning were so terrific as to make some of the stoutest hearts quail. Our informant, a gentleman residing at Independence, and who passed through this town last week, says that many of the inhabitants came near dying from sheer fright, never having before witnessed any thing a thousandth part so terrible as this prairie gale. [Linn Register.

Committed Suicide to avoid the Pain of Death by Disease.—Mr. Seth A. Curtis, a very worthy, industrious and respected citizen of Gloucester, Rhode Island, hung himself from his bed-post by a skein of yarn, recently. From a deep cut in his neck, and from the fact that his razor lay near by, it is supposed he first attempted to put an end to his life by cutting his throat. The motive of this deed was a dread of suffering in dying. He had been confined for several weeks with a very painful and incurable disease, and during that time his sufferings were almost insupportable, so much so that he frequently requested his physicians to open the blood vessels in his arms, that he might die easy. He said he did not fear death, but dying; he was resigned, and anxious to be gone, but dreaded the agonies which he believed he should be called to endure if he died by his disease, and consequently took this singular mode of escape from them. He was formerly from New Hampshire, but had resided in that State about three years. He was nearly tree score years.

SUMMARY.

The Reciprocity Treaty has given a new field to the Lake fisheries on the Canadian side of Lake Huron. Some 200 American fishermen are now engaged within 50 miles on each side of Goderich, in the business. This has greatly stimulated the Cannucks, and it is estimated 400 of them are now engaged in the same business. About 100 miles of the Lake shore is lined with gill-nets and seines. Every boat that comes in has a large number of salmon trout, from 30 to 50 pounds weight. White fish are very large. The fish caught at Collingwood terminus of the Northern Railway, from Toronto, are packed in ice, and go to Oswego, Rome, Utica, Albany, and New York. Great quantities taken at Goderich, go in ice to Cleveland and Cincinnati.

A gentleman writing to the Cincinnati *Commercial* from Central Illinois on the 16th of July, says: "There was a suicide committed yesterday morning, near Atlanta, by the wife of Wm. Montgomery. She hung herself with a rope fastened to a peach tree. On the day previous she prepared her children's clothes, so that they might be dressed appropriately to follow her to the grave, and before hanging herself, dressed for the tomb. She leaves five small children. She was formerly from Ohio, and her maiden name was Tuttle. No cause was assigned for the self-murder."

Advices received from Santa Fé inform us that Col. Fonteleroy returned on the 28th of June from the pursuit of the Utah Indians. His force overtook a party of them on the head waters of Kansas, killed 40, took five prisoners, 30 horses, and a lot of camp equipage, etc. Major Brooks was killed in the engagement. Notwithstanding the vigilance of the troops, small parties of Indians steal into the settlement and kill and rob at pleasure. Bishop Learny had a portion of his stock run off and the herdsmen killed. A Mexican had been shot by them near Alburquerque. Other instances of the kind had occurred in the Territory.

An event occurred on Thursday, July 26, in Irvington, (late Dearman's,) Westchester County, which has cast quite a gloom over the entire neighborhood. John Thomas, Esq., a wealthy retired merchant, formerly of the firm of Thomas & Franklin, of this City, while engaged in a hay field with his son and a laborer, was struck by lightning—the electric fluid entering his forehead and coming out at the lower part of the abdomen, killing him on the spot, and setting fire to the hay. His son and the laborer were also knocked down by the lightning at the same instant.

Jaques Balmat, the celebrated guide of Chamouni, who was lost in the ascent of Mount Blanc about twenty years ago, while acting as guide to some travelers, was found a few days ago, in a state of the most perfect preservation. The body was immediately conveyed to Chaumouni, where it received every mark of honor and respect. Jaques Balmat acquired some celebrity by being one of the guides to M. Saussure, the naturalist, in the year 1786.

The editor of the Chicago *Times* has recently been shown a specimen of coal, taken from large and extensive beds of that valuable article discovered lately on the banks of the Missouri, near Bellevue. The discovery was accidental, and the mines being on the very edge of the present limits of Bellevue, the importance and value of the discovery may readily be appreciated. The coal is of the very finest bituminous quality, and has been tested in several places, proving highly valuable in mechanical and manufacturing uses.

The Waukegan (Wis.) *Gazette* chronicles a heroic act of a boy in that vicinity, who was carrying the mail. As he was driving along in the edge of the evening, a footpad dashed upon him with the design of robbing the mail. The boy drew a hammer handle which he happened to have with him, and leveling it at the robber, threatened to blow his brains out with it. The robber ran for his life.

We mentioned that the Legislature of Connecticut had passed an act authorizing the New York and New Haven Railroad to compromise the disputed cases arising out of the Schuyler frauds. It has since passed another act, permitting the issue of New Bonds to an amount not to exceed three millions of dollars, bearing 6 per cent. interest, to purchase or liquidate the fraudulent shares.

Mortality is on the increase in New York City. The City Inspector reports 669 deaths the past week—an increase of 78 over the mortality of the previous week. Nearly the whole of the increase was among juveniles, of whom 142 died of cholera infantum, 58 of convulsions, and 48 of marasmus. There were 5 deaths of cholera, 50 of diarrhœa, 25 of dysentery, 16 of inflammation of the bowels, and 43 of consumption.

A new system has been adopted in Paris for the wires of the electric telegraph. They are, in future, instead of being exposed, to be laid underground.

The sales of Public Lands for the last fiscal year were 13,825,730 93 acres, for which there was received, in cash and script, the sum of $10,570,386 86. This is exclusive of the land located with military Bounty Land Warrants in the same period. The aggregate of Public Lands, the title in which has thus been transferred from the Government to individuals, was never before so large in a single year.

A dispatch dated New Haven, Conn., Saturday, July 28, says: Two Irishmen named Blackeslee and Sheridan were killed this afternoon by th[illegible] poisonous ga[illegible] a well in St. John's street. One of them being overcome fell into the water, and the other descended to his relief, when he also was prostrated. A third was near sharing a similar fate.

We see it stated, that Sir Moses Montefiore, who lately passed through Vienna on his way to Palestine, goes there to purchase a large district in the country, to settle upon it the Jewish paupers of Jerusalem. Eventually his purpose is to settle there also all those Jews who feel inclined to return to the country of their ancestors. This is, perhaps, the first practical effort yet made at procuring a return of that widely-scattered race.

The Banking and Express firm of Wells, Fargo & Co., at San Francisco, delivered at that city for the miners, in the month of June, the sum of $3,548,788 in gold dust, of which $845,085 was from the Southern mines, and the remainder from Sacramento and the Northern mines. About one-half the whole sum was returned by express to the owners in gold coin taken from the Branch Mint at San Francisco.

By the arrival of the ship Louis Napoleon at New York, we have the miraculous escape of two men, who had been drifting about on the ocean twelve days in a small boat. Three men started from a schooner to go fishing, and owing to the dense fog on the Banks, were lost sight of. One of them died from exposure, and the other two were taken up by the Napoleon, after suffering terribly for want of water.

On Sabbath (Saturday,) July 21st, seven persons went on a sailing excursion, from Somers Point, N. J., and when four miles up the Tuckahoe River, the boat upset, and five of the party were drowned, namely, G. Tully, Charles F. Watson, wife and child, of Camden; and L. Young, of Philadelphia. The other two men were found clinging to the bottom of the boat.

A man in Paulet, Vt., after having his corn destoroyed and his wheat field attacked by the sable depredators, and having tried every kind of scare-crow to no purpose, procured strychnine, in which he soaked some corn, and strewed it over his field. As a result of the first day's effects of his preventive, he found the carcasses of 200 crows in and about the field.

A colored man in Indiana lately brought suit before a magistrate, against the Jeffersonville Railroad Company, because they refused to admit him to the cars as a passenger, until he produced evidence of his freedom. The Justice awarded him twenty dollars damages, but the Company appealed to the circuit court of Clark county, and a few days ago the decision was reversed.

A most distressing accident occurred at a daguerreotype saloon, in Washington-street, Boston, the other day. A lady, named Russell, had just had the daguerreotype of her little daughter, three years old, taken, and was waiting to have it completed, when the child, who was upon a settee, pitched over the back and through a window into Washington-street, a distance of forty feet. The child was killed almost instantaneously.

The Peach crop in New Jersey, says the Newark *Mercury*, it is expected, will be heavy in proportion to the number of trees; the trees are, in fact, too full. Many trees, it is said, were killed last Winter, and there are not, probably, one half the peach trees in the State there were four or five years ago.

It is said that a party of Hollanders, who bring with them from their fatherland great experience in dyking and draining, have set about reclaiming the body of salt marsh lying between Newark and Jersey City, N. J., and devoting its thousands of acres to the cultivation of vegetables and fruits.

In North China, the people smoke arsenic mixed in small quantities with their tobacco; these people are said to be strong, healthy and ruddy. Dr. Londe, of Paris, an accomplished physician, asserts that the use of arsenic in this manner—smoking—is a remedy for tubercular consumption.

It is stated that the Directors of the East India Company have made an offer of a large force of irregular cavalry for service in the Crimea. The movement is consequent upon several troops of that splendid service having voluntarily tendered their service to aid the forces in the Crimea. The men are principally from the Northern Provinces of India.

A man at Cleves, Ohio, was lately stung by a locust. The effects are similar to those produced by a bite of a mad dog; the man has fits so violent that it takes five or six men to hold him in bed, and he has bitten his tongue into strings.

A dispatch dated Syracuse, Wednesday, July 25, says: W. K. Strong, Esq., of New York, had his pocket picked of $1,000 in the cars arriving at this place to-day. The bills were all on the North Ad[illegible] Bank of Massachusetts. A reward of $250 is offered for the recovery of the money and conviction of the thief.

By telegraphic accounts, it appears that Yellow Fever prevails in the sea ports of Virginia, and also that Asiatic Cholera has made its appearance in Portland and in Middletown, on the opposite side of the Connecticut River.

A new diamond, found by a negress in Brazil, and called the "Star of the South," has reached England, and is producing a sensation. It weighs 254½ carats, and will probably lose half its weight in cutting. The Koh-i-noor, now it is finally cut, weighs 122 carats.

The British Government are stated to have resolved upon appointing a commission to inquire into the subject of decimal coinage, to be composed of Lord Monteagle, Mr. Hubbard, and Mr. Norman.

S. M. Booth, who played so prominent a part in the rescue of the slave Glover, announces himself a candidate for the Governorship of Wisconsin.

On Wednesday afternoon, July 25th, while a company from Williamsburg were bathing at Coney Island, four persons were taken out to sea by the under-tow. Two of them were recovered by the aid of planks, but the other two—Rev. John H. Elliott and his daughter—were drowned.

A. H. Reeder, Governor of Kansas, has been removed by the President, and John L. Dawson, of Pennsylvania, app[illegible]ted in his place. Mr. Dawson was a member of the last Congress and voted for the Nebraska-Kansas bill.

The ship Sea Witch, from New York to China, put into Rio, June 16th, in consequence of the Captain having been murdered in his berth. Suspicion rested on the mate, who was arrested, and made an unsuccessful attempt to commit suicide.

New York Markets—July 30, 1855.

Ashes—$6 50 for Pots and Pearls.

Flour and Meal—Flour, 7 62 a 7 75 for ordinary State, 8 00 a 8 25 for mixed Western, 10 50 a 12 25 for extra Genesee. Rye Flour 6 50 a 8 00. Jersey Meal 4 50.

Grain—Wheat is easier; 1 70 a 1 80 for common to prime red Southern. Rye 1 15. Oats, 57 a 61c. for State and Western. Corn, 90 a 91c. for Western mixed.

Provisions—Pork, 16 75 for new prime, 19 68 for new mess. Beef, 9 75 a 10 00 for prime, 11 00 a 13 00 for country mess. Lard, 10¾ a 11c. Butter, 13 a 16c. for Ohio, 16 a 19c. for ordinary to good State, 19 a 22c. for choice. Cheese 4 a 9c.

Hay—1 25 a 1 37 per 100 lbs.

Tallow—11¾ a 12c.

DIED,

In G[illegible]e, N. Y., on the 15th ult., Ezekiel Crandall, ag[illegible] about 72 years. Bro. C. had been afflicted with a cancer on his face for some years, and was a very great sufferer. But throughout his sufferings, he conducted himself with the most exemplary patience, never murmuring, but justifying the way of God towards him. By his death, the 1st Church of Genesee has been bereaved of one of its most valued members, and the community of one of its brightest ornaments. He has entered into peace.

In Lima, Rock Co., Wis., July 18, 1855, of consumption, William Hall, in the 35th year of his age. He has left a wife and one child, with numerous family connections, to wait a little longer in this vale of mourning, to be a little more refined from dross and tin, that they may be a little better prepared to join him in the songs of the redeemed before the throne of God. The deceased professed religion in early life, but when he found there was no longer respite from death, he regretted much that he had not been more devoted to the service of his Master. He laid aside all worldly interests, and devoted all his thoughts to prepare for the change awaiting him; and left an evidence, satisfactory to the family, that he was going to be with Jesus; and exhorted them, especially his wife, to prepare to meet him in glory. S. C.

FOR THE [illegible]:

Wm Dunn, Plainfield, N J	$6 80

WILLIAM M. ROGERS, Treasurer.

The General Conference.

The Seventh-day Baptist General Conference will hold its triennial session with the first church in Brookfield, Madison Co., N. Y., commencing on the fourth day of the week before the 2d Sabbath in September next. (5th of the month,) at 10 o'clock, A. M. Introductory discourse by Lucius Crandall; T. E. Babcock, alternate. H. H. Baker, Secretary.

Our Anniversaries.

The Seventh-day Baptist Missionary Society will hold its 13th Annual Meeting with the 1st. Seventh-day Baptist Church in Brookfield, Madison Co., N. Y., on Fifth-day, Sept. 6, 1855, commencing at 10 o'clock A. M. Opening discourse by Thomas E. Babcock.

The American Sabbath Tract Society will hold its 13th Annual Meeting at the same place in the forenoon of Sixth-day, Sept. 7th, commencing at 9 o'clock.

The Seventh-day Baptist Publishing Society will hold its 6th Annual Meeting at the same place in the afternoon of Sixth-day, Sept. 7th, commencing at 1 o'clock. Geo. B. Utter, Secretary.

Milton Academy.

Male and Female Teacher's Seminary.

A. C. Spicer, A. M., Principal, and Professor of Mathematics, Natural, Intellectual, and Moral Sciences.

A. Whitford, Professor of Greek and Latin Languages, and Rhetoric.

J. F. Pease, Professor of Instrumental and Vocal Music.

J. F. Wood, Teacher of Penmanship and Book-keeping.

Mrs. S. M. Spicer, Preceptress, and teacher of Modern Languages, Painting and Penciling.

(Other teachers will be engaged as occasion may require.)

Calendar for 1855–6.

First term opens Wednesday, August 29th; closes Wednesday, December 5th.

Second term opens Wednesday, December 12th; closes Wednesday, March 19th, 1856.

Third term opens Wednesday, March 26th; closes Wednesday, July 2d, 1856.

(The school will open, this year, in the New and Spacious Hall just erected.)

Tuition per term of 14 weeks, from $4 00 to $6 00. Music, Painting, and Penciling, extra. Board at the least possible price, not exceeding $2 00. Refer to the principal; Hon. J. Goodrich, President of Trustees; to M. T. Walker, Esq., or to J. C. Culver, Esq., Milton, Rock Co., Wis.

Magnificent Floral Gift.

SUBSCRIBERS to the "CHRISTIAN DIADEM" for 1855, are entitled to a splendid steel engraving, the ☞ LILLY AND THE ROSE PERSONIFIED, being given *gratis* to all old and new subscribers who send us only ONE DOLLAR, by mail or otherwise.

Six Copies for Five Dollars.

The Diadem is a strictly moral and religious work—designed for the Christian family without regard to any particular denomination.

FIFTY ENERGETIC BUSINESS MEN are wanted immediately to circulate the "Diadem" throughout the Eastern and Western States. To such as can send good references the very best inducements will be given. Address Z. P. HATCH, Publisher, 9 Spruce street, New York. May 24—3m.

The very Book that every body has been Wanting.

The Book for the Parlor, the Book for the Fireside, the Book for the Professor, and the Book for the Non-Professor.

THE RELIGIOUS DENOMINATIONS OF THE UNITED STATES: Their History, Doctrine, Government, and Statistics; with a Preliminary Sketch of Judaism, Paganism, and Mohammedanism. By Rev. Joseph Belcher, D. D., Honorary Member of the Historical Societies of Pennsylvania and Wisconsin, author of "William Carey, a Biography," etc., etc., and "Editor of the Complete Works of Andrew Fuller," "Works of Robert Hall," etc., etc. Large octavo, 1024 pages, handsomely embellished by nearly two hundred engravings.

This invaluable work is rapidly finding its way among all classes of the American people. The clear, comprehensive, and impartial manner in which the learned author treats each and every denomination, is winning for him golden opinions from the highest authorities in the land. The innumerable lively tales and anecdotes of ministers, churches, and laymen, which he introduces with the articles of faith and all important statistical information, give to the work a life, vigor, and spirit truly delightful. One cannot sit down to it without being convinced that his subject is in the hands of a master, nor rise but with kindlier and more liberal feelings towards the great brotherhood of Christians, under whatever name they bear. Ours is a great, growing and glorious country, and every family, and every young man, throughout its length and breadth, should have a copy as a text book of all its denominations. Wherever known, it is read, and wherever read, admired. Look at the following from among the very many notices received:

It embodies a vast amount of information relative to the origin, history, and missionary operations of the different religious denominations in this country, presented in a remarkably interesting and attractive manner.—*Rev. John Dowling, D. D., Author of "The History of Romanism," "Judson Offering," etc.*

This is a large and beautiful volume, and will find a cordial welcome in every family.—*Philadelphia Christian Chronicle.*

So far as concerns independence of vision, there can be no question, as Dr Belcher surveys each sect with the same dispassionate impartiality.—*Epis. Recorder.*

This massive volume embraces a vast fund of information.—*Presbyterian.*

The work is sold by agents, and will furnish a large amount of interesting and valuable information to the families into which it may be received.—*New York Recorder and Register.*

In the account given of the denominations, he is fair, and generally allows them to speak for themselves, as to their history and institutions.—*New York Christian Advocate and Journal.*

It contains a mass of interesting facts and statistics.—*Norton's Literary Gazette.*

Judging from the work, it would be difficult to say what are the religious views of the Editor, so fairly, so dispassionately, so charitably, has he treated each and every sect.—*Philadelphia City Item.*

We presume it will be a standard work in thousands of libraries.—*Littell's Living Age.*

Sold only by agents, to whom certain districts are allotted. For particulars address the publisher,
JOHN E. POTTER,
15 Sansom-st., Philadelphia.
Or, Noyes Spicer, Indianapolis, Ind.

Michigan Southern Railroad Line.

TRAVELERS for Chicago, St. Louis, Kansas, and all points West and Southwest, can obtain through tickets, and all information concerning routes, fare, &c., either by the New York and Erie Railroad, or the New York Central Railroad, by application at the Company's Office, No. 192 Broadway, corner Dey-st., to
JOHN F. PORTER, General Agent.

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c. *Spring Arrangements*, commencing April 2, 1855: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M. For Somerville, (way,) at 5.30 P. M.

The above trains connect at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 1, 4 and 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 6 and 9.45 A. M. and 3 P. M.; Somerville (way) at 6 A. M.

New York and Elizabethport.

Leave New York at 8 and 10 A. M., 1, 4 and 5 P. M.

Leave Elizabethport at 7.15 and 9.10 A. M., 1, 3.15 and 6 P. M. JOHN O. STERNS, Superintendent.

New York and Erie Railroad.

ON and after Monday, May 7, and until further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Dunkirk Express at 6 A. M. for Dunkirk.

Buffalo Express at 6 A. M. for Buffalo.

Mail at 8¼ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Accommodation at 12¼ P. M. for Port Jervis and intermediate stations.

Rockland Passenger at 3 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.

Way Passenger at 4 P. M. for Newburgh and Otisville and intermediate stations.

Night Express at 5½ P. M. for Dunkirk and Buffalo.

Emigrant at 6 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5½ P. M.

These Express Trains connect at Elmira with the Elmira and Niagara Falls Railroad, for Niagara Falls, at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicago, &c., and with first-class splendid steamers for all ports on Lake Erie.

D. C. McCALLUM, General Sup't.

Miscellaneous.

From "The Crayon."

Wanderings in the Southwest—No. 2.

(Concluded.)

It is said that a bad wife makes a man an early riser, and I am sure that such an infliction would not be necessary, were we always to make our bed upon the ground, with a saddle for a pillow, and a single blanket to lie upon. I rose with the first dawn, much refreshed, and my horse was surfeited with the rich muskeet grass, which I saw now for the first time. A ride of two miles brought me to a small stream of clear water, where I drew out of my saddle-bags the last two biscuit placed there by a friend at Lavacca, to meet emergencies. Soaking them in the water, I breakfasted, and drank the brook water from my hand. I found the house I was in search of the night before, but the men had gone a-fishing. The country over which I rode this morning was less picturesque; the swells, to use a nautical term, were longer, trees fewer or degenerated into clumps of muskeet bushes not sufficient for shade, but the soil is rich and covered with a good growth of grass. At eleven o'clock, I reached a valley with a dry creek and live oaks. Here I rested an hour, to favor the horse, and climbed one of the oaks with my note-book, to enjoy the shade and breeze. During the afternoon the scenery was much the same, rich soil, good grass, little timber, no water. The sun was low, when the sight of a corn-field indicated the habitation of a white man. There was a duck pond from which my horse drank heartily; the ground was miry about it, and grass, the yellow pond lily (nuphar) and sagittaria were growing in it. I went to the house, and found there only a woman and her two children; her husband was out hunting cattle. I represented to her that I was very hungry and thirsty; but she kept on sewing, and all appeals to her humanity were ineffectual. Her husband was not at home, and that was sufficient for her. At last I requested her little daughter to bring me a glass of water, which she did—and, though I knew it came from the mud-hole from which my horse just drank, I swallowed it, and traveled six miles further to the Clito Creek.

This is a pretty stream with wooded bottoms, and a log cabin stood on its further bank, at which I applied for admission. The man who lived in it was not the owner, but was cultivating a corn-field on shares; he was poor, and owned but twenty cows. A thunder-shower was approaching, and I waited till it should pass; in the meantime, a meal was prepared, which quite reconciled me to my situation. When the rain had passed, it was quite night, and the road so wet that I determined to stay here for the night, though I had it in my programm to stop at a new town called Helena. The rain-water was many degrees cooler than any water I have drank in the country. I caught a pitcher full, as it ran in generous streams from the roof of the cabin, and drank enough; and, when I remembered the burning thirst with which I had ridden all day, and the duck pond, I drank more, and filled the pitcher to place where I could get it in the night. A low thicket grew on the creek in the rear of the house, whence wolves and other wild animals make forage upon the young stock. The pigs had all been destroyed this year, and a panther was seen but the day before. An excellent bed was furnished me, and my apartment, which was half of the house, was dry. There was no window, but a short log had been left out where one was required, and everywhere from roof to floor were chinks open, revealing the lightning. I put my pitcher of pure, heaven-descended water in a raw-hide bottomed chair, and went to sleep, with a deep bass music of the bull-frogs rejoicing in the rain.

In the night I was awakened by the most infernal noises. The hogs had resorted to the space under the floor, just where my bed stood, in violation of the laws of the place, and were engaged in a free fight; the dogs soon joined in; this called out my host, and a long contest resulted in dislodging the hogs and restoring quiet. In the morning the rain still continued, or was renewed, and the air was cool. Mr. Reisinger moved from Louisiana, where he lived four years, and was compelled to leave in consequence of the continued illness of his family from intermittents, and has never had sickness in his family since his residence in Texas, now two years. From this place I rode four miles over a table-land of rich, dark loam, covered with muskeet trees and grass; the road was strewn with the broken trees from the gale of two nights before, which seemed to have passed over this flat. In wet weather, long continued, the roads must become almost impassable from mud; the alluvium is so fine and tenacious as to clog the wheels of carriages, and cause animals to slip at every step. Where oaks are found, the soil is more sandy. At Helena, which had been said to resemble a settlement of disbanded rangers, I stopped a short time. A group of young men of American parentage were lounging about with revolvers at their belts; some were playing at billiards, others were drinking at a bar, but I saw no garden or enclosure about the town, and I felt to congratulate myself that I did not reach this place so as to spend a night there. Seeing a well recently dug on the high ground west of Helena, I had the curiosity to dismount and inspect the formation of the soil. The black loam was about eight feet deep, then pebbles, mostly of flint, and a cretaceous mud, with a tinge of iron rust, containing nodules of chalk, down to the depth of forty feet. I reached the Civolo about noon: there is much beautiful land in this vicinity, very productive and well-watered; there are many settlements on the stream, and some have left it, because it was too crowded. The Civolo, like all the streams I have crossed, runs through a deep valley, but at this season of the year, it is but a brook, with clear good water. The view is very picturesque at the ford, and I spent three hours there. Pecans are the most numerous trees, and their fine foliage keeps the water, for the most part, in shadow. I found here some very large unios, the shells of which will weigh at least a pound. They lie imbedded in mud, with the mouth of the shell pointing down steam, and a little open, so that their food shall glide over the shell with the current, and, in dropping down the margin, they are caught within the two valves. There is a fine fish of the perch family found in all the streams that unite with the San Antonio and Guadaloupe—it is improperly called here trout; it sometimes attains the size of five or six pounds. There is, also, another of the same family very similar to the little pumpkin-seed or sun-fish, so common in the ponds of the North. I walked a little way down the margin of the stream, when a moccasin snake, partly concealed by a log, raised its flattened head, and opened its jaws so wide, as to put them almost in the same plane. I carried my foot close to it, and it struck its fangs into my boot. It is a very repulsive reptile, about eighteen inches long, and clumsy; it makes no attempt to escape, and is harmless to those who have boots, but it is very dangerous to those who are bare-footed, and women are sometimes bitten in the hand while getting water; it is widely diffused in the South, and is found only on the margin of water-courses. I have seen three varieties of it in Texas. On the opposite bank of the Civolo is an old Mexican ranch, the owners of which had just killed a calf, which was hanging to a tree; and, as I had not yet seen any meat of the kind in an American house, I was disposed to stop for the night, but could not speak their language. I stopped at a house on the Marcelina—not a running stream there, but whose quicksands nearly proved the grave of my horse. The house was built of poles standing on end, after the Mexican style, but was occupied by a Missourian. I dined on the usual fare of bacon, corn bread, and fried eggs, and slept in a room with a curtain pinned up for a door. When I looked about me in the morning, the room was occupied, beside myself, with two dogs, a family of chickens, two hand-saws, a deer-skin, an auger, and a spare-bed. I was informed here of the settlement of Mr. Tentant, of Louisiana, about six miles out of my way on the San Antonio; and, being anxious to find an intelligent settler, who, from experience, could tell me something of the results of the agricultural experiments of the country, I started at seven o'clock, after paying the customary fee of one dollar for the hospitality I had enjoyed, directing my course for some conspicuous trees that I saw on the hill in the direction indicated; it led for a time down the Marcelina, in the standing water-holes of which were Mallard ducks and Mergansers, and great numbers of turtle. Several times I saw deer, found a wagon trail, but could not find the trees that were to be my landmark—followed the wagon trail till I was sure it was leading me astray—rode to the top of a high hill, and rode down again no wiser—traveled four hours—came to the San Antonio River, but no ranch—went down stream for a mile, and became tangled in a thicket of bushes and giant weeds—saw a file of wild turkeys crossing my path, was very glad to see them, and sorry I could not make a more intimate acquaintance. I then ascended the river, which was nowhere accessible, eor even visible, from the dense vegetation on its banks. There were some fine specimens of the Turks-head cactus (Echinocactus) here, and the small variety of the Yucca (Yucca fillimentora.) I resolved that I was lost, and abandoning all hope of finding Mr. T.'s ranch, I struck a course due west for about six miles over deep valleys, and hills commanding a wide view of the surrounding country, when I saw a field that appeared of a fresher green than the adjacent country. By the aid of my glass I distinguished the corn, and made for it with more satisfaction than I could tell you, for I had now no reserve biscuit in my saddle-bags, and I had given up any hope of seeing a settlement that day. My surprise was great, when I found that I was at Mr. T.'s place, which I supposed I had left somewhere twelve miles behind me. Mr. T. lives in a style baronial; he had a young priest at his house, and a large number of blacks; deer skins were stretched to the trees, and horns were nailed up in several places. The room into which I was introduced, was decorated with guns, books, pictures, and pistols, and while we were talking, some fresh venison was being prepared for our dinner. The family had dined, and the priest and myself partook of a dinner together. Mr. T. had had his servants bitten with rattle-snakes, and to guard against them wore leather leggings. Mr. T. had not been long enough in the country to make any experiments; his attention was occupied in the cultivation of corn and other necessaries of life. He tills about 3,000 acres. He accompanied me on my way for two miles, and directed me to go to Mr. Flores' ranch, where fruit had been cultivated for a long time. This I succeeded in reaching just at night-fall.

J. D. B. S.

Bread Making.

We shall not presume to instruct our fair readers in the art of bread making. The process, however, involves some scientific principles, which we propose to explain. Wheat flour contains two principal ingredients, gluten and starch, besides a small per cent. (4-100 to 8-100) of sugar. The outside of the kernel of wheat contains a larger proportion of gluten than the finer flour. These two parts of the flour may be separated easily by enclosing a little flour made into a stiff paste, in a linen bag, and kneading it in a basin of water, until the water that comes through is no longer white. The starch by this process escapes from the bag, and the gluten, a tough, adhering mass, remains within. Many ladies have noticed the different kinds of flour, in the ease with which it is kneaded. The tougher kinds contain the most gluten. The bakers prefer the latter sort, because it admits of more raising.

If flour were simply mixed up with water, and baked without raising, it would make a very close, indigestible, and unpalatable bread, hardly worthy of the name. To become soft, light and palatable, the dough must be raised. This is effected, ordinarily, by one of two common processes. In making what is generally known as raised bread—improperly so distinguished, because all bread is raised either before baking or in the process—the dough is made up with water only, it may be, and a small portion of yeast, which is to act as ferment. In the making of cream-of-tartar or sour-milk bread, the means of raising it are different and act in a very different way, chemically. In the first, the ferment of the yeast or leaven is extended to the mass of fresh dough. The decomposing gluten acts upon the sugar and dissolves it into alcohol and carbonic acid gas. This gas, in the form of little air bubbles, is disseminated through the loaf, and expands or raises it, being prevented from escaping by the glutinous nature of the dough. The alcohol formed by the fermentation is expelled from the dough by the heat of the oven. It has been collected sometimes in large bakeries, but hardly pays for the trouble. The dough sometimes becomes sour before baking, in consequence of a second fermentation—the acetous by which the alcohol is converted into vinegar, on the absorption of oxygen from the air. It then becomes necessary to introduce into the dough some alkaline substance, as soda, or saleratus, which unites with and neutralizes the acid, and makes the dough sweet again.

In the second kind of bread named above, the carbonic acid to raise it is obtained from the carbonate of soda, potassa, (saleratus)—by mixing with it in the flour some acid, as sour-milk, cream-of-tartar, cider, vinegar, or hydrochloric acid—either of which, by its stronger affinity for the alkaline base—the soda or potassa—unites with it and liberates the carbonic acid. We see that by this mode of raising the bread, the sugar of wheat is retained in it; whereas by the other process it is converted into alcohol and carbonic acid. We see also, that the use of soda or saleratus is very different in the two kinds of bread making. In the first, the alkaline is required to neutralize the acetic acid—in the second, the carbonic acid is needed to raise the bread. In each case a neutral substance is left in the bread; in the first, an acetate of soda—in the second, a base of soda or potassa, united with whatever acid is used.

Bread when baked is neither starch nor gluten. The globules of starch which remain unbroken in the flour, swell and burst under the influence of the moisture and heat, and with the gluten unite chemically with the water of the dough and form bread. No separation of the starch and gluten can be effected after baking. Even a portion of water chemically united with the bread cannot be separated from it by evaporation. The hardest and driest bread has water combined with the flour.

Gluten is the most nutritious part of the flour. The bran, therefore, should not be excluded from the bread, if we have regard to its highest nutritive qualities.

The crust of bread, when moistened and returned to the oven, becomes smooth and shining. A portion of the starch, in the process of baking, is converted into gum. This gum on being moistened spreads over the surface of the bread, producing the smooth surface, and also giving the crust a taste which the bread does not have. Corn bread has a peculiar aromatic flavor, owing to an oil which is disseminated through the meal. The inferiority of meal long ground, to that which is fresh, is due to the change which exposure to the air has made in these oily particles.

[Portland Eclectic.

A Learned Shoemaker.

A correspondent of the "Country Journal" furnishes that paper with the following account of the studies and attainments of Mr. C. C. Frost, a shoemaker living in Brattleboro', Vt.

Mr. Frost is about forty-nine years of age. When a boy he learned the trade of a shoemaker, which trade he has always followed. He received his early instructions at a common school of his native village, and has never enjoyed the advantages of the higher seminaries of learning. Being fond of mathematics, he early excelled in that department of study, and was a fair, though not though not remarkable scholar in other branches. When he left school however he did not lay aside his books. Some Mathematical works falling into his hands when a youth, he studied them faithfully and became master of their contents. And having studied Mathematics for several years with little or no assistance except from books, he finally made himself familiar with the most important works on Algebra, Geometry, Trigonometry, the Calculus, &c. He turned his attention also to Astronomy, Geology, Minerology, Meterology and Botany; in all of which branches of science he made great proficiency, especially in Botany, to which he has for the last few years more particularly devoted himself. He researches into that department of Botany relating to Lichens are especially worthy of notice, and are surpassed only by those of a few living Botanists. He was for a time connected with the Smithsonian Institute as a Reporter on Storms, and discharged his duties most acceptably; and in consequence of the knowledge which he acquired in that department of meteorology he became for his neighbors the prophet of the weather. He has moreover so far mastered the Latin and French languages as to read works written in those languages on his favorite subjects of study. In the mean time he has kept himself "posted up" on the great moral and political reforms of the age, with most of which he has strong and active sympathies.

Mr. Frost has made collections more or less extensive of Minerals, Shells, Grasses, Mosses, Ferns, Lichens, and plants generally, and arranged them neatly and in a scientific manner. Most of these he has collected with his own hands: not a few of them in early morning before the usual hours of business: some on excursions made for the purpose: and others whenever business called him abroad, never omitting any opportunity to bring home any rare specimen which his quick and practised eye might discover.

The Black Knot on the Plum.

BY WM. MERVINE, UTICA.

Many causes have been assigned for the disease in question, none of which, so far as my information extends, are satisfactory. Some have supposed it to be occasioned by diseased sap, or vegetable ulcers; some, that it is the work of the curculio; others, with more plausibility, that it is the result of poison infused by the minute sting of an insect. But none of those entertaining the latter opinion have described the kind of insect, or its characteristics; and it is therefore fair to assume, that their belief rests upon conjecture alone. The latter opinion, however, with the exception of the minuteness of the sting, is correct. It will be allowed me to say, that I believe myself to be the first in determining the fact, and in ascertaining certainly the habits and character of the insect. I will, therefore, proceed, as briefly as may be, and without regard to possible charges of egotism, for asserting, in opposition to many scientific men on the subject, what I know beyond a doubt to be the origin of the excrescence, or tumor, and to describe the insect which causes it, its habits, and the best method of guarding against its attacks and increase.

The insect here referred to belongs, I believe, to the Hymenoptera class, and is about an inch in length; color pale yellow; has four wings, and hind legs resembling those of the grasshopper, which seem designed for a similar use; and although furnished with wings, it uses them only, so far as I have discovered, for calling its mates. This it effects by shrill notes through the medium of vibrations, created by rapid motion of them, and which affords the means of tracing it. The abdomen of the female is much larger than that of the male, in the extremity of which is concealed a sting of about a quarter of an inch in length, with which it pierces any shrub or limb selected as a receptacle for its eggs, often numbering a dozen or more, which are deposited with some acid poison in separate cells, longitudinally. From these eggs the larvæ are hatched, changed to the pupæ, or chrysalis state, and emerge during the ensuing June.

The excrescence does not appear until after the escape of the insects, the swelling of which is caused by the circulation of the sap being arrested in its natural course by the poison infused, which flows around the punctured parts, extravasates, and gradually forms the tumors; a grub may sometimes be found, but it does not form the excresence. Any one may satisfy himself of the truth of the foregoing remark by observing the appearance of the insect during the months of August and September, especially the latter, that being the season of cotton, when it may be found making its deposits; these, on being completed, are varnished over with a water-proof substance, presenting a dark glazed appearance, by which it may be known, and on carefully splitting a stung limb in the direction of the perforations early in June, the insect may be found in the larvæ state.

I have carried on for two years past a war against this insect, and never suffer one to escape when it can be traced; which, together with a judicious application of the knife in cutting off, and out, all the affected parts, and burning them, I managed to preserve my trees clear of the unsightly tumors. If all those who are interested in the growth and preservation of these trees would adopt the course pursued by me, this destructive insect might in time be exterminated, or its effects at least very much lessened. Indeed, unless something be done to arrest its progress, many years, in my opinion, will not elapse ere the cultivation of the plum and cherry will have to be abandoned. [Horticulturist.

Harvesting Potatoes.

The idea has generally prevailed that potatoes, especially those grown in low and moist lands, are essentially benefited by exposure to the sun and air before removing them to the bins. This, however, experience has long since demonstrated to be a fallacy. The sooner potatoes are in the cellar, protected from the sun's rays, after they are removed from the hills, the better, the operation of the solar rays having a powerful tendency not only to deteriorate greatly their eating qualities, but also to render them far less likely to keep well through the subsequent spring.

Another very popular error, and one no less productive of bad consequences, is the supposition that the tubers should be scrupulously and thoroughly cleansed from dirt, the presence of which, in ever so small a quantity, is considered by many to be the radical cause of their becoming watery and unfit for food. Any one, however, who will take the trouble of experimenting, may easily satisfy himself that this is not the case; and that potatoes which have been thoroughly cleansed by washing or drying, or indeed by any process which effectually rids them of soil, will exhibit symptoms of decay, and become unfit for culinary purposes, much sooner than those which have not.

In many sections it is a common practice with farmers to select a portion of their best almost perfectly matured and developed tubers, and pack them carefully and compactly in barrels, filling the space between the roots with soil, cool and moist. The barrels thus filled, are placed in some dark corner of the cellar, where they remain undisturbed till the contents are demanded for the market, late in the season, or for domestic use.

Secured in this manner, and deposited beyond the reach of light or heat, or where they will be as little exposed as possible to these powerful agents, potatoes will keep perfectly sound and retain their eating properties unimpaired until late the following year.

Every observing farmer must have noticed that the potatoes "crowded out" from the hills, or which are found so near the surface as to be frequently exposed to heavy rains washing away the soil, always turn green, and, when cooked, have a sweet coppery taste, which is extremely nauseating and unpleasant. This is always the result of exposure to solar action; it concentrates a principle which the potato contains in conjunction with many others of a nutritious nature, into an active poison, and hastens greatly the decay and decomposition of the roots. As soon as they are taken from the soil, they should be placed in the bins.

[Republican Journal.

Renovation of Peach Trees.

In this climate the peach is a fruit subject to many diseases. When the trees are observed to sicken, no time should be lost in carefully displacing the soil from the roots, and supplying its place with a mixture of charcoal, wood ashes, and old chip manure. A friend informs us that during the past season, a very healthy peach tree in his garden suddenly sickened, and commended casting its leaves. He removed the soil and applied the above mixture and was happily surprised by its sudden and entire restoration. The peach, though a tender tree, comparatively, should never be set in a warm location. When so placed, it becomes stimulated too early in the season, and generally blooms before the end of frosty weather; whereas, when placed in a northern exposure, or on the north side of buildings or high walls, which protect it from the vernal rays, it is retarded in its inflorescence, and this retardation ensures, in nine cases in ten, a crop of excellent and well-developed fruit. There are few reasons, we apprehend, why the peach should not be enrolled in the list of our standard fruits. The tree is a vigorous grower, easily propagated on any light, dry soil that is suitable for Indian corn, and has this important advantage over most fruits, that it bears in four, and often in three, years from the seed. [Kennebec Journal.

Green Beans or Snaps.

Green beans, or snaps, green peas, and roasting ears, may be had every day in winter at a very trifling amount of trouble. They are all preserved by being packed away in salt. The salt is removed before cooking, by steeping in warm water. We had on the table a fine dish of snaps on Christmas day, and have been using them since as often as desired.

To preserve beans, take a tight vessel, jar or barrel, and put down a layer of beans and then cover lightly with salt; another layer of beans, then salt, and so on until the vessel is full.

Green peas are preserved in the same manner.

To preserve corn, first shave it from the cob with a sharp knife, and then pack in a close vessel corn and salt, in alternate layers, until the vessel is full. Soak the corn well before cooking, and it is jnst as good as it was in the summer. Try it, all you that are fond of good eating. [Tippecanoe Farmer.

The Culture of Strawberries.

The New York Horticultural Society, at a recent conversational meeting, arrived at the following conclusions in regard to the best method of cultivating strawberries:—

"The best soil for the strawberry was stated to be a gravelly loam. The land should be well drained, and to every acre applied twenty bushels of unleached ashes, ten bushels of lime, and two or three pounds of salt. The ground should be well broken up; animal manures should be eschewed; leaf is the best, and this should be carefully spaded in. About the first of July is the best time to set out the plants. In doing this, pains should be taken to have them firmly rooted. The roots should be eighteen inches apart, and the plants a foot apart.

Sometimes it will be well to allow greater intervals, in which case the interstices can be filled up from the growth of the runners. After setting out the plants, throw on a covering of tan bark an inch or an inch and a half in depth, then water them plentifully, and the moisture will be retained a long time. After cold weather comes on, cover the strawberry beds and the walks with clean straw, throwing over a little brush, or something to keep the straw in its place. In the Spring remove the straw and make use of some fertilizing agent to give the plant vigor, as sulphate of soda, sulphate of ammonia, or nitrate of potash. Keep the roots out, see that the plants are bountifully watered, and let nothing intervene to disturb or retard their growth till you gather the fruit. The beds should be made over as often as every three years."

Maxims for Farmers.

Do not sow your grain or cultivate your crop in any particular manner because your father did so. He may have followed in the footsteps of your grandfather, and agriculture was not as well understood then as now. 'Prove all things and hold fast to that which is good.' If not reject it and try another plan. Nothing of importance was ever yet gained without some risk. Experiment is the mother of science.

One acre well cultivated will produce more than two only scratched at and with far less trouble. What is worth doing at all, is worth doing well.

Do not have superabundance of farming implements; but let what you have be of the best kind, and keep them well sharpened. A sharp tool will cut twice as much as a dull one, and do it so much the better.

Never plow in wet weather, if you can avoid it. Besides doing injury to the crop, it impoverishes the soil. It will not rain always. [West Jersey Pioneer.

DESTROYING THE WEEVIL.—The following information from the Akron (O.) *Beacon*, in regard to the destruction of weevil, is worth the attention of farmers:—

We are informed by Mr. Chamberlin, of the City Mill, that the farmers of Vermont are in the habit of heading the movements of the weevil by a very simple process. The next season after it makes its appearance, they go through their wheat fields, about the time the wheat is heading, immediately after a shower, or while the dew is on it, and scatter newly slacked lime broadcast, so that it will adhere to the head and stems of the grain. They use about a bushel to the acre. Good lime should be secured, and slacked by sprinkling a little water over it, so as to retain all its strength. A paddle may be used in scattering it. The remedy has, it is said, been so effectually tried, as to leave no doubt of the result. Strips in large wheat fields left untouched by the lime, for experiment, have been entirely destroyed by the weevil, while the grain on each side was all saved. Since this intelligence was received, Mr. Jesse Allen, of the Center Mill, has received corroborating information from a Muskingum County farmer, who has seen the same practice and the same results there.

THE DEVIL RIGHT FOR ONCE.—The New York correspondent of the *Congregationalist* writes: Dr. H., who is a pastor of an Orthodox church, had been for some time annoyed by the forwardness of a lay brother to "speak" whenever an opportunity was offered, to the frequent exclusion of those whose remarks had a greater tendency to edification. This had been carried so far that the pastor, whenever he stated that "an opportunity would now be afforded for any brother to offer an exhortation," had always a secret dread of the loquacious member. On one special occasion, the latter prefaced a prosy, incoherent harangue, with an account of a previous controversy he had been carrying on with the great adversary. "My friends," said he, "the devil and I have been fighting for more than twenty minutes; he told me not to speak to-night, but I determined I would; he said some of the rest could speak better than I, but still I felt that I could not keep silence; he even whispered that I spoke too often, and that nobody wanted to hear me; but I was not to be put down that way, and now that I have gained the victory, I must tell you all that is in my heart." Then followed the tedious harangue aforesaid. As they were coming out of the session room, the good pastor inclined his head so that his mouth approached the ear of the militant member, and whispered—"Brother, *I think the devil was right!*"

HOW IT WAS DONE.—It has been ascertained that the beloved and respected Amos Lawrence gave away for charitable purposes during his life-time *seven hundred thousand dollars*. He came to Boston in 1807 with $20 in his pocket. In his diary it is said, "I have never smoked a cigar, never chewed but one quid of tobacco, and that before I was fifteen, and never took an ounce of snuff." During the first seven years of his mercantile life, he never allowed a bill to stand unsettled over the Sabbath. He kept an accurate account of the merchandize bought and sold each day, avoided excessive credits, and practiced the most rigid economy, never, as he says, "allowing himself to spend a fourpence for unnecessary objects till he had acquired it." Hence his success.

New Steamboat Line for Albany and Troy.

From Pier 15, foot of Liberty-st., at 6 P. M

STEAMER RIP VAN WINKLE, C. W. Farnham, Commander, Monday, Wednesday and Friday, at 6 o'clock, P. M.; steamer COMMODORE, L. Smith. Commander, Tuesday and Thursday, at 6 o'clock, P. M., and SUNDAY, at 5 P. M.

Fares: Saratoga, $1 50; Moreau, $2 15; Fort Edward, $2 15; Whitehall, $2 75; Castleton, $3 10; Rutland, $3; Burlington, $4; Rouses Point, $5 50; Montreal, $7 50.

These Boats will arrive in Albany or Troy in ample time to form connections with all the Railroads, North, East or West, enabling passengers to reach Montreal and tintermediate points the same day.

These Steamers are of the first class for strength and speed—well known favorities of the public—having been thoroughly overhauled during the past winter, and offer every accommodation that can be desired by either freighter or traveler.

Through tickets can be obtained on board the boat for Saratoga, Moreau, Fort Edward, Whitehall, Castleton, Rutland, Burlington, Rouse's Point and Montreal

The Northern Freight Express will give Bills o Lading to all points as above named. Shippers who desire it, can have time receipts, by applying at the office on the Pier. A. A. DYKEMAN.

Ayer's Pills.

A NEW and singularly successful remedy for the cure of all Bilious diseases—Costiveness, Indigestion, Jaundice, Dropsy, Rheumatism, Fevers, Gout, Humors, Nervousness, Irritability, Inflammations, Headache, Pains in the Breast, Side, Back, and Limbs, Female Complaints, &c., &c. Indeed very few are the diseases in which a Purgative Medicine is not more or less required, and much sickness and suffering might be prevented, if a harmless but effectual Cathartic were more freely used. No person can feel well while a costive habit of body prevails; besides, it soon generates serious and often fatal diseases, which might have been avoided by the timely and judicious use of a good purgative. This is alike true of Colds, Feverish symptoms, and Bilious derangements. They all tend to become or produce the deep seated and formidable distempers which load the hearses all over the land. Hence a reliable family physic is of the first importance to the public health, and this Pill has been perfected with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing any thing hitherto known of any medicine. Cures have been effected beyond belief, were they not substantiated by persons of such exalted positions and character as to forbid the suspicion of untruth.

Among the eminent gentlemen who have testified in favor of these Pills, we may mention:

Doct. A. A. Hayes, Analytical Chemist of Boston, and State Assayer of Massachusetts, whose high professional character is endorsed by the—

Hon. Edward Everett, Senator of the United States.

Robert C. Winthrop, Ex-Speaker of the House of Representatives.

Abbott Lawrence, Minister Plen. to England.

†John B. Fitzpatrick, Catholic Bishop of Boston; also

Dr. J. R. Chilton, Practical Chemist of New York City; endorsed by

Hon. W. L. Marcy, Secretary of State.

Wm. B. Astor, the richest man in America.

S. Leland & Co., Proprietors of the Metropolitan Hotel, and others.

These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compounded not of the drugs themselves, but of the medicinal virtues only of Vegetable remedies extracted by Chemical process in a state of purity, and combined together in such a manner as to insure the best results. This system of composition for medicines has been found in Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any process. The reason is perfectly obvious. While by the old mode of composition, every medicine is burdened with more or less of acrimonious and injurious qualities, by this each individual virtue only that is desired for the curative effect is present. All the inert and obnoxious qualities of each substance employed are left behind, the curative virtues only being retained. Hence it is self-evident the effects should prove as they have proved, more purely remedial, and the Pills a more powerful antidote to disease than any other medicine known to the world.

As it is frequently expedient that many medicines should be taken under the counsel of an attending physician, and as he could not properly judge of a remedy without knowing its composition, I have supplied the accurate Formulæ by which both my Pectoral and Pills are made, to the whole body of Practitioners in the United States and British American Provinces. If however there should be any one who has not received them, they will be forwarded by mail to his request.

Of all the Patent Medicines that are offered, how few would be taken if their composition was known! Their life consists in their mystery. I have no mysteries.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject freely acknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many eminent Physicians have declared the same thing of my Pills, and even more confidently, and are willing to certify that their anticipations were more than realized by their effects upon trial.

They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.

Prepared by Dr. J. C. AYER, Chemist, Lowell, Mass. Price 25 Cents per Box. Five Boxes for $1 00.

Sold at wholesale in New York by A. B. & D. SANDS retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere.

The Sabbath Recorder,

PUBLISHED WEEKLY

By the Seventh-day Baptist Publishing Society,

AT

NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the time to which they reach.

☞ No paper discontinued until arrearages are paid, except at the discretion of the publisher.

☞ Communications, orders, and remittances, should be directed, post paid, to

GEO. B. UTTER, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

CHRISTIAN SOLDIERS.

Among the many evidences that modern Christianity has become corrupted, there are none more fearful than its resort to carnal weapons for self-defense. Paul, one of the most bold and successful Christian warriors, and who had some degree of inspiration to guide him, expressly declared, that the weapons of his warfare were not carnal. And in giving the Ephesian soldiers orders how to equip themselves for review and action, he definitely specified the various parts of the Christian armor: The *girdle* of *truth*, the *breast-plate* of *righteousness*, the *sandals* of *peace*, the *helmet* of *salvation*, the *sword* of the *Spirit*. See Eph. 6: 14—17. In verse 11th he commanded these soldiers to put on the *whole armor* of God, and in verse 12th he mentions the character and strength of the enemy. Did Paul forget to recommend *carnal* weapons, or did he mean to prohibit them? From verse 13th we learn, that these soldiers, thus equipped, were to constitute a standing army, ready to invade foreign countries, and to act in self-defense.

What a contrast between that army and the Christian soldiers of modern times; for not only privates, but commissioned officers, now go armed with revolvers and bowie-knives. At a late quarterly meeting of the Methodists, held in Platte County, Missouri, the preachers were all armed with revolvers, and when assaulted by one Dr. Walker, the Rev. Mr. Morris drew his revolver, cocked it, and aimed it at the head of his assailant. When Paul was mobbed at Ephesus, Athens, and other places, he neither defended himself with Damascene blades, pistols, revolvers, nor bowie-knives, but drew the long sword of the Word of God, and gave several thrusts to his assailants under the fifth rib, which seemed to answer a very good purpose.

But these Methodists are not exceptions, I fear, to the general opinion and practice of Christians and ministers. I suppose our denomination, too, are equally concerned in sustaining war and resort to carnal weapons for self-defense, both individually and nationally. But I do as certainly believe, that Christianity forbids its subjects from aiding, upholding, or countenancing the use of carnal or deadly weapons for even self-defense, either nationally or individually, as it forbids rum-selling,* or slavery. And, in fact, the teachings of Christ are far more explicit as discountenancing war, than slavery or rum-selling. And those who denounce slavery and the rum traffic, as anti-Christian, and yet openly or secretly connive at war, seem to me to be straining out gnats, while they are swallowing camels, hunch and all. For war I consider more barbarous, more anti-Christian, than either of the others; and I doubt whether there be a greater hindering cause to the triumph of the Christian religion than war. I am, therefore, equally an anti-war man as an anti-slavery or temperance man. And if the communion is considered as such a test of fellowship, as that those who eat the Lord's Supper together are considered as sanctioning each other's views and practices, I shall be under the necessity of withholding myself from communing, or withdrawing from all such relations as will relieve me from such embarrassment. Thus far I have supposed that the public declaration of my open communion sentiments might be taken as exonerating me from any participancy in the faith and practice of others, when celebrating the Supper. Therefore, as a believer in the Christian doctrine of peace and non-resistance, I wish it to be understood, that I do not sanction the rightfulness of war, or resort to injurious brute force, or the views or practices of others upon that subject, in the communion. A sense of duty compels me to be thus explicit.

I also feel it my duty to call attention to this subject. Why so much excitement on slavery and rum-selling, and so little on war? Nay, why do Christians ever sanction and sanctify war itself? Just before the terrible battles of Inkermann and Balaklava, even bishops in their sacred robes of office harangued the troops, to rouse a more ferocious courage, promising, in the name of the Czar, large plunder to survivors, and in the name of God, a sure passport to heaven for any that might be killed. The Protestant Bishop of London sends forth a form of prayer for Christian soldiers, who make human butchery their business. When the Light Division was on their march to the Alma river, they requested the chaplain to say prayers; so they halted while he prayed; and it is said there were evident tokens of the Spirit. Very conscientious, when entering on their murderous work! An American, who had been in the Crimea, said in a public meeting of Christians in England, "*There is no need whatever for a man to lose his Christianity because he is on the field of battle, and that prominent members of the British army have been enabled in the present siege to keep up a most consistent and active Christian life.*" The above extract I take from the *Advocate of Peace*, July number. In the same number is a letter from Rev. Titus Coan, pastor of the Mission church at Hilo, Hawaii, one of the Sandwich Islands, forwarding fifty dollars to publish a work on Peace. That heathen, Christian church is one of peace as opposed to war. It holds all war to be forbidden by Christ. What a spectacle! A heathen church sending missionary money to convert us here from killing each other. I wish the editors would publish the letter of Mr. Coan in the *Recorder*; I think it would do good. [Send it along—Ed.] Let the Christianity of America receive the rebuke of these heathen Christians, and profit by their example.

Excuse the length of this article. The vast importance of the subject is my only apology. Praying that God would arouse the Christians of this country, and particularly our denomination, to the guilt of either directly or indirectly countenancing war. I subscribe myself a professed disciple of the Prince of Peace. S. S. GRISWOLD.

For the Sabbath Recorder.

REPLY TO ELI S. BAILEY.

It affords me great pleasure to reply to any inquiries which my much-esteemed correspondent may propound over the signature of his own name, and to offer further explanation of my positions, which he criticises with so much fairness and good feeling. I deem it a favor to discuss this question with one who so well understands the courtesies of debate, and the principles of scriptural and scientific investigation; and hope that I may not be wanting in consideration due to his age and position. There are but few men living, for whose opinions I entertain a higher regard, or to whom I am more indebted for early religious instructions. It is not at all strange, however, that persons educated at periods so wide apart, should arrive at very different conclusions on subjects which lie within the province of scientific investigation. This difference of opinion, however, is no evidence of disrespect. Every public disputant must stand on the merits of his own cause, and claim no superiority, except such as his own ability shall guarantee him. In this spirit I have thus far submitted my views to the public, and in this spirit shall continue to submit them, so long as my correspondent may deem it proper to call me out.

I shall reply to the strictures of my friend in his last communication, in the order of his paragraphs, beginning with the third, and omitting such as do not seem to demand a reply. The reader will please refer to those paragraphs, and save the trouble of quoting them.

3d. This paragraph represents me as claiming the characteristics of demonstration for all the views I have put forth, and holds me responsible to demonstrate all I have said. This view greatly misrepresents my positions. In proof of the great age of the earth, I have offered both *facts* and *theory*, and one instance of what I have said "had all the certainty of *mathematieal* demonstration."

The first *fact* which I stated was, that the *stratified* rock extended to the depth of about ten miles, and that to the depth of about seven miles this rock contained vast quantities of animal and vegetable remains; and I inferred from this fact the vast age of the world, an inference which seems inevitable, if the fact be admitted. But the fact is doubted, and proof demanded, because "my views, without such demonstrations, were calculated to shake the faith of weak believers in the divinity of the scriptures." If my *mere statement* of the fact shakes the faith of "weak believers," *proof* of this fact would shake it still worse. My view is, that this fact can only shake the faith of the weak believer in a *false* interpretation of the scriptures, while it will strengthen his faith in a *true* interpretation; and hence I urge it upon the attention of all who would learn the true import of God's Word. I shall never comply with the demand to demonstrate this *fact*, and simply because it is not a thing to be demonstrated by pen and ink, by any process of reasoning. It is a fact ascertained by actual observation, and if "weak believers" cannot believe those who have observed this fact, their only alternative is to remain in unbelief, or else go and observe for themselves. The scientific world believes this fact, bebause it has *seen it*, and it most earnestly implores the unscientific world to "come and see" also.

If I were to write a treatise on the science of human anatomy, and should affirm that the heart has four distinct compartments through which the blood passes in its course of circulation, and should predicate some conclusion on this *fact*, I should hardly have patience with an objector and critic who should continually ask, "How do you know the heart is thus constructed," and persist in demanding "demonstration." It would be sufficient to reply, that it was a fact arrived at by actual observation. Thousands of scientific men have dissected the heart, and have seen its structure. If this is not sufficient ground of belief to the objector, he has only to dissect a heart himself, or remain in unbelief.

The case under consideration is exactly parallel. Thousands of scientific men, for the last twenty years, have been measuring the thickness of the different strata, as they present accessible points in different localities, and the aggregate thickness is found to be about ten miles. Now, if unscientific men disbelieve the fact thus arrived at, let them go and measure it themselves, or remain in unbelief. They ought at least to be cautious how they impute Infidelity and Atheism to those who have got a little ahead of them in the discovery of truth.

When it is insisted, that I shall demonstrate "to the illiterate Christian," that Herschel's telescope reveals stars at such a distance that their light must have been millions of years in reaching the earth, I again reply, that it is a fact arrived at by actual measurement, under the care of men eminently qualified for the task, by the aid of instruments of great complexity, and formula constructed on principles developed only in the higher mathematics. It would be no "kindness to the illiterate Christian" to fill a newspaper article with drawings of these instruments, and samples of these formula. He could not understand them, and if he cannot believe that others more favored than he can use them in determining the distance of stars, he has only to remain in ignorance.

What I affirmed concerning the former fluidity and present internal heat of the earth, I did not affirm as fact, but as theory, and most cheerfully gave the demonstration which seemed satisfactory to my own mind, and which is also satisfactory to thousands best qualified to appreciate the evidence given. I stated six facts, out of the many which lead to the conclusion in question. I deem these facts conclusive evidence of the truth of the hypothesis, because I deem them unexplainable on *any* other hypothesis. If my interrogator will take the trouble to explain all these facts on *any other* hypothesis, I may then consider the propriety of abandoning the one I have put forth. Until he does this, these facts seem to me to give the doctrine of internal heat all the force of demonstrated truth. If this hypothesis be true, I see not how we can avoid the conclusion, that the earth is hoary with age. But if this be *not* true, the phenomena of the *stratified* rock is equally significant of the world's age.

My position in relation to *facts* arrived at by actual observation, and *theories* to be demonstrated, I hope is understood. Whatever *facts* I state on the authority of *observatiou*, I shall not attempt to demonstrate; but whatever hypotheses I propose, I will endeavor to prove. This I believe to be the true attitude of a disputant; and while I shall occupy it myself, I most cheerfully award the right to others.

6th. I do not claim that the "common version of the Mosaic record is a perversion of the Hebrew text," but that the version that I have given it, on the authority of the best Hebrew scholars in the world, is a *better* rendering of the text, and that the *facts* of science demand such rendering. No violence whatever is done the text to explain it in accordance with scientific developments, and hence we are bound thus to explain it, or deny that God's *works* can at all illustrate his *Word*.

7th. This paragraph overlooks the fact that I referred to the opinions of learned divines corroborative of the view which I have taken, who wrote long prior to the date of geological science, and, consequently, "had *no* theory to defend," but predicated their opinion on the obvious meaning of the text itself.

8th. It is stated, that there is a granite rock in Rhode Island, having certain impressions resembling the track of a man and of an ox, and I am asked, "If your theory of the formation of the earth be correct, how came those impressions there?" Now, if I were disposed to do as I am done by, I should simply deny the existence of any such tracks, and pertinaciously demand "demonstration, not hypothesis." I should have no reason to complain if my opponent should reply, that it was not an hypothesis to be demonstrated, but a fact to be believed. So I consider it and shall treat it accordingly. I have no doubt but that said rock, with said impressions, exists, just as my friend has stated. I have visited several of such rocks in Rhode Island, and have this day visited one in Connecticut of the same sort, called "Devil's Rock," because it has an impression which "they say" resembles the devil's foot. Never having seen the pedal extremity of *his majesty*, I could not certify to the identity. There are also other impressions, which resemble the human foot, of various sizes; while others resemble other things; one, in particular, bearing a striking resemblance to the profile of a dog. The explanation of such phenomena is very obvious, at first sight, to any one who knows the structure of granite rock, whether he has ever heard of a geological *theory* or not. These impressions have no sort of connection with my theory, or any other, concerning the formation of the earth. They are simply the result of accident, such as gives real and fanciful resemblances through the vegetable and mineral kingdom. The septaria or turtle stone is an illustration. Granite rock is composed of quartz, feldspar, and mica, mixed in different proportions in different rocks, and in all degrees of comminution. In a large bed of granite, but a few rods from where I now sit, those three ingredients often exist in separate veins, of considerable extent, while a little further on they are reduced to great fineness and thoroughly blended, so as to form the valuable granite so extensively used in the arts. Mica is the softest of these three ingredients, and when it is finely pulverized and mixed with but little or none of the other ingredients of the rock, is easily worn out by the action of winds and rains, leaving impressions corresponding to the action of the denudating cause, and the amount and form of the soft substance to be washed out. This is the explanation of these impressions. The mica of the rock, which existed nearly alone in these places, has been worn out, and left impressions of various and fanciful forms. This explanation will commend itself to any man who will stop a moment and examine them, having no theory to sustain. But it should be remembered, that such isolated phenomena as these afford no ground for a theory concerning the whole earth, and cannot for a moment balance against phenomena of universal occurrence throughout the crust of the earth. I have spent the last three months in the midst of granite rocks, often projecting for miles along the coast. The more I visit these "foundations of the earth," the more I am convinced that they were once in a melted state. The evidence of fire is upon them, obvious at the first glance. The refuse of the smith's forge bears no stronger evidence of fire, than do these rocks. But all the *unstratified* rocks bear the same evidence, and even the lower layers of the *stratified* rock have been subjected to great heat, as they most clearly evince in their own appearance. This is as might be expected, since they were laid down while the crust of unstratified rock was yet comparatively hot.

I hope my friend may throw some new light on the scenery of Niagara Falls, and when he has sufficiently criticised *my* views, I hope he will give his *own* views, and install me in the critic's chair, as it is often pleasant to change works. D. E. MAXSON.

Waterford, Ct., July 22, 1855.

WHY IS NOT MY ARTICLE PUBLISHED?

Happy is the editor, who has not often had this question grate sharply on his ear. An offended correspondent invades his sanctum, exclaiming, "Where is my article? I sent it weeks ago, and have looked and looked for it ever since. Do you mean never to print it?" We have not yet become quite hardened to this experience, and at this heavy burst of indignation, we are apt to feel like the poor debtor, when one took him by the throat, saying, Pay me what thou owest! But if we can stay judgment a little, perhaps we can muster an apology. Hearken, good friend, and be assured that we do thee no wrong.

In the first place, the article which you were so kind as to send us, was unconscionably long, and such are not exactly in our line. We do not print whole sermons, nor even didactic essays. We like short pieces and pithy paragraphs. But yours was "a linked sweetness very long drawn out." Page after page the manuscript ran on, until we saw that it must overreach one column, and perhaps stretch to two. At this we sighed that mankind should be deprived of such a monument of patience and wisdom, and reluctantly laid it on the shelf. Besides, we may whisper in your private ear, our readers are difficult to please, and do not appreciate the merit of such learned productions. Indeed, we are almost convinced that metaphysics and long discussions are thrown away upon them. We assure you, therefore, that your great talents are entirely lost in such small business as writing for newspapers. Productions so elaborate demand a more stately and dignified organ. You had better take this masterly performance, and have it published in a book, or at least in a Quarterly Review. Such a treasure of thought ought not to be embarked on a boat so light and [illegible] a common journal. Here it would stand no [illegible]. But printed on a more enduring page, and bound in calf, and shelved in a library, it may go down to the latest posterity.

Again, communications often come to us, which are rather goodish, but which are so loosely put together, and written in such a careless and slovenly style, that it takes more time to revise them, and put them into shape, than they are worth. Often have we spent hours in mending bad grammar, in striking out repetitious sentences, and reducing an article of unwieldy bulk to a portable size. Of course, this remark is not intended for that respected correspondent with whom we are now holding conversation. We would not intimate such a fault in his priceless manuscript. But we may perhaps suggest, without offense to his literary reputation, that it was not very legibly written. In this he only resembles many other great men. Geniuses have often a defective chirography. Byron's page was covered with blots and erasures. A sprawling hand may therefore be considered as a sign of strong internal agitation, and one of the marks of an eccentric and original intellect. Indeed, we have known many writers, whose ragged sentences were the most decisive proof of genius which their compositions afforded. Still it must be confessed, that these little peculiarities are somewhat troublesome to the printer. We can stand a good deal in this way. Our printer has an eye like a microscope, and is a very Champollion in deciphering hireoglyphics. But we hardly think it fair to try his skill too often in unraveling a gnarled and tangled web.

Therefore be so good, beloved correspondent, as to bear in mind these slight hints in your future communications. Not that we presume to impose a restraint upon any American who takes pen in hand. This is a free country. Our friends may write as long or as short as they please, being governed therein by the nature of the subject. We would not have every piece cut to the same exact length. But we give all fair warning, that essays, badly constructed or illegibly written, are likely to be tossed without ceremony into the box of waste paper; and that, other things being equal, *a short piece is twice as likely to be inserted as a long article.* Let them keep this in mind, and make their pieces brief, clear, and sparkling with thought, and they will not often have occasion to ask twice, *Why are they not published?*

[N. Y. Evangelist.

DR. SPENCER AS A PASTOR.

The late Dr. Spencer, of Brooklyn, has often been spoken of as a model pastor—with how much propriety, the following extracts from a sketch of his life will show:

"He always carried with him a book, containing a full directory of his congregation; and in it the date of each visit was registered opposite the name. It was his *rule* to call on each family who attended on his ministry, once every year, and as much oftener as circumstances seemed to render it desirable. None were passed by in making these visits. The poor, the obscure, the lonely widow, were as sure to receive the pastor's call as the rich and the distinguished. We never heard it said of him, as it is sometimes said of good ministers, 'My pastor never calls to see me.' * * * Through the lanes and alleys of the city he often went, exploring the neglected fields of misery and moral degradation; an interesting memorial of his kindness and care might be gathered hence. The sun never beat too fiercely, the storm never raged too severely. Seldom was he away during the hot and sickly months of summer, preferring to wait until his brethren had returned from their annual recreation; keeping his church open, and ready for any service which might be demanded of him. He had, too, a wonderful faculty of *knowing* people; a person could not attend his church many Sabbaths and fail to make his acquaintance; he would inquire him out; find where he lived; know something of his history, and interest himself in him * * * In the *young* of his charge he took a deep interest. He had a remarkable faculty for adapting himself to their feelings and states of mind. Familiar and affectionate, like a father, he very generally secured their confidence; and by the tender interest he felt in them, and the power of his persuasions, won many of them to the Saviour. Seldom was one of his years more tenderly loved by the younger portion of his flock; and yet he never sacrificed in the least the dignity or proprieties of the sacred profession. He did not forget even those who were temporarily away from his ministry, but followed them with his counsels and entreaties. Many scores of letters has he written to such while at school, or on visits from home, full of ministerial love and solicitude, pleading with them for Christ and heaven."

GOD HEARS PRAYER.

In 1805 there was a very distressing drought through most parts of New England; and in none was it more sensibly felt than in the central part of Massachusetts. It threatened the almost entire failure of the potato crop, which at that day was the chief dependence of poor people for subsistence. Berries dried upon the bushes, grass crumbled under the feet of travelers, fields of corn were shriveled and dying, cattle lowed in the fields for fodder, the dew no less than the rain was withheld, wells and streams were in a great measure dry, and those who had no heart to look to Heaven for relief, knew not where to look.

Under these circumstances, the minister and people in a certain town, where the means of living were in less abundance than in many other places, set apart the 31st day of July for fasting and prayer. The day was, in appearance, like most others that had preceded it, clear and warm till towards night, furnishing no indications of a change. The writer of this attended the religious service of the occasion. In the afternoon the minister of the place led in prayer, with deep religious feeling and earnest importunity. After stating the distresses of the people, with humble confession, amongst other petitions he presented the following, "O Lord God, we beseech thee, let it be known *this very day* that there is a God in Israel who heareth prayer; and let showers of rain descend to refresh the scorched earth. Deny not our request, for the honor of Thy great name."

After taking a little refreshment, I mounted my horse to return home, six or eight miles. Before I had proceeded one hundred rods, the heavens dropped rain; and within one-half mile I had to turn in to save myself from a thorough drenching. After tarrying till the rain abated, I passed on, and found the road filled with puddles of water; and this I expected to find even to my own door. But no; when I left the town for which prayer had been offered, I found no signs of rain, except a few drops, insufficient to lay the dust. Through all the following night repeated and plentiful showers fell upon that favored town; and to that place they were almost entirely confined. In all the neighboring towns the "fleece was dry." As I reached home, and especially when I heard the circumstances above related, the truth was impressed upon my own mind, that the Christian's God was the hearer of prayer. [Puritan Recorder.

A "STRANGE" PREACHER.

His name was Strange. Many will think his conduct was strange also. He was a zealous preacher, and a sweet singer. Nothing gave him so much pleasure as to go about the country preaching and singing. A benevolent gentleman, well off in worldly gear, desiring to make him and his family comfortable in their declining years, generously presented him a title-deed for three hundred and twenty acres of land. Strange accepted the donation with thankfulness, and went his way, preaching and singing as he went. But after a few months he returned, and requested his generous friend to take back the tittle-deed. Surprised at the request, the gentleman inquired:

"Is there any flaw in it?"

"Not the slightest."

"Is not the land good?"

"First-rate."

"Isn't it healthy?"

"None more so."

"Why then do you wish me to take it back? It will be a comfortable home for you when you grow old, and something for your wife and children if you should be taken away."

"Why, I'll tell you. Ever since I've had that deed, I have lost my enjoyment in singing. I can't sing my favorite hymn with a good conscience any longer."

"What is that?"

"This:"

"No foot of land do I possess,
No cottage in the wilderness,
A poor wayfaring man.

"I dwell awhile in tents below,
Or gladly wander to and fro,
Till I my Canaan gain.

"Yonder's my house and portion fair,
My treasure and my heart are there,
And my abiding home."

"There!" said Strange, "I'd rather sing that hymn than own America. I'll trust the Lord to take care of my wife and children."

He continued singing and preaching, and preaching and singing, and the Lord, said the lecturer, did take care of him and his children after him.

AN OLD POEM.

The annexed stirring old poem has the ring of the true metal, and is as applicable now as when it was written, for its philosophy is sound, and therefore universal.

Who shall judge a man from manners?
Who shall know him by his dress?
Paupers may be fit for princes,
Princes fit for something less.
Crumpled shirt and dirty jacket
May beclothe the golden ore
Of the deepest thoughts and feelings—
Satin vests could do no more.
There are springs of crystal nectar
Hidden, crushed, and overgrown.
God, who counts by souls, not dresses,
Loves and prospers you and me,
While he values throne the highest
But as pebbles in the sea.

Man, upraised above his fellows,
Oft forgets his fellows then;
Masters—rulers—lords, remember
That your meanest hinds are men!
Men by labor, men by feeling,
Men by thought, and men by fame,
Claiming equal rights to sunshine
In a man's ennobling name.
There are foam-embroidered oceans,
There are little reed-clad rills,
There are feeble inch-high saplings,
There are cedars on the hills;
God, who counts by souls, not stations,
Loves and prospers you and me;
For to Him all vain distinctions
Are as pebbles in the sea.

Toiling hands alone are builders
Of a nation's wealth or fame;
Titled laziness is pensioned,
Fed and fattened on the same,
By the sweat of others' foreheads,
Living only to rejoice,
While the poor man's outraged freedom
Vainly lifted up its voice.
Truth and justice are eternal,
Born with loveliness and light;
Secret wrongs shall never prosper
While there is a sunny right;
God, whose world-heard voice is singing
Boundless love to you and me,
Sinks oppression with its titles,
As the pebbles in the sea.

MASSILLON.

Massillon, in the first sermon he ever delivered, found, upon his getting into the pulpit, the whole audience in a disposition no way favorable to his intentions; their nods, whispers, or drowsy behavior, showed him that there was no great profit to be expected form his sowing in a soil so barren; however, he soon changed the disposition of the audience by his manner of beginning. "If," said he, "a cause the most important that could be conceived, were to be tried at the bar before qualified judges; if this cause interested ourselves in particular; if the eyes of the whole kingdom were fixed upon the event; if the most eminent counsel were employed on both sides; and if we had heard from our infancy of this undetermined trial, would you not listen with due attention and warm expectation to the pleadings on both sides? Would not all your hopes and fears be suspended upon the final decision? And yet, let me tell you, you have this moment a cause of much greater importance before you; a cause where not one nation, but all the world, are spectators; tried, not before a fallible tribunal, but the awful throne of Heaven, where not your temporal and transitory interests are the subject of debate, but your eternal happiness or misery; where the cause is still undetermined; but, perhaps, the moment I am speaking may fix the irrevocable decree that shall last forever. And yet, notwithstanding all this, you can hardly sit with patience to hear the tidings of salvation. I plead the cause of Heaven, and yet I am scarcely attended to."

PARTICULAR PROVIDENCE.—There perhaps never was a time in which the doctrine of a particular Providence was more questioned and doubted than in the present; and yet the scepticism which obtains regarding it seems to be very much a scepticism of effort, conjured up by toiling intellects, in a quiet age, and among the easy classes; while the belief which, partially and for the time, it overshadows, lies safely entrenched all the while amid the fastnesses of the unalterable nature of man. When danger comes to touch it, it will spring up in its old proportions; nay, so indigenous is it to the human heart, that if it will not take its cultivated form as a belief in Providence, it will to a certainty take to it its wild form as a belief in Fate or Destiny. Of a doctrine so fundamentally important that there can be no religion without it, God himself seems to have taken care when he moulded the human heart. [Hugh Miller.

HAVE SOMETHING TO DO, AND DO IT.—The secret of all success in life, of all greatness, nay, of all happiness, *is to live for a purpose.* There are many persons always busy, who yet have no great purpose in view. They fritter away their energies on a hundred things, never accomplishing any thing, because never giving their undivided attention to any one thing. They are like butterflies, that flit from spot to spot, never gaining wealth; while the ant, who strictly keeps to a certain circuit around her hole, gradually lays up stores for winter comfort. Such persons are doomed to be dissatisfied in the end, if they are not sooner; for they will find in the race of life, they have been passed by all who had a purpose. It is not only the positive drones, therefore, but the *busy idle*, that make a blunder of life for want of a purpose.

Make the *most* of yourself, your talents and opportunities, wasting no idle breath or empty sighs on what you might have been under kinder auspices. If your Maker had thought any other talents or opportunities better for you, he would have given them to you.

Every vice and folly has a train of secret and necessary punishment. If we are lazy, we must expect to be poor; if intemperate to be diseased; if luxurious, to die prematurely.

A fool in a high station is like a man on the top of a monument—everything appears small to him, and he appears small to everybody.

A WORD TO BRO. GRISWOLD.

The "perplexity" under which S. S. Griswold professes to labor, "as to what Bro. B.'s theory of the resurrection is, as well as of the soul in its intermediate state," cannot, we apprehend, be very embarrassing. He has occupied about eight columns of the *Recorder* in attempting to controvert our position, as though he understood it perfectly. After all this, a demand for further information strikes us as singularly out of place. Has he but just entered the portals of the discussion? Are his eight columns merely introductory to the mighty mass that is forthcoming? If you are really in doubt about our views, Bro. G., why did you not say so at first, and thus save labor for others as well as for yourself? To announce, after six somewhat lengthy communications, that you have discovered that you do not understand what our views are, when all along you have written as though you did, does not display very good tact, to say the least.

Go on with your argument. If we, and our brethren generally, are laboring under great error in regard to the resurrection and the future life, it is time we were relieved. If you have struck the path of truth, show it to us also, that we may walk therein. Speak out plainly what you wish to say, and in as few words as justice to the subject will admit. Experience, it seems, has taught you, "that to search for truth as for hid treasure will subject one to the charge of fanatic, or changeling, and to embrace one's honest sentiment, obtained by diligent research and prayerful study, may farther subject him to the charges of scepticism and infidelity." But if this is the way in which you have obtained clear light on this important question, do not be afraid to let it shine. Remember, "he who, through fear of popular opinion, or ease-loving indulgence, is deterred therefrom, must be a wicked and slothful servant."

You have given some pledges, in regard to this discussion, which are not yet fulfilled. In your article of May 24th, you promised to discuss the question, whether revealed religion does so modify the divine government as to require recompense additional to the course of nature. Have you distinctly met this question?

In your article of June 21st, you say, "I apprehend there is nothing in the nature of the resurrection which will ever counteract, repair, or restore natural death." What you mean, exactly, by this language, does not [illegible] elucidation of this I now reserve for future consideration." Has it been "elucidated?"

June 28th, you say, "If I can enlist the patience of my readers, I intend to give what seems to me the theory of the subjects under consideration." How much "patience" your readers will exercise, we cannot tell, but we have no doubt that many of them are desirous of getting at the truth. If the "true theory" is with you, let us have it.

You then add, "I shall now proceed to examine Bro. B.'s theory of Natural and Revealed Religion, and the state of the Dead as affected thereby." And we expected that, in the next number, it would be forthcoming. Instead of such examination, however, you occupied your whole communication with animadversions upon what you chose to designate the Calvinistic doctrine of the Atonement, and left your readers to infer, that the vicarious nature of the Atonement was, with you, a doctrine quite out of date. The diversity of opinion which had obtained on this point, had led to something more than a suspicion, with you, that the believers of the doctrine "could not explain the plan of salvation consistent either with scripture or reason," and had compelled you "to seek a different explanation, which would be given in its proper place."

Supposing these animadversions to be but incidental, and introductory, to what you had promised, we awaited "Number Six," expecting to find the subject fairly grappled with. Yet, after talking a while *about* the matter, you close by expressing your "perplexity" as to our views, and your disposition to wait till we have delivered ourselves more fully! And all this after having yourself, in your first article, made out a synopsis of our views, in *fourteen* distinct particulars, which led us, and (we imagine) everybody else, to suppose that you considered yourself in possession of all that was needed as the groundwork of your proposed review!

Upon your denial of the vicarious nature of the Atonement—a doctrine most fondly cherished by all true Christians—and your passing remark, that "the sufferings of Christ were rather incidental than penal or inflictive," we have nothing to offer at present. But your disclosure of such a view, as well as the insinuation that you have carried, all along, that the commonly received faith of Christians respecting the resurrection is not founded in truth, has placed you in a position which gives your brethren a right to know how you stand in these respects, and whither you intend leading the lambs of the flock that may be committed to your care.

In conclusion, we would say that, since you evince some skill in tearing down the tabernacles of others, it behooves you to see to it that they have something more substantial in which to take refuge. Strip off our clothing, if it is not suitable for us, but do not leave us naked. If you have any thing better for us than what we have, all along, cherished as valuable, give it to us, but do not confine your labor to the mere work of undermining one's creed. T. B. B.

LETTERS FROM PALESTINE—NO. 13.

Notes of a Journey from Jaffa to Jerusalem, Bethlehem, and Artas. [Concluded.

April 13, 1855.

My last letter closed with an account of our first walk outside the wall, from St. Stephen's gate on the east, to Zion's gate near the south-west corner of the city. We entered Zion gate just after sunset. Before us, at the right, was a row of low stone houses, inhabited by lepers. Poor, miserable creatures! One shudders at the sight of them. Turning to the left, we went into the Armenian quarter. The Patriarch's house and the convent are fine buildings. Through a half-open gate we had a peep at a very fine garden. This is the cleanest part of the city. Hence we pursued our way to our lodgings. Jerusalem looks cleaner, and has more business going on within its walls, than we expected.

Did not feel in a very spirited mood for a walk to-day, for the reason I have had scarcely any sleep for three nights past. Last night in particular, I was annoyed and made exceedingly nervous by an attack of a legion of *punaises de bois.* An hour after retiring, was forced to get up and strike a light. Then came the battle. First a shake and a brush, then a killing, but the odor was too much. The white covered divan where I had lain, was fairly black with them. I retreated, exclaiming, "There are more than two hundred." The company laughed. They thought there *might be a hundred or more!* Picked a dozen from the children, who were sleeping soundly, and left them to be attacked again. Made a bed on the floor, but the pests soon routed me again, when, after another thorough riddance, I tried to get some rest, but in vain, till about daylight.

In the afternoon, walked through a part of the street called Via Doloroso, or the Sorrowful Way, along which Jesus was led to be crucified. Passed the Ecce Homo, a room on an arch over the street, whence, as Jesus passed, the people said, "Behold the man!" A little further on is the building called Pilate's Judgment Hall, now occupied by the Pasha. Still nearer St. Stephen's gate, and just north of the present area of the Mosque of Omar, is the so-called Pool of Bethesda, but which is doubtless a part of the ancient fosse which ran along the north side of the fortress Antonia, which defended the temple. The location of these places is the work of Catholic tradition. Passing out of St. Stephen's gate, we turned to the left, and went north and north-west to the tombs of the [illegible], or, as some suppose, of the Empress Helena and her family. The valley of Jehoshaphat lay at our right. Our path led through fields of wheat and barley, planted also with olive trees, some of which look very ancient. The ground here looks like rubbish from the foundations of buildings. On our way back, in a southerly direction, so as to encompass the ancient site of the city, we passed mounds and ruins of ancient walls, showing thereby that the city of old extended nearly a mile north of its present limits. We entered Damascus gate. On a hill opposite is Jeremiah's cave and a Mohammedan cemetery. We arrived at our room just as the Sabbath drew on.

14th, Sabbath.—A happy day to my soul. We held a prayer-meeting, in which we tried to remember the interest of the Sabbath in all parts of the world. Received calls from brother Roberts, a lay missionary, and Rev. Mr. Lowndes, agent of the British and Foreign Bible Society.

15th. Last evening discussed the Sabbath question with two ministers of the gospel. Had evidence that the bulwarks of a false education are very strong; nothing short of the Word and Spirit can pull them down. At 8 A. M., attended Arabic service in the Episcopal school-room. Rev. Mr. Bowen, of Nablous, read the prayers; a layman read portions of scripture; Rev. Mr. Bistany, of Beirut, preached on the subject of prayer. At 10 A. M., attended English service in the Episcopal church. Bishop Gobat preached a sermon full of very good sentiments on faith in Christ. In the afternoon went out to the Mount of Olives. From the Mohammedan minaret, situated on the highest point, we had a view of the Dead Sea, the valley of the Jordan, and mountains of Moab, on the east, while at our feet on the west lay Jerusalem. The scene around us awakened recollections of the past, and not the least from among them was impressed upon our mind the lamentation of Jeremiah: "How doth the city sit solitary that was full of people! how is she become as a widow!" Chap. 1: 1. "How hath the Lord covered the daughter of Zion with a cloud in his anger, and cast down from heaven unto the earth the beauty of Israel, and remembered not his footstool in the day of his anger." Chap. 2: 1. Leaving the minaret, we descended to a point or brow of Olivet, overlooking Bethany and within its district, which is said to be about a Sabbath-day's journey from Jerusalem. It may not be without reason that some have supposed this the place whence our Saviour ascended to heaven. The southern part of the city or Zion is visible from this point. Seating ourselves here upon some rocks in the midst of a field of barley, we sung a portion of the Psalms, read the account of the ascension, and prayed. To our mind, we thought it quite an appropriate place for prayer in behalf of missions. We poured out our supplications in behalf of all missionaries, of slaves, of the Sabbath, of peace, and for due preparation for His coming in that day when His feet shall again stand upon the Mount of Olives, which is before Jerusalem on the east. Zech. 14: 4. We all felt that it was good to be there.

16th. Visited a garden belonging to a Jew within the walls, on Mount Zion; also the American cemetery, English cemetery, garden and large new building for a boarding-school; thence across Hinnom to the tombs cut in the rocks, and Aceldema; thence into Jehoshaphat below Hinnom to Nehemiah's well, or En-Rogel of scripture. Returning along Jehoshaphat, we visited the upper and lower pools of Siloam, and thence up the Tyropocon to the city wall, a little way south-west from the site of the temple, whence, turning to the left, we entered the city at Zion gate.

18th. Went to Bethlehem and Artas. Visited Rachel's tomb "in the way to Ephrath, which is Bethlehem." Gen. 35: 19, 20. Visited at Bethlehem the convent, and were shown the places, in under-ground rooms, where they pretend Christ was born, where he was cradled, and the seat where the magi sat when they came to worship him. We know that Jesus was born in Bethlehem, but these pretended localities, dressed as they are, appeared to us idolatrous and abominable. The Jews who accompanied us remained at the door of the convent. While we were absent within, about a hundred boys collected and began to stone them. At length they *were* permitted to enter the first room till our return. We remonstrated in vain. The men about the convent said, "The Jews are wicked; they crucified Christ, and ought to be stoned." Went in search of the governor, but he was not to be found. The boys stoned us as we left; the Jews were quite lame from their wounds. We were glad to get away from the place. Had we taken a cavasse with us, all would have been right. Bethlehem is said to be inhabited by *Christians.* Such samples of Christians are to be found almost everywhere in the East, and from them the Jews have formed *their* idea of Christianity. It is not any wonder they are unbelievers. Half an hour brought us to the deep valley or gully of Artas. The bottom of the valley is a narrow strip of land, perhaps two hundred feet wide, enclosed by high mountains, the upper part of which is laid out in fine gardens. The town part of these gardens was occupied some years since by sister Minor, in company with others. A living fountain, issuing from the rocky mountain side, is used for irrigation. Half an hour more brought us to Solomon's pools. There are three of them, one above the other. They are old enough to have been built by Solomon. About fifteen minutes from the pools, on our way to Jerusalem, we were overtaken and stopped by an officer, who claimed a cloak found on the donkey of our Jewish landlord. We had given the donkeys to the drivers while we strolled on foot about the pools. Some one had picked up the cloak, supposing it belonged to one of the party, or else to play a trick upon us, and thereby obtain a bucksheesh. At first we were ordered to return to the pools, and give an account of ourselves to the commander, but a present of two and a half piastres, ten cents, persuaded the officer to take the cloak and return without us. We thought of Joseph's cup in Benjamin's sack. Gen. 4: 4.

19th. In company with the American Consul and others, visited Gethsemane. It is opposite St. Stephen's gate, on the east of Jerusalem, and at the foot of Olivet, just across the Kidron, close by and at the right of the road or path leading up the mountain. Doubtless the place of the garden was somewhere in this valley, probably higher up, especially if it was a place of retirement. The present location must always have been too public for private devotion. But Catholics love to pray to be seen of men. The keeper, an old monk, talked very piously about the garden, and showed us where (outside the wall) Judas betrayed his master with a kiss, also where the apostles Peter, James and John fell asleep during the prayer and agony of our Lord. The latter is upon some rocks close under the mountain, and entirely without the garden.

20th. Brother Kraus introduced me to Mr. John Bowes Johnston, a Sabbatarian, who lives a pious, secluded life, waiting, as he says, the coming of the Lord, which he expects very soon. He once belonged to a Baptist church in London, came to Jerusalem seventeen years ago, and about that time commenced keeping the Sabbath; since then he has not spent a single night without the city wall. He seldom visits any one, spends his Sabbaths fasting, and appears to commune much with the Lord through His Word and prayer. He is supported by a life annuity, which he provided for himself previous to leaving England. He appeared very humble, and his conversation showed that he was a diligent student of the Bible. His room, and everything about him, looked very neat and comfortable.

21st. Another blessed Sabbath in Jerusalem; yet how unlike the Sabbath of old. The time is coming, when the nations who come up here will truly delight in the Sabbath of Jehovah. Last Sabbath visited the Spanish Jews' synagogue. This morning went to the Polish or German Jews' synagogue. Had a precious meeting at our room in the afternoon. Half a dozen were present.

22d Last week had a conversation with Lord N——, on the Sabbath. Afterwards sent him a note and some tracts. Have now received a note in reply to mine, stating that he will read the tracts with all the attention they deserve. If he does that, according to my opinion of the *merits* of the tracts, he will be sure to become a Sabbatarian. I hope he is a Christian, and therefore pray with more assurance that this portion of God's truth may find a lodgment in his heart. I am informed that several Sabbatarian Christians from Russia came here years ago; that part have become Jews, and part Episcopalians. There are others who are said to be inquiring on the subject. Am thankful to God for the frequent opportunities the past few days of presenting this question to Jews and Gentiles, as also, in the same private way, of preaching Christ. My daily prayer is, that I may find a wide door, open and "effectual," in this city, and everywhere I go, for rousing the attention of the people to seriously consider the claims of the *true weekly rest* of the Lord our God.

26th, at Jaffa. Left Jerusalem yesterday, and came to Ramlah last evening. Arrived home about noon to-day, truly thankful to our Heavenly Father for his tender mercies to us on our journey. The tour has been undertaken under much pecuniary embarrassment, and on this account frequently obliged to sleep on damp floors, and without suitable food, thus proving quite detrimental to my health. I took a violent cold; was laid by two days, and am not yet recovered from it. I do not believe it is my duty to do so again, yet I know, in attending to the interests of the mission, I suffer myself to go forward under pecuniary circumstances that are very trying. Thus far no appropriation has been made to me for traveling expenses. The interests of the mission seem to demand that I should visit some parts of the land, but how to do it is a question. I make this statement, believing the friends of the mission will do all that is necessary to render my situation as comfortable as it can be in a land so barren or destitute as this is of home comforts. At the same time, I would advise the friends that we feel the daily need of being upheld and protected and blessed by the Lord of Missions. Again would I beg an interest in their prayers at the throne of grace. • WM. M. JONES.

YEARLY MEETING.

The Yearly Meeting of the Seventh-day Baptist churches in Rhode Island and Connecticut will convene with the Pawcatuck church, commencing with a sermon by Eld. C. Chester, on Sixth-day evening August 24th, 1855.

Circular.

To the Seventh-day Baptist Churches in Rhode Island and Connecticut:—

DEAR BRETHREN AND SISTERS IN CHRIST—By your appointment, at our last Yearly Meeting, it devolves on me to give public notice of our next annual gathering, which is to convene on the evening of the 24th of August, with the Pawcatuck church.

I take the liberty, in connection with this notice, to present to you a few thoughts relating to this contemplated meeting, towards which I trust many others with myself are looking forward with pleasing expectation, as a time of profit to those who may enjoy it. That it may prove such is our earnest prayer, and the sole object of this circular.

We believe that these annual meetings, composed of the churches located in this portion of the denomination, most of which are so circumstanced that they can with but little inconvenience assemble yearly in some central locality, have been, and will continue to be, by the blessing of God, a lasting good to our beloved Zion. At our two last meetings, which were held with the first church in Hopkinton, it will be remembered, that many of the sermons were mainly occupied with the lamentable backslidings and delinquencies of the churches, and urging the duty, and pointing out the way, of a hearty and speedy return to God and duty. It will be recollected also, that most of the prayers, which were offered with marked fervency, were characterized with the same general sentiments and aspirations. There were many who then felt a confident assurance that these sanctified efforts would meet the Divine favor, and result in good to these languishing yet precious vines of God's own planting and care, and that these earnest and faithful appeals from the sacred desk, and heart-broken intercessions, offered by brethren and sisters, that God would again revive his people and convert souls, would not fail of their effect on the unconverted. Nor have we failed to realize, in some good degree, these anticipations. Since that time a number of these churches have been blessed with spiritual refreshings, and to some of them souls have been added, which we trust will be saved. Perhaps at no time during the last fifteen years, have these bodies, as a whole, exhibited more visible marks of union and prosperity than at present. That these gratifying indications are owing *solely* to the influence of these annual devotional gatherings, we by no means claim, but that they have *contributed largely* to impress the churches with the criminality of backsliding and religious inactivity, and to refresh the minds of both ministers and people with the importance of putting away their spiritual drowsiness, and laboring more earnestly for the salvation of souls, we think no one will question.

In these meetings the ministers are permitted to enjoy a rare luxury. An opportunity is generally afforded for most or all of the active ministerial gifts to be exercised. Thus each one is permitted a privilege but seldom enjoyed by pastors, and one which is of no small advantage to them, to hear the gospel dispensed by their co-laborers in the field, and also to become better acquainted with their views of the immediate claims of God on the church and the world, and with their modes and manner of presenting and urging them—favors which they know well how to appreciate, and which we trust they are not slow to turn to good account in their labors with their respective charges and congregations.

These annual gatherings present an opportunity to brethren and sisters, not only to hear the Word of Life, and pray and praise together, but to form, renew, and strengthen that social and fraternal bond, the existence of which is so highly important in churches of the same faith and practice, and especially where their fields of labor, as is the case with most of these churches, lie contiguous to each other.

Dear brethren, may we not regard this free and voluntary annual assemblage, which is happily disencumbered by the usual appendages of formal, deliberative organizations, as possessing such claims on us for its continuation and usefulness as shall secure for it a long and pleasing future history? May we not hope, that the one next approaching will be fully attended, and that, by the blessing of God, its influence may be more signally beneficial than any yet enjoyed?

A. B. B.

OUR COLLEGE AND THEOLOGICAL SEMINARY.

I am glad to see the subject again before the denominatien, and trust the effort will meet with a cordial response in all parts of the denomination. I believe the time has now come when we can safely enlist in the enterprise, not only without detriment to our academies, but, if wisely and harmoniously conducted, will contribute to their elevation and stability. I am not sure, however, that it will be best to fix the final location at the coming anniversary or session of the General Conference. I could wish that the whole endowment could be raised irrespective of the question of location, or any other side issues. I believe it would be better for the school, and the future good of the denomination, if all could so see it, and move right up to the work as God prospers us. My reasons I cannot now give in detail; but from careful inquiry and reflection, these views are becoming more and more the convictions of my judgment. It seems to me that the effect on the minds of the donors will be far better to consecrate what they devote to this object, without any reference to local or temporary interests. Their future coöperation will (for the same reasons) be more safely relied on. The school will be less likely to come in collision with the interests of any of our existing academies.

Again, the mutations of our denomination are not only developing wonderfully, under the influence of migrations, but other changes are being developed by the laws of progress, dashing on in the march of our country, and by the spread of truth among the people. These mutations must be understood, and ought to have weight in determining the question of location.

Institutions of learning, to be permanent and prosperous, must be the outgrowth of providential necessity, and not the creation of fancy and ephemeral interest. They must be so located as to meet the wants of those for whom they are built; and not only the present but future generations must be consulted, and their convenience and interest regarded.

In view of all these, and other considerations, I am unprepared to give an enlightened verdict in regard to the final location.

J. R. IRISH.

ALBION ACADEMY AND TEACHERS' SEMINARY.

The first anniversary of this institution occurred on the 4th of July. The exercises were held in a beautiful patch of native forest left near Albion Center, and consisted of orations, essays, vocal and instrumental music, closing with an address by Mr. Baker, editor of the *Janesville Free Press.*

Very few of the students who took part in the exercises had ever enjoyed advantages for intellectual training beyond those furnished in the common-school, previous to their connection with the school here during the past year, yet, in the taste, clearness and vigor of thought which characterized their productions, they did honor to themselves and their instructors. Though the anniversary coincided with that of the Declaration of American Independence, it was deemed appropriate to adjust the exercises to the tastes of literature. The occasion had no predecessors with which to be compared, but it was felt to be the index of an encouraging remove from the crude condition of pioneer life common to the settlement of a new country.

The next term opens on the 12th of September, and with the completion of the new hall, now in progress, and the enlargement of the Board of Instruction, the Trustees hope to be able to meet the increasing demand for a thorough academic course of study.

As the name of the institution implies, it is intended to bestow special attention upon the qualification of teachers. T. E. B.

THE PRISTINE FAITH OF THE REPUBLIC.—The Congress of Sept. 5, 1774, in which were Washington, and Roger Sherman, and John Jay, and Patrick Henry, and their kindred spirits, resolved that "*We will neither import, nor purchase any Slave imported, after the first of December next; after which time we will wholly discontinue the Slave trade, and neither be concerned in it ourselves, nor will we hire our vessels,* OR SELL OUR COMMODITIES OR MANUFACTURES, *to those who may be concerned in it.*"

REPEAL OF THE SUNDAY LAWS.—The New York *Courier* says that in all countries which have a national religion—a religion which the King, Emperor, or Czar swears, when he accepts the sceptre of authority, to uphold and preserve—laws for the religious observance of Sunday are well enough, and in perfect consistency with the genius of the people and the principles of the government. But, in this country, where no religion is recognized by law, and all sects and religionists are allowed to believe what they please, and the chief magistrate need not have any religious belief at all, Sunday laws are at once absurd, unconstitutional, and oppressive. They are oppressive to the whole body of the people, with the exception of a few uneducated bigots, and absolutely cruel in their effect upon the laboring classes. If it were put to vote whether the Sunday laws should be preserved or abolished, we believe there would be a tremendous majority for their total repeal, leaving every individual to keep any day holy that might suit his convenience or religious convictions.

THE NEW SECRETARY OF LEGATION TO CHINA.—The Providence *Journal,* speaking of Mr. S. Wells Williams, the recently appointed Secretary of Legation to China, says that he is the best living scholar of the Chinese language out of China. Attorney-General Cushing found him of great service at the time of his mission to China. Mr. Williams has besides been very useful to all our ministers in that country, from his thorough understanding of the language and character of the people. But Mr. Williams has a claim beyond that of being a Chinese scholar. Some ten or twelve years since he accompanied some Japanese seamen picked up at sea, and sent by Messrs. Oliphant & Co., in one of their ships, to Japan. They were not permitted to land, or even to put the Japanese on shore, but were fired into and driven off. Returning to Canton, Mr. Wiliams kept the Japanese with him, taught them English, and learned through them the language of Japan. When Commodore Perry sailed on his late mission from Canton, he took Mr. Williams with him as his interpreter, and fulfilled his mission with great usefulness and credit.

MAINE LAW INTELLIGENCE.—The Executive Committee of the American Temperance Union, impressed with the importance of a wide diffusion of reliable information relative to the progress and results of Prohibitory Laws in several States, have made it a special object to embody a large amount of such information in their Nineteenth Annual Report just published. To the Report are appended the New York law and the opinions of Judges Edmunds, Savage, and Conklin, making a document of 88 pages. They would gladly put in circulation 10,000, believing that such circulation, at the present time, among the reading and reflecting community, would be attended with the usual important results. They solicit donations for this object, and invite the co-operation of the friends of temperance and prohibitory law. Gentlemen or societies forwarding ten dollars, with the names and post-office address of 50 individuals in their county, may be assured of their supply with the Report, post paid. Address, A. T. U., 149 Nassau-st. W. E. DODGE, Chairman.

RELIGIOUS INTELLIGENCE.

Rev. S. D. Baldwin, of Murfreesboro, Tenn., and author of a recent book entitled "Armageddon; or the United States in Prophecy," in the Nashville *Advocate* of April 26th, publishes this card: "In obedience to the call of many, and with no selfish motives I have determined to bring it before the public orally. In connection with Rev. F. E. Pitts, I will devote my time, from July to October, in speaking upon the subject publicly. I propose to show, from a discovery of a new principle of explaining prophecy, that the United States is clearly laid down in the great prophetic map of Scripture, and that it will be ere long invaded by allied Europe."

The Rev. Mr. Smith, Independent minister at Kingstown, states that when on the Continent recently, he had an interview with Francesco Madiai and his pious and heroic wife. Rosa was very ill, and had to support herself with a stick in walking. Mr. Smith learned from friends, "that her health continued so shattered from her incarceration in the horrid dungeons at Volterra, that, humanly speaking, nothing but a removal to another climate—say the south of England—could possibly prolong her life, and that this the poor uncomplaining creatures had not the means of accomplishing."

The Secretaries of the New England Association of clergymen have issued a second circular, exhibiting the most encouraging success towards the object contemplated. The purpose of the Association is to embrace the three thousand clergymen of New England, as life members of the Kansas Emigrant Aid Society, on paying twenty dollars, making a general fund of $60,000—this sum to be expended in settling Kansas with Christian men and women from New England.

An important political movement has been set on foot among the Irish Presbyterians, who took advantage of the recent General Assembly held there, to hold a meeting of ministers, elders, and laymen, for the purpose of forming an association, to be called "The Presbyterian Representation Society," having for its object to secure the election of members of the Presbyterian body as parliamentary representatives.

A correspondent of the *Christian Mirror,* after speaking of the revivals of religion in Boston and in Massachusetts, says: "Among the converts and inquirers there are an unusual number of young men. So far as I have been able to learn, there has been a large class of young men among the converts in the numerous revivals throughout the State."

Among all the many great fields open to the missionary exertion of the Christian Church, perhaps there is none more promising, certainly none more extensive, than Thibet, which forms the center of that Lamaism or Buddhism now swaying four hundred millions, or nearly half, of the whole human race.

The ship John Williams, belonging to the London Missionary Society, has again, on the 10th June, safely arrived in the Thames, after a prosperous voyage of one hundred days from the Society Islands. She brought home two missionaries, and twenty-four children of missionary brethren to be educated in England.

IMPERFECT IN ORIGINAL

General Intelligence.

European News.

One week later news from Europe, being to July 21st, was received in New York on the 2d inst.

The general prospects of the war, at home and abroad, were not very encouraging. Partial successes before Sebastopol have, however, revived the drooping spirits of the army, although the small reported losses of the Allies show that the successes were not of importance.

Pelissier, whose character suffered much after the repulse of the 18th of June, was regaining confidence, and from the strength of the French works now close advanced towards the Malakoff, there is a probability of its early capture.

A dispatch from Gen. Simpson is published, giving an account of the embarkation of the body of Lord Raglan, for England. Pelissier placed a garland of immortelles on the coffin, and the French troops formed an avenue of men 6 miles long, from the camp to the sea.

A letter from the Baltic fleet announces the intelligence that on the night of the 23d and 24th June, H. M. ship Harriet, whilst lying off Siple Wahas, destroyed by her boats 47 Russian ships, averaging from 700 to 200 tons each, which comprises the whole of the Nysted shipping, probably amounting to upwards of 20,000 tons.

Mr. Roebuck's motion for a vote of censure on the Government, after being debated at great length, was thrown out in the House of Commons by a majority of 107; the numbers being—for the motion 182, against it 289.

The sum set apart for the expense of the Fete Napoleon on the 18th of August is to be distributed to the widows and orphans of the war. Five hundred Russians, now at Toulon, are to be exchanged at Odessa for French prisoners of June 18.

From Spain we have the following items:

A telegraph message from Madrid says the rupture with Rome is complete, the Roman Chargé having demanded his passport on the 16th, on account of the passage of the Church Property bill.

The Black Warrior dispute with the United States is definitely settled, by the indemnity of a million reals.

The French mail had been again stopped by the insurgents, near Busgos. Ten Carlists were shot, on the 10th, at Gironne. Some skirmishes occurred at Burgos, in which the loss on either side was trifling. Among the killed, however, was General Arnaos, brother-in law of Cabreras.

* * *

CALIFORNIA NEWS.—Two weeks later news from California was received in New York last Sunday. It came by way of San Juan, and was only nineteen days and twenty hours from San Francisco—the shortest time ever made.

It is said that the mines in California are yielding better than for several years past. Gold in large quantities has been discovered near Puget Sound.

The crops have been somewhat damaged by the insect, but the breadth of land put in cultivation is so much greater than in former seasons, that the yield of grain will be much beyond the domestic wants of the State.

The recent heavy failures in California figure largely in the papers. It seems that the resident partner of one of the broken houses charges down upon the partner and assignee of another exploded concern, with a grave affidavit, to the effect that for the last four or five years, the latter has been selling the former spurious gold dust, to the damage of the house of *four hundred thousand dollars!*

* * *

POWDER MILL EXPLOSION.—A dispatch dated Wilmington, Friday, Aug. 3, says: The drying-house of Gabeche's powder works, at Eden Park, which exploded this morning, contained about one and a half tons of powder, and the force of the explosion was tremendous. The house had been in operation for forty years without accident, and was considered the safest house in the works. All the men connected with its operations were killed at once, being blown to atoms and found at various distances from 50 to 200 yards from the scene of the disaster. Three of the killed were Frenchmen, named Eugene Perene, Joseph Deo Peane, and Francis Fisher. A boy named John Pugh was also among the killed. The explosion of the drying-house caused a mill, situated about 300 yards distant, also to explode. In this mill, six men were dangerously hurt. One of them, Peter McGinley, was thrown a distance of 40 feet, and it is feared will not recover, while Patrick Burk, who was running from the mill, had his skull fractured by a piece of lightning-rod, and his recovery is also doubtful. Thomas Mullen had his collar-bone broken. Mr. Mitchell, the engineer, escaped with some slight bruises.

There were about fourteen hundred pounds of powder in the mill, which was less than usual. The trees around the drying-house were torn up by the roots, and one or two horses were killed. One other man is said to have been killed, but this case seems doubtful. Mr. Gareche says the explosion must have been caused by one of the Frenchmen, who was addicted to smoking his pipe, although he had been forbidden to do so.

* * *

A PECULIAR CASE.—A finder of money or other valuable property should always take prompt measures, by advertising or otherwise, to make restoration to the owner. In Rochester, N. Y., a few days since, a man by the name of Thomas Hall, who neglected this duty, was convicted of grand larceny, and sentenced to two years hard labor in the State Prison. He had found a package of $1,600, and carried it to his boarding-house. During his temporary absence, a woman discovered the package, and took from it a small portion of the money. Hall subsequently carried the remainder to his brother, and asked him what it would be best for him to do in relation to it. His brother counseled the honest course, but before Hall could adopt it he was arrested, and held to answer for larceny. Upon the trial it was not shown that he had appropriated a dollar of the amount to his own use, but as he had neglected to take the proper steps to find an owner, he was obliged to suffer the consequences.

SUMMARY.

The utility of shade trees, says the Manchester *Mirror*, was manifested at the time of the recent fire in this city, to such a degree, that people who never saw their use before were compelled to see it then. The heat in the vicinity of Hill & Cheney's stable and house, was very great, and at times threatened to ignite those buildings, but the thick green foliage of the thrifty trees which adorn the street afforded a strong barrier, and rendered them safe. We remember a similar instance at the time of the burning of the steam mill on Manchester street a few years ago. If there is no other utility in the growing of vigorous shade trees than this, it is worth attention for this alone.

A correspondent of the St. Louis *Democrat* expresses the belief, formed after careful inquiry, that the opponents of Slavery in Kansas are one-quarter more numerous than its advocates. He represents the state of feeling as one of intense excitement—the Missouri Pro-Slavery men being determined to keep possession of the Territory at all hazards, and the Free-Soil men being equally resolute in resisting them. He says the latter are organizing military companies for self-defence, and anticipates bloodshed as the result of these collisions.

The Pottsville *Journal* of Saturday, July 28, says: A frightful accident occurred on Tuesday morning at Mr. Agard's Belmont Colliery, in this county. Four persons, two men and two boys, have been taken out of the slope, dead and dreadfully mangled—one more is not likely to live, and six others are seriously injured. It has been and may be denominated, an explosion of gas; but more properly it was a powder explosion; for the latter did the most injury, though the "fire damp," as it is generally called, exploded first and ignited the powder.

Four only of the Presbyterian pastors in New York—Rev. Drs. Phillips, Spring, McElroy and Krebs—have retained their pastoral charge for a period of twenty years, and not one in the Presbyteries of New York Third, New York Fourth, Brooklyn and Newark. Of the 27 Presbyterian churches in the City twenty years ago, only 5—the Brick, the Canal street, the Carmine street, the Allen street, and the Seventh—are now worshiping in the houses which they then occupied.

One of the trains from Rochester for Buffalo, on Saturday, 28th ult., ran over a man near the Chili Station, killing him almost instantly. He was walking along the track on a curve, and was not seen until the engine was near him. After the man was struck and thrown from the track, the train was stopped and backed down to where the mangled body lay. Both legs and one arm were broken, and his body was literally stripped by the engine.

A dispatch dated Cincinnati, Tuesday, July 31, says: The steamer Kentucky, bound from Pittsburg to Louisville, came in collision last night with steamer Telegraph No. 3, bound from Louisville to Cincinnati. The former sank almost immediately, in twenty feet of water, and four of her crew were drowned. The boat will probably prove a total loss. She is reported to have been insured in Pittsburgh for twelve thousand dollars.

Professor Richardson, Principal of the Female Seminary at Freeport, N. J., while superintending some arrangements for giving an exhibition last week, stooped down over a place where a carpenter was boring a hole for the purpose of suspending a chandelier, and that instant the auger came up through the floor, and took out his eye. Mr. Richardson had previously lost the use of the other eye, so that now he is blind.

The excavations going on at Ostra are continually bringing to light most interesting remains of ancient splendor. One of the last prizes is a mosaic pavement, 18 feet long and 7 broad, representing Neptune drawn by four sea horses. Fine fragments of statues and bassi rilievi, silver and bronze medals, leaden conduits, and stucco ornaments, as well as some inscriptions of historical interest, have also rewarded the labor of the excavators.

The Liquor Dealers' Societies have not relaxed in their vigilance or in their measures to thwart the Prohibitory Law. They meet regularly, and are actively engaged in collecting the needful wherewith to establish Capt. French's proposed Anti-Maine Law journal. They are yet, we understand, a long way off from $100,000, but seem to be sanguine of raising that amount.

A recent census shows that New York and its suburbs, consisting of Brooklyn, Williamsburg, etc., contains at the present moment 1,000,000 souls. New York proper alone, has 750,000, while Brooklyn, including Williamsburg, has 200,000.

In view of the numerous and well considered vetoes of the present efficient Mayor of New-York, a journal of that city suggests the propriety of altering his name from "Fernando Wood" to "Fernando Wouldn't."

The amount of money sent from America in 1854, by Irish emigrants, for the payment of passages and the general relief of relatives in Ireland, is said to have been over eight million of dollars.

The steamers Kentucky Home and Telegraph came in collision, near Warsaw, Ky., July 23d, destroying the former boat, and causing the loss of two lives.

Later advices from Rio Grande have been received by telegraph from New Orleans. The revolution in Northern Mexico continued without check. Gen. Wolf had fallen back upon Matamoras, but the revolutionists were concentrating their forces upon that point, and the capture of the city was considered as certain.

The Pennsylvania papers are filled with accounts of terrific rain storms, floods, dams carried away, barns struck by lightning, horses and cattle killed, &c. In one township four barns, one grist mill, and a dwelling house, were either injured or totally destroyed by lightning, on Tuesday, July 31st.

Five hundred acres of rye are ready for the sickle on the pine plains east of the Merrimac at Concord, N. H., two miles from the State House—ten or fifteen thousand bushels. In sooth, it is a goodly sight.

A dispatch dated New Orleans, Saturday July 28, says: The deaths by yellow fever in the Charity Hospital during the past week were 101. The fever has also broken out at Baton Rouge.

Another decision was given last week in one of the New York Courts, which still further limits and restricts the operation of the Prohibitory law. One of the many persons recently arrested for being drunk, and committed in default of money to pay his fine, was taken out on *habeas corpus*, and discharged by Judges Oakley and Duer, on the ground that his commitment did not state where the offender was found intoxicated. By the terms of the law it must be in some "store, grocery, lane, or street, or public place." We understand that nearly all the recent commitments have been made out in a form similar to this, so that the decision will effect a very general jail-delivery.

Another hero of the Revolution passed away a few days ago, at Fort Plain, Montgomery County, in this State, in the death of Gen. Geo. H. Nellis, who was a fifer in one of the Revolutionary Regiments. During the term of his service he fought in several engagements with the Indians; in the war of 1812 he served two years as Colonel and Commandant of the Regiment sent to garrison and defend Sacketts Harbor. He was afterwards, for several years, Judge of the Court of Common Pleas in Montgomery Co. For more than 30 years he was a Justice of the Peace.

By consent of the Post Office Department, the dates of sailing of the Pacific Mail Steamship Company, have been changed from the first and fifteenth to the fifth and twentieth of each month. This, by dividing the intervals of sailing on this side between New York and Aspinwall, will give the steamers an opportunity to coal at the latter place, and insure more regularity in the home trip. When either of the last named days fall on Sunday, the steamer will leave on Monday.

The New Zealand *Spectator* has an article, in which it is gravely argued that the recent earthquake has materially improved the harbor and its vicinity. Not only is the shore of the port elevated a couple of feet, but "it is a matter of congratulation, that they have gained or can redeem a large tract of building-ground," in consequence of the elevation of the "flat extending round Lambton harbor."

The amount of government claims to come before the Court at Washington is over $300,000,000, prominent among which are remnants of the old Continental Money and the Provincial Scrip, issued to support the country through the Revolutionary struggle; private advances to the government during the war, afterwards repudiated.

The Philadelphia papers announce that the Trustees of the Bank of the United States will make their final dividend on the 20th September, when the concern will cease in any shape to exist. It has taken fourteen years to wind up the concern, and at the end the stockholders lose all, and the other creditors get little.

"Riches take wings and fly away." The truth of this axiom was fully exemplified yesterday by the perusal of a private schedule of railroad stock and bonds belonging to an individual, and valued eighteen months ago at a little over $374,000, the market value of which to-day is only about $113,000, showing a depreciation of $261,000 in one year and a half, besides the loss of interest.

The Bishop of Exeter has recently refused to license two evangelical clergymen, because they would not subscribe to the dogma of baptismal regeneration. The Rev. James Turner, curate of St. Andrew's, Plymouth, and the Rev. G. C. Layard, chaplain of the Trinity Alms-houses, London, are the clergymen who have been refused ordination.

Within the last few years at least ten Bohemian priests have fled to Prussia and renounced the errors of Rome. Many others would follow their example if they could find means to escape. Three weeks ago one found means to get to Switzerland, having been two years ago seized as he was near the frontiers of Prussia. He has just sailed from Havre to America.

It having been made known that the fiftieth anniversary of the settlement of Rev. John Angell James, in Birmingham, England, is to be celebrated by a Jubilee, it has been determined by the Presbyterian connection in Philadelphia and vicinity, that a letter of congratulation and sympathy shall be prepared by Rev. Mr. Barnes, signed by the ministers, and forwarded for the occasion.

Bishop Doane, of New Jersey, has confirmed more than 600 persons during the last ecclesiastical year—an increase of 40 per cent. over any previous year. Bishop Whittingham, of Maryland, confirmed 953 the last year—more than twice the average number of previous years.

The *Journal* says the entire property of the Vermont Central Railroad Company, which has cost about nine million of dollars, is now selling in the market, according to the prices of First and Second Mortgage Bonds and stock, at less than one million of dollars.

The Rev. O. S. Powell, a graduate of the University of Vermont, and for a year past minister of the Presbyterian Church at Fort Atkinson, Wisconsin, was drowned in Rock River, at that place, on the 2d ult, while attempting to wash his buggy in the swollen stream.

At the adjourned meeting of the stockholders of the Eastern Railroad, the report of the Special Committee was read, warmly debated, and finally adopted. The defalcation of Tuckerman, the late Treasurer of the Company, is found to amount to $245,300.

A mountain of wood—a single tree taller by a hundred feet than the Bunker Hill Monument, and about as thick at the base, now occupies the New York Crystal Palace. It is from California, and is called the Washington Gigantea.

The Madison County Bank, Cazenovia, has declared a dividend of five per cent., payable on the first of August. This is the 6th surplus dividend of five per cent. paid during the last seven years, and with their usual semi-annual five per cent. dividends, makes an aggregate return to the stockholders of 100 during that time.

In the Superior Court at Buffalo, Mr. Hezekiah G. Winslow has recovered a verdict for $1250 damages against the New York Central Railroad Company, for injuries sustained by the cars running off the track.

The Illinois Central Railroad Company sold the other day a piece of land fronting on the line of their railroad, near the foot of Lake-street, Chicago, for $600 per foot front, or $24,000 for forty feet.

The Turkish Government have granted an exclusive concession for a submarine telegraph from the Dardanelles to Alexandria. The cost will be £120,000, and the line could be completed in twelve months. At the same time, proposals are on foot to carry the project to India. The total length from the Dardanelles to Kurachee is about 4,000 miles, and the sum required for the whole (including the submarine to Alexandria) would be about £850,000. The entire line to India may, it is estimated, be completed in two years.

Since the war with Russia, a new kind of domestic fowl has been introduced into England from the Black Sea, and is likely to prove a formidable rival to the Shanghae and Cochin China. It is quite as large as the barn door fowl, is crested, has feathered legs. Its color is generally all white or black; when the latter, of a raven hue, and glossy. This bird is pugnacious, and its movements are very lively. The tail-feathers do not project as in other birds, but drop down close to the body.

The census which is now being taken in several of the Eastern and Middle States, indicates that the emigration to the West and California, has checked the great increase of population heretofore apparent in the Atlantic portion of the Confederacy. In New York State, especially in the agricultural counties, at many points there is an actual decrease; in others but a slight increase.

The Berkshire Agricultural Society proposes to purchase thirty acres of land, about a mile north of Pittsfield, Mass., at an expense of $2,250, and erect thereon a large and substantial, though cheap, building, suited to the purposes of the Society, and prepare a course for testing the strength of oxen, and the speed of horses. The building and fixtures will cost $3,000.

The Rochester *Democrat* publishes a list of persons, numbering 32, who have received licenses from the County Judge to sell liquors. Nine of the whole number are keepers of drug stores; two are wholesale dealers in liquors; one or two brewers, and several keepers of groggeries. One of them, it is alledged, has four times been fined for violating the old Excise laws.

It is stated that several gentlemen of capital and influence in London have formed a "National Newspaper League Company" to raise half a million or a million in one pound shares, and start a first-class daily paper, to be devoted to the liberal cause. It is proposed to call the new paper *The Dial.*

A bear weighing 376 pounds was shot at Colebrook, the 21st ult. He was discovered near the roadside, within half a mile of the village. He fled to a neighboring swamp. A dog was put upon his track, when he soon emerged from his retreat, and was brought down by a dozen or more shots. Three other bears were seen in the vicinity the same evening.

Arrivals from Council Bluff, with dates to the 26th ult., report the existence of great excitement at Ohama City, on account of the murder of the Omaha Chief Logan, while out on a buffalo hunt, by a band of the Sioux Indians. It is stated that the Omahas are about to join the Pawnees to make war upon the Sioux.

Telegraphic communication between New York and Newfoundland will soon be completed. The iron cable—74 miles long, and weighing 400 tons—to cross the strait between Newfoundland and Cape Breton, has arrived from England, and will in a few days be let down to the bottom of the ocean.

A Vein of Cannel Coal of good quality has been opened lately at La Salle, Ill., and it is said that both Peru and La Salle are built upon extensive and valuable beds of this mineral. Some specimens of the La Salle Coal have been inspected by a practical miner, who speaks very highly of them.

A weekly journal, to be called the *Council City Banner*, will be commenced about the 1st of September next, at Council City, Kansas Territory, by P. O. Conver & Co. Its prospectus says, "The *Banner* will be the organ of no clique or faction, either in politics or religion."

Three sailors were murdered on board the ship Colchis, of Philadelphia, whilst on their way from New Orleans to the Balize. The authorities had refused to allow the vessel to go to sea, and an examination into the affair was in progress.

Kansas is likely to make rapid progress towards liberalizing the criminal law. A bill has been recommended by the Council, providing that enticing a slave from his master shall be grand larceny, and punished by *death.*

Henrietta Robinson, commonly known as the "veiled murderess," who has been waiting at Troy, N. Y., the time of her execution, has had her punishment commuted by Governor Clarke to imprisonment for life. She is already in Sing Sing State Prison.

A large ship was recently launched from the yard of Donald McKay, near Boston, called the *Defender*, in honor of Daniel Webster. Hon. Edward Everett delivered an address on the occasion.

The St. Johns *New Brunswicker* of the 19th says: We learn from different sections of the Province, that the crops look very luxuriant, more so indeed than for a number of years past. The same is reported of the crops in the neighboring Colonies.

Capt. Low, formerly of the bark Kelby, (who rescued some of the passengers from the steamer San Francisco,) arrived at New York the other day, from Baltimore, in a very handsome new clipper bark of 511 tons, named the Helen Mar.

Joseph Diffenderffer, another of the well-tried heroes who fought so bravely and nobly for the liberty of America, has been gathered to his fathers in the ninety-eighth year of his age. He resided in Lancaster Co., Pa.

In New York, one day last week, two men were fatally injured by the falling of a portion of building which they were taking down.

Potato rot has made its appearance near Sherbrooke, Canada, and the hot weather is thought favorable to the development of the disease.

In New Haven, Ct., on Sabbath (Saturday) afternoon, July 28th, two men lost their lives by going into a well filled with "damp."

Two male and two female missionaries sailed from New York on the 6th inst., for the Marquesas Islands—Rev. Mr. Seymour and wife, and Mr. and Mrs. Dr. Coxie.

A fire broke out in a store in Chatham street, New York, on Sunday night last, which occasioned the loss of two lives, and serious injury to several others. The owner of the store, named Jacobs, has been arrested on suspicion of setting the premises on fire.

The census of 1855 of the State of Wisconsin, will probably show 600,000 population, against 305,000 in 1850. The cities and towns already heard from contain 230,000, against 135,000 five years ago, and these not from the newest settlements. The increase in Milwaukee City is from 20,061 to 30,448, and in Janesville from 3,457 to 7,788.

A case in law was tried in Stockbridge a few days since, in which five lawyers were engaged, for the purpose of testing a claim to ownership in an *old pine stump.* The case stands appealed to the Court of Common Pleas, to be holden in Worcester in September next.

On the evening of August 4th, the steamer Gen. McDonald, while on an excursion from Philadelphia to Cape May, was run into by a schooner, and much damaged. It is supposed that ten or twelve lives were lost.

While Edmund Burke was declaiming with great animation, in his famous speech against Warren Hastings, he was interrupted by little Major Scott. It is said he indignantly exclaimed, "Am I to be teased by the barking of this jackall, while I am attacking the royal tiger of Bengal?"

'Tis the fancy, not the reason of things, that makes us so uneasy. It is not the place, nor the condition, but the mind alone, that can make any body happy or miserable.

New York Markets—August 6, 1855.

Ashes—$6 37 a 6 50 for Pots and Pearls.

Mrs. E. Smith, Kelloggsville	1 00	12	52

FOR THE CAROL:

J R Irish, De Ruyter	$3 50
Thomas R Williams, Albion, Wis	2 00

WILLIAM M. ROGERS, Treasurer.

The General Conference.

The Seventh-day Baptist General Conference will hold its triennial session with the first church in Brookfield, Madison Co., N. Y., commencing on the fourth day of the week before the 2d Sabbath in September next, (5th of the month,) at 10 o'clock, A. M. Introductory discourse by Lucius Crandall; T. E. Babcock, alternate. H. H. BAKER, Secretary.

Our Anniversaries.

The Seventh-day Baptist Missionary Society will hold its 13th Annual Meeting with the 1st. Seventh-day Baptist Church in Brookfield, Madison Co., N. Y., on Fifth-day, Sept. 6, 1855, commencing at 10 o'clock A. M. Opening discourse by Thomas E. Babcock.

The American Sabbath Tract Society will hold its 13th Annual Meeting at the same place in the forenoon of Sixth-day, Sept. 7th, commencing at 9 o'clock.

The Seventh-day Baptist Publishing Society will hold its 6th Annual Meeting at the same place in the afternoon of Sixth-day, Sept. 7th, commencing at 1 o'clock.

GEO. B. UTTER, Secretary.

Farm for Sale.

THE House and Farm lately owned and occupied by James Hubbard, in Scott, Cortland Co., N. Y., are now offered for sale, on reasonable terms. The House is a large two-story house, nearly new, and well arranged to accommodate a large family. The Farm consists of about thirty-six acres of good land, most of which is under good cultivation and is well watered. There are about fifty trees of choice grafted fruit in good bearing condition. It is situated in an industrious and moral community, enjoying all the advantages of schools, meetings, and markets, necessary to make it a pleasant home.

Apply to A. D. C. Barber, or J. N. Pratt. 4t-9.

Milton Academy.

Male and Female Teacher's Seminary.

A. C. SPICER, A. M., Principal, and Professor of Mathematics, Natural, Intellectual, and Moral Sciences.

A. WHITFORD, Professor of Greek and Latin Languages, and Rhetoric.

J. F. PEASE, Professor of Instrumental and Vocal Music.

J. F. WOOD, Teacher of Penmanship and Book-keeping.

Mrs. S. M. SPICER, Preceptress, and teacher of Modern Languages, Painting and Penciling.

(Other teachers will be engaged as occasion may require.)

Calendar for 1855-6.

First term opens Wednesday, August 29th; closes Wednesday, December 5th.

Second term opens Wednesday, December 12th; closes Wednesday, March 19th, 1856.

Third term opens Wednesday, March 26th; closes Wednesday, July 2d, 1856.

(The school will open this year, in the New and Spacious Hall just erected.)

Tuition per term of 14 weeks, from $4 00 to $6 00. Music, Painting, and Penciling, extra. Board at the least possible price, not exceeding $2 00. Refer to the principal; Hon. J. Goodrich, President of Trustees; to M. T. Walker, Esq., or to J. C. Culver, Esq., MILTON, Rock Co., Wis.

Magnificent Floral Gift.

SUBSCRIBERS to the "CHRISTIAN DIADEM" for 1855, are entitled to a splendid steel engraving, the ☞ LILLY AND THE ROSE PERSONIFIED, being given *gratis* to all old and new subscribers who send us only ONE DOLLAR, by mail or otherwise.

Six Copies for Five Dollars.

The Diadem is a strictly moral and religious work—designed for the Christian family without regard to any particular denomination.

FIFTY ENERGETIC BUSINESS MEN are wanted immediately to circulate the "Diadem" throughout the Eastern and Western States. To such as can send good references the very best inducements will be given. Address Z. P. HATCH, Publisher, 9 Spruce street, New York. May 24—3m.

The very Book that every body has been Wanting.

The Book for the Parlor, the Book for the Fire-side, the Book for the Professor, and the Book for the Non-Professor.

THE RELIGIOUS DENOMINATIONS OF THE UNITED STATES: Their History, Doctrine, Government, and Statistics; with a Preliminary Sketch of Judaism, Paganism, and Mohammedanism. By Rev. JOSEPH BELCHER, D. D., Honorary Member of the Historical Societies of Pennsylvania and Wisconsin, author of "William Carey, a Biography," etc., etc., and "Editor of the Complete Works of Andrew Fuller," "Works of Robert Hall," etc, etc. Large octavo, 1024 pages, handsomely embellished by nearly two hundred engravings.

This invaluable work is rapidly finding its way among all classes of the American people. The clear, comprehensive, and impartial manner in which the learned author treats each and every denomination, is winning for him golden opinions from the highest authorities in the land. The innumerable lively tales and anecdotes of ministers, churches, and laymen, which he introduces with the articles of faith and all important statistical information, give to the work a life, vigor, and spirit truly delightful. One cannot sit down to it without being convinced that his subject is in the hands of a master, nor rise but with kindlier and more liberal feelings towards the great brotherhood of Christians, under whatever name they bear. Ours is a great, growing, and glorious country, and every family, and every young man, throughout its length and breadth, should have a copy as a text book of all its denominations. Wherever known, it is read, and wherever read, admired. Look at the following from among the very many notices received:

It embodies a vast amount of information relative to the origin, history, and missionary operations of the different religious denominations in this country, presented in a remarkably interesting and attractive manner.—*Rev. John Dowling, D. D., Author of "The History of Romanism," "Judson Offering," etc.*

This is a large and beautiful volume, and will find a cordial welcome in every family.—*Philadelphia Christian Chronicle.*

So far as concerns independence of vision, there can be no question, as Dr. Belcher surveys each sect with the same dispassionate impartiality.—*Epis. Recorder.*

This massive volume embraces a vast fund of information.—*Presbyterian.*

The work is sold by agents, and will furnish a large amount of interesting and valuable information to the families into which it may be received.—*New York Recorder and Register.*

In the account given of the denominations, he is fair, and generally allows them to speak for themselves, as to their history and institutions.—*New York Christian Advocate and Journal.*

It contains a mass of interesting facts and statistics.—*Norton's Literary Gazette.*

Judging from the work, it would be difficult to say what are the religious views of the Editor, so fairly, so dispassionately, so charitably, has he treated each and every sect.—*Philadelphia City Item.*

We presume it will be a standard work in thousands of libraries.—*Littell's Living Age.*

Sold only by agents, to whom certain districts are allotted. For particulars address the publisher,

JOHN E. POTTER,
15 Sansom-st., Philadelphia.

Or, NOYES SPICER, Indianapolis, Ind.

Michigan Southern Railroad Line.

TRAVELERS for Chicago, St. Louis, Kansas, and all points West and Southwest, can obtain through tickets, and all information concerning routes, fare, &c., either by the New York and Erie Railroad, or the New York Central Railroad, by application at the Company's Office, No. 192 Broadway, corner Dey-st., to

JOHN F. PORTER, General Agent.

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c. *Spring Arrangements*, commencing April 2, 1855: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2. North River, at 8 A. M., 1 and 4 P. M. For Somerville, (way,) at 5.30 P. M.

The above trains connect at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 1, 4 and 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 6 and 9.45 A. M. and 3 P. M.; Somervill (way) at 6 A. M.

New York and Elizabethport.

Leave New York at 8 and 10 A. M., 1, 4 and 5 P. M.

Leave Elizabethport at 7.15 and 9.10 A. M., 1, 3.15 and 6 P. M. JOHN O. STERNS, Superintendent.

New York and Erie Railroad.

ON and after Monday, May 7, and until further notice, Trains will leave the pier foot of Duane st., New York, as follows:

Dunkirk Express at 6 A. M. for Dunkirk.

Buffalo Express at 6 A. M. for Buffalo.

Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Accommodation at 12½ P. M. for Port Jervis and intermediate stations.

Rockland Passenger at 3 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.

Way Passenger at 4 P. M. for Newburgh and Otisville and intermediate stations.

Night Express at 5½ P. M. for Dunkirk and Buffalo.

Emigrant at 6 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5½ P. M.

These Express Trains connect at Elmira with the Elmira and Niagara Falls Railroad, for Niagara Falls, at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicago, &c., and with first-class splendid steamers for all ports on Lake Erie.

D. C. McCALLUM, General Sup't.

Miscellaneous.

From "The Crayon."

Wanderings in the Southwest—No. 3.

From Mr. Barker, son-in-law to Flores, I received hospitality such as we might expect from old Texans. His garden is on a high bank of the San Antonio. Here were peach trees, large and very thrifty. Fig trees were killed by the unusually severe frost of the last winter. Sugar cane thrives well here. Before I slept, I brought the horse in from the grass, for fear of having him stolen by the vagrants that hang around old settlements, and an unsuccessful attempt was made to seduce him into eating corn. From this place, the old road up the river affords much picturesque scenery. Old Mexican ranches are frequent, the country is well wooded, and the trees often of large size; the pecan trees, especially, fill all the ravines where their roots can have access to water, and the mustang grape vine loads down their tops. In some places the country is very sandy, and there the oaks thrive well. The trees along the river are still draped with Spanish moss, but those away from it have another parasite with linear leaves, growing in clusters, enveloping the branches. Occasionally the road leads along the crest of a ridge, looking over deep ravines on either hand, with the pecan trees growing in them, to the hills beyond, covered with oaks, so as almost to conceal the deeper green of the grass that covers the ground. I descended to the river for water, where the San Antonio tumbles over a ledge of limestone rocks. I passed several hawks, known here as Mexican buzzards. They have long bare legs, the feathers about the neck white, with a black crest like a cap projecting over their eyes; they are quite tame, and seem to be hunting about on the ground for reptiles. Another hawk, nearly white, with a long forked-tail, passed over me. Scarabeus beetles are very numerous, rolling little balls of their favorite composite in the road. One species is extremely beautiful, with colors of green and gold. A ride of twenty-one miles brought me to Mr. Buquer's, whom I sought as an old resident of Texas, for such information as his experience could furnish. He has a pleasant cottage, and his place evinces industry and taste. His peach trees were yellow, and his garden was nearly a failure, from the want of rain. Though this disaster was unusual, still he said it had occurred several times since his residence of seventeen years in the country. He had made few experiments with fruit trees.

A tedious ride of nine miles over a plain of muskeet, brought me to the Silado creek, but it was so dark that I could scarcely find my way across it, and when I emerged from the shadow of the pecans, and ascended the high ground of the opposite bank, I could not distinguish one object from another. I expected to find the house of Gideon Lee, of New York, and looked for a light to guide me to it, but I only saw the low growth of bushes along the road, and the innumerable fire-flies shooting athwart the gloom. There was distant thunder and lightning, and a little rain had fallen, which served to draw out these most interesting of all the numerous insects that swarm in hot climates. They were of several species of Eleteridae, and were so brilliant, that if they would but have kept over the road, I could not desire a better light. A single one would render everything visible for a rod about, but leave it darker than before. I caught one to force it into my service, but its light went out, it folded its legs up, and feigned death. In the distance they would shine so steadily for a time, as quite to deceive me with the idea that it was light in a human dwelling. I did see a light at length, at some distance on the right of the road, and directed my course towards it, but as the way led down hill, and the chance was, that it was on the opposite side of the creek, I retraced my steps, and dismounted, the more readily to find the road I had left, but all my efforts were in vain, and I was compelled again to tie my horse to a tree and lie down at the foot of it, which I did with a feeling of greater security, now that I was but six miles from San Antonio. I slept well, and rose early; found that it had rained during the night; saddled my horse, and having no toilet to make, was soon on my way. The country in the vicinity of San Antonio has not been burned over for some years, and the muskeet bushes have grown up every where, and if not cleared off, will soon be out of danger of fire. The soil is of a dark loam, with flint pebbles.

From the brow of a hill, I saw at length the white houses of San Antonio scattered through the green, three miles distant, and a quarry close at hand, from which a building material is taken. It is chalk, but so friable as scarcely to admit of handling, yet is used much from its being cheaper than the better qualities of stone. I soon passed through a double row of mud cabins, thatched with grass, and came upon the river—clear, swift, and sparkling. It flowed through no deep channel, but river and channel just fitted each other. I wanted to water the horse, but felt some degree of delicacy about it, and paused for a moment upon the bridge. A copper-colored man, with broad brimmed, steeple-crowned straw hat, small moustache, shirt and pants, and a red sash, came down leading a horse to water; this removed all scruples, and I urged my pony to drink; but the sight was so new to him, that it was with difficulty that I could induce him to approach the margin. His thirst being satisfied, I rode along a narrow street, with low one-story houses built close upon it, interspersed with some new stores in more modern style, and some delightful residences standing back from the street.

I stopped at a hotel kept by Mr. Reade, just in time for breakfast, after a journey of eight days from the coast, although the distance was less than two hundred miles. I shall write an account of this city when I come to speak of the topography of the country, and to give the general results of my journey. My trunks had not arrived, and therefore my letters were unavailable. I however called on Dr. Douai of the *Zeitung*, who had been informed by Mr. Olmstead of my intended visit to this place, and at his office I also saw Mr. Riott. Both are men of high attainments, and with an undying love for that cause for which they are exiles. After two days' rest, I set out in company with Dr. Douai to visit Castroville, a settlement of Alcestians formed nine years since. The distance was twenty-eight miles, and the road presented but little of special interest. The grass was very good, and corn looked well. The settlements along this road are frequent. We cross several streams before we reach the Medina. This s a fine stream, and a dam of superior contruction has been thrown across it at Castroville. A good hotel is kept there by Mr. Tardé, a Frenchman. The place has about 3,000 inhabitants, and is so remarkably healthy, that, as I was informed by the two physicians of the place, there had been but three deaths there in a year. The population is very industrious and orderly, though far below the Germans in intelligence and enterprise.

Owing to the careless manner in which I saddled my horse, and fast riding, I injured him so badly that I did not deem it prudent to use him at once, and led him a few miles down the river where was good grass, and amused myself on the bank of the river. Large cypresses grew along the bank of this river, close to the water's edge, and grape vines whose trunks measured six or eight inches in diameter, loaded them down with their huge folds, the small light green leaves of the cypress contrasting finely with the large leaves and dark masses of the grape. After taking a bath, I seated myself in the shade of a pecan, on a shelving bank, where a willow, inclined almost horizontally, trailed its branches in the water. The *Smilax*, a bright-leaved, thorny vine, common about New York, a dwarf black walnut, and many stranger shrubs, surrounded me. The river at this place is deep, and thirty yards wide, and flows sluggishly, but below me I heard the murmur of a rapid sometimes blended with the sough of the wind amongst the trees, but never with the complaint of a mosquito. A mocking-bird alighted in a tree close over my head, to answer the song of his lady-love on the other side of the stream. A limb had concealed me from him for a while, but suddenly he stopped, with the notes of one of his sweetest impromptus in his throat, at the sight of a man in blouse taking notes; he stretched his neck to the utmost over the limb, first in one direction, then in another; he seemed to say, "Oh, my eyes!" and hopping from one limb to another very quickly, he took wing. The water has a greenish transparency, and I see a perch gliding along as straight as if he were going to the post-office for a letter from home, yet stopping at the margin of a leaf of the pond weed to snap at a fly. A soft-shell turtle crawls timidly up the bank directly opposite me into a sunny spot, and begins to excavate a hole in the ground to deposit her eggs, by throwing the dirt out with her hind feet, using them alternately, and at each flirt throwing it some yards into the river, all the time looking very carefully about her, to be sure that no one shall be aware what she is about. She has chosen a place where cattle come down to drink, and a young steer appears through the bushes. The turtle makes a quick evolution, and plunges into the water. The steer, startled in his turn, looks with wonder and fear at the spot where he heard the plunge, and sees the water circling, looks back, and waits for reinforcements. Two, then three juvenile cattle put their heads together to solve the mystery, and finally seem to settle the matter, that there is no reasonable ground of apprehension, and go down to drink. I sat in the midst of this interesting society until the setting sun began to open fire upon my retreat.

Of the state of the settlements I shall be able to give a better account when I revisit the country west of San Antonio, which I shall do as soon as I am posted in my correspondence. I hope to go as far as Mexico, unless I am interrupted by new misfortunes. Returning, we started late to avoid the heat of the sun, and camped about ten miles from Castroville, in preference to sleeping in a house. My baggage not having yet arrived, and my horse being too sore to ride, I camped for three days about four miles down the river, on lands owned by Mr. Riott, enjoying myself much with my gun. Quails, rabbits, and grey squirrels are plenty, and milk and eggs were obtained at a house in the vicinity, and when night came, I followed the instinct of my horse, and went up on the high prairie, in the muskeet grass, to sleep. J. D. B. S.

Remainder of No. 3 next week.

When should Crops be Gathered.

The prevailing opinion is, that grass, and especially grain crops, should not be cut till ripe; or, whatever may be the opinion, such is the general practice. This is an error, and one of no little consequence; and we offer some considerations, which, if understood, will, we trust, set this matter in a clearer light. Let us first look at one or two lessons plainly told us by chemistry.

Wood, starch, sugar, and gum, are almost exactly alike in their composition. The same elements that put together in one form produce sugar, if arranged differently would make wood, and if arranged in still other methods, they produce starch or gum. To illustrate; suppose four men should each have 100,000 bricks, 1,000 bushels of sand, 600 bushels of lime, 20,000 feet of lumber, including beams, boards, shingles, &c., three hundred pounds of nails, and 100 lbs. of unmixed paints of two or three different colors. Now suppose these four men, having precisely the same amounts of the different materials or elements, set about putting up four structures, each having a different object in view. One might construct an elegant cottage dwelling, the second a church, the third a barn, and the fourth a prison; and by mixing and applying the paints differently, each of these structures would differ from the others so much in form and color, that one might be supposed to be built of stone, another of brick, a third of iron, a fourth of wood, and they would be as unlike in form, color, and outward appearance, as starch, gum, sugar, and wood. Either of these buildings might be taken down, and by simply re-arranging the material, be changed to the form, shape, and color of one of the other buildings, and be made like it in every particular. Just so can a pound of wood be changed to a pound of sugar. We have taken a board weighing a pound, and by a chemical process re-arranged the elements, and changed the same board to a pound of sugar. Just so a pound of starch, gum, or sugar, can be changed to a pound of wood. By artificial means this change is somewhat expensive, but in the natural laboratory of the cells and tubes of a plant, it is daily going on upon a large scale, although the elements are in themselves so small that the change is not perceptible to the human vision.

We are not stating theories, but absolute facts. While a stalk of grain is unripe it contains but little woody fiber, and its pores or cells are filled with sugar, starch, or gum. The presence of sugar is readily perceived by the sweet taste of soft kernels of corn and other grains, it is also found abundantly in the sap of the stalks. The starch and gum are not so readily perceived by the taste, though they are easily shown to be present. Now as the grain and stalks ripen, a large portion of the starch, gum, and sugar, is changed into woody fiber. If the natural growth of the plant be arrested by cutting it, this change is stopped, and it dries up, with its pores filled with starch, gum and sugar, while there is comparatively little hard woody matter.

But we all know that the three substances first named are digestible, nourishing articles of food, while the fourth—woody fiber—is comparatively indigestible, and is on this account little nourishing. Here, then, is a plain reason why all such grasses and grains as are designed for food for animals, should be gathered before they are fully ripe—that is, while they contain a large amount of digestible matter. Wheat, for example, if cut eight or ten days before fully ripe, contains a large proportion of starch, with a thin skin, and will yield a large amount of flour; but when it is fully ripe it is covered with a thick, hard, woody skin, or bran, which has been formed out of a part of its starch, and it will yield a much smaller proportion of flour. The same may be said of its sugar and gum. This reasoning applies equally to other grains, as well as to straw, cornstalks, grasses, &c.

Those portions of the grain which are to be used solely for reproducing the plant—and this is the natural design of all seeds—may be left to ripen naturally. The woody coating is designed as a protecting covering.

Having thus endeavored to state very briefly some of the reasons for cutting grain early—and it must be interesting to every one to understand these reasons—we will close this article with two or three rules, which are not only sustained by theory, but have been fully proved by careful practice and experiment.

1st. All grasses should be cut as soon as possible after flowering. Much more than is gained in weight after this, is lost by the conversion of the nourishing substances into hard woody matter.

2d. Corn, wheat, and all other grains designed for food, should be gathered eight to twelve days before fully ripe. A simple method of determining this, is to try the kernels with the thumb nail. Let the gathering commence immediately after "milk" begins to harden, but while the kernel still yields to a gentle pressure of the nail.

An acre of wheat, that if cut when fully ripe would yield 800 lbs. of fine flour, will, if cut ten days earlier, yield from 850 to 1,000 lbs. of flour of a better quality, while the straw will be much more valuable for feeding.

An acre of grass, which when cut fully ripe would yield 1,000 lbs. of nourishing digestible materials, and 2,000 lbs. of woody matter, will, if cut 12 days earlier, yield from 1,500 to 1,800 lbs. of nourishing matter, and only 1,200 to 1,500 lbs. of woody materials.

[American Agriculturist.

The Fruit Trade.

Some thirty vessels are engaged in the fruit trade between New York and the West Indies. A much larger trade in fruits is carried on with ports in the Mediterranean, which supply annually something like seventy or eighty cargoes—principally oranges.—The West Indian importations of last year are estimated as follows:—75,000 bunches of bananas from Baracoa, sold here at from $1 25 to $1 50 per bunch—$93,750 to $112,500; 2,000,000 Baracoa cocoanuts, sold at from $25 to $30 per 1000—$500,000 to $600,000; twenty cargoes of pine apples, from Matanzas and Havana, averaging 80,000 dozen per cargo, and sold at from $8 to $12 per 100—$128,000 to $192,000; 20,000 dozen St. Barts pines, sold at from $7 50 to $8 per 100—$18,000 to $19,200; 200,000 dozen from the Bahama Islands—$15,000 to $16,000; ten cargoes of Havana oranges, averaging 350,000 at 3 cents each—$10,500; have been received, thus far, the present season, the crop being more abundant than at any time during the last fifteen years. West Indian oranges arrive in October, and are most abundant in January and February. Bananas and pine apples begin to arrive about the first of April, and are most plentiful during the succeeding three months. Cocoa-nuts arrive all the year round. Mediterranean oranges, which come in boxes, and are most extensively shipped to different parts of the United States, begin to be received in January, but not extensively until April or May.

The above list comprises but few of the foreign fruits imported—and these only from the West Indies. A few minutes' calculation will show that the sum paid for the articles enumerated in the list amounts to not less than $850,000. The total amount paid for foreign fruit last year was not less than twenty millions of dollars.

Our exports are comparatively trifling. With the very best soil and climate in the world for growing fruit, embracing twenty-three degrees of latitude, we pay out annually, to foreign countries, cash enough to stock a Territory with the choicest varieties of fruit trees.

Besides, fruit grown in our own soil and climate is better adapted to our people, and far more healthful, than that which is imported from other climates.

Let us grow our own fruits, and thus save the millions paid to foreign countries, now almost lost to our nation.

Apple Tree Worms.

Since calling attention to the ravages of the borer in the maple, the oak, apple tree, &c., in our last, we have had some gratifying evidences that our remarks were not wholly lost. Some persons, we know, have been led to examine their trees, and have found the work of destruction progressing rapidly. In some cases, trees that have been set within two years, have been bored to such an extent as to entirely kill them. Some have bored more thoroughly in the trunk, two, three, or more feet from the ground, than at the crown of the root; others at the root.

We suspect they are doing more mischief to the apple tree than usual. The remedy is, kill them, any way you can, but do it. Some take a wire and probe the hole, and pierce the scoundrel; others take a knife and cut him out. But the easiest remedy is prevention. Wash the trees in strong whale oil soap, or in lye strong enough to make soap, about the first of June, and again about the first of July, and you will be pretty sure to kill any deposits of eggs. Other means are suggested, consisting mostly in applying substances around the roots of the trees, as ashes, tobacco leaves, (any borer must be no small fool to eat through tobacco to get to the tree,) woolen cloths, &c., &c. Constant care and vigilance is the lowest price at which good fruit or beautiful shade can be secured.

[Cultivator and Gazette.

Hints for Summer.

We give the following condensation of an interesting article in Buchanan's "Journal of Man:"—

The Hygiene of summer differs materially from that of winter. In winter the waste of material is great, and nourishing food necessary; in summer stimulus is less needed, but larger quantities of fluid are required. Cold exerts an antiseptic influence, while warmth promotes putrefaction. Care should be taken, in summer, to remove decaying vegetable and animal matter. Iron gutters should be provided, into which the filth might run, and from which every shower would thoroughly remove it. As means of putrefication, to guard against the feverish attacks of summer, lime is not to be relied on, having little more antiseptic power than common clay. Chloride of lime has some value, but is too expensive. The best absorbent of noxious gases is charcoal, fresh from the kiln. The carcases of domestic animals will not contaminate the atmosphere, if covered with a layer of charcoal. To purify air in unwholesome apartments, burn grains of coffee in a red hot shovel, and allow the fumes to disseminate the apartments. If the door or windows can be opened, always do so; if not, ventilation may be caused by kindling a blaze in the fireplace or flue, thus creating an ascending current. A slow ventilation may be produced by placing a lighted lamp or candle in the fire-place. The consumption of animal food in summer should be diminished, and ripe fruits liberally partaken of Salt, vinegar, and pepper, which make our best antiseptics for the preservation of oysters, beef, ham, &c., are equally applicable to animal food when taken into our bodies. * * * * In malarious districts, salt meat and coffee are considered more wholesome than fresh meat and milk. The proper use of salt, vinegar, and pepper would entirely prevent or cure the majority of the attacks of diarrhœa and cholera. A teaspoonful of salt, another of black pepper, with a tablespoonful of vinegar, diluted to suit the taste, is an almost infallible remedy in cases of deranged or inactive digestive organs. The compositions of the Neutralizing Cordial, so often prescribed by eclectic physicians for irritations and disorders of the bowels, is as follows: Equal parts of rhubarb, saleratus, and pepermint plant pulverized together with the addition of loaf sugar and brandy. Dose, from one-sixteenth to one-eighth of an ounce, repeated, if necessary, two or three times a day.

Hot seasons are especially apt to produce disorders of the liver. These arise from two causes—either too high living, producing congestion or fulness of the liver; or too great abstemiousness, producing a contracted and inactive condition. In the former case, alcoholic drinks must be rigorously forbidden; animal food laid aside, fruits and vegetables freely used, and habits of activity adopted. In the latter, the appetite should be cultivated, and rest and quietness sought. If we cannot escape the malarious atmosphere of a fever district, and have reason to believe an attack probable, a moderate use of the tonic bitters, such as hydrastis, columbo and quassia; will do much to fortify the constitution.

"The true hygienic principle is, that we should never be cured of diseases, but should meet them by prevention instead of cure." "The time may come," says the author, in conclusion, "when a well educated man may be ashamed to acknowledge that he was ever sick."

The Zulu Women.

An African correspondent to the *Puritan Recorder* says:—

"The labor of digging, planting, harvesting, getting fire-wood, drawing water, grinding, cooking, taking care of the children, indeed, all the hardest of the work among the Zulus, is performed by the women. The men build the huts and fences, milk and take care of the cows, watch the gardens, and drive away the birds and wild pigs, hunt, lounge, and drink beer, and this is pretty much the extent of their employment; but the degraded women work from morning till night; and if one of them shows any symptoms of laziness, she is sure of a beating from her unmerciful husband, who gives as a reason for his conduct, 'I paid too many cows for you to let you remain idle; you shall work and pay me by your labor all which I paid for you.' I have often seen a native woman digging without cessation from morning till night, with her heavy pick (native hoe,) in the hard hillside, having an infant suspended in a leathern sack on her back; and after her day's work, she would return home with a large bundle of fire-wood on her head, the pick on her shoulder, and the child on her back. It is no uncommon sight to see a company of native women going into Pietermaritzburg, or D'Urhan, from their Kraals in the country, distant thirty miles, each carrying on her head a basket of Indian corn holding little less than a bushel. A man, usually the husband, leads this company, gives orders when to rest and when to march, carrying himself only his shield and spears; and when they reach the market he greedily takes the money, with which he pays the government tax, or buys cows, and with them augments the number of his wives. The Zulu women are sometimes so severely beaten for laziness and unfaithfulness to their husbands that they run away and attach themselves to other men at a great distance. But if they are found, they are most cruelly treated.

"There are those in Christian lands who would have the heathen left to themselves, saying, 'They are happier than they would be if they were civilized.' But no one who has beheld for a day the deep wretchedness of a Zulu Kraal can adhere to such an opinion."

Decision of an Ante-Nuptial Agreement.—The Supreme Court of Pennsylvania, at Harrisburgh, recently gave a decision which may or may not, as the case may be, be of vast importance to men marrying wives encumbered with real estate or personal property. In the case in question, by ante nuptial agreement the husband covenanted that the wife should have her property to her own use as long as she lived, and dispose of it by her will to whom she pleased; and further covenanted with the wife, her executors and administrators, that he would not sell or otherwise convert to his own use any part of her property. There was also another provision, that he should be indemnified out of her estate for any debts he might have to pay for her. Upon her death the next of kin brought suit to recover the property, and the Delaware County Court decided in their favor. The husband, however, carried the case up to the Supreme Court, when Judge Black, on behalf of his associates, held "that upon the death of his wife, intestate and possessed of personal property, the husband was entitled to take it under the intestate act, there being nothing in the ante-nuptial agreement to prevent its operation." He therefore reversed the decision of the Delaware Court, and gave judgment for defendant.

Young England against Old England.—Mr. Layard, in his late speech on administrative reform, contrasted the ages of the English generals in the Peninsular war and in the present war, with great effect. He said:—

"The Duke of Wellington was a major-General at 33; the Marquis of Anglesey, 34; the Earl of Dalhousie, 38; the Earl of Stratford, 36; Lord Hill, 33; Lord Beresford, 39; Sir George Murray, 40; Lord Cumbermore, 31; Lord Londonderry, 32.

"By way of contrast, I have here a list of the ages of the general officers in the Crimea:

"Lord Raglan, 67; Sir J. Burgoyne, 73; General Brown, 65; Duke of Cambridge, 36; Sir D. L. Evens, 68; Sir R. England, 62; Sir G. Cathcart, 61; Lord Lucas, 55; General Tylden, entered service in 1806, 66; General Cator, entered service in 1803, 69; General Strangways, entered service in 1806, 66; Commissary General Filder, 64; Admiral Dundas, entered service in 1799, 67; Lord Rokeby, 57."

Death of a Convict.—A man seventy-three years of age, died a short time since, in the Indiana Penitentiary at Jeffersonville, of an affection of the heart—having performed on the day previous to his death his allotted task in apparent good health. He leaves a property valued at $100,000, and was incarcerated for the period of two years for the crime of forgery to the amount of $25! The old chap was miserly in the extreme, denying to himself the smallest luxury beyond the prison fare of bread and water, and beef's-head broth. Many anecdotes are related of him, which go to mark him as one of the oddities of his species. At the time of his arrest for the alledged forgery, he was tendered counsel, who pledged themselves to clear him of the charge for a fee of $500. To this the old man replied, that "if convicted, the sentence would only be for two years, and he didn't think he could make his expenses and $250 a year out of the penitentiary, and it would cost him nothing to live there, and he would save that much any how!"

Something like a Lawsuit.—According to the *Sentinelle* of Namur, a very curious affair is about to occupy public attention in Belgium. In the siege of Bouvignes, 1455, the Duke de Brabant made prisoner a nobleman named Legrain; but instead of taking his life, as he was entitled to do, the Duke consented to spare it on condition of receiving all his estates and property. Legrain made over all he possessed, but stipulated that at the end of four centuries it should be returned to his family. The Duke made no objection. The four centuries expire in July inst., and already a great many persons, representing themselves to be descendants of Legrain, are preparing to claim the property. It is foreseen that the claims will give rise to numerous lawsuits.

VARIETY.

A man in New York has invented, patented, and introduced, a paper "dickey," which he sells at three cents, and warrants to stand with the mercury at 90 degrees in the shade! He makes the article by machinery, at the rate of a thousand per hour, starches and polishes them until they are as brilliant as if made of linen! They are provided with guards against bending or breaking, and in fine, they can scarcely be distinguished from linen collars except by tearing them.

Recently a man named George Shank, who lived as hostler with Dr. Oelig, in Waynesboro', Pa, hung himself. The only cause assigned was grief for the death of a favorite horse of the Doctor's, named "Fox," during whose sickness Shank was heard to say, "When Fox dies I want to die too." After the animal's death, when removing his halter, he remarked, "This halter will do me a service some day," and verified the remark by ending his own life with it.

It is believed that the bees greatly improve the fructification of the fruit trees. Orchards in which several hives are kept always produce more fruit than those in which there are none. In the provinces on the Rhine the fruits are more abundant and finer than in any part of Germany, and there it is the custom to keep large quantities of bees. Plants, too, which bees visit, thrive better in the neighborhood of hives.

The Cincinnati *Railroad Record* says that sixty million bushels of bituminous coal are annually raised and consumed in the Ohio Valley alone. The coal fields of the Ohio Valley are estimated at nearly one hundred thousand (99,000) square miles, or over sixty-three million acres. Great Britain has only 12,000 square miles, or less than eight million acres, and yet produces nine hundred and twenty-five million bushels annually.

The sales of Public Lands for the last fiscal year were 13,825,730 93 acres, for which there was received, in cash and script, the sum of $10,570,386 86. This is exclusive of the land located with military Bounty Land Warrants in the same period. The aggregate of Public Lands, the title in which has thus been transferred from the Government to individuals, was never before so large in a single year.

Mr. Daniel Fairchild, on his farm in Lynn, has about three-quarters of an acre of horse-radish, which yields a profitable crop. He dug up a small part of it last year, and after grinding it and putting it up in small kegs, sold it for $150 at the restorateurs and hotels in Boston.

A Company of Germans, about four years since, purchased a tract of 20,000 acres on the southeastern slope of the Blue Ridge, in South Carolina, and established the town of Walhalla. They now number over a thousand inhabitants and constitute a fine and thriving town.

New SteamboatLine for Albany and Troy.
From Pier 15, foot of Liberty-st., at 6 P. M

STEAMER RIP VAN WINKLE, C. W. Farnham, Commander, Monday, Wednesday and Friday, at 6 o'clock, P. M.; steamer COMMODORE, L. Smith, Commander, Tuesday and Thursday, at 6 o'clock, P. M., and SUNDAY, at 5 P. M.

Fares: Saratoga, $1 50; Moreau, $2 15; Fort Edward, $2 15; Whitehall, $2 75; Castleton, $3 10; Rutland, $3; Burlington, $4; Rouses Point, $5 50; Montreal, $7 50.

These Boats will arrive in Albany or Troy in ample time to form connections with all the Railroads, North, East or West, enabling passengers to reach Montreal and intermediate points the same day.

These Steamers are of the first class for strength and speed—well known favorities of the public—having been thoroughly overhauled during the past winter, and offer every accommodation that can be desired by either freighter or traveler.

Through tickets can be obtained on board the boat for Saratoga, Moreau, Fort Edward, Whitehall, Castleton, Rutland, Burlington, Rouse's Point and Montreal.

The Northern Freight Express will give Bills of Lading to all points as above named. Shippers who desire it, can have time receipts, by applying at the office on the Pier. A. A. DYKEMAN.

Ayer's Pills.

A NEW and singularly successful remedy for the cure of all Bilious diseases—Costiveness, Indigestion, Jaundice, Dropsy, Rheumatism, Fevers, Gout, Humors, Nervousness, Irritability, Inflammations, Headache, Pains in the Breast, Side, Back, and Limbs, Female Complaints, &c., &c. Indeed very few are the diseases in which a Purgative Medicine is not more or less required, and much sickness and suffering might be prevented, if a harmless but effectual Cathartic were more freely used. No person can feel well while a costive habit of body prevails; besides, it soon generates serious and often fatal diseases, which might have been avoided by the timely and judicious use of a good purgative. This is alike true of Colds, Feverish symptoms, and Bilious derangements. They all tend to become or produce the deep seated and formidable distempers which load the hearses all over the land. Hence a reliable family physic is of the first importance to the public health, and this Pill has been perfected with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing any thing hitherto known of any medicine. Cures have been effected beyond belief, were they not substantiated by persons of such exalted positions and character as to forbid the suspicion of untruth.

Among the eminent gentlemen who have testified in favor of these Pills, we may mention:

Doct. A. A. Hayes, Analytical Chemist of Boston, and State Assayer of Massachusetts, whose high professional character is endorsed by the—

Hon. Edward Everett, Senator of the United States.

Robert C. Winthrop, Ex-Speaker of the House of Representatives.

Abbott Lawrence, Minister Plen. to England.

†John B. Fitzpatrick, Catholic Bishop of Boston; also

Hon. W. L. Marcy, Secretary of State.

Wm. B. Astor, the richest man in America.

S. Leland & Co., Proprietors of the Metropolitan Hotel, and others.

These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compounded not of the drugs themselves, but of the medicinal virtues only of Vegetable remedies extracted by Chemical process in a state of purity, and combined together in such a manner as to insure the best results. This system of composition for medicines has been found in Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any process. The reason is perfectly obvious. While by the old mode of composition, every medicine is burdened with more or less of acrimonious and injurious qualities, by this each individual virtue only that is desired for the curative effect is present. All the inert and obnoxious qualities of each substance employed are left behind, the curative virtues only being retained. Hence it is self-evident the effects should prove as they have proved, more purely remedial, and the Pills a more powerful antidote to disease than any other medicine known to the world.

As it is frequently expedient that many medicines should be taken under the counsel of an attending physician, and as he could not properly judge of a remedy without knowing its composition, I have supplied the accurate Formulæ by which both my Pectoral and Pills are made, to the whole body of Practitioners in the United States and British American Provinces. If however there should be any one who has not received them, they will be forwarded by mail to his request.

Of all the Patent Medicines that are offered, how few would be taken if their composition was known! Their life consists in their mystery. I have no mysteries.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject freely acknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many eminent Physicians have declared the same thing of my Pills, and even more confidently, and are willing to certify that their anticipations were more than realized by their effects upon trial.

They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.

Prepared by Dr. J. C. AYER, Chemist, Lowell, Mass.
Price 25 Cents per Box. Five Boxes for $1 00.
Sold at wholesale in New York by A. B. & D. SANDS retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere.

The Sabbath Recorder,
PUBLISHED WEEKLY
By the Seventh-day Baptist Publishing Society,
AT
NO. 9 SPRUCE-STREET, NEW YORK.

Terms:
$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the time to which they reach.

☞ No paper discontinued until arrearages are paid, except at the discretion of the publisher.

☞ Communications, orders, and remittances, should be directed, post paid, to
GEO. B. UTTER, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

GEOLOGY AND THE BIBLE.

Copied by request from the Southern Literary Messenger.

The Testimony of Geology and Astronomy to the Truth of Hebrew Records.

The testimony of Geology and Astronomy to the truth of the Mosaic record on two points—their chronology and their assertion of a universal deluge—will form the subject of this paper. This subject has been chosen because several learned men of recent date—we would name particularly Mr. Lyell—on the science of Geology, still endeavor to account for many of the most remarkable geological facts, not only without any reference to the agency of a general deluge, bu on an implied denial of such an event. Chronology is concerned in this discussion, inasmuch as the theories of what is called the continental geology—theories treated with too much respect by Buckland of England and Hitchcock of our country—require an age for the earth inconsistent with the Mosaic chronology.

Considering true philosophy as much disregarded in these theories as the Mosaic records, we have selected and arranged some facts which show the inconsistencies and absurdities of these theories, and throw the light and dignity of science upon the records which, independently of physical science, form the indestructible charter of man to happiness and immortality.

We are well aware that all geologists have been compelled to admit that the surface of the earth affords undeniable evidence of the universal agency of water, and that many of the facts which constitute this evidence have been long and generally known. Still it has been thought that it would be a profitable and useful employment of a short time to revive the impression they have made, and to confirm it by recapitulating some facts already known, and accumulating many others more remarkable, which more recent researches have discovered.

It will readily be perceived that, for our purpose, it will not be necessary to discuss any of the theories of geology with regard to the modes of creation or existence of our earth. In all of them that reject the Mosaic account, there is not only uncertainty, but so much positive absurdity, that they are unworthy of consideration. We are only at present concerned to show, that our earth, as it now is, affords irrefragable evidence of one of the great facts stated in the Mosaic records, a general deluge; and also that one of the most remarkable and clearly demonstrated epochs of astronomy proves the *sacred chronology of the world to be true.*

That the present dry lands of the globe were the *bed of the antediluvian ocean*, is admitted by all geologists as a fact demonstrable, whatever may be their theories respecting their original creation. This appears to be true, not only of the level surface of the globe, but of the mountains of secondary formation. We mention this supposition, because some may think that it will account for many facts we are about to state, without the agency of a general flood. Admitting that our dry lands and mountains of secondary formation have been thrown up from the bed of the primeval ocean, it will be quite probable that the fossil remains of *marine* creatures would be found imbedded in their lower strata without the agency of an incumbent deluge. But it cannot account for fossil remains of *land* animals on the tops of mountains. It can in no wise account for fossil remains on the tops of mountains of primitive formation. Still less can it account for the *remains of land animals* on the tops of the highest mountains, or animals of the tropical regions found imbedded in the banks of rivers and in the solid ice of the highest northern latitudes.

In giving a simple and sublime account of the deluge, the Hebrew writer attributes it to "the opening of the windows of heaven," and to the "breaking up of the fountains," or, as it may be translated, "the foundations of the great deep." The facts from geology which irresistibly attest not only the actual existence of this great fact, but of the *very mode of operation of the agency*, are numerous and incontestible. The illustration of that branch of the operation stated, the breaking up of the foundations of the great deep will first occupy our attention.

The first fundamental and unquestioned fact of geology is this; that the earth, what ever may have been the mode of its creation, or whatever may be its configuration, is, in its superior strata, a "mass of ruins." An interesting writer on the subject remarks: "It is not of one land or of one clime that the assertion is made, but of all lands, of all climes, of the earth universally. Wherever the steep front of mountains disclose their interior construction, wherever native caverns and fissures reveal the disposition of the component materials, wherever the operations of the miner have pierced the successive layers beneath which metal or coal is deposited, *convulsion* and *disruption* and *disarrangement* are visible." Kirwan, in his Geological Essays, speaks strongly of the disordered condition of the strata of England and Scotland. Parkinson describes the whole of Great Britain as "having, since its completion, suffered considerable disturbance from some prodigious and mysterious power. By this power all the known strata, to the greatest depths that have been explored, have been more or less broken and displaced, and in some places have been so lifted that the lowest of them have been raised to the surface, while other portions, to a very great depth and extent, have been displaced." Townsend and every subsequent writer confirm this statement. All the collieries of Great Britain attest it. Between Lansdowne and Severn the natural dip of all the strata is completely inverted. A very extraordinary derangement is found in the Isle of Wight. In one part the stratum of chalk and the superincumbent stratum of clay are turned up from their natural dip to a position nearly vertical. Similar dislocations are met with in the mines of Cornwall. Townsend remarks: "There is no mine nor colliery in the whole island but exhibits similar disruptions. Yet in all of them the correspondent portions are as regular in the succession of their dislocated strata, as the leaves and cover of a book would be if dissected and placed in different planes." The same facts are found all over the continent of Europe. So in Asia. The mountains of Dauria, in Liberia, are so dislocated that the miners are unable to calculate the direction of a vein, but are constrained to pursue their work at hazard. Some veins are horizontal, some oblique, others vertical, all much dislocated, and in many places interrupted by vast caverns. The whole Alpine region is intersected and torn by vast chasms, even in their granite chains. De Luc and Saussure have copiously described them: "They mark," say they, "convulsion, and show no sign of having been occasioned by attrition." Similar chasms, Townsend discovered throughout the Pyrenees, and Humboldt, in the Chimborazo of the Andes.* "If," says Dr. McCulloch, "the highly inclined position of strata was not itself a proof of their elevation, evidences are found of motion in a great number of phenomena. In their curvatures we find proofs of disturbance; we find even more decided evidence, to the same purpose, in their fractures. But when we see that all these fractures are accompanied by a separation of parts which were once continuous, that one portion of a stratum occupies a higher or lower place than another, and that this separation is often attended by a difference in an angle of inclination of the separate parts, we have every proof which can be desired of an alteration in the horizontal position of stratified rocks since the period when they were consolidated."†

We proceed now to the first class of facts which attest the existence and agency of a flood in every part of the globe. The first we will mention is the presence of blocks and large masses of particular species of stone in regions where no such stone exists in its mountains and strata. They also bear marks of attrition from *agitated waters.* Thus innumerable masses of granite lie detached in the country near the mouth of the Oder, and over marshes from St. Petersburg to Novogorod, at the mouth of the Elbe, in Lower Saxony. Similar phenomena are met with in Tortola, in England, Ireland, and Spain. The instances found in England are particularly striking. Between the Thames and the Tweed, pebbles and blocks of rocks are discovered, of a character that have been considered by all competent judges to have been brought from the coasts of Norway, where only similar rocks are known to exist. Mr. Phillips states, that in the diluvial accumulation, upon the coast of Yorkshire, there are found fragments of rocks, found in Norway, others in the Highlands of Scotland, and in the mountains of Cumberland, and some from the sea coast of Durham. In proportion to the distance they have been transported, is the degree of roundness they have acquired. A striking instance of proof of water in powerful motion and covering the whole surface of the earth, is the fact that large blocks of granite are found on the sides of the secondary mountains of Jura, at the height of 2,500 feet above the level of the Lake of Geneva. They are found on these mountains, directly opposite to the granite range of the Savoy Alps, clearly proving the mountain ridges from which they came. "In the whole course of my geological travels," says Prof. Buckland, "from Cornwall to Caithness, from Calais to the Carpathians, in Ireland, in Italy, I have scarcely gone a mile without finding a perpetual succession of deposits of gravel, sand, or loam, in situations which cannot be referred to the action of modern torrents, rivers, or lakes, or any other existing causes. And, with respect to the more striking diluvial phenomena of drifted masses of rock, the greater part of the northern hemisphere, from Moscow to the Mississippi, is described by geological travelers as strewed on its hills, as well as in its valleys, with blocks of granite and other rocks of enormous magnitude, which have been drifted a distance, sometimes many hundred miles, from native beds, across mountains, valleys, lakes, and seas, by a force of waters which have possessed a velocity to which nothing th t occurs in the actual strata of the globe affords the slightest parallel."

Another class of facts may be urged as proving the fact and universality of a deluge, whose currents, sweeping over every region, hurried away their ancient and vegetable productions, and deposited them in one and the same place.

In the limestone rocks of Dovedale, near the center of England, and in the calcareous region called the Peak, marine shells of every description are found imbedded. The gray marble of Derbyshire is an entire mass of marine productions. In the alluvial gravel, near Bath, tusks of the mammoth and the elephant have been discovered. At Brent ford, near London, teeth of the hippopotamus and several nautili, were dug up at the depth of thirty feet. So, near Bath, the head of the alligator, three feet long, six feet of its vertebræ, and six joints of its tail, were taken from a quarry. At Carnmouth, similar remains were found. An entire alligator was found in the black marble of Derbyshire, and another in an alum rock near Whitby. It is scarcely necessary to remark, that these animals and nautili are all natives of regions far different and distant from England. A coral bed in a stratum of limestone, between Medford and Southstoke, contains the *madrepore cinerescens* which was found recently in the Indian Seas, and no where else. One of these curious petrifactions was standing upright, more than five feet high, and expanding six feet, with a double cup. What but the rapid currents of mighty waters could have borne this zoophyte and its coral accompaniment from their native and distant spot to the place of their deposition? In every part of England, and in all its various strata, are found fossils of animals and marine shells of every quarter of the globe, including the coralines, madrepores, and lythophytes of hot climates. Nearly thirty distinct species were collected near Stapleton. Similar phenomena exist throughout Europe, Asia and America.

Nautili and shells of similar climates are found as far north as Schiverin, and madreporites in Hungary. The coral lythophytes are confined, it is agreed, to the torrid zone, and uniformly within 34 deg. of latitude; yet they are found imbedded in limestone almost as far north as the granite mountains bordering on the frozen ocean. The plain at the foot of Mt La Balca, near Verona, in Spain, is remarkable for its petrifactions, among which are enumerated more than one hundred species of fish, natives of Europe, Asia, Africa, and America, here assembled in one spot. European and American animals and vegetables are blended together at Fez, in Africa. An eminent writer observes, "that in many northern countries productions of widely different climates are promiscuously imbedded in one heap; those of cold regions are discovered in the torrid zone." In southern regions are found the teeth of the Arctic bear.

The following facts show the submersion of the highest mountains of all continents: Prodigious heaps of sea shells were discovered by Dolmein on Mt. Etna 2,000 feet above the sea, and a stratum of clay filled with sea shells at an additional height of 400 feet: marine productions are found on the mountains of Siberia and the Caucasus. Mons. Peyrouse found marine shells on the Pyrenees at the height of near 10,000 feet above the level of the sea. They have been found on the mountains of Lybia, and petrified fish on Mt. Libanus; so in Timor, by Peyrouse; so the hills of Wager Island and Cape Horn, by Byron. In Jamaica, Dr. Clark found immense collections of corallines on the Blue Mountains 3,000 feet above the sea. Marine productions are found on the calcareous Alps of Savoy and on the Hartz mountains; so on the mountains of Taglone, in Carnolia On a mountain of Peru, Ulloa found marine shells at a height of 14,420 feet. Humboldt discovered sea shells on the Huancavelica at an elevation of 14,000 feet; so Molina descovered them on the top of Descabezallo, higher than Chimborazo itself; so they have been found on the Altaic mountains of Siberia. In the great steppes between the Wolga and the Ural, the shells of fish denominated by conchologists *pelasgicæ*, inhabitants of the lowest depths of the ocean, have been found. In the Ural mountains, in their highest ridges, are found the bones of mammoths and elephants at the height of 16,000 feet above the sea. On the Himalaya mountains the bones of *horses* and deer have been discovered. They are only obtained from masses which fall with avalanches from regions of perpetual snow.

The two most impressive pheuomena proving a general flood, which we have reserved for particular remark, are the discovery of an entire rhinoceros, the skin and flesh of which were preserved in the ice, and in 1799 of a mammoth, near the mouth of the Lena, on the coast of the Arctic ocean. The latter animal was found imbedded in an immense mass of ice, in such a state of preservation that the flesh was devoured by white bears and fishermen's dogs. Thus two animals since the existence of man, inhabitants of equatorial regions only, are found entire in the highest northern latitudes. Only one theory has been devised to elude the force of these most impressive and extraordinary proofs of a sudden and general deluge. It is, that *these animals were once natives of these regions, at a period when, it is assumed, they were of a temperature congenial to their nature.* The fact that the body of the mammoth was covered with *short hair*, to fit him, as it is urged, for a climate warm, indeed, but cooler than the climate in which these animals are now found, creates no difficulty: for elephants are now known to exist near the Himalaya mountains *with hair.*

Again, it is answered, that the rhinoceros discovered in the same region and latitude with the mammoth of the Lena was without hair, precisely as we find him at this day in the equatorial latitudes. But the unanswerable reply to the theory that the regions round the pole—the Arctic regions—were once inhabited by the mammoth, elephant, and rhinoceros, is this: that no fossil remains of the vegetable kingdom, which must have existed for their support, *have ever been found.* If trees such as those on the buds and leaves of which animals now subsist in the torrid zone ever existed in the polar regions, why would they not be now found embedded in the same ice or banks where those animal remains are found? It might be added, that the fact that their flesh has remained uncorrupted, clearly evinces that the climate must have been as cold when their bodies were deposited, as it is now. Prof. Buckland, though he maintains the theory that the remains of elephants, hyenas, and other tropical animals of the present day found in England, were once inhabitants of that island, yet acknowledges it to be an insuperable difficulty to this theory, as applied to the rhinoceros, mammoth, and elephant bodies and fossils of Siberia, that there is a total absence of all fossil remains of trees or shrubs or any other vegetable existence upon which those animals subsisted, if supposed once to have lived in those frozen regions. He admits explicitly, that the existence of these phenomena "can only be explained by supposing them to be of antediluvial origin, and their carcases to have been drifted to their present places by the diluvial waters."

The only difficulty which for awhile obstructed the other rational explanation of the existence of fossils of animal and vegetable productions of *various regions* in the *same place*, by the fact of a general deluge, was that no fossil bones of *man* had been found. This difficulty no longer remains. Unquestionable, admitted human fossils have recently been discovered in great numbers, and in various parts of the world. Human fossils have been found in the island of Gaudaloupe; at Danforth, in France; in grottoes in the Carpathian mountains of Hungary; in Arragon, in Spain; and in great quantities at Kostrich, in Germany. These fossils, be it remarked, are found in the strata, are accompanied by precisely the same circumstances which have been admitted by Cuvier and all succeeding geologists to prove other fossils found with them to be of antediluvian orgin and destroyed by a flood.

We will conclude this part of the subject with the opinion of the celebrated Cuvier, the most learned and experienced fossilist and geologist who has yet appeared. He says: "I can concur in the opinion of M. de Luc and Dolmein, that if there be anything determined in geology, it is this, That the surface of our globe has been subject to a vast and sudden revolution not longer ago than five or six thousand years; that this revolution has buried and caused to disappear the countries formerly inhabited by man and the species now most known; that it has left the bottom of the former sea dry, and has formed on it the countries now inhabited; that since this revolution those few individuals whom it spared have spread over the lands newly made dry; and consequently it is only since this epoch that our societies have assumed a progressive march, have formed establishments, have raised monuments, and arranged scientific systems."

It is scarcely necessary to remark how fully this conclusion accords with the tenor of the Mosaic history. The conclusion, then, clearly and legitimately established by the facts we have been considering, is this: that the earth is not in the condition in which it came from the hands of its Creator. Every other object or region of His mighty works yet discovered by us demonstrates order, regularity, and the peaceful operations of His benevolent hand. The earth in its superior strata, to the lowest depths yet penetrated by man, evinces derangements, disorder, and mighty concussions, evidently destructive to the living creatures on its surface. No theory yet devised by those who reject the truth of the Mosaic records can account, with any degree of plausibility, for the natural or moral causes of this anomalous catastrophe.

There is another plausible, though in truth unfounded attempt to explain the phenomena of the existence of remains of animals in the highest latitudes, *which have never been found in the memory of man elsewhere than in the tropical regions*, and of remains of a rhinoceros and elephant, with the flesh yet undecayed, found in the frozen banks of the Lena, near the north pole. The theory by which these phenomena are explained by those who are too wise to believe in the Noacian flood is this: they *suppose* that at a remote period—they cannot tell how remote—the temperature of the arctic regions was as warm as the tropical regions are *now*; that hence the elephant and rhinoceros lived and died in those regions; that suddenly the temperature sunk so low as to destroy those animals, and this sinking of the temperature took place so suddenly and so rapidly as to enclose some of them in ice, and thus preserve the flesh undecayed.

Now, every reader knows that the permanent temperature of the earth and the changes of the seasons depend on the degree of the inclination of the earth's axis to the plain of its orbit. The degree of this inclination has varied so little, as astronomers show, that it *could not possibly* affect the temperature of the zones in the slightest perceptible degree. Thus these learned gentlemen, who sneer at a belief in a universal deluge, fabricate a theory which contradicts science, and is founded on mere assumptions. They *assume* that the polar regions were once as warm as the tropical, in which alone the above-mentioned animals have ever been found to exist, and can assign no means or cause of so great and *sudden* a change of temperature in the polar regions, and still less any moral reasons for a change which destroyed so vast an amount of *animal* life and enjoyment. By this same theory, with an additional supposition for which nothing in scientific truths nor in local causes furnishes the slightest pretense, they endeavor to explain the phenomena of striæ on the face of rocks, which learned men have explained as being made by large rocks carried along with great force by the diluvial torrent. They *assert* that at another remote period the polar temperature changed suddenly from cold to warm, so that the great *merde-glace* which had frozen up these animals was broken up by the rising of the temperature sufficiently to crack the ice into great icebergs, and to melt the ice into water in sufficient quantities to float off these icebergs, in which had been frozen up large rocks, and carried them along with such force as to scratch the faces of rocks as the passed along. This is the famous "*glacial aqueous*" theory. This sudden rising of the temperature of the Arctic regions is mere assumption. At one period there is a sudden falling of temperature sufficient to destroy animal life, and to preserve, in some instances, their flesh undecayed; and then a sudden rising of the temperature sufficient to break up the ice into separate masses, and melt water sufficient to float them far to the south and south-east. First, the Arctic regions are warm enough for elephants and rhinoceri to live in them in immense numbers—for the ivory of the teeth of the elephant has furnished an article for a large commerce for a century—then a sudden falling sufficient to destroy these animals and preserve their flesh, then a rising sufficient to melt large masses of ice into water sufficient to float them off with rocks frozen in them, and all these changes not only without any assignable causes, but against known scientific principles. Yet the supporters of these baseless theories are all scientific men, and those who believe in the existence of the Noacian flood are ignorant of science. We treat their sneers with contempt, or at least we are not moved by them. We have to regret, however, that Christian philosophers and geologists, of equal real learning with these theorists, have acquiesced in these baseless theories to be in learned company and share in a self-assumed reputation.

Remainder next week.

---

* Every part of our continent exhibits in strata similar evidence of disruption and convulsion.

† For many interesting facts on this subject, the reader is referred to a lecture on geology by the late venerable and profoundly learned Daniel McConaughty, D. D., L.L. D., formerly President of Washington College, (Pa.,) and with whom the glory of that institution departed.

LIFE AND LIGHT IN THE BIBLE.

BY DE WETTE.

World Redeemer! Lord of glory!
As of old to zealous Paul,
Thou didst come in sudden splendor,
And from out the clouds didst call;
As to Mary in the garden
Didst thy risen form appear,
Come arrayed in heavenly beauty,
Come and speak, and I will hear.
"Hast thou not," the Master answered,
"Hast thou not my written Word?
Hast thou not to go before thee
The example of thy Lord?"
Blessed One, thy word of wisdom
Is too high for me to know,
And my feet are all too feeble
For the path where thou didst go.
Doubts torment me when I study:
All my reading and my thinking
Lead away from firm conviction,
And in mire my feet are sinking.
Then I turn to works of duty,—
Here thy law is very plain,—
But I look at thy example,
Strive to follow—strive in vain.
Let me gaze then on thy glory;
Change to flesh this heart of stone,
Let the light illume my darkness,
That around the apostle shone.
Cold belief is not conviction,
Rules are impotent to move;
Let me *see* thy heavenly beauty,
Let me learn to trust and love.
In my heart the voice made answer:
"Ask thou not a sign from heaven;
In the Gospel of thy Saviour
Life as well as *light* is given.
Ever looking unto Jesus,
All his glory thou shalt see;
From thy heart the veil be taken,
And the word made clear to thee.
"*Love* the Lord, and thou shalt see him
Do his will, and thou shalt know
How the Spirit lights the letter;
How a little child may go
Where the wise and prudent stumble;
How a heavenly glory shines
In his acts of love and mercy,
From the Gospel's simplest lines."

FAITHFUL TO HIS MASTER.

A correspondent of the *Presbyterian*, mentioning the late meetings of the London City Mission, remarks concerning its present condition, that "the best men in the community are heartily engaged in its favor, always excepting the established clergy, very few of whom deign to smile on a society which is partly governed by Dissenters. Admirable coadjutors the city missionaries often find among the gentlemen who favor their labors." The following anecdote, related at one of these meetings, is given in proof of this. It suggests a lesson which every Christian should heed:—

One of these gentlemen lately sailing down the Thames on board one of the Margate steamers, observed a party of twelve young recruits on their way to Canterbury, where they were to be trained in order to their joining the army in the Crimea. Stepping up to them he inquired whether they had need of anything to eat, and finding that they were likely to be without food for many hours, he invited them into the cabin, and procured for them an abundant supply of good things. All being seated, they were about to fall to work, when their kind entertainer stopped them till he had asked the blessing of the gracious Giver of all good. He took occasion to impress on them the duty of gratitude to God, and so well was the lesson apparently learned, that when the meal was done the men, ere they rose, requested their entertainer to lead them once more to the throne of grace in returning thanks. This being done, he conducted them to a convenient part of the deck, and delivered a most touching and appropriate address, urging them to lives of repentance and devotion. The effect was striking. Many a wet cheek attested the impression made; and so deep was that impression, that ere they parted, these twenty young soldiers had entered into a solemn compact with each other to unite themselves into a praying society, and to hold their first meeting the same night at the barracks, on their arrival at Canterbury. One of them, a young Scotchman, afterwards sought an interview with the gentleman alluded to, and confessed his deep remorse in reflecting on a life of former folly, and his resolution, by God's grace, to live better during the remainder of his career; begging his assistance to enable him to repair some of the baneful effects of his past sin, by opening for him a communication with his deserted wife and children. Such results of individual effort are by no means uncommon in our time, and in this country, giving us the hope that large blessing are yet in store for the faithful people of God."

MYSTERIES IN RELIGION.

You would have a religion that contained no mystery. Let me tell you, then it would be a religion which *you could never receive.* Could you receive a religion as coming from God, which was manifestly discordant with the works of Creation and Providence? Must you not have the God of your religion and the God of creation correspond? You allow it, and so will every man of any respectable intelligence and candor. But the works of creation and providence embody many mysterious things. Everywhere we are meeting with things we cannot unfold, depths we cannot fathom. Tell me why is that young man cut down in the vigor of life, while the aged is spared? Why is the house of the widow burnt up, while that of the strong man (able to erect another) stands safe by the side of it? Not to trouble you with examples, let me say to you, that if your religion contained nothing mysterious, you would reject it; you would say it did not agree with the aspect of providence and creation. You would say, that when God speaks to you in creation, his language brings up that which is mysterious; looking at your own frame you would exclaim, "I am fearfully and wonderfully made." You would say that when God speaks to you in providence, his language brings up that which is mysterious; looking at the bereaved, (for example,) you would exclaim, Why should the mother weep for her darling daughter, and the father live to build the sepulcher of his sons?

You would demand, therefore, that when God speaks to you in religion, his language shall sometimes bring up that which is mysterious—that it must sound like the same voice which speaks to you in nature, and have at least a general correspondence with the language of creation and providence. And if it did not so correspond, you would be obliged to reject it; you could not worship one God in nature and another in religion. For immortality, for the great and amazing matters of an eternity to come, for the unseen spirit that tabernacles within you, soon to be out on the fields of a spirit's existence, you can not only afford to have God high and mysterious, but your mind demands to have him more mysterious and high above you than he is on those fields of matter, and for the little lapse of your *three score years and ten.* Religion is a deeper system than nature, reaches further, lasts longer. You *need* to have him more grand, mysterious and amazing.

And, after all, what are these mysteries? They are not things needful for us to understand—desirable to be known—perhaps not things which, from our limited minds, we could understand if they were unfolded before us. Who can understand God to perfection?

There is nothing, then, in the darknesses of our religion which ought to trouble you; nothing that excuses you from embracing it; or proves by its difficulties that God has any *pleasure in your death.* [Dr. Spencer.

SCOLDING IN THE PULPIT.

One of the most common errors of ministers of the gospel is indulging in a fault finding, censorious style of address from the pulpit. They may find many things going wrong in their churches, their members becoming lukewarm and worldly minded, indulging in practices inconsistent with their profession, and that hinder the cause of Christ, and they rail out against them from Sabbath to Sabbath, and wonder that their tirades do not check these evils, that they continue just as bad, or become even worse than they were before. They feel that ministerial faithfulness requires that they should bear testimony against the sins of their flocks, and endeavor to induce them to forsake them; and so it does, but they mistake the best method of doing it. Churches are, in this matter, very much like families. They may be governed and molded by kindness and affection, but not by scolding and fault finding. When affection is at the helm of a family, and beams out in every look and action of its head; when sorrow rather than anger is depicted in the countenance, when any of its members do wrong, the family can be very easily corrected in [illegible] railing follow each other in quick succession, and the members come to feel that they will be scolded and harshly found fault with for every little error that they may fall into, all family government soon comes to an end. The head of the family loses all power to mould it. Just so it is with churches. They may be persuaded, encouraged, and reasoned into almost anything that is proper, but they can be scolded and driven into nothing. Said the sweet-tempered poet, Cowper, in a letter to the Rev. John Newton:

"No man was ever scolded out of his sins. The heart, corrupt as it is, and because it is so, grows angry if it be not treated with some management and good manners, and scolds again. A surly mastiff will bear perhaps to be poked, though he will growl even under the operation; but if you touch him roughly he will bite. There is no grace that the spirit of self can counterfeit with more success than a religious zeal. A man thinks that he is skillfully searching the hearts of others, when he is only gratifying the malignity of his own, and charitably supposes his hearers destitute of all grace, that he may shine the more in his own eyes by comparison. When he has performed this notable task, he wonders that they are not converted. 'He has given it to them soundly, and if they do not tremble and confess that God is in him in truth, he gives them up as reprobate, incorrigible, and lost forever.' But a man that loves me, if he sees me in error, will pity me, and endeavor calmly to convince me of it, and persuade me to forsake it. If he has great and good news to tell me, he will not do it angrily and in much heat and discomposure of spirit. It is not, therefore, easy to conceive on what ground a minister can justify a conduct which only proves that he does not understand his errand. The absurdity of it would certainly strike him if he were not deluded"

These are the words of truth and soberness, and they should be deeply pondered by those who undertake great reforms of any kind. Sharp rebuke is sometimes necessary and useful, but all other means should be tried before it is resorted to. And when we, who preach the gospel, fail in our attempts to reform our hearers, we ought not, at once to set le down in a state of self satisfaction with our own efforts, and lay all the blame on the depravity of others, and not on ourselves. It is possible that we may not have approached them in a right spirit, and plied them with the proper motives; and, if so, we may be as much to blame as they are.

BEES.

A writer in the *New York Evangelist* has a very pleasant article on "The Bees of the Bible." They are very numerous, he says; they never sting; they yield a great deal of honey; their honey never cloys; and it is their nature to be found together in swarms. Here is a specimen of them:

Be ye kindly affectioned one to another.
Be sober, and watch unto prayer.
Be content with such things as ye have.
Be strong in the Lord.
Be courteous.
Be not unmindful to entertain strangers.
Be not children in understanding.
Be followers of God, as dear children.

—We really do not know that we could utter a better wish for our readers, than that each of their hearts might be made a hive for such a swarm of bees. And we are very sure that none of us could be in better business than that of retailers of the honey they would produce.

THE STANDARD OF EXTRAVAGANCE.

To what extent may Christians indulge in luxury?—is a question more easily asked than answered. Some would say, that they ought not to indulge in it at all; understanding luxury to be what the Scriptures call "conformity to the world." They would place the Christian upon a style of living but little removed from barbarian simplicity, lest the accumulated comforts of an advanced and polished community should lead his heart away from God. They would have him wear the coarsest clothing, live in a habitation of the plainest kind, have the rudest sort of furniture, eat the coarsest kind of food, ride in a carriage of the roughest manufacture, and discard carpets, mirrors, sofas, china ware, and jewelry, as unsuitable for one claiming to be a disciple of the self-denying Jesus. Indeed, there are always, in every place, those whose mouths are filled with unceasing complaints of the *pride* (as they call it) of those Christians who think it no sin to dress well, and to avail themselves of the comforts of an advanced state of society, as far as they can honestly afford to do so.

We are sensible of the difficulty of saying any thing on this subject. An apology for those who indulge in the things which wealth procures, *might* serve to lull the consciences of some who, already, make such things the great pursuit of their lives; whereas, it would be better to talk to them in a way that would tend to rouse them from their guilty course, and make them lay to heart the injunction of Him who said, "Sell all that thou hast, and give to the poor." But we intend no justification of the principle which makes the attainment of luxuries the great end of life. To the many who say, "Who will show us any good?" meaning such things as gratify the senses, and seem to care for nothing else, we would give such counsel as would tend to make them feel, that to have the light of the Lord's countenance lifted upon them, would put more gladness in their hearts than to have their corn and their wine increased.

The object which we *wish* to accomplish, is to put some sort of restraint upon those who are everlastingly finding fault with such of their fellow Christians as move in a circle which, by reason of their own more straitened circumstances, they cannot attain themselves. In nine cases out of ten, these censures are but the manifestations of a spirit of envy. A Christian sister, to whom God has given wealth, chooses to clothe herself in silk and velvet, and perhaps to wear a few simple jewels. She appears in a cashmere shawl, or is known to wear some other costly article. Straightway, she is denounced as worldly-minded, proud, lifting herself above the humbler classes. A wealthy Christian brother wears broadcloth that cost five dollars a yard, rides in a carriage worth three hundred, lives in a house that cost several thousand, and has some very costly articles of furniture. Brussels or Axminster carpeting covers his floors, and marble vases adorn his halls, while a piano, or some other instrument equally expensive, is found in his parlor. Of course, in the estimation of the censorious, he is only a formal professor; the love of God cannot dwell in his heart.

Nay, the number of preachers of the gospel is not small, who are ever ready to raise an outcry about such things, as if they were the giant sins of the community. And other religious orders, besides the Quakers, have made the style of clothing of their members a matter of discipline. We more than suspect that the relaxation of their former rigidness, in this respect, by some of them, is a matter of profound grief with not a few; and that they lament it as one of the saddest of proofs, that the cause of vital religion is on the wane.

But who can tell where the line should be drawn between the articles proper, and those which are improper, for a Christian to possess and use? If mere *utility*, to the exclusion of everything ornamental and tasteful, is to govern us, it is not difficult to see that such a principle, rigidly carried out, would soon reduce society from a state of refinement to one of comparative barbarism.

If it is intrinsically wrong for one man to wear cloth at five dollars a yard, it is wrong for every other man to do so. That which costs but three dollars would serve to cover his nakedness, and perhaps make as durable a coat. Is it not his duty, then to eschew the five, and wear the three, dollar cloth? About three yards would make him a full suit; would it not be wrong for him to expend fifteen dollars for a suit of clothes, when nine would serve? But if it be wrong to wear such costly clothing, it must be wrong to manufacture it; and if such an idea can be made to pervade the world, the manufacture of fine cloth must cease. Who does not see, that this would be to put a check upon the spirit of improvement? And to apply the principle to all articles of costly manufacture, would be to close the shops of skillful artisans, of every class, and drive out of employment the capital invested in such business, as well as to drive multitudes of handicraftsmen into occupations for which they are totally unfitted, and therefore to impoverish them. And what would the end be, but a reduction of society to a state of savage rudeness? Does Christianity inculcate any principle which would lead to such a result?

We shall continue our remarks on this subject next week. T. B. B.

"STATE OF THE DEAD"—NO. 7.

Does Revealed Religion so modify the Divine Government as to require recompense. in a future state, additional to the course of nature?

"Christianity (says Bishop Butler) is a republication of natural religion." He also adds, that "it contains an account of a dispensation of things not discoverable by reason," among which he includes the mediatorial government of Jesus Christ. Now, while Mr. Butler admits Christianity to be a scheme beyond *our* comprehension, he says:

"Nor is there any absurdity in supposing that there may be beings in the universe. whose capacities and knowledge and views may be so extensive, as that the whole Christian dispensation may to them appear natural, i. e., analogous, or conformable to God's dealings with other parts of his creation, as natural as the visible known course of things appears to us."

If such be the case, it will follow, of course, that the awards of the future state will be limited to the course of nature; for the whole of the Christian dispensation must include the future as well as the present state of existence, as the whole must include all the parts.

Another quotation from the Bishop will show that he considered the award of the future state as proceeding according to the course of nature:—

"There is no absurdity in supposing it (future punishment) may follow in a way analogous to that in which many miseries follow such and such courses of action at present—poverty, sickness, infamy, untimely death by diseases, death from the hands of civil justice. There is no absurdity in supposing future punishment may follow wickedness of course, as we speak, or in the way of natural consequences, from God's *original constitution* of the world, from the *nature* he has given us, and from the condition in which he has placed us; or, in like manner, as a person rashly trifling upon a precipice, in the way of natural consequence, falls down, in the way of natural consequence breaks his limbs, suppose, in the way of natural consequence of this, without help perishes."

Such are the conclusions of the author of Analogy of Religion—a work which has stood the test of criticism. It would seem almost egotistical, if not superfluous, for me to add to the above, by way of intensifying it. I will, therefore, use his language further. He says:

"It must be admitted, that the future punishment of wickedness is not a matter of arbitrary appointment, but of reason, equity and justice."

"Results in eternity (says Rev. Albert Barnes) we suppose are but the transfer to another state the results which would take place here if the guilty were not removed. In hell we expect there will be the elements of universal misrule—and that all the foreign force that will be necessary to secure eternal misery will be the almighty power to preserve the terrible powers in unrestrained being. We are amazed that it should be thought that death will arrest the course of things. Guilty man carries the elements of his own perdition within him, and it matters little whether he be in society or in solitude—in this world or in the next—the inward fires will burn, and the sea, and the dry land, and the burning climes of hell, will send forth their curses to greet the wretched being."

Such is the testimony of one of the most distinguished divines of the present age; and he positively asserts, that "*revealed religion is in accordance with the course of nature.*" And I add, if it be, so must be the awards in the future state.

"Some good men (as Mr. Butler says) may perhaps be offended with hearing it spoken of as a supposable thing, that the future punishment of wickedness may be in the way of natural consequence; as if this were taking the execution of justice out of the hands of God, and giving it to nature. But they should remember, that when things come to pass according to the course of nature, this does not hinder them from being His doing, who is the God of nature; and that the Scriptures ascribe those punishments to divine justice which are known to be natural. For, as the *natural* consequences of vice, in this life, are doubtless to be considered as *judicial punishments inflicted by God*, so likewise, for aught we know, the *judicial punishment of the future state* may be in a like way, or a like sense, the *natural consequence of vice.*"

I have thus expressed my own views chiefly in the language of others, lest I might seem to be as egotistical as Bro. B.'s last article would seem to indicate I am aspiring to be. If I "evince some skill in tearing down the tabernacles of others," I am quite willing to concede to such men as Bishop Butler and Rev. Albert Barnes the honor of giving "something more substantial," on this subject.

Perhaps the above is sufficient to show that "revealed religion does not so modify the divine government as to require recompense in a future state additional to the course of nature."

I am well aware, that it is urged, that the sufferings of Christ were of such a nature as afford evidence that they were inflictive, penal. But if Revealed Religion is in accordance with the course of nature, does it not follow, that the sufferings of Christ were also? If, then, the sufferings of Christ were according to the course of nature, and if those sufferings were the proper penalty of the law of revealed religion, (as Bro. B. says they were,) will it not follow, that the punishment of the wicked in the future state will be according to the course of nature, as such punishment will be the proper penalty of the law of revealed religion? For, if Christ suffered the proper penalty of the law of revealed religion, then his sufferings, and those of the damned in hell, must be identical. Unless, therefore, Bro. B. can yet produce the evidence that revealed religion is not in accordance with the course of nature, I shall feel justified in holding that it is. For the burden of proof lies with him, inasmuch as he affirmed, that revealed religion did so modify the divine government as to require additional recompense to the course of nature in the future. This affirmation I think Bro. B. has not proved. If he has, I have overlooked the proof.

I am then of the opinion, that the subject matter of revealed religion is in accordance with a stated, fixed, and settled law of the moral universe. This the analogy of nature everywhere indicates. I trust, therefore, I need not go into an examination of the various texts of scripture, as all must admit, that isolated passages can be brought to favor both sides, so far as the letter of them is concerned. For, if Christianity be a republication of natural religion, as is admitted by many of the most learned and pious of true Christians, it must follow, that its sanctions and awards are in harmony with the sanctions and awards of natural religion. Bro. B. himself admits, that had man enjoyed natural religion only, the awards of a future state would be according to the course of nature. Such are my honest convictions at present. If Bro. B., or any one else, can convince me of error, I will cheerfully recant. I have no desire to impose my views on others, further than duty requires. I have no desire to "strip off the clothing" of my brethren, or "undermine their creeds." And I shall consider all such flings as unworthy of notice. I have a right—(so has every man)—to examine and decide; and I admit the right of my brethren to know how I stand, and whither I am leading the "lambs of the flock." Should others insinuate that Bro. B. might lead the lambs astray by his doctrines, perhaps he might feel the insinuation ungenerous. But I forbear. May we keep the unity of the spirit in the bond of peace.

S. S. G.

LETTERS FROM PALESTINE—NO. 14.

At present I am so much occupied with the duties of the mission, that I have only time to write the following extracts from my journal.

Jaffa, April 28, 1855, Sabbath. Meeting at my house. Exercises as usual; preaching and conference. Spoke from Ps. 137: 5, 6. Allusion having been made to a remark of a missionary in Palestine, to the effect that Sabbatarians were "*Judaizing teachers,*" Bro. Dickson proceeded to say, that the Sabbath was an institution wholly disconnected from Judaism. At that moment two gentlemen entered, one a traveler from New York, and the other a native preacher. The latter, after hearing some plain truth, remarked, that while the Sabbath was an important institution, it was *a* day; only *one* day in seven, but no day in particular. Still, he believed the first day of the week to be the Christian Sabbath. In making the closing prayer, Bro. D. thanked the Lord that He had not left this matter to the convenience nor whim of man, but that He had appointed *the* seventh-day for the Sabbath. I could but pray that truth might be received in meekness.

May 5th, Sabbath. A good meeting at Bro. Dickson's. Spoke from 1 John 3: 22—24. In the afternoon, some Armenians called, with one of whom I spent an hour in searching the scriptures and conversation on faith in Christ as the great essential to salvation.

8th. Received a visit in the afternoon from some English families resident in this place. Before separating, enjoyed a season of prayer.

10th. A German Jew from Jerusalem called with a letter from Bro. Kraus. The Jew and his family are in dependent circumstances. He wants work; is a baker by trade, but wishes to work at gardening. It pained me that I could not encourage him to find employment among our people. Gave him the small pittance of ten piastres, which is all that I can do for him, and at the same time not turn others empty away, which I have not a heart to do so long as I have anything myself.

11th. Last week made several calls in the city. To-day called upon Rabbi ———, and saw there two Jewish families lately arrived from Alexandria.

12th, Sabbath. Meeting at sister Minor's. Gave an exposition of the tenth chapter of Matthew. In the afternoon, according to my custom when other Sabbath duties will permit, held a family Bible-class, and at the close of the day, a family prayer-meeting.

13th. Attended Arabic service at Rev. Mr. Krusé's, Church missionary at Jaffa. Some months since I commenced attending his morning service, as often as my labors would permit. I find it a great advantage in accustoming my ear to the language.

18th. One year to-day since I came to Palestine. Though very busy all the time, how little has been accomplished for God and the salvation of souls! Truly, after all that I can do, I must confess that I am an unprofitable servant. All my labor will be in vain unless attended with the blessing of the Holy Spirit.

19th. Enjoyed a precious Sabbath. Meeting at Bro. Saunders'. Subject of discourse the twelfth of Matthew, after which was held an interesting conference.

20th. Hard at work in my studies. The morning of each day is devoted to them, and sometimes all day, though giving and receiving calls seems to occupy one-third of my time. I endeavor to give these visits a religious turn as much as possible. Last week had a conversation for half an hour on the Sabbath question, with some Christian Arabs. A converted Jew present told them that Christ had not changed the Sabbath. As usual, there was a good deal of twisting and turning to make out a theory and evade the plain teaching of the Word of God. Within a few months past have conversed with several Jews, who say that Jesus of Nazareth never changed nor abolished the Sabbath. So it seems they are, in reading the New Testament, convinced that the gospel does not abolish the fourth commandment.

22d Was quite unwell yesterday, but am better to-day, so that I am engaged in my usual labors. Expected letters from the States, but was disappointed. The almost total absence of letters from brethren and friends, is a great trial. True, hard times may prevent many from paying postage. Still, if the loved ones at home could realize how much their epistles would comfort us, I think they *would write.*

23d. Accepted an invitation to accompany three Armenians to visit some gardens a mile distant. Spent two-thirds of the forenoon very pleasantly, for the benefit of my health and the advantage of a talk in Arabic.

24th. Birthday of Queen Victoria. A national salute was fired from the fort. It is a new thing for the government to celebrate the national festivals of the "Infidels;" and this may be regarded as one of the evidences that Moslem prejudices are giving way. May they fall soon. Made several calls in the morning. In the evening, by invitation, self and family visited the English missionary. The time was occupied with religious conversation, mostly on missions.

26th. Another hallowed season of rest to bless the world; but how few wish to know it. Meeting and communion season at my house. Preached from Matt. 26: 42. "O, my Father, if this cup may not pass away from me, except I drink it, thy will be done."

27th. Four Jews called, with one of whom I conversed about the Saviour. Tried to show him the *character* of the Messiah who should come into the world, and then, that Jesus is this Messiah. At length he said, "We are waiting." Yes, said I, you are waiting, and we are working, and expect to occupy till He comes the second time, without sin unto salvation.

31st. Have been very busy this week, getting ready for a second visit to Jerusalem, the object of which is, *first,* to enjoy some advantages in the study of Hebrew, which my limited means will not secure to me at Jaffa; *secondly,* to spend a portion of my time *there* in missionary labor; and, *thirdly,* to study the topography of Jerusalem with my Bible in hand. According to present arrangements, I expect to remain there about three months. I have rented two rooms, not very pleasantly situated, in the Jews' quarter, with some furniture included, for one hundred and eighty piastres per month. We board ourselves. One room serves us for bed-room, sitting, dining, study and meeting-room; the other for kitchen and cook. Our baggage, amounting to five trunks and boxes and a bundle of bedding, were loaded upon a camel, and sent forward yesterday afternoon. I pay forty piastres and *bucksheesh* of one piastre for the camel, which is equal, not reckoning discount, to one dollar and sixty-four cents. The driver agreed to deliver the goods in Jerusalem to-morrow noon. This afternoon, at three o'clock, self and family set off, accompanied by Joseph, who has served us the past year. Half an hour upon the road, we began to be much oppressed by a hot wind or sirocco. Had it been much hotter, we must have fallen to the earth. Arrived at Ramlah before sunset; took lodgings at the house of the American consul.

June 1st. The heat continuing, we thought it best to make most of the night, and so we started at 11 P. M, taking with us, at the request of our host, a captain of the guard, as far as to Bab el Wad, or gate of the mountain I felt that our protection must come from a higher power. At half past three A. M., arrived where some travelers had halted, under a tree, for refreshment. A servant came to us, saying that his lord invited us to alight, and take a cup of coffee with him. We accepted the invitation. We soon found that it was the secretary to the Pasha of Jerusalem, who, with an escort of half a dozen, were returning from a visit to Jaffa. He had taken a letter of introduction to me, but time failing him, he had sent it to me, with his apology. I found him and his aid both Frenchmen. We had a very sociable time for about twenty minutes, and really romantic too, with the silver beams of the moon shining upon us, the mountains close at hand, and the undulating rising plain around, which seemed to make us forget for the moment the heat and fatigue of the way.

Our guard left us near Bab el Wad, evidently satisfied with a bucksheesh of ten piastres, which was rather unusual, as the Arabs generally, with the first offer, clamor for more. At seven A. M. we stopped for lunch under an olive tree, close by the village of Kirjath-jearim of Scripture, where the ark of God once remained for twenty years. 1 Sam. 7: 2. It is now called Abu-Shosh, after the name of its chief, who rules over a large tribe inhabiting these mountains. By virtue of a treaty made long since with the Pasha of Jerusalem. Abu-shash is security for the safety of travelers to and fro from Jerusalem to Bab el Wad, or the foot of the mountains. This accounts for the absence of our guard. It is only on the plain that travelers fear molestation, and that mostly in the night. The few houses of the village are built of stone, and from their size may contain a population of some three hundred souls. There is an old church, a large building, and apparently unoccupied, just by the road side, in front of the village, where the traveler ascends the mountain. For the rest of the way, the heat seemed intolerable. We became weak and drowsy. Miriam fell from her donkey among the rocks, but was taken up unhurt. Frequently I found myself making low salaams to my donkey, and then being brought up with a suddenness that roused me to the consciousness of a most ungraceful *nod,* but thankful indeed that I had escaped a fall and consequent bruises among rocks and thorns. The slow pace of the animals did not bring us to Jerusalem till five minutes after the gates were shut, at 12 M., for the hour of prayer on the Mohammedan Sabbath. It was greatly to our discomfort that we had to remain outside the city wall an hour and three-quarters and mostly in the burning sun and suffocating wind. We afterwards learned that the thermometer at Jaffa stood at this hour at 136 deg. F. The heat must have been full as great at Jerusalem. While waiting without, our camel arrived; a fortunate instance of promptness on the part of the Arab, which saved us all anxiety about our baggage. Glad indeed were we when, at 2 P. M., we arrived at our lodgings.

2d, Sabbath. The heat continued. We were so fatigued that we did not attempt holding a meeting.

5th. The hot weather which commenced on the 31st ult. continued till last evening, when there was a slight change, by a breeze from the west. Up to this time I have not been able to study or go out. It is now a little more comfortable. Brother Kraus, a Sabbatarian, commenced giving me lessons this morning.

9th, Sabbath. Prayer-meeting in the afternoon. Present Bro. K. and Bro. S. and family; the latter arrived during the week, on a visit to Jerusalem.

10th. Attended Arabic service in the morning, in the Episcopal school-room. Gave some Sabbath tracts for distribution in the family of a Jewish proselyte, who keeps first-day. Last week had a long talk with a Hebrew on Christianity. Ah! "what will a man give in exchange for his soul?" Fear that the word has fallen upon rock, but God knows, and may care for it.

12th. Three missionaries to the Jews called. Had an interesting interview with them.

13th. Made several calls. A Rabbi called and left a French magazine, the *l' Univers* for May, a Jewish paper, published in Paris, in which there is an article on a sect in Russia called Schobatniks, i. e. Sabbatarians. They were formerly quite numerous. In A. D. 1800 some of them became Jews, a part of whom on this account were burned, and the rest sent to exile. However, since 1814, the exiles have been recalled and the sect has enjoyed freedom of worship. The editor of the *l' Univers* thinks that they have descended from the early Christians.

14th. Gave and received several calls. A Christian gentleman, who called to-day, says that half a dozen families of Russian Sabbatarians came to Jerusalem some years since, some of whom are now members of the English church, and some are Jews. He gave it as his opinion, that this people *still* existed in Russia, were Christians, and not Jews in disguise, as some have represented them. Bro. K., a Jewish physician, and a Prussian Jew, lately at Jaffa, all testify that such a people exist in Russia. Bro. K. speaks of a company of Sabbatarians, about thirty in number, at or near Wittemberg, Germany, who withdrew from the Lutheran church some years since, having, through the sole means of searching the scriptures, adopted the Bible Sabbath. They were spoken of by the pastor of the church, as having *erred* still farther, by renouncing infant baptism, and believing in immersion upon a profession of faith in Christ. Distributed tracts, and conversed on the Sabbath question with one who had formerly observed it, but who now rests on the no-Sabbath doctrine. Whether or not success attend these humble labors for Christ's sake, there is but one course to be pursued, keep doing; sow beside all waters, and occupy till the Lord shall call his servant home.

W. M. JONES.

THE CASE OF PARDON DAVIS.

The Committee appointed by the Eastern Association to ascertain what can be done for the relief of Pardon Davis, and inform the Corresponding Secretary, have forwarded to me the following "Petition," for circulation and signature. In order that it may be immediately attended to, I have thought best that the "Petition" be published in the *Recorder;* and I would respectfully request each minister to give the same an immediate circulation through his society, and then forward the petition and the signatures attached to me, that I may return them all to the Committee. Direct to Mystic Bridge, New London Co., Conn. S. S. GRISWOLD, Cor. Sec.

Petition.

To his Excellency the Governor of Louisiana:—

The undersigned petitioners respectfully represent, that Mr. Pardon Davis, now confined in the Penitentiary of Louisiana, having been convicted of offenses against the laws of that State, is a member in good standing in the Seventh-day Baptist Church of Berlin, Wisconsin, and that, with the members of that church, he most conscientiously believes that the Seventh Day is the Sabbath, by the appointment of God, and that in it he ought not to do any work. Therefore, we do most earnestly petition, that you will grant him exemption from labor on the seventh day of each week, during the time of his imprisonment, as you will thereby not only confer a great favor on Mr. Davis and his friends, but will also do honor to that beneficent provision of our Constitution, which guarantees the free exercise of religion to all American citizens.

Sixteen years ago a few packages of Bibles and tracts were introduced into Piedmont by a few pious citizens of Genoa, and distributed among the young soldiers of the Waldensian vallies; and not one of these years has passed without bringing to Genoa Italians who had been converted by means of Bibles and tracts, sometimes without other instrumentality. The people are said to hunger and thirst for the truth, and to receive it with more simplicity than any other nation.

CHRISTIAN COURTESY IN DISCUSSION.

There is perhaps nothing more evident to reflecting minds, than that persons engaged in honorable disputations gain nothing substantially to their respective views or positions by dealing in personal abuse, or in efforts to silence each other by resorting to sarcastic and satirical retorts. On the other hand, the effort, by any discourteous or unkind means, to disparage either the wisdom or honesty of an opponent, in the estimation of others, whether hearers or readers, is generally, and we think justly, regarded as good evidence of the existence, on the part of the assailant, of one, at least, and perhaps *all* of the three things following, viz: the conviction that his cause is a bad one, and incapable of being sustained by fair and honorable dealing; or that he is in some degree wanting in what is usually termed *good manners;* or, what would be most lamentable, and the last that should be believed, in possession of an unsubdued heart.

In the minds of the masses of the low and vulgar, this mode of dealing in discussions may no doubt find some, perhaps many, admirers, and gain for its employer an apparent but certainly inglorious victory. But for those professing to be disciples of Jesus Christ to resort to such tactics in conducting discussions, either oral or written, is not only to perpetrate great abuse on the intelligence and refinement of their hearers or readers, but subjecting themselves to serious depreciation in the estimation of all lovers of right.

The position of a disputant assumes a most unfavorable aspect in the view of disinterested lookers-on, when it happens that the assailed is charged by him with, perhaps, ignorance, misconception, shallow-mindedness, inability, and even dishonesty, when, in all these respects, in the opinion of all excepting the parties themselves, the assailed is happily in the advantage of his assailant. It is not very agreeable, to say the least, to those whom duty compels to have a place in deliberative assemblies, to be compelled to see their time, hour by hour, worse than thrown away, and the important business committed to them embarrassed, by these personal encounters between those who should be better employed, and who should seek a fitter opportunity to gratify their ambition in this way, or be obliged to forego the gratification which they seem to derive therefrom. Nor is it less embarrassing to the friends and patrons of a religious journal, who are in the habit of reading all of its principal articles, and especially the discussions conducted in its columns, and who feel a lively interest in its popularity and usefulness, as well as its pecuniary thrift, to be compelled to read from time to time columns of abuse instead of argument, and personal crimination and recrimination instead of candid Christian disputations.

An unkind and uncourteous manner of dealing in discussion, is not only unfortunate for the writer, and unpalatable to his readers, but serves to keep from the arena of public controversy many whose labors would be always both welcome and instructive, but whose disinclination to being roughly handled before the eyes of the thousands who have no other means of knowing their merits or demerits, induces them to either remain silent, or appear *incognito,* rather than subject their real name to all the taunts and jeers which this class of disputants might heap upon it. A veteran in the ranks of Sabbath-keepers and gospel ministers, not long since, gave as one reason for employing a fictitious signature instead of his real name, in his communications for the press, that he had known some old men to be treated with rather more severity than he coveted.

In presenting these thoughts, it is no part of our design to condemn, or in the least disparage honorable discussion; far from it. On the other hand, we would by all means encourage untrammeled investigation relating to all those great and interesting subjects that justly claim the attention of the lovers and disseminators of truth. Our object is to kindly suggest to all who write for the religious press, and especially to those who write for the *Recorder,* that they will be likely to accomplish more for the cause of truth, the interest, we doubt not, first in importance with them, and better represent the *meekness* and *patience,* as well as the firmness, of the gospel, by bearing in mind, in all their preparations for the public eye and ear, the apostolic injunction to be "*courteous,* esteeming others better than themselves." A. B. B.

A NATION OF METHODISTS.—The mission to the Friendly Islands has been so successful, that the nation is a nation of Methodists; and the whole population, from the king (who, by the way, is a "local preacher,") down to his meanest subject, attend the Wesleyan ministry. These Islands sometimes go by the name of Tonga. They consist of upwards of one hundred and fifty, and lie in the Pacific Ocean, between latitude 13° and 25° south, and longitude 172° west and 177° east. They were discovered by the navigator Tasman in 1643, but received their collective name of Friendly Islands from Captain James Cook.

REASONS FOR NOT PAYING FOR A NEWSPAPER.—The Richmond *Christian Advocate* publishes the following extract from a letter:

"Please say to the editor of the Richmond *Christian Advocate,* that it would doubtless be well to erase the name of C—— C—— from his books, and give up as lost that $7,60. He says, in the first place, he never ordered the paper, and if he did, he never got it, and if he did, 'twas as an agent; and besides, he thinks he paid for it long ago, and if he didn't, he's got nothing to pay, and if he had, he could plead the act of limitation."

RELIGIOUS LIBERTY IN ENGLAND.

The New York *Journal of Commerce* says, a great grievance to the large and respectable portion of the English people who dissent from the established church, has been the levying or the church rates, by which they are compelled to contribute to the ministration of worship in which they do not partake, and to the maintenance of fabrics which they did not use. In some portions of the kingdom, the law has become a dead letter. It cannot be executed in the large towns, because the vestries and church-wardens refuse to take the preliminary action which the law requires to assess the tax. A bill introduced into the House of Commons, on the 16th ult, by Sir W. Clay, proposes to abolish the system altogether, and to substitute for it the system of voluntary contributions, allowing the parishes, however, at their discretion, to allot pews and seats, and to apply the rents to the purpose for which church rates are now levied. The second reading of the bill was strenuously opposed by the church party, on the ground that the measure, by taking away one of the props of the established church, would undermine and destroy it, and Lord Palmerston, though admitting that it was desirable to settle the question, refused to give the bill the support of the government, because he did not think the voluntary system would suffice for the maintenance of large churches in poor parishes, and he believed that it was impossible to carry the measure through the House of Lords. Nevertheless, it passed to a second reading in the Commons, by a majority of 28, in a house of more than four hundred members, and if it should finally fail, the countenance which the present measure has received, will stimulate its supporters to such exertions as cannot fail to secure an eventual triumph of their cause.

Warning against Emigration.—An Irish paper, said to be published in the Archbishop of Tuam's neighborhood, is uttering doleful warnings to the Irish against migrating to this country. Better far, it thinks, to die "in the old land of the saints," than to come under the dominion of the Know-Nothings in the United States. This is its language:

"While the Irish Catholic race was treated with kindness in America, we never uttered a word of remonstrance or warning; but now that all parties agree in complaining of the dreadful persecutions which await them from all the powers of Know-Nothingism in the hitherto boasted land of liberty, we feel it our imperative duty to raise our voice in protest and reclamation. Bad as home is, and cold as is the prospect that awaits our people under a system of laws that obstinately refuse security for tenant industry, it is better to remain and battle with the ills they know, than fly to others of a more revolting kind. A quiet death in the old land of the saints, with the aid of religious consolation in that awful hour, is better than contact with the awful demoralization and almost total absence of religious comforts which await the emigrant beyond the Atlantic."

Resignation of President Wayland.—The Providence *Journal* understands that Dr. Wayland has resigned the Presidency of Brown University, and that his resignation will take effect immediately after the ensuing Commencement. He will preside on that occasion, and then terminate his connection with the University. Dr. Wayland was appointed soon after the resignation of President Messer, in 1826, and entered upon his office, we believe, in January, 1827; the graduating class of the present year will therefore be the twenty ninth that has gone forth from the University during the period of his Presidency. His term of office, as head of the Institution, has been longer than that of either of his predecessors; that of President Manning having continued for twenty-six years, that of President Maxcy for ten years, and that of President Messer for twenty-four years.

Jerusalem Rising.—While other cities in the Turkish Empire are falling to ruin and decay, being depopulated and barbarized, Jerusalem is rapidly springing up into new life. European manners and European wants are bringing in civilization and enterprising industry. Good hotels are found to accommodate most travelers better than the Casa Nuova, so long the only shelter for the Frank pilgrim of whatever nation or religion. There are shops where all kinds of European goods find a ready sale; carpenters, watchmakers, glaziers, tinmen, dyers, laundresses, shoemakers, &c., exercise their various callings. There are three flourishing European tailors. The daily markets are supplied abundantly with good mutton; and poultry and eggs are cheap. Many hundred goats are kept for the sole purpose of supplying the city with milk; and of late cow's milk was to be had. Fruit and vegetables are abundant; and good bread is made by several bakers.

Nursery of Ministers.—At a Sunday-School Convention recently held in the town of Lynchburgh, Va., (says the *Examiner*,) the Rev. J. B. Corron, agent for Southwestern Virginia, of the Domestic Board of Missions, auxiliary to the Baptist General Association of Virginia, stated that he knew of *twenty-one ministers of the Gospel*, including himself, who had been connected with a Sunday-School in the town of Lewisburg, established on Union principles, many years ago, by Father Spotts, a Presbyterian Elder, in which Baptists, Methodists, and Presbyterians, were united as teachers. Among these he mentioned the Rev. Dr. Plumer, now Professor in the Presbyterian Theological Seminary at Pittsburg, and the Rev. Mr. Shuck, late missionary to China, who he said was brought in there a wild boy, and was there instructed and converted.

Catholicism in the United States.—The Boston *Transcript* says that Maryland, the first State where the Roman Catholic Church gained a footing, now contains eight hundred and seven Protestant Churches, and only sixty-five Catholic congregations. In Florida the Catholics early made settlements. Now there are one hundred and seventy Protestant and only five Catholic Churches. Louisiana was settled by the Catholics, who have now fifty-five churches in the State, while the Protestants have two hundred and forty-seven congregations. In Texas, the Catholics were the first sect in point of time; they now have thirteen churches, but the Protestants report three hundred and seven societies in the State. The number of Episcopal, Lutheran and Roman Catholic Churches are nearly the same throughout the country, but each of the three denominations have about one-eleventh of the number of the Methodists, scarcely one-eighth that of the Baptists, and not one-fourth that of the Presbyterians. The entire Protestant population of the country, compared with that of the Catholic, is about as twelve to one.

Free and Easy Religion.—Dr. Thompson, in one of his letters to the *Western Christian Advocate*, written in France, presents the following illustration of Romanism and French self-complacency and good nature:—

"Now," said a Frenchman, as we sat down together in his carriage, "I must confess to you that I am a Catholic. I cross myself, I say my prayers, I go to mass and to confession, I teach my children to do so too. I do all this because my father did, and it does me no harm—it does me good; when I am well it makes me better, when I am afflicted it makes me less afflicted. You are a Protestant; you say I am wrong—the bread is not flesh, and the wine is not blood, but God can do all things. Will he make such a transformation? What says his word? I do not know; the priest does; and he says the Bible teaches this doctrine. It is not my business to examine it, it is his; I pay him for it; it is enough for me to take care of my family, and support the Church and the State. God knows I have no time to spend in theological controversy. Now, my dear friend, do not argue with me; I cannot argue with you; I refer you to my priest."

RELIGIOUS INTELLIGENCE.

The Antioch (Ohio) College, of which Hon. Horace Mann is President, is, it appears, $95,000 in debt. Efforts have recently been made to relieve the institution of its load, and assist to pay the salaries of professors, tutors, &c. This institution charges but $24 a year for tuition fee, and students are boarded at $1 25 a week.

At the last communion season of the First church in Milford, Conn., (Rev. Mr. Brace's,) fifty-two persons were received to the church; forty-eight of them on profession of faith; part of the fruits of the precious revival with which that people have been recently blessed.

Rev. C. T. Mills, a returned missionary from Ceylon, said in a recent speech, that with all that has been done for the evangelization of India, there are only three missionaries to a million of people, and that the money given is not two-thirds of a cent to an immortal soul.

Besides the two General Assemblies, there will be held in New York next May the General Synod of the Associate Reformed Presbyterian church. The General Synod of the Reformed Dutch church will meet in Utica, N. Y., at the same time.

The Annual Meeting of the A.B.C.F.M. is to be held at Utica, N. Y., commencing on Tuesday, Sept. 11, 4 P. M. The hospitalities of the city will be cordially extended to clergymen, honorary members, and as far as possible to other friends of the Board.

Rev. Mr. Loguen, now a respectable colored clergyman in Syracuse, but formerly a slave, has received information from a friend in Tennessee that an effort is about to be made to reclaim him as a slave. The friend advises him to escape to Canada, but he says he will not budge an inch.

Letters from Africa, of the 18th of June, mention the death of the Rev. Mr. Smith, a missionary of the Protestant Episcopal Church at Cape Palmas. Mr. Smith left this City last Fall in company with the Rev. Mr. Pinney and others.

European News.

By the U. S. M Steamer Baltic, European news to July 28th was received in New York on the 8th inst.

On her outward passage, when off Holyhead, at 10 1-2 o'clock on the night of Saturday, 21st ult., during a thick fog, the Baltic ran down the Sarah Ann, schooner, 100 tons, taking slates from Bangor to Bristol. All on board, including a little girl, the master's daughter, were picked up by the Baltic, and the schooner was supposed to have sunk, but was afterwards found afloat and taken into port as a derelect.

There is a total absence of any news of importance from the seat of war. It was currently reported that Gen. Simpson had given in his resignation, and only retained command until the appointment of a successor. The French steadily push forward their approaches towards the Malakoff, which the Russians are fortifying. The Turkish, Sardinian, French, English and Russian forces in the field remain as at last advices. Preparations continue for a campaign on the Danube, and for a maritime expedition—destination secret. Operations in the Sea of Azoff and in the Baltic have been unimportant. The Russians in Asia are encamped near Kars, but have not yet invested the city. An insurrection of Arabs in Tripoli has overpowered the forces of the Bey, and threatens trouble to the Porte. The Bashi-Bazouks at Constantinople have had an outbreak of rapine and murder.

A Touch of Tyranny.—Judge Kane, of his own will and motion, committed Passmore Williamson to jail in Philadelphia, a few days since, for *contempt* of court, in not obeying its order to produce Col. Wheeler's slaves. Application was made to Chief Justice Lewis for a writ of *habeas corpus*, that the validity and legality of this commitment might be tested. The Chief Justice *refused the writ*, on the ground that one court cannot interfere with the action of another in cases of contempt. "Even granting," says Judge Lewis, "that the District Judge made an improper use of the writ, that he erred in deciding that the prisoner refused to answer it, that he also erred in the construction of the answer that was given, and that he otherwise *violated the rights* of the prisoner, *it is not in my power to reverse his decision.* * * * * The respect which we claim for our own adjudications, we cheerfully extend to those of other courts, within their respective jurisdictions." It seems, therefore, that court etiquette, sustained by law, forbids one judge from interfering with the action of another in cases of contempt.

Riot in Louisville, Ky.

Louisville, Kentucky, was the scene of terrible rioting on the 6th and 7th insts. Some twenty lives were lost, and a large number of persons were wounded. The difficulty originated in the hostile feeling which exists between foreigners and natives; but it is not certain whether the outrages had been premeditated, as it is charged, or resulted from the success of the Know-Nothings in the election which was going forward. The following is the most connected and consistent account we have seen of the origin of the matter:—

In the First ward, as two gentlemen were riding in a carriage, they were fired at from a house containing Germans or Irish. One gentleman was wounded, and the firing was repeated, when Edward Williams, watchman of the Second ward, Joseph Selvage and John Latta, Americans, went to the scene of the trouble, and they also were fired at. Latta had his leg shattered by a musket ball, and Selvage and Williams were also wounded. Exaggerated reports then spread to the lower parts of the city in regard to the affair, causing a large crowd to assemble, thirsting for revenge. They gathered around the house where the firing had commenced, took two Germans from it, and beat them so badly that their recovery is considered very doubtful. The house was then completely sacked.

The crowd then proceeded to the houses on the corner of Shelby and Madison streets, from whence Germans had been seen firing, riddled two groceries, a beer house, and two houses, all owned and occupied by Germans, and injured severely several of their inmates. They then went to Jefferson street, where a party of gentlemen coming into the city had been fired upon from a large brewery, sacked the houses around it, burned the brewery, and beat a number of Germans whom they captured, terribly, and also shot an Irishman, who died. In the street below, an American was slightly injured by a shot, when the Irishman who fired it was captured, beaten and shot.

Shots had been fired from all the houses which were attacked.

The crowd now talked of sacking the Catholic church, where it was rumored fire-arms had been secreted, but Mayor Barbee and others pleaded with them not to do so, and prevailed upon them to leave it alone.

The disturbance was now supposed to be over, as the crowd had marched to an engine house in the Fifth ward with their cannon, and were beginning to disperse; but after a while it was learned that while the troubles had been going on in the upper part of the city, several persons had been fired on in the lower part of Main street, and that at about five o'clock in the afternoon, two Americans had been shot at from an Irish house on the corner of Main and Chapel streets, and this without the slightest provocation being given on their part, as far as could be learned; and this started the disturbance afresh. The Irishman who shot Rhodes was then taken, and immediately hung, but was cut down before life became extinct.

Thirty or more shots were fired from the Irish house on the corner of Main and Chapel streets, and it is impossible to ascertain the number that were wounded.

The inmates of a row of Irish houses, owned by a man named Quinn, fired on a party who were passing by, when they turned upon their assailants, burned their houses, and killed several, all of whom were Irishmen. Some of the Irishmen in their houses were burned to death. A woman and Quinn are among those who were killed. Eight to ten houses were destroyed, and the number burned to death and killed is said to be from fifteen to twenty.

The Harvest in Europe.

That the harvest of 1855 will be at least an average one throughout Europe, is no longer questionable. The crops of France, Spain, Germany, Switzerland, Italy, are already in good part beyond the reach of disaster, and are good. Hay is secured; wheat, oats and other small grains, either have been harvested, or soon must be; yet little complaint is made of either quantity or quality. Of Indian corn—which is grown extensively in Southern Europe—little is said; but the prospect is not unfavorable, though the plant is backward. The grape alone is said to look badly, and its failure, though unfortunate for the growers, would but slightly affect the abundance or scarcity of food.

In Great Britain everything is late, but little is unpromising. Hay is rather short, owing to the cold and dry weather in April and May, and a good deal was yet uncut, or at least uncured, and suffering from daily rain, when the Baltic sailed. That day, however, was bright, so was the next; and the entire of last week may have been favorable; if so, the hay crop will have been secured.

Wheat is backward, but luxuriant. A good deal has been beaten down by the recent rains, some of which will stay down. So, in lesser measure, with oats and barley, which are very heavy. On the whole, should present prospects be justified by the result, the grain crop of Great Britain will be a fair average, but not equal to the extraordinary yield of last year.

Potatoes never looked more vigorous and thrifty, yet we hear that some of those tubers dug prematurely for present use decayed, if kept above ground a few days.

Were there no war raging, it is probable that Europe would take very little of our present harvest; but, in view of the immense armaments now on foot, and the virtual closing of the Baltic and Black Seas against exportation, it is likely that Great Britain will require at least as much during the coming as during the last year. France, too, may take a limited quantity, if the price falls considerable on this side, as it now seems likely to do.

[N. Y. Tribune.

The San Antonio *Ledger* gives an account of the organization of a military force in Texas to aid the Mexican revolutionists. The first part of the expedition arrived at Leona River on the 15th of July, and additional men were hourly arriving. Great numbers were expected to cross over on the 24th. Capt. Henry, commander of the Texan Volunteers, issued addresses to the people of Texas and Mexico—to the former he says it is their intention to aid in the establishment of a more Republican Government and finally bring it under the protection of the American Eagle.

Steamboat Casualties.—The Inspectors' Reports for the last six months show that the whole number of steamboats on the Western and South-Western rivers, viz: the Mississippi and Ohio and other tributaries, on the 1st of January, 1855, was about six hundred.

Of these, during the six months ending on the 1st of June, 1855, 83 encountered casualties more or less serious.

Twelve were destroyed by fire. The damage from this cause to merchandise was $630,000; to the boats, $198,000. Total, $838,000. In these casualties eighteen lives were lost.

Seven were damage by ice. The damage to merchandise $30,000, and to boats $16,000. Total, $46,000. No lives lost.

Fifty two were sunk or damaged by snags. Merchandise was injured to the amount of $558,000, and the boats to the amount of $343,000. Total, $902,000.

Five were destroyed by explosions, $13,000 of property were lost, and thirteen lives from this cause.

Seven were damaged by collisions; $9,300 were lost in this way.

Of the above, 30 were totally lost. The entire loss of property was $1 803,500, and the entire number of lives lost, 31.

Settling Disputes.—At the opening of the recent session of the Kansas Legislature, a Committee was appointed on Contested Elections. The second day after their appointment the committee reported, that they had received a large bundle of papers from the Governor in regard to the elections in several districts, but *they had not opened it.* "They had also concluded not to examine the persons elected at the May election, and holding seats by authority of the Governor's certificates, *as they had determined before they came here how to dispose of this matter* They would therefore recommend, that all persons elected at the first election of March 31, in Kansas, whether in the opinion of the Governor they were elected legally or illegally, should be *entitled to their seats*, and that all those elected at the second election should *retire*. This report was adopted; and the members holding Free-State principles were expelled, without trial or examination."

SUMMARY.

A dispatch dated Milwaukee, Wednesday, August 8, says Judge Larabee held a special term of his Court yesterday at West Bend, Washington County, for the trial of Debar, the murderer of the Meyer family. The jury brought in a verdict of murder in the first degree, when the prisoner was remanded to jail to await sentence. The sheriff started for the jail with the prisoner, surrounded by military. A rush however was made by a mob, and the military gave way. Debar was struck to the ground by a stone, when the mob fell upon him and mangled him in a dreadful manner. They then tied a rope to his heels and dragged him through the streets a distance of half a mile and hung him by his heels to a tree.

A dispatch dated Saratoga, Monday, Aug. 6, says the room of Robert Halsey, Esq., of Ithaca, Congress Hall, in this place, was entered yesterday morning, and nine Williamsport and Elmira Railroad Bonds, one thousand dollars each, numbered between fifty and seventy, and five thousand dollars worth of diamond jewelry, besides five thousand dollars in cash and other property, taken. Three burglars have been arrested, all found with burglars' tools for opening doors, but none of the property has been recovered.

An awful catastrophe occurred at Rouse's Point on Saturday evening, the 28th ult., between 8 and 9 o'clock, involving the death of three persons. It seems that a Mrs. Mary Kannally had procured a barrel of whiskey, which by some means caught fire, and the flames spread so suddenly that two of the children of Mrs. Kannally, and a man by the name of Patrick McGrath, were burned to death. Mrs. Kannslly herself was also severely burnt, and was not, at last accounts, expected to live.

A dispatch dated Cincinnati, Tuesday, Aug. 7, says the cornice of the new buildings in process of erection for the Ohio Life and Trust Company, fell at 2 o'clock this afternoon, crushing to death six persons and injuring others, two so seriously that their recovery is despaired of. Robert Cameron, master builder, W. B. Curtis, superintendent of the building, who were sitting beneath at the time, and John S. Chambers and B. Waldron passing by, all well known, are among the killed.

A dispatch dated Philadelphia, Wednesday, Aug. 8, 1855, says: There was a meeting of conference held here to day to consider the propriety of some public expression of disapprobation of the outrage committed by Judge Kane in the person of Passmore Williamson. There were present about one hundred of the most substantial of our citizens, including merchants, professional men and others; all agreed that a gross outrage upon law and justice had been committed, and that some appropriate manifestation of public displeasure was called for.

A dispatch dated St. Louis, Wednesday, Aug. 8, 1855, says: The Kansas correspondent of the *Democrat* says there is great excitement there in regard to the new Governor. The Legislature was dissatisfied and doubted Mr. Dawson's soundness on the Slavery question. Anticipating his non-acceptance, a petition was being signed by members of both Houses, asking the President to appoint Mr. Woodson, the present Acting-Secretary, if Mr. Dawson refuses to accept.

A dispatch dated St. Louis, Wednesday, Aug. 8, says the Kansas correspondent of the *Democrat* says, there is great excitement there in regard to the new Governor. The Legislature was dissatisfied, and doubted Mr. Dawson's soundness on the slavery question. Anticipating his non-acceptance, a petition was being signed by members of both houses, asking the President to appoint Mr. Woodson, the present acting Secretary, if Mr. Dawson refuses to accept.

It is estimated that there are from 1500 to 1800 sewing machines running at the present time in Boston. They are mostly worked by girls, some of whom earn as high as $14 per week. It is said that the average wages of sewing machine girls is about six dollars, being a fraction more than shoemakers average.

The Nicaragua Company's steamer Sierra Nevada, from San Juan, arrived at San Francisco on the 15th ult., and reported thirty-seven deaths by cholera on the passage up.

The London Temperance League announces that the visit of Mr. Gough to England will terminate on Saturday, August 4, on which day he will sail from Liverpool for America.

At Fort Leavenworth and Fort Riley the cholera is raging. At the former forty-six persons have died. Major Ogden and Major Woods, his wife and four children, have died of the same disease, at Fort Riley.

New York Markets—August 13, 1855.

Ashes—Pots $6 12 a 6 25; Pearls 6 25 a 6 31.

Flour and Meal—Flour, 8 00 a 8 31 for State, 8 50 a 9 12 for mixed Western, 11 00 a 12 50 for extra Genesee. Rye Flour 6 50 a 8 50. Corn Meal, 4 50 a 4 62 for Jersey.

Grain—Wheat, 1 75 a 1 90 for Southern Red, 1 90 a 2 00 for Western mixed. 2 15 a 2 20 for white Ohio, 2 36 a 2 45 for white Genesee. Rye 1 20 a 1 25. Barley 1 00 a 1 10. Corn 86c. for Western mixed, 93 a 94c. for round yellow. Oats 50 a 56c. for Western, 47 a 50c. for Jersey.

Provisions—Pork, 16 75 for new prime, 19 62 for new mess. Beef, 9 75 a 10 25 for country prime, 11 00 a 13 00 for mess. Lard 10½ a 11¼c. Butter, 14 a 18c. for Ohio, 16 a 21c. for State. Cheese 6 a 9½c.

Hay—87c. a 1 25.

Lumber—12 00 a 13 00.

Potatoes—48 a 56c. for Long Island and Jersey.

Seeds—Clover 11c. for Ohio. Timothy, 3 75 for mowed, 4 00 for reaped. Rough Flaxseed 1 90 for 56 lbs.

Tallow—11½c. for Butcher's Association.

Wool—26 a 28c. for native and quarter, 37 a 39c. for full-blood Merino, 42 and 44c. for American Saxony Fleece.

DIED.

In Mystic, 1st inst, Annie D., daughter of Benjamin F. and Mary S. Collins, aged 5 years.

LETTERS.

B G Stillman, John Whitford, S S Griswold, Alexander Campbell, Sanford P Stillman, W M Truman, J H Titsworth, N V Hull, W B Maxson, G B Clarke.

RECEIPTS.

☞ All payments for publications of the Society are acknowledged from week to week in the Recorder. Persons sending money the receipt of which is not duly acknowledged, should give us early notice of the omission.

FOR SEVENTH-DAY BAPTIST MEMORIAL:

Sophia Maxson, Westerly, R I	1 00
Alex Campbell, Adams Center	1 00

FOR THE CAROL:

N V Hull, Alfred Center	50

WILLIAM M. ROGERS, Treasurer.

Board Meetings.

The Executive Boards of the Seventh-day Baptist Missionary, Tract, and Publishing Societies, will meet at Plainfield, N. J., on First-day, Sept. 2d, commencing with the Board of the Missionary Society at 9 o'clock A. M.

The General Conference.

The Seventh-day Baptist General Conference will hold its triennial session with the first church in Brookfield, Madison Co., N. Y., commencing on the fourth day of the week before the 2d Sabbath in September next. (5th of the month,) at 10 o'clock, A. M. Introductory discourse by Lucius Crandall; T. E. Babcock, alternate. H. H. Baker, Secretary.

Our Anniversaries.

The Seventh-day Baptist Missionary Society will hold its 13th Annual Meeting with the 1st. Seventh-day Baptist Church in Brookfield, Madison Co., N. Y., on Fifth-day, Sept. 6, 1855, commencing at 10 o'clock A. M. Opening discourse by Thomas E. Babcock.

The American Sabbath Tract Society will hold its 13th Annual Meeting at the same place in the forenoon of Sixth-day, Sept 7th, commencing at 9 o'clock.

The Seventh-day Baptist Publishing Society will hold its 6th Annual Meeting at the same place in the afternoon of Sixth-day, Sept. 7th, commencing at 1 o'clock.
Geo. B. Utter, Secretary.

DeRuyter Institute.

This Institution is located in a pleasant and healthy section of country, and in a community comparatively moral and intelligent. It is easy of access from Syracuse, Chettenango, and Homer. Our motto is, *Teach the young to govern themselves—to educate themselves.* Grateful for past liberal patronage, we assure the public we have ample accommodations for more.

Expenses:

Tuition,	from $4 00 to $6 00
Board in families,	from 1 25 to 2 00
" in clubs	from 0 60 to 1 00
Room rent, per term,	from 1 25 to 2 62

Books and Stationery furnished at very low prices.

All bills settled invariably in advance. No bills for less than half a term. No deductions made except in case of sickness.

Board of Instruction.

HENRY L. JONES, A. M., Principal.
AMOS R. CORNWALL, A. B., Prof. Mathematics.
Miss JOSEPHINE WILCOX, Preceptress.
Mrs. SARAH E. JONES, Mrs. BARBARA A. CORNWALL, Miss SARAH E. SHIPPEY, Miss JANE C. BURDICK, Assistants in Female Department.

For further particulars, address, Henry L. Jones, Principal; W. D. Wilcox, President; J. B. Wells, Secretary; or C. H. Maxson, Treasurer, De Ruyter, Madison Co., N. Y.

Farm for Sale.

THE House and Farm lately owned and occupied by James Hubbard, in Scott, Cortland Co., N. Y., are now offered for sale, on reasonable terms. The House is a large two-story house, nearly new, and well arranged to accommodate a large family. The Farm consists of about thirty-six acres of good land, most of which is under good cultivation and is well watered. There are about fifty trees of choice grafted fruit in good bearing condition It is situated in an industrious and moral community, enjoying all the advantages of schools, meetings, and markets, necessary to make it a pleasant home.

Apply to A. D. C. Barber, or J. N. Pratt. 4t-9.

Milton Academy.

Male and Female Teacher's Seminary.

A. C. Spicer, A. M., Principal, and Professor of Mathematics, Natural, Intellectual, and Moral Sciences.
A. Whitford, Professor of Greek and Latin Languages, and Rhetoric.
J. F. Pease, Professor of Instrumental and Vocal Music.
J. F. Wood, Teacher of Penmanship and Book-keeping.
Mrs. S. M. Spicer, Preceptress, and teacher of Modern Languages, Painting and Penciling.
(Other teachers will be engaged as occasion may require.)

Calendar for 1855–6.

First term opens Wednesday, August 29th; closes Wednesday, December 5th.

Second term opens Wednesday, December 12th; closes Wednesday, March 19th, 1856.

Third term opens Wednesday, March 26th; closes Wednesday, July 2d, 1856.

(The school will open, this year, in the New and Spacious Hall just erected.)

Tuition per term of 14 weeks, from $4 00 to $6 00. Music, Painting, and Penciling, extra. Board at the least possible price, not exceeding $2 00. Refer to the principal; Hon. J. Goodrich, President of Trustees; to M. T. Walker, Esq., or to J. C. Culver, Esq., Milton, Rock Co., Wis.

Savery's Temperance Hotel
AND
TELEGRAPH DINING SALOON,

Magnificent Floral Gift.

SUBSCRIBERS to the "CHRISTIAN DIADEM" for 1855, are entitled to a splendid steel engraving, the ☞ LILLY AND THE ROSE PERSONIFIED, being given *gratis* to all old and new subscribers who send us only ONE DOLLAR, by mail or otherwise.

Six Copies for Five Dollars.

The Diadem is a strictly moral and religious work—designed for the Christian family without regard to any particular denomination.

FIFTY ENERGETIC BUSINESS MEN are wanted immediately to circulate the "Diadem" throughout the Eastern and Western States. To such as can send good references the very best inducements will be given. Address Z. P. HATCH, Publisher, 9 Spruce street, New York. May 24—3m.

The very Book that every body has been Wanting.

The Book for the Parlor, the Book for the Fire-side, the Book for the Professor, and the Book for the Non-Professor.

THE RELIGIOUS DENOMINATIONS OF THE UNITED STATES: Their History, Doctrine, Government, and Statistics; with a Preliminary Sketch of Judaism, Paganism, and Mohammedanism. By Rev. Joseph Belcher, D D., Honorary Member of the Historical Societies of Pennsylvania and Wisconsin, author of "William Carey, a Biography," etc., etc., and "Editor of the Complete Works of Andrew Fuller," "Works of Robert Hall," etc, etc. Large octavo, 1024 pages, handsomely embellished by nearly two hundred engravings.

This invaluable work is rapidly finding its way among all classes of the American people. The clear, comprehensive, and impartial manner in which the learned author treats each and every denomination, is winning for him golden opinions from the highest authorities in the land. The innumerable lively tales and anecdotes of ministers, churches, and laymen, which he introduces with the articles of faith and all important statistical information, give to the work a life, vigor, and spirit truly delightful. One cannot sit down to it without being convinced that his subject is in the hands of a master, nor rise but with kindlier and more liberal feelings towards the great brotherhood of Christians, under whatever name they bear. Ours is a great, growing, and glorious country, and every family, and every young man, throughout its length and breadth, should have a copy as a text book of all its denominations. Wherever known, it is read, and wherever read, admired. Look at the following from among the very many notices received:

It embodies a vast amount of information relative to the origin, history, and missionary operations of the different religious denominations in this country, presented in a remarkably interesting and attractive manner.—*Rev. John Dowling, D. D., Author of "The History of Romanism," "Judson Offering," etc.*

This is a large and beautiful volume, and will find a cordial welcome in every family.—*Philadelphia Christian Chronicle.*

So far as concerns independence of vision, there can be no question, as Dr. Belcher surveys each sect with the same dispassionate impartiality.—*Epis. Recorder.*

This massive volume embraces a vast fund of information.—*Presbyterian.*

The work is sold by agents, and will furnish a large amount of interesting and valuable information to the families into which it may be received.—*New York Recorder and Register.*

In the account given of the denominations, he is fair, and generally allows them to speak for themselves, as to their history and institutions.—*New York Christian Advocate and Journal.*

It contains a mass of interesting facts and statistics.—*Norton's Literary Gazette.*

Judging from the work, it would be difficult to say what are the religious views of the Editor, so fairly, so dispassionately, so charitably, has he treated each and every sect.—*Philadelphia City Item.*

We presume it will be a standard work in thousands of libraries.—*Littell's Living Age.*

Sold only by agents, to whom certain districts are allotted. For particulars address the publisher,
JOHN E. POTTER,
15 Sansom-st., Philadelphia.
Or, Noyes Spicer, Indianapolis, Ind.

Michigan Southern Railroad Line.

TRAVELERS for Chicago, St. Louis, Kansas, and all points West and Southwest, can obtain through tickets, and all information concerning routes, fare, &c., either by the New York and Erie Railroad, or the New York Central Railroad, by application at the Company's Office, No. 192 Broadway, corner Dey-st., to
JOHN F. PORTER, General Agent.

Central Railroad Company of New Jersey,

NEW YORK, SOMERVILLE, EASTON, &c. *Spring Arrangements*, commencing April 2, 1855: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M. For Somerville, (way.) at 5.30 P. M.

The above trains connect at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 1, 4 and 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 6 and 9.45 A. M. and 3 P. M.; Somervill (way) at 6 A. M.

New York and Elizabethport.

Leave New York at 8 and 10 A. M., 1, 4 and 5 P. M.
Leave Elizabethport at 7.15 and 9.10 A. M., 1, 3.15 and 6 P. M. JOHN O. STERNS, Superintendent.

New York and Erie Railroad.

ON and after Monday, May 7, and until further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Dunkirk Express at 6 A. M. for Dunkirk.
Buffalo Express at 6 A. M. for Buffalo.
Mail at 8¼ A. M. for Dunkirk and Buffalo, and all intermediate stations.
Accommodation at 12¼ P. M. for Port Jervis and intermediate stations.
Rockland Passenger at 3 P. M. (from foot o Chambers-st.) via Piermont, for Suffern and intermediate stations.
Way Passenger at 4 P. M. for Newburgh and Otisville and intermediate stations.
Night Express at 5½ P. M. for Dunkirk and Buffalo.
Emigrant at 6 P. M. for Dunkirk and Buffalo and intermediate stations.
On Sundays only one express train, at 5½ P. M.

These Express Trains connect at Elmira with the Elmira and Niagara Falls Railroad, for Niagara Falls, at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicago, &c., and with first-class splendid steamers for all ports on Lake Erie.
D. C. McCALLUM, General Sup't.

Miscellaneous.

From "The Crayon."

Wanderings in the Southwest—No. 3.

(Concluded.)

On the 21st of May, I left San Antonio for the settlements north of this place. The country drained by the rivers Llano and San Seba had been represented to me as one of great interest, presenting a variety of formation from primary to tertiary, and abounding in valleys of great fertility and beauty. I left town in the evening, and camped near San Pedro Springs, where there was good grass. I made my bed in the usual manner, by spreading a blanket on the ground, and using my saddle for a pillow. I woke in the night, and rose to tie the horse in better grass. The moon had gone down, and clouds shut out the stars. For more than an hour I searched for my bed; I thought I had not left it a rod, but I could not find it, and was forced to pull off my coat for a pillow, and renew my sleep on the grass. From the Springs northward the country becomes hilly, and the muskeet grass and trees, which are almost invariably found together, give place to the coarser grass of the coast country. At this season of the year this grass is of a bright green, and gives a charm to the landscape. Later in the season, it becomes brown and is burned over. The muskeet, on the contrary, is greenest in the winter, and is much relished by animals, even in its dry state. I thought I should have no difficulty in finding a settlement at which to breakfast before I had traveled far, but after leaving the Springs, one mile from town, I saw no dwelling place of man until eleven o'clock. I was on the road to Fredericksburgh, and had ridden over a country which, could one be placed at once in it without having seen any intermediate places, would call out the most extravagant admiration. There was every variety of surface that was possible, without the turf being broken. In the deepest valley I did see the turf broken, and white chalk showing where the torrent had been most violent. But now there was no water for twelve miles, and then only at a well. I rode up to a cabin where a young man was skinning a deer, and proceeded without ceremony or invitation to unsaddle. A piece of that venison I meant to have. He referred me to the old man in the house, who, when I told him I had not yet breakfasted, asked me whether I would have breakfast or dinner! I told him I did not care by what name he called it, if there was only some venison in it. He was a middle-aged man, from Arkansas, and employed his time while talking with me, in striking at the chickens, dogs, and black children, who came unbidden into his presence. Just as dinner was announced, Mr. Tyson, a German settler on the Upper Guadaloupe, rode up and joined us. There were about us five flaxen-haired children, and one sleeping in the cradle, five dogs, and three woolly heads, besides one of doubtful complexion. The charge of twenty-five cents for our meal we considered very moderate. Just as we left, we were reinforced by Judge Behr, of Sisterdale, and felt ourselves strong, though we were all unarmed. I have noticed that the German settlers generally go unarmed about the frontiers, while Americans uniformly carry revolvers, many even carry them wherever they go, just as a gentleman carries his watch, and they seem to think it as indispensable. I saw recently the impropriety of carrying pistols to evening parties, urged by a Texas paper. Soon after leaving this house, we entered the dry valley of the Leon. Along the bed of the Leon is much limestone, and cliffs sometimes rise perpendicularly. The valley is narrow, bounded by hills rising several hundred feet, and many of them attaining to the dignity of mountains. They are mostly bare, or presenting here and there patches of small bushes, with horizontal ledges of limestone cropping out where some strata have been less easily broken down than the others, so as to give the appearance of terraces. Six miles brought us to the Leon Spring, the first good water we had found in eighteen miles, and this is but a small spring, whose supply is drank up by the thirsty earth in a short time. A German has opened a house of entertainment at this place, and supplies his table by his gun. Occasionally the valley spreads out into charming fields, with groves of post oak. This hilly region abounds everywhere with the white bundles of the flowers of the *Yucca fillamentosa*.

Leaving the valley of the Leon, we crossed several small streams of good water, and rode over hills covered with live and post oak, to the Civolo, a large and beautiful stream, which, a short distance below the crossing, tumbles down a chasm in the rocks, and does not appear again in forty miles. Of this curious phenomenon I shall have more to say when I speak of the general features of this region. There is a German settlement at this place; and, as it was dark on our arrival, we passed the night here, stabling the horses for fear of Indians. The following morning I left the Fredericksburg road, to accompany my friends to their settlement on the Guadaloupe. The country, for the most part, was rough, and the soil thin, although there were some pretty valleys with brooks of clear water. We made our way through thickets of shrubbery, and grape vines of a species that I had seen in the low country, but here in the mountains they are numerous, though vines and grapes are small.

Mr. Tyson, with a generosity as gratifying as unexpected, insisted upon my spending some weeks at his house, in which he appropriated the best room to my use. His farm is located on a bend of the river, so that he requires but one fence. He has a large cornfield under cultivation, and he has an abundance of timber of oak and cypress. The Guadaloupe here runs in a deep narrow channel cut in the limestone, and the cypress trees grow in the bed of the channel, just at the water's edge, their tops reaching above the bank. Some of these attain the size of five feet in diameter, and they form a row on each side of the water, that gives a very unique appearance to the river. There are no parasitic plants growing on the trees here. The water flows over a pebbly bed, and is so transparent, that you might find a needle on the bottom. We went down to the river to bathe, soon after our arrival, and a greater luxury could not be furnished in the mountains. We drank while we swam, for we knew that the water came to us pure. How many thousands of beings, human and other, does it supply, as it flows on for three hundred miles below, with the only drink they know during many months. It is curious to see the effect light has on the colors of fish. The same species of fish found below are here much more finely colored—and even the Cat-fish, of which I caught two, were covered with small, black spots.

With the exception of one settlement twelve miles higher up, Mr. Tyson's is the last last on the Gaudaloupe; though, for thirty miles, the character of the country continues much the same. The elevation cannot exceed seven or eight hundred feet above the sea, but the air is decidedly cooler than fifty miles below. The best lands are held at $2 per acre. The land on the hills is valuable as a sheep range, and the bottoms and the flat lands are equal to any in the State. I was at a loss to account for the cordiality with which I had been treated by the Germans with whom I had become acquainted, until I found it to be a general thing among all the better class of them, and there are many such here and all through western Texas. I could not speak their language; I had not even seen the land of the Rhine, but, if I had been familiar with both, they could not have treated me with more cordiality; and yet they are regarded by the greater part of our countrymen, with a conceit only surpassed by their ignorance and ill manners, as though they were little better than negroes. What a bitter disappointment it is to the cultivated German, who lands upon our shores, expecting to find here the fruit of four score years of freedom maturing into justice, truth and generosity, and to find just the opposite! I have been in company with a room full of Germans, and there was not one of them who could not expound our Constitution and history better than I could. Yet to the mass of Americans whom I meet, they are d——d Dutch. Even their industry is made an object of jealousy. Two Americans were riding along the fence which encloses garden upon garden, and corn-field after corn-field, for nearly seven miles west of New Braunsfels, when one said to the other, "Bill, look what a fence these fellows have made—these G—d d——d Dutchmen." But, I am digressing. On the third day we took our horses to ride down to see Mr. Behr, who has a place three miles below, on the same river. He had gone to Sisterdale, a charming little valley where several distinguished German families have found an asylum. Two brooks, called the Sisters, unite their waters, and empty into the Guadaloupe on the north. First we passed the house of Mr. Dequer, once Secretary of the Interior of the German Republic. We saw his lady, who seemed to regret that she could not talk English, as much as I that I could not talk German. His house is large, and built in a substantial manner. The males of the society, it seemed, were assembled at Mr. Dresler's, three miles up the dale. It would be tedious to attempt to convey an idea of every pretty landscape that one meets with in a country where there is so much that is so beautiful. Yet there were two views that I had that day seen that will remain well defined when all other impressions shall become confused and indistinct. Those were the crossing of the Gaudaloupe, looking up stream, where there is a long reach of still water, with the two banks of the river walled in by those great cypress trees stretching their branches across, as if they would unite; the other was a landscape, with a wall of dark blue limestone rising fifteen or twenty feet on the right, capped with shrubbery and with the softer strata washed out, leaving the rock very much in relief, with trees growing up at intervals to relieve, but not to conceal, the rock; from this, a flat stretching to the the left, a noisy brook, and a lawn terminating in a thicket, and in front a bold, rocky promontory, with the house of Professor Kapp half concealed in the trees; and it was all just as it came from the hand of Nature. There was to be a musical festival at New Braunsfels, fifty miles distant, and preparations were making to attend it. It was decided that I should accompany the party—my horse was to be left to recover more perfectly from his injury, and I should ride one of theirs. Mr. Tyson and myself were to pass the night at Dresler's. This people lost their entire crops last year from drouth; and, having their means invested in lands, they have experienced a hard year, and enjoy but few of the luxuries of the table; they have but little time for hunting, and their horses are frequently stolen by the Indians; but they bear all their privations with a cheerfulness that is truly exemplary, and social life is kept up in a manner such as is seen in few better favored American communities. After our repast of corn-bread and milk, the evening was spent in the narration of incidents of life on the frontiers. It was but natural that they whose ears had been deafened by the roar of revolutionary cannon, could fearlessly brave the dangers of the wilderness. I was told that, but a short time before, a panther had been very troublesome to the farm of Mr. Dequer, and had, in spite of all their efforts, destroyed much of their stock; one night, in the absence of Mr. D, his dogs treed him, and two boys of about fourteen and sixteen, sons of Mr. D, accompanied by their mother, who held a light, shot him dead. It measured nine feet in length.

It was midnight when we retired to the second floor to sleep. I looked out of a little port-hole in the wall, just large enough to receive my head. The moon was shining full from a cloudless sky. My horse, which was staked out, contrary to our usual practice, was just discernable, and I heard him neigh from loneliness; felt some misgivings, and felt half resolved to take a blanket and go stay by him. I listened to what further might be in the wind, but heard nothing else, save the chuck-wills-widow from a neighboring tree, and laid down and slept till late. I looked out in the morning to see how fared "Pelicano," but he was not there. I hurried down to learn what it meant, and found that all the horses on the place were gone. This was a catastrophe to me so great that I could not contemplate it. I tried to find the trail by which they had left, but on the dry ground, to my unpracticed eye, there was no trail. I went down to Mr. Dequer's, three miles distant. His dogs engaged the Indians in his yard, and he hastened out in his night dress, gun in hand—but they were too quick for him, though they did not succeed in getting any of his horses. The trail was found the next morning, and recognized as that of a Waco who had visited them before. And there remained no doubt that my pet horse was in the hands of the savages, and I should never look upon his white face, and he should never neigh for me again. One can hardly realize, who has not journeyed, as I had done, for weeks in a strange, wild land, with no other companion than his horse, with whom he had traveled by day and slept at night, how strong the attachment will become. He was as gentle and playful as a dog, and would follow me wherever he had an opportunity; when in lonely wild places he seemed to share my fears, and his instincts have often determined me. I had now brought him into the hands of those who would never respect his virtues or have compassion on him, but ride him without mercy on their marauding expeditions until he can go no longer, or until he is eaten. I felt it more keenly even than my own forsaken condition; and I was here with my journey half completed, without the ability to provide another horse, nor had we the means of pursuit, and perhaps it was as well that we had not, for there was, no doubt, a large party of them. The same day, about ten miles further down, a white man was killed and his horses taken—a negro accompanying him escaped. A consultation of war was held, when it was concluded that as we had neither the horses, nor one sufficiently skilled in trailing, we would go to the *song-verein*. A wagon, with the balance of the animals left in the settlement, was soon in readiness, and my character as a gay cavalier was resigned for a seat in the bottom of the wagon. We were a company of eight, including Mrs. Dequer; and, while they were singing the songs of their Fatherland, full of glee at the anticipated anniversary, I was sad at the vicissitudes of fortune, and full of speculations as to my future course. Truly yours,

J. D. B. S.

Charcoal Dust.

A correspondent of the *New England Farmer*, who subscribes "A. B.", from Lowell, Mass., gives the result of his experience in the use of charcoal dust, mixed with loam and home manures on dry lands, as a defence against the effects of drought. The second experiment described below is particularly worthy of attention.

In the winter of 1852, the writer says, I carted off the top of a high knoll or ridge, that extended through a piece of land I had recently purchased. My object was to bring the land into a better shape and to put this heretofore barren spot into a state of cultivation. The cutting was from two to six feet deep, leaving a level plain of about half an acre, which was still elevated above the adjacent lands. The bed of this plat was coarse sand and full of "cobbles." Having on hand a lot of meadow muck, that had been decomposed with shell lime and salt brine, I took of this 40 cart loads, 10 loads sandy loam, 2 1-2 cords of charcoal dust, and threw into a heap. Into this I put 15 barrels of liquid from gas works, working over the mass and mixing thoroughly. After standing four weeks, I distributed the heap evenly as possible over my piece. Then plowed and cross plowed, to the depth of ten inches, and harrowed until the whole was well mixed with the sand bed, and sowed to oats, with timothy and clover, first week in June. The oats came up finely, grew stout, but were injured by rust. The grass was a poor catch and I again sowed and raked in seed in the fall. The following season, where the seed took from the first sowing, I cut a heavy crop of grass.

Last spring the grass started early, and was marked by its dark green and fresh appearance all through the dry season. I took off two crops of grass, both averaging four tons to the acre. During all the dry weather this spot did not seem to suffer in the least by drought, notwithstanding its high altitude, and while on low grounds in the vicinity vegetation was completely dried up. This good result I attributed mainly to the coal dust, for wherever I turned up the earth, on this piece, and found the greatest mass of coal, there I found the most moisture, and the grass roots seemed to possess a particular fondness to twine among it.

My faith in the utility of coal dust, for dry lands, has been strengthened also, by using it in setting trees. I have an elevated and sandy place, where I am desirous to grow a "belt" of evergreens, and for two successive years, after my utmost skill in setting, the trees would die out wholly or in part, seemingly from the effects of the hot, dry seasons. Last spring I again set out 50 Norway spruce, fir balsam, white pine, &c., dug large holes, and in part mixed in with the loam two bushels charcoal, bringing a portion of the coal near the roots of the trees. I used equal care in setting, but in the fall almost every tree, where no coal was put, was dead or nearly so, dried up. While every tree to which I applied the dust was alive and vigorous. I have also used charcoal in setting fruit trees, hedges, &c., in dry places, and am satisfied with the result. I am sorry that a more free use of charcoal dust recently, in this vicinity, has advanced the price of the article. Our colliers now charge $5 per cord, but I think it will pay even at that price.

Haying.

Two days are enough to make hay dry enough for the mow. If the weather is not perfectly good, and the hay on the second day is not quite as dry as you would like, a little salt on it will aid much to keep it sweet. One peck on a ton may be occasionally used, though half a peck on each and every ton in the barn will be as much as will be relished by the cattle.

By using as much salt in this way as cattle need through the winter, much labor is saved in securing the harvest; for we often gain a whole day and save the labor of spreading out again on the third day after cutting, as well as the risk of the weather.

Another mode of saving hay when there is some doubt whether it is dry enough to be packed close is to throw the hay off the cart and let it lie without pressing it down. This may be often done where there is sufficient barn room, and after the hay has lain a very few days it may be overhauled and saved from moulding. It may be salted when it is first thrown from the cart.

We say two days are enough to dry hay—but when it is so thick as to cover the ground—say two tons to the acre, it must be frequently stirred and exposed to the air. The more stirring and exposure the better. It is good policy to spend much time in spreading where the grass is thick. By frequent stirring in a good day, the hay is rendered much lighter, and a hand rake or a horse rake moves much more easily than hay that is not half dried, and has not been thrown up to the air. Thus we may save labor as well as the risk of three days exposure instead of two.

We think it safest and best to throw hay into heaps on the first day, instead of letting it lie in winrow. The sweating while it is cocked up is useful, and if the weather is bad there will be but a trifling loss even if the hay stands out for three days. Some labor is saved by leaving it in winrow, but the hay is not quite as good, and there is always some risk in the morrow's weather. [Ploughman.

The Ways of a Bombshell.

From a letter in the London Times we select the following:

A column of white smoke rushing up into the air expands into concentric rings; then follows the heavy, dull report like the beat of some giant drum; and then comes the shrill scream of the shell as it describes its fatal curve, and descends with prodigious velocity, increasing rapidly every moment till it explodes with the peculiar noise of a 'blast' just as it reaches the ground. At least, it ought to do so; but to-day I watched the shells one after another, and only two or three burst properly, though the range and flight were beautifully accurate. The Russian fusees are bad, but their artillerymen are not to be excelled when their practice is undisturbed. It was interesting—just as the man of pleasure in Lucretius liked to see the sea rage when he was not on board ship—to look at the shell dropping, and to see our active little allies scampering away to their cover, and adjusting themselves to the closest possible connection with mother earth, till the hurling masses had gone by them. Any man, with moderate confidence and experience, may despise round shot at long ranges if he only sees the guns from which they come discharged Well, we won't say despise exactly, but at all events 'evade.' But a shell is a diabolical invention, which no one can regard as it approaches, without a certain degree of misgiving that a triangular piece of jagged iron may be whizzing through his internal economy at the shortest possible notice afterward.

If it is sent from a gun it fizzes and roars through the air, and sends its fragments before it, the cone of dispersion, which is the neat phrase used by the learned militant to imply the direction of the bits of shell—or its contents, when it is filled with bullets, etc.—being in the direction the shell has taken from the gun, and the fragments being propelled with a portion of the velocity of the shell at the moment of explosion. If it be discharged from a mortar it whistles gently and delicately, giving a squeak and a roar now and then, as it rises to its greatest elevation, and then, rushing downward with a shriller whistle towards the point, its fragments are projected all around radially, and are propelled merely by the force of the bursting charge. A man behind a bomb or at the side of it, is just as likely to be hit as a man before it when it bursts in that way; whereas the pieces from a shell from a gun in nearly every instance fly forward, so that a person behind it, or outside of the limits of the cone of dispersion is safe. Unless the shell or bomb bursts in front of a body of men in the air, a very considerable degree of safety may be attained by the men throwing themselves flat on the ground, inasmuch as the pieces of a shell which bursts on the earth fly upward from the point where they encounter the maximum resistance. Of course, if a bomb bursts over a man on the ground, or if a shell explodes in the air in front of a man, there is no great safety gained by his throwing himself down beyond the consequent reduction of the amount of vertical exposure.

This little digression is all *apropos* of the conduct of our allies which I have just mentioned, and is made in order to explain the *rationale* of their proceedings. It is rather an unpleasant reflection whenever one is discussing the range of a missile, and is perhaps exclaiming, 'There is a splendid shot,' that it may have carried misery and sorrow into some happy household. The smoke clears away, the men get up, they gather around one that moves not, or who is racked with mortal agony; they bear him away, a mere black speck, and a few shovelfuls of mud mark for a little time the resting-place of the poor soldier, whose wife, or mother, or children, or sisters, are left destitute of all solace, save memory and the sympathy of their country. One such little speck I watched to-day, and saw quietly deposited on the ground inside a trench. Who will let the inmates of that desolate cottage in Picardy, or Gascony, or Anjou know of their berevement? However, there goes another shell, and it does nothing but knock up a cloud of dirt and dust.

Influence of Inventions.

Discovery has been the great means of improvement. The mariner's compass led to many blessings, including the addition of this continent to the known world. Steam yielded its countless benefits. It has brought our States in close association and sympathy. Printing, "the greatest of the arts," gave society voice and tongue. It spread knowledge far and wide. The people are heard in the best of histories—the hourly record of all that is done, felt or thought, throughout the globe. The newspaper is the history of the poorest. But invention has cheapened and multiplied books, so that the labors of the greatest minds are accessable to the millions. Thus the Scriptures reach all mankind.

The genius of mechanics has supplied the greatest wants of both rich and poor. The ancients were not acquainted with the sweet associations of the fireside, for their houses had no chimneys. The companionship of the clock cheers and guides the humblest, not as in the year 807, when the King of Persia presented one moved by water to Charlemagne, or Pope Paul sent one to King Pepin, of France, in 756. The invention of clocks belongs to the Saracens, but they are now what was said of the instrument made by Richard de Wallingford, in the fourteenth century—miracles, "not only of genius, but of excelling knowledge." All Europe responds to the tick of Yankee manufacture. The daily laborer has a more comfortable home than sovereigns could boast of old. Beckett's splendid style of living, A. D. 1160, was described in this, that his sumptuous apartments were every day in the winter strewn with clean straw and hay.

WATER POWER ENGINE.—A hydraulic power engine, which works by the pressure of a column of water, simplified and originated by Mr. James Sinclair, engineer, Stirling, appears to be making its way successfully in Scotland. It has for sometime been applied in several large printing offices in Stirling, Dundee, and other towns having the advantage of a high head of water from the hills. The proprietors of the Scotsman, published in Edinburgh, have recently adopted this mode of power with (as stated by them) perfect success. The whole machine weighs no more than six hundred weight, occupies a horizontal space of only thirty-one by twenty-five inches, and but thirty-seven inches high. It consists of but two oscillating cylinders, working similar to a high pressure steam engine, the water being admitted through the axis on which they vibrate. It works smoothly, is perfectly safe, has great power for its size, and is perfectly manageable; there is no shock or recoil, and no danger of the pipes bursting. The column of water which the company allow is one hundred and fifty feet high, which gives sufficient power to work off two thousand impressions per hour. Wherever a supply of water of sufficient height can be obtained, these engines are adapted to a great variety of purposes.

Blackberries.

As this is the season for blackberries, perhaps some of our readers will thank us to copy the following suggestions as to the way of using and preserving them:—

A good syrup or cordial can be prepared in the following manner: Mash the selected ripe berries to a pomace, put them into a linen bag, and strain out the juice. Add to every quart of the juice about half a pound of loaf sugar powdered, a heaped teaspoonful of ground cinnamon, and as much of powdered cloves, and boil all together in a glazed preserving kettle. When cold, add one-fourth of its bulk of fourth-proof brandy, and bottle it for use.

To make blackberry wine, press out the juice, straining it through a linen cloth or bag; let it stand 24 or 36 hours, skim off what rises to the top, and add to each gallon a quart of water and three pounds of sugar, (brown sugar may be used, though it is not as good.) Let this stand 25 to 30 hours, then skim and strain it, and barrel it until towards spring, when it should be racked off and bottled.

We may add another recipe, which has been extensively published, and is highly commended. It is as follows:—

"To make a wine equal in value to port, take ripe blackberries, or dewberries, and press them; let the juice stand thirty-six hours to ferment; skim off whatever rises to the top; then to every gallon of the juice add a quart of water and three pounds of sugar, (brown sugar will do;) let this stand in open vessels for twenty-four hours; skim and strain it; then barrel it until March, when it should be carefully racked off and bottled. Blackberry cordial is made by adding one pound of white sugar to three pounds of ripe blackberries, allowing them to stand twelve hours; then pressing out the juice, straining it, adding one-third spirit, and putting a teaspoonful of finely powdered allspice in every quart of the cordial, it is at once fit for use. This wine and cordial are very valuable medicines in the treatment of weakness of the stomach and bowels, and are especially valuable in the summer complaints of children."

American Climate.

Dr. Holmes, in a recent letter on the Americanized European, says:—

When a British steamer unloads her living cargo at our wharves, at once is recognized the contrast between the reddened and rounded face, the plump developed limb and muscle, as compared with the American. They fill their coats fuller, they walk more briskly, they articulate more vigorously, they are warm, jolly, and athletic.

The change in complexion was attributed to difference in climate. The prevalent early decay of teeth was charged to the same cause. The numerous pale faces to be seen, and languid ailments so fashionable, he said, should not be attributed to wrong living and wrong habits, as they mainly were. There were faults in this respect, lamentable faults, but the invalid was too much scolded. The lecturer adverted to means within the reach of every American to counteract, the baneful physical phenomena to which he was subjected. The importance of air and exercise, was not, he said, sufficiently understood.

The English gentlemen hunt, shoot, ride, box, play at cricket, get up pedestrian matches, and the English ladies leap fences on their hunters, tramp about like dromedaries on foot, drive four in hand in their equipages. The reason is, they come into the world with good stout organizations. Why American ladies do not heartily join in such out-door exercises is, because they have not vigorous stamina, the overflowing red blood in their veins, the substantial muscle in their limbs, that drive to such exercises as a rational outlet for their superfluous vitality. The changeable weather here discourages such exercises. The vascillations of temperature contrasted with England were referred to as causing much of the ill health of America. The vegetable life of the American, and attendant pale complexion, narrow face, faulty teeth, spare outlines, fatigued features, were all owing to the action of the elements and the imponderable agencies with which he was surrounded. There was not, however, the lecturer stated, material difference in the longevity of the inhabitants of Old England and the denizens of New England—the American had strength of endurance—few lotus eaters or lazzaroni are among them. The body of the American is chastened and prepared for life, and made bold by the scourges of the lawless elements.

THE DARVEL CALCULATING GIRL.—The Ayr *Advertiser* has an account of a recent public examination at Beith of the little girl whose wonderful powers of calculation have attracted so much notice. The gentleman in charge of the child allowed any one present to propose questions to her. Among the queries thus submitted were: How many times does a clock strike in the month of June? 4,680 was the prompt reply; in the year 1855? 56 940; in a lifetime of 75 years? 4,270,500. She was now asked the value of 313 yards of linen at 2s. 9 3-4d. per yard, and in 35 seconds she gave the answer, £44 0s. 3 3 4d. Being requested to show the *modus operandi*, she began aloud with 313 3-4 make 959, the 4's in 959 234 times and 3 4 over, and so of all the other denominations. She was now asked to cube 795 and give the quotient of that product divided by 19. The product, 502,459,875, and the quotient, 26,445,256 11 19, were both correctly given.

A fishing boat was recently capsized off Mabray Head, North of Scotland, and 13 young men were drowned. As the village to which they belonged numbered not more than 16 or 20 scattered houses, there was scarcely a family which was not darkened by the sudden presence of death. A person who passed through the village reports that the lamentations of the stricken people could be heard on the road.

New Steamboat Line for Albany and Troy.

From Pier 15, foot of Liberty-st., at 6 P. M

STEAMER RIP VAN WINKLE, C. W. Farnham, Commander, Monday, Wednesday and Friday, at 6 o'clock, P. M.; steamer COMMODORE, L. Smith, Commander, Tuesday and Thursday, at 6 o'clock, P. M., and SUNDAY, at 5 P. M.

Fares: Saratoga, $1 50; Moreau, $2 15; Fort Edward, $2 15; Whitehall, $2 75; Castleton, $3 10; Rutland, $3; Burlington, $4; Rouses Point, $5 50; Montreal, $7 50.

These Boats will arrive in Albany or Troy in ample time to form connections with all the Railroads, North, East or West, enabling passengers to reach Montreal and intermediate points the same day.

These Steamers are of the first class for strength and speed—well known favorities of the public—having been thoroughly overhauled during the past winter, and offer every accommodation that can be desired by either freighter or traveler.

Through tickets can be obtained on board the boat for Saratoga, Moreau, Fort Edward, Whitehall, Castleton, Rutland, Burlington, Rouse's Point and Montreal

The Northern Freight Express will give Bills of Lading to all points as above named. Shippers who desire it, can have time receipts, by applying at the office on the Pier. A. A. DYKEMAN.

Ayer's Pills.

A NEW and singularly successful remedy for the cure of all Bilious diseases—Costiveness, Indigestion, Jaundice, Dropsy, Rheumatism, Fevers, Gout, Humors, Nervousness, Irritability, Inflammations, Headache, Pains in the Breast, Side, Back, and Limbs, Female Complaints, &c., &c. Indeed very few are the diseases in which a Purgative Medicine is not more or less required, and much sickness and suffering might be prevented, if a harmless but effectual Cathartic were more freely used. No person can feel well while a costive habit of body prevails; besides, it soon generates serious and often fatal diseases, which might have been avoided by the timely and judicious use of a good purgative. This is alike true of Colds, Feverish symptoms, and Bilious derangements. They all tend to become or produce the deep seated and formidable distempers which load the hearses all over the land. Hence a reliable family physic is of the first importance to the public health, and this Pill has been perfected with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing any thing hitherto known of any medicine. Cures have been effected beyond belief, were they not substantiated by persons of such exalted positions and character as to forbid the suspicion of untruth.

Among the eminent gentlemen who have testified in favor of these Pills, we may mention:

Doct. A. A. Hayes. Analytical Chemist of Boston, and State Assayer of Massachusetts, whose high professional character is endorsed by the—

Hon. Edward Everett, Senator of the United States.

Robert C. Winthrop, Ex-Speaker of the House of Representatives.

Abbott Lawrence, Minister Plen. to England.

†John B. Fitzpatrick, Catholic Bishop of Boston; also

Dr. J. R. Chilton, Practical Chemist of New York City; endorsed by

Hon. W. L. Marcy, Secretary of State.

Wm. B. Astor, the richest man in America.

S. Leland & Co., Proprietors of the Metropolitan Hotel, and others.

These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compounded not of the drugs themselves, but of the medicinal virtues only of Vegetable remedies extracted by Chemical process in a state of purity, and combined together in such a manner as to insure the best results. This system of composition for medicines has been found in Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any process. The reason is perfectly obvious. While by the old mode of composition, every medicine is burdened with more or less of acrimonious and injurious qualities, by this each individual virtue only that is desired for the curative effect is present. All the inert and obnoxious qualities of each substance employed are left behind, the curative virtues only being retained. Hence it is self-evident the effects should prove as they have proved, more purely remedial, and the Pills a more powerful antidote to disease than any other medicine known to the world.

As it is frequently expedient that many medicines should be taken under the counsel of an attending physician, and as he could not properly judge of a remedy without knowing its composition, I have supplied the accurate Formulæ by which both my Pectoral and Pills are made, to the whole body of Practitioners in the United States and British American Provinces. If however there should be any one who has not received them, they will be forwarded by mail to his request.

Of all the Patent Medicines that are offered, how few would be taken if their composition was known! Their life consists in their mystery. I have no mysteries.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject freely acknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many eminent Physicians have declared the same thing of my Pills, and even more confidently, and are willing to certify that their anticipations were more than realized by their effects upon trial.

They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.

Prepared by Dr. J. C. AYER, Chemist, Lowell, Mass. Price 25 Cents per Box. Five Boxes for $1 00.

Sold at wholesale in New York by A. B. & D. SANDS retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere.

The Sabbath Recorder,

PUBLISHED WEEKLY

By the Seventh-day Baptist Publishing Society,

AT

NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the time to which they reach.

☞ No paper discontinued until arrearages are paid, except at the discretion of the publisher.

☞ Communications, orders, and remittances, should be directed, post paid, to

GEO. B. UTTER, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

GEOLOGY AND THE BIBLE.

Copied by request from the Southern Literary Messenger.

The Testimony of Geology and Astronomy to the Truth of Hebrew Record.

Concluded.

We pass now to the objections that have been made to the sacred chronology as deduced from the books of Moses, and to the facts supposed to show its fictitious character.

Brydone gave, some years ago, in his Silician tour, an account of the discovery of a well near Ætna, in which there were found seven beds of lava, with a thickness of soil between them, each of which, he affirmed, must have taken two thousand years to accumulate. This statement Brydone announced he had received from the Canon Recupero, a learned man who resided near Ætna. Brydone gave the Canon's authority for the computation of 2,000 years for each bed of soil, which would then have required 14,000 for their existence since their first eruption. This account and theory was taken as true, and the falsity of the Hebrew chronology was declared as established beyond dispute. Whether Brydone misunderstood Recupero, may be charitably doubted. However, the Canon Recupero, upon seeing the book of Brydone, published an indignant denial of the statement and of the opinions ascribed to him. He was too familiar with geological facts attending volcanic eruptions to have made the inference as to the age of lava beds about Ætna. Independently of the denial of the facts as stated by Brydone, we have unquestioned geological facts which prove the utter absurdity of the inference which Brydone and a number of writers of his school had drawn. Sir William Hamilton has shown that over the matter which buried Herculaneum there were six streams of lava, *with veins of good soil between them.* Herculaneum was destroyed about 1800 years ago, which conclusively proves that *seven* veins of good soil have been formed in 1800 years, instead of 14,000 years, estimated by Brydone. Again: Mr. Daubeny, an experienced observer, has visited the pit at Aci Reale, to which Brydone's theory had been applied. Of this pit Daubeny says: "At all events Brydone was grossly deceived in imagining that several beds of lava seen lying one above another near the spot have been sufficiently decomposed into vegetable mould; the substance which really intervenes between the beds being nothing more than ferruginous tuff, just similar to what would be produced by a shower of volcanic ashes, such as naturally precedes or follows an eruption of lava, mixed up with mud and consolidated by rain." With regard to the very beds of Ætna of which Brydone speaks, M. Dolmein, one of the most distinguished minerologists, says: "The Canon Recupero, to whom Brydone ascribes his account, died without any other affliction than that occasioned by the work of Brydone." This good man was far from admitting as an evidence against the book of Genesis pretended facts which were false, but from which, even if they had been true, nothing could have been concluded. Vegetable earths between the beds of lava *do not exist;* and the argillaceous earths which are sometimes found between them may have been disposed there by causes totally independent of the antiquity of Ætna.

Another attack, bearing the appearance of science, was made upon the Mosaic chronology, which for a time was declared to be an absolute demonstration against its truth. This was the discovery of some French *savans* who accompanied Napoleon's expedition to Egypt. While he was engaged in destroying the rights and liberties of independent nations, his worthy associates were endeavoring to destroy the religious faith of the civilized world. Both have met with equal and deserved defeat. The discovery we allude to was that of the famous Egyptian Zodiacs, found in the temples of Denderah, the ancient Tentyris, and of Esne, the ancient Latopolis. These Zodiacs present the same figures which are now employed to represent the constellations. These Zodiacs, it was said, represented the state of the heavens at a very remote period. Accordingly, long and abstruse calculations were made to prove what had been at first assumed, that these monuments had been constructed long before the period of Scripture chronology. These calculations were said to be founded on the sure basis of mathematics, and to be therefore conclusive. But a doubt was soon cast over their truth by their own authors. They could not agree as to the actual time when these Zodiacs were constructed. One assigned the date of the construction of the Temple of Esne as far back as 70,000 years ago; another, making his calculations from the same figures, proved that this temple was built 4,000 years before the Christian era; that is, 600 years before the creation, according to the sacred chronology; while a third, by his calculations, showed that the temples of Esne and Denderah must have been built 15,000 years ago.

But these mathematical sophisms, if I may so call them, were soon overthrown, both by scientific principles and by matter of fact. The constellation Libra is figured among the signs of these Zodiacs in the form of a balance exactly similar to the instrument now used. Now, this sign was unknown to the Egyptians before the time of the Ptolmies, in whose time astronomy as a science was cultivated. Before this period the Egyptians studied astronomy under the form of astrology. Mons. Biot, a learned astronomer, has shown that if these Zodiacs were really intended as planispheres, or, in other words, as true astronomical figures, they furnish evidence within themselves to show that the observations upon which their construction was based could not have been made further back than the year 716 before the Christian era. But a matter of fact has rendered all mathematical calculations useless on this subject. The younger Champollion, with Dr. Young, of England, discovered the principles of hieroglyphic writing, by which this mode of writing is as easily and as accurately read as any other. Upon the return of the former from Egypt, he made known the results of his examination of these very Zodiacs before they had been removed to France. He had, while in Egypt, deciphered the inscriptions not only on the Zodiacs, but on many other parts of the temples from which they had been removed. On the Zodiac of Denderah he discovered in hieroglyphics the Greek word for EMPEROR; and on several parts of the temple the name and titles of the Roman Emperors Tiberius, Claudius, Nero, and Domitian; and on the portico of Esne, whose temple was considered much older than that of Denderah, he read the names of Claudius and Antoninus Pius. Thus it was conclusively shown that these Temples and Zodiacs were constructed after the Roman conquest of Egypt, which commenced one or two centuries *after the Christian era.*

But by far the most plausible attack ever made through the medium of science upon the Mosaic chronology, and the last we shall notice, was the supposed antiquity of the astronomical tables of the Hindoos. These tables were introduced to the notice of European astronomers by Mons. Bailley, a French astronomer of great learning and eloquence. Great additional notice and importance were given to these tables by Prof. Playfair, of Edinburgh, whose reputation as a mathematician was eminent. Both these philosophers supposed they had discovered elements in the calculations of these tables which showed that they had been calculated from certain astronomical epochs *actually observed,* which carried back their antiquity far beyond the age of Moses. Indeed Playfair, it was asserted with the most triumphant confidence, had proved for them an age beyond the date of the creation according to Moses. Prof. Playfair concludes his treatise on this subject as follows:—

"The following general conclusions appear to be established:—the observations on which the astronomy of India is founded were made more than 3,000 years before the Christian era, and in particular the places of the sun and moon, in the beginning of the Calyoung, or Age of Misfortunes, as the Hindoos term it—that is, 3,102 years before the Christian era—were determined by *actual observation.* Two other elements of this astronomy—the equation of the sun's center, and the obliquity of the ecliptic—when compared with the present time, seem to point to a period of this astronomy 1,000 or 1,200 years earlier."

Thus Prof. Playfair gave his authority to the idea that the Hindoo period called Calyoung, being 3,102 years before the Christian era, was the era when these calculations were made, and that other elements of the tables point to a period one thousand or one thousand two hundred years before the Christian era; so that these astronomical calculations extended to a period nearly 200 years before the creation of the sun, moon, and stars, according to Moses. These were startling propositions, and led to several renewed and profound investigations. Mr. Marsden, of England, an accurate and learned mathematician, suggested the probability, from the nature of Hindoo astronomy, that the epochs which Playfair supposed to have been founded on *observation* were *imaginary,* assumed as facts, from which the Hindoo astronomer reasoned backward and forward in such a manner as to approximate to the present *actual condition of the heavens.* Another eminently learned man, Bentley, gave his vigorous mind to the study of these tables, and finally boldly announced that Bailley and Playfair had totally mistaken the nature and principles of the Indian astronomy, a peculiarity of which was that certain epochs were assumed as falling at a certain period, and then calculating backward. This he made quite probable, and indeed many thought that he had demonstrated this fact. But the great reputation of Bailley and Playfair made most of the learned hesitate to concur in the results announced by Bentley.

At length the great La Place, "than whom," a competent judge says, "a greater name hath not arisen since the days of Newton," after two profound investigations of the astronomical tables of the Hindoos, demonstrated the truth of the theory of Marsden and Bentley, that the epochs of the tables were imaginary, and not founded on observation, that the conjunctions of the sun, moon, and planets in the tables could not have happened together at the time assumed in them, and that several true elements belonging to the subject had been omitted. "Everything," says La Place, "leads us to conclude that these tables are not of high authority. They have two principal epochs, which go back, one to the year 3102, and the other to 1491, years before the Christian era. These are linked together by the mean movements of the sun, moon and planets, so that one of the epochs is *necessarily* fictitious. I think this common epoch has been invented to give a common origin, in the Zodiac, to the movements in the celestial bodies. If, starting from the epoch 1491, we go back by means of these tables, we find the general conjunction of the sun, moon and planets that these tables suppose; but this is a result so different from that obtained by our better tables, that we cannot believe this conjunction to have taken place, and we are led to believe that the conjunction to which it relates is not founded on observation. The whole amount, then, of these tables, and above all the *impossibility* of the conjunction they suppose to have happened at the same time, prove that they have been constructed, or at least rectified, in modern times. This conjuncture is confirmed by the mean movements which they assign to the moon as to its pedigree and its nodes, and to the sun. They are more rapid than according to Ptolemy, and evidently show that the formation of these tables is *posterior to the time of that philosopher,* for we have seen that these movements go on accelerating from age to age." Thus the greatest astronomer and mathematician of modern times has demonstrated the essential fallacy of the Indian tables, and has shown that their construction is posterior to the age of Ptolemy, who lived 161 years *after the Christian era!*

It will be perceived that hitherto we have been controverting negative objections to the truth of Mosaic chronology. The result, founded on indisputable facts and incontrovertible principles of science, leaves the Mosaic chronology on unshaken foundations. But with this result we do not rest. We have now *positive* testimony, borne by those

> Planets, stars, and adamantine spheres
> That wheel unshaken through the void immense,

to the Mosaic account of their creation. Who has not listened in imagination to the voice of their choral hymns of praise, when

> Nightly to the listening earth
> They tell the story of their birth:
> Forever singing as they shine
> The hand that made us is Divine?

They now declare to man the language of attestation to the truth of the inspired historian of their creation. Let us listen to the language which comes to us from regions of immutable truth and from spheres of imperishable glory.

Having shown the fallacies of all those who have misunderstood the language, or obscured its meaning, we will state its testimony to the truth of the inspired record.

Astronomers had always known that a certain remarkable epoch must, from the essential principles of the solar system, have happened. When that epoch actually happened they had never been able to determine. At length the great La Place, after the most profound and accurate investigation, ascertained its date. This remarkable astronomical epoch is *the coincidence of the greater axis of the earth's orbit with the line of equinoxes, when the true and mean equinox was the same.* Now, this state of the heavens could have existed only at the first moment of the creation of our solar system; for the moment the earth and the other planets began to move the causes which altered this position of the earth began to exert their irresistable power and produce the *precession of the equinoxes.* This great epoch in astronomy, or, in other words, in the history of the heavens, must have been the period of the creation of our solar system. La Place has demonstrated that this epoch happened 4,000 *years before* the Christian era—the very year in which Archbishop Usher and other eminent chronologists fix in the Hebrew Scriptures! This agreement between this astronomical demonstration produced by the unerring and irresistable processes of mathematics and the chronology of Moses, could not be a coincidence of chance; for upon the known rules for the calculation of chances the probability that it is accidental is as one to millions almost inexpressible by figures.

This then is the voice of the heavens bearing testimony to the truth of those inestimable records, in which alone is contained the promise of the advent of that Glorious Person "in whom all the nations of the earth shall be blessed;" through the moral influences of whose mediatorial kingdom not only the desert and solitary places shall be glad, but the whole earth shall rejoice and blossom as the rose.

Christianity, as developed in these records, challenges the homage of *reason,* and claims the tribute of the heart. She elicits every generous emotion, and expatiates in every sublime contemplation. She furnishes a gem for every muse, and associates with her revelations the truths of every science. With undaunted search she traces the hidden strata of the earth that geology discovers, and, pondering the condition and destiny of the beings who inhabit its surface, accumulates to herself from natural theology its most wondrous analogies; presents to the philosopher with one hand the granite of the Alps, fit emblem of her own duration, and with the other the "wonders of ocean's depth," borne by its penal floods to the cloud-capped summit of Chimborazo; and verifies the chronology of her periods by the epochs of astronomy, fixed by the revolution of the heavenly bodies. She never feared, and now appropriates the disclosures alike of the well of Ætna, the Suydhanta of Hindostan, and the Zodiacs of Denderah. S. A. L.

WASHINGTON, Pa.

UR OF THE CHALDEES.

Uriah, the scripturally classic "Ur of the Chaldees," the birth-place of the patriarch, stands on a gently sloping plain, in the angle formed by the meeting of two mountain ranges, and is surrounded on all sides by extensive gardens and vineyards, which in spring and summer must give to the town an appearance of beauty that owes nothing to the heaps of ruinous buildings within the walls. Behind it rises a precipitous cliff, on the summit of which stands the castle, in tolerable repair, and connected with the fortifications of the town by a turreted wall, which runs irregularly down the broken sides of the rock. As we halted here for a few hours, I spent a portion of the time in "hunting up" antiquarian remains of interest; but altered as the face of the place has been in the many vicissitudes of its history—under the Romans, the Saracens, the Crusaders, the Seljukians, and finally the Turks—very few of these are now to be seen. Ruined Saracenic buildings cover over from view nearly all earlier structures, so that a few Greek and Roman pillars and arches, with some fragments of columns, are all that remain to tell the traveler that the eagles of the Roman once floated from its walls. Of Abrahamic times, I need scarcely say, the most credulous Pickwickian could discover no memento beyond the much venerated pool of "Sneikh Ibraheem," which, with its adjoining mosque, embosomed in a thick and shady grove of cypresses, lies immediately below the citadel. This, with Bir-Ayyoab, (Job's Well,) outside the walls, and two or three old Christian churches, now either in ruins or converted into mosques, is all that remains to remind the wanderer that he stands upon ground probably once hallowed by the tread of patriarchs' and apostles' feet.

[Constantinople Cor. of Lon. Daily News.

ONE BY ONE.

One by one the sands are flowing,
  One by one the moments fall;
Some are coming, some are going;
  Do not strive to grasp them all.

One by one thy duties wait thee;
  Let thy whole strength go to each;
Let no future dreams elate thee;
  Learn thou first what those can teach.

One by one (bright gifts from heaven)
  Joys are sent thee here below;
Take them readily when given,
  Ready, too, to let them go.

One by one thy griefs shall meet thee;
  Do not fear an armed band;
One will fade as others greet thee,
  Shadows passing through the land.

Do not look at life's long sorrow;
  See how small each moment's pain;
God will help thee for to-morrow;
  Every day begin again.

Every hour that fleets so slowly
  Has its task to do or bear;
Luminous the crown, and holy,
  If thou set each gem with care.

Do not linger with regretting,
  Or for passion's hours despond;
Nor thy daily toil forgetting,
  Look too eagerly beyond.

Hours are golden links, God's token,
  Reaching heaven; but, one by one
Take them, lest the chain be broken
  Ere thy pilgrimage be done.

From the Occident, and American Jewish Advocate.

SUNDAY LAWS IN PENNSYLVANIA.

We have from time to time published various decisions respecting the enforcement of a Sabbatic rest on the first day of the week, commonly called Sunday. If one may judge, the chief legal authorities of the land seem to waver considerably in their views; and they would no doubt gladly pronounce these laws, what they actually are, an infringement of the constitutional guaranties of the various States, which declare that no religion professed by some of the respective citizens shall have any preference over that entertained by others, if these judges did not dread a sort of public opinion, the work of ignorant zealots, or of those who have a manifest interest in becoming themselves the guides of the people through these very Sunday statutes. How any man with a sound mind can be deluded into the belief that constituting the resting-day of one society as that which is to be obligatory on the others, is not giving it a decided preference as regards this particular observance at least, is more than we can understand. Suppose, for instance, that there were no compulsory Sunday law, and that every man might act regarding it as is now done respecting the *seventh* day, keep it holy or not as his conscience might dictate to him; how many do you think would keep it as sacred as it is kept now? Go to cities and countries where there is no police regulation of this kind, and though its inhabitants be Christians, not less than here, they will attend church on Sundays, still go to the stores which are open and buy what they want and sell what they can dispose of; the military, too, parade with music playing and banners flying, and have field preaching withal; the theaters, public gardens, exhibitions, and concert rooms are frequented by a larger crowd than in other week days; and in brief, the aspect of New Orleans and Berlin for instance, on Sunday, is very different from Glasgow and Boston. Jews, and other religious persons, who are thus permitted to compensate themselves with Sunday business for the loss sustained by the seventh day's rest, will not have to plead the excuse of too great a loss incurred through keeping their Sabbaths; for though the first day business be much less profitable and less in amount, it will be something; and hence the *hard* plea of necessity will not be so often urged for the neglect of our Sabbath. The consequence is, that though unfortunately many of late years have become sadly deficient in conformity to our national religion, the number in Europe is by no means in proportion to those here who throw aside the Jewish Sabbath, because they avow that they cannot afford to lose two days in the week and support their families respectably. The plea, we confess, is a worthless one in every respect; for, irrespective of its being no excuse to do what is wrong in itself, to say *that it is profitable,* it can also be shown by living examples, that those who keep the Sabbath from conviction, and Sunday from necessity, are as well off in the long run as those who, forgetful of their Jewish obligations, labor for gain on the Sabbath. Practically speaking, success in business does *not* depend on the *number of days* during which commerce is carried on, or labor performed, but in the *manner* it is done. Besides, if we, as a religious society, rely on Providence, we should not weigh any probable loss against our duties; for, as these are paramount, their fulfillment will secure us blessings not otherwise attainable. But the worldlings are not governed by any such considerations; they calculate that twice two is equal to *four,* and that five and five are equal to ten; and where their accounts do not offer the like probable result, they are very apt not to look at any other data of comparison, which are beyond their horizon; and hence they will clutch the material, and not look for any compensation in the regions beyond the tangible and evident to their senses. Let us therefore even demonstrate, by the most irrefragable arguments, that the Jewish Sabbath is the proper day to be observed, and that it is moreover the command of God that it should be kept holy, we shall be answered that if one earns ten dollars in five days, he will earn twelve in six, because 5 multiplied by 2 is less than 6 multiplied by 2.

All this will result in the Sunday enactments being a bounty in favor of the miscalled Christian Sabbath, and a direct bribe to neglect the precepts of the Jewish religion; for it is not the Sabbath alone which is thus neglected, but the practice of all other duties will naturally, more or less, fall into disuse with it, as bitter experience has fully proved. If we Jews, therefore, could make our voices heard in the legislative halls, we should be undoubtedly right to insist on the repeal of all such unconstitutional acts, which throw the ægis of a police espionage around the first day, to enforce its outward observance by all the inhabitants alike, whether they acquiesce in it as a matter of conscience, or reject it altogether, upon just as good authority. The Christian community, by the by, under present circumstances, would not have to fear their feelings outraged by an open disregard of the Sunday on the part of the seventh-day keeping traders, mechanics and farmers, if the majority around them be opposed to their mode of thinking; for their interest would soon teach them that, if they wish to succeed in their respective pursuits, they must not act in a manner offensive to their powerful neighbors, and this dread of the tyranny of *public* opinion, or the ideas of a supposed majority, is more potent than all legislation; besides which, if no one come to buy, it would not pay to keep places of business open; and their occupants would much better devote the hours thus uselessly spent in their houses in seeking out-door recreation, of which all shop keepers stand so much in need, and of which a constant attendance on business deprives them, greatly to the injury of their health and mental progress. But in the abstract, every species of coercion resorted to to make one man do an act in which his neighbor has no other concern than that it conflicts with his conscience, while he does not regard the same right in the other to impose his conscience on him, places one class of citizens on a footing of suffering conscientious coercion, and compels them to respect the religious convictions of another. We care not how little may be asked in this category; for to speak simply a word by compulsion merely to gratify our neighbor's whim or idea of duty, would be a tyranny which one would have the moral right to resist. But this is not the question; Jews are at least an order and law abiding people; if anything they are, as a class, too timid to maintain their just rights; nor, to confess the truth, do we think it looks well, as we have seen practiced in one place at least, for our people to exhibit their goods out doors on Sunday, while all others abstain from business. We only speak of the abstract right, that we should not be molested by public regulations to follow the bent of our conscience, which cannot injure our neighbors in their rights and property, especially as we take no offence if they do these things in our presence on the Sabbath, whereas we have the same constitutional claim to the protection of the laws as they have—the respecting of our prejudices, if you will call them so. For the present, it appears, however, that, instead of a more equitable and enlarged acknowledgement of this truth, the exclusive claims of the Sunday observers seem to obtain more and more sanction by legislators, though the judges do not in all cases concur with the law-makers in the spirit in which they are to be enforced. It is in the integrity at last of the judiciary that all true lovers of liberty have any hope of obtaining an immunity against the encroachments of irresponsible *supposed* majorities; and when the burden becomes too heavy, as in the course of things it will and must be, we have no doubt that the judges will step in and arrest the retrograde movement, and rebuke justly the traitors against true and unrestricted freedom of conscience. We could enlarge much more on this point; but we forbear for the present, and only lay before our readers, with these prefatory remarks, the opinion of Justice Lowrie, of the Supreme Court of Pennsylvania, the third out of five who has given publicity to his views within a year or so on the extent of the legality of the Sunday laws of this State, at least as regards their applicability in certain cases. Let our readers ponder well, and see on how weak a foundation the laws in question rest.

Murray vs. Commonwealth. Philadelphia County. Opinion of the Court. Lowrie, J.

This is a summary conviction of a lock-keeper of the Schuylkill Navigation Company, for attending to his business as such on the Lord's day, by opening the locks for the passage of boats. Is this a civil offense? We think not.

The Schuylkill river is a public highway, and as people are not forbidden by law, and therefore have a right, for some purposes, to pass along it even on the Lord's day, the Navigation Company must keep it open, and for this purpose must have lock-keepers to act for them. There may, indeed, be unlawful travel on Sunday, and for such travel there can be no right to have the locks opened; but the criminality of the lock-keeper is not proved by the criminality of the travel; because as agent of the Company he is bound to keep the navigation open for travel, and is not made the judge of its rightness.

Every man travels at his own wish on Sunday, and that wish is measured legally only by the legal penalty—tenfold more serious, perhaps—and it is not the remedy of the law. Besides this, the law would not impose upon the lock-keeper the authority to judge of the righteousness of the travel, without investing him with the exemption from liability for misjudgment that ordinarily belongs to judicial affairs, and then the traveler would be without remedy in case of his error of judgment, and would be justified in going on in case of a decision in his favor. This would make a lock-keeper, in this respect, a more important officer than a justice of the peace.

True enough, the lock-keeper was engaged in his ordinary occupation; but it has never been considered that the occupation of gate-keepers on public highways and bridges is included in the Sunday laws, and the defendant's occupation is of the same sort. The turnpike roads and bridges are not ordered to be shut on the Sabbath, and to throw them open free of toll would greatly encourage breaches of the law. But it is said, that the act of 11th April, 1845, exempts canal companies from attending their locks on the Sabbath. So it does; but this assumes that it was their duty before that to attend them; and the law designed to relieve them from one duty cannot have the effect of imposing another upon them, and especially one that may be enforced by a legal penalty. It is a permission, not a command; an exemption, not a prohibition; and no penalty can be attached to it. The matter is left to their discretion. Judgment reversed.

THE SUBSTANCE OF THE GOSPEL.

What a happy thing it is that the Gospel comes into *so little compass!* Often have I felt this when visiting the sick and the dying. When I have found the mind incapable of vigorous, expensive, or continuous thought, how thankful have I been that the Gospel is so short and so simple; that the elementary truths which give peace to the conscience and hope to the heart, can be stated in so few words! There is divine wisdom and divine kindness in this. There are short sentences which contain essentially all that a sinner needs to know, to give him a sense of pardon and confidence towards God:

"The wages of sin is death; but the gift of God is eternal life, through Jesus Christ our Lord."

"This is a faithful saying, and worthy of all acceptation, that Christ Jesus came into the world to save sinners."

"This is the record, that God hath given to us eternal life; and this life is in his Son. He that hath the Son hath life; he that hath not the Son of God hath not life."

These, and others of a like description, are precious sentences. They are what the dying "man of God," Dr. M'All, so emphatically denominated the core, the very core of the Gospel. Connected with this is the striking fact that, in the hour which is sure and common to all—the hour of nature's last conflict and most pressing exigency—the hour when the mind is shut up to one point, and that point peace with God and hope for eternity—that in that hour all minds come to be so very much on a level, in regard to what imparts their confidence. It is the same truth, in all its simplicity, that gives it to the greatest as well as to the least, and to the least as well as to the greatest. It is most instructive and interesting to see how minds of the largest grasp and mightiest power, when they come to this hour of trial and of final decision, when passing through the valley of the shadow of death, anticipating eternity, and conflicting single-handed with the last enemy, have recourse to the same simple elements of divine truth that are the springs of peace to the very weakest of the "babies in Christ." I have been struck with this in the biographies of some of the most distinguished of our modern divines. Look to the terms in which they express the ground of their everlasting hopes. Although, from previously knowing the character of their minds, you, of course, conceive thoughts of a higher order associated with those terms, and although at times there may be coruscations of brilliant sentiment emitted, that indicate the undying light within, yet substantially they are the very same in which "poor Joseph" expressed the ground of his:

"'It is a faithful saying, and worthy of all acceptation, that Christ Jesus came into the world to save sinners;' and why not Joseph?"

What dying sinner can say more? I mean not that the minds are equal—that were folly; but that, as the greatest and the least stand on the same ground of condemnation, they must stand also on the same ground of acceptance; so that he who has traversed the whole round of theological learning, has explored its depths, and scaled its heights—has argued with metaphysical acumen, and illustrated with matchless eloquence all its points; has read and has written volumes upon volumes, when he comes to the test of a dying hour, is shut up to all the simplicity of the "faithful saying." This is what he needs, equally with the least; and this is what the least, equally with him, enjoys. ~~And the~~ perfectly childlike submissiveness with which master-minds in Israel have avouched their reliance on the most radimental elements of the truth, is among the marks of its divinity. It shows that, in the one point of need, in which all are alike, and which, in all cases equally, the Gospel is intended to meet, the adaptation of means to the end, is perfect. [Dr. Wardlaw.

THE STILL SMALL VOICE.

A young man, deaf and dumb, but well educated, by a spinal affection loses the use of his lower limbs—he is angry at Providence, and wishes to die—is urged to submit to the Divine will as always right—is convinced of sin, and finds peace in believing. Moreover, a young child dies suddenly in the same house—the young mother is nearly distracted, and finds refuge only in the Saviour; the father, profane and sceptical till now, follows her to the Saviour's feet. Now, the work of grace spreads rapidly, till forty or fifty persons in the parish hope they are born of the Spirit, and some twelve or fourteen family altars arise where hitherto prayer has been unknown—heads of families are specially interested—the profane and reckless are led to find their happiness in doing the will of God, and the Universalist of thirty years comes to the knowledge of the truth and bows to Christ. Such is an outline of a recent work of grace in N. Belfast, Me., as reported by the pastor to the secretary of the Maine Missionary Society. And does it not reveal the wonder-working power of Divine Grace? O, for the speedy multiplying of such illustrations of the all-sufficiency of a prayer-hearing God, to turn men from darkness to light, and from the power of Satan unto God! [Congregationalist.

ENCOURAGING BIBLE ANECDOTE.—A Bible agent called at a house in Buffalo which he found supplied. On turning to leave, a lady followed him to the gate of the yard, and thus addressed him: "I have a word to say to you. You sometimes meet abuse in the course of your work; be not discouraged by such cases. When the agent was around some years ago I abused him to the best of my ability, yet he left me a Bible. I am now ashamed of myself for my treatment of him. The Bible which he left me has taught me to lament this and all other sin. I am thankful, that in spite of all my opposition one was left me. But for this, I should now be, in all probability, on the road to death and hell."

STANDARD OF EXTRAVAGANCE.

"But," says the objector, "if a person can clothe himself comfortably for nine or ten dollars, and yet will not, but spends five or six dollars more, is he not guilty of extravagance? Might he not spend this excess in a more useful way? Might he not contribute it to the support of missions among the heathen, or bestow it upon the suffering poor at home?" Yes, he *might*; nobody doubts that he *could* do so, if he were disposed; and if he wear coarse clothing, and live in a rude habitation, and spread a frugal table, *for the sake of* aiding these objects, we can but approve the principle most heartily, and would look upon him as one actuated by the spirit of his Divine Master. But who is so short-sighted as not to have observed, that in the great majority of cases the object of such frugality is, not to aid the cause of benevolence, but to accumulate the more for selfish purposes? We have known many persons so careful of their outlays, as to dress in the meanest style, live on the poorest food, sleep on the hardest beds, and scant themselves of the comforts of life to the last extreme; but we never knew one of them, that did so for the sake of contributing to the cause of benevolence, or that was one whit the more ready to give, of his abundance, to the support of missions, or any other good object, than those are who clothe themselves in purple and fare sumptuously. What, then, is the merit of all their prudence? In what respect do their plain clothing, and humble manner of living, give proof of their godliness? And what sincerity is there in all their noisy complaints of the extravagance of their neighbors?

The facts of the case show, that persons of all classes are disposed to avail themselves of as many of the good things of this life as they can. They dress as well as they can; they ride in as good carriages, and drive as fine horses, as they can; and if one does not go as far as another, in these respects, it is not because he considers it intrinsically wrong, but because, in view of all his circumstances, he cannot afford it. This is the general rule. Some do not follow it, it is true, although they are in the way of accumulating wealth, all the time. They keep on living as if they were the poorest of the earth. But they do so, because they have a passion for hoarding up their gains, not because they are impressed with the sin of indulging in superfluities. With most persons, however, the style of living, dress, and equipage in general, keeps pace with the increase of means. If a man, whose income is but five hundred dollars a year, thinks that a wagon without springs is good enough for him to ride in, and a twenty-cent chints a suitable dress for his wife and daughters, both he and his family usually alter their minds when his income reaches a thousand.

And is this alteration of mind wrong? There is an improvement in their circumstances; must they keep on living as if there had been no improvement? Is the man chargeable with sinful extravagance, because (when he can afford it) he mounts his wagon on springs, and his family with a vain love of the world, because there is a corresponding improvement in their dress? We admit that, when they were in straitened circumstances, it would have been wrong in them to have incurred these expenses. Then, they could not have done it, without wronging some of their creditors, and withholding from the cause of God. It was their duty, then, to be satisfied with the humble equipage which their means enabled them to procure. But now the case is different. The man buys a carriage with springs, and *pays* for it. His family put on silks and broadcloth, and nobody is made to suffer by the act. Their parlor receives a new set of furniture, and still everybody's just claim is met. What right has any one to say, that they have grown proud—that they have become "lifted up" with prosperity—that their increase of wealth has drawn away their hearts from God? If they continue to discharge every duty, as formerly, what sin can there possibly be in their gathering to themselves a new supply of this world's goods?

Some indulgence, in this respect, must be granted, unless we are prepared to say that a primitive simplicity, in the manner of living, is the only allowable standard for Christians. But no one is prepared for this. An advanced age of the world has brought forth many improvements, not only of a useful but of an ornamental kind, of which former ages were ignorant. To what extent may Christians avail themselves of these? If there is a certain determinable point to which they may go, and must there stop, it would be well to have that point determined; and when it is once determined, not only should all Christians stop there, but they should make it their aim to have everybody else stop there too. It would, therefore, be their duty to labor for the suppression of the manufacture of all those luxuries and ornamental things which lie beyond the determined point. If jewelry, alabaster vases, rosewood furniture, and tapestry, should lie beyond the point, it would be the duty of Christians to denounce their manufacture as sinful, and to wage war against them till the art of making them was lost. Does the Christian religion point in this direction?

We shall probably continue the subject.

T. B. B.

AN EDITOR'S EXPERIENCE.

The Rev. Asa Cummings, D. D., editor of the Portland *Christian Mirror*, states in his paper of July 31st, which closes its 33d volume, that he had intended at this time to retire from its editorial supervision, on account of a sciatic affection of long standing. This and other affections originated by it, might "soon render it a physical impossibility for him to sustain the care and multitudinous labors connected with the editorial and publishing departments of the paper." In addition to these labors, he mentions others in which some of his brethren know full well how to sympathize with him:—

"There is a class of cares connected with the position we have held for twenty-nine years, of which the public are not apprised. Donations to various objects often come through our hands, to be lodged in the appropriate treasuries, in this State, Massachusetts, New York, and even at a greater distance. Many thousands of dollars, in small sums, have we had to care for in this way. Numerous letters of inquiry for information in regard to various matters, or for a teacher, or for a minister, or for a parish, as the case may be, were to be answered. We have sometimes written a half dozen letters at a sitting, on subjects which had no connection with our paper or interests beyond the satisfaction one may feel in obliging a fellow-man, whom perhaps he never saw. But all such things take up time, which is a very precious talent to one who, besides editing, has the details of a newspaper office to look after. But all fell to the lot which Providence had assigned us, and we bore them cheerfully and without murmuring."

"CHRISTIAN SOLDIERS,"

A vast amount of breath and ink are spent by certain modern reformers in inveighing against the use of hostile weapons directed against the mortal bodies and lives of our fellow beings. War, capital punishment, lynching, dueling, dirking, *et omnes genus*, are set forth, bearing their own deformed and inhuman character. We also protest against encroachments upon personal liberty, and the free enjoyment of life in an unmaimed body. So much for prologue. There are other rights and interests, as dear as liberty and life. There are other weapons than sword and cannon directed against them. There are other than flesh wounds made. Spirits and characters are broken, as well as skulls and limbs. Hearts and hopes are desolated as well as homes and families. Tides of grief flow as freely as rivers of blood. An assault upon character, a misrepresentation of sentiment, a misconstruction of argument, is equally painful with blows upon the head, and cuts in the body. Social, political, and business circles abound with such. And the vanquished victims of such warfare are everywhere abundant.

From the carnage of war, and the turmoil of the envious world, we turn to the peaceful kingdom of Christ to find safety and quiet. From the doctrines therein taught, we are encouraged to believe that there is peace undisturbed by a discordant sound or act. The envyings, the strivings, the evil surmisings and speaking found there, show that "soldiers" have entered its sacred precincts; and it is found necessary by such

"To prove their doctrine orthodox
By apostolic blows and knocks."

Errors of sentiment, errors of practice, errors of the head, and errors of the heart, are excellent marks for the weapons of the Christian pugilist, who feels it his duty to demolish them. Errors entrenched in orthodox creeds must be bombarded; errors in public men must be guillotined; while errors in private ones must be haltered and gibbeted. Thus a continued warfare is waged by these guardians of truth and righteousness, more against the persons who hold the error, than against the error itself. And when conquests are made by such means, the result is an enemy slain, but no friend gained.

Valorous Christians find error all around them, in everybody but themselves, and deal right *man*fully their blows, and wonder that error does not die from the strokes they give it. As in Milton's battle of the angels, where skulls were cleft and bodies pierced only to be healed with the withdrawal of the weapon, so do these find that error still lives, despite their skill in its butchery.

The Redeemer's kingdom is not strengthened by the expurgation of error from it, when that expurgation is accompanied with the overthrow of one of its members; and truth is never advanced by force. A dictatorial and dogmatic spirit in religion, corresponds with weapons of warfare in worldly fights. And a victim of the former is as incurably and unkindly injured as one of the latter. "A wounded spirit, who can heal?" The strong proclivity to unkindness, misinterpretation, and personality, in religious discussion, ofttimes overrides the love of truth, and makes what should be an effort to elicit and embrace the truth, a personal assault, a war of words, a strife for the mastery. So accustomed have religious sectaries become to this, that almost the slightest reference to their peculiar sentiments awakens them to the contest, or shuts every avenue of the soul by which the truth might enter.

The triumphs of argument are not necessarily triumphs of right. Vanquishing an opponent is not equivalent to his conversion. A mouth shut, is not a soul converted. A shout of victory, is not evidence of success. So when all these have been accomplished, and the aggressor sees his victims all laid out before him, he sees in the scowl of each face, and hears in each murmur, evident signs of dissatisfaction and disgust, and fails to find, in all the defeated, one added to his friends or his cause. The religious combattant may by skillful management draw an opponent into ambush, and capture him. He may outwit him in argument, or discomfit him by his shrewdness in assault; but by no force, or strategy, does he win him to the love of the truth. The church and the world will be just as corrupt and wicked after all religious battles have been fought as before. And there will abound evidences of lacerated feelings, personal alienations and hostility, and a large company of crippled, and maimed and disheartened, as the fruits of religious contests. Who has ever seen truth advanced by strife? Who has seen a war of words end in a peaceful accession to the right? Partisans have been pleased; outsiders have been amused; opponents have been dissatisfied; and not one has been converted from the error of his ways. Thus wags the church, just as the world wags. Fighting destroys, but never builds up. It alienates, but never unites. It leaves numbers less, and never greater. It inflicts sorrows, and tears, and embarrassments, but never ministers joy, and peace, and enlargement. In the kingdom of peace—in the church of the living God—in the embrace of the Saviour—all should be peaceful, and follow the things that make for peace, and things whereby one may edify another.

J. B.

EVIDENCES OF PERSONAL RELIGION.

In resuming this important subject, we will notice the *Love of the Truth*, or the love of God's revealed truth as contained in the Scriptures. As there is no obscurity in the leading doctrines of Christianity, it is not the disposition of the renewed mind to mystify them, or distort them, but to receive them as they are given, and hide them in the inner man as a preservative against sin, as a means of instruction and source of comfort. The mind under the influence of the Spirit, endorses the experience of the Prophet Jeremiah: "I found thy word, and did eat it, and it was the joy and rejoicing of my heart;" and of the Psalmist—"How sweet are thy words to my taste; yea, sweeter than honey to my mouth." It is true, the doctrines of revealed religion are too divine to be fully understood by the human mind—too deep to be fathomed by human reason; yet the pious soul feels their adaptation to his case and condition, and hence, without cavil or objection, receives them. He feels they are the words of his heavenly Father; and as the richest donation of Heaven, he holds them as a precious treasure. Whilst many, in this day of apostacy among professors, who are yielding to all the wild imaginings and the infidel tendencies of the human heart, are quarreling with everybody who will not believe their tenets, and thus lose all rest and comfort, the simple and honest and genuine believer in Jesus is enjoying a feast of love in the blessed truth of revelation. It is almost useless, perhaps, to say, that the Bible is carefully and prayerfully perused—that it is read to be understood, and searched diligently to find out its precious treasures. Yet it may serve as a rebuke to many professors, who seem to know but little of the book or its doctrines, and who stand exposed to the delusions and infidelity of the day.

We turn to another evidence—*the hearty approval of God's way of saving sinners*. Perhaps we may assert, without fear of disputation, that no unrenewed mind ever did or ever will feel this—for the way of the Lord to save men is entirely opposed to human nature, nor will man ever yield to it, until subdued by divine grace. Proud man would save himself by some other arrangement, and hence the numerous devisings of mankind to lay a foundation of their own, and throw the scheme of mercy in the shade, as not consistent with reason and common sense. It is truly hard work for a sinner to consider himself as lost, hopelessly lost—to renounce all his works, and reckon himself a complete wreck, perfectly destitute of any ability to save himself by any meritorious works of his own, whether past, present, or future, and refer all his hopes of salvation to a crucified and risen Saviour. When a soul will do this, surely some other power must have been at work more than human, and such a renunciation of self, and such a submission to Christ, is what God requires, and what the renewed soul says amen to. The true Christian does not profess to understand the whys and wherefores in reference to this divine scheme—he does not profess to understand how deity and humanity can unite so as to make one God-man, and thus constitute a divine Saviour—nor does he attempt to explain how the death of one innocent person can save the guilty, by rendering a full compensation to a broken law and injured justice—or how, by a simple act of faith on the Son of God, he is introduced into a justified state, and all the blessings of the gospel are in fact made his; but he simply receives them as revealed truths, and rests upon them. Why, there is such a perfect satisfaction with the way of salvation, that all other ways are renounced and denounced—no thought of any other is harbored for a moment—it is a salvation complete in every part, and worthy of a God.

The last evidence, in the present communication, will be, *a supreme regard for the glory of God*. And whether our own salvation, or the salvation of others, the demolition of satan's empire or the extension and universal spread of the Redeemer's kingdom, engage the attention, this idea is prominent. The Christian's prayers and labors—yea, the aims of his entire life—have this object in view. It is not enough for him to know that God will be glorified by every transpiring event, from the beginning to the end of time; but this is the prime desire of his soul. Every reflection on the divine character or government, by the wicked—all the enterprises and pursuits of the world opposed to this object, and every blasphemous expression uttered, arouses holy indignation in the soul. All that is good, and tends to promote the interests of his kingdom, and carry out his purposes, and bring men to love and serve him, has his warmest approbation. Now all this is the direct opposite to the feelings and dispositions of unrenewed human nature. When man, naturally at enmity against God, and supremely selfish, becomes possessed of such a feeling as here described, we have the clearest demonstration of a divine change; but without it we may reckon ourselves in our sins.

GEO. R. WHEELER.

SALEM, N. J.

COLLEGE LOCATION.

I notice in the *Recorder* of August 9th, a communication from Bro. Irish, deprecating the course adopted "by the Conference Committee" for determining the location of the proposed Denominational Institution. The present method was, I believe, adopted *unanimously* by the above-named Committee, at its meeting last Fall. The plan was to canvass the denomination as fully as possible between then and the coming session of Conference, and secure all the subscriptions possible, irrespective of location. If the agents that were to go over certain portions of the denomination shall have accomplished their labors, nearly if not quite everything will be done that can be until the question of location is settled. The *desirableness* of raising the *whole amount* before the location is determined, no one will question. It would be a magnificent operation, if we could do it. It is most beautiful in theory. The only difficulty about it is simply this: It is *impracticable*. I have found but very few individuals that were willing to pledge the *whole* of a large subscription irrespective of location, and still fewer who would be willing to proceed to its payment, or give full security for its payment, until the Institution can have "a local habitation and a name"—until they can know something about who are to be its managers, its directors, its *financiers*. However much any of us may desire it otherwise, it appears to me to be simply a matter of fact, that if the denomination neglects or refuses to determine the question of location, there can be but little or no further progress made in the matter until such time as the denomination shall see fit to settle this question. Several churches have already voted upon this subject, and it would be extremely unfortunate if any opposing views or circumstances shall prevent the consummation of a plan undertaken with such unanimity on the part of the Committee, and attended with such encouraging success thus far. It is hoped that the churches will act with promptness and efficiency in the matter.

I would call the attention of those proposing to vote to an article on the subject in the *Recorder* of July 12th as some of the churches, in voting, have failed to state the number of votes cast. For instance, two of these churches have reported that they were unanimous for such or such a place; but did not state the number of votes cast. In all cases, we wish the number of votes.

J. M. ALLEN.

THE FUTURE OF CHINA.

The question what is to be the future of China, is beginning to awaken interest and elicit discussion. In the papers of this country, and in letters from abroad, we have seen expressed a great variety of opinions—some writers thinking that a gradual decline of the Chinese nation is to be expected, while others look for the introduction of new elements of growth and strength by the Insurgents. The question is one of deep interest, and we are glad to see that it is attracting attention. The following is an editorial from a recent number of the N. Y. *Tribune*:—

We infer from several conversations with the Rev. Dr. Parker, who arrived in the Baltic, and who is probably better versed in Chinese affairs than any other American, that he cherishes little hope of any speedy pacification of the distracted Empire. The insurgents are now masters of about half the country, but have made little progress since the repulse of their army that marched to the conquest of Pekin. Conflicts still occur at one point or another with alternate success to this side or that; but neither makes any decided progress. Meantime the continual destruction of property as well as life, with the constant diversion of hundreds of thousands from the fruitful paths of industry to the sterile efforts of the tented field, are wasting the national resources and reducing millions from comfort to wretchedness. And this is likely to go on for years longer, as it did at former periods of revolution. The fact that the two parties seem well balanced, with fortune inclining first to this scale, then to that, insures a continuance of devastation. Were it rendered highly probable that the Tartar dynasty would, or that it would not, be overthrown, millions who have hitherto remained neutral, and been plundered now by this host, then by that, would rush at once to the winning side, and make its triumph overwhelming. Until some clear indication of the result is afforded, the timid and the wealthy keep quiet where they can, and do no more for either belligerrant than they must.

The high-wrought hopes that the triumph of the insurgents would insure the conversion of China to (at least) external Christianity were long since blasted. The destruction of the idols seems to be the extent of Tae-Ping-Chang's devotion to Christian ideas. And, though each party is chary of demonstrations of hostility to foreigners, hoping to profit by their assistance, there seems little reason to expect better treatment of Europeans and Americans from this party, in case of its complete success, than from the other. Of course, the policy and duty of maintaining a circumspect and thorough neutrality in the contest are obvious.

Opium is destroying the Chinese by hundreds of thousands, and its ravages seem rather to increase than to diminish. The general anarchy is favorable to its introduction, and the British East India Company pushes its advantage to the utmost. Any termination of the civil war would be almost certain to insure a circumscription of the nefarious opium traffic.

DE RUYTER INSTITUTE.

The following is the Order of Exercises at the last Anniversary of DeRuyter Institute, June 26th, 1855:

Morning Session.

Salutatory Oration,	Miss A. A. Green.
Oratory—oration,	Mr. J. B. Whitford.
America—oration,	Mr. J. Webster.
Nature—essay,	Miss M Benedict.
Silent Teachings—poem,	Miss A. P. Crandall.
Golden threads in the web of life—essay,	Miss M. L. Weaver.
War—essay,	Miss H. E. Stillman.
Know-Nothingism—oration,	Mr. M. E. Smith.
Where can the soul find rest?—oration,	Mr. W. Wilcox.

Afternoon Session.

Once again—oration,	Mr. Clay Barnes.
Spirited Yankees—oration,	Mr. L. House.
God is everywhere—essay,	Miss A. A. Arnold.
Mission of a Dewdrop—essay,	Miss E. A. Smith.
Power of Words—essay,	Miss Julia Stillman.
Nature's Circles—poem,	Miss H. Tinslar.
Whisperings—oration,	Miss E. M. Burdick.
The Maine Law—oration,	Mr. A. A. Crandall.
Dignity of Virtue—oration,	Mr. G. L. Thompson.
ADDRESS by Prof. James Johonnet, of Syracuse.	
Dignity of character, a demand of our times—oration,	Mr. J. H. Babcock.
Our Maine Law again—oration,	Mr. B. Scott.
Nothing so sweet or sublime in life as its mysteries—essay,	Miss L. H. Sutton.
We are all dreamers, from the cradle to the grave—essay,	Miss S. M. Sears.
The bliss of the spirit is action—oration,	Miss M. N. Sears.
Science—poem,	Miss M. A. Fisher.
The Study of History—oration,	Mr. E. M. Swetland.
Valedictory Oration,	Miss Jane C. Burdick.
ADDRESS to Graduating Class,	Prof. A. R. Cornwall.

CONVEYANCE TO THE ANNIVERSARIES.—To such as propose visiting Brookfield, N. Y., to attend the approaching Anniversaries and General Conference, by public conveyance, I wish to say, that as our friends cannot approach us by railroad nearer than Utica, other conveyances must be employed to come from that city to Leonardsville, a distance of twenty-two miles. A daily stage leaves Utica at 8 o'clock A. M., arriving at Leonardsville about 1 o'clock P. M., and another at 2 o'clock P. M., arriving about 7 o'clock P. M. But these stages will not probably afford accommodations for all whom we hope to see on this occasion. It is therefore requested, that some person in each church in the connection from which any of the friends propose to meet with us, would ascertain the number of persons who may need conveyance from Utica, and communicate, as soon as practicable, the result to A. B. Spaulding, Leonardsville, N. Y., that provision may be made for them accordingly.

W. B. M.

THE LIQUOR DEALERS.—A Convention of Liquor Dealers was recently held at Syracuse, N. Y., to consult upon the best means to secure a repeal of the Prohibitory Liquor Law. The discussions throughout were of a very desultory character. Not a member, so far as we have noticed in reading the proceedings, ventured upon any discussion of the morality of the liquor traffic, of its relation to individual happiness and public good, or of any of the great objects sought to be accomplished by its prohibition. Upon all these points the debates of the Convention, as well as the Constitution which it adopted, were profoundly silent. The Convention, and the class which was there represented, demand the repeal of the Prohibitory Law, not because that repeal is required by the public good, not because the law is detrimental to the public welfare, or injurious to any of the great interests of society, but solely because *it interferes with their profits*. It was determined to cast the whole weight of liquor-dealing influence in favor of that political party, or that class of candidates, which will go for the repeal of the law. To do this most effectually, provision was made for an organization of liquor-dealers by counties throughout the State.

INDEPENDENT MISSIONS.—Rev. J. M. Pease, formerly a missionary of the M. E. Church in Rio Janeiro, and subsequently an agent of the American Colonization Society in the south-western States, having, by untiring industry and self-denial, redeemed the Mobly family, has had it in his heart to explore the interior regions adjacent to the settlements of Liberia, in the hope to gain a better acquaintance with interior Africa, and thus excite a livelier interest in favor of Colonization, by demonstrating the healthfulness of the interior. The danger, risk, and entire expense, he assumes himself, relying upon the voluntary aid which he may obtain from his Christian brethren.

PERSECUTION IN PORTUGAL.—The Rev. Dr. Gomez, formerly a Spanish priest, but now a recognized clergyman of the Church of England, has been for many years engaged as a Protestant minister at Lisbon. Having lately announced a discourse in his own house on the doctrines of Protestantism, he was publicly accused in the Senate by the Marquis of Vallada. The Prime Minister of Portugal replied, that every means should be taken to prevent or punish the offense. Dr. Gomez applied to the British Embassy for protection, but was informed by the Chargé d'Affaires that nothing could be done for him, as he was not a British subject.

MISSIONARIES FOR THE MARQUESAS ISLANDS.—A farewell meeting was held in the Plymouth Church, in Brooklyn, on occasion of the departure of Rev. Mr. Seymour and lady as missionaries of the American Association to the Marquesas Islands. An address was made by Mr. Mills, of considerable length and great interest. At the close, the marriage of Dr. Coxehead with Miss Platt, who also go out as missionaries, was celebrated. They sailed on Tuesday, Aug. 7th.

RELIGIOUS PAPERS.—There is one cause, and only one, for the struggles, trials, and pinching economy to which all our religious papers are subjected. The members of our several churches do not realize the value of these papers to the cause of Christ—they do not estimate as they should, the importance of the press in the great work of sanctifying men. A religious journal with a direct, earnest, and prayerful endeavor to do good, is to them nothing but a newspaper, after all; and a political newspaper—a "Dollar Weekly," full of sickening details of crime—will be preferred to it.

Every day deepens our conviction of two things: that to try to make a paper to please even Christians of one denomination is about the most arduous and thanklesss effort to which a minister can be called; and, second, that a paper circulated generally in the families attached to a particular denomination—a paper adapted to all the members of the family, and endeavoring to benefit each, is one of the cheapest and one of the most hopeful means of doing good that God has ever put into the hearts of his people to employ—that is worth in each church half as much as the labors of an additional pastor, and that he who feels no interest in the success of such papers is sadly indifferent to the cause of Christ, or strangely blind to the teachings of Providence and the signs of the times. [Cin. Christian Her.

BURMAN MISSIONS.—The *Christian Watchman* says that every fresh arrival from Burmah gives intelligence of cheering conquests to the dominion of Christ. In the province of Pegu, recently added to the territory of the East Indian Company, *twenty five hundred* Karens have during the year past been added to the churches. The good work goes on increasing in every direction. The native preachers are beginning to multiply and labor with greater efficiency than ever before. One of these, according to the *Macedonian*, has lately baptized five hundred converts. Thus is God setting his own seal to the labor for the conversion of the heathen.

PROSPECTS IN CHINA.—Rev. Dr. Parker, who has been a missionary in China, and also an agent of our Government, returned to this country a few days ago. The editor of the N. Y. *Tribune*, who came passenger with him from Liverpool, says:—

"We infer from several conversations with the Rev. Dr. Parker, who is probably better versed in Chinese affairs than any other American, that he cherishes little hope of any speedy pacification of the distracted empire. The insurgents are now masters of about half the country, but have made little progress since the repulse of their army that marched to the conquest of Pekin. Conflicts still occur at one point or another, with alternate success to this side and to that; but neither makes any decided progress."

A MISSIONARY SEA CAPTAIN.—The New Haven *Register* says: "We have the case of a gentleman who has acquired a collegiate and theological education, with the view to qualify himself for the post of a missionary sea captain. Mr. C. Barrett, a graduate of the class of '51 in Yale College, has just completed his course of study in theology; and is now about to take command of one of our finest vessels. Having for several years followed the occupation of a sailor, he is therefore well qualified for the post of a sea captain—and he hopes in this capacity to effect an equal amount of good among our seamen, as if he had gone as a missionary to foreign lands."

RELIGIOUS INTELLIGENCE.

We regret to state (says the *Christian Times*, July 20,) that the Rev. Eustace Carey, while sitting at his table yesterday morning over a sermon, was seized with paralysis, and, after remaining in the state of partial consciousness for two hours, expired at two o'clock. Mr. Carey was the son of the Rev. William Carey, the founder of the English Baptist Missions in India, and was himself for many years a devoted missionary.

John P. Jewett & Co., Boston, are about to issue a work on *Spiritualism*, so called, from the pen of President Mahan, which will awaken no small interest. Some who have examined it hope much good from its publication, and think it will help to bring to a perpetual end the dreamy skepticism which has been engendered in the community by the pretended revelations of fools and cunning self-seeking men.

Within a few weeks past no less than three weekly newspapers, published in Chicago, have been discontinued. The *Tablet*, of the Roman Catholic denomination, and the *Evangelist*, the organ of the New School Presbyterians, have stopped for want of support. The *Free West*, the Freesoil paper, has been merged into the Chicago *Daily* and *Weekly Tribune*, which is henceforth to supply its place.

A correspondent of the *Religious Telescope*, who is on his way to Kansas, writes as follows to that paper: "If the Lord is willing I will preach an uncompromising Gospel, with the sin of slavery, in Missouri and Kansas, every chance I get, if I wear a coat of tar and feathers as long as I live."

Rev. Samuel H. Willey, of San Francisco, has come on with his wife and three children to visit his native home and friends in New Hampshire. Mr. Willey has been in California about seven years, and purposes to return to his field of labor in the autumn.

The pulpit of the South Church, Salem, Mass., was recently occupied, forenoon and afternoon, by two brothers, Rev. Brown Emerson, senior pastor of the Church, and Rev. Reuben Emerson, of South Reading. The former is in his 78th year, and the latter in his 84th, and both have been pastors of churches more than half a century each.

Rev. Dr. Cone, of the First Baptist Church New York, was prostrated by a paralytic stroke on Friday morning, Aug. 10. His medical advisers do not deem his life in danger, though the attack precludes him from seeing any but his family. The least intellectual exertion on his part, is absolutely forbidden by the attending physicians.

The English Primitive Methodist Connexion reports a decrease of 2,155 members during the past year.

General Intelligence.

European News.

European dates to Aug, 4th, one week later, have been received.

From tha seat of war, we have the announcement that the French works are so close to the abattis of the Malakoff, that a man may throw a stone into it. The abattis is described as truly formidable; it is formed of the trunks of oak and beech, from the woods of the Crimea, and is more than six feet high. Before making a fresh assault, attempts will be made to destroy it. The Russians are still at work on the position, and are also repairing the Redan. The exchange of shot and shell is almost incessant.

A French dispatch dated July 20, says: Our approaches on the side of the Malakoff, advance considerably. We now touch the place. Every thing is prepared for a general action in about fifteen days.

It was reported in Paris, on the 3d inst. that the French Government had official notification that the bombardment of the Malakoff and Redan had been resumed preparatory to another assault.

Advices from the Crimea to the 29th, announce continued preparations for a grand expedition. All the lighter vessels of the fleet were assembled at Kamiesch.

The French Government has chartered 97 small steamers for river navigation, each to convey 500 men. The boats belong to companies on the Rhone and Saone.

Letters from the Sea of Azoff are to the 16th July. Magazines along the coast were being destroyed, as found, and small steamers were engaged in surveying. The Allied fortifications were progressing.

The Inquiry of the British Parliament into the recent Hyde Park riots is terminated, and the Commissioners have requested time to consider their report.

The Correctional Tribunal, Paris, is occupied in the trial of fifty-five prisoners of the secret society called "Mariannia."

An earthquake has destroyed the village of Viege, Switzerland.

At Genoa, on the 24th of July, the authorities took possession of the female convents, and on the next day were to expropriate the Monks.

There is no material improvement in the advices from China. The reverses of the insurgents were considered but temporary.

Latest from China.

The latest date from Shanghae is June 4th, and from Canton June 8th.

The *Overland Friend of China* regards the recent reverses of the rebels as only temporary and local to the country adjacent to Canton. The Pekin *Gazette* of April 20th supports this view, admitting that Woochang, the capital of Hoopih, has been taken by the rebels, and Hank'how has again fallen into their hands. The Lieutenant Governor of Hoo-kwang and the Prefect of the provincial city both died in the struggle. The North China *Herald* states that the rebels have taken the city of Kwang-sin, in the northeast part of Keang-se, and that Lew, of Shanghae notoriety, and Seaou-kin-tsze, are said to have raised their standard at Tung pa, situate about sixty miles to the northwest of Soo-chow.

The Canton Government, according to the last mentioned authority, is straining every nerve to carry forward its plan of ruling the country by sanguinary force. In pursuance of this, a reward of fifty dollars per head was given to the leading men of villages for every man as "a disaffected."

The distress among the poorer classes at Canton has been relieved by considerable importations of rice.

Her Majesty's ship Rattler has been busy among the pirates. On the 28th of May a second pirate fleet of six boats was destroyed, five captured vessels released, about thirty pirates killed, and four made prisoners by the boats. It was said that the head man on the shore had caused five of the pirates to be seized. They were offered to be given up on payment of a reward. Next week, however, a colonial lorcha, with seventy chests of opium on board, was captured by a fleet of pirates at St. John's, on the west coast.

Treatment of the Yellow Fever.—Capt. Jonas P. Levy, late of the U. S. Transport ship American, who has had hundreds of cases of yellow fever under treatment, says he never knew of a case terminating fatally after observing the following directions: Dissolve in a wine glass of water, a tablespoonful of common salt, and pour the same into a tumbler, adding the juice of a whole lemon, and two wine glasses of castor oil. The whole to be taken at one dose, (by an adult.) Then a hot mustard foot-bath, with a handful of salt in the water—the patient to be well wrapped in blankets, until perspiration takes place freely. On removal to bed, the feet of the patient to be wrapped in the blanket. Afterwards, apply mustard plasters to the abdomen, legs and soles of the feet. If the headache is very acute, apply mustard plasters to be head and temples. After the fever has been broken, take forty grains of quinine and forty drops of elixir of vitriol to a quart of water. Dose—wine glass full three times a day. Barley water, lemonade and ice water, may be used in moderation.

The Price of Wheat.—Hunt's *Merchant's Magazine* publishes a table of the price of wheat at Albany, on the first day of January for sixty-one years. It is from the minutes kept at the office of the Van Rensselaer Manor, at Albany, where large amounts of rent are payable in wheat, or a cash equivalent, on the first of January each year; and as two parties are deeply interested in the price, it is probably the most reliably correct of any record that can be obtained. The list commences in 1793, when the price was seventy-five cents a bushel—only five times in the sixty-one years wheat has been $2 or upward, per bushel, while it was seventeen times at $1 or under—twice at 75 cents. Only once in thirty-seven years, that is since 1817, to wit in 1837, has it reached $2. The average price for the whole period is $1 37. For the last 30 years it is $1 25.

Gavazzi, it is stated, will make a very short stay in the United States. He will come in September and leave probably in November. He declares his determination of renouncing all demonstrations, public or private, by any party, or society, or personal friends.

A New Party.—The following Declaration and Platform embody the elements necessary to a strong and growing political party, from the success of which our country would have much to hope. They were telegraphed to the New York papers under date of Washington, Aug 16, 1855:—

Whereas, by the repeal of the eighth section of the act for the admission of Missouri into the Union, the territories of Kansas and Nebraska have been opened to the introduction of Slavery, and all the compromises, real or imaginary, upon that subject, are thus violated and annulled, and deep dishonor inflicted upon the age in which we live.

Now, therefore, in co-operation with all those throughout the land who oppose this and other similar measures, which we deem to be contrary to the spirit of the Constitution, and which are designed to extend and perpetuate Slavery, we do associate ourselves together, under the name and title of the Republican Association of Washington, D. C.

And we adopt the following as our political platform, to wit:—

First, That Congress possesses no power over the institution of Slavery in the several States; but that, outside of State jurisdiction, the constitutional powers of the Federal Government should be exerted to secure life, liberty and happiness to all men; and therefore,

Second, There should be neither Slavery nor involuntary servitude, except for the punishment of crime, in any of the territories of the United States.

Third, The people are the rightful source of all political power; and all officers should, as far as practicable, be chosen by a direct vote of the people.

Fourth, Candidates for political offices should be men of undoubted integrity and sobriety, and pledged to support the principles of this platform by all lawful and constitutional means.

SUMMARY.

Solomon Rothschild, the Paris Jew banker, was buried Aug. 1st, with a certain degree of financial pomp. The hearse was followed by a large number of artistic and literary celebrites, by the old men supported at the hospital endowed by the deceased, and by 1,200 children educated at his school. Then, in the procession, was the Grand Rabbin, and the Israelite Consistory. The body was buried in the tomb of the Rothschild family, which is in the Jews' corner of Pere La Chaise.

Counterfeit five dollar notes of the Ocean Bank of this City, extremely well calculated to deceive, are in circulation. They may be detected by noticing the figure "5" on the left hand upper end. In the genuine notes there are three faint lines drawn around the shading of the figure. On the spurious only one. The scroll work at the extreme of the end piece strikes the border of the counterfeit, while there is some space between them in the genuine.

The Norwich and Willamantic (Ct.) operatives and their employers are still at issue and the mills are idle. A ten-hour law was recently adopted in that State, by which ten hours make a day's work, unless otherwise agreed. At Willamantic the operatives very moderately ask for eleven hours labor on five days of the week, and nine hours on Saturday; the employers insist on twelve hours for the five days and nine on Saturday. At North Windham a compromise has been proposed of eleven hours for each day.

In determining newspaper postages, the distances are to be computed from the office of publication, and by the route over which the mail is carried, and not from the county line of the county in which the paper is published. This postage is chargeable by the newspaper, not by the sheet; and if two or more newspapers are printed on one sheet, full postage must be charged on each.

Mrs. Becker, who recently saved the lives of a boat's crew, off Long Point, Lake Erie, has received a purse of $600, raised by private subscription in Canada. Mrs. Becker is a large, masculine woman, about six feet high, weighs two hundred pounds, was born in Canada, and is thirty years old. She lives on the island of Long Point with her husband, and they gain their subsistence by fishing.

A dispatch dated Saratoga, Thursday, Aug. 16, says: The room of W. E. McMasters, who is in lodgings from the Union Hotel, was robbed last night of notes against private individuals to the extent of $1,200, a certificate of deposit in the Crouse Bank of $400; do. in the Bank of Auburn of $320. Bills on the Atalanta Bank, Georgia, for $70, and a diamond ring.

A correspondent of the Alexandria Sentinel says, he understands that the large estate of Mrs. Fitzhugh, on the Potomac river, called Arkendale and Richland, which together contains about 3,500 acres, has been recently sold to a company of New Jersey farmers for the sum of $67,000.

John Gilman, a citizen of Dexter, Jefferson County, N. Y., who had been one of the unfortunate "sympathizers" in the Canadian revolt in 1838, taken prisoner and sent to a British penal colony, returned to his family on the 26th ult., after an absence of seventeen years.

A New Haven paper, describing the localities of three prominent institutions of that city, says: "The Medical College is on the road to the cemetery; the Divinity College on the road to the poor-house, and the Law School on the road to the jail!"

The medical profession of New Orleans, after having been discussing for several years the origin of the yellw fever, which has desolated that city, is now of the opinion that it is not imported. On this question the faculty stands in the proportion of eight to two. The disease is, therefore, of local origin.

One of the Missionaries to the Jews in London has received during the last year 1,149 visits from Jews and Jewesses, who are seeking instruction in Christianity.

It is stated that Santa Anna has made an investment in New York City, by purchasing elegant houses and other real estate up town.

According to Agassiz, no fossils of the rose have ever been discovered by geologists. He thinks the creation of the plant is coeval with that of man.

The merchants of Northfield, Mass., have formed a league and put themselves under bonds, each in one hundred dollars, not to sell goods on trust any longer.

Great sympathy has been manifested in England for the widow of Lord Raglan. When the news of his death was received, a nobleman was specially commissioned to convey to her the sad intelligence. Prince Albert called on her soon after, bearing an autograph letter of condolence from the Queen, and called again in the evening. The Queen sent to make inquiries on the two succeeding days, and a London paper states, "The list of visitors has embraced the whole of the nobility and gentry now in town."

New York has perhaps never seen a summer during which the times were as hard as the present. There are said to be more mechanics and working people out of employ now than during last winter; and beggary is more common, than during the severity of the cold season. The coming winter must witness suffering, we fear, beyond any precedent. Two things are favorable; more of the destitute will leave the city before winter comes on, than usual, and food and fuel will be cheaper than a year ago.

As soon as haying is over, fruit trees of all kinds may be trimmed. Now is the time to expect the wounds to heal rapidly, as the trees make wood fast at this season. Never cut off large limbs from fruit trees unless you choose to induce premature decay. You cannot do worse than to cut off large limbs. If there are too many of them, let them remain, while you thin out the twigs that are not large enough to bear fruit.

A band of English Gipsies, they say, are encamped in the woods north of Hoboken, near the main road. The company consists of three families, numbering twenty-seven persons, almost destitute of money. They will probably wander away south before the approach of cold weather. Several companies of these people are now traveling in various parts of the country, going north in the summer season, and turning to a warmer latitude in the fall.

As the express train on the Boston Railroad was passing the depot at Chatham, Aug. 13, a Mr. D. Tafft, of Charleston, S. C., and a person named Brecker, of Albany, were sitting with their arms out of the car window, and the current of air raised by the passage of the train, blew open the side door of a freight car standing at the depot, breaking the arm of Mr. Brecker and cutting the left arm of Mr. Tafft clean off between the shoulder and elbow, the part cut off falling on the track.

The St. Louis *News* says: We learn from Sullivan, Ill., that the town is deserted, there being but one family in the place which has not got the cholera, and that there will not be persons enough (unless the doctors do it) to bury the dead, as there are a number expected to die. About all who are able to leave, having become alarmed at the ravages committed by this scourge in their midst, have fled from the town.

According to the official statement of the City Inspector 592 deaths occurred in New York the last week—an increase of 13 on the mortality of the previous week. As usual, about four-fifths of the deaths were among children. Two cases of cholera are reported, 46 of diarrhœa, 36 of dysentery, 56 of consumption, 5 of small-pox, 14 of debility, 24 of dropsy in the head, 8 of measles, 20 of hooping cough, and 114 of cholera infantum.

The cholera has appeared among the Irish laborers at the western terminus of the Blue Ridge Tunnel. The Charlottesville (Va.) *Advocate* reports two cases on Thursday last—a mother and her child. The child died and was buried, and the mother, who was supposed to be dead, was shrouded, and a coffin ordered, when she was fortunately restored to consciousness.

A dispatch dated Buffalo, Monday, Aug. 13, says: At Niagara Falls, yesterday, five men got into a skiff near the Suspension Bridge; unfortunately, one of their oars broke and they could not then manage the boat, and were carried down the stream into the whirlpool, where the boat upset and was broken to pieces. All the men were drowned.

A young girl in Pawtucket was lately found inhaling the odor of a bottle of chloroform liniment, which had been left within her reach. It was taken from her, but some of its contents were spilled, and she lay down with her face upon the saturated bed-clothes, and was found half an hour afterwards dead.

Rev. D. A. Hearn, Catholic Priest of Taunton, a man weighing about three hundred pounds, fell on Saturday a distance of nearly fifty feet from the tower of the new Catholic Church to the floor. The shock was of course severe, but not a bone was broken, and he was able, with but little assistance, to walk to his house, and is now apparently doing well.

As a party of four persons belonging to Mauch Chunk were bathing in the surf at Atlantic city, on Sunday morning, Aug. 12, they were carried out beyond their depth, and two of them, a lady named Andrews, and a Mr. Boyd accompanying her, were drowned. The other two were rescued.

Seventy slaves and free colored men were arrested while at worship on the first Sunday evening of July in New Orleans and sent to jail for making a noise. At the same time theatrical exhibitions and cock-fightings were allowed to go on unmolested.

The sword manufactured on behalf of the German citizens of Charleston, S. C., for presentation to Commander Ingraham, as a testimonial of their admiration of his conduct in the Kosza affair, was presented to that gallant officer at the Military Hall in that city on Thursday evening, August 2.

A new diamond, found by a negress in Brazil, and called the "Star of the South," has reached England, and is producing a sensation. It weighs 254½ carats, and will probably lose half its weight in cutting. The Koh-i-noor, now it is finally cut, weighs 122 carats.

The Irish remittances from America the last year, amount to £1,730,000 more than they were the year previous, yet the number of emigrants was considerably less than the year before.

A dispatch from Washington says that Dr. Peter Parker, long a missionary at Canton and late Secretary of Legation, accepts the appointment as Commissioner to China, and will soon return thither.

The deaths from yellow fever at Portsmouth, Va., now average eight a day, in a population of 2,000 persons.

The Trustees of the Ohio Emigration Association have decided on a location in the State of Iowa. The point which to them seems most favorable is about 130 miles wes of Danbuque. The lands in this vicinity are remarkably fertile, the prairie high and rolling, well-watered, and convenient to large groves of timber. There is an abundance of coal, limestone and iron in that part of the State.

A Rochester paper states that Mr. Ely S. Parker, a civil engineer of some note, recently employed upon the canals of this State, and who has been called to Norfolk, Va., on professional duties, is the chief of all that remains of one of the tribes of Indians who formed the six nations—the Senecas. He is said to be a man of great natural ability, and much learning.

In the course of three months after the opening of the "People's Washing and Bathing Establishment," in Mott street, New York, there were 38,000 bathers. Many more than this might be accommodated. There is a place where youth may learn to swim, thereby serving to prolong their natural lives, and guard against an unnatural death.

The reports from Portsmouth and Norfolk, of the ravages of yellow fever there, are of the most alarming character. Notwithstanding a vast majority of the population of both cities has fled, it is still increasing. A number of cases have occurred in the Navy Yard and on board the ship Pennsylvania, at the latter city.

The official account of Gov. Reeder's ejection from office confirms, to the fullest extent, the belief that he was not removed on account of his alledged illegal speculation in Indian lands—not for any of the reasons specified in the memorial of the Kansas Legislature—but because he would not coöperate with the propagandists in forcing slavery upon the people of the new territory.

Two or three days since, says a Louisiana paper, a gentleman of this parish, in hunting runaway negroes, came upon a camp of them in the swamp on Cat Island. He succeeded in arresting two of them, but the third made fight, and upon being shot in the shoulders, fled to a sluice, where the dogs succeeded in drowning him before assistance could arrive.

There has been a defalcation in the office of Major Belger, Quartermaster of the United States Army, at San Antonio, Texas, committed by John S. Shehan, to the amount, as is now known, of some $15,000 to $18,000, and it is supposed to exceed that amount considerably.

George W. Payne, of Farmington, Ct., has a lot of Minnesota rice growing upon his farm "full eight feet high, and promising an abundant yield." He thinks it fully equal to Southern rice, and is confident that it can be profitably raised in that meridian. It is sown on swampy land unfit for other cultivation.

The Elkton, (Md.) *Whig* mentions the fearful ravages made by the cholera at Perryville in the family of Joseph Raisin, stating that the family consisted of husband, wife and six children. In a week's time all of them died except a small lad, who has recovered.

Capt. Titus, an old Lake commander, was drowned at Sandusky, Sunday, Aug. 12. He was Captain of the steamer Erie, and saved from that vessel when she was burned several years ago. He was also saved from the steamer Alabama, when she sunk last year.

The Louisville *Journal* contains many affidavits as to the cause of the commencment of the riots in the Eighth Ward—some of them by Irish Catholics in the vicinity. They tend ty show that they, the Irish, were armed several days previous to the election.

Mr. Dawson having declined the appointment of President Pierce, Wilson Shannon, ex Governor of Ohio a member of Congress from that State, and a supporter of the Kansas Nebraska bill, has been appointed Governor of Kansas.

Mr. Godey, of New York, stopping at the United States Hotel, Cape May, had his trunk rifled of two checks of $3,000 each, four $50 bills of the Bank of New York, a diamond pin, a valuable bracelet, and other articles.

By the official report of the Board of Health, it appears that for the week ending Aug. 7 the deaths by cholera at Cincinnati were eighty. The greatest number of deaths in any one day was Aug. 4, being twenty-two.

Hon. Abbott Lawrence of Boston, the successful merchant and munificent founder of the Lawrence Scientific School in Harvard College, died at Boston on the 18th inst., in the 64th year of his age.

The prevalence of Yellow Fever in several places in Virginia has again appealed to the liberality of New York, and considerable sums of money are being forwarded for the relief of the sufferers.

Eld. O P. Hull, of Walworth, Winconsin, says:—"The crops have come in quite well in this State, and are mostly secured in good order. The rain has not affected the crops here as in the Eastern and Middle States."

Richard P. Robinson, the supposed murderer of Helen Jewett, died at the Galt House, Louisville, Ky., on the 8th inst. For several years past he was known as Richard Parmelly.

The Utica *Observer* says Rev. J. S. Davenport, formerly Rector of Christ Church, Oswego, having joined the Irvingites, has been deposed from the ministry of the Episcopal Church by Bishop Delancy.

A dispatch dated Chicago, Monday, Aug. 13, says: Judge Drummond, in the United States District Court, this morning, sentenced Dennison, the mail robber, to ten years' imprisonment in the County Jail.

The bark L. M. Hubby, of Cleveland, capsized off Point Betsey on the 8th inst. The crew, twelve in number, were all lost. Cotterell, the mate, alone was saved.

Mr. John Hecker, the proprietor of the *Churchman*, intends to commence in a week or ten days the publication of a new daily newspaper, from whose columns the *Churchman* will be made up.

A dispatch dated New Orleans, Monday, Aug. 6, says: The total number of deaths in this city during the past week was 300, of which 222 were from yellow fever.

Our news from Mexico is of a most interesting kind. It would seem that the revolution has now gained sufficient importance to indicate early changes of a serious character.

Dispatches relative to the prevalence of the yellow fever at Portsmouth and Norfolk, Va, are saddening.

Cholera prevails to a very considerable extent in Iowa City, Iowa. Rev. Mr. Belden is among the victims.

New York Markets—August 20, 1855.

Ashes—Pots $6 50; Pearls 6 37.

WILLIAM M ROGERS, Treasurer.

Yearly Meeting.

The Yearly Meeting of the Seventh-day Baptist churches in Rhode Island and Connecticut will convene with the Pawcatuck church, commencing with a sermon by Eld. C. Chester, on Sixth-day evening, August 24th, 1855.

Eastern Association—Executive Committee.

The Executive Committee of the Eastern Association will hold a session on First-day, Aug. 26th, at 8 o'clock, A. M., in the vestry of the meeting-house at Pawcatuck, R. I. S. S. Griswold, Sec.

The Virginia Association.

The Seventh-day Baptist Virginia Association will hold its next annual meeting with the Seventh-day Baptist Church at Lost Creek, Harrison Co., Va., commencing on the fifth day of the week before the fourth Sabbath in September, 1855, at 10 o'clock, A. M. Opening discourse by E. Bee; A. Bee, alternate.

J. F. Randolph, Secretary.

Farm for Sale.

THE House and Farm lately owned and occupied by James Hubbard, in Scott, Cortland Co. N Y., are now offered for sale, on reasonable terms. The House is a large two-story house nearly new, and well arranged to accommodate a large family. The Farm consists of about thirty-six acres of good land, most of which is under good cultivation and is well watered. There are about fifty trees of choice grafted fruit in good bearing condition. It is situated in an industrious and moral community, enjoying all the advantages of schools meetings, and markets, necessary to make it a pleasant home.

Apply to A. D. C. Barber, or J. N. Pratt. 4t–9.

Farm for Sale,

CONTAINING about 100 acres with a fair proportion of woodland, a small orchard of grafted fruit, and a comfortable dwelling and outhouses. It is situated about four miles north of Westerly, R. I., and within a mile of each of the flourishing manufacturing villages of Potter Hill and Ashaway. There are several other manufacturing establishments near, affording a ready market, in the immediate vicinity, for every species of produce. It is convenient to the first Hopkinton Church, as well as to the very excellent male district school.

It will be sold with or without the stock and farming implements, and possession given the ensuing winter or spring, if desired. To those wishing to secure a quiet home in an enterprising neighborhood, and surrounded by such comforts as can only be found in an old settled and thickly populated country, this affords an opportunity seldom offered. For terms and other particulars apply to the subscriber on the premises, or address John E Potter, No. 15 Sansom-st, Philadelphia Pa. Benjamin Potter, Ashaway, R. I.

11tf.

DeRuyter Institute.

This Institution is located in a pleasant and healthy section of country, and in a community comparatively moral and intelligent. It is easy of access from Syracuse, Chettenango, and Homer. Our motto is, *Teach the young to govern themselves—to educate themselves.* Grateful for past liberal patronage, we assure the public we have ample accommodations for more.

Expenses:

Tuition,	from $4 00 to $6 00
Board in families,	from 1 25 to 2 00
" in clubs	from 0 60 to 1 00
Room rent, per term,	from 1 25 to 2 62

Books and Stationery furnished at very low prices.

All bills settled invariably in advance. No bills for less than half a term. No deductions made except in case of sickness.

Board of Instruction.

HENRY L. JONES A. M., Principal.
AMOS R. CORNWALL, A. B., Prof Mathematics.
Miss JOSEPHINE WILCOX, Preceptress.
Mrs. SARAH E. JONES, Mrs. BARBARA A. CORNWALL, Miss SARAH E. SHIPPEY, Miss JANE C. BURDICK, Assistants in Female Department.

For further particulars, address, Henry L. Jones, Principal; W. D. Wilcox, President; J. B. Wells, Secretary; or C. H. Maxson, Treasurer, De Ruyter, Madison Co., N. Y.

Milton Academy.

Male and Female Teacher's Seminary.

A. C. Spicer, A. M., Principal, and Professor of Mathematics, Natural, Intellectual, and Moral Sciences.

A. Whitford, Professor of Greek and Latin Languages, and Rhetoric.

J. F. Pease, Professor of Instrumental and Vocal Music.

J. F. Wood, Teacher of Penmanship and Book-keeping.

Mrs. S. M. Spicer, Preceptress, and teacher of Modern Languages, Painting and Penciling.

(Other teachers will be engaged as occasion may require.)

Calendar for 1855–6.

First term opens Wednesday, August 29th; closes Wednesday, December 5th.

Second term opens Wednesday, December 12th; closes Wednesday, March 19th, 1856.

Third term opens Wednesday, March 26th; closes Wednesday, July 2d, 1856.

(The school will open, this year, in the New and Spacious Hall just erected.)

Tuition per term of 14 weeks, from $4 00 to $6 00. Music, Painting, and Penciling, extra. Board at the least possible price, not exceeding $2 00. Refer to the principal; Hon. J. Goodrich, President of Trustees; to M F. Walker, Esq., or to J. C. Culver, Esq., Milton, Rock Co., Wis.

Board Meetings.

The Executive Boards of the Seventh-day Baptist Missionary, Tract, and Publishing Societies will meet at Plainfield, N J., on First-day, Sept 2d, commencing with the Board of the Missionary Society at 9 o'clock A. M.

The General Conference.

The Seventh-day Baptist General Conference will hold its triennial session with the first church in Brookfield, Madison Co., N. Y., commencing on the fourth day of the week before the 2d Sabbath in September next (5th of the month,) at 10 o'clock, A. M. Introductory discourse by Lucius Crandall; T E. Babcock, alternate. H. H. Baker, Secretary.

Our Anniversaries.

The Seventh-day Baptist Missionary Society will hold its 13th Annual Meeting with the 1st Seventh-day Baptist Church in Brookfield, Madison Co., N. Y., on Fifth-day, Sept. 6, 1855, commencing at 10 o'clock A. M. Opening discourse by Thomas E. Babcock.

The American Sabbath Tract Society will hold its 13th Annual Meeting at the same place in the forenoon of Sixth-day, Sept 7th, commencing at 9 o'clock.

The Seventh-day Baptist Publishing Society will hold its 6th Annual Meeting at the same place in the afternoon of Sixth-day, Sept 7th, commencing at 1 o'clock.

Magnificent Floral Gift.

SUBSCRIBERS to the "CHRISTIAN DIADEM" for 1855, are entitled to a splendid steel engraving, the ☞ LILLY AND THE ROSE PERSONIFIED, being given *gratis* to all old and new subscribers who send us only ONE DOLLAR, by mail or otherwise.

Six Copies for Five Dollars.

The Diadem is a strictly moral and religious work—designed for the Christian family without regard to any particular denomination.

FIFTY ENERGETIC BUSINESS MEN are wanted immediately to circulate the "Diadem" throughout the Eastern and Western States. To such as can send good references the very best inducements will be given. Address Z. P. HATCH, Publisher 9 Spruce street, New York. May 24—3m.

The very Book that every body has been Wanting.

The Book for the Parlor, the Book for the Fireside, the Book for the Professor, and the Book for the Non-Professor.

THE RELIGIOUS DENOMINATIONS OF THE UNITED STATES: Their History, Doctrine, Government, and Statistics; with a Preliminary Sketch of Judaism, Paganism, and Mohammedanism. By Rev. Joseph Belcher, D D., Honorary Member of the Historical Societies of Pennsylvania and Wisconsin, author of "William Carey, a Biography," etc., etc., and "Editor of the Complete Works of Andrew Fuller," "Works of Robert Hall," etc, etc. Large octavo, 1024 pages, handsomely embellished by nearly two hundred engravings.

This invaluable work is rapidly finding its way among all classes of the American people. The clear, comprehensive, and impartial manner in which the learned author treats each and every denomination, is winning for him golden opinions from the highest authorities in the land. The innumerable lively tales and anecdotes of ministers, churches, and laymen, which he introduces with the articles of faith and all important statistical information, give to the work a life, vigor, and spirit truly delightful. One cannot sit down to it without being convinced that his subject is in the hands of a master, nor rise but with kindlier and more liberal feelings towards the great brotherhood of Christians, under whatever name they bear. Ours is a great, growing, and glorious country, and every family, and every young man, throughout its length and breadth, should have a copy as a text book of all its denominations. Wherever known, it is read, and wherever read, admired. Look at the following from among the very many notices received:

It embodies a vast amount of information relative to the origin, history, and missionary operations of the different religious denominations in this country, presented in a remarkably interesting and attractive manner.—*Rev. John Dowling D D. Author of "The History of Romanism," "Judson Offering," etc.*

This is a large and beautiful volume, and will find a cordial welcome in every family.—*Philadelphia Christian Chronicle.*

So far as concerns independence of vision, there can be no question, as Dr. Belcher surveys each sect with the same dispassionate impartiality.—*Epis. Recorder.*

This massive volume embraces a vast fund of information.—*Presbyterian.*

The work is sold by agents, and will furnish a large amount of interesting and valuable information to the families into which it may be received.—*New York Recorder and Register.*

In the account given of the denominations, he is fair, and generally allows them to speak for themselves, as to their history and institutions.—*New York Christian Advocate and Journal.*

It contains a mass of interesting facts and statistics.—*Norton's Literary Gazette.*

Judging from the work, it would be difficult to say what are the religious views of the Editor, so fairly, so dispassionately, so charitably, has he treated each and every sect.—*Philadelphia City Item.*

We presume it will be a standard work in thousands of libraries.—*Littell's Living Age.*

Sold only by agents, to whom certain districts are allotted. For particulars address the publisher,

JOHN E. POTTER,
15 Sansom-st., Philadelphia.
Or Noyes Spicer, Indianapolis, Ind.

Michigan Southern Railroad Line.

TRAVELERS for Chicago, St. Louis, Kansas, and all points West and Southwest, can obtain through tickets, and all information concerning routes, fare, &c, either by the New York and Erie Railroad, or the New York Central Railroad, by application at the Company's Office, No. 192 Broadway, corner Dey-st., to

JOHN F. PORTER, General Agent.

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c. *Spring Arrangements*, commencing April 2, 1855: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M 1 and 4 P. M. For Somerville, (way) at 5 30 P. M.

The above trains connect at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 1, 4 and 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 6 and 9.45 A. M. and 3 P. M.; Somerville (way) at 6 A. M.

New York and Elizabethport.

Leave New York at 8 and 10 A. M., 1, 4 and 5 P. M.

Leave Elizabethport at 7.15 and 9.10 A. M., 1, 3.15 and 6 P. M. JOHN O. STERNS, Superintendent.

New York and Erie Railroad.

ON and after Monday, May 7, and until further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Dunkirk Express at 6 A. M. for Dunkirk.

Buffalo Express at 6 A. M. for Buffalo.

Mail at 8¼ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Accommodation at 12¼ P. M. for Port Jervis and intermediate stations.

Rockland Passenger at 3 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.

Way Passenger at 4 P. M. for Newburgh and Otisville and intermediate stations.

Night Express at 5¼ P. M. for Dunkirk and Buffalo.

Emigrant at 6 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5¼ P. M.

These Express Trains connect at Elmira with the Elmira and Niagara Falls Railroad, for Niagara Falls, at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicago, &c., and with first-class splendid steamers for all ports on Lake Erie.

D. C. McCALLUM, General Sup't.

Miscellaneous.

From "The Crayon."

Wanderings in the Southwest—No. 4.

San Antonio de Bexar, June 9th, 1855.

From Sisterdale to near Braunsfels, a distance of fifty-two miles, the road leads over a hilly country. Within the first few hours we passed two pretty streams, with grassy valleys, in one of which was a cabin. As we passed, the company struck up a German song, when out rushed an occupant, in a degree of excitement, that told well how strong is the bond which holds them in sympathy in exile. I did not understand the words of the song, but I knew its meaning by its effect—it was a rallying call. He would have joined us, bare-headed as he was, but he had no money; one of the party arranged the matter by engaging a bundle of shingles, and paying in advance. He hastened to drive a calf into a pen near the house, to make it safe from the wolves, and on we drove. That night we camped in a valley without water, and as I laid my head upon the saddle, it pressed unusually heavy, and ached with the excitement of the day. We were in the valley of the dry Civolo, where that stream pursues its subterranean way, carrying with it all the springs that are necessary to make a mountain region an agreeable one to travel in. The coolness of the night breeze, as I lay on the ground with nothing over me but the starry sky, reduced the fever of my brain, and in part atoned for the want of those cool rivulets, that in the mountain regions of the North sparkle by every man's door. There is a charm in the night air through all the inland regions of western Texas, that one can hardly appreciate who has not experienced it. When the sun goes down there is a softness in the breeze, (and one is scarcely ever without it,) even when it is strong, that soothes the travel-worn into forgetfulness of his fatigues, and he sleeps as tranquilly and dreamless, and insensible to the hard earth, as the dead. Once I waked, on hearing a horse grazing near my head; for an instant I forgot that Pelicano was a captive among the savages, and felt as a ranger, free to mount and away at my will. The moon was just resting on the summit of a distant mountain, my companions were sleeping around me on the grass, and the long Missouri wagon, with its great shear, stood in the shadow of a post-oak. I would have given all this beautiful scene, the genial skies and smiling earth, for one draught of the cold water that at that moment blessed the least favored land of the North. We resumed our way early the next morning to get to water, passed some charming valleys of great extent, with rich soil, covered with bright green grass, and interspersed with groves of oak, and intersected by the dry bed of the Civolo, but which is the bed of a torrent in the rainy season, and which is well defined by trees and vines that grow in greater profusion along its course. An artesian well would enable one to irrigate a thousand acres of the finest land in Texas. About ten o'clock we reached the house of a German settler. The water we used was drawn from a spring two or three miles distant, in a cask placed on a sled. We breakfasted on milk and eggs, of which we found here a good supply.

After an hour's rest, we continued our way over a road through a district entirely different from any that I had seen in Texas. Heretofore, all the country I had gone through, might be mistaken at a distance for one under a state of cultivation. I had seen nothing that could be called wild. The valley became hemmed in by mountains of limestone, covered by cedars, branching close to the ground, and spreading, making an impenetrable thicket. Bluffs of the same rock rise several hundred feet from the water-worn but dry ravine, above which eagles were hovering. It was a wilderness, where the bear and panther, and rattlesnake, reign undisturbed. We pass the high ridge dividing the valley of the Civolo from that of Comal creek, also dry, and continue our way over arid and desolate hills, covered with prickly pears, breast high, small oaks, and scanty grass. Three miles from New Braunsfels, we had passed several cultivated fields, in which corn looked surprisingly well, and where the settlers supply themselves with water from wells. Here, on the top of the highest hill, overlooking the town and the extensive rolling prairie beyond, was a house intended as a resort from town. Here we stopped, and unrolled two banners, on one side of each was "Sisterdale," on the reverse of one was in German, "In the mountains of freedom," on the other the first line of a song, "What a dusty year it is." The hoops of the wagon—we had no cover—were wreathed with grape vines, evergreens, and scarlet flowers. The driver carried a vine over his shoulder, and we all wore a wreath of the same about our hats; I having had a horse stolen in their settlement, was thereby constituted a member of their society, and entitled to its privileges, and had a wreath of vines about my hat, while my sunburnt, unshaven face, would make me pass very well for one of them. Thus attired, we drove down the long hill past the Comal Springs, and into the town, singing a wine song, cheered by every group of a delighted and excited population. Mrs. D. was left at the house of a friend, and we drove through the town to the reception hall. Never till my dying day will I forget the scene that followed. It was the great anniversary, the re-union of friends, who had been tried together in the school of adversity. The republicans of '48, who have suffered imprisonment, confiscation and exile; the statesman, the poet, the philosopher, the artist, and naturalist, met, after the conflicts of a year of toil and hardship, to sing once more the songs of the loved classic Rhine, to mingle with the aroma of its wine the cherished remembrance of home, which glows nowhere more vividly than in the heart of the German. How could I witness those congratulations, those beard-to-beard embraces of old friends, and not be moved; I, too, felt that I was a German, and not a member of the "Know-Nothing" inhospitable nation that I was. I shook hands with a hundred persons, not one of whom had I ever seen before. But Mr. Degner, one of the most heroic spirits, and the most cheerful under adversity that I ever knew, was not permitted to touch the ground; his friends bore him into the house with huzzas; we were all unceremoniously rushed into a room, and mixed in so much confusion, that I could scarcely distinguish myself from a German. A table loaded with refreshments, moved me still deeper, while one of their number sat upon the floor astride a beer cask, and filled the glasses as fast as they were emptied. Hungry and thirsty as we were, would not you have done as we did? I forgot my nationality, and if I had not broken away, I should soon have been able to talk German, although I did not get so far as to understand a word of it. Festivities were kept up till a late hour of the night, though, not having that elasticity of constitution that enables me to resist the fatigues of a long day's ride under a burning sun, seated on a box in the bottom of a wagon, I took an early opportunity to retire. Judge Behr, on his way to Europe, and myself, were entertained at the house of a gentleman, whose wife was a highly cultivated lady, but recently arrived; she spoke English very fluently, and their house was made my home during my stay. Their refined and generous hospitality will not soon be forgotten. It is but nine years since this colony was formed and deserted by the speculators, who had taken all their money, leaving them in a state of starvation and suffering, from which many perished, and at this moment they have a city, where there is more industry and comfort, and even luxury, than can be found in any place which I have visited in Western Texas. One of the many subterranean rivers of Texas bursts out about a mile above the town called Comal Springs, and unites itself with the Guadaloupe just below. In the afternoon of the next day, a procession was formed of the various singing societies forming the association, each with its banner, and preceded by a band of music, it marched out of town about a mile distant, to a hall built of stone expressly for the occasion, two hundred feet long, on the high bluff bank of the river. During the evening the hall was crowded, while each society took the stage in turn. After this was a collation, at which the whole company sat down, and about twelve o'clock, all but a few loiterers were gone. Three days were given to the festivities. The second evening was devoted to a ball, in the same place, the third to theatricals. The daytime was spent in social entertainment at private houses, and if I, a stranger, could be permitted to judge, by my own experience, there was much enjoyment.

Setting aside, if possible, for a short time the conceit that we are the greatest nation alive; that we have reached the highest attainment of moral and social development possible; that our political institutions do not admit of improvement; that for anything to be American is to be an example to all people for ever, there might be found much in the social life of the Germans to be imitated, which would soften our national austerity, that painful effort to be *respectable*, and teach us how to make use of the means in our hands to make ourselves and others happy. We are charged with being an avaricious people, who make it the chief object of life to get wealth, without knowing how to make use of it. If our social natures were better developed, it would effect a cure. Men persevere in getting rich, because they do not find enjoyment in any other way. They do not know how to be happy. Music with the German is the great smelting agent that softens all their cares, and fuses all classes into one democratic mass, and elevates them into a higher and purer life. Were they to abandon their "lager bier," the change would not be perceptible in that respect. We are accounted a democratic people, yet are we not ever on the watch to check any unwarantable encroachments on our dignity? We encircle ourselves in a halo of caste, and repel every one who approaches us without the proper credentials. This state of things will perhaps continue while we have menial classes amongst us; but while it does exist, we might find much to imitate in the German democrat. I have seen a world-renowned naturalist, an honorary member of European societies; a jurist from the highest judicial tribunal in his native land; a professor of her university; a priest from her altars; a secretary of the interior in the republic; the son of the prime minister of the crown; some as poor as the poorest, and others in possession of great wealth, all seated at one table with the peasant, and from their demeanor you could not tell the peasant from the prince—all melted and bowed before the majesty of song. There, too, was a professor of music, the composer of several operas, his hand hardened and browned by toil; an aged Anchises, whose heroic son had borne him from a patriot's prison, and was sharing with him his exile. Yet they were all in an ale house, each with his mug of beer. There were no low songs or vulgar stories, the usual accompaniment of the convivial gatherings of our most cultivated classes, when the ladies are absent. I saw no quarrelling or discourtesy. You may say that I have not an American heart. I have been frequently told that I was a foreigner.

Having an opportunity to return to this place on the second day of these festivities, I took a hurried leave of New Braunfels. Having a sick horse to travel with, we made but slow progress, and did not reach town till four o'clock in the morning, encountering one of those severe thunder-storms to which this country is liable. The wind and lightning were violent, tearing away all our shelter, and drenching us in rain.

J. D. B. S.

A Painful Scene.

A correspondent of the Boston *Journal* gives the following sketch of an incident that fell under his notice:—

As painful a scene met my view in the cars from Philadelphia to New York, as I had ever seen in my journeys. A *lady* and her husband came into the cars at the former place, and were seated near us—very respectable in appearance, and the lady, in particular, uncommonly interesting. After a little while I noticed a strange manner in the gentleman, which seemed to indicate he was *not in favor* of the Maine Liquor Law. At every place the cars stopped he evidently replenished the vacuum in his throat by a new drink, until he could not sit without help in his seat. He then rose hastily and went and opened the car door, and seated himself in it, with his feet hanging outside. His wife was much distressed, and tried to prevail upon him to come in, and he gave her a push which almost sent her to the floor. Two gents rose, and, with the aid of the conductor, he was helped in and placed in a reclining position on one of the seats beneath a window. He soon apparently fell asleep—and it was enough to break one's heart to see the attentions that that devoted wife lavished upon her senseless husband. She covered him up with her shawl, to keep the dust from making him uncomfortable; if his hands fell in an unpleasant position, she gently replaced them, and perhaps bedewed them with a tear. Before arriving in New York she seemed anxious to have him wake, and asked one of the gents to 'please wake him,' as it was a strange city, and she did not know what to do." Two or three roused him a little, and then she went to him with a sweet smile, and says: "We have got almost to New York, and I am glad, *you are so tired;*" and he *struck her in the face.* She had the sympathy of all in the car, I know, for there was many a moist eye among the ladies, and many a bitter look on manhood's cheek. Arrived in New York he would not leave the cars till he was ordered by the conductor; and her attentions in crossing the ferry were as assiduous as ever, and met with pushes and blows from her brutal husband. The last I saw of her she was in the station-house on the New York side, *begging* him to go and see to their baggage, and he answered her she was a fool—to mind her own business, &c. My traveling companion remarked, "That is womanly love, and when he *speaks kindly to her again, she will forget it all.*"

The Wadsworth Estate.

Correspondence of the Albany Journal.

Avon, August 7, 1855.

James Wadsworth owns about 8,000 acres of land in this town, as much more in Geneseo, about 6,000 in the adjoining town of Rush, 5,000 or 6,000 in the town of Caledonia, and a great many thousands in other towns in this and other counties. And it is nearly all good land—the best in the State—and constantly increasing in value. He doesn't sell, but is for ever burying. The effect is perceptible. There is a marked absence of rural taste, so generally inseparable from agricultural prosperity, and so important to domestic comfort if not to individual morality and happiness. While there is no large landholder in the world more liberal, wise or intelligent than Mr. Wadsworth, it would be far better for the country, and incalculably better for the smaller landholders, if the lands owned by him were owned by two hundred thrifty poor men, who would live upon their small farms and contribute to the general architectural, horticultural and educational improvement of the country. There is a melancholy absence of those substantial farm houses and tasty appurtenances so noticeable in other portions of Western New York. It is almost painful to look out upon the broad prolific fields which constitute one of the features of this magnificent valley, and find so few dwellings embraced in the view. It would be more picturesque, as well as more in accordance with what has been found to be most in harmony with the general good, were it otherwise. But, so long as this vast estate is in the hands of its present enlightened proprietor, there will be but little cause of complaint.

All of Mr. Wadsworth's land is rented, not leased, and rented for but a single year. This has been the rule since about 1840. Every lease is renewed every year—a rule which gives Mr. W. entire control of his property, and its cultivation and management. A shiftless tenant stands no chance for a re-lease. And not only is this rule strictly adhered to, but Mr. W. dictates the character of the crops to be sowed in the several fields of each farm—which shall be sowed to wheat, which shall be reserved for pasture, which allotted to meadow, &c., &c.—thus preventing any overworking of the land, or any deviation from what has been ascertained to be the best system of agriculture. The result is that these lands are among the best cultivated lands in all this well cultivated region, and uniformly yield as heavy crops as any other in this prolific valley.

The rents, as I learn from "old settlers," are as follows:—For the best wheat lands, eight bushels of wheat per acre; for other wheat lands, from five to seven bushels; and for lands used for meadows, spring crops, &c., from $2 to $4 per acre; and the land is eagerly sought for at these prices.

A Sad Case—Fruits of Gambling.

From the Albany Argus.

How irresistable, when once acquired, is the base passion for gambling. Few there are who, when once they hazard a sum, have courage and determination to throw off the spell that is upon them and thus save their fortunes and their respectability. And how many thousands there are who annually go down to ignominy, and perhaps death, through their insatiable desire to try again.

We have a case in point: Barnabas Bates, an aged, and in former years, an industrious, thrifty farmer, was yesterday, and the third time within a week, picked up in the street in a state of stupor. Upon searching him at the Station-house, fifteen blank lottery tickets were found in his pocket-book. He was placed in a cell, where he slept off the effects, of the liquor he had drunk, and when "sober reason had assumed her sway" he experienced the most poignant grief.

His story is a lamentable one. Bates married young, and for years cultivated a small farm three miles from Utica. He was industrious, honest, and courteous. Fortune smiled upon his efforts, and his labors were rewarded with bountiful crops. In time, he amassed a fortune—some $20,000. He was blessed with a goodly number of sons and daughters, and bid fair to go down to his grave in peace, but twelve years ago, he was induced to "try his luck," and purchase a lottery ticket. The passion once acquired, he could not stop, and from that day to this, he has been constantly gambling in lottery tickets—worthless bits of parchments. His farm, his wife and children are all gone. The farm for lottery tickets, his wife into her grave, and his children married and scattered in all quarters. He came to this city some two weeks since, having in his possession the last of his worldly effects. Yesterday the last penny was squandered, and he now stands a fair prospect of finding a home in the Penitentiary. He remarked to Chief Morgan yesterday, that he was a ruined man, that life was indifferent to him, and that he cared not what disposition was made with his case. "Yet," said the old man "I blame no one, 'twas all my own fault; I brought this on myself; I am 66 years old, and I know I hav'n't much longer to stay." What a lesson does the experience of this old man teach the rising generation.

Merit Appreciated by Russia.—The name of the head engineer at Sevastopol is Todleben. He is 32 years of age. His parents are poor shopkeepers in Riga. When the seige commenced Prince Menschikoff, it is said, asked the then head engineer how long it would take to put the place in a state of defence? He answered "two months." A young captain, named Todleben, stepped forward and said he would undertake to do it, if he had as many men as he required, in two weeks. He did it in twelve days, and was made colonel. Since that time he has had the direction of every thing in the way of building batteries, defences, etc. The other day the Grand Dukes called upon his wife, who is residing in St. Petersburg, to congratulate her upon her husband's promotion; for he is now General and Aide-de-Camp to the Emperor.

From the North British Review.

The Trifles of Life Important.

A well-dressed woman, however little she may be favored by nature, ceases to be plain It is difficult indeed to limit the extent to which a woman, by due attention to dress, may improve her natural attractions, or obviate the disadvantages with which she was born. And that it is her duty to do this, whether she be well or ill-favored, is something more than a maxim of mere worldliness. To endeavored to the utmost to please those with whom we live, is unquestionably a duty. Such habitual efforts to please constitute benevolence, and not of the lowest order.

Benevolence of this, as of every other kind, may run into excess. Our vices tread closely on the heels of our virtues. Indeed, there are few vices which are not virtues in excess. It is no argument against the practice of any domestic social amenity that it is liable to abuse. We admit at once, in the present instance, that it is only good in moderation. Over-dressing in any sense—whether with reference to an undue amount of time or of money expended upon it—is so obviously wrong that it is mere waste of time to enunciate the common place. We need not to be told that dress is a snare. It has lured woman ere now to destruction. But many a household wreck has been occasioned by the rocks which lie out in the opposite direction Many a home has been made miserable—many a domestic tie has been broken by an habitual disregard of "trifles." We use the word of common acceptance with people who are pleased to take what they call high ground, and to walk with their heads in *nubibus*, crushing earth's fairest flowers under foot. But it is hard to say what, in the daily and hourly intercourse of domestic life, is a trifle. The proverb—one of the best and truest ever coined—sayeth to us, "Take care of your pence and the pounds will take care of themselves." Take care of these minute fragments of domestic charity, and the great sum total of love and happiness will take care of itself.

There are women, severely virtuous, who argue that the love, which is in any way dependent upon such accidents as the handiwork of a dressmaker, the milliner, and the shoemaker, is of very little worth. They know that there are better things than dress, and qualities more estimable than skill in attiring and adorning one's self. They are conscious of being virtuous wives, excellent mothers, good economists, perhaps pious sisters and charitable neighbors. And they argue, that these are essentials for which they ought to be appreciated by their husbands. It may appear very shocking to say so, but we do say that the woman who takes that "high ground" is lost. Her domestic happiness is sure to be wrecked. A man is not necessarily a trifler who thinks that his wife's virtues are none the worse for a set of comely apparel. The greatest of our philosophical poets speaks of a "delight in little things" with feelings the very reverse of contempt. We cannot be always on the stilts. Men are of a mixed nature. They are not all good or all bad, all great or all little. It does not follow that they are incapable of lofty aspirations, because they have appetites and inclinations to which austere virtue may apply another epithet.

We may, perhaps, be accused of taking a very low view of domestic obligations and matrimonial duties, when we say that it is one of a wife's first duties to appear attractive in the eyes of her husband. But rightly considered, this obligation lies at the very root of connubial contract. We think we do not underrate the case when we say that—setting apart those unhappy connections which are formed from mere mercenary motives—in nine cases out of ten a man chooses a wife on account of something that in his estimation, or that at the time of choosing he fancies to be, personally attractive in the object of his choice. It may not be apparent to others, but it pleases him. He marries indeed for the sake of the "*domus et placens uxor.*" He does not take a woman to his hearth because she is a philosopher, or an arithmetician, but because, in homely language, there is "something fine about her." It was, doubtless, the design of the Almighty in giving man a helpmate that she should satisfy his natural craving after the beautiful, the graceful and the gentle. For this was woman formed—

"For softness she and sweet attractive grace."

The woman who forgets this, ignores one of the great objects of her creation. The wife who forgets this, violates one of the primal conditions of the connubial contract.

Keep Fruit Trees Straight.

Trees in an open exposure often acquire a leaning position from the prevailing winds. This should not be suffered beyond a certain stage of the tree. When as large as one's wrist, they should be set up erect, and, indeed, thrown into the wind at an angle of ten or fifteen degrees; in order to bring them ultimately into a straight position. This is best done by obtaining crotched limbs from the woods, eight to twelve feet long, and placing the butt end, which should be sharpened, on the ground, and the crotch end either against the trunk, immediately beneath the branching point, or against a large outer limb, if more convenient, securing it from chafing in the crouch, by a padding of straw, or litter, and setting the tree at once up to the desired angle of elevation. Loosen, also, the ground on the windward side of the root so that it will not bind, and the work is accomplished. Let this be done when the tree begins to make its summer growth, or soon after leaving out. One season, if the tree is thrifty, will be all that is required. If, however, it be obstinate, repeat the trial another year. The remedy is sure. Even large trees, which have acquired a permanent lean, may be thrown into an erect posture, by loosening the earth at the root, and occasionally cutting off an obstinate large root without injury to its growth, and thus be made sightly. An erect tree will be longer lived and more fruitful than a leaning one, and not half so subject to casualty as if left to its own guidance. [Ex.

A gentleman having occasion to call for Mr. Joseph Gullan, found him at home in his writing chamber. He remarked the great heat of the apartment, and said it was "as hot as an oven." "So it ought to be," replied Mr. G., "for it is here I make my bread."

Music by Steam.

A Yankee genius has succeeded in harnessing steam to a musical instrument in such a way as to secure perfect execution. The name of the inventor is Joshua C. Stoddard, of Worcester, Mass. The following description will give some idea of the possibilities of the invention:—

The instrument is of simple construction, and when once thoroughly put together, will seldom if ever get out of repair. It consists of a horizontal steam chest or cylinder, some six feet in length, and from four to six feet in diameter, which is fed with steam from the large boiler in the establishment where it is located. Upon the top of this cylinder is a series of valve chambers, placed at equal distances from each other into which the steam is admitted without obstruction. Each valve chamber contains a double metallic valve, with no packing, yet it fits so closely upon its seat as to allow no steam to escape.

To each of these valves is connected a very small piston-rod or stem which passes through the chamber and is operated upon by machinery without. Were it not for this stem, the valve would be simply a double balance valve and would remain stationary wherever placed, the pressure of steam being equal on all sides; but a part of one end of the valve being carried outside of the chamber gives it the self-closing power, which is the nicest part of the whole invention, and perhaps the best patentable feature. With a slight pressure against these rods, the valve is opened, and when the pressure is removed, it closes as quick as steam can act, which is not much behind electricity.

Directly over each of these valves is placed a common alarm whistle, constructed similar to those used upon locomotives, except that it admits of being raised or lowered, to flatten or sharpen the tone. These whistles are made of different sizes, so as to produce the desired tone corresponding with each note.

This completes the machine with the exception of a cylinder similar to those used in a common hand-organ or music-box, containing cogs which, when properly arranged, will, when turned by hand or otherwise, operate upon the valves in such a manner as to play any tune desired, by simply changing the position of the cogs, which are intended to be movable.

One of these instruments can be heard from ten to twenty-five miles on the water, and every note will be perfect and full. We heard the inventor play "Rosalie" on it, and it looked like "getting off tall notes" mechanically. This invention is so completely under the control of the operator that, were it arranged with a key-board similar to a piano, it would obey the slightest touch, and a child could play slow or quick tunes, every note of which might be heard several miles.

It is the design of the inventor to place these instruments upon locomotives and steamboats. It would appear rather novel to John Bull to hear "Yankee Doodle" from one of our ocean steamers as she was about to enter a British port, (say twenty miles,) and it would remind a Yankee of his jack-knife to hear "Sweet Home" from the same vessel on its return to New York or Boston. This invention, if it meets the expectations of most who have seen it, will alter the tone of public demonstration on important occasions very essentially.

When a statesman dies, our shipping in port will not only display their half-mast tribute, but every steamboat and locomotive in the land will be vocal with some appropriate dirge. On our nation's anniversary we shall hear—instead of the brutal roar of cannon—some spirited ode, with a "national air." It is not necessary for us to show in how many ways this new wonder may be made delightful, but we leave it to the imaginative mind to conceive of its application and its harmoneous beauty.

Innovations and Improvements.—We see it stated that they are making portable steam engines in Ohio, to be used for various agricultural purposes, such as threshing, winnowing, shelling, and grinding corn, &c. They are made at the Newark (Ohio) Machine Works, which, as we are informed, are managed mainly by men from Massachusetts, who do mechanical work in a manner superior to any that has hitherto been done in the West. The company commenced its building in May, 1854. It has been completed, and filled with machinery, made in this city and other parts of Massachusetts, which cost nearly $30,000; and already quite a number of stationary and portable steam engines have been manufactured and disposed of. It is also asserted that over fifteen thousand reaping machines have been manufactured and sold in our country the present year. The cost of the reaping machines amounted to nearly $2,000,000. Slowly perhaps, but surely, machinery is taking the place of manual labor on farms, and in a few years will supersede it wherever it can be employed to advantage. A few years ago all labor on farms was manual labor; now, however, nearly all labor, from watering flocks to gathering crops, can be performed by machines. The benefits resulting therefrom are not even foreshadowed at the present day, but as improvement advances, and the farmer has recourse to invention, so will his farm increase in value and his own labors be lighter. The days of "paring bees" and "husking bees" are passing away, and will soon occupy their places in the pleasant memories of the past. We always had a "peculiar attachment," as the pianists say, for "bees" of all kinds, not forgetting honey bees; and, though passing away, it is pleasant to know they give way to something better for the farmer. "O, the days when we went"—husking!

Some one has complained to Mayor Wood, of New York, that he had had a pair of fine patent leathers ruined by walking past the door of a champagne manufacturer. The favorite beverage is enlivened, it seems, by quantities of vitriol and marble dust, and the unfortunate gentleman stepped into some of the scatterings of these first principles of good wine, and thereby lost his boots. He is decidedly of the opinion that a substance which will eat up leather, must make sad havoc with the linings of live men.

The Bible Prohibited.—In the reign of Henry V. a law was passed, at the suggestion of the Roman Catholic priests, against the perusal of the Bible in English. It was enacted in the following words: "That whosoever they were that should read the Scriptures in the mother tongue, they should forfeit lande, catel, lif, goodes from theyre heyers forever; and so be condemned for heretykes to God, enemies to the crowne, and most arrant traitors to the lande."

New Steamboat Line for Albany and Troy.

From Pier 15, foot of Liberty-st., at 6 P. M.

STEAMER RIP VAN WINKLE, C. W. Farnham, Commander, Monday, Wednesday and Friday, at 6 o'clock, P. M.; steamer COMMODORE, L. Smith, Commander, Tuesday and Thursday, at 6 o'clock, P. M., and Sunday, at 5 P. M.

Fares: Saratoga, $1 50; Moreau, $2 15; Fort Edward, $2 15; Whitehall, $2 75; Castleton, $3 10; Rutland, $3; Burlington, $4; Rouses Point, $5 50; Montreal, $7 50.

These Boats will arrive in Albany or Troy in ample time to form connections with all the Railroads, North, East or West, enabling passengers to reach Montreal and intermediate points the same day.

These Steamers are of the first class for strength and speed—well known favorities of the public—having been thoroughly overhauled during the past winter, and offer every accommodation that can be desired by either freighter or traveler.

Through tickets can be obtained on board the boat for Saratoga, Moreau, Fort Edward, Whitehall, Castleton, Rutland, Burlington, Rouse's Point and Montreal

The Northern Freight Express will give Bills of Lading to all points as above named. Shippers who desire it, can have time receipts, by applying at the office on the Pier.

A. A. DYKEMAN.

Ayer's Pills.

A NEW and singularly successful remedy for the cure of all Bilious diseases—Costiveness, Indigestion, Jaundice, Dropsy, Rheumatism, Fevers, Gout, Humors, Nervousness, Irritability, Inflammations, Headache, Pains in the Breast, Side, Back, and Limbs, Female Complaints, &c., &c. Indeed very few are the diseases in which a Purgative Medicine is not more or less required, and much sickness and suffering might be prevented, if a harmless but effectual Cathartic were more freely used. No person can feel well while a costive habit of body prevails; besides, it soon generates serious and often fatal diseases, which might have been avoided by the timely and judicious use of a good purgative. This is alike true of Colds, Feverish symptoms, and Bilious derangements. They all tend to become or produce the deep seated and formidable distempers which load the hearses all over the land. Hence a reliable family physic is of the first importance to the public health, and this Pill has been perfected with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing any thing hitherto known of any medicine. Cures have been effected beyond belief, were they not substantiated by persons of such exalted positions and character as to forbid the suspicion of untruth.

Among the eminent gentlemen who have testified in favor of these Pills, we may mention:

Doct. A. A. Hayes, Analytical Chemist of Boston and State Assayer of Massachusetts, whose high professional character is endorsed by the—

Hon. Edward Everett, Senator of the United States.

Robert C. Winthrop, Ex-Speaker of the House of Representatives.

Abbott Lawrence, Minister Plen. to England.

†John B. Fitzpatrick, Catholic Bishop of Boston; also

Dr. J. R. Chilton, Practical Chemist of New York City; endorsed by

Hon. W. L. Marcy, Secretary of State.

Wm. B. Astor, the richest man in America.

S. Leland & Co., Proprietors of the Metropolitan Hotel, and others.

These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compounded not of the drugs themselves, but of the medicinal virtues only of Vegetable remedies extracted by Chemical process in a state of purity, and combined together in such a manner as to insure the best results. This system of composition for medicines has been found in Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any process. The reason is perfectly obvious. While by the old mode of composition, every medicine is burdened with more or less of acrimonious and injurious qualities, by this each individual virtue only that is desired for the curative effect is present. All the inert and obnoxious qualities of each substance employed are left behind, the curative virtues only being retained. Hence it is self-evident the effects should prove as they have proved, more purely remedial, and the Pills a more powerful antidote to disease than any other medicine known to the world.

As it is frequently expedient that many medicines should be taken under the counsel of an attending physician, and as he could not properly judge of a remedy without knowing its composition, I have supplied the accurate Formulæ by which both my Pectoral and Pills are made, to the whole body of Practitioners in the United States and British American Provinces. If however there should be any one who has not received them, they will be forwarded by mail to his request.

Of all the Patent Medicines that are offered, how few would be taken if their composition was known! Their life consists in their mystery. I have no mysteries.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject freely acknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many eminent Physicians have declared the same thing of my Pills, and even more confidently, and are willing to certify that their anticipations were more than realized by their effects upon trial.

They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.

Prepared by Dr. J. C. AYER, Chemist, Lowell, Mass. Price 25 Cents per Box. Five Boxes for $1 00.

Sold at wholesale in New York by A. B. & D. Sands retail by Rushton, Clark & Co., and by all Druggists, everywhere.

The Sabbath Recorder,
PUBLISHED WEEKLY
By the Seventh-day Baptist Publishing Society,
AT
NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the time to which they reach.

☞ No paper discontinued until arrearages are paid, except at the discretion of the publisher.

☞ Communications, orders, and remittances, should be directed, post paid, to

Geo. B. Utter, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

"STATE OF THE DEAD"—NO. 8.

The Resurrection.

Bro. B. seems to think my insinuations respecting the resurrection have given my brethren a right to know how I stand; as though, for one to call in question a commonly received opinion subjected him to an arraignment before his betters. It has been my misfortune (perhaps) to insinuate that the "commonly received faith of Christians respecting" Sunday, sprinkling, &c., was not founded in truth; and it is not impossible but that the "commonly received faith of Christians respecting" the resurrection may be somewhat erroneous. At any rate, I am sure that no such definiteness has yet obtained concerning the resurrection, as to forbid one's exercising his own honest opinions as to what he believes the Bible teaches on that subject. Yet I suppose the *more* commonly received opinion is the resuscitation or revivication of our natural bodies. This I understand to be Bro. B.'s view, for he says, "that the resurrection is ordered, not to render it possible for God to recompense his creatures, but in order that soul and body may be rewarded together." See Feb. 15th. Now, from what he says, April 15th, it is evident, that by "the body" he means the material body in which the soul now dwells. There he says, "The *body* of itself neither transgresses a law nor obeys it. It is not a subject of sin, nor of holiness. It is a mass of matter merely." Again he says, "How could the body be punished for its transgression, in the future world, *if it should never reach that world?*" [*Note*, Bro. B. says the body of itself neither *transgresses* a law no obeys it, and yet he now asks how the body can be punished for its *transgressions*. Does that "display good tact?"] The body, then, which Bro. B. refers to, and which is to be resurrected, is this natural body, "a mass of matter merely, not a subject of sin or holiness, and no more accountable than the brute that perisheth."

Mr. Hody, a writer on the resurrection, says:

> "The body is not capable either of sinning or doing well. It is only the instrument of the soul; and the *arm that stabs sins no more than the sword;* it is the *soul* only that is the *murderer. Neither is the body capable of rewards and punishments.* If it be injustice in God to punish the soul alone without the body, in conjunction with which she committed the sin, then all the matter which constituted the body when the several sins were committed must be raised again, and be reunited to the soul. For, if *some*, why not *all?* But what *monsters* of men should we be in the resurrection, *if all the substance* of which our bodies consisted, from our childhood to our death, should be gathered together and formed into a body."

Dr. Young evidently supposed this natural body would be raised; for he says:—

> "Now charnels rattle; scattered limbs, and all
> The various bones, obsequious to the call,
> Self-moved, advance; the neck, perhaps to meet
> The distant head; the distant legs the feet:
> Dreadful to view. See through the dusky sky
> Fragments of bodies in confusion fly."

Now, if the body is to rise again, the above must be literally true. For it often happens, that one's limbs may be buried on one continent, while the head and trunk are on another. Yet, speaking of Pompey's head, which was carried to Cæsar, the poet says:

> "This severed head and trunk shall join once more,
> Though realms now rise between, and oceans roar."

But a difficulty has arisen among the believers in the resurrection of the body, viz: whether the resurrected body is the one that was buried, or some of the many atomic bodies which the individual had while on the earth. Says Dr. Watts:

> "All the atoms that ever belonged to the animal body of Methuselah in 969 years would make a most bulky and disproportionate figure at the resurrection. The antediluvians would be raised as giants, in comparison of us. All the same particles, even of the body when it died and was buried, can hardly be raised again, and united to the soul of one man; because several of the particles that made one man's body at the time of his death, are very probably turned to grass or plants, and so become food for cattle or other men, and thus there might be great confusion. Besides, here is one man died of dropsy, or excessive fat; must he be raised in that unwieldly bulk? Another was worn out to a mere skeleton by consumption; must his body be of this withered shape? Others, from their birth, were defective or redundant, and in these cases must not some particles be left out or added in the resurrection to form a proper body?"

Others suggest the case of infants who die previous to or soon after birth. There have been various ways by which the above difficulties have been met, but none more reasonable, perhaps, than that fiction of the Jewish rabbins, viz: "That there is in the back of every Israelite an indestructible bone, called Luz, and in whatever part of the world a Jew may be buried, this aforesaid bone makes its way through the bowels of the earth, and will at last emerge and expand into a perfect Jew again in the land of Canaan."

One object of the above remarks and references is to call the reader's attention to the fact, that discrepancies of opinion exist as to how the body will be raised, and with what body it will come forth, as Bro. B. seems to think my "insinuations" are somewhat startling.

It will be remembered, that the reason assigned by Bro. B. for the resurrection of the body in a miraculous manner was, not because the soul could not be fully recompensed without such a resurrection, (for that he admitted, and maintained that the soul was *recompensed according to the course of nature,*) but that the soul and body might be rewarded together. (See Feb. 15th.) In April 5th, it will be seen, that Bro. B. says this body is a mass of matter merely, incapable of sin or holiness, and unaccountable as a brute. Admitting the above to be correct, I ask, can it reasonably be supposed, that, after the soul has been receiving its recompense in eternity for ages, "according to the course of nature," and through its "natural capacity of being rewarded, in the way in which God recompenses his creatures" according to the course of nature," that a mass of matter which never sinned, and which has no more accountability than a brute, will be raised up, and the happy soul in heaven, or the miserable soul in hell, be made to enter it, and all for no other reason than that this mass of matter may be rewarded, although it never sinned, nor was holy, and is as unaccountable as a brute? From this fact, then, I think, a strong argument is drawn, that this body will not be raised. If the soul has natural capacities for receiving its full recompense in a future state, *without the body*, (as Bro. B. admits it has,) of what use can such a body be? If Bro. B. had maintained the resurrection of the body as necessary to the complete or more full enjoyment or suffering of the soul, there might be a show of reason. But this he denies, and maintains the resurrection of the body as *not* necessary in order to render it possible for the soul to be fully recompensed, in a future state. Therefore, according to his views, it seems to me that any such resurrection as he holds is altogether extraneous and useless. For, of what possible use can it ever be to punish forever a mere mass of matter, that never sinned and is unaccountable as the brute? If it be said, the body was an instrument the soul used to accomplish its purpose, I answer, so was the revolver, dirk, and sword. The reason, therefore, which Bro. B. assigns as the reason why the body should be raised, is not a valid one. If so, then the body will not be raised, I think.

Another reason why I differ from Bro. B. is, that I do not find the resurrection of the body very definitely taught in the Bible. I once supposed that the phrase *resurrection of the body* occurred frequently in theScriptures. But, to my surprise, I can find no record of it, any more than I can of a first-day Sabbath.

The celebrated John Locke, who has universally been acknowledged as a "*true* Christian," says:

> "*I do not remember any place where the resurrection of the same body is so much as mentioned;* nay, which is very remarkable in the case, I do not remember, in any place of the New Testament, (where the general resurrection of the last day is spoken of,) any such expression *as the resurrection of the body,* much less *of the same body.*" . . . . . "Finding no such express words in Scripture, as that, '*the body shall rise, or be raised, or the resurrection of the body,*' I shall in the next edition of my book change those words to the '*dead shall rise!*'"

It seems to me, therefore, that if our natural bodies were to be raised, such an event would have been taught explicitly, in so many words.

Mr. Locke shows that *necroi* (the dead) being in the masculine gender, and *somata* (bodies) being in the neuter, could not agree with each other, according to the law of the Greek language. And is it not remarkable, that the New Testament writers were never betrayed into the use of *necroi somata* (dead bodies) but always speak of the resurrection of the *necroi* (dead,) not necroi somata (dead bodies?) Paul says, "How are the *necroi* (dead) raised, and with what *somati* (body) do they come." Not, how are the *dead bodies* raised, and with *what bodies* do the *dead bodies* come? Is it not evident, then, that the resurrection is a resurrection of the *dead*, not of the dead bodies?

Job 19: 26, 27, is often adduced to show that Job believed in the resurrection of the body. But Dr. Barnes, author of a commentary on the Bible, says concerning this passage, "I confess that this passage has no reference to the Messiah and the doctrine of resurrection." Dr. Dwight says, "that the Greek word *anastasis* (resurrection) denotes our existence beyond the grave, and should not be rendered resurrection." He says the following passage should be thus rendered: "Then came to him [Jesus] the Sadducees, who say there is no resurrection, *me einai anastasis*—no future state or future existence of mankind. In the resurrection, *in the future state.*" "This passage (adds the Doctor) determines the meaning of anastasis, beyond dispute. Those who die live after death, and this future life is the anastasis." The Doctor says that the subject treated of by Paul in 1 Cor. 15th, is the *anastasis—man's future existence;* therefore it is not the resurrection of the body.

From all of the above reasons, and many more might be added, I am of the opinion, that the Bible does not teach the *resurrection of the body*. Yet as firmly as any other man do I believe it teaches the *resurrection of the dead.* With Paul, I believe there *is* a natural body, and there *is* a spiritual body—the one embodied within the other. A natural body is sown, but a spiritual body is raised; that as the kernel of corn contains an embryotic germ from which arises the future stalk (or its anastasis,) so in a similar manner there is within the material body of all intelligent beings a spiritual germ, from which arises (at least) the basis of the resurrection body—the anastasis—man's future existence. As the kernel of corn is not quickened except it *die*, so man's spiritual nature is not fully developed until his mortal dies. As the embryo of his natural body was conceived and concealed within the womb of its mother, so the embryo of his spiritual is conceived and concealed within its proper receptacle, the natural body. Mankind are to have a spiritual as well as a natural birth; hence a natural and spiritual body. The natural world produces the one; the spiritual world the other.

"Tertullian affirms, that the *soul is a body*, and that even God is a body; for that what is not a body, is nothing. Hence he considers the soul to be in a human form." (See Essay by Rev. A. Clissold)

Theodotus says, "The soul also is a body; for the Apostle says it is sown a natural *body*, and it is raised a spiritual *body*. But how can *souls*, which are punished, feel, if they are not *bodies?*"

Macarius—"Each one according to his nature is a body, whether angel, soul, or demon."

Methodius—"The *souls* created by the Creator are intellectual *bodies—have the same form* with the outward body. When in hades Lazarus and the rich man had tongues, fingers, and other members."

Cudworth, in his Intellectual System, says, "That souls at death are not stripped naked of all body, but have a spirituous body, is a thing not so expressly decided inChristianity." He adds, "It is not conceivable how souls after death should know and be knowable, and converse with one another, and have any punishment or sense of pain inflicted on them, were they not vitally united to bodies."

Irenaeus maintained, not that the soul is a body, but that after death it was still united to a body of the same form and figure with that which it had in this life. Origen held the same. From what I can learn, Augustine, Baxter, Lord Bacon, and many others, held nearly the above views also.

The argument I deduce from the above is, that as the soul of itself is either a spiritual organism in the form of the human form, and as such appears in the spiritual world immediately after natural death, or as it enters a spiritual body (its house from heaven) at that time, and is therefore fully capacitated for perfect enjoyment or misery; that therefore there exists no good reason for the adjunct of a mass of matter, the natural body.

Another evidence that the soul possesses a human form, or passes into a spiritual body immediately after natural death, is, that when the dead have been seen they always appeared in the *human form.* The case of Moses and Elijah on the mount of transfiguration; the ancient prophet which John saw in the visions of Patmos. Angels also, always have appeared in the human form. Lazarus and the rich man had the human form. Abraham had a *bosom* in which Lazarus reposed. Millions of spiritual beings have been seen by mortals, and not one of them but what had the human form. And even when Jehovah made his most perfect revealment of himself, he appeared in the human form. Paul, on his celestial tour to paradise and the third heavens, heard *words*, which always require a *mouthpiece.* In fact, I doubt whether it is possible to think of intelligence acting, except we connect it with an organism, and that too of human shape. I think it was Bishop Pearson who said: "We cannot reflect upon God without involuntarily supposing some likeness of Him which is appropriate to our limited conceptions." I suppose God to be essential form, not organism; essential form is life itself, whereas organization is a recipient of life. Hence the difference between the Creator and the creature. Hence the soul must be an organism, and as such I believe it to possess the human form, in which form it is born or developed at death.

Says Habough, in *The Heavenly Home,* "We seek the germs of the future life in the present life. In like manner do we seek the attributes and capacities of the future body in that body which now envelopes our life. All decay is but the manifestation of a hidden life, throwing off its rougher limitations, that it may grow into perfect freedom. Beneath death, there is a deeper life. Life is older and stronger than death, and hence ever seeks to surmount it. Death is only death viewed from the earthly side; *as viewed from the heavenly side, it is birth.* Death is ever swallowed up in victory; and that life which secures this victory is ever to be recognized, in its incipient attributes, in the midst of that decay and death which the evolution of life produces. This is richly taught, both by analogy and by scripture. It is change, but is it death when the golden-winged butterfly escapes from the worm-formed larva, and soars through the skies? It is death to what was in reality *death before, not to anything that had life;* for the *chrysalis* was *not* life, but only the *covering of life.* In like manner we say it is change, but is it death when 'this *earthly* house of our tabernacle is dissolved?' As the *germ* emerges in vigor and in beauty from the bosom of the *rotten seed*, so there arises ever out of *decay* the joyous infancy of *immortal life.*"

The true doctrine of the resurrection seems to me to embrace the following mentioned facts:—

1. The dissolution or death of the present natural body, and its return to its original earthy element. Dust it is, and unto dust it will return. That which is sown is not quickened except it die; and that seed, or body of the germ to the new plant, is not the seed or body which is to be. The seed dies, and is resolved into its elemental state, but its death is the eventful moment when the life germ springs forth, and its *anastasis*, resurrection, is begun. So the body now holds subject to the law of natural life the spirit which inhabits it, which spirit is not quickened into its true activities until the body dies. But when natural death ensues, the spirit germ, bursting its aurelia, the body, gives birth to an immortal.

2. The relation of evolution of the present body to the future. "Thou sowest *not the body that shall be.*" This declaration of the Apostle is a death blow to the idea of a resurrection of our natural body. Death is change by evolution. The new plant is not the old grain, nor the new grain the restoration of the old grain after its dissolution into the original elementary substance. So also is the resurrection of the *dead.* The resurrected body is not the old body revivified and reconstructed, but it is one evolved out of it. "As regeneration does not destroy the old man, but perfects the new man under cover of the old till the old passes away in the power of the new, so the new resurrected body is evolved from the womb of the old. Thus the body which dies is not the body that shall be, no more than the dying grain is the future stalk or the future grain." *(Heavenly Home.)*

[illegible] stop, for Bro. B. will begin to think "the portals" of my articles will exceed the dimensions of the house. I trust I have enabled "my brethren to know how I stand in this respect, and whither I am leading the lambs of my flock." If "the commonly received faith of Christians" embraces the resurrection of the body we now have, I insinuate it is not founded in fact. I may be mistaken and in error. If so, many other "true Christians" were, and many now are, in error also. I expect soon to know, by experience, the truth on this subject. Soon I expect to "put off this earthly house of my tabernacle," and put on or enter into a building of God, an house not made with hands—not that I would be *unclothed*, but clothed upon, that I be not found naked. For in this (body) I groan, earnestly desiring to be clothed upon with my house which is from heaven.

S. S. GRISWOLD.

THE SPHERE OF WOMAN.

The sceptre of empire is not the sceptre which best befits the hand of woman; nor is the field of carnage her field of glory. Home, sweet home, is her theater of action, her pedestal of beauty, and throne of power. Or, if seen abroad, she is seen to the best advantage when on errands of love, and wearing her robe of mercy.

I would not, if I could, persuade those of the sex who hear me, to become the public, clamarous, advocates of even temperance. It is the influence of their declared approbation, of their open, willing, visible example, enforced by that soft, persuasive, colloquial, eloquence, which, in some hollowed retirement, exerts such controlling influence over the hard heart of man; especially over a husband's, a son's, or a brother's heart; it is this influence which we need; an influence chiefly known by the gradual, kindly transformation of character it produces, and which, in its benign effects, may be compared to spring's noiseless, balmy advances; spreading renovation over every hill, and dale, and glen, and islet, and changing, throughout the whole region of animated nature, winter's rugged and unsightly forms into the forms of vernal loveliness and beauty.

No, I repeat it, I would not, if I could, persuade those of the sex who hear me, to become the public, clamorous, advocates of temperance. It is not yours to wield the club of Hercules, or bend the bow of Achilles. But, though it is not, still you have a Heaven-approved theater of action. The look of tenderness, the eye of compassion, the lip of entreaty, are yours, the omnipotence of fashion. You can, therefore—I speak of those who are the favorites of fortune, and who occupy the high places of society—you can change the terms of social intercourse, and alter the current opinions of community. You can remove, at once and forever, temptation from the saloon, the drawing-room, and the dining-table. This is your empire, the empire over which God and the usages of mankind have given domain. Here, within these limits, and without transgressing that modesty which is Heaven's own gift, and woman's brightest ornament, you may exert a benign and kindly, but mighty, influence. Dr. Nott.

I HOLD STILL.

FROM THE GERMAN OF JULIUS STURM.

BY CHARLES T. BROOKS.

Pain's furnace-heat within me quivers,
God's breath upon the flame doth blow,
And all my heart in anguish shivers
And trembles at the fiery glow;
And yet I whisper—As God will!
And in His hottest fire, hold still.

He comes and lays my heart, all heated,
On the hard anvil, minded so
Into His own fair shape to beat it,
With his great hammer, blow on blow;
And yet I whisper—As God will!
And, at his heaviest blows, hold still.

He takes my softened heart, and beats it,
The sparks fly off at every blow;
He turns it o'er and o'er, and heats it,
And lets it cool, and makes it glow;
And yet I whisper—As God will!
And, in His mighty hand hold still.

Why should I murmur! for the sorrow
Thus only longer lived would be;
Its end may come, and will to-morrow,
When God has done his work in me;
So I say, trusting—As God will!
And, trusting to the end, hold still.

He kindles for my profit, purely,
Affliction's glowing, fiery brand,
And all his heaviest blows are, surely,
Inflicted by a Master hand;
So I say, praying—As God will!
And hope in Him, and suffer still.

EPITAPH ON VOLTAIRE.

Soon after the death of Voltaire, it seems that his friends and admirers, such as Diderot and D'Alembert, and others of the atheistical clique, were making strenuous efforts for a subscription to a monument to be erected to his memory. About that time, there happened to be a distinguished literary gentleman from England sojourning in Paris. It occurred to the junto, that he would be a suitable person to write the epitaph. They accordingly solicited one from him; which he promised to write, and send to the President of the club at their next meeting; when they doubtless discovered that they "got more than they bargained for," by "waking up the wrong passenger." It was as follows:

Here lies Voltaire:
Who in Poetry was great, in History little,
Still less in Philosophy, and in
Religion, nothing at all.
His Wit was acute, his Judgment precipitate,
His Dishonesty extreme:
Silly women smiled upon him,
The Profane patronized him,
The half-learned applauded him:
And although he spared neither God nor man,
Yet a junto of Atheists,
Who call themselves Philosophers,
And raised this Stone to his Memory.

DISCOVERIES IN SYRIA.

The lecture-room of the Royal Institution was never more crowded than on Friday evening, the last lecture evening of the season, on which occasion Prince Albert honored the meeting with his presence, to hear Colonel Rawlinson describe some of the results of his recent excavations in Assyria. Colonel Rawlinson stated that he had been pursuing his investigations according to instructions from the British Museum, for three years, extending the field of operations opened by Mr. Layard over a tract of nearly two thousand miles of a country, along the Euphrates and Tigris to the Persian Gulf. The excavations made at different points of this extended area have brought to light relics of the most interesting kind, far surpassing in antiquity the Ninevah marbles of Mr. Layard, and comprising a number of tablets and cylinders with written inscriptions which tend to throw much light on several doubtful portions of ancient history. The oldest relic was an earthernware slab, or brick, from a temple built 2,000 years before the Christian era, impressed with the name of the king who reigned in Chaldea at that time. Colonel Rawlinson explained that the kings of Chaldea and Assyria exercised the exclusive right of having their names impressed on the bricks used in building, and that by these means, aided by the inscriptions found in the temples, he was enabled to ascertain with considerable accuracy the periods at which the temples had been built. Some stone carvings, excavated from buildings the dates of which were thus ascertained to belong to a period at least 800 years before the birth of Christ, are of a character far superior to any of those of more recent date excavated by Mr. Layard, especially the figure of animals in hunting scenes. In addition to the carvings on flat slabs, there were found several smalls models of animals, some of which were exhibited on the lecture-table, which were executed with great skill, and they are in as perfect a state of preservation as if they had been recently done. Among the most interesting records of those ancient times are the tablets and cylinders, with written inscriptions on the surface, most of which Colonel Rawlinson has been enabled to decipher. A tablet extracted from one of the temples built by Nebuchadnezzar was shown, the inscription on which was in very small characters, and was translated. After stating the circumstances under which the temple was built, and lauding the works and greatness of the King, the tablet contained some passages which Colonel Rawlinson thinks allude to the insanity of Nebuchadnezzar, and his recovery; but that part has not yet been clearly deciphered. Among other curious relics shown to the company were two earthenware cylinders, taken from a temple a few miles from the site of ancient Babylon, which had been supposed to be the remains of the Tower of Babel, and a view of which is given in pictorial Bibles. A French commission had been sent to examine the lofty mound, and excavations were made in it without any result; but after the French commissioners had abandoned the enterprise, it was resumed by Colonel Rawlinson, who succeeded in extracting the cylinders, from the inscription on which it appeared that it was a temple to the seven spheres, which had been built about 400 years before Nebuchadnezzar's reign, and restored by that king. Colonel Rawlinson said that the inscriptions contained on the tablets he had excavated tended to reconcile the discrepancy between the Greek historians and the Bible history respecting Belshazzar. The name of Belshazzar is not mentioned by the Greek historians, the Babylonian king conquered by Syrus being called by them Nabonadius; but it appears from some of the excavated inscriptions that Belshazzar was the eldest son of Nabonadius, that he most probably shared the throne with his father. One of the remarkable relics shown by Colonel Rawlinson was a large piece of polished ivory engraved with mathematical symbols, so small as to require a powerful lens to distinguish them, and it is conjectured that the engraver must have been assisted by a lens in working on so microscopic a scale. The experience gained by Colonel Rawlinson during his researches enabled him to ascertain the exact positions in which the cylinders having the inscriptions were deposited in the temples, and the Arabs who worked under him attributed this power to necromancy, and the needle compass he consulted was viewed by them as a talisman, so that when the Colonel arrived at Bagdad he was besieged by applicants for information where lost property was to be found.

FREE CHURCH OF SCOTLAND.

Correspondence of the Independent.

One of the most influential gatherings of ecclesiastics in Great Britain is the Annual Assembly of the Free Church of Scotland. After an exciting session of twenty days, the Assembly for this year has just closed its deliberations. Dr. James Henderson, of Glasgow, occupied the moderator's chair; and with mingled kindness, decision, and dignity, he succeeded in controlling the disturbing elements which have been for some two or three years at work in this Church. Special meetings for prayer were held at several of the diets prior to the discussion of those questions concerning which eminent ministers of the Free Church have held divided opinions; and in answer to prayer the blessings of the Head of the Church descended upon the Convocation. The dangerous crisis is over, and the vexed and vexing questions settled on a safe basis. Nevertheless, it was a painful spectacle to behold those who fought side by side the ten years' battle which ended in the disruption of the Scottish Church in 1843, turning their powerful talents against each other. Drs. Cunningham and Begg have most vigorously and bitterly assailed Dr. R. Buchanan and Dr. Candlish for their general policy and measures; who, in [illegible] defend themselves. The two topics that have led to such unseemly strife have had relation to the Sustentation Fund, and to colleges.

Dr. Cunningham succeeded Dr. Thomas Chalmers as the Principal of the Free Church College, Edinburgh, and has all along strenuously contended for *one* magnificent central institute of sacred learning; but Dr. Candlish, and the majority of the ministers and elders of the Free Church, have given their preference to a plurality of theological halls. In the first instance, provision for the training of divinity students was craved for Aberdeen, and as Dr. Cunningham's chief argument against more than one college was the inadequacy of the annual college collection to meet the additional expense, some generous laymen in Aberdeen subscribed an amount of money sufficient to endow two professorships, thus cutting away the ground on which Dr. Cunningham stood. The Assembly, therefore, by a most decisive vote, has founded a college at Aberdeen, with three professors, Dr. Patrick Fairbairn, author of "Typology of Scripture" and "Commentaries on Jonah and Ezekiel," being Primarius Professor. Nor is this all; for before the Assembly broke up, a request was made on behalf of the city of Glasgow for a third college. Dr. W. Clark, of Moffat, a retired physician, made the munificent offer of £20,000, if the merchants of Glasgow would contribute a second £20,000, for the founding of an endowed college in their city. Seven of those princely merchants immediately came forward with the money, providing in this way £40,000 or $200,000 for the endowment of this third Free Church College; and the Assembly, to the mortification of Dr. Cunningham, (who predicts all kinds of disaster,) by a still more decisive vote, has instituted the Glasgow College, with four professors.

The Sustentation Fund for the support of the ministry is peculiar to the Free Church, all the congregations, rich and poor, making their weekly collections, and pouring them into a central fund, when at the end of the year an equal dividend is made, and all the ministers share and share alike. Although this fund has been eminently prosperous, Drs. Cunningham and Begg have, since the controversy on college affairs commenced, assailed the management of this fund, more, an onlooker would conclude, because Drs. R. Buchanan and Candlish are the leading members of the Committee of Management, than for any other reason. This year the revenue of the fund is £98,971, yielding an equal dividend of £132 to each of the 700 ministers of the Free Church. Last year the equal dividend was £119, giving an increase of £13 on the present year compared with the last. And this year a wealthy member of the Free Church has added £10 to the equal dividend in all cases where the congregation of the minister has not been able to supplement the sum allotted from the central fund. Most of the rich congregations give a supplement, raising the stipend up to £3, £4, £5, and in some cases £600. And besides, every minister has his manse provided for him. So that it appears that the *minimum* income of the ministers of this Church is for this year £142 or about $700, and a house to live in rent-free. Is not this an example for all other Christian churches?

STANDARD OF EXTRAVAGANCE.

(Concluded.)

It is not the wearing of rich clothing, or the accumulation of things of an ornamental kind, in the shape of jewelry, tapestry, paintings, statuary, and the like, that is sinful in the sight of God; but it is the *state of mind* with respect to such things. If the possession of such things is regarded as the great end of life—if, to acquire them, one neglects weightier matters, or indulges in them at the expense of Christ's cause—or if one considers himself a whit better because these things are bestowed upon him, or looks upon others as any worse for the lack of them—if his self-importance is swelled on account of his possessions, and he looks upon those whose poverty obliges them to move in a humble sphere with disdain, or treats them with haughtiness, and will not associate with them, however great their moral worth—then he indulges in a state of mind which is highly offensive to the Almighty.

A man is no better for his rich clothing and his ornaments, neither is he any the worse for them. A woman is no better for her velvets and jewelry, neither is she the worse. And on the other hand, a person is no worse for his poor clothing, his plainly furnished cottage, and his frugal table, neither is he the better for them. These things are nothing, in themselves; it is only in the use made of them, as they affect the condition of our hearts, that they can be matters of any importance.

It is by no means a necessary consequence, because a person is furnished richly with the good things of this life, that he is proud, lifted up, worldly-minded. The inspired caution, "If riches increase, set not your heart upon them," shows that there is, at least, a *possibility* of living in the possession of earthly good without having the heart carried away by it. And we are much mistaken, if we have not seen some pretty tall specimens of piety among persons, whose equipage was considered by many of their neighbors as bordering somewhat upon the luxurious. Does not God know how to school his children? If he has chosen some of his people among the wealthy, does He not know how to render them humble, meek, and Christlike, without stripping them of their equipage? Is He so straitened, that He can find no way of weaning them from the love of the world, without clothing them in sackcloth and feeding them on bread and water? Granting, that the possession of earthly comforts, in any abundance, is attended with danger, by reason of our natural proclivity to sinful lusts, it is very uncharitable to suppose that every one who is possessed of them is carried away with the love of them. God adopts various methods to purify his people, and if He finds those of them to whom He has given wealth disposed to forget Him, it is not difficult for Him to send upon them some visitation, which will remind them of their duty, and keep them as humble as the poorest classes.

That some wealthy professors of religion do abuse what is bestowed upon them, must be admitted. It is a lamentable fact that there are so many, who not only possess the luxuries of life, but carry themselves with respect to them, as though they considered their importance increased by them, and that the enjoyment of them is the principal object of life. Their conversation, as well as their behavior, shows that they have very little heart for any thing else. But is it not also a fact, that the same state of mind obtains with a large class of poor people? Else, why do they murmur so much because of their want of these things? Why do they show so much discontent with the situation in which Providence has placed them? Why does it mortify them so greatly to have a person of wealth enter their dwellings, and behold their humble style of living? Why cannot a wealthy person call on them, and partake of their humble fare, without being overwhelmed with a profusion of apologies for the poor style of the entertainment? Why is he so often greeted with, "I'm sorry that we have nothing better to set before you; no doubt you are unused to such poor fare," and a thousand similar unnecessary apologies, till he is made to feel absolutely uncomfortable, when otherwise he would have enjoyed himself well? What do such complaints and apologies spring from but a feeling, on the part of those who make them, that wealth and its attendant luxuries are, after all, of considerable importance? The truth is, that the poor, though they are compelled to forego the enjoyment of luxuries, do nevertheless long to have them, fret themselves because they cannot have them, and manifest, in this way, exactly the same state of mind with regard to them which those do who, possessing them, make no secret of displaying their fondness for them. And while this state of mind is indulged, we do not suppose that they are any better, in the sight of God, than are those who have the most ample means of gratifying their desires, and accordingly do so.

What we have written, will not, we think, be looked upon as intimating that what is called "a good appearance" is a matter of any great importance. We have written from other motives. We have known many unkind things to be said of those Christians, who thought that their station and circumstances justified them in the use of costly apparel, and other things which are merely ornamental. We have known them to be subjected to much inconvenience, on this account. We have known the most unjustifiable censures to be cast upon them, and their kindness and good will repudiated, when they would have cheerfully devoted themselves to the good of society. Such has been the envy with which they have often been viewed, that however earnest they were to join their fellow-Christians, of a humbler sphere, in works of usefulness, they were hindered at every step, and the most unworthy motives were attributed to them. Let such things cease. The Christian sister, to whom God has given wealth, may array herself in silks, and the ornaments of civilized life may constitute no small part of the furniture of her dwelling; yet she may not have her heart set upon these things at all; and when seated in the sanctuary by the side of her poor sister, whose clothing is scanty and faded, may not think of the difference between them. T. B. B.

MISSIONS IN THE WEST.

The great labor assigned to the disciples of Christ is to carry forward the mission which he established. And when we consider the glorious object contemplated in that mission, and behold the cheering success which has ever attended its faithful laborers, what devoted child of God can withhold an effort for want of encouragement? Not only is the missionary urged forward by past success, but the brightening prospects before him, and the increasing calls for his labors, give him no desire for rest, or time for indolence.

Among the many fields which are now ripe for the harvest, we recognize the great Valley of the West. As in many other missionary fields, the laborers here are few, yet perhaps no other place holds out more hopeful rewards for well directed effort than does this. The society is new, unorganized, and in a formative state. Immigration is rapidly going on, and new settlements being made. The settlers are mostly from those sections of the East where a bare livelihood could only be gained by untiring industry. With habits thus formed, they very soon secure a comfortable home, and enjoy a degree of independence. The connections which had previously bound them to the strong holds of conservatism are now broken, and they feel more at liberty to investigate and adopt what seems to be right. And having recently left cultivated circles, they have a strong desire for re-established society, with its church and school. There are many large tracts of the Mississippi Valley populated from different European nations. These foreigners are comparatively free and open for religious instruction. No sooner has the light of true religion shone into their hearts, than they [illegible] its warm advocates. Through their private correspondence, a strong religious influence is brought to bear upon their native societies in the old country. Thus is the seed of truth carried to regions beyond.

If we mistake not, this field offers peculiar encouragements to us as Seventh-day Baptists. We have already several flourishing churches within this great Valley. The early settlers in these societies have established an energetic and enterprising character, which is felt and acknowledged by all who know them. Where but a few years ago the wild savage held undisputed control, we may now behold, at a single view, the inviting harvest waving over thousands of acres, the village church statedly unfolding its doors to the people, the stately institution offering its ample facilities to every faithful student. Do you inquire for the pioneers? Though they come here in middle life, seeking homes for their children, yet they "still live," and are wrapped up in the interests of improvement. But now, since these few efforts have been so wonderfully blessed, we are called upon to extend the work "into regions beyond." Little bands of our brethren have gone out still farther into the wilds of the West. They are struggling, with strong hearts, to maintain the truth, and to establish religious society. A little assistance by way of missionary labor, would greatly encourage and strengthen their hands. Thus a self-supporting church would very soon be established, ready and able to give assistance to others. If we might be allowed to judge of the future by the past, with the same facilities and like efforts, ten years hence, where the few have now located, might flourish the strong churches of Christ, holding up the true principles of Christianity to the world. Is such an object worth laboring for? I appeal to you who are aged and experienced in the work—I appeal to you who are young and energetic—I appeal to all who long for the universal establishment of the church of Christ here on earth. T. R. W.

God's Work in Burmah.—Rev. J. H. Kennard, of Philadelphia, communicates to the *Christian Chronicle* a letter which he has recently received from Rev. E. Kincaid, who writes from Prome, under date of April 28th. The annexed is the closing paragraph of the letter:—

"How much I have to say. Mrs. Kincaid is near by talking to four persons who have just come in to ask for baptism. Dr. Dawson has just returned to Rangoon. You will be happy to know that the blessed work is still going on in Rangoon among the Karens in all that region, so that it is impossible to obtain men qualified to instruct these newly raised up churches. Brother Vinton is compelled to spend a part of his time in training a large number of young men for the work of preaching. Bro. Brayton, in Danabu, has been greatly blessed. But I must close this letter. Tell the church how much they are in our hearts, and how much we desire their prayers. The Lord has heard and answered their prayers in our behalf and in behalf of these heathen. Can anything be more plain?"

REPLY TO D. E. MAXSON.

I wish to define my position, and place myself right before the readers of the *Recorder*.

I would state, that I had neither wish nor inclination to commence a discussion with brother Maxson on Geology in the *Recorder*, being opposed to such discussions through that medium. I know that to some of its patrons such discussions are not only uninteresting, but absolutely repulsive. I believe that that class constitutes a large portion of its readers. But finding the subject frequently presented, and occupying a large space in the *Recorder*, and not believing his theory, and conceiving his reasoning inconclusive, his facts doubtful, and the results deleterious, I presented a series of quiries, over the signature of *Ne Scio*, (I don't know,) intending to pursue this course (incog) until I had obtained answers to my objections, or he should discontinue the subject. But from his request that in any future communications I would append my proper name, I was reluctantly induced to stand forth in my own proper person—not as a disputant, but as an humble inquirer.

I did then, and do now, believe that the course pursued by brother Maxson was calculated to shake the faith of illiterate Christians in the divinity of the Scriptures, particularly the Mosaic Records, without clear proof that the Bible and Geology did demonstrate the truth of his position. But in giving expression to these views, I did it so awkwardly as to require proof from Geology alone, thereby exposing myself to the justice of his remark, "that if the declaration shook the faith of the weak Christian, the proof would shake it worse."

I wish farther to state, that from the manner in which brother Maxson and myself use the word demonstration, I apprehend we do not attach the same meaning to the term. To correct any misunderstanding growing out of the use of the term, I will transcribe Webster's first three definitions of the word: "1. The art of demonstrating or exhibiting certain proof. 2. The highest degree of evidence; certain proof exhibited, or such proof as establishes a *fact* or proposition beyond the possibility of doubt; or as shows the contrary position to be absurd or impossible. 3. Indubitable evidence of the senses or reason; evidence which satisfies the mind of the certainty of a *fact* or proposition." The italicising is mine.

The position I have thus far occupied, does not bind me to prove anything; yet I am willing to give my reasons for not believing his theory.

My f[illegible] general sense of the Scriptures, as I understand them. But brother Maxson has attempted to prove that the language of the Mosaic Record will admit of a different construction. How far he has succeeded, the reader must judge. But admitting that he has succeeded, it does not follow that the Holy Spirit or Moses used the language in that sense. This will demand proof. I honestly believe, that they never intended to convey the idea that the earth existed *in any form* anterior to the six days mentioned in Genesis 1st and Exodus 20th. Brother Maxson lays it down as an axiom, "that the records God has given in his word and his works must agree." He contends that the former must be interpreted by the latter. Hence he repairs to the rocks to prove the great antiquity of the earth. I do not question the truth of the axiom, but I do doubt the correctness of his translations of the records, particularly the record of God's works. If a dozen men, perfectly acquainted with the language in which a record is made, and equally acquainted with the language into which that record is to be translated, were to engage in translating that record, we should expect that their several translations would not only agree with the original, but with each other. But if there were not only a discrepancy in their translations, but an absolute contradiction, we should lose all confidence in the correctness of their translations, if we did not impugn their honesty. This brings me to my

2d Reason for rejecting brother Maxson's theory. Geologists, while they profess to correct the common acceptation of the Mosaic records, do disagree among themselves. One class, while they admit that the solar system was created in six days, do contend that each day was not a day consisting of twenty-four hours, but a long, indefinite period; while a second class contend that the Mosaic record does not fix the period of creation, but simply states the fact that the world was not eternal, or that it does not exist by accident; that God created it at some uncertain distant period, and that he remodeled it during the six days, while a third class* contend that the solar system originally existed in a gaseous state; that from some cause, not expressed by the writer, or forgotten by me, it began to whirl; that the centrifugal power at different times threw off certain portions of the gas, which continuing to revolve, were after a while consolidated into the several planets with the sun in the center. After a lapse of time, the earth became so modified as to be a fit residence for the lowest grade of sentient beings. Of course, beings of that grade came into existence. As the earth became more perfect, these animals in embryo, by a progressive course of developement, passed through the various grades, until they became men; so that all sentient beings sprang from the lowest grade of animals by development, and man may literally say to the molusc, Thou art my mother, and to the worm, Thou art my sister.

In one particular, I believe they all agree, and that is that the earth once existed in a fluid state; but by what cause they do not agree. One ascribes it to water; another to caloric. One contends that the increase of heat, as we descend into the bowels of the earth, is caused by chemical combination; another that it is caused by the radiation of heat from the center, which is said to consist of melted lava. See Prof. Lyel's and Hitchcock's opinion.

Astronomers are no better agreed in translating the records Jehovah has inscribed on his works. One contends that the sun is a vast body of fire; another, that it is a dark body surrounded by a luminous atmosphere, which has some thin or vacant spaces in it, which accounts for the spots on the sun; another, that the sun is a habitable globe. There is an equal diversity and contradiction in their translation of the record inscribed on the moon. The history of these conflicting translations might be carried to almost any desired length, showing the different theories and speculations that are palmed upon the world as demonstrated truth.

Brother Maxson states, in reply to my queries in regard to tracks found in a granite rock in Rhode Island: "Now, if I were disposed to do as I am done by, I should simply deny the existence of any such rocks, and pertinaciously demand demonstration, and not hypothesis." Had he done so, I should have cheerfully and kindly replied, that in the summer of 1850, in company with brother Charles M. Lewis, I visited said rock, and examined it myself, with direct reference to the geological controversy, and that I saw what I have related.

He admits, however, that such and similar impressions are frequent, and remarks, "The explanation of such phenomena is very obvious at first sight, to any one who knows the structure of granite rock, whether he has ever heard of geological theory or not. These impressions have no connection with my theory, or any other, concerning the formation of the earth, they are simply the result of accident."

Professor Hitchcock describes tracks found in stratified rocks, made by various animals, both quadrupeds and birds, which he unhesitatingly admits were made by the animals whose tracks they resemble. See Hitchcock's Elementary Geology, pages 179—182. Why this admission? The reason is obvious: these tracks were found in *stratified* rocks, and of course did not conflict with the theory under discussion. But when tracks of men and quadrupeds are found in *granite* rocks, they [illegible] be simply the result of accident; and why? Because, to admit they were made by men and quadrupeds would upset their theory of the age and formation of the earth.

Philosophically and theologically speaking, the idea of accident has no existence in my creed. I believe every effect is the result of an adequate cause. Brother Maxson, in this explanation, has unwittingly furnished an argument in opposition to his own theory; for if human tracks do exist in granite rocks by accident, or without any adequate cause, it should not be deemed irrational to conclude that God created the earth, consisting of unstratified and stratified rocks, &c., at the beginning.

Brother Maxson has at length given a clue by which to explain how the ten miles thickness of stratified rocks are measured. If I understand him correctly, one man measures one set of strata in one place, another man measures another set in another place, and so on; the aggregate of which amounts to ten miles. Now, we know that in some places there are no stratified rocks at all; what rocks there are being granite, below which we may not expect to find stratified rocks of any kind. In other places, we find one species of stratified rock, in another place another species; but we are not informed that all the species are ever found in any one place. So, after all, one of brother Maxson's facts to be believed still demands proof.

I come now to notice the telescopic stars, whose distance from the earth, according to his estimation, is between twelve and thirteen quintillions of miles. On a former occasion, I expressed my doubts of the fact. I now propose to give my reasons for those doubts.

By using the diameter of the earth as a base for a triangle, astronomers have been enabled to calculate the sun's distance from the earth with some degree of accuracy; but the sun's parallax was so minute that they have availed themselves of the transit of Venus to facilitate the measure, and render the result more complete. It was thought, that substituting the diameter of the earth's orbit for the earth's diameter, they might succeed in measuring the distance of the fixed stars. The result I will gixe in the language of Dunican Bradford, taken from his Wonders of the Heavens, page 18:—

"The diameter of the earth has served as the base of a triangle in the trigonometrical survey of our system, by which to calculate the distance of the sun; but the extreme minuteness of the sun's parallax, from the ill conditioned triangle, so delicate that nothing but the fortunate combination of favorable circumstances afforded by the transit of Venus could render its result tolerably worthy of reliance. But the earth's diameter is too small a base for direct triangulation to the verge of even our own system; and we are therefore obliged to substitute the annual parallax for the diurnal." . . . . . "It might be rationally enough expected, that by this enlargement of our base to the vast dimeter of the earth's orbit, the next step in our survey would be made at great advantage; that our change of station from side to side would produce a perceptible and measurable amount of annual parallax in the stars, and by its means we should come to the knowledge of their distance; but after exhausting every refinement of observation, astronomers have been unable to come to any positive and coincident conclusion upon this head, and it seems therefore demonstrated, that the amount of such parallax of the nearest fixed star, which has hitherto been examined with the requisite attention, remains still mixed up with and concealed among the errors incidental to all astronomical demonstrations."

If this may be said in relation to the nearest fixed star, it certainly will apply with far greater force to the telescopic stars, which are millions of times the distance of the nearest fixed star. But admitting that the distance of the telescopic stars could be measured, and their distance should be so great as to require, not millions, but billions, of years for their light to travel to the earth, it would not prove the age of the earth to be over six thousand years; for, according to brother Maxson's theory, the Mosaic record does not fix the date of the earth's creation, but only declares it to be the work of God. The fixed stars may not only have existed millions of years, but they may have existed millions of years before the creation of our solar system.

We come now to brother Maxson's remarks on Niagara Falls. I think he stated that the Falls were once at Lewistown, some miles below the present Falls, and that it has taken forty thousand years to wear away the rock to its present location. I do not know whether this is one of his facts to be believed, or one of his hypotheses to be demonstrated. As he has furnished no demonstration, I presume he intended it as a fact to be believed. How he came to the knowledge of it, I cannot conceive. It could not be by intuition, for it is not a self-evident proposition. He could not have received it by his senses, for I presume he is not yet forty years old He could not have obtained it by human testimony, for, according to *his* calculation, there must have at least thirty-four thousand years of the forty expired before there was a man to witness it. It must then be a demonstrated fact, if fact at all, and I conceive there are no data by which it can be demonstrated. Besides, the present situation of the Falls forbids the idea. The north part of the Island, which divides it, is a perpendicular rock. How the earth and rock below the Island could have been washed away and the Island remain, I cannot conceive. I appears reasonable to suppose that the line of the Falls was a continuation of the northern line of the Island, and that the water has worn away the rock something like ten rods. Eli S. Bailey.

---

* I state this from recollection, not having the work (Vestiges of Creation) before me; and as it is some years since I examined the work, there may be some circumstantial inaccuracies; but I think I am correct.

COLLEGE LOCATION.

In the *Recorder* of August 23d, I find some strictures upon what I said in the same paper of August 9th, in relation to our proposed College and Theological Seminary. I am thereby again reminded of my incapacity to write so as to be understood as I intend. So great has been my misfortune in this matter, especially in relation to our educational interests, that I am sometimes almost resolved to make no further effort. I cannot see how language can be so understood by those who are unbiased in their interpretations. So far from "deprecating the course adopted by the Conference Committee," as brother Allen asserts, I thought I expressed pleasure at what they had done; or, to re-state my own words, *I am glad to see the subject again before the denomination, and trust the effort will meet with a cordial response*, &c. Can language be plainer? Or what interest can be subserved by so misunderstanding a candid, frank expression of views?

The Conference Committee have never said, as I know of, that the denomination *must locate* in its final resting place the proposed Seminary this season; yet I know it was contemplated that the expression sought might, and probably would, do so. The question what constitutes a desirable location has not, to my knowledge, been fairly before our people; and it would not be strange if some others besides myself should, when the question is fairly put, find themselves unprepared to give an enlightened verdict in regard to *final* location. The fact that we have once been led blind-fold in a matter of this kind, ought not to be a fruitless caution. It were better to be seven years discussing the matter of location, than to make such a mistake as was made in the location of DeRuyter Institute, thereby not only throwing back our cause more than twice that number of years, but so prejudicing and disheartening those enlisted, as to debar them from nearly all future effort. A second similar haste and blunder would be lamentably disastrous. We want not only to harmonize in the matter, but to understand *why* we harmonize. If possible, we want to know the effect of such a school upon our academies, and so provide for it that they may be mutual helpers of each other, or, if that is not best, that one shall swallow all the others up.

There are also a great variety of other considerations to be looked to, such as the readiness with which it can be approached; the character of the society in which it is located; the business habits and capacity of the surrounding community; the prospective facilities for the students and faculty to be benefited by the great passing events of the age; the influence of surrounding institutions, civil, literary, scientific, and religious; the facility with which students may find fields in which to employ and develop their powers, and procure means for their advancement; the healthiness of location, cheapness of board, &c., &c. These and a great many other questions must be answered by an appeal to facts, before an enlightened verdict can be given on the final location. But if we prefer to waive enlightened inquiry, and be led by the interested, we *may* come out right in the end; but if not, we must abide the consequences. J. R. Irish.

Mendi Mission.—In January last, (says the *American Missionary*, the organ of the American Missionary Association,) three ordained ministers of the "United Brethren" Order, W. J. Shuey, D. C. Kumler, and D. K. Flickinger, sailed from New York, for Africa, in company with missionaries about to join our Mendi Mission. Their expectation was to be absent about a year, and by personal inquiry and observation to prepare themselves to report to their denomination whether the field about our mission was a suitable one for them to occupy in the commencement of Foreign Missionary operations. The two brethren first named have returned to New York, where they arrived July 15. They come back prepared to recommend that the United Brethren should commence a Mission station on the Jong River, not far from Wela, and will also recommend a co-operation, in some form, with the American Missionary Association, in carrying forward the work.

First Baptist Churches in Ohio and Kentucky.—The first Baptist Church in Ohio, says the *Examiner*, was organized at Columbia, March, 1790, by the late Dr. Stephen Gano, of Providence, R. I. The first sermon preached in Ohio, on the Sunday, was delivered by Dr. Samuel Jones, of Penn., in 1789. Dr. Jones was then chaplain in the army of General Wayne. The first Baptist church in Indiana was constituted in 1798, by Rev. Wm. M'Coy, father of the late missionary M'Coy. This Church was called Silver Creek, and is yet in existence a few miles from New Albany. It was once nearly extinct through Campbellism and anti-missionism, but having cleared itself from both, it is again rising, coming up out of the wilderness, and even has a colporteur of its own. The first Baptist Church in Kentucky was formed most probably at Nolynn, Hardin county, in 1782. Cedar Fork Church also was formed in 1782. These were the first Protestant Churches west of the mountains, and they yet remain.

Delegates to the Anniversaries.—In answer to inquiries on the subject, we have to say, that the New Jersey delegates will probably leave New York by steamboat at 6 o'clock on the evening of Second-day, Sept. 3. In that case, they can take cars from Albany at 6.30, 7.30, or 9 o'clock, A. M., and reach Utica at 10, 11, or 1 o'clock. Delegates from Rhode Island *might* come to New York by the Monday night boat, take the 6 A. M. train on the Hudson River Railroad, and reach Utica at 2 o'clock on the afternoon of Third-day. But as there is some uncertainty about the boat reaching New York in time for the morning train, probably the better way will be to come on Second-day by railroad to New [illegible] which connects with the Stonington road is due at 5 o'clock P. M., and thence go in company with the other delegates. The fare from New York to Albany is $1 by steamboat, and $3 by railroad; from Albany to Utica $1 90.

RELIGIOUS INTELLIGENCE.

On good authority it is stated, says the *Congregationalist*, that in Ireland, since 1847, thousands have broken loose from Romish thraldom, and hunger for the bread of life. In Belgium there are nearly forty Protestant churches, where not a solitary one existed twenty-five years ago, and thousands of families are brought under a pure evangelical influence. In France, whole villages have thrown off the oppressions of the papacy, and organized a scriptural worship. In this country also, are many churches composed almost wholly of converts from Romanism; and various Protestant churches have been enlarged by the admission of the same class of converts.

A few days since, says one of the editors of the *Independent*, we inquired of the son of an American Missionary, just arrived from Constantinople, "If Russia should take Constantinople, how long could your father remain there, at his work?" "Not a day," was the instant reply. That answer is a true exponent of the respective attitudes of Russia and Turkey towards the missionary work. The father of this young gentleman once knew something of Austrian persecution toward the Christian missionary; but in Turkey he has labored for years, not only without molestation, but with positive encouragement.

On Sunday afternoon, Aug. 19th, the Rev. A. S. Patton, Pastor of the First Baptist Church, Hoboken, preached in the Elysian Fields to a very large and attentive assembly. The exercises were begun with singing a hymn, followed by a discourse from Amos, 4: 12—"Prepare to meet thy God"—and closed with prayer. All expressed themselves much gratified with the services, and the preacher announced his purpose to resort thither on successive Sunday afternoons, so long as the season might permit.

A dispatch dated Boston, Wednesday, Aug. 22, says: The opening of Tufts College in Somerville, the only Universalist College in New England, was appropriately celebrated to-day. About one thousand persons were present. Rev. Hosea Ballou, the President; Rev. Thomas Whittemore; Rev. E. H. Chapin, of New York; and Rev. Henry Bacon, of Philadelphia, took part in the exercises. The prospects of the new College are encouraging.

The Methodist denomination has forty pastors in California; the Episcopalians nine; the Baptists nine. All these churches are prosperous. Both morality and religion are advancing in the new State. The Legislature, under the pressure of public opinion, has passed laws suppressing gambling and dueling.

The *Puritan Recorder*, in an article on "A Settled Ministry," makes the remark that "an everlasting candidate, with one foot on the ground of his labors, and the other in the stirrup for a new journey to a more inviting field, is not a pastor."

Rev. J. M. Peck, D. D., is lying very low, at his residence in Rock-Spring, Ill., of congestion of the liver.

General Intelligence.

European News.

The U. S. M. steamship Pacific, with one week later news from Europe, arrived at New York on the 22d inst.

The news by this arrival is unsatisfying—many rumors and few facts. Nothing definite from the Crimea. Private advices say that the bombardment has been resumed, but as yet we do not know with what effect. Gen. Markham is spoken of in certain circles as likely to succeed to the command, but the statement is doubtful; Sir Colin Campbell's appointment would be more popular. The Queen is desirous to nominate the Duke of Cambridge, but he prudently declines the honor, offering, however, to go out as second in command. Meantime Gen. Simpson continues with the army. Omar Pacha is appointed Commander-in-Chief of the Turks in Asia. Some operations, of no great moment, have been executed by the Allies in the Sea of Azof. The Black Sea fleet is still concentrated for some great movement. A *coup de main* is confidently expected in the Baltic. Ninety ships are assembled at Nargan, and opinions on board are divided as to whether their destination be Revel or Sweaborg—most probably the latter.

The Russians have burned all the remaining stores of grain at Kertch to prevent exportation by the Allies.

The well informed Paris correspondent of the London *Times* states that Austria has just made spontaneous advances of more friendly relations towards the Western Powers. Lord Palmerston, in Parliament, conveyed a similar meaning.

We have at last authentic details upon the situation of the Russians—details which show the late representations of their desperate condition to have been purely imaginative. The Russian army of the Crimea, exclusive of the garrison of Perekop, is 175,000 men. There is not, and has not been, any shortness of provisions. The bridge of Tchoungar, near Genitchi, is unharmed, and even inaccessible. Gen. Todleben is alive, and vigorously occupied over the new defences of Malakoff, which are on such a tremendous scale of efficiency that, according to the allies themselves, the tower is now nothing but an exterior work, the real line of defences bristling behind.

Spain is on the eve of joining the Western Alliance, and, it is reported, will send to the Crimea 25,000 men, who will be paid and equipped by Great Britain and France.

A subscription to buy a freehold landed estate for the Raglan family is rapidly filling up. £6,000 are already subscribed, mostly in sums of £100 each from the nobility.

Paris correspondence is full of allusion to what is termed a "Legitimist conspiracy." The sum and substance of the affair seems to be, that two Frenchmen, MM. D'Escars and Chapot, have been in communication with the Count of Montemolin, with the immediate view of encouraging the Carlist insurrection in Spain, and the ulterior hopes of bringing about a favorable chance for Henry V.

Advices from Madeira give an unsatisfactory account of the condition of the Island. The vines are completely withered, and there is no other culture on which to rely for the means of subsistence.

The report of the Parliamentary Committee, appointed to consider what rewards are due to the Arctic explorers, has been published. The report, which is very lengthy, recommends the gift of £10,000 sterling to Captain McClure and his companions of the ship Investigator. Honorable mention only is made of other navigators.

Revolution in Mexico.

The telegraph from New Orleans brings information that Santa Anna left the City of Mexico on the 9th inst., with an escort of 2,500 men, and signed his abdication at Parote. He embarked on the 17th at Vera Cruz for Havana.

Two days after he left Mexico seven or eight hundred of his escort revolted, killing one or two of their officers. They then joined the insurgents.

The Alvarez platform has been adopted. Gen. Carre is Provisional President of Mexico, and La Vega Commander-in-chief of the army.

All the State prisoners have been liberated.

A mob had gutted a large number of houses, including that of Santa Anna's mother-in-law.

A fight occurred at Vera Cruz, between two revolted battalions and a regiment that remained faithful to Santa Anna. The former was beaten and left for the mountains. Fifteen or twenty were killed before order was restored.

During the excitement following Santa Anna's desertion, the office of the Universal newspaper, and upwards of forty other buildings were demolished. The military interfered, killing forty persons and wounding many more.

California News.

Two weeks later news from California was received in New York on the 25th inst.

Business in San Francisco continued to improve, and from the mines the accounts are most encouraging. From all directions in the mining regions, says a California paper, but one tale is told of universal abundance in the yield of the deposits and of enterprise and activity in carrying out improvements and extended schemes for the more full and perfect working of the different diggings.

The San Francisco journals have furnished us with graphic and exciting descriptions of late operations of the French and English squadrons in the Pacific. The allied fleets, consisting of eight war vessels and steamers, arrived off Petropaulovski on the 15th of May, but, to their astonishment no doubt, found that the place had previously been abandoned both by the garrison and by some twelve hundred inhabitants.

A rumor had reached San Francisco that Sitka, like Petropaulovski, had been also deserted by the Russians, but this was without any foundation. By special compact between the Russian and British Governments, the possessions of the Russian American Company and the Hudson's Bay Company are to be held sacred during the war, and Sitka, though visited by the Allies in search of Russian vessels, was, in consequence, left unharmed.

We also, from the San Francisco papers, learn that Melendrez, acting Commandante on the frontier, was recently seized by orders of General Blancarte, the Civil and Military Governor of Lower California, and without even the formality of trial, was sentenced to be shot on suspicion of negotiating with the United States to sell a portion of Mexican Territory. The barbarous sentence was immediately put in execution by one Pujol, who succeeds Melendrez in office.

Free Negroes and Slavery in Kansas.

The following bill is before the Kansas Legislature, and will probably become a law of the Territory:—

SEC. 1. That no person shall keep or teach any school within this Territory for the instruction of slaves, free negroes or mulattoes.

SEC. 2. No meeting or assembly of negroes or mulattoes for any purpose of religious worship, or for any other purpose, shall be held or permitted where the services are conducted by slaves, free negroes or mulattoes, unless a sheriff, constable or justice of the peace for the county in which said meetshall be held shall be present during the time of such meeting in order to prevent seditious speeches and disorderly conduct of all kinds.

SEC. 3. All meetings of slaves, free negroes and mulattoes for the purpose mentioned in the two preceding sections shall be deemed unlawful assemblies, and shall be suppressed by any sheriff, constable or other peace officer.

SEC. 4. No free negro or mulatto shall, under any pretext, emigrate to this Territory from any other Territory or State.

SEC. 5. If any white person shall violate any of the provisions of this act he shall for every such offence be punished by fine and imprisonment in the discretion of the Court, if the offender be a free negro or mulatto he may be punished by a like fine and imprisonment or by stripes not exceeding thirty-nine lashes.

There is also a bill before the Kansas Legislature in relation to Jurors, which contains the following section:—

SEC. 13. No person who is conscientiously opposed to holding slaves, or who does not admit the right to hold slaves in this territory, shall be a juror in any cause in which the right to hold any person in slavery is involved, nor in any cause in which any injury done to, or committed by any slave is in issue, nor in any criminal proceeding for the violation of any law enacted for the protection of slave property, and for the punishment of crimes committed against the right to such property.

Wyandot Indians.

The Kansas correspondent of the Missouri *Republican*, writing on the 14th of August, says:—

To-day, the Wyandots are holding their election for Chief, and a more interesting and impressive scene I never witnessed. This nation was, a few years ago, the most populous, powerful and warlike of the whole region of the North, and are now dwindled down to the small number of six or seven hundred, all told. Some of them are men of remarkable sense, whose practical observation and sound discretion have induced them to quit many traditional and savage customs, and to form a sort of republican government. They now elect their rulers, and to-day they are to choose their Chief, or President. The polls are held at a lodge about two hundred yards from the confluence of the Kansas and Missouri Rivers, and within full view of passing steamboats. The judges of election are three old braves, who have the confidence of the nation. The voting is done by ballot—and how gravely it proceeds! How unlike the elections of the white man! How much more orderly, dignified and quiet! There is no excitement, no noise—no electioneering or loud words. They come in singly from the forest; they assemble in small numbers beneath the boughs of spreading elms; they confer together gravely, and then, as stately relics of a mighty race, they step with a mien of conscious sovereignty to the ballot-box, and vote for the Chieftain of their choice. What an example to their white brethren.

In a treaty with this Nation in 1852, the Government of the United States granted to them a small portion of that beautiful and fertile country that lies between and in an acute angle of the Missouri and Kansas Rivers, and thirty-two floating sections which can be located on any of the public lands west of the Mississippi River. These floating sections they are now offering for sale, and some of them have been purchased this morning, at the remarkably low sum of eight hundred dollars. A section, you know, is 640 acres; so that, at the rate of $800 per section, they will receive only $25,600 for 20,480 acres of the choicest lands in the world. They can be located in Kansas, Nebraska, or any where, without waiting for surveys, and the title becomes complete at the moment of location.

AN OUT-AND-OUT PLATFORM.—General Quitman, of Mississippi, in accepting the Democratic nomination for Congress, lays down the following as his platform:—

"I believe that the institution of negro slavery is not only right and proper, but the natural and normal condition of the superior and inferior races, when in contact. That as the chief element of our country's prosperity, it constitutes a great interest, which is entitled, like other great interests, to the fostering care and protection of the federal government, within the sphere of its powers. That legislation or action, directly or indirectly hostile to this interest, is at war with our compact of Union, and should be resisted by the States and the people affected by it at all hazards. That the preservation of the institution of slavery in Cuba, which can only be effected by her independence and separation from the malign influence of European governments, is essential to the safety and preservation of our own system."

SALE OF FREE NEGROES.—On Monday last, (says the *Virginia Sentinel*,) the first day of the July term of Fauquier County Court, two negro women, who had been freed about a year ago, were sold, in compliance with a previous order of the court, for remaining in the commonwealth contrary to law. These negroes were emancipated by the will of John Edmonds, deceased, formerly of Culpepper county, with the condition that they should first serve Joseph Horner, of Warrenton, for the term of twenty years. After gaining their freedom, they went to the District of Columbia. Having become tired of the sweets of such freedom as they there found, they voluntarily returned and asked to be sold as slaves, for the privilege of remaining in the commonwealth.

A CONVENTION OF JEWS.—The annexed is a copy of a printed circular now being circulated among the Jews of this city.

Hebrew—*Salem al Israel.*
Translation—*Peace with Israel.*

IN THE NAME OF JEHOVAH, THE ONE GOD OF ISRAEL, AND IN THE NAME OF ISRAEL'S HOLY RELIGION, the Ministers, Rabbis, and delegates of the Israelitish Congregations are respectfully invited to assemble in a conference, to take place the 17th October next, 5,616 A. M., in the city of Cleveland, Ohio, to deliberate on the following points:

1. On the Union of American Israelites.
2. On a plan to organize a regular permanent Synod or Sanhedrim of Rabbis.
3. On a plan for religious and scholastic education of Hebrew youth.
4. On any other proposition that may be brought forward in the conference.

By order of the Provisory Sanhedrim of American Rabbis, viz.:

Rev. Dr. Merzbacher, New York.
Rev. Dr. Wise, Cincinnati.
Rev. Dr. Cohn, Rabbi of Albany.
Rev. Dr. Guenzburg, Rabbi of Baltimore.
Rev. Dr. Yellowy, Rabbi of St. Louis.
Rev. Dr. Kalish, Rabbi of Cleveland.

BEAUTIES OF SLAVERY.—Two slaves, one a young unmarried man and the other a married woman, were emancipated by the will of their master, some six months since, in Virginia. He left them a house and lot and other property. A law of Virginia provides that a slave who is set free must leave the State within a year, or be sold again into slavery, the purchase money going to the State. The man has come to the north and secured his freedom; the woman, who has a husband and children in bondage, must desert them if she secures her freedom. Isaac Roberts, a free colored man from Harveysburg, Ohio, employed on a Mississippi steamboat, was put in jail in New Orleans, in March, as a fugitive, and will be sold in August to pay jail fees. A young mulatto boy, liberated in Cincinnati not long since, has been kidnapped, and sold to the slaveholders in Kentucky.

NEUTRALITY.—One of the most audacious instances of atheistical blasphemy which we have any knowledge of, occurs in one of the letters of Marshal St. Arnaud to his brother, which have recently been published in Paris. The bold and bloody soldier was in Africa, carving his way to fortune with his sword. In September, 1837, he wrote:

"In five days we shall be before Constantine—two days in the trenches, one day bombarding, and then the assault. What a country, my brother! Admirable up to this time, but just now all horror and privation. We shall at last be without water—the most horrible of all prospects. *But if God will remain neutral, the enemy is lost.*"

SUMMARY.

On the 22d of August, a dreadful and fatal accident occurred on the Harlem Railroad, by the upsetting of a gravel train at Williams' Bridge. The gravel train, with a number of the laborers of the road upon it, was going at the rate of about fifteen miles an hour south, towards Williams' Bridge, and when nearing that spot the train had to be switched off, when unfortunately, in backing, the rear car came in contact with a cow, throwning the entire train off the track, and upsetting the entire file of cars. Two men were instantly killed, and four others were taken from the ruins in a dreadfully mangled state.

Serious apprehensions are beginning to be felt in relation to the difficulties between Denmark and the United States, which, it is now generally believed, must lead to a rupture and to hostilities. In such case, the danger to American commerce is not in the Danish fleet, which, though but little inferior to our own in number, is undoubtedly inferior in quality, and would soon be driven from the sea by our Navy. The danger, if any, is from privateers. The Danes are a race of sailors, and have, from the remotest times, shown great propensity and talent for privateering.

The Annual Exhibition of the Essex Co., N. J., Agricultural Society will be held at Elizabethtown (Elizabeth City) on Wednesday and Thursday, Sept. 19 and 20. President, Eli W. Rogers, of Whallonsburg; Secretary, Clifford A. Hand; Treasurer, Wm. W. Root. This Society have published an extensive Premium list, and preparations are making for an interesting Agricultural display.

It is said there are more letters come to the Boston Post Office than to any other city in the Union in proportion to the population. The *Telegraph* of the 10th inst., has the following item:—The largest mail ever received at the Boston Post Office was that which arrived last evening from New York and the South. It weighed fourteen and a half tons, and required an extra baggage car for its conveyance.

A circular has been issued by the Scotch, English, Germans and Canadians, living in Canada, to foreigners living in the United States, inviting them to Canada to rid themselves from the influence of Know-Nothing societies, which are pointed against them in business, political and religious matters.

Gen. Thos. C. Flourney, President of the Kentucky Temperance Society, has issued a proclamation, appointing Thursday, the 22d November, as a day to be devoted by the temperance people of Kentucky to the giving of thanks to God for the blessings he has showered upon our country.

J. W. Armstrong, of Deer Park, Ill., writes to the editor of the Ottawa *Free Trader*, giving him the details of a successful application of the mad stone in a case of hydrophobia. This stone is in the possession of Dr. James Lewis, Kickapoo, Illinois.

A dispatch dated Utica, Monday, Aug 20, 1855, says:—The Kirkland Cotton Mill at Manchester, about nine miles from this city, was totally destroyed by fire yesterday morning. It was owned by E. S. Brayton of Utica. The loss is about $30,000—insurance $20,000.

Dr. Barnas Sears was elected President of Brown University, in place of the venerable Dr. Wayland, who has resigned. It is understood that Dr. Sears accepts. He is a graduate of the University, and at present Secretary of the Massachusetts Board of Education. He is in the full vigor of manhood, being fifty-five years of age.

The Yellow Fever appears to be on the increase in Norfolk and Portsmouth, as well as at New Orleans. Twenty new cases occurred at Portsmouth on Saturday, Aug. 18. In New Orleans there were 394 deaths from the disease during the week ending Aug. 18.

A curious case occurred recently in a Justice's Court in Prescott. Two men met and commenced discussing the newspaper controversy in which Rev. Mr. Roche was a party. Mr. Coates, one of the parties named, said Mr. Roche "was a perfect maniac," whereupon Mr. O'Sullivan got angry and took Coates by the throat. Coates then brought an action for assault, and Mr. O'S. was fined $10 and costs. On the rendering of this decision O'S. entered a complaint against C. for violating a By-law of the village against disturbing the peace in making O'S. wrathy, when the Magistrate fined Coates $4 and costs.

Augustus Behn, the young man who had a portion of his abdomen and one hand shot away by the premature discharge of a cannon at Seelyville, while celebrating the Fourth of July, has so far recovered as to be able to walk about his room, with a fair prospect of recovering entirely. The nature of his body wound was such, we understand, that he was not allowed to take any food for fourteen days. His bowels were kept perfectly quiet, free from any movement, for three weeks; and not till after the fourth week was he permitted to move from a perfectly level and straight position on his bed.

A dispatch dated Norfolk, Thursday, Aug. 23, 1855, says: The number of deaths from Yellow Fever in this city during the twenty-four hours ending at noon to-day was sixteen. There are now over 300 cases under treatment here. In Portsmouth, during the 24 hours ending at noon on Wednesday, there were 27 deaths, and for the 24 hours ending at noon to-day the number has been 22. About 400 cases are under treatment, and the number is daily increasing.

The telegraph reports an important movement in Kansas towards calling a convention to organize a State government and apply for admission into the Union. The Convention was held at Lawrence on the 14th inst., and was attended by about six hundred persons. It seems to have been unanimous in its condemnation of the present Legislature, and determined to resist all attempts to execute the pretended laws it may enact. A State Convention was called for the 5th of September.

We learn that Judge Shankland, in his charge to the Grand Jury at Ithaca, gave it as his opinion, that the Prohibitory Liquor Law of this State is constitutional, and that the sale of imported liquors, except in the original packages, is forbidden by the law, and that it was the duty of the Grand Jury to sustain the law until it should be pronounced unconstitutional by the Courts having authority to pass upon that question.

On Friday night, as the Cleveland train for Columbus, Ohio, was running between Orange and Worthington, at the rate of at least 20 miles an hour, a woman while asleep, jumped off the platform without being severely injured. Fortunately, she was discovered by the brakeman, who had the train stopped, and the somnambulist was again taken aboard, very little the worse for the fall.

For many weeks the yellow fever has raged in Norfolk, Gosport, and Portsmouth, Va., carrying off hundreds of people, of all ages and conditions, and driving away nearly all who possessed the means of traveling. Business has come to a stand still, rendering the poor artisans destitute and helpless; and affairs have come to so sad a pass that a double death of famine and fever stares many a poor family in the face.

A couple of Irishmen, named Conner and Chase, got into a dispute and went to the house of the former to settle it. Upon their arrival a third person interposed and succeeded, as he thought, in amicably arranging the matter. When parting, as usual in such cases, they went to kiss each other, Conner got Chase by the under lip and bit it off.

The great French Tragic Actress, Mlle. Rachel, arrived in the Pacific, accompanied by a retinue of servants, and several members of her own family. Her arrival has caused a flutter and a sensation, and she attracts more attention than a real queen would be likely to do.

A dispatch dated New Orleans, Friday, Aug. 24, 1855, says: The semi-weekly report of interments here in six out of ten cemeteries shows one hundred and ninety-six deaths, including one hundred and sixty from yellow fever.

The earnings of the Black River and Utica Railroad for July, 1855, were, from passengers $2,919 90, and from freight, &c. $605 45; making a total of $3,526 32. The largest earnings for any previous month were $2,984 26 in March.

The will of the late Abbott Lawrence donates $10,000 to the Boston Public Library and $50,000 to the Lawrence Scientific School in Cambridge. His other bequests have not yet been made public.

The latest intelligence from Norfolk and Portsmouth represents the yellow fever as increasing. Thirty-two deaths had occurred in the two cities, during twenty-four hours.

A dispatch dated Washington, Wednesday, Aug. 22, says: President Pierce, who is at present in Virginia, has had an attack of chills and fever, similar to that from which he suffered last year.

Rev. Rufus Babcock, D. D., late Corresponding Secretary of the American and Foreign Bible Society, has been elected President of Burlington (Bapt.) University in Iowa.

In Binghamton, N. Y., a revival of religion commenced in March, and has resulted, it is believed, in the conversion of one hundred persons.

The steamer Washington, which sailed last Sabbath, took out several American mechanics, who go to fill important stations on the St. Petersburg and Moscow Railroad.

The President has removed Rush Elmore, Associate Justice of the Supreme Court, Kansas, on grounds similar to those assigned for Governor Reeder's displacement.

It is expected that the cars will be running to and from Belvidere, on the Belvidere and Delaware Railroad, on or before the 1st of November.

The Catholic Church at Sidney, Shelby County, Ohio, was blown up by powder on the night of the 18th.

Wilson Shannon has accepted the Governorship of Kansas, and will depart forthwith for that Territory.

One of the Brooklyn Justices the other day fined his own brother $10 for intoxication. Impartial justice, that.

The Lynchburg Virginian announces the discovery of an alum spring near that city.

New York Markets—August 27, 1855.

Ashes—Pots $6 25; Pearls 6 37.

Flour and Meal—Flour, 7 87 a 9 25 for common to choice State, 8 50 a 9 25 for Michigan, Indiana, and Ohio, 10 75 a 12 00 for extra Genesee. Rye Flour 6 00 a 8 50. Corn Meal, 4 75 for Brandywine.

Grain—Wheat, 1 80 a 1 90 for red Southern, 2 00 a 2 03 for white Southern. Rye 1 05 for new. Barley 1 00 a 1 05. Oats, 45 a 50c. for Jersey, 55 a 61c. for State and Western. Corn, 90 a 92c. for Western mixed.

Provisions—Pork, 18 25 for prime mess. Beef, 11 00 for country prime, 13 00 for country mess. Lard 11½c. Butter, 18 a 22c. for State. Cheese 8½ a 9¾c.

Hay—70 a 80c. per 100 lbs.

Seeds—Clover 11c. Timothy 4 00 for reaped. Rough Flaxseed 1 90.

Wool—38 a 47c. for domestic fleece.

MARRIED,

In North Kingston, R. I., Aug. 5th, by Eld. Joseph A. Tillinghast, Mr. MAXSON LEWIS, of North Kingston, to Miss CLARISSA R. GATES, of Hopkinton.

In Rockville, R. I., on the 19th inst., by Eld. C. M Lewis, Mr. STERRY COLVIN to Miss ELIZA M. LANPHEAR, both of Rockville.

At the Seventh-day Baptist church in Preston, August 18th, by Eld. J. R. Irish, BENJAMIN W. CRUMB, of DeRuyter, to MARY ELIZABETH MAXSON, daughter of John L. Maxson, of Preston.

DIED.

At his residence in West Greenwich, R. I., Dea. NATHAN WILCOX, in the 81st year of his age. The deceased was a worthy member of the Baptist Church, which deeply feels his loss. His life was exemplary, and his death resigned and peaceful.

In DeRuyter, August 20, SARAH A. HILLS, wife of A. C. Hills, of the Syracuse *Chronicle*.

LETTERS.

J R Irish, C M Lewis, N V Hull, J B Wells, A M Wells, H G Hawley, S P Stillman, H J Mulford, D R Stillman, C Brown, H B Lewis, Cyrus Thacher, W H Webb, P C Burdick, T R Williams, R Lippincott, L R Babcock, A C Spicer.

RECEIPTS.

☞ All payments for publications of the Society are acknowledged from week to week in the Recorder. Persons sending money the receipt of which is not duly acknowledged, should give us early notice of the omission.

FOR THE SABBATH RECORDER:

H J Mulford, Bridgeton, N J	$1 00	to vol. 12	No. 13
P C Kenyon, Carbondale, Pa	2 00	12	52
Jonas Trexler, Brienigsville, Pa	2 00	13	9
R Lippincott, West Union, Iowa	2 00	12	52
Horace Bliven, Albion, Wis	2 00	13	13
David Stillman, Alfred Center	2 00	12	52
Wm C Millard, Wellsville	2 00	11	52
M & E Hawley, Broadalbin	2 00	13	52

WILLIAM M. ROGERS, Treasurer.

The General Conference.

The Seventh-day Baptist General Conference will hold its triennial session with the first church in Brookfield, Madison Co., N. Y., commencing on the fourth day of the week before the 2d Sabbath in September next. (5th of the month,) at 10 o'clock, A. M. Introductory discourse by Lucius Crandall; T. E. Babcock, alternate.
H. H. BAKER, Secretary.

The North-Western Association.

THE Seventh-day Baptist North Western Association will hold its ninth Anniversary with the Seventh day Baptist Church at Berlin, Marquette Co., Wisconsin, on the fifth day of the week before the fourth Sabbath in September, (being Sept. 20th,) commencing at 10 o'clock A. M. Eld. Z. Campbell is appointed to preach the introductory discourse; Eld. J. M. Todd alternate.
H. B. LEWIS, Rec. Sec.

The Virginia Association.

The Seventh-day Baptist Virginia Association will hold its next annual meeting with the Seventh-day Baptist Church at Lost Creek, Harrison Co., Va., commencing on the fifth day of the week before the fourth Sabbath in September, 1855, at 10 o'clock, A. M. Opening discourse by E. Bee; A. Bee, alternate.
J. F. RANDOLPH, Secretary.

New Market Seminary.

This Seminary will re-open on the 12th of September, with Mrs. R. H. Whitford, as Preceptress.

This Institution is located in a pleasant section of country, and has a commodious and well arranged building, and is designed to furnish every facility and advantage to the student found in other institutions of this class.

Board for students may be had in families at one dollar and seventy-five cents per week, where all their wants will be kindly cared for. Tuition from $3 to $5 per term, according to the studies pursued. Music, with use of Piano, $10 00.

I. H. DUNN, Sec. of Board of Trustees.
NEW MARKET, N. J., August 26, 1855.

Farm for Sale,

CONTAINING about 100 acres, with a fair proportion of woodland, a small orchard of grafted fruit, and a comfortable dwelling and outhouses. It is situated about four miles north of Westerly, R. I., and within a mile of each of the flourishing manufacturing villages of Potter Hill and Ashaway. There are several other manufacturing establishments near, affording a ready market, in the immediate vicinity, for every species of produce. It is convenient to the first Hopkinton Church, as well as to the very excellent male district school.

It will be sold with or without the stock and farming implements, and possession given the ensuing winter or spring, if desired. To those wishing to secure a quiet home in an enterprising neighborhood, and surrounded by such comforts as can only be found in an old settled and thickly populated country, this affords an opportunity seldom offered. For terms and other particulars apply to the subscriber on the premises, or address JOHN E. POTTER, No. 15 Sansom-st., Philadelphia, Pa. BENJAMIN POTTER, Ashaway, R. I.
11tf.

DeRuyter Institute.

This Institution is located in a pleasant and healthy section of country, and in a community comparatively moral and intelligent. It is easy of access from Syracuse, Chettenango, and Homer. Our motto is, *Teach the young to govern themselves—to educate themselves.* Grateful for past liberal patronage, we assure the public we have ample accommodations for more.

Expenses:

Tuition,	from	$4 00	to	$6 00
Board in families,	from	1 25	to	2 00
" in clubs	from	0 60	to	1 00
Room rent, per term,	from	1 25	to	2 62

Books and Stationery furnished at very low prices.

All bills settled invariably in advance. No bills for less than half a term. No deductions made except in case of sickness.

Board of Instruction.

HENRY L. JONES, A. M., Principal.
AMOS R. CORNWALL, A. B., Prof. Mathematics.
Miss JOSEPHINE WILCOX, Preceptress.
Mrs. SARAH E. JONES, Mrs. BARBARA A. CORNWALL, Miss SARAH E. SHIPPEY, Miss JANE C. BURDICK, Assistants in Female Department.

For further particulars, address, Henry L. Jones, Principal; W. D. Wilcox, President; J. B. Wells, Secretary; or C. H. Maxson, Treasurer, De Ruyter, Madison Co., N. Y.

Milton Academy.

Male and Female Teacher's Seminary.

A. C. SPICER, A. M., Principal, and Professor of Mathematics, Natural, Intellectual, and Moral Sciences.
A. WHITFORD, Professor of Greek and Latin Languages, and Rhetoric.
J. F. PEASE, Professor of Instrumental and Vocal Music.
J. F. WOOD, Teacher of Penmanship and Book-keeping.
Mrs. S. M. SPICER, Preceptress, and teacher of Modern Languages, Painting and Penciling.

(Other teachers will be engaged as occasion may require.)

Calendar for 1855–6.

First term opens Wednesday, August 29th; closes Wednesday, December 5th.

Second term opens Wednesday, December 12th; closes Wednesday, March 19th, 1856.

Third term opens Wednesday, March 26th; closes Wednesday, July 2d, 1856.

(The school will open, this year, in the New and Spacious Hall just erected.)

Tuition per term of 14 weeks, from $4 00 to $6 00. Music, Painting, and Penciling, extra. Board at the least possible price, not exceeding $2 00. Refer to the principal; Hon. J. Goodrich, President of Trustees; to M. T. Walker, Esq., or to J. C. Culver, Esq., MILTON, Rock Co., Wis.

Board Meetings.

The Executive Boards of the Seventh-day Baptist Missionary, Tract, and Publishing Societies, will meet at Plainfield, N. J., on First-day, Sept. 21, commencing with the Board of the Missionary Society at 9 o'clock A. M.

Our Anniversaries.

The Seventh-day Baptist Missionary Society will hold its 13th Annual Meeting with the 1st Seventh-day Baptist Church in Brookfield, Madison Co., N. Y., on Fifth-day, Sept. 6, 1855, commencing at 10 o'clock A. M. Opening discourse by Thomas E. Babcock.

The American Sabbath Tract Society will hold its 13th Annual Meeting at the same place in the forenoon of Sixth-day, Sept 7th, commencing at 9 o'clock.

The Seventh-day Baptist Publishing Society will hold its 6th Annual Meeting at the same place in the afternoon of Sixth-day, Sept. 7th, commencing at 1 o'clock.
GEO. B. UTTER, Secretary.

Savery's Temperance Hotel
AND
TELEGRAPH DINING SALOON,
No. 14 Beekman Street, N. Y.
KEPT ON THE EUROPEAN PLAN.
MEALS AT ALL HOURS OF THE DAY.
LODGING ROOMS,
From $2 to $3 per Week, or 50 Cts. per Night.
BELA SAWYER, Sup't. JOHN S. SAVERY, Proprietor.

Farm for Sale.

THE House and Farm lately owned and occupied by James Hubbard, in Scott, Cortland Co., N. Y., are now offered for sale, on reasonable terms. The House is a large two-story house, nearly new, and well arranged to accommodate a large family. The Farm consists of about thirty-six acres of good land, most of which is under good cultivation and is well watered. There are about fifty trees of choice grafted fruit in good bearing condition. It is situated in an industrious and moral community, enjoying all the advantages of schools, meetings, and markets, necessary to make it a pleasant home.

Apply to A. D. C. Barber, or J. N. Pratt. 4t–9.

Magnificent Floral Gift.

SUBSCRIBERS to the "CHRISTIAN DIADEM" for 1855, are entitled to a splendid steel engraving, the ☞ LILLY AND THE ROSE PERSONIFIED, being given *gratis* to all old and new subscribers who send us only ONE DOLLAR, by mail or otherwise.

Six Copies for Five Dollars.

The Diadem is a strictly moral and religious work—designed for the Christian family without regard to any particular denomination.

FIFTY ENERGETIC BUSINESS MEN are wanted immediately to circulate the "Diadem" throughout the Eastern and Western States. To such as can send good references the very best inducements will be given. Address Z. P. HATCH, Publisher, 9 Spruce street, New York. May 24—3m.

The very Book that every body has been Wanting.

The Book for the Parlor, the Book for the Fireside, the Book for the Professor, and the Book for the Non-Professor.

THE RELIGIOUS DENOMINATIONS OF THE UNITED STATES: Their History, Doctrine, Government, and Statistics; with a Preliminary Sketch of Judaism, Paganism, and Mohammedanism. By Rev. JOSEPH BELCHER, D. D., Honorary Member of the Historical Societies of Pennsylvania and Wisconsin, author of "William Carey, a Biography," etc., etc., and "Editor of the Complete Works of Andrew Fuller," "Works of Robert Hall," etc., etc. Large octavo, 1024 pages, handsomely embellished by nearly two hundred engravings.

This invaluable work is rapidly finding its way among all classes of the American people. The clear, comprehensive, and impartial manner in which the learned author treats each and every denomination, is winning for him golden opinions from the highest authorities in the land. The innumerable lively tales and anecdotes of ministers, churches, and laymen, which he introduces with the articles of faith and all important statistical information, give to the work a life, vigor, and spirit truly delightful. One cannot sit down to it without being convinced that his subject is in the hands of a master, nor rise but with kindlier and more liberal feelings towards the great brotherhood of Christians, under whatever name they bear. Ours is a great, growing, and glorious country, and every family, and every young man, throughout its length and breadth, should have a copy as a text book of all its denominations. Wherever known, it is read, and wherever read, admired. Look at the following from among the very many notices received:

It embodies a vast amount of information relative to the origin, history, and missionary operations of the different religious denominations in this country, presented in a remarkably interesting and attractive manner.—*Rev. John Dowling, D. D., Author of "The History of Romanism," "Judson Offering," etc.*

This is a large and beautiful volume, and will find a cordial welcome in every family.—*Philadelphia Christian Chronicle.*

So far as concerns independence of vision, there can be no question, as Dr. Belcher surveys each sect with the same dispassionate impartiality.—*Epis. Recorder.*

This massive volume embraces a vast fund of information.—*Presbyterian.*

The work is sold by agents, and will furnish a large amount of interesting and valuable information to the families into which it may be received.—*New York Recorder and Register.*

In the account given of the denominations, he is fair, and generally allows them to speak for themselves, as to their history and institutions.—*New York Christian Advocate and Journal.*

It contains a mass of interesting facts and statistics.—*Norton's Literary Gazette.*

Judging from the work, it would be difficult to say what are the religious views of the Editor, so fairly, so dispassionately, so charitably, has he treated each and every sect.—*Philadelphia City Item.*

We presume it will be a standard work in thousands of libraries.—*Littell's Living Age.*

Sold only by agents, to whom certain districts are allotted. For particulars address the publisher,
JOHN E. POTTER,
15 Sansom-st., Philadelphia.
Or, NOYES SPICER, Indianapolis, Ind.

Michigan Southern Railroad Line.

TRAVELERS for Chicago, St. Louis, Kansas, and all points West and Southwest, can obtain through tickets, and all information concerning routes, fare, &c., either by the New York and Erie Railroad, or the New York Central Railroad, by application at the Company's Office, No. 192 Broadway, corner Dey-st., to
JOHN F. PORTER, General Agent.

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c. *Spring Arrangements*, commencing April 2, 1855: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M. For Somerville, (way,) at 5.30 P. M.

The above trains connect at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 1, 4 and 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 6 and 9.45 A. M. and 3 P. M.; Somerville (way) at 6 A. M.

New York and Elizabethport.

Leave New York at 8 and 10 A. M., 1, 4 and 5 P. M.
Leave Elizabethport at 7.15 and 9.10 A. M., 1, 3.15 and 6 P. M. JOHN O. STERNS, Superintendent.

New York and Erie Railroad.

ON and after Monday, May 7, and until further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Dunkirk Express at 6 A. M. for Dunkirk.
Buffalo Express at 6 A. M. for Buffalo.
Mail at 8¼ A. M. for Dunkirk and Buffalo, and all intermediate stations.
Accommodation at 12¼ P. M. for Port Jervis and intermediate stations.
Rockland Passenger at 3 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.
Way Passenger at 4 P. M. for Newburgh and Otisville and intermediate stations.
Night Express at 5¼ P. M. for Dunkirk and Buffalo.
Emigrant at 6 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5¼ P. M.

These Express Trains connect at Elmira with the Elmira and Niagara Falls Railroad, for Niagara Falls; at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicago, &c., and with first-class splendid steamers for all ports on Lake Erie.

D. C. McCALLUM, General Sup't.

Miscellaneous.

From the Walworth County Reporter.

On the Death of Hattie D. Bassett.

BY MISS H. F. B.

She sleeps! but O, how peacefully
Those snowy hands are pressed,
As often, in "life's dreamy hours,"
She slept in quiet rest.

She sleeps! and 'tis the sleep of death!
But O, how calm that brow!
The cares of earth—the mark of time—
Can never change it now.

She sleeps! and it is well that one
Like her in life's sweet prime
Should pass away, ere sorrow's blight
Or care had sought her clime.

How quietly, how peacefully,
She passed from earth away!
A smile upon her youthful brow,
A calm and Heavenly ray!

You miss her! there's a vacant chair,
A voice you loved too well,
A fairy step, a vacant smile;
Those words that sweetly fell,

Can never greet your list'ning ear—
That voice is never stilled;
And O! too sad the chilling thought,
That place can ne'er be filled.

I loved her! Friendship's fairy hand
Had twined for us its flowers,
And in the past together we
Have spent delightful hours.

But though we miss her here, we know
We should not wish her back,
To feel the woes and cares that fill
"Life's dim and checkered track."

Let's be resigned, since 'tis His will,
And say we will not weep,
And only wish to meet her there,
When we with her shall sleep.

WALWORTH, Wis., May 20th, 1855.

From "The Crayon."

Wanderings in the Southwest—No. 5.

SAN ANTONIO DE BEXAR, June 11th, 1855.

Two elements which enter into the topography of Western Texas will give the key to the principal facts of its physical geography. There are firstly, the cretaceous formation, which prevails over all those parts that I have visited, and, secondly, the excessive rains to which it is subject at certain seasons of the year. All the rock that I have seen, and I am told that there is no other until you reach the interior regions drained by the waters of the upper Colorada, where the primary formations abound, corresponds in all respects to the formation of the Paris basin. All the fossils which I have found are represented in that formation, though of differing species. Among these are ammonites, several species of Exogyra, nautilus, &c. The hills are all of limestone, covered in most places with a thick coat of detritus and siliceous stones intermixed with fossil shells.

This rock so closely resembles the French Caen stone of which the public buildings of Paris, and Westminster Abbey are built, and which has recently been imported into New York, that if I were to place a fragment of each before you, you would be at a loss to decide which came from Texas and which from France. It is unquestionably the best building material in use, so soft, that when quarried it may be cut with an axe, or split into slabs with a saw, and hardening by exposure to the air. Whether it will bear the exposure to the severe frosts of the North is a question which the people of New York will, no doubt, have an opportunity to determine. Its strata I have next found disturbed by igneous forces, and the softness and porosity of some of them has given rise to some very curious penomena. At Leona Springs, sixty miles from Eagle Pass, on the Rio Grande, a subterranean river breaks out just where the mountain region ends and the alluvial begins; four miles above this place, the San Antonio takes its rise in the same manner, not in one volume as has been represented, but in the immediate vicinity and apparently from nearly the same stratum, swelling in the distance of a quarter of a mile into a stream not sensibly augmented by all the streams that flow into it, at this time of drouth, above the junction of the Medina. It is a clear, sparkling, rapid, but noiseless stream, filling its channels full, suffering no change with the vicissitudes of moisture or temperature, to which the country is subject. Pecans, the loftiest and most beautiful tree on the plains, throw their shades over it. The loaded vines of the mustang grape drop their clusters into its waters, while ferns clothe its margin in the richest green. One of these springs is worth a long journey to see. It is like a well ten or twelve feet deep, running over full of water of the very standard of purity. As you lean against the tree that declines over it and look down into it, you could not tell but for a slight ripple on its surface where the atmosphere ends and water begins. A plant with a small peltate leaf of bright green lines the rock down to the bottom, and is scattered over the white sandy floor, and each is in constant vibration as the water rises past them. The temperature, like that of all those springs of which I could get any reliable information, is a little higher than the mean atmospheric temperature of the year. This is an exception to Humboldt's rule, that in all hot climates the average temperature of the springs is lower. The temperature of the springs here is 74° and does not vary much from that during the year; however, I am inclined to believe that a careful record has not been kept. I only know positively that the temperature now is as I have stated. At New Braunsfels is another river, starting one mile from town, and flowing past it with a volume equal to that of the San Antonio, but its channel receives the drainage of a considerable region of country above during the rainy season, and is therefore, shut in by high alluvial banks. At San Marcos, east of the Colorado, is said to be still another of these famous springs. I have spoken in a previous letter of the sudden disappearance of the Civolo about thirty miles north of this. From that place there is a dry channel for a distance of forty miles, when water again appears in the form of springs, making a stream of half the size of the Civolo where its waters sink in the limestone rock. There seems to be no reasonable ground of belief that the streams are identical, for the circumstances that determine the course of a river on the surface of the earth, cannot be supposed to control its subterranean channel. I am more inclined to believe that the upper Civolo, after its disappearance, being augmented by the drainage of the region under which it flows, finds its exit at the Comal Springs, many miles nearer. In the excursion which I shall make this week to the Leona and the Nueces, I may be able to add something to this subject. The geological division of the region I have traveled over should be made by a line drawn through this belt of springs, that above being limestone, and that below, with some exception, being alluvial, that distinction being not so apparent as might be supposed, did we not take into account the soft and perishable nature of the rock, and the force of heavy floods. The hills below the springs are chiefly of an alluvium of chalk, containing recent shells, of species now living. It is used for the building purposes, but is so soft and friable as scarcely to admit of handling, nor does it become hard by exposure. Near Helena, this white alluvium appears, but lower down. There is, strictly speaking, but little praireland in Western Texas, as might be inferred from what I have said already. The elevation, though almost imperceptible, is uniform from the sea coast to this place, which has an elevation of six hundred feet. The rivers all have a uniform current from the limestone region to the sea. The country intersected by them is, near the sea, generally level, but ravines begin to show themselves before you have traveled five miles; these increase in size as you penetrate the country; and the surface becomes rolling, or hilly even, to people whose ideas have been formed in a level country. These are the general features, modified, of course, by local causes of no general interest. I cannot avoid observing, in passing, the great contrast that obtains between Texas and California, in respect to this physical feature. In all these points the alluvial districts of the latter country are directly the reverse. The Sacramento, or its tributaries, receive no accession from the plains, but, on the contrary, the water flows from the river on the plains; the land is highest on the bank of the river. It would be interesting to trace the difference further, even into the vegetation, as in the preponderance of the grasses over the flowering plants in Texas; the almost entire usurpation of the latter in California; but I am writing of Texas. One that has traveled through Texas need not be told that it is subject to periods of excessive rains—the whole features of the country, ancient and recent, betray the fact; but the drainage of the country is so good that, though there are but few bridges or ferries, communication through the country is said to be not long suspended. During the summer there is less rain falls than in the north—not sufficient to affect the streams to any great degree. During the last month there have been three thunder storms passing over this place coming from the northwest; the last was followed by a light north wind for three days—during the rest of the time a breeze has been blowing from the southeast, by day and by night; this, taken in connection with the dryness of the atmosphere, which is remarkable, have the effect to make the climate comfortable in the shade, during the hottest weather. This breeze is generally so strong, as to blow papers across the room; but to say that the sun does not do his work well, would be doing him great injustice.

The thermometer generally stands, at noon, in the shade, on the north side of the house at 90°, yet the starch in my collar—we do wear collars here—would not be softened, a catastrophe that would be sure to take place in New York with a temperature of 80° in the coldest place I could find. Laborers work all day in the sun, yet I never heard of a case of *coup de soleil*, cause why, the evaporation from their bodies keeps the temperature of them down, and they don't "melt their kidneys." As an artist, you will say that the atmosphere is "cold," the sky is intensely blue, the green on the most distant hill is, at this season—understand I only speak positively of what I know—as green as that in the neighboring garden, the sun shows fight to the last, and wherever his latest beam falls upon you, it feels like the concentrated focus of a sun-glass; he goes not down with a "battle-stained eye." You see, therefore, there is no chance for the melo-dramatic effect of your hot-house landscape painters. No dew falls at night; though the nights are not warm, one may sleep on the ground with impunity, as many do habitually, at this season, as I have done often, and as I intend to do for the next two weeks, in a country where there has no white man settled. Perhaps, I may get back my beloved pony. We shall go, half a dozen of us, well armed, and, perhaps the Indians will try to steal some more horses! Having no marshes, there are no mosquitos; or, at least, so few as scarcely to be represented in the entomology of this vicinity; they are said to be extremely troublesome nearer the coast. I have not observed the fly that is so troublesome to horses in high latitudes, and they, have not therefore, the habit of stamping the ground; there is a large green fly here that stings them, but they are rare. Per contra, there is an insect here abounding through the early part of the year, but disappearing about the middle of summer; they pervade all places, and are most abundant where they are most to be expected, but when you put your finger on them they ain't there; a genus, with nocturnal habits, that may be cultivated in beds adapted to them, with but little attention. The only order of insects that abound here in great variety are the coleoptera or beetle family; it is too dry for butterflies. Of the orthoptera there are some fine representatives, one of which is the mantis, whose fabulous character has made it an object of superstition among all people where it is found. Lindheimer, the botanist, told me, at New Braunsfels, that he had domesticated one to catch flies about his house, in which it was very useful, and lived with him a long time. There is, also, found here a phasmidæ, a stick with six legs, and nearly as many inches long, one of the largest of the whole insect class.

I have taken much pains to ascertain what may be done here in the cultivation of fruit. It is apparent from what I have already written that the characteristics of this climate, are those of the temperate rather than the torrid region. Under the Mexican population no attempt was made to cultivate what required much care; and the white emigration has been too recent to permit them to devote much time to the luxuries of life. I have been told by those who have been long in the country, that the ants would destroy fruit trees by stripping them of their leaves, and that there was no way of destroying them. At this place I find several gentlemen who have turned their attention to that branch of horticulture. Mr. Lewis and Mr. Vance have both fine gardens. They have succeeded in destroying the ants—one, by digging; the other, by poisoning with arsenic. The latter mode is the cheapest and most effectual. Mr. Vance mixed arsenic with corn-meal, and placed it near their nests daily, until there is not to be found one upon his premises. In his grounds, which are irrigated from a well this year for the first time, he has peaches, plums, apples, pomegranates, figs, cherries, apricots and grapes, all thriving well. Figs are abundant all along the river, where they have survived the decline of industry, in places now otherwise waste places. Pomegranates need no attention; the El Paso grapes needs but little care, and is the finest grape in the conntry. I saw a cluster in Mr. Vance's garden, on which I counted over three hundred grapes, and it makes the finest of wine. Mr. Lewis has not irrigated, and he has found no difficulty with any of the above mentioned fruits. He raises an abundance of peaches, and his apple-trees, though small, have this year several bushels growing upon them, and he says their flavor is equal to any that are raised at the North; his trees, however, were sent from the North, and I suspect that the character of a fruit will degenerate by an acclimation. The apple thrives well in Peru, South America, but its flavor is lost. The banana succeeds well on the coast, but here it has not been tried; it requires a humid climate. There are orange trees growing, but not old enough to prove their capability to bear. The drouth of the present season, unprecedented in the experience of the fruit-growers, will prove a severe test to those trees, not irrigated. That this region of Texas is not subject to frost is a fable; it was so severe last winter as to kill all the fig-trees that I have seen, except those in that town; and its severity here was abated by the temperature of the San Antonio river, which is said never to be lower at this place than 70°. Shoots are springing up again with great vigor from the roots. The Mustang grape grows in the greatest abundance along all the streams, and is the only indigenous fruit of any great value. It is very large; one that I measured this week, as an average sized grape, was two and a half inches in circumference, and I am told that they have not yet attained their full growth. One could make the finest jelly, at no cost, except for the sugar. There is a species of plum growing wild along the water-courses, said to be very delicious, but the fruit was cut off this season by the late frosts. Many years since, under the rule of the missions, thousands of acres, extending over a region eight miles long and from two to four wide, were under high cultivation; the ditches that were dug still remain, and venerable pecans growing upon their banks attest to their antiquity, but the fields which they irrigate are now waste. A few recent inclosures by Germans and Americans are cultivated, and, by deeper plowing, they find irrigation not so necessary, for most purposes, as was supposed by the Mexicans.

The monuments which those old Spanish missionaries have left on the San Antonio furnish the chief object of interest to passing strangers, and their history carries us back to a time coeval with the settlement of some of our Old Thirteen. One is astonished at their enterprise, and the magnitude of their labors, not only in cultivation of a wilderness surrounded by the most formidable savages on the continent, but the edifices they built, elegant even now in their ruins. The style of these edifices is that so common through all the old Spanish colonies—they are massive and rudely elegant. Within a distance of nine miles, there are three of these mission buildings. A ride from town down the bank of the river in the shade of the pecan trees to the first one forms a favorite excursion in the afternoon, and to those who have not seen a fine ruin before, it rewards them well. As you approach it, the dome and towers still appear entire above the rich green of the trees, and gilded by the setting sun. I rode my horse through the door of the church and stood under the dome still retaining the painted fresco-devices. The corners of the arch of the transept were completely occupied by bats; indeed, the whole place was but a hive of them, and if Proserpine had held her court there, they could not have been more numerous. It was just about the time that they issue forth, and some stones thrown into their dense masses awakened them from the torpor of the day, and they swarmed out in myriads, keeping an unbroken column until they had well cleared the ruin, and then it was every bat for himself, and wo to every insect that was found on the wing. When we left the place, the stream of bats still continued unabated. The ride down the bank of the river furnishes some very picturesque scenery, unlike any thing I have seen elsewhere, not extensive, but perfect bijoux for an artist. The Mexican character of this city is fast disappearing under the superior enterprise and taste of its new inhabitants, but much of the old order still remains. The church of the Alamo, now used for government stores, still stands with its battle-scarved walls, where Crocket and his companions fell. I think there is no place in America that has been the theater of more desperate fights, even from the earliest times, and no place is more fruitful of the material of romance than this same place, but its history is unwritten, and the few who remain of those who participated in the most modern of its legends are fast passing away. The plaza has still many of the little one story abode buildings, more like a wall, with windows and doors alternately, which were witnesses of the incursions of the Camanches; these still stand, and a game-cock tied to the door-post tells that a descendant of the founders of the colony there keeps a store. The bell of the church daily rings its matin and vesper chimes, as it rung them nearly two centuries ago; but there has risen by their side the well-built stores of the invader which overtops them, where the auctioneer is knocking down goods at "immense sacrifice," and along the river are little villas that are fast rivalling those of Italy. When I first rode into town, I felt something of disappointment—I knew it was a frontier town which, in 1850, had but 3,000 inhabitants, and the Mexican hovels, the multitude of dogs and half naked children that inhabited them, combined with a feeling of loneliness—that I was a stranger nearly 2,000 miles from any friend, depressed me. But when I looked about the country stretching away in every direction for hundreds of miles, of which this must be the commercial centre, became acquainted with the great number of enterprising northern men and indomitable Germans that have settled here, swelling her population in five years to 10,000; the peculiar advantages of this river head, winding about the place and passing everybody's door-yard; the delicious climate, that combines the mildness of the South with the healthfulness of the North, and I felt a regret that I must leave it, and could not occupy one of the many beautiful little nooks on the river bank, where I might permit my life to flow as pure and tranquilly as its waters. But I am in a reverie. I would recommend to builders and carpenters to direct their attention to this place. Good workmen will command two dollars and fifty cents a day, and three dollars, but to New York builders who will come out here with the capital to buy lots, and build to sell again, there is an easy fortune. The wood-work should be made at the North and sent to Port Lavaca, thence it is transported by Mexican ox-teams. It is only necessary for me to state the fact, that so great is the rage for investment in live stock and land, that money commands five per cent. a month on the best securities; rents are very high, because there are so many better ways of investing money than in building houses to let, even at such high rents. There is a stir and vigorous life here that I have seen in no inland city of the old states. J. D. B. S.

Properties of Charcoal.

The following interesting article, by J. Stenhouse, F. R. S. in the Journal of the Society of Arts, London, will be new and interesting to our readers:—

My attention was particularly drawn to the importance of charcoal as a disinfecting agent, by my friend, John Turnbull, Esq., of Glasgow, Scotland, the well-known extensive chemical manufacturer. Mr. Turnbull, about nine months ago, placed the bodies of two dogs in a wooden box, on a layer of charcoal powder a few inches in depth, and covered them over with a quantity of the same material. Though the box was quite open, and kept in his labratory, no effluvium was ever perceptible; and on examining the bodies of the animals, at the end of six months, scarcely anything remained of them except the bones. Mr. Turnbull sent me a portion of the charcoal powder which had been most closely in contact with the bodies of the dogs. I submitted it for examination to one of my pupils, Mr. Turnbull, who found it contained comparatively little ammonia, not a trace of sulphurated hydrogen, but very appreciable quantities of nitric sulphuric acids, with acid phosphate of lime.

Mr. Turner subsequently, about three months ago, buried two rats in about two inches of charcoal powder, and a few days afterwards the body of a full-grown cat was similarly treated. Though the bodies of these animals are now in a highly putrid state, not the slightest odor is perceptible in the labratory.

From this short statement of facts, the utility of charcoal powder as a means of preventing noxious effluvia from church yards, and from dead bodies in other situations, such as on board a ship, is sufficiently evident. Covering a church yard to the depth of from two to three inches, with coarsely powdered charcoal, would prevent any putrid exhalations ever finding their way into the atmosphere. Charcoal powder, also, greatly flavors the decomposition of the dead bodies with which it is in contact, so that in the course of six or eight months, little is left except the bones.

In all the modern systems of chemistry, such for instance, as the last edition of *Turner's Elements*, charcoal is described as possessing antiseptic properties, while the very reverse is the fact. Common salt, nitre, corrosive sublimate, arsenious acid, alcohol, camphor, creosote, and most essential oils, are certainly antiseptic substances, and therefore retard the decay of animal and vegetable matters. Charcoal, on the contrary, as we have just seen, greatly facilitates the oxydation, and consequently the decomposition, of any organic substances with which it is in contact. It is, therefore, the very opposite of an antiseptic.

To the above, Prof. Mapes adds:

We have already written so much on the subject of charcoal and its properties, that it is unnecessary to add anything to the above remarks by Professor Stenhouse. For the last few years we have found moistened charcoal very valuable for the preservation of fresh plants—thus we have sent many barrels of cabbage plants, packed in moistened charcoal, taken from a cold place at the time of being packed, to Richmond, Norfolk, Petersburg, &c., the plants always arriving in good order. Sacks about the roots of trees when filled with charcoal, will assist in preserving them for long voyages.

All about Rats.

From the Hartford Courant.

We noticed the systematic attack made by rats in New Haven on some children; each singling out his victim and jumping with a simultaneous squeal, upon the little girls playing in a yard. A little boy of two years was caught by the knee, and held until the child's grandfather went to its assistance, and then, as the rat scorned to run, it had to be killed. Attempts had been made to poison these rats, with partial success, and it may have been in retaliation for their poisonous attempts, that this concerted charge was made.

The rat is one of the most interesting animals on the globe. In Europe he makes historical eras—different hordes of invaders brought their peculiar rat in their train. Europe has seen the rat of the Goths, the Vandals, and the Huns. Europe now has its Norman rat and its Tartar rat, and the great rat of the Parisian sewer, is of recent date and Muscovite origin.

The brown rat, otherwise known as the Norman rat, has established itself all over the world, by the commerce of civilized times—it has had possession of France for the last six or seven centuries; but within the last it has found its master in the Muscovite and Tartar rat, called in Paris the rat of Montfaucon. These new rats, previously unknown to Europe, descended from the heights of the great central plateau of Asia, from which the Hun and Mongol horsemen descended, who spread right and left, and took possession of Rome on the one hand and Pekin on the other.

The establishment of the Muscovite rat in France, commenced with the extirpation of the brown or Norman rat—that rat has almost disappeared and is found only in the cabinets of the curious collectors—while the Muscovite rat is daily increasing in size, ferocity and courage. The Russian rat devours the dog, the cat, and attacks the child asleep. The corpse of a man is a dainty for this beast and it always commences by eating out the eyes. Its tooth is most venomous; and the author from whom we derive most of this article, states that he has known of ten cases of amputation of the leg, necessitated by the bite of this rat.

The cat turns tail upon this rat, in its most ferocious state. A good rat terrier is the best destroyer, but fortunately rats are ratophogus, eat one another, fight duels, indulge in broils and intestine feuds, and grand destructive battles. Were it otherwise, they would make this world an unpleasant place for man to live in. We should have to fight our way, and not unfrequently, like the Archbishop of Mayence; should be dragged from our beds at midnight by an army of rats and devoured upon the spot.

The rat is the emblem of misery, murder and rapine—a cannibal and a robber—devoted to the principle of war and spoliation. Will it ever disappear?

CHILDREN HAVE LUNGS.—This fact is either not known to the parents, or very little regarded. The first thing a baby wants is fresh air, and plenty of it. From the moment a child is born, it should have air and light; and neither be shut up in a dark room nor have its head covered up in a blanket.

The other morning, making my first call on a lady, with an infant, I saw a heap of blankets lying in a rocking-chair beside the bed, but there was no baby in sight. When I inquired for the newly arrived, the nurse came, and after taking off fold after fold, there at last was the poor little half-smothered baby, grasping for breath. Mother and nurse got a lecture that time.

Returning in an omnibus, a pretty woman got in, with her baby completely enveloped in its blankets. Perhaps it was none of my business; but I think it was. The baby had as good a right to breathe and have the purest air to be had, as anybody; and as there was nobody else to take its part, I did.

"Madame," said I, "you are smothering that child."

She smiled, and shook her head. She did not believe a word of it.

"You are making it breathe its own breath over and over again; and no air is fit to breathe but once. I am a physician, and can't let you make your child sick."

She uncovered the baby's head. It took a long breath—and if it had been old enough to talk, and been up in its manners, it undoubtedly would have said, "Thank you, Doctor!"

FEMALE SCHOOLS.—We take it that the following description of Female Schools, taken from an English paper, is not wholly inapplicable in some other countries:—

"Expensive, mindless, unpractical and useless, our schools turn out accomplished machines, whose minds are, like Chinese feet, cramped out of all symmetry, power and natural use. A little music, which is merely manual dexterity; a little drawing, which is only distorted imitation of distorted copies—for neither art is ever taught in the breadth and significance belonging to it; a little history, which is but a patriot's roll-call; some geography, which means a dotted outline on a sheet of paper, but which includes neither the natural history, nor the ethnology, nor yet the industry, of foreign countries; needle-work, which leads to every thing but usefulness; modern languages, which when 'finished' reveal neither the literature nor the people, and are equally unserviceable for reading and for conversation—these, as all the world knows, make up the list of English school-girls' accomplishments; and few parents dream of a more useful or more intellectual education for them."

A STRANGE STORY.—The Northampton *Courier* gives an account of a little girl who, when about eleven years of age, fell down a flight of stairs, bringing on a pain in her side, which confined her to her bed, and resulted in the loss of her speech, sight, and hearing. During the time between the loss of those faculties and her recovery, her friends communicated with her by writing with their fingers upon her arm, or by speaking through her fingers, so nicely developed was her sense of touch, while she would write upon a slate to them and make known her wants. During the two years of her sickness it was necessary for some person to keep a hand on her side day and night, and its removal for a moment brought on the greatest pain. Her diet consisted of fruits only and the smell of bread or meats would cause sickness of the stomach, and sometimes produce vomiting. On the night before her recent sudden recovery, she coughed up a worm.

SCARCITY OF WEEDS.—It has been frequently remarked the present season by residents of the West, that the nauseous, rank and annoying weeds that generally spring up over the entire face of nature, where there soil enough for the deposit of the smallest seed, are very few and far between. The growing crops have been but slightly disturbed by these intruders, and in many places, plow-boys are felicitating themselves upon almost a total exemption from plowing corn. The cause of this somewhat remarkable and blessed riddance is the protracted drouth of last summer, which, while killing the grain, did not spare the weeds, drying them up before they went to seed. So there must be one favorable mark placed to the account of the last year's drouth. [Boston Courier.

VARIETY.

It is current that the seat of the whaling interest is about to be transfered from the Atlantic to the Pacific coast. Arrangements are already in progress with several houses to transfer their business from New Bedford, New London and other places, to some point on the Pacific coast. San Francisco, Benicia, Oakland and Monterey are spoken of. Orders have been given to captains of vessels now employed in the whale fisheries in the North Pacific to recruit at the ports of California.

Mr. Tuthill, of Boston, has introduced to the public some self-closing faucets for the supply of water or other fluids; the peculiarity, being that there is no drip nor waste, and also an instantaneous full stream. Vulcanized rubber forms the internal spring and packing to close a valve acted upon by pressure with the finger. It is, in the truest practical sense, a self-closing contrivance, as the fluid can only run so long as the pressure of the hand is upon the valve.

New Bedford, the richest city in the world, in proportion to its population, numbers among its heavy tax-payers twenty-nine who are worth $100,000 each, four worth $200,000, a lady worth $300,000, one man who has $600,000, one worth $800,000, two worth $1,000,000, and any number that can show from 10,000 to 100,000. Most of these persons have made their money from the whaling business.

It is said that there are over three thousand persons in New York City whose only lodging place is the door-step, the coal-box, or the benches in the public squares.

New Steamboat Line for Albany and Troy.

From Pier 15, foot of Liberty-st., at 6 P. M

STEAMER RIP VAN WINKLE, C. W. Farnham, Commander, Monday, Wednesday and Friday, at 6 o'clock, P. M.; steamer COMMODORE, L. Smith, Commander, Tuesday and Thursday, at 6 o'clock, P. M., and SUNDAY, at 5 P. M.

Fares: Saratoga, $1 50; Moreau, $2 15; Fort Edward, $2 15; Whitehall, $2 75; Castleton, $3 10; Rutland, $3; Burlington, $4; Rouses Point, $5 50; Montreal, $7 50.

These Boats will arrive in Albany or Troy in ample time to form connections with all the Railroads, North, East or West, enabling passengers to reach Montreal and intermediate points the same day.

These Steamers are of the first class for strength and speed—well known favorities of the public—having been thoroughly overhauled during the past winter, and offer every accommodation that can be desired by either freighter or traveler.

Through tickets can be obtained on board the boat for Saratoga, Moreau, Fort Edward, Whitehall, Castleton, Rutland, Burlington, Rouse's Point and Montreal

The Northern Freight Express will give Bills o Lading to all points as above named. Shippers who desire it, can have time receipts, by applying at the office on the Pier. A. A. DYKEMAN.

Ayer's Pills.

A NEW and singularly successful remedy for the cure of all Bilious diseases—Costiveness, Indigestion, Jaundice, Dropsy, Rheumatism, Fevers, Gout, Humors, Nervousness, Irritability, Inflammations, Headache, Pains in the Breast, Side, Back, and Limbs, Female Complaints, &c., &c. Indeed very few are the diseases in which a Purgative Medicine is not more or less required, and much sickness and suffering might be prevented, if a harmless but effectual Cathartic were more freely used. No person can feel well while a costive habit of body prevails; besides, it soon generates serious and often fatal diseases, which might have been avoided by the timely and judicious use of a good purgative. This is alike true of Colds, Feverish symptoms, and Bilious derangements. They all tend to become or produce the deep seated and formidable distempers which load the hearses all over the land. Hence a reliable family physic is of the first importance to the public health, and this Pill has been perfected with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing any thing hitherto known of any medicine. Cures have been effected beyond belief, were they not substantiated by persons of such exalted positions and character as to forbid the suspicion of untruth.

Among the eminent gentlemen who have testified in favor of these Pills, we may mention:

Doct. A. A. Hayes, Analytical Chemist of Boston and State Assayer of Massachusetts, whose high professional character is endorsed by the—

Hon. Edward Everett, Senator of the United States.

Robert C. Winthrop, Ex-Speaker of the House of Representatives.

Abbott Lawrence, Minister Plen. to England.

†John B. Fitzpatrick, Catholic Bishop of Boston; also

Dr. J. R. Chilton, Practical Chemist of New York City; endorsed by

Hon. W. L. Marcy, Secretary of State.

Wm. B. Astor, the richest man in America.

S. Leland & Co., Proprietors of the Metropolitan Hotel, and others.

These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compounded not of the drugs themselves, but of the medicinal virtues only of Vegetable remedies extracted by Chemical process in a state of purity, and combined together in such a manner as to insure the best results. This system of composition for medicines has been found in Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any process. The reason is perfectly obvious. While by the old mode of composition, every medicine is burdened with more or less of acrimonious and injurious qualities, by this each individual virtue only that is desired for the curative effect is present. All the inert and obnoxious qualities of each substance employed are left behind, the curative virtues only being retained. Hence it is self-evident the effects should prove as they have proved, more purely remedial, and the Pills a more powerful antidote to disease than any other medicine known to the world.

As it is frequently expedient that many medicines should be taken under the counsel of an attending physician, and as he could not properly judge of a remedy without knowing its composition, I have supplied the accurate Formulæ by which both my Pectoral and Pills are made, to the whole body of Practitioners in the United States and British American Provinces. If however there should be any one who has not received them, they will be forwarded by mail to his request.

Of all the Patent Medicines that are offered, how few would be taken if their composition was known! Their life consists in their mystery. I have no mysteries.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject freely acknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many eminent Physicians have declared the same thing of my Pills, and even more confidently, and are willing to certify that their anticipations were more than realized by their effects upon trial.

They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.

Prepared by Dr. J. C. AYER, Chemist, Lowell, Mass. Price 25 Cents per Box. Five Boxes for $1 00.

Sold at wholesale in New York by A. B. & D. SANDS retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere.

The Sabbath Recorder,

PUBLISHED WEEKLY

By the Seventh-day Baptist Publishing Society,

AT

NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the time to which they reach.

☞ No paper discontinued until arrearages are paid, except at the discretion of the publisher.

☞ Communications, orders, and remittances, should be directed, post paid, to

GEO. B. UTTER, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

THE CHRISTIAN CHURCH.

An Essay on the Constitution and Government of the Christian Church, written for the Seventh-day Baptist Eastern Association, by L. Crandall.

A church, in the simplest sense of the word, is an assembly. "*Ekklesia*," the Greek word, (for which *church* is the translation in English,) was the name by which the Athenian assemblies were called. Those assemblies were for various purposes, including the civil and military affairs of the State. When Jesus Christ came to use the word "*Ekklesia*," in allusion to his followers, he must have been understood to speak of them as a whole. The first time he used the word was as recorded by Matthew, (16: 18,) in the remarkable address to Peter, containing the expression, "Thou art Peter; and upon this rock I will build my church; and the gates of hell shall not prevail against it." No one can suppose that Christ, in this case, had any more reference to his church as then existing at Judea, than when it should extend to Antioch, Corinth, Rome, or elsewhere, in the future. The idea in the mind of Christ was, no doubt, that his divine doctrines should be so established on the earth, by their hold upon the minds of his disciples as a body, that no opposition should extinguish or eradicate those doctrines from among men. If Christ had used the expression *a* church, or *the* church, without associating it with himself or any other individual, nothing could have been inferred as to what the object of the church might be, or by what rules, if any, it might be governed; for the word *ekklesia*, a church, signifies nothing in regard to doctrines or laws. The importance of keeping this fact in mind in investigating this subject, is enhanced for the reason that we have been so long accustomed to associate the word church with Christianity, that we come to understand it to *mean* Christianity. But such is not the fact. The word is just as applicable to an assembly convened for irreligious as religious purposes.

But Christ did not speak of *a* church, or *the* church, *merely;* he said "*my* church." From this associating the church with *himself*, it would follow as a neccessary inference, that the church of which *he* spoke, was to be constituted by *him* for *his* work, and governed according to principles and laws which *he* should establish and ordain for that purpose. In proportion, then, as his hearers had attended to and made themselves acquainted with his *doctrines* and *precepts*, they were prepared to calculate what kind of an assembly his church was to be, and by what laws it would be governed. But in order that they should comprehend fully the whole subject, it would be necessary for them to attend his entire ministrations, and remember and study with especial care those parts of his teachings in which he avowedly delivered and ordained the principles and laws by which his church was to be governed.

Should it be said, that the apostles were authorized and inspired to constitute and give laws to the church, I reply, the church was constituted by Christ, and received its laws from him. But I admit and affirm, that the apostles were authorized to extend the church's area, to build it up, and control or govern it, according to the constitution and by the laws which Christ had ordained. For this reason they were to do everything in *his* name, that is, on *his* authority, or, in other words, according to his orders. Thus, in the 18th chapter of Matthew, after he had, in the 15th, 16th and 17th verses, given them a law for the government of the church, (most indisputably on the condition that they should act as he had required,) he said, "Verily, I say unto you, Whatsoever ye shall bind on earth, shall be bound in heaven; and whatsoever ye shall loose on earth, shall be loosed in heaven." "Again I say unto you, that if two of you shall agree as touching any thing they shall ask, it shall be done for them of my Father which is in heaven." "For where two or three are gathered together in my name, there am I in the midst of them." I ask, did these instructions and promises of Christ authorize these men to do *any* thing and ask *any* thing *imaginable*, with the expectation that God would sanction the one and grant the other? Or did they simply warrant them to depend upon God's sanctioning and granting whatever they should do or ask according to the instructions they had received from Christ? I answer, they authorized the latter only. If otherwise, then Christ gave them a pledge that God would justify wrong, and do wrong, on condition that *they* should do wrong, or unite in asking *him* to do wrong. Further, should it be said, that the assurances of divine sanction and compliance were given them without limitation, on the ground that they should be so inspired that they would not do or ask anything wrong, or at variance with the divine will, in regard to the constitution or government of the church, I observe, *that* is the same thing as saying, that they were only authorized to expect God's sanction and compliance when they acted and asked according to his will *revealed* to them. I think it will now be seen, that though the apostles were fully authorized and inspired to govern the Christian church, in the sense of winning converts to the faith of Christ, and applying to them the constitution and laws which Christ had given, they were *not* authorized to make either constitution or laws for the church as a whole, or for the parts of it, as constituting churches in different places. On the contrary, those very apostles *themselves* were to be subject to the constitution and laws made by Christ for the church. Paul admitted that he was "under the law to Christ," and that Christ was "head over all things to the church."

It may be further inquired, if the apostles had not authority to determine *absolutely*, for the church, as to what the constitution and laws of the church *were*, which Christ had made? To this I answer, they were authorized to declare *absolutely* what Jesus "did and taught." They were authorized to claim certain knowledge of those things, and in the name of Christ demand that individual Christians and churches should conduct in conformity thereto, or suffer apostolic reproof, instead of commendation. And though the apostles seem to have claimed only a single voice or vote in applying the rules of discipline to the members of the church as such, there is no reason to suppose they ever put themselves on a par with others as to what those rules were. For, while they declared, as with authority, what the law demanded should be done in cases where it had been violated, yet they did that in such a form as involved the necessity of church action to effect the end sought. The case in 1 Cor. 5: 3—5, illustrates this point. "For I verily, as absent in body, but present in spirit, have judged already, as though I were present, concerning him that hath so done this deed; in the name of our Lord Jesus Christ, when ye are gathered together, and my spirit, with the power of the Lord Jesus Christ, to deliver such an one unto satan, for the destruction of the flesh, that the spirit may be saved in the day of the Lord Jesus." In this passage we see prominently the authority of the Apostle—the source of that authority, (namely, Christ,) and also the church, as employing an executive power in carrying out the order. For though the Apostle had already judged the offender (the word *concerning*, in the text, being a supplied word,) and determined what the action of the church ought to be, yet the case was not disposed of without that action. It is true, that he claimed a voice in deciding the matter, as one who had a right to vote, even though he were not at the meeting of the church when it should be acted upon. But it does not appear that the Apostle claimed more than a single vote. I mean to say, there is evidence that the Apostle assumed to excommunicate the member himself, as having sole jurisdiction over the church and its members. But he did assume to say what should be done, and also to throw the whole weight of his influence upon the case to affect the action of the church, and also to vote when the question should be taken. But the apostolic recognition of the executive power of the church, harmonizes with the law of Christ, Matt. 18: 17—"And if he shall neglect to hear them, tell it unto the church; and if he neglect to hear the church, let him be unto thee as a heathen man and a publican." Thus too is another evidence furnished, that the apostles were the subjects of law in common with the church, while they declared to the church with authority what was and what was not law. And I affirm, that the apostles were qualified—inspired and fully invested with authority—to witness *infallibly* before men as to what Jesus did and taught, and in his name and authority to confront all who should dispute the truth of their testimony. But in relation to the government of the church, in whole or in parts, all they were empowered to do was, to exert their influence and cast their vote, or give their voice as individuals, in common with other cotemporary believers. With them this right was not limited to any "particular or local church," (as the modern phrase has it,) but they had and exercised the same right in all the churches of their times; nor does it appear that they ever regarded themselves more or less the members of one church than of another. More than this, they appear to have regarded believers generally as having, in common with them, these same rights. The idea that a Christian had no right to act or vote on any question except in the church of his locality, and not there unless his name had been written on their ledger, or that his membership was nothing out of that church, does not seem to have been thought of in the apostolic age. At any rate, there is nothing in Scripture that looks like it. The notoriety of an individual, as a Christian, seems to have been his warrant for claiming to take an active interest in the concerns of the Christian cause, wherever he might sojourn for the time being. Indeed, Christian principles, and the natural sense of propriety, were expected to regulate the conduct of Christians in those relations and under such circumstances, while they were all admitted to be "members of one another." That a delegated authority was sometimes conferred on individuals for particular purposes, is true; but this was not a commission to exercise authority over others, but just to do the pleasure of those who appointed them, and through them, only, could enjoy equality with others with whom they stood in Christian relationship.

Whether questions were decided in the primitive church by a simple majority of voices or votes, or by the concurrence of the whole, may be difficult to ascertain; but that, sooner or later, such an equality as existed in that church must result in the rule of the majority, is without doubt unavoidable. This view of the subject agrees with the teachings of Christ, Matt. 20: 25—28—"But Jesus called them unto him and said, Ye know that the princes of the Gentiles exercise dominion over them, and they that are great exercise authority upon them. But it shall not be so among you; but whosoever will be great among you, let him be your minister; and whosoever will be chief among you, let him be your servant; even as the Son of Man came not to be ministered unto, but to minister, and to give his life a ransom for many." See also Matt. 23: 8—"But be ye not called rabbi; for one is your master, *even* Christ; and all ye are brethren." This no doubt applies to others as well as the apostles. Without denying that the Christian church may, in some sense, have existed before Christ came in the flesh, the following things are regarded as being established by the foregoing considerations and texts: 1st. That Christ is the only lawgiver to his church. 2d. That his apostles were authorized and inspired to give a perfect account of the laws which he gave for the constitution and government of the church.

In attempting to present the principles on which the church was constituted, I propose to state them in the form of a Constitution. The elements of the law given to the church I will set forth something in the form of law. I will suppose the Constitution of the church to be as follows:—

Article 1st. This church shall be called the church of Christ.

Article 2d. The objects of this church shall be to bring about, as the inseparable results of one and the same set of causes and means, the blessed immortality of man, who has ruined himself by sin, and the glory of God as the source of all good.

Article 3d. Any person may become a member of my church upon the exercise of repentance towards God, and faith in me.

Article 4th. The ceremony of becoming a member of my church shall consist in a public profession of repentance towards God, (which is repentance of all sin, [illegible] belief in the divine authority of my mission and teachings,) and immersion in water, into the name, or upon the authority, of my Father, myself, and the Holy Spirit.

Article 5th. Each member of my church shall be under obligation, (in the light of revelation,) to judge for himself as to the duties he is under, and shall be free to act according to his own convictions of what is right, except when his acts infringe upon the natural and equal rights of some other individual or individuals; in which case he may be restrained by such means as may be necessary to protect others from harm.

Article 6th. The practical administration of government in my church shall be vested in the members of the church, each having a right to exert what influence he may *honestly*, and give one voice or vote in the decision of any question; except when he, or his right, or duties, are the subject in hand; and even there he shall be allowed to speak for himself; and as the greater number of the church shall decide, such shall be the decision of the church; which, though it regulate the course of the body, shall not destroy the right or obligation of those who judge differently, to act according to their sense of duty, even though it result in their separation from the church.

Article 7th. The officers of my church shall be as follows:—There shall be a King or Universal Head, twelve Apostles, one or more Deacons, Pastors, Elders, Evangelists, and Teachers, who, (with the exception of the Head, who is "chosen of God," and the apostles, who are chosen by the Head, and will have no successors in office,) shall be chosen by the church.

Article 8th. The Head shall hold his office forever—make all laws for the government of the church, and finally award all its members. The apostles shall hold their office during life, publish this Constitution, and the laws I shall enact for the government of the church, in connection with my Gospel. The other officers shall hold their offices so long as it may please themselves and the church, and perform such duties as are usually performed by such officers.

Article 9th. No alterations shall at any time be made in this Constitution, or the laws of the church, between my ascension into heaven and my second coming upon the earth.

The laws enacted for the church by its Head may be summed up thus:—I enact and ordain, that the members of my church shall love God with all their strength, he being supreme, and their neighbors as they love themselves, as being equal to themselves. In the exercise of these affections they must glorify God by the cultivation and practice of holiness, through obedience to all his will, which will require continually acts of worship to Him, and good doing to their neighbors or fellow men.

Among the duties required of the members of my church, as acts of worship, and service towards God, will be secret and social prayer, thanksgiving and praise. Inseparable from these things will be the work of making known to all, as nearly as possible, the way and means of salvation for the human race as wrought out and provided by God in my person, services, sufferings, death, resurrection, and intercession.

In respect to each other, they must observe the following: They must carefully observe each other's conduct, for the purpose of promoting and approving whatever is right, and of retarding and reproving whatever is wrong in each other. Whenever a member of my church has knowledge of a trespass of any law of the church, committed by any other member or members thereof, he must, if practicable, get an opportunity with such person or persons, alone, and do what he can to effect a correction of the wrong done, whatever the nature of it may be. If he can correct the evil in that way, he must not employ other means; but if not, he must take one or two other members with him, and with their *aid* try to correct the wrong. If he cannot thus succeed, *he must* lay the subject before the church, and their decision *must be final*, whether the offender retain this membership, or become to the church as a heathen man or a publican.

Besides the ordinance of immersion in water, by which *only* individuals become members of my church, it shall be their duty to keep my Supper, (instituted on the night before my crucifixion,) which consists in eating bread and drinking wine, in memory of my death, and as an individual and collective declaration of their faith in me, and a mutual pledge of confidence in each other's fidelity to the constitution and laws of the church.

The performance of the various duties above required will make it necessary for my church often to assemble for worship, or business, not only on the Sabbath, but at other times. These frequent meetings, and particularly the business growing out of them, in providing for the poor and preaching my Gospel to mankind, will involve much expense, which must be paid by each according to his ability.

When a member is entrusted with any office, by the church, or a church, he shall be amenable in respect to that office to any other church among whom the rights and duties of said office extend, and in just such measure as those rights and duties do extend.

The individual churches shall be amenable to the church at large, as individual members are amenable to particular churches. And the same law shall apply to churches in their relations to each other, and the whole church, that applies to individual members in their relations to each other, and the churches where they belong; that is, when one church knows that another has violated the common faith, it shall in its single capacity seek to correct the wrong; if successful, well; if not successful it must refer the matter to the church or churches at large, and their judgment shall be final, in the same sense as a single church, decision is in dealing with a member. The grounds covered by the action of churches in such capacity are the same as is embraced in the compact into which they mutually enter. If they enter into agreement to labor to promote the interests of religion in general, then they are amenable in whatever covenant to coöperate in specified kinds of labor, their accountability is limited to those particulars. [To be continued.

MISSIONARY LIFE IN NEWFOUNDLAND.

The following is an extract from a letter written by a missionary in Newfoundland to the *Gospel Messenger*:—

"You cannot imagine the nature of my work now I am stationary here. With the thermometer at 10 deg. Fahrenheit, it is rather too cold to be on the water, but from April to November, I emigrate between one or two parallels of latitude, and for a month or so at a time I seldom sleep more than twice in the same bed or sit two days together at the same table. This may be very pleasant in theory, but without a most accommodating appetite and great power over sleep, it is very painful in practice. Tossing about in wind and fog and rain, is not in accordance with one's natural taste.

I wish you could have seen the Bishop, his chaplain, myself, and a student, sailing in a little rotten skiff, in half a gale of wind, with rain. There was a hole in the plank, and every motion of the little vessel on her beam ends shipped a great deal of water. The Bishop was forward attending to the jib, his chaplain took charge of the fore-sheet, I of the main-sheet, the student kept the pump going, to keep us above water, and the man steered. As the sea broke over us, the Bishop bent down under each wave and shook himself clear of the water after the dive. He is the best Bishop the diocese could have, a good sailor, and of most undaunted moral courage.

While I am thus employed, my wife is at home without any society within forty miles. It does try her, but then she is also a servant of the Cross, and remembers it. Then as for living, for nine months at least meat is hard to be obtained, I mean fresh meat. We victual our store-room like a ship—bags of biscuit, barrels of flour, and salt junk. Salt pork and cabbage are the highest luxury of Newfoundland, though I have enjoyed 'Band,' that is, codfish and salt pork fried together. The fact is, habit will accommodate us to anything.

To-day, a gang of eight men have been dragging the church firewood over four large ponds (on the ice of course) in sleighs; the firewood was felled a few weeks since by another gang, and my wife and I went to meet them just before dinner, the ice being as clear as Aberdeen alabaster, as slippery as glass. I am a schoolmaster just now as well as a clergyman."

FOLLY OF PRIDE.—Says Sydney Smith: "After all, take some quiet, sober-minded moment of life, and add together the two ideas of pride, and of man; behold him, creature of a span high, stalking through infinite space, in all the grandeur of littleness. Perched on a speck of the universe, every wind of heaven strikes into his blood the coldness of death; his soul floats from his body like melody from the string;—day and night, as dust on the wheel, he is rolled along the heavens through a labyrinth of worlds, and all the creations of God are flaming above and beneath. Is this a creature to make himself a crown of glory; to deny his flesh, to mock at his fellow, sprung from the dust, to which both will soon return?"

"I WILL KEEP THEE."

"A GEM OF ANTIQUITY."

Thus, said Jesus, I will keep
In safety my defenceless sheep,
From sin and endless misery;
Seeking soul—I will keep *thee*.

Soul. Lord, I believe thy word is sure,
But I am ignorant and poor;
My goodness reaches not to Thee,
For *mercy's* sake, wilt Thou help me?

Jesus. I passed by the rich and brave;
Thee, needy soul, I came to save;
The poor in spirit blessed be,
Oh! trust me then, I *will* help *thee*.

Soul. But Lord, I have a deeper wound,
An evil heart within I've found,
My nature's enmity with Thee,
Offended King, wilt Thou keep *me?*

Jesus. Of old thy evil I beheld,
Yet was with love and pity filled;
I therefore died to set thee free;
For my *own sake* I will keey thee.

Soul. True I have proved thy power, my God,
And felt efficacious blood;
But sin remains though it I flee;
Wilt Thou preserve backsliding me?

Jesus. Before I wrought upon thy will
I knew how treacherous thou wouldst deal,
I did thy base trangressions see,
And yet resolved I would keep thee;
But thou shalt conqueror be at length;
'Till then I will renew thy strength;
Sin shall not have the victory;
Only *believe*—I will keep thee.

Soul. Permit me once again to speak—
Sometimes thy face in tears I seek,
And oft a gloomy veil I see;
Cans't thou be *wroth* and yet keep me?

Jesus. Let then this answer thee suffice,
In *anger* I do not chastise;
More fervent be thy cry, thy plea,
And as I live, I will keep thee;
But if thou dost forsake thy God,
Then will I visit with the rod;
I may correct to a degree,
Nevertheless, I will keep thee.

Soul. But ah! I feel temptation strong,
And if my journey should be long,
I fear I shall dishonor thee;
Wilt thou *continue* to keep me?

Jesus. Can I forsake my heart's delight?
Thy end is precious in my sight;
I conquered death on Calvary,
And from its sting I will keep thee.
I will be near thy dying bed,
Amid the waves sustain thy head;
My rod, my staff, thy pass shall be;
In perfect peace, I will keep thee.
I am the ark that goes before,
To guide the pilgrim safe to shore;
At my rebuke shall Jordan flee;
In *life*, in *death*, I will keep thee;
Then, then, my sister, then my spouse,
I will fulfill my sacred vows,
And thou in bliss my glory see,
When on my throne I've placed thee.

Soul. It is enough, my Lord, my Love;
The hills, the mountains, must remove,
But I shall still unshaken be;
Thy word is *passed, Thou wilt keep me!*

SPENCER H. CONE.

SPENCER H. CONE, D.D., pastor of the First Baptist Church in New York, died on weeks from the effects of a stroke of paralysis. From a biographical sketch in the New York *Times*, it appears that Dr. Cone was a native of New Jersey, having been born at Princeton in April, 1785. His father, Conant Cone, was descended from the first settlers in New England; his mother was second daughter of Col. Joab Houghton, of New Jersey. Both parents were members of the Hopewell Baptist Church in Hunterdon County. Young Spencer enjoyed the advantages of a pious home education. His mother always entertained a belief that her boy was destined for the ministry, and bestowed great pains upon his culture. At the age of twelve, he was fitted for College, and entered at Princeton, but remained there only for a period of two years. Domestic afflictions required his presence at home, and he returned to assist the family by teaching. He never returned to College. After assisting for three months in teaching at the Academy in Princeton, he undertook the charge of a school in the town of Springfield, New Jersey, and continued in that place for a year. By invitation from his friend Dr. Allison, he then assumed the duties of instruction in Latin and Greek at Mr. A.'s Academy in Bordentown, to which place the Cone family removed. The subsequent year he accepted an appointment in the Philadelphia Academy, under Rev. Dr. Abercrombie, and occupied that post for four or five years.

At the end of this period, however, a change came over young Cone's affairs. Teaching, then as now, afforded but a limited income in return for very severe application. Wearying of the prospect that constantly presented itself to his imagination, desirous of benefiting his family to a greater extent than he had hitherto been able to do, and believing that he had a mission for the stage, he became an actor. For *seven years* he remained in the theatrical profession, playing principally in Philadelphia, and realizing an income which ranged from fifteen hundred to twenty-five hundred dollars per annum. But the seven years' period came to an end. Cone was disgusted at the spectacle of an actor of inferior character being ignominiously hissed off the stage, was led to institute moral reflections upon the character of the persons by whom he was surrounded, saw no profit in dependence on the fickle taste of theatrical audiences, and concluded to retire. He did so. He never resumed the actor's disguises.

His next venture was in the office of the Baltimore *American*, where he took charge of the books and funds. In May, 1813, he was married to Miss Sally Wallace Morrell, a young lady residing in Philadelphia, to whom he had been engaged for two years. Mrs. Cone died only a year since.

During the last war with England, Mr. Cone saw active service. He commanded a Company of Volunteers from the City of Baltimore, and was present at the contests of Baltimore, Bladensburg, and Fort McHenry, but escaped without a wound in all.

After his newspaper experience, Mr. Cone undertook the duties of a clerkship in the Treasury Department at Washington; but he remained there only for a short time. It was the last of his charges before he decided upon entering the ministry. The early religious training he had received, working up through all the encrustations of worldly pleasures, and penetrating through the hard coating of a theatrical life, found its whole development as he reached the turning point. His conversion occurred during his residence in Baltimore, shortly after leaving the office of the *American*. The circumstances which attended this event have been strikingly recorded by Dr. Cone himself. "Having served the proprietors of the *American* more than a year," (he says,) "John Norvell, Esq., of Kentucky, who married my youngest sister, (long since dead,) and who has since been Senator of the United States from Michigan, induced me to unite with him, and purchase and conduct the Baltimore *Whig*. . . . Politics and war completely engrossed my mind. . . . In the month of November, 1813, after breakfast, I took up the newspaper, and saw, among other things, a large sale of books advertised at Wood's auction-rooms, and said to myself, I will look in as I go to the office and see what they are. I did so, and the first book I took up was a volume of the Works of John Newton. In an instant my whole life passed in review before me. His dream of the lost ring reminded me," &c. Feb. 4, 1814, ice a foot in thickness was cut in the Patapsco River, and Mr. Cone was baptized into the First Baptist Church of Baltimore. His induction into the ministry was as remarkable as his conversion. He was invited to lead the Sunday morning prayer meeting in the little Baptist Church at the Washington Navy-Yard, just then in want of a pastor, preached on the following Sunday, believed he was "called to the work," wrote to Baltimore for and obtained his letter of dismissal, and June 24, 1815, was duly licensed as a Minister of the Gospel. Forty years accordingly have passed since the Doctor began his ministry. His subsequent career is well known. A few weeks after his ordination, in 1815, he was Chaplain to Congress; in 1816 was pastor of the Baptist Church in Alexandria, D. C.; in May, 1823, removed to this city, and here occupied the pulpit of the Oliver-street Church for a period of eighteen years. On the 1st of July, 1841, by a unanimous vote of the First Baptist Church, he received a call from that congregation, and has since continued its pastor.

In the year 1836, Dr. Cone was chosen President of the American and Foreign Bible Society, and occupied that position for thirteen years. He was also identified with the cause of Baptist Missions, and for nine years was President of the Triennial Convention, a body which at that period embraced representatives from all the States in the Union.

But it is chiefly from his intimate connection with the *New Version* plan that Dr. Cone has been noted for a number of years past. The agitation of this question, which has since convulsed the Baptist Church, and produced a division in the Bible Society, began as early as 1833. It was renewed with great vigor in 1850. A preliminary meeting of the friends of the New Version was held on Monday, [illegible] June a regular public meeting was held at the Baptist Tabernacle in Mulberry street, the result of which was the formation of the American Bible Union, with Dr. Cone as President. The sessions were prolonged and animated, and the discussions pungent. Dr. Cone had by this time fully espoused the idea that King James' version of the Scriptures teems with errors, both of press and by translation; and vigorously defended his positions by argument. The leading sentiment was, that it had become the duty of Christians to procure and circulate the most faithful versions of the Scriptures *in all languages*. With this end in view, the "American Bible Union" was projected, has been conducted, and still exists. In the death of Dr. Cone it loses a very staunch friend and supporter.

In person, Dr. Cone was of medium height, rather spare; was exceedingly voluble, earnest, and full of anecdote; warm hearted and impulsive, he loved his friends and said sharp things about his enemies; was sensitive to praise or censure, and enthusiastic in his advocacy of whatever he conceived to be right. In preaching, he spoke without notes, and frequently employed copies of the amended version of the Bible in his pulpit. He leaves two children, grown up and engaged in business.

A SERMON WITHOUT ANY RELIGION.

Here is an anecdote which contains a hint for another description of ministers than that to which it originally referred: When Martignac was first proposed as Prime Minister to Charles X., "No!" said the king, "Martignac would never suit me. He is a verbal coquet, who holds, above all things, to the graceful symmetry of his sentences. To secure a well turned phrase, he would sacrifice a royal prerogative. A minister should not hold too jealously to the success of his prosody." Not unlike this was the instance of the young man who, beginning his ministry at the seat of a well known university, and having in his congregation some of the faculty and many of the students, thought it necessary to appear intellectual, and treated the congregation, on his first appearance, to a nice little essay about something—no matter what. On his way home he overheard some of the students praising his sermon as a fine production, and his ears just caught the rejoinder from one of the number, in terms somewhat profane, to this effect:—"Yes, it was a fine sermon; but after all, it would have been in good taste to have had a little religion in it."

The above reminds us of an incident related to us by a Baptist brother who had resided for several years in Savannah, Ga., and had there married a wife. On coming north with his bride, they spent a Sunday in Boston, and it was proposed that they should attend service at a Unitarian church one-half of the day, the lady never having heard a preacher of that denomination. They did so, and heard a very elegant discourse from Dr. ——, one of the most distinguished ministers of that sect. On their way home the lady was asked how she liked the discourse—to which she replied, that "it seemed quite interesting, but she hardly knew what to make of it, for it was the first sermon she ever heard that was not about religion!" [Zion's Advocate.

BE YOUR OWN EXECUTOR.

A worthy brother, whom the Lord has prospered, sends a communication to the *Recorder*, to which we invite the attention of our readers. He proposes to make each of his children a life member of the Missionary Society, and incidentally suggests the propriety of every man being his own executor, instead of leaving his goods to be distributed by others who outlive him. We like the suggestion; we heartily approve it. It shows something like good will to the cause of God, when a person bequeaths for benevolent objects what he cannot enjoy any longer; but it shows a still better spirit, when one aids these objects during his life time, and is content to enjoy less of earthly good for the sake of aiding them.

We are to serve God *with all our powers*. The Law makes this our duty, and the Gospel requires nothing less. Now wealth is a *power* for good, or evil. With it, we may serve God, and promote his cause; or we may serve satan, and do immense mischief. As every other power we possess should be employed in the service of God, *while we live*, so should this. If we can make it work for God, after we are dead, it is right that we should do so; but at all events, let us see to it that, while we live, it is accomplishing the end for which it was given. Who knows what turn affairs may take, after he is dead? Who knows but what the institutions in which he may invest his funds may be prostrated by some calamity, or by the fraudulent management of their directors? Who knows but what every dollar he might thus invest, designing its interest for the cause of God, may thus fail of accomplishing what he proposes? Who knows that his executors will prove strictly faithful? Who knows but what war, and the subversion of existing forms of government, may alter the condition of what property he may bequeath, so that it shall become a power for evil instead of good?

It is strange that, while the obligation to serve God with every other power is acknowledged, the duty of serving Him with our money impresses us so feebly. Most men seem to regard this as given to them, principally, for their own enjoyment. On themselves and their families, they think, it must all be expended. Hence, if they accumulate more than they require for immediate use, they must "lay it up for a rainy day;" and if more than they can use during their lifetime, they bequeath it to their near relatives. And not a little trouble are they sometimes subjected to, to make their wills so as to keep their property within the circle of those related to them. No matter whether their children be benevolent, or close-fisted, the mere fact that they are children is regarded as good reason for bequeathing to them the inheritance. Indeed, the more greedy of gain they are, the more satisfaction do parents take, as a general thing, in bestowing upon them; for such children, they suppose, will *keep* what is given them. If one of the children shows a benevolent or liberal spirit, they are very suspicious, that the property left to him will soon be *wasted*. The fact that he will probably do good with what is entrusted to him—that he will relieve the needy, comfort the distressed, or in some way make his property the means of blessing mankind—is regarded as a poor recommendation. Such a one must be cut off with a short allowance; the bulk of the estate must be bestowed upon such as are rather "sharper" to look out for themselves.

The brother to whom we have alluded, acts, we are happy to know, upon a different principle. He looks upon his property as a power with which he is bound to serve his Lord and Master. He means it shall do good while he lives, and has the power in his own hands. And instead of training up his children to consider the accumulation of money for self-enjoyment the great end of life, he trains them in habits of benevolence. He teaches them that they are to live for others, not for themselves. And if he should, after doing as well as he can with his property while he lives, have anything to leave them when he is gone, he knows that he leaves it with those whom he has taught "to do good and to communicate." He has every reason to believe that they will teach the same to their children. And he is troubled with no fear that his property will *go to waste*, in this way. He is willing to take God at his word, and fully believes that "there is that scattereth, and yet increaseth; and there is that withholdeth more than is meet, and it tendeth to poverty."

We want to see more of this spirit prevailing in our denomination. Will not those upon whom God has conferred this world's good, be stimulated by the example of this brother to do likewise?

T. B. B.

To the Editors of the Sabbath Recorder:—

I have long been impressed, that as a denomination we are not doing as much as we ought to for the evangelizing of the world, for the spread of the Gospel, for the conversion of the heathen. The Lord in his goodness has prospered us as a people—he has poured into our coffers an abundance of this world's goods; and how can we shake off the responsibility of bringing forth fruits corresponding therewith, without incurring guilt. We have but one life to live, and that probably very short; then why not be our own executors, and use the good things of this world, with which the Lord has prospered us, in scattering the seeds of Divine truth, and bringing souls into the Kingdom?

I have a large family of children, (ten in number,) and the Lord has prospered me also in business. Now I propose to make them all life members of the Missionary Society, beginning with the oldest. I want to accomplish it in five years, by paying fifty dollars a year. I can do it. Some years I may pay more—some less, as I may be successful or unsuccessful in my business. I want to accomplish it at least before I finish my career, so that, if I have no other legacy to leave them, I will leave them interested in the cause of suffering humanity. I have two objects in view—first, to increase the funds for our missionary operations—second, to create an interest in the minds of my children for the cause of truth.

Now I have no other object in view in making this public, but to provoke, if possible, some of my brethren to do likewise, or do better in some other way. Some may be able to do more—some not so much; some have no children—they may (if they choose) make some poor brother's children life members of the Missionary Society, and thus increase an interest in the cause of missions. I hold that we are abundantly able—nay, more, that it is our duty to double and treble our missionary operations.

DOMESTICUS.

NEW JERSEY, Sept. 2, 1855.

THE FUTURE OF CHINA.

The readers of the *Recorder*, particularly those of them who are supporters of or take an interest in the missionary effort in China, doubtless take a lively interest in this question. It is very desirable, on many accounts, that the probabilities of the future should, as far as possible, be known. If we could arrive at a tolerably certain conclusion on this question, the way of usefulness and duty in the case would be much more clear and certain. The friends of missions, in view of the case, might feel it to be their duty to redouble their efforts; or, in another view, they might think it best to withdraw from that field altogether, as being almost hopeless of important results, and direct their efforts to localities more promising of a reward. "The harvest truly is great, but the laborers are few." In view of the very great magnitude of the harvest, in comparison to the fewness and feebleness (as to power and means) of the laborers, there is an urgent necessity for a rigid economy in the direction of their labors—that they should be expended on the most fruitful fields, where the greatest results can be obtained, and not be dissipated upon dreary and barren wastes. We propose, in the present article, to make a few remarks in the form of suggestion and interrogation, rather than as presenting any very definite conclusions.

Our first inquiry is, What will be the probable destiny of the different races of men? This leads to another inquiry, What is the *nature* of the different races, physical, mental, moral, and religious? The study of man, in all these relations, is comparatively a modern study. The discovery of new truths removes the old landmarks of system, and introduces contrariety of views, controversy, and seeming uncertainty. After going through a period of mental and moral anarchy, as it were, the truth makes its way, and the thoughtful world gradually settles down into definite conclusions. The sciences of physiology and of geology are in point. The greater the accumulation of fact and discovery, the more definite the conclusion, and the less the controversy on the subject. The science of the races of men is at this time somewhat in this condition of dispute and anarchy. Those who live a quarter of a century from this time, will probably have much more certain and definite views on this subject. The most superficial observer will readily see, that there is a wide difference between the different races of men. What have been the causes of these differences it is not necessary for us now to dwell upon. They exist, beyond controversy, and man is probably not capable of ascertaining all the causes. The Christian believes that debasement, degradation, misery, and death, are brought upon individuals, families, communities, and nations, as the wages of sin. Sin brings the race of man into a condition of physical, mental, moral, and religious debasement and degradation. The tendency of sin is to sink a race lower and lower, until they become comparatively incapable of regeneration. We read in the Bible of nations and peoples being so far sunk in sin and debasement, as to be doomed to destruction. Are the same general principles in action in the world at the present day that were in the ancient world? Many think that they are—that nations and races may be so far sunk in sin as to be incapable of regeneration—that from some inscrutable dispensation of Providence, they will remain in their sins, and pass away from the face of the earth, as many ancient nations have before them. The ancient people of God were forbidden to associate or have any friendly intercourse with certain nations and peoples, in consequence of their sin and wickedness. But it is said that Christianity introduces the law of love to all. True; but may it not also be true in modern as well as ancient times, that a people may be sunk so low in sin as to be scarcely capable of receiving the gospel, and that missionary effort upon them is nearly in vain—that it is labor thrown away, which ought to be bestowed where some valuable result can be obtained.

Here it may be asked, have we any tests or criterion, or means of judging whether a people is or is not capable of regeneration? Some of our modern writers upon natural history and the science of man, say that we have. They say that only the white races of men are capable of civilization in the higher sense of that term—that only the white races of men, and not the dark or colored, are capable of receiving the higher moral and spiritual doctrines of Christianity—that the dark and colored races of men are only capable of an humble grade of improvement—that their civilization is of an humble grade, and has been stationary for many ages—that the dark and colored races are, by the constitution of their physical, mental, moral, and religious nature, idolaters, polygamists, and barbarians. The Chinese, who are perhaps in the highest condition of civilization of any of the colored races, after gaining a victory, put to death hundreds of prisoners.

We find that our article is extending beyond what we intended. We are an inquirer, wishing to learn, and our intention was to start an investigation—to elicit and make known the truth. The readers of the *Recorder* have doubtless read the dark and dreary views of the prospects of China by the Rev. Dr. Parker. The Hon. Humphrey Marshall and the Hon. Louis McLean give similar or perhaps less hopeful views of that people.

These views in relation to the different races of men will doubtless be deemed erroneous and objectionable by many, and will be strongly controverted. It is the intention of the writer to avoid controversy on this subject. He would wish to occupy the position of an inquirer; he would wish to learn and know the truth. He may, however, notice what may be said on the subject so far as to correct mistakes and misunderstandings. We will conclude by suggesting the inquiry, Is it true, that the dark and colored races are, and always have been, idolaters in religion, polygamists in their domestic relations, and barbarous in government, excepting in cases where they have lived in close connection with the white races, and that when separated from this connection, they rapidly fall back into their naturally degraded condition?

INQUIRER.

FROM THE LAND OF CANAAN—NO. 2.

JERUSALEM, June 10, 1855.

DEAR SISTERS—Through the kind providence of God, we are enjoying better health—still, not our full strength. Mr. Saunders is investigating as thoroughly as possible in reference to a permanent location. Thus far we have seen no place where the door of usefulness is open to us as at Jaffa, and we are still hoping that we may be able to continue in this most interesting field.

Last winter a poor Jew came to us—said he was sick, and unable to do any thing for his suffering family. He expressed a wish to become a Christian, wanted us to take him in and his family, which we were under the painful necessity of refusing. We gave him some clothes to cover his half-clad, emaciated form, and some money to buy bread for his hungry babes. Whether he was sincere in his wish to become a Christian, I am unable to say; still, one thing is certain, they are objects of charity; he often comes to us for aid, and we are doing what we can for them. We have had a number of similar cases, and I hope the time is not far distant when we shall have a home for these poor sufferers.

Mr. S., Martha, and myself, left our home on the afternoon of June 6th, rode one hour amidst the beautiful gardens which are around Jaffa, where the lofty palms with their clusters of dates, and the broad dark-leafed fig, cast their welcome shadow on our pathway. Then we entered the open plain. Met an Arab sheik mounted on a glossy Arabian. His dark face, piercing eyes, golden striped head-dress, gun, sword, and his attendants, with their brilliant trappings and long spears glittering in the sun, gave them a grand yet fearful appearance. Next a group of women in their white sheets, seated upon the ground; others bringing pots of water on their heads from yonder fount; here and there a shepherd with his long rod watching his flock of sheep and goats; now a long file of camels slowly pacing on, laden with the fruits of the country. Every object that meets the eye is picturesque in its appearance, and oriental in its character. One hour from Ramla the road branches off on the left to Ludd, the ancient Lydda, which lies in full view—the town of Benjamin, and where Peter preached the gospel in the name of the Lord Jesus, and where he restored Eneas to health, who had been palsied for eight years. According to Josephus, this town was destroyed by Castius, and afterwards rebuilt and became famous for its Jewish Academy. Three hours' ride brought us to Ramla, the ancient Arimatha, the native place of Joseph of Arimatha, who begged and obtained the body of Jesus from Pilate. Our muleteer conducted us through the narrow, gloomy streets, to the house of Mr. Marcus, the American Vice-Consul, where we met with a warm and cordial reception.

Rising at twelve o'clock, we were again pursuing our way by the light of the innumerable stars, which were most glorious in the arch of heaven. Not a sound was heard but the tramp of our horses' hoofs upon our midnight pathway. We gave our minds up to meditate upon the past history and the present condition of this country, which is deeply interesting. There are powers now at work worse than Herod and Nero; and the time may be not far distant when Christians here may have to stand again the test of their faith in God. Yet I rejoice that we live in this important epoch of time; for I believe the day of salvation will soon dawn on this land. The desolation has been complete; the restoration will also be complete. As we rode on, I raised my heart to God, that we may ever be found worthy to bear some humble part in this great and glorious work. At length the red glow of morn gleamed upon the eastward hill-tops, and we we were still winding our way through the narrow gorges and over the rough fragments of rock. Our progress now became very tedious and fatiguing; the ascent became steeper and steeper, until I scarcely dared to look down from the dizzy heights. We had now become so weary that we could scarcely sit upon our horses; still I was cheered by the thought that we should soon gaze upon Jerusalem, the valley of Jehoshaphat, the mount of Olives, and the garden of Gethsemane. At ten o'clock A. M. Jerusalem rose in her solemn grandeur before us. After a brief pause, we rode on in silence, and at eleven A. M. we could say with the Psalmist, "Our feet stand within thy gates, O, Jerusalem."

June 14.—I am now standing upon Mount Sion; it is early morn; all is quiet; I hear nothing but the low pensive moan of the turtle dove. I take advantage of this calm sweet hour to take you upon the terrace where we can have an extensive view of the objects of interest, both near and distant. Now you see that Jerusalem stands as a city "compact together," on an elevated promontory, in the midst of hills, separated from all by natural valleys of great depth, except on the north. "As the mountains are round about Jerusalem, so the Lord is round about his people, from henceforth even for ever more." The Holy City, which is now spread out before us, is full of its attractions; yet we will first notice some of its environs. For every path, town, and village—every mountain, hill, and valley—is linked with the wonderful history of the past. The road which you see crossing the high table land on the southwest, leads to Bethlehem, the birth-place of David, and where he spent his early years as a shepherd; from there we have the beautiful "gem in oriental history," the narrative of Ruth. There was also the birth-place of our Lord and Saviour Jesus Christ. The hill south of this road is where Solomon dishonored his God by sacrificing to idols. Beyond is the plain of Rephaim, where the Philistines "came up and spread themselves" against David, and where he smote them and burned their images. Near this, according to Josephus, he killed Goliath with the stone and sling. Next we see the Potter's Field. "And the chief priests took the silver pieces and said, it is not lawful for to put them into the treasury, because it is the price of blood. And they took counsel, and bought with them the Potter's Field, to bury strangers in." The hill on the southeast is called the Hill of Evil Counsel. On its summit are the remains of some large buildings, indicating a place of importance. It is said to have been the country seat of Caiaphas, the High Priest, and where the Chief Priests, Scribes, and Elders, assembled and consulted how they might take Jesus and put him to death. Beyond this rise the grand mountains of Moab, with their beautiful cliffs of various colors and tints, upon one of which, (Mount Pisgah,) Moses stood and gazed upon this land, after toiling in the wilderness forty years, leading on the hosts of Israel, that he might enter the land of promise. For one rash act he was denied. What a lesson! Next our eyes rest on the Mount of Olives on the east of Jesusalem, over the Brook Kedron. Deeply interesting and touching are the events linked with the history of this Mount. There David went up weeping. Although fleeing from those who sought his life, he halted upon its top to worship God, and to commit his way to him. There was the fond retreat of our blessed Lord; after teaching days in the temple, he went out and abode on the Mount that is called the Mount of Olives. There he taught his disciples, and gave them the form of prayer; there he told them of his death, and what should be the signs of his second coming, and the end of the world. There he commanded them to go into all the world and preach the gospel, and he promised to be with them "always, even to the end of the world." There he wept over Jerusalem, and predicted her coming desolation. There he uttered his last parting words, and there his footsteps last pressed the earth. There was the scene of his lowest humiliation, there also was the scene of his glorious exaltation. Above that Mount the triumphant shout was raised, "Lift up your heads, O ye gates, and be ye lifted up, ye everlasting doors, and the king of glory shall come in." The road running nearly northeast leads to Anathath, the birthplace of Jeremiah the prophet, "in the land of Benjamin." On the north you see the Damascus road, which leads also to Gibeon and Bethel. Solomon went to Gibeon, and took all of his congregation with him, to worship in the tabernacle which Moses made in the wilderness. At Bethel, Jacob set up the stone which he had for his pillow, and poured oil on it. "And he called the name of that place Bethel." On this road also Paul set out for Damascus, to wreak his ire on the defenseless disciples of Jesus. It was noon; he rode on and drew near to the city; the dire work of seizure and bonds was almost begun; Heaven interposed; Jesus encircles him with a radiance outshining the midday sun, and addresses him, "Saul, Saul, why persecutest thou me?" With trembling lips he asks, "Lord, what wilt thou have me to do?" He passes three days in fasting and prayer. Ananias is divinely directed to go and restore his sight. He then proclaims Christ as the long promised Messiah; and never was there a more faithful missionary of the cross. We find him in Arabia engaged in prayer, now in Jerusalem stilling the tumult of the people, and bearing alms to the poor. Now traversing, on his errand of mercy, "Syria, Asia Minor, Greece, Macedonia, and Italy." We read of him at Antioch, Ephesus, Corinth, Athens, and Rome, founding churches, preaching, visiting, and writing epistles. He was forsaken by his friends, ridiculed by philosophers, stoned, and beaten. Thus he toiled on for thirty years, in the service of God; then lays his head upon the block of the executioner, and his redeemed spirit takes its flight upward to its glorious reward. I did not think of giving you a history of Paul, when we started out on the Damascus road. Still, may the spirit of holiness seal upon our hearts the precious truths which are taught in the conversion and the life of this noble Apostle.

MARTHA SAUNDERS.

MISSIONARY CORRESPONDENCE.

From a Letter of Bro. Carpenter, dated Shanghae, May 3, 1855.

My principal labor of late has been the preaching of the word. There has been a good deal of rain during the last month, but when the weather and the state of the roads would allow, I have gone to our chapel in the city (now about two miles) daily, either to preach or be door-keeper in the house of God while Bro. W. has preached. By this plan, (one of us standing at the outer gate to "compel" them to come in,) we get larger congregations than formerly. Others practice the same. We frequently have people from other provinces to hear us, and to encourage such to come in, I try to use the mandarin tongue. This imposes at present a little more labor upon me by way of preparation. Our aim is to give the people an animated address of fifteen or twenty minutes. For longer it is not easy to hold them, and if 'held by the button' they would avoid the place next time. Pray for us, brethren, that we may have the anointing of Divine grace to fit us for our work, and that the word of God may have free course and be glorified, and that Confucianism, Taouism, and Budhism may give place to the gospel of God our Saviour.

From a Letter of Bro. Wardner, dated May 1, 1855.

In my letter of last mail, I alluded to the condition that my teacher Chong-Koo-Lew was then in. On the 8th of last month Bro. C. and myself visited him. In some respects he seemed better than when he left Shanghae; but on the whole, it was very evident that he was sinking. He seemed to be perfectly resigned, and remarked during our conversation with him, that he felt it to be better to be in the situation he was, than in the enjoyment of health, notwithstanding the pain he suffered, for it brought his sins home to him. He seemed to be not at all anxious to get well, and spoke of the last sentence in his note to me (a translation of which I sent you) as a fault savoring too much of the spirit of this world, and a distrust of Providence. He spoke very gratifyingly of the comfort which the gospel of Christ afforded him, being so much superior to anything he ever experienced under such circumstances before. After administering somewhat to his wants, and prayer by Bro. C., we left, promising to visit him again in three or four weeks, or sooner if I heard that his disease was taking a more unfavorable turn.

Day before yesterday his son and a near relative came to inform me that he died on the ninth day after our visit, and that they had delayed coming in consequence of the exceedingly bad traveling. Their account is, that he was speechless for several days before he died; and about his last words were to his wife, requesting her not to weep for him, nor allow any ghost money to be burned for him after he was gone. Until his voice failed, they said he was in the habit of exhorting those who visited him to renounce their idolatry and embrace the religion of Jesus. Our present cook informs me that he (Chong) used to teach and exhort him in private on the subject of religion. Such are the evidences which I have been able to gather concerning the end of one of our first converts in China, and I can but indulge the hope that the orchestra of heaven is now echoing his song of praise.

May 2d.—Last evening, soon after prayers in Chinese, our cook, as he was passing through my study, turned to me, apparently under the influence of deep feeling, saying, "My heart is much distressed." I asked why. He said he did not know, and left the room. Early this morning, as I was walking in the chapel, he came in, and appeared to be more agitated than ever I saw him before, and said to me, "Wo-seen-sang, I have been in great distress all night, and I wish to talk with you about it. My conduct yesterday was very wicked; I trespassed against you, told a lie, and cheated you out of 45 cash in buying that board (pointing with his finger.) But I don't know why it was, I never felt so before—while you was reading and praying with us last night, a very distressed feeling came over me, all of a sudden, which I could not shake off or account for. After I went to bed, and all was still, as I lay sleepless and trembling, a person about four feet high came to me, dressed in white, whose size, form and features I could see, but not distinctly. As he came up to my bed, he fixed his eyes on me, and said in a low voice, 'Why will you lie and cheat?—it is a great sin, and you must not do it.' I then recollected what I had done, and promised him that I would return the 45 cash the first thing in the morning, and confess my fault to you. On my making him this promise, he vanished where he stood, and I saw him no more." While relating this, it seemed to require all his resolution and powers to restrain his feelings so as to speak. I am no very sanguine believer in spiritual manifestations, so much talked of in these days; but I could not doubt that he had really seen what he related, or that his disturbed imagination had pictured it to him as a reality, and in either case I could but think the hand of God was in it, and told him, that without doubt what he saw was a messenger sent by the true God to warn him of the danger he was in; and that it stood him in hand to beware how he treated the message slightly; for God would not be trifled with; that I was glad to see him disposed to confess his fault, and so far as I was concerned, could freely forgive him. I do believe the Spirit of God, like leaven, is at work here, and O let us double our diligence, that He may acknowledge us as co-workers worthy of his blessing.

A "CONVERTED JEW."—Some four weeks ago, a young man called upon us who claimed that he was a converted Jew—that his father, a rich man in Europe, had cast him off because he was baptized—that a rich uncle in New York would give him five thousand dollars to start in business if he would be *unbaptized*—but that he had determined to sail for London on the following Monday, to study in the institution for converted Jews located there, and needed only a few dollars more to complete his outfit. As he brought a list of names of Sabbath-keepers who had within a few days contributed to help him off, we were disposed to listen favorably to his story. His answer to our first question, however, excited suspicion, inasmuch as he claimed to have attended meetings on Sabbaths at the chapel in Eleventh st., during a period when we knew the chapel had been closed on Sabbaths. Further inquiries gave us no better satisfaction, and we declined to assist him. He then requested us to give him a note to several persons whom he named—which we of course declined to do. A few days afterward we learned that he went direct from our office to one of those persons, and obtained a couple of dollars on the representation that we had *sent* him. Still later—(some two weeks after the day fixed, according to his own story, for him to sail for London)—we received a letter from Westerly, R. I., making inquiries about him, and stating that he was repeating the same story there. Our answer is, that we know nothing about him except what we have indicated above. The discrepancy between his statements and the facts, would certainly justify withholding aid from him till he can give other evidence than his own word of being what he claims to be.

A WARRIOR'S LAST LETTER.—Among the persons killed in the recent assault upon Sevastopol was Colonel Shadford, who seems to have had a presentiment of his approaching fate, for he took leave of his wife and children, the night before the assault, in the following terms:—

BEFORE SEVASTOPOL, Sunday, June 17—9 P. M.

MY OWN BELOVED WIFE AND DEARLY BELOVED CHILDREN: At 1 o'clock to-morrow morning I head the 57th to storm the Redan. It is, as I feel, an awfully perilous moment to me, but I place myself in the hands of our gracious God, without whose will a sparrow cannot fall to the ground. I place my whole trust in Him. Should I fall in the performance of my duty, I fully rely in the precious blood of our Saviour, shed for sinners, that I may be saved through Him. Pardon and forgive me, my beloved ones, for anything I may have said or done to cause you one moment's unhappiness. Unto God I commend my body and soul, which are His; and, should it be His will that I fall in the performance of my duty, in the defence of my Queen and country, I most humbly say, "Thy will be done." God bless you and protect you; and my last prayer will be, that He, of His infinite goodness, may preserve me to you. God ever bless you, my beloved ELIZA, and my dearest children; and, if we meet not again in this world, may we all meet in the mansion of our Heavenly Father, through Jesus Christ, God bless and protect you; and ever believe me, your affectionate husband, and loving father,

THOMAS SHADFORTH.

DISCOVERY OF MANUSCRIPT SERMONS BY LUTHER.—Twelve autograph sermons have recently been discovered at Raksan, in Hungary. The Hungarian paper, *Divatesarnok*, says: "How these sermons have found their way to Hungary is a question still to be settled, though sure to be cleared up by a nearer perquisition of the records in which the autographs were found. It is a well-known fact, that Luther for a long time used to be in correspondence with several learned Hungarians, mostly with Baron Peter Revay. The manuscript is bound in vellum, and contains twelve sermons, written on thick brownish paper, in faded, though still very legible black letters. The margin of the leaves shows marks of having formerly been gilded. Each separate sermon is signed with Luther's autograph signature; and all these signatures are so like to each other, that their being written by one hand is beyond any doubt. This valuable discovery is at present in the hands of M. Paul Raksanyi, whose property they have become by inheritance.

BEQUESTS OF ABBOTT LAWRENCE.—Besides numerous private gifts, the will of the late Abbott Lawrence bequeaths $130,000 for public benevolence, as follows: The Lawrence Scientific School, $50,000; for building model Lodging Houses, $50,000; Boston Public Library, $10,000; Franklin Library in the city of Lawrence, $5,000; American Bible Society, $5,000; American Tract Society, $5,000; and Home Missionary Society, $5,000. One-half of the net rents of the Lodging Houses is to be annually distributed to various charitable institutions in Boston, and the other half is to accumulate in order to constitute a fund for keeping the Lodging Houses in order.

GERRIT SMITH'S INSTITUTION.—The Oswego *Palladium* says, that the Hon. Gerrit Smith has in contemplation to found and endow a great Educational Institution somewhere in Central New York, to which he will dedicate the bulk of his property—that his plans for the institution are nearly matured, and that it is to be a university of the highest class, and established on the most liberal principles. It is to be surrounded by an ample farm, to give the opportunity of tillage to such students as desire to strengthen and envigorate themselves by labor, and is to make suitable provision for cases of struggling merit. The location of the institution has not been fixed upon.

RELIGIOUS INTELLIGENCE.

The Mission at Damascus is proceeding favorably; five new candidates, all giving evidence of sincere piety, were admitted into the church at a recent communion; fourteen native communicants partook at once of the emblems of Jesus' death. The schools are increasing in public favor, one female school of forty pupils, most of them Jewesses from the first families in the community, have improved rapidly in their acquaintance both with the English and Arabic languages.

Mr. Greeley writes, that the boast of temperance of wine-producing nations is founded in mistake. It is true that the people in warmer climates are less addicted to intoxication; but there, as well as in more notherly regions, all the miseries of intemperance are visible. You hardly open a French newspaper that does not contain some account of a robbery perpetrated upon some person stupified by over-drinking, or a police case growing out of a quarrel over the wine cup.

The receipts of the American Board of Commissioners for Foreign Missions during the year ending July 31, were $310,427 77, and the expenditures during the same period were $318,893 18. The debt of the Board on the first of August, 1854, was $12,042 49. By the excess of expenditures over receipts during the past year, this debt was increased to $20,507 90.

Three hundred and fifty-three thousand two hundred and twenty-five dollars will be the amount of receipts for the current year by the Treasury of the Missionary Society of the Methodist Episcopal Church, provided each conference succeeds as well as the New England Conference, which reported an aggregate amounting to fifty-two cents per church member.

A quarterly meeting of the Methodist Episcopal Church was broken up a few days ago, in Platte county, Mo., by a mob of pro-slavery ruffians. Rev. Mr. Morris was seized while preaching, amid shouts of "Hang him," "Shoot him." He was finally released on a promise to leave the place. The other preachers escaped during the disturbance. The mob brought tar, feathers, and hemp along with them.

The United Brethren, at the recent annual meeting of their Board of Missions, determined to establish a Mission in Africa. Messrs. Kumler and Shuey were sent out last year to find a location, and they selected a place called Mo Kelli. The Board wish to send two missionaries this fall, and to commence operations vigorously.

The Episcopal Church Journal of this city says that "in this diocese of New York there are about 20,000 communicants. All the Church papers put together have but little more than one-fourth as many subscribers in this Diocese." Such a statement is astonishing, when we know that there are three Episcopal papers published in this city alone.

Mr. David Kinmouth, who was a merchant in Dunning, England, about ten years ago, and whose estate was then sequestered, yielding to his creditors 4s. 2d. in the pound, has remitted from Boston, United States, to the trustees, full payment of the balance, with 25 per cent. more in the name of interest due thereon.

Rev. Dr. Babcock, late Corresponding Secretary of the American and Foreign Bible Society, has been elected President of Burlington (Iowa) University; and it is understood that he will enter upon the duties of his office as soon as a sufficient amount is raised for the endowment of the Presidency.

The Grand Ligne Mission in Canada has a strong staff of ordained ministers, raised up from among its French Canadian converts. The fabric of Romanism is being undermined, at a great number of points, by the labors of this Society; and the time has probably come when extended labors would be eminently blessed.

In answer to an appeal by the Rev. Dr. A. Thomson, of Edinburgh, the children of the United Presbyterian Church, in Scotland, have contributed the entire sum necessary for the support of one of the professors in the Waldensian college at La Tour.

Sir Moses Montefiore carries with him to Jerusalem the product of a subscription for his co-religionists, amounting to 3,000,000f. or 4,000,000f. At Constantinople a firman was granted authorizing the establishment of a Jewish hospital at Jerusalem.

The King of Dahomey, an African monarch, says a recent traveler, keeps a drunkard, feeds him on rum, and exhibits him at the customs, that his emaciated appearance may shame his people for making beasts of themselves.

A correspondent of the Boston *Transcript* of last week says, that out of one hundred and forty-eight families belonging to the congregation worshiping in King's Chapel, all are now absent from the city except twelve.

The Bishop of London acknowledges, through the *Times*, the receipt of the first half of a £1,000 bank-note from an anonymous donor, to be applied to the purposes of church extension in the metropolis.

The New York *Observer* states that in Kentucky the Baptists are more numerous than the Methodists. In Missouri, their number is about equal, but in all the other Southern States the Methodists are numerically in advance of the Baptists.

Ten Bohemian priests within the last few years have fled to Prussia, and renounced the errors of Rome. Many others would follow the example could they find the means of escape. Rome does all it can to stop the movement.

The *Independent*, and one or two other papers, speak of the late Rev. Eustace Carey as a son of Rev. William Carey. This is not correct. His relation to this distinguished and good man was that of *nephew*.

A donation of £500 has been given by a Presbyterian of the Irish General Assembly to the Wesleyan Missionary Society, for the support of two additional missionaries to China.

A pension of £50 a year has just been granted by the British Government, from the Civil List, to the well known and popular author of many works of Christian philosophy and literature, Dr. Dick.

AFFAIRS IN MEXICO.—We have received accounts of the abdication of Santa Anna, through the New Orleans papers, much more in detail than previously published. The reports by telegraph are confirmed. Santa Anna left the city of Mexico on the 9th of August, at the head of 1,400 soldiers, under the pretext of quelling the revolution in Vera Cruz. On arriving at the fortress of Perote, he unveiled his real design, issued a proclamation depositing the government in the hands of Pavoni, Vega, and Salas, and sailed on the 17th of August for Havana, as is supposed. His ministers did not long remain behind him, fortunately for themselves, as the popular excitement which destroyed much of their property, would in all probability have dealt harshly with them had they been within reach. Subsequently Carrera was appointed Provisional President for six months.

Another Railroad Slaughter.

The line of the Camden and Amboy Railroad, near Burlington, N. J., was on Fourth-day, Aug. 29th, the scene of a sad disaster—second only to that at Norwalk—resulting in the death of twenty-five persons and the wounding of eighty others.

The reporter of the N. Y. *Tribune* gives the following as the circumstances of the catastrophe:—

The 10 o'clock train from Philadelphia left punctually on Wednesday morning, and consisted of five passenger-cars, baggage-car, and locomotive. Israel Adams was the engineer and Isaac Van Nostrand the conductor. The train reached Burlington station a few moments past 11 o'clock, and waited the arrival of the New York train from five to ten minutes. The up train not making its appearance, the Philadelphia train moved on at a moderate rate—the engineer keeping a good lookout for the other train. It had progressed about a mile and a half, when the expected train came in sight, and immediately gave two loud, sharp blows of the steam-whistle, which is the signal for the brakes and to reverse the engine. The engineer of the Philadelphia train, alarmed at his desperate position, instantly commenced backing, and got under a headway of between twenty and thirty miles an hour, for Burlington again. To comprehend this reverse movement, it must be remembered, that the passenger cars, usually placed behind and coming after the locomotive, were now in front and pushed by the locomotive. Thus the engineer was of course ignorant as to what was in advance of the backward going train. He had run but one half of a mile when the first passenger-car came in contact with a light wagon driven by Dr. Heineken of Columbus, N. J., who attempted to cross the track in front of the cars. The pole of the carriage breaking, the occupants, consisting of the Doctor, his wife, two children and wife's father, escaped unhurt. One of the horses was dashed to pieces, but the carcass of the other, falling across the rails, turned the first car off the track. The subsequent destruction can be readily understood when the rapid rate at which the train was impelled is considered. The first car being driven backward, the second was thrown diagonally across the track, and its center literally smashed into atoms by the concussion with the third. Both of these cars fell down the embankment, a height of about seven or eight feet. There were five cars torn to pieces. A more complete wreck was never witnessed. One of the cars was reduced to splinters; another was cut in twain, one end being reversed, and the other end in an upright position, frightfully shattered. The other cars were ripped from one end to the other and beyond repair. Some of the heavy iron axles were twisted into a bow. The heavy T rail was bent in some places and torn from its fastenings, the inside flanges being cut as if by a sharp axe.

The scene which ensued baffles description. The cars piled upon each other, in shattered fragments, from beneath which myriads of human beings were crawling, maimed, broken, and recking with blood like perspiration; the shreiks, groans, nay, absolute howlings of the wretched beings thus entombed as it were in destruction—mangled forms of men and women huddled together with broken panels, bars of iron, massive wheels, and scattered baggage—all combined to render this fearful scene even more terrible to the imagination. One of the passengers—Mr. George Ridgeway—jumped from the train, and the next instant was buried beneath it, a lifeless, disfigured mass. Those persons who came to the rescue knew not where to begin the work of assistance from the urgent calls which arose on every side. The unhurt and the least injured were crawling up the banks, many of them being able to walk to the houses in the neighborhood, where they prayed for a glass of water—their sufferings being fearfully aggravated by thirst. On every side could be heard the sobs and wailings of those who had just recognized a dear friend or relative among the mangled and conglomerate mass. Wives for their husbands, husbands for their wives, parents, children—all joined in swelling this vast aggregate of agony and horror.

The following list embraces all the dead up to Thursday night:—

1. Baron Durand de St. Andre, French Consul at Philadelphia. Died very soon after being taken to Burlington.
2. Edward P. Bacon, resided in Philadelphia.
3. Mrs. Clement Barclay, resided in Philadelphia. Mrs. Barclay was on her way to New York, whence she intended to embark for Europe.
4. Major Wm. M. Boyce, of the United States Navy, attached to the Coast Survey. He was just from Washington.
5. Miss Emily M. Boyce, daughter of Major Boyce.
6. Charles H. Bottom, of Trenton, N. J., of the firm of Bottom & Co., iron manufacturers. The body was recognized by finding upon it a bank book containing $1,200, which Mr. Green of Philadelphia had that morning handed to him to deposit in Trenton.
7. Catharine (or Mary) Brown, colored servant of Commodore Smith.
8. Rev. John Martin Chonnell, of the Presbyterian Church, Wilmington, Del. He died soon after reaching Burlington.
9. John Dallam, of Baltimore, Md.
10. Jacob Howard, of Lebanon, Tenn.
11. Charles Humphreys, of Peoria, Ill.
12. George R. Ingersoll, of Philadelphia, son of Lieut. Harry Ingersoll. He was traveling in company with Mrs. Barclay. He died at Mr. Becket's, formerly the seat of Joseph Bonaparte, at Bordentown.
13. Hughes B. Jervis, of Newark, Delaware.
14. Alexander Kelley, of Philadelphia.
15. Wilson Kent, of the firm of Kent & Dyolt, at the Philadelphia lamp and chandelier manufactory.
16. Jane P. Lincoln, aged 35, daughter of Mrs. Lincoln Phelps, the well known author of a work on botany.
17. Thomas J. Meredith, of Baltimore, Md., of the firm of Spencer & Meredith.
18. Mrs. Margaret Prescott, of Salem, N. J., wife of the Rev. Mr. Prescott, and sister-in-law of William H. Prescott, the historian.
19. Jane Pringle, of Ellicott's Mills, Maryland. She was returning to her home in New York from a visit to her friends in Philadelphia.
20. Geo. W. Ridgeway, oil merchant, Philadelphia. He jumped out and the cars were piled upon him. His watch was crushed in pieces on his breast, and his breast torn open.
21. Hugo Rush, of Georgetown College, D. C.
22. Joseph M. Smith, Commodore in the United States Navy, attached to the Bureau of Docks and Yards. His wife was with him, and was badly injured.
23. A man about 50 years of age.
24. A man, apparently an Irish laborer.

Rev. J. M. Cornell, Pastor of the First Presbyterian Church of Willmington, Del., who died very soon after being extricated from the ruins, we have since learned, was on his way to the East to get married. He was quite a young man, and had established a reputation for abilities in his profession of a high order. He met his end with a manly resignation, and expressed his willingness to meet the summons so suddenly tendered him. His last words were, "I die in hope."

Dr. J. F. D. Heinaken, of Columbus, whose name has attained an unenviable notoriety in connection with this shocking affair, is a tall, stout, well preserved gentleman of sixty. His hair is grayish, his countenance heavy, eyes protuberant, and the lines of the face strongly marked. The Doctor has practiced medicine in the vicinity of Burlington for many years, and is well known in all that region. He has had various narrow escapes. On a previous occasion, near the town of Beverly, (four miles below Burlington,) he sustained a similar adventure. The carriage in which he was riding was struck by the cars; the train was thrown off the track, and four persons were killed. At the time of the accident, the Doctor is understood to have been particularly anxious about the state of his horses. He has since made repeated inquiries touching the pecuniary reimbursement he is to receive, and declares that his loss is one thousand dollars; for he claims that this team was altogether the finest in the State of New Jersey.

European News.

One week later news from Europe was received in New York August 29th.

This arrival brings the important intelligence, that Sweaborg—the strongest fort in the Baltic except Cronstadt—has been bombarded by the French and English fleet, and, after an uninterrupted fire of two days, was destroyed on the 11th of August. The loss of life and property to the Russians must have been enormous, while the allies, it is said, suffered little. A writer in a late number of *Blackwood's Magazine*, describing Sweaborg, says: "It commands the entrance to the Bay of Helsingfors, and has been called the Gibraltar of the North. It is an immense fortress, resting upon seven islands, which are connected by pontoons mounting 800 cannon, and garrisoned by 15,000 men in time of peace. The importance of the place is perhaps greater than that of Revel, as its fall would be the prelude to the capture of Helsingfors, which contains one of the greatest naval arsenals in the world, and is the largest recruiting station in the Russian Navy. The works of Sweaborg are said to have been blasted from the solid rock, and, therefore, possess more strength than any masonry constructed by the hands of men."

News has also reached us that a great Crimean battle has been fought on the Tchernaya. It will be remembered, that for some months the allied troops have occupied the whole line of this river, from the spot whence it issues out of the mountains down to Inkermann, with the exception of one place, near the valley of Baldar, where the stream runs through a precipitous gorge, almost inaccessible to foot passengers. The Sardinians held Tchorgon which they had strongly fortified, and the French, with the English cavalry and a detachment of Turks, were encamped in the valley of Baldar. The action took place on the 16th of August, and, after three hours' duration, the Russians (who, under Liprandi, had made the attack,) were driven back with great slaughter.

Advices from Europe further state that General Simpson had telegraphed from the Crimea that the bombardment of Sevastopol, preparatory to a second assault on the Malakoff and Redan, would be recommenced on the 17th of August, so that by the next steamer we shall probably hear of another sanguinary battle.

Queen Victoria was in Paris, paying her long contemplated visit to the French Emperor.

In Paris, a school-master named Ferret, while presenting a petition, dropped dead in the Emperor's presence.

Travelers report that the Turcomans were committing ravages along the Caspian Sea and Volga.

The vintage in the Island of Maderia has again failed—being the fourth consecutive year; much destitution prevails in the island, from so many persons, in consequence, being thrown out of employment.

THE TABLES TURNED.—Suits for breaking marriage promises are in this country usually brought by the female sex. We remember no case in which a gentleman has sued a lady for breach of promise of marriage. In England a different practice seems to obtain. We find in the London papers the report of a case where suit was brought by a Mr. Holder, Captain in the 5th regiment of Lancashire Militia, aged 32, against a young lady of great personal attractions named Agnes Josling, who had promised to marry him, accepted his presents, written him very long and very affectionate letters, worn the ring that pledged their mutual faith, and afterwards refused to marry him, because she had discovered that she did not *love* him, but was only *grateful* to him for his attentions. The suit was brought, the plaintiff said, not to recover damages for wounded affections, but to cover the expenses he had incurred in paying visits, making presents, and getting ready for the wedding. His counsel thought £400 would cover all these, and had offered to accept £350; but the unfair fair one who had inflicted the injury, refused to settle on such terms. The jury returned a verdict for £300 damages.

SUMMARY.

A dispatch from Sydney states that, owing to some mismanagement in the laying of the cable between Newfoundland and Cape Breton, when forty miles out from the Newfoundland coast, the cable was lost. The vessel had been engaged two days in laying the cable when the accident happened. The dispatch does not inform us in what manner the loss was occasioned; and it is also silent as to the probability of recovering the cable. The Company are understood to have had an insurance on the cable to the extent of $70,000.

A dispatch dated Boston, Friday, Aug. 31, says: James E. Simpson, a merchant of this city, has been arrested, charged with fitting out the schooner Mary E. Smith for the African Slave trade. Jacob K. Lunt, one of our harbor pilots, who took the Mary E. Smith to sea, carrying off the U. S. Marshals who had boarded her for the purpose of serving process on the officers, has also been arrested on a charge of obstructing the said officers in their duty.

A dispatch dated Washington, Tuesday, August 28, says: The report that the steamer Hetzel, of the Coast Survey, burst her boiler near the Capes of the Chesapeake, proves to be true. It happened on the 24th inst. The following persons were killed:—Samuel C. Latimer, third assistant engineer; William Bulger, William Gardner, John T. Knight, firemen, and Bernard Morgan, seaman. Michael Scanlan was badly injured, and Coleman Welch, Benjamin F. Van Horn, seamen, and D. E. Marshall, quartermaster, slighty.

Grasshoppers have been much less injurious than usual in all the country east of the Rocky Mountains. In California, Utah, and Oregon, on the contrary, they have been so abundant as to amount to a pestilence. California has suffered exceedingly, while in the Mormon Territory they have seriously threatened to produce famine. Our latest accounts from the Salt Lake represent them as destroying all kinds of grain and vegetables.

The Utica Telegraph says that a fine looking negro, aged about 40 years, with his wife and several of his children, spent yesterday at the residence of a colored friend on Post street. They arrived in this city by the "Underground" on Saturday night. The Committee of Safety visited them during the day. They were to have been sent to Canada to-day. This family were recently sold in Kentucky to go further south, but seem to have preferred a more northern country.

On Sunday morning, August 26, between 3 and 4 o'clock, the steamer Elm City, while coming through Hurl Gate, on her passage from New Haven to New York, ran over a small 14 foot sail boat, containing three persons, who had started for Flushing Bay, on a fishing excursion. It is supposed that all in the small boat were drowned, as they have not been seen nor heard from since.

At Newburg, on the Hudson River, 2,000 bushels of fine potatoes were sold by a single dealer recently for 28 to 31¼ cents per bushel. We are informed that there are tens of thousands of bushels in the river counties ready to be contracted at very low prices. So in various parts of New Jersey this important crop has matured in perfect order.

An upright shoemaker's bench has recently been patented, and by it the work of shoemaking can be carried on better in a standing than in a sitting position. This will be a great relief to the devotees of Saint Crispin, and prevent pulmonary complaints, so frequent among shoemakers.

Dates from Kansas to August 27 are received. A bill for the election of all Territorial officers by the present Legislature was passed, and the two Houses were in joint session, carrying out the elections. The bill provides that all local officers, including sheriffs, constables, assessors, &c., for the next six years, be elected by the present Legislature.

The Russian government is filling the places vacated by English mechanics, on account of the war, with Americans. Six mechanics leave Baltimore, in a day or two, to take charge of important positions on the Russian Railways. Altogether, twenty-five or thirty mechanics will be sent out from Baltimore.

A nice looking young man went round among the citizens of Nashua, N. H., the day before a circus was to exhibit, to accommodate the public with tickets, just to save them the trouble in the midst of the rush. He realized about a hundred dollars, and of course the circus repudiated the bogus tickets.

Mrs. Eben Colwell of Ipswich, was about to take the cars at Stonington, for Boston, when she felt a strange hand in her pocket, whereupon she seized the intruding member, to which she clung till an officer arrived. The rogue was taken to Providence and delivered to the officers of that city.

A dispatch dated Chicago, Wednesday, Aug. 29, says: The schooner Knickerbocker, Capt. Richards, capsized off Sheboygen, on Sunday, at noon, the vessel turning bottom up. Capt. Richards and two of the crew were drowned. Two others reached the shore safely.

Hon. J. M. Williams, formerly Chief Justice of the Court of Common Pleas, in reply to a letter from the Massachusetts State Temperance Committee, has given a lengthy opinion upon the Massachusetts Prohibitory Liquor Law, which is in favor of the constitutionality of the law.

During the month of May, forty-nine locomotives, on the New York Central Railroad, used up over one thousand gallons of oil, at $2 per gallon, which would give over $40 per month for each locomotive.

A dispatch dated Baltimore, Wednesday, Aug. 29, says: The whole number of deaths from yellow fever at Portsmouth, up to 3 o'clock yesterday, had been 300, including 107 which took place at the Naval Hospital.

The census for the South Division of Chicago is completed. Population, 30,056. The same division in June, 1854, had a population of 24,693, and in 1850 of 12,843.

The Government of Madras has issued a strict prohibition of the horrible swinging festivals—a Hindoo rite—in which men are swung in the air by hooks.

A dispatch dated Chicago, Friday, Aug. 31, says: Chief Justice Lecompte gave a dinner at Shawnee Mission on the 22d inst. to the Kansas Legislature, for the honor done him in locating the Capital at the town named after him. Judge Elmore was present, and was toasted enthusiastically. He announced his determination to resist President Pierce's usurpation of power.

The Elmira Republican of July 14th says: We hear citizens complaining of the appearance of rot thus early in the garden potatoes, mostly those, however, which were planted in wet soil. A friend passing through sections of Pennsylvania says, that whole fields were rotting, and the crop would be an utter failure there. The abundant rains of late, it is thought, give malignity to this singular disease.

According to the City Inspector's report, the deaths in New York, from the 25th of August until the 1st of September, amount to 548. Of those, 77 were men, 61 women, 192 boys, 218 girls; 138 were adults and 410 children. Of children under one year there were 224; between one and two, 130; between two and five 39, and from five to ten 7.

The project of Mr. Thomas Wilson, for a canal from the Black Sea to the Danube, is stated to have received the support of the Powers interested, and to promise an early realization.

New York Markets—Sept. 3, 1855.

Ashes—Pots and Pearls 6 31 a 6 37.

Flour and Meal—Flour, 7 31 a 7 62 for ordinary and straight State, 7 87 a 8 12 for mixed Western, 8 12 a 8 87 for Ohio, 9 75 a 12 00 for extra Genesee. Rye Flour 6 00 a 8 25 for fine and superfine. Corn Meal, 4 75 for Jersey.

Grain—Wheat, 1 75 a 1 85 for red, 1 90 a 1 95 for white. Rye 1 10. Barley 1 05 a 1 10. Oats, 55 a 60c. for State and Western. Corn, 87c. for Western mixed.

Provisions—Pork, 19 50 for new prime, 22 25 for new mess. Beef, 11 00 for prime, 11 75 a 13 00 for country mess. Lard 11½c. Butter, 14 a 17c. for Ohio, 17 a 21c. for ordinary to good State. Cheese 8½ a 10c.

MARRIED,

In Adams Center, Jefferson Co., N. Y., August 18th, 1855, by Eld. James Summerbell, Mr. O. D. GREEN to Miss MALISSA GREEN, all of Adams Center.

DIED,

Near Brooklyn, N. J., on the 30th of August, REBECCA ANN, daughter of Oliver and Elizabeth Randolph, aged about 8 months.

Every Reader

WILL PLEASE NOTICE THE ADVERTISEment headed *The Great Book of the Year*, and send for a full descriptive Catalogue of all our Illustrated Works.

☞ To the *uninitiated* in the great art of selling books, we would say, that we present a scheme for money making, which is far better than all the gold mines of California and Australia.

☞ Persons desirous of selling any one Work alone, and canvassing a certain section of country, or several Counties, will please confer with the subscriber, who will cheerfully answer every letter, as far as possible, on the day of its reception. Address,

ROBERT SEARS, Publisher,
181 William-st., N. Y.

LETTERS.

H W Babcock, B F Rogers, H W Stillman, C M Lewis, N V Hull, Abel Stillman, J E Potter, W Clarke.

RECEIPTS.

☞ The General Agent of the Publishing Society expects to attend the anniversaries at Brookfield, and the meeting of the North-Western Association at Berlin, Wis. It is hoped that subscribers for the Society's publications in those regions will take advantage of the occasion to pay up. The residents of other regions, also, who are indebted to the establishment, are respectfully requested to be prompt in their payments. The current volume is now one-quarter completed, and subscriptions for the year are considered due.

FOR THE SABBATH RECORDER:

H W Stillman, Ozaukee, Wis $2 00 to vol. 12 No. 52

FOR SEVENTH-DAY BAPTIST MEMORIAL:

Elizabeth Rogers, Plainfield, N J 1 00

WILLIAM M ROGERS, Treasurer.

The North-Western Association.

THE Seventh-day Baptist North Western Association will hold its ninth Anniversary with the Seventh day Baptist Church at Berlin, Marquette Co., Wisconsin, on the fifth day of the week before the fourth Sabbath in September, (being Sept. 20th,) commencing at 10 o'clock A. M. Eld. Z. Campbell is appointed to preach the introductory discourse; Eld. J. M. Todd alternate. H. B. LEWIS, Rec. Sec.

New Market Seminary.

This Seminary will re-open on the 12th of September, with Mrs. R. H. Whitford, as Preceptress.

This Institution is located in a pleasant section of country, and has a commodious and well arranged building, and is designed to furnish every facility and advantage to the student found in other institutions of this class.

Board for students may be had in families at one dollar and seventy-five cents per week, where all their wants will be kindly cared for. Tuition from $3 to $5 per term, according to the studies pursued. Music, with use of Piano, $10 00.

I. H. DUNN, Sec. of Board of Trustees.
NEW MARKET, N. J., August 26, 1855.

To Persons out of Employment.

The Great Book of the Year!

From the Editors of the Philadelphia Post.—"We think we may safely pronounce this to be the most thorough and valuable work on the Empire of Russia that has yet appeared in the English language."

From the Editor of the American Philadel. Courier.—"Truly a valuable Work—the great Book of the day."

Send for one copy and try it among your friends.

WORK FOR ALL AND, WORK THAT PAYS,
In selling, in every County in the United States—our new work on the "RUSSIAN EMPIRE," and other popular PICTORIAL WORKS. Terms, Catalogues, and Canvassing Circulars, forwarded free of postage, on addressing, ROBERT SEARS, Publisher, 181 William-st., New York.

☞ SEND FOR ONE COPY. Single copies of the Work on "RUSSIA," (the most elegant and useful Volume of the Year,) carefully enveloped in stout paper, and forwarded at our risk and expense to any Post-Office, on the receipt of the Retail Price, THREE DOLLARS. Early application is necessary to secure the most beautiful and perfect copies.

☞ PERSONS WISHING TO ACT AS AGENTS, and do a safe business, can send for a specimen volume, and a well-bound Subscription Book, (price of both $3 25, sent free of postage,) and obtain from one to two hundred subscribers, to be delivered at a certain time to be agreed on, say in thirty or forty days from the time of signing. Address as above. R. S.

Ahead of all Competition.

In press, and will be published on the 20th of September.
FLEETWOOD'S LIFE OF OUR LORD AND SAVIOUR JESUS CHRIST, together with lives of the Holy Apostles and Evangelists, and a History of the Jews. The whole carefully revised with additions by the Rev. JOSEPH BELCHER, D. D.

Determined to furnish agents and their patrons with books of sterling merit, we are about issuing, in connection with our popular History of all Religious Denominations, a new edition of the above fine old work. It will contain about 700 pp. uniform in size and type with the latter, and will be handsomely illustrated by engravings. Copies have been procured from England and Scotland, and carefully collated by the above eminent divine, with those published in this country. Many fine omitted passages have thus been restored, the manifold mistakes of successive printers have been corrected, and we shall now have the pleasure of placing in the hands of canvassers *the most correct edition in existence of this admirable work.* For terms and other particulars address either of the

Farm for Sale.

THE House and Farm lately owned and occupied by James Hubbard, in Scott, Cortland Co., N. Y., are now offered for sale, on reasonable terms. The House is a large two-story house, nearly new, and well arranged to accommodate a large family. The Farm consists of about thirty-six acres of good land, most of which is under good cultivation and is well watered. There are about fifty trees of choice grafted fruit in good bearing condition. It is situated in an industrious and moral community, enjoying all the advantages of schools, meetings, and markets, necessary to make it a pleasant home.

Apply to A. D. C. Barber, or J. N. Pratt. 4t-9.

Magnificent Floral Gift.

SUBSCRIBERS to the "CHRISTIAN DIADEM" for 1855, are entitled to a splendid steel engraving, the ☞ LILLY AND THE ROSE PERSONIFIED, being given *gratis* to all old and new subscribers who send us only ONE DOLLAR, by mail or otherwise.

Six Copies for Five Dollars.

The Diadem is a strictly moral and religious work—designed for the Christian family without regard to any particular denomination.

FIFTY ENERGETIC BUSINESS MEN are wanted immediately to circulate the "Diadem" throughout the Eastern and Western States. To such as can send good references the very best inducements will be given. Address Z. P. HATCH, Publisher, 9 Spruce street, New York. May 24—3m.

DeRuyter Institute.

This Institution is located in a pleasant and healthy section of country, and in a community comparatively moral and intelligent. It is easy of access from Syracuse, Chettenango, and Homer. Our motto is, *Teach the young to govern themselves—to educate themselves.* Grateful for past liberal patronage, we assure the public we have ample accommodations for more.

Expenses:

Tuition,	from $4 00 to $6 00
Board in families,	from 1 25 to 2 00
" in clubs	from 0 60 to 1 00
Room rent, per term,	from 1 25 to 2 62

Books and Stationery furnished at very low prices.

All bills settled invariably in advance. No bills for less than half a term. No deductions made except in case of sickness.

Board of Instruction.

HENRY L. JONES, A. M., Principal.
AMOS R. CORNWALL, A. B., Prof. Mathematics.
Miss JOSEPHINE WILCOX, Preceptress.
Mrs. SARAH E. JONES, Mrs. BARBARA A. CORNWALL, Miss SARAH E. SHIPPEY, Miss JANE C. BURDICK, Assistants in Female Department.

For further particulars, address, Henry L. Jones, Principal; W. D. Wilcox, President; J. B. Wells, Secretary; or C. H. Maxson, Treasurer, De Ruyter, Madison Co., N. Y.

Milton Academy.

Male and Female Teacher's Seminary.

A. C. SPICER, A. M., Principal, and Professor of Mathematics, Natural, Intellectual, and Moral Sciences.

A. WHITFORD, Professor of Greek and Latin Languages, and Rhetoric.

J. F. PEASE, Professor of Instrumental and Vocal Music.

J. F. WOOD, Teacher of Penmanship and Book-keeping.

Mrs. S. M. SPICER, Preceptress, and teacher of Modern Languages, Painting and Penciling.

(Other teachers will be engaged as occasion may require.)

Calendar for 1855–6.

First term opens Wednesday, August 29th; closes Wednesday, December 5th.

Second term opens Wednesday, December 12th; closes Wednesday, March 19th, 1856.

Third term opens Wednesday, March 26th; closes Wednesday, July 2d, 1856.

(The school will open, this year, in the New and Spacious Hall just erected.)

Tuition per term of 14 weeks, from $4 00 to $6 00. Music, Painting, and Penciling, extra. Board at the least possible price, not exceeding $2 00. Refer to the principal; Hon. J. Goodrich, President of Trustees; to M. T. Walker, Esq., or to J. C. Culver, Esq. MILTON, Rock Co., Wis.

Farm for Sale,

CONTAINING about 100 acres, with a fair proportion of woodland; a small orchard of grafted fruit, and a comfortable dwelling and outhouses. It is situated about four miles north of Westerly, R. I., and within a mile of each of the flourishing manufacturing villages of Potter Hill and Ashaway. There are several other manufacturing establishments near, affording a ready market, in the immediate vicinity, for every species of produce. It is convenient to the first Hopkinton Church, as well as to the very excellent male district school.

It will be sold with or without the stock and farming implements, and possession given the ensuing winter or spring, if desired. To those wishing to secure a quiet home in an enterprising neighborhood, and surrounded by such comforts as can only be found in an old settled and thickly populated country, this affords an opportunity seldom offered. For terms and other particulars apply to the subscriber on the premises, or address JOHN E. POTTER, No. 15 Sansom-st., Philadelphia, Pa. BENJAMIN POTTER, Ashaway, R. I.
11tf.

Michigan Southern Railroad Line.

TRAVELERS for Chicago, St. Louis, Kansas, and all points West and Southwest, can obtain through tickets, and all information concerning routes, fare, &c., either by the New York and Erie Railroad, or the New York Central Railroad, by application at the Company's Office, No. 192 Broadway, corner Dey-st., to JOHN F. PORTER, General Agent.

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c. *Spring Arrangements*, commencing April 2, 1855: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M. For Somerville, (way,) at 5.30 P. M.

The above trains connect at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 1, 4 and 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 6 and 9.45 A. M. and 3 P. M.; Somerville (way) at 6 A. M.

New York and Elizabethport.

Leave New York at 8 and 10 A. M., 1, 4 and 5 P. M.
Leave Elizabethport at 7.15 and 9.10 A. M., 1, 3.15 and 6 P. M. JOHN O. STERNS, Superintendent.

New York and Erie Railroad.

ON and after Monday, May 7, and until further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Dunkirk Express at 6 A. M. for Dunkirk.
Buffalo Express at 6 A. M. for Buffalo.
Mail at 8¼ A. M. for Dunkirk and Buffalo, and all intermediate stations.
Accommodation at 12¼ P. M. for Port Jervis and intermediate stations.
Rockland Passenger at 3 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.
Way Passenger at 4 P. M. for Newburgh and Otisville and intermediate stations.
Night Express at 5¼ P. M. for Dunkirk and Buffalo.
Emigrant at 6 P. M. for Dunkirk and Buffalo and intermediate stations.
On Sundays only one express train, at 5¼ P. M.

These Express Trains connect at Elmira with the Elmira and Niagara Falls Railroad, for Niagara Falls, at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicago, &c., and with first-class splendid steamers for all ports on Lake Erie.

D. C. McCALLUM, General Sup't.

Miscellaneous.

The Diabolism of War.

We intended to write an article upon the proceedings of the Turkish and French soldiery, and certain English merchant seamen, at Kertch, and in the Yenikale in the Sea of Azoff. On second thoughts, however, we have decided to lay before our readers, without note or comment, the accounts given of these proceedings by eye-witnesses. The facts will speak for themselves. We leave them to produce their proper effect upon the minds of those who may peruse them.

Lord Raglan writing to Lord Panmure under date of May 29, informs the war secretary that the Allied expedition to Kertch, which left its anchorage off Sebastopol on the 22d, reached its destination on the morning of the 24th; where the troops being landed without delay, the war steamers pushed on towards Kertch and Yenikale, and all the objects in contemplation were accomplished in 24 hours without resistance on the part of the enemy, without the striking of a blow and without the firing of a solitary shot—the Allies thus obtaining bloodless and unopposed possession of the Sea of Azoff.

The Russian army, amounting to about 2,500 men, abandonded Kertch in the afternoon of the day on which the Allied troops landed at Ambalaki, and were followed by a large number of inhabitants, consisting of the nobles, Government employees, and persons of wealth, who carried with them such property as they could collect in their trepidation, leaving behind their houses full of furniture, and all articles which were too cumbrous for so sudden a removal. The persons left in the city were the poorer Russians, Greek traders, Jews, and Tartar.

The Allies entered Kertch the following morning. The population, one and all, made their submission, offering bread and salt to their conquerors in accordance with the Rus- custom. They were assured that they would be protected and their lives and property spared. The troops moved on to Yenikale, leaving behind a few sailors and soldiers to guard the city and destroy certain manufactories of warlike instruments. Let us see what followed.

In the afternoon the crews of some merchant ships landed, and began to break into the houses of absent proprietors, and to pillage the contents. What they could not remove they smashed to atoms. Towards evening, Turkish stragglers from the camp, and others who had fallen out of the line of march, flocked into the town and perpetrated the most atrocious crimes. To plunder and wanton devastation they added violation and murder. The Tartars joined the Turks, led them from house to house, and pointed out, as victims to their cupidity and lust, the Russian tradespeople and merchants who had rendered themselves obnoxious to their ignorance and fanaticism. One miscreant was shot by a French soldier as he came down the street in triumph, waving a sword wet with the blood of a child whom he had hacked to pieces. Others were slain in the very act of committing the most horrible and indescribable outrages. Respect for life was only established by its destruction. Such was the treatment of the unarmed, unoffending, and innocent inhabitants of a city that had cast itself upon the mercy of its vanquishers, and had been promised protection and security! Some of the French, we are informed, joined in the excesses of the Turks during this terrible night of nameless horror and blood, and on the following day English merchant sailors united with the fiends already ashore in the work of rapine and destruction. At the back of the town stood a building erected after the model of the Parthenon, used as a museum, and filled with antiquities of inestimable value. The Times correspondent, to whom we are indebted for the foregoing particulars of the murderous and polluting orgies of the 25th, paid a visit to this edifice after it had been entered by the monsters already referred to. The ruin was prodigious. The floor was covered for several inches in depth with the debris of broken glass, of vases, urns, statuary, the precious dust of their contents, and charred bits of wood and bone, mingled with the fresh splinters of the shelves, desks, and cases in which they had been preserved. Not a single bit of any thing that could be broken or burnt any smaller had been exempt from reduction by the hammer or fire. The glass was smashed to atoms, the statues pounded to pieces. The only parallel to this scene of absolute demolition was within some of the finest houses in the town, such as that of the Governor, where the ruin was equally indiscriminate and universal. . . . . .

Within four days after the squadron passed the Straits of Kertch, they had destroyed 245 Russian vessels employed in conveying provisions to the Russian army in the Crimea, and corn, flour, and bread-stuffs, amounting to seven millions of rations, exclusive of 4,000,000 lbs. of corn and 500,000 lbs. of flour destroyed by the Russians of Kertch. We conclude with an extract describing Kertch as it appeared on the 13th instant, twenty days after the inhabitants had tendered their submission to their conquerors, "One might wander through streets of houses, good and indifferent, without finding any thing new in the monotony of ruin. The market-place, which had been surrounded with small shops, many of which were kept open after our arrival, was gutted. The cellars under the houses had been ransacked, wine flowed in the gutters, barrels were knocked to pieces, and under the cover of the arcade the ground was littered for an inch in depth with bits of crockery, papers, frames of boxes, jars, bottles, and all the endless articles which once constituted stock in trade and furniture. The butchers' shops, which offered little when the joints were gone, were nevertheless broken up, and the heavy chopping blocks split up with vast ingenuity. The cafes and the drinking shop, or estaminet, at the corner had been scenes of grand carouses apparently, after which the jovial souls had knocked the establishments to atoms. A large arcade, inhabited by tradesman, and resembling similar buildings of the second class in Turin, was gutted from top to bottom. The silence and desolation of places which a few days before were full of people were exceedingly painful and distressing. They were found in every street, almost in every house, except when the noise of gentlemen playing on pianos with their boot-heels or breaking up furniture was heard within the houses or the flames crackled with the walls. In some instances the people had hoisted the French or Sardinian flag to protect their houses. That poor device was soon detected and frustrated. It was astonishing to find that the humblest dwellings had not escaped. They must have been invaded for the mere purpose of outrage and from the love of mischief, for the most miserable of men could have but little hope of discovering within them booty worthy of his notice. The Russians must remember that with all this violence and destruction we have spared their splendid villas and palases, which for 100 miles stretch away in terraced lines along the south coast of the Crimea. The plunder, in fact, was not controlled at Kertch because our administrators were weak and imbecile, and our position required vigor, and ability, and tact to prevent the commission of offences difficult to be repressed in the train of an army. [The Empire.

Raging of Epidemics at Night.

From the Baltimore Sun.

The text from which physicians so often preach upon the "danger of exposure to the night air," says the Richmond *Dispatch*, is particularly applicable during the prevalence of epidemics. It is said that, both in England and on the Continent, a large proportion of cholera, in its several forms, was observed to have occurred between 1 and 2 o'clock in the morning. In the great plague of London, four thousand perished in one night. At Hamburg, during the cholera, stoves and open fires were kept burning through the night; and at Sierra Leone the natives have a practice in the sickly season of keeping fires constantly burning in their huts at night, not that they had been prompted to do so by the aid of chemistry, but they assert that the fires kept away the evil spirits, to which they attribute fever and ague. It is said that latterly Europeans have begun to adopt the same practice, and those who have tried it assert that they have entire immunity from the tropical fevers to which they were formerly subject. The Westminster *Review* gives the followiug simple explanation:

"It is at night that the stream of air nearest the ground must always be the most charged with the particles of animalized matter given out from the skin, and deleterious gases, such as carbonic acid gas, the product of respiration and sulphuretted hydrogen, the product of the sewers. In the day, gases and vaporous substances of all kinds rise in the air by the rarefaction of heat; at night, when the rarefaction leaves them, they fall by an increase of gravity, if imperfectly mixed with the atmosphere, while the gases evolved during the night, instead of ascending, remain at nearly the same level. It is known that carbonic acid gas, at a low temperature, partakes so nearly of the nature of a fluid that it may be poured out of one vessel into another; it rises at the temperature at which it is exhaled from the lungs, but its tendency is towards the floor, or the bed of the sleeper, in cold and unventilated rooms."

In the epidemics of the Middle Ages fires were lighted in the streets for the purification of the air; and more recently trains of gunpowder have been fired and cannon discharged for the same object; but these agents, operating against an illimitable extent of atmospheric air, have been on too small a scale to produce any sensible effect. It is, however, pronounced by the best authority quite possible to heat a room to produce a rarefaction and consequent dilution of any malignant gases it may contain; and it is of course the air of the room, and that alone, at night, which comes into immediate contact with the lungs of a person sleeping.

A Sad Tale of Shipwreck.

The Nantucket *Journal* publishes the following letter of Thomas E. Coffin, giving the melancholy account of the loss of the ship Manchester, and the consequent suffering:—

VALPARAISO, Wednesday, June 20, 1855.

DEAR COUSIN SETH: Can I, must I tell you the sad tale; yes, I must. The ship Manchester, of Nantucket, left Montevideo, July 28, 1854. We had very pleasant weather till we got off the Capes, then we had an awful gale which lasted two weeks; in that time we made very little headway. On the morning of the 28th of August we struck a sunken rock about 30 miles from land. As soon as we had struck we sounded the pumps and found she made water fast. We rigged them and went to pumping, but having coal in, that choked them; we got the boats out, but there being a heavy sea running, they were stove; then there was no hope but the ship. Having lumber in, father thought she might keep on the top of the water, providing she had her masts cut away, which was done. At 3 o'clock in the afternoon we saw land. At 9 o'clock in the evening she was full of water, and the sea made a clean breach over her.

At 5 o'clock the next morning she went on a reef close to the land, and being full of water, a heavy sea broke her up in twenty minutes. Father and mother, the steward, second mate and myself were in the cabin, Mr. Pitman and the crew were on the house, when the mainmast went by the board, carrying him and the crew overboard, and we heard nothing more of them. Those in the cabin, when the ship went to pieces, went down all among the timber, rocks and kelp. Father had his arm around mother, and he did not intend to part with her, but a rope or chain passing between them, they were separated. Mother never came up, but father and myself arose. He saw me and said, "What poor soul is that?" and I replied, "It is Thomas." He then told me to come to him, and I did so, and we got upon the lumber. By and by we saw the stern of the ship and got upon it and drifted five miles to an island. Four days after, we were joined by the second mate and one seaman from another island, three miles from the ship.

We remained on the island one month; in that time father made a boat, and we went to the island where the second mate came from. There we found provisions and some lumber, Father made another boat larger than the first, intending to get to St. Carlos, on the Island of Chiloe, 600 miles from where we were, but, alas, he never succeeded. On the 2d of November the second mate died of consumption. On the 22d of the same month some natives came to the island; we received them with kindness, and took them into our house and warmed them, and gave them biscuit and water. Seeing the second mate's clothes they wanted them, and we gave them all but a pair of pantaloons; when they were ready to go, we gave them some more bread, and they left and went on the top of the hill and deposited the clothes; one came back, and father said, "Thomas, get him a chunk of fire;" I did so, but he did not want that—he wanted more clothes; we gave them the pantaloons then, and then the rest came down and wanted the clothes that were on us. Father said, "You don't want our clothes, and for us to be naked and cold?" But they were treacherous. Father saw it in their eyes, and said, "George, get a bolt and defend yourself." Then I had to witness an awful scene; one native tried to wrench the bolt that father had, while two others got on the top of him, having a club hammer, with which they gave him an awful blow over the left eye, which knocked it out and spilt his brains all over his face. At the same time, George had three more on him, but he knocked two over, they ran a spear through the sleeve of my left arm. Seeing father on the ground I ran to him and tried to put him into the boat, but he was too heavy. George, seeing father on the ground, said, "Take me—take my clothes—but don't kill me." Said I, "No, jump into the boat," We shoved her off and I jumped in, but he fell into the water. The natives seeing that we were escaping, ran on a point of land and threw a spear at me, but the Almighty guided it, and it passed within a few inches of my body and struck in the boat and broke in pieces; then George got in. Finding that they could not reach us with spears, they began to throw rocks at us—one of which struck me on the head, gave me a gash, and the scar of it will remain through life. We worked our boat to another island close to where the ship struck and there was the fore part of the ship and some canvas, but not a soul was there or any provisions. We made a boat's sail, and after committing ourselves to the Almighty, we started back to our island to get the bread. When we arrived there, we found father's dead body stripped naked, We obtained two barrels of bread, and having got them into the boat we left as quickly as possible, as we didn't know but the natives might be concealed. We also left father's body on the rocks. We got back to the hulk and there we remained till nearly all our bread was out, waiting for a fair wind and good weather; at last it came and we started for St. Carlos with one half-barrel of bread.

We managed to get 100 miles along the coast; at last our provisions were out and we lived six weeks on raw mussels, berries and roots. On the 15th of February, '55, we saw some natives and they being friendly, we gave ourselves up to them and remained with them till May 25, '55. While living with them we lived principally on a dead whale which had been buried for months, and therefore was rank and putrid. On the 25th of May we saw the Chilian brig-of-war Meteoro, Capt. Martenaz, and brought to this port, arriving June 24. The Consul has taken care of me, and the American captains here, are very kind to me. We go home in the bark Eliza, Capt. Philips, of Baltimore.

This is the account of the awful tale. Only two saved out of nineteen. Robert Wells—called George on board the ship—and myself, and I feel thankful to my God for his kindness in sparing my life. I have found three letters from home. Tell Louisa to be a good girl and mind Aunt Lydia, for now she has no dear father or mother. I would write to Thaddeus and Aunt Lydia, but the story is too awful. I will now bring this to a close by bidding you good-by.

Please excuse all blunders and bad writing. THOMAS EDWARD COFFIN.

Gen. Washington's Last Vote.

The following interesting circumstance is related by a correspondent of the Charleston *Courier*:—

"'I was present,' says this correspondent, 'when Gen. Washington gave his last vote. It was in the spring of 1799, in the town of Alexandria. He died the 11th of December following. The court house of Fairfax county, was then over the market house, and immediately fronting Gadsby's tavern. The entrance into it was by a slight flight of crazy steps on the outside. The election was progressing—several thousands of persons in the court house yard and neighboring streets; and I was standing on Gadsby's steps, when the Father of his country drove up, and immediately approached the court house steps; and when within a yard or two of them, I saw eight or ten good looking men, from different directions, without the least concert, spring simultaneously, and place themselves in positions to uphold and support the steps should they fall in the General's ascent of them. I was immediately at his back, and in that position entered the court house with him—followed in his wake through a dense crowd to the polls—heard him vote—returned with him to the outward crowd—heard him cheered by more than two thousand persons as he entered his carriage, and saw his departure.

There were five or six candidates on the bench sitting; and as the General approached them, they rose in a body, and bowed smilingly; and the salutation having been returned very gracefully, the General immediately cast his eyes towards the registry of the polls, when Col. Dencale, (I think it was) said—'Well, General, how do you vote?' The General looked at the candidates, and said—'Gentlemen, I vote for measures, not for men;' and turning to the recording table, audibly pronounced his vote—saw it entered—made a graceful bow and retired.'"

Experimenting with Meadow Muck.

I have recently witnessed the results of an experiment with meadow muck, which may interest some of your agricultural readers.

This experiment was made on the farm of Rev. Henry Ward Beecher, in Lenox, under the care of Mr. O. C. Bullard, his Brother-in law.

Last winter, Mr. Bullard was getting out muck from an extensive meadow, for his barn yard and compost heap. As an experiment, he spreads a quantity—between one and two small sled loads—green from the meadow, upon a spot one rod by two, of a mowing field. It was laid on the top of the snow, and an inch and a half or two inches thick. This spring he covered another similar space. This is in a large field, sloping to the east, that has been laid down to herds grass several years. There is a good deal of the white weed, or daisy over most of the field, and there are numerous little spots where the grass seems to be killed out, and which are covered by a coat of moss.

On the 30th of June, I visited this field to note the effect of this experiment. The spot where the muck was spread on the snow in the *Winter*, is covered with a thick, rank, deep green growth of herds grass and clover, and will give at least *two-thirds* more hay than any of the fields around it. It can be seen at a distance, like the spots in a field where there have been manure heaps. The ground is perfectly covered with the grass, giving no signs of moss. This luxuriant growth is overtopping the daisy, none of which is yet in blossom, while in all the rest of the extensive fields, it is in full bloom.

The spot where the muck was spread this spring, is distinctly seen; but the crop of grass is not more than a quarter or a third larger than the average around it.

The result of this experiment seems to show, that the muck spread in the *Winter* together with the snow that it was spread upon, operated as a *mulching* to protect the roots of the grass from the action of the frost. None of it is thrown out the ground or winter-killed. It has overcome and killed out the moss, and retarded, if not in a great measure destroyed, the daisy, and it has also imparted mellowness, and, no doubt, more or less richness to the soil. [Traveler.

How to Build Balloon House.

At a recent meeting of the Farmers' Club in New York in reply to numerous letters, Mr. Robinson gave the following account of the mode of building what are called balloon frames for houses:—

"I would saw all my timber for a frame-house, or ordinary frame out-building, of the following dimensions: "Two inches by eight; two by four; two by one. I have, however, built them, when I lived on the Grand Prairie of Indiana, many miles from saw-mills, nearly all of split and hewed stuff, making use of rails or poles, reduced to straight lines and even thickness, on two sides, for studs and rafters. But sawed stuff is much the easiest, though in a timber country the other is far the cheapest. First, level your foundation, and lay down two of the two-by-eight pieces flatwise, for side-walls. Upon these set the floor-sleepers, on edge, 22 inches apart. Fasten one at each end, and perhaps, one or two in the middle, if the building is large, with a wooden pin. These end-sleepers are the end-sills. Now lay the floor, unless you design to have one that would be likely to be injured by the weather before you get the roof on. It is a great saving, though, of labor, to begin at the bottom of a house and build up. In laying the floor first, you have no studs to cut and fit around, and can let your boards run out over the ends, just as it happens, and afterward saw them off smooth by the sill. Now set up a corner post, which is nothing but one of the two-by-four studs, fastening the bottom by four nails; make it plum, and stay it each way. Set another at the other corner, and then mark off your door and window places, and set up the side-studs and put in the frames. Fill up with studs between, 16 inches apart, supporting the top by a line or strip of board from corner, or stayed studs between. Now cover that side with rough sheeting-boards, unless you intend to side up with clap-boards on the studs, which I never would do, except for a small, common building. Make no calculation about the top of your studs; wait till you get up that high. You may use them of any length, with broken or stub-shot ends, no matter. When you have got this side boarded as high as you can reach, proceed to set up another. In the meantime, other workmen can be lathing the first side. When you have got the sides all up, fix upon the hight of your upper floor, and strike a line upon the studs for the under side of the joist. Cut out a joist four inches wide, half-inch deep, and nail on firmly one of the inch strips. Upon these strips rest the chamber floor joist. Cut out a joist one inch deep in the lower edge, and lock it on the strip, and nail each joist to each stud. Now lay this floor and go on to build the upper story, as you did the lower one; splicing on and lengthening out studs wherever needed, until you get high enough for the plate. Splice studs or joist by simply butting the ends together, and nailing strips on each side. Strike a line and saw off the top of the studs even upon each side—not the ends—and nail on one of the inch strips. That is the plate. Cut the ends of the upper joist the bevel of the pitch of the roof, and nail them fast to the plate, placing the end ones inside the studs which you will let run up promiscuously, to be cut off by the rafter. Now lay the garret floor by all means before you put on the roof, and you will find that you have saved fifty per cent. of hard labor. The rafters, if supported so as not to be over ten feet long, will be strong enough of the 2 by 4 stuff. Bevel the ends and nail fast to the joist. Then there is no strain upon the sides by the weight of the roof, which may be covered with shingles or other materials—the cheapest being composition or cement roofs. To make one of this kind, take soft, spongy, thick paper, and tack it upon the boards in courses like shingles. Commence at the top with hot tar and saturate the paper, upon which sift evenly fine gravel, pressing it in while hot—that is, while tar and gravel are both hot. One coat will make a tight roof; two coats will make it more durable. Put up your partitions of stuff 1 by 4, unless where you want to support the upper joist—then use stuff 2 by 4, with strips nailed on top, for the jo st to rest upon, fastening altogether by nails, wherever timbers touch.

Thus you will have a frame without a tenon or mortice, or brace, and yet it is far cheaper, and incalculably stronger when finished, than though it was composed of timbers ten inches square, with a thousand auger holes and a hundred days work with the chisel and adze, making holes and pins to fill them. To lay out and frame a building so that all its parts will come together, requires the skill of a master mechanic, and a host of men and a deal of hard work to lift the great sticks of timber into position. To erect a balloon-building requires about as much mechanical skill as it does to build a board fence. Any farmer who is handy with the saw, iron square and hammer, with one of his boys or a common laborer to assist him, can go to work and put up a frame for an out-building, and finish it off with his own labor, just as well as to hire a carpenter to score and hew great oak sticks and fill them full of mortices, all by the science of the "square rule. It is a waste of labor that we should all lend our aid to put a stop to. Besides, it will enable many a farmer to improve his place with new buildings, who, though he has long needed them, has shuddered at the thought of cutting down half of the best trees in his wood-lot, and then giving half a year's work to hauling it home and paying for what I do know is the wholly useless labor of framing. If it had not been for the knowledge of balloon-frames, Chicago and San Francisco could never have arisen, as they did, from little villages to great cities in a single year. It is not alone city buildings, which are supported by one another, that may be thus erected, but those upon the open prairie, where the wind has a sweep from Mackinaw to the Mississippi, for there they are built, and stand as firm as any of the old frames of New England, with posts and beams sixteen inches square."

How Tea is Made.

A Chinese correspondent of the Rochester *Union* writes to that paper a long and interesting account of tea-making and tea-drinking among the Celestials, from which we take the following extracts:—

"Leaves from which green tea is to be made are brought from the plantations, and spread out thinly on bamboo trays in order to get rid of their moisture. In two or three hours the leaves dry, and they are then thrown into the roasting pans, and rapidly moved about and shaken up. They make a crackling noise, become moist and flaccid, and give off considerable vapor. In this state they remain a very short time, when they are drawn quickly from over the fire and placed on rolling tables. The quantity is divided among the workmen at the rolling table—each takes as mnch as he can manage to press with his hands into the form of a ball. The ball is rolled on the table and compressed to force out the remaining moisture, and give the leaves the necessary twist. The leaves are then shaken out upon flat trays and carried once more to the roasting pan, where they are kept in rapid motion by the hands of the workmen, and in an hour and a half the leaves are well dried, and their color is fixed. The difference between black and green tea (when not artificially colored) depends wholly upon the process of manipulation.

After the tea is dry it is passed through sieves of various sizes, in order to get rid of impurities, and divide it into the well known kinds of Hyson, Hyson Skin, and Young Hyson.

Black Tea undergaes a similar treatment, but the method of manipulation is not the same, and coloring matter is never added.

Some kinds of black tea are very expensive and never exported, being used by the Emperor and some of the high Mandarins. The kinds denominated "coral dew," "white dew," and "rivulet garden tea," are said to be worth thirty dollars a pound in China.

Some idea of the great number of persons employed in the tea culture may be formed, when it is estimated that fifty-millions of pounds are annually exported, and that it is the universal beverage of three hundred millions of people at home.

Superphosphate of Lime.

John F. Fits, of East Windsor Hill, Ct., gives the Hartford *Courant* the result of his experiments in the use of this fertilizer, as follows:—

Last season I tried Coe's Superphosphate of Lime, say a bushel, on one-third of an acre of old sandy field, land entirely worn out. The lime was sown broadcast and harrowed in, and the seed bushed in as usual. From this piece I received 110 bushels of turnips—four of which would fill a half-bushel measure, and would weigh seven pounds each. The season, you recollect, was dry, or this yield would have been at least 150 bushels.

On the same piece of ground I planted a few of the same seed without fertilizer, that I might thoroughly test the virtues of the line. The largest turnips grown without the lime, were only the size of an egg. On the same soil I planted a third piece of ground with corn, and used guano. This answered tolerably well. This year I sowed the three pieces with oats, and without any fertilizer; and I find the piece where the superphosphate of lime was used last year, produces decidedly the best crop.

This and other experiments have satisfied me that superphosphate of lime is the most enduring fertilizer known. I have tried it on tobacco with great success—also on potatoes, and have always found sound potatoes wherever the lime has been used. I used a tablespoonful in a hill. The lime has done exceedingly well on buckwheat, and I am about trying it as a top-dressing on my corn.

A GOOD PRICE.—The "Evening Gazette" gives the following: "A few months since a lady in this city, on her wedding day, received from a friend in New York a very shabby looking picture, with the wish that it might adorn her parlor. It was so obscure that one would scarcely detect the outlines of the figures which it represented, but on account of the giver, it was sent to be restored. While there, an Englishman saw it, and offered fifty dollars for it, which offer was refused by the lady, on account of its being a gift. The Englishman urged his offer, and, calling upon the lady, said he should regard it as a favor if she would allow him to present her with one hundred dollars and take the painting. Of course she refused; when he increased his bids gradually from one hundred to one thousand, and finally asked her to set her own price, as it was one of six paintings by Murillo—two of which were destroyed by fire, and three of which were in Europe. So certain is he of this, that he stands in readiness to pay as high as $10,000 for the painting. Quite a pretty sum for a young bride.'

THE LANDS.—The public lands in Kansas and Nebraska are not in market, and will not be, till the surveys are made and the land offices established, pursuant to the Act of Congress of July 22, 1854. Meantime any actual settler, being the head of a family, or a widow, or a single man over 18 years of [illegible] may appropriate any unoccupied land in [illegible] Territories to which the Indian title has been extinguished, to the extent of a quarter section, or 160 acres, by occupying and improving the same; and he will become thus entitled to a preëmptive right to such quarter section. That is to say, he will have the exclusive right to purchase it at the price of $1 25 per acre any time after it comes into market.

LONGEVITY OF CLASSES.—According to a table in *Hunt's Magazine*, the average age attained by railway brakemen and factory workmen is 27 years; baggagemen, 30 years; milliners, 32; dressmakers, 33; engineers, firemen, conductors, powder-makers, well-diggers, and factory operatives, 35; cutlers, dyers, leather-dressers, apothecaries, confectioners, cigar-makers, printers, silversmiths, painters, shoe-cutters, engravers and machinists, musicians, drovers, and editors, 40; tinsmiths and tailoresses, 41; stone-cutters, domestic female servants, tailors, bakers, and sailors, 43; weavers and laborers, 44; cooks, 45; inn-keepers, 46; brick-makers, 47.

New Steamboat Line for Albany and Troy.

From Pier 15, foot of Liberty-st., at 6 P. M

STEAMER RIP VAN WINKLE, C. W. Farnham, Commander, Monday, Wednesday and Friday, at 6 o'clock, P. M.; steamer COMMODORE, L. Smith, Commander, Tuesday and Thursday, at 6 o'clock, P. M., and SUNDAY, at 5 P. M.

Fares: Saratoga, $1 50; Moreau, $2 15; Fort Edward, $2 15; Whitehall, $2 75; Castleton, $3 10; Rutland, $3; Burlington, $4; Rouses Point, $5 50; Montreal, $7 50.

These Boats will arrive in Albany or Troy in ample time to form connections with all the Railroads, North, East or West, enabling passengers to reach Montreal and intermediate points the same day.

These Steamers are of the first class for strength and speed—well known favorities of the public—having been thoroughly overhauled during the past winter, and offer every accommodation that can be desired by either freighter or traveler.

Through tickets can be obtained on board the boat for Saratoga, Moreau, Fort Edward, Whitehall, Castleton, Rutland, Burlington, Rouse's Point and Montreal

The Northern Freight Express will give Bills o Lading to all points as above named. Shippers who desire it, can have time receipts, by applying at the office on the Pier. A. A. DYKEMAN.

Ayer's Pills.

A NEW and singularly successful remedy for the cure of all Bilious diseases—Costiveness, Indigestion, Jaundice, Dropsy, Rheumatism, Fevers, Gout, Humors, Nervousness, Irritability, Inflammations, Headache, Pains in the Breast, Side, Back, and Limbs, Female Complaints, &c., &c. Indeed very few are the diseases in which a Purgative Medicine is not more or less required, and much sickness and suffering might be prevented, if a harmless but effectual Cathartic were more freely used. No person can feel well while a costive habit of body prevails; besides, it soon generates serious and often fatal diseases, which might have been avoided by the timely and judicious use of a good purgative. This is alike true of Colds, Feverish symptoms, and Bilious derangements. They all tend to become or produce the deep seated and formidable distempers which load the hearses all over the land. Hence a reliable family physic is of the first importance to the public health, and this Pill has been perfected with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing any thing hitherto known of any medicine. Cures have been effected beyond belief, were they not substantiated by persons of such exalted positions and character as to forbid the suspicion of untruth.

Among the eminent gentlemen who have testified in favor of these Pills, we may mention:

Doct. A. A. Hayes, Analytical Chemist of Boston and State Assayer of Massachusetts, whose high professional character is endorsed by the—

Hon. Edward Everett, Senator of the United States.

Robert C. Winthrop, Ex-Speaker of the House of Representatives.

Abbott Lawrence, Minister Plen. to England.

†John B. Fitzpatrick, Catholic Bishop of Boston; also

Dr. J. R. Chilton, Practical Chemist of New York City; endorsed by

Hon. W. L. Marcy, Secretary of State.

Wm. B. Astor, the richest man in America.

S. Leland & Co., Proprietors of the Metropolitan Hotel, and others.

These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compounded not of the drugs themselves, but of the medicinal virtues only of Vegetable remedies extracted by Chemical process in a state of purity, and combined together in such a manner as to insure the best results. This system of composition for medicines has been found in Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any process. The reason is perfectly obvious. While by the old mode of composition, every medicine is burdened with more or less of acrimonious and injurious qualities, by this each individual virtue only that is desired for the curative effect is present. All the inert and obnoxious qualities of each substance employed are left behind, the curative virtues only being retained. Hence it is self-evident the effects should prove as they have proved, more purely remedial, and the Pills a more powerful antidote to disease than any other medicine known to the world.

As it is frequently expedient that many medicines should be taken under the counsel of an [illegible] physician, and as he could not properly judge of a remedy without knowing its composition, I have supplied the accurate Formulæ by which both my Pectoral and Pills are made, to the whole body of Practitioners in the United States and British American Provinces. If however there should be any one who has not received them, they will be forwarded by mail to his request.

Of all the Patent Medici[illegible]t are offered, how few would be taken if their composition was known! Their life consists in their mystery. I have no mysteries.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject freely acknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects w[illegible] Many eminent Physicians have declar[illegible]thing of my Pills, and even more confide[illegible]and are willing to certify that their anticipations were more than realized by their effects upon trial.

They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.

Prepared by Dr. J. C. AYER, Chemist, Lowell, Mass. Price 25 Cents per Box. Five Boxes for $1 00.

Sold at wholesale in New York by A. B. & D. SANDS retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

THE CHRISTIAN CHURCH.

An Essay on the Constitution and Government of the Christian Church, written for the Seventh-day Baptist Eastern Association, by L. Crandall.

(Concluded.)

Let us now consider some objections to these views. It has been often objected to the foregoing kind of accountability, that it does not secure the independence of the individual churches. To that objection I reply, The independence of individual churches, and their ultimate and absolute authority, as insisted upon by many, is a manifest though subtle and delusive fallacy. It is an impossibility, where any kind of association is entered into between churches. What can be plainer, than that when churches write out a Constitution, and sign it, they are accountable to each other in every particular to which they have therein subscribed? What can be plainer, than that they are justly liable to be called to account and tried by the body to which they have connected themselves, and dismembered therefrom for any conduct in violation of the compact or covenant they have entered into? Suppose it be said that the Constitution which the churches adopt specifies that they shall not be amenable to any other body but themselves for their conduct. All I have to say is, that such a Constitution is a piece of self contradiction; that it can neither be applied or obeyed, if it declares the promotion of piety to be one of its objects. Such a Constitution must breed contradiction and confusion, of necessity. Individual independence, (in a comparative sense,) is the original condition of persons. It is the original condition of separate community, societies, churches, or states. But of *none* can it be *absolutely* affirmed, as by *nature all* are more or less dependent. Whenever the social, civil, or religious associations or compacts which persons join, violate the terms on which they unite with them, they may assume to be absolved from their connection and memberships in said compacts, and fall back upon their original individual independence. But to assume to stand and act upon that ground, and at the *same* time retain membership in the body, is preposterous and absurd. It is nothing but assuming to govern the mass by individual and irresponsible power—or to dictate to the body what it shall allow us to do, or what it shall do—and to be sole umpire as to our membership in the body. This stupendous fallacy is the result of the reaction of the Protestant mind from the religious tyranny of the dark ages; but it places those who hold it exactly at the opposite pole of the social logical sphere from that occupied by those who maintain the absolute authority of the body. The old error claimed all the ground—all the rights and all the authority for the body, or majority; but the modern error spreads itself over the multitude, and binds them fast by its extravagant definition of individual rights and independence. These two errors, equally extravagant, and mutually inimical to truth, as they are to each other, have beseiged the social, civil, and religious interests of mankind, with the rapacity and relentlessness of death; and with the darkness and corruption of the grave. The truth is, each and every individual is bound by one eternal and changeless obligation to do righteously, and has no liberty, either singly or by association, to do any wrong. No one has a right to enter into any social relation except to do right, and of course, to maintain inviolate, (so far as is in his power to do,) the rights of others as well as his own. He must admit, that it is the duty of others as well as himself to act upon their judgment of what is right. How, then, can he claim exclusive jurisdiction over subjects that concern others as much as himself, and with whom he has covenanted to [illegible] advance a cause in which he and they are equally obligated?

In spite of all that can be said in defense of the extreme and extravagant views often insisted upon respecting individual church or state rights, this conviction forces itself upon the mind, namely, that for whatever purpose men unite, or associate, they must allow their associates the right to judge whether their conduct comports with the objects of their association or not, and that the majority of the votes of those associated must legitimately decide as to the obligations of the body to the individual member, society, church, or State of which the body is made up, and of his or their rights in the same; while members have an equal right to judge whether the body has kept their covenant with *them*, and whether they are under any obligation to the body. Any failure to recognize the several and mutual rights—any overleaping their respective boundaries—any assumption of the one party to decide for the other—any affectation of authority by virtue of office, order, precedent, or practice—or any merging or absorbing in or confounding one of these rights with the other—indeed, any carelessness about observing in every instance just where the claims meet, and balance the one with the other, must be equally destructive to peace as it is subversive of justice. It is, therefore, the lack of sufficient scrupulousness in forming connections in the first place, and closeness in in reasoning, and practice upon these principles in the second place, induced by the innate and universal love of power and advantage, that every species of association or confederation in our country alternately verges to the tyranny of majorities, or to dissolution arising from the disproportionate claims of individuals and minorities.

It may be said that it is too much trouble, or too intricate a task, to study and observe the just balance of these principles—that we must have some generalization of the subject by which we may work. I reply, those who think it too much trouble to bring every case to the standard of mutual and even-handed justice, can have their own choice, and grapple at length with the overwhelming consequences of their treachery to those principles. If it be said, that it is hopeless to attempt to regulate the affairs of society according to right principle, that is only saying that wrong is inherently stronger than right, or that we are too indolent, too cowardly, or too much implicated in wrong ourselves, to undertake the defense of the right; or, what is still worse, if we will attempt to correct wrong by resorting to wrong, we may be justly charged as common sinners, and with loving the wrong more than the right. But if, on the contrary, we are true, constant and active in defense of the right, we cannot fail to win a glorious reward and renown.

There are very few sayings among the many that have been handed down to us on account of the wisdom they embody, which equal in truth and importance the following: "Eternal vigilance is the price of liberty." And in nothing is it more applicable than in respect to the preservation of the religious liberties of the church as a whole, or of its parts and individual members. It may be a question, whether the enemies of the church within its pale or without are most to be feared; and it may be as difficult to determine whether the church, in *its* capacity, has oppressed individuals in their rights, and perverted their ways, more than *individuals* have corrupted and misled the church. And yet the Constitution and laws of the church were unparalelled in brevity and simplicity. As light radiates from the sun in straight lines, and in all directions, except where they are intercepted by dark bodies, so all the laws of the church radiate from *love*, holy love in God, and are bent or broken only by those who lack that principle, or are too ignorant to comprehend the application of those laws.

But the discipline of the church is not to proceed upon the *opinion* entertained by individuals in regard to each other's *piety*, of which none can have *certain* knowledge, and all are liable to be entirely mistaken. I do not say our opinion of a person's piety should have no weight in matters of discipline, for it undoubtedly will and ought to have weight. But what I mean is, that discipline should be conducted strictly on scripture precepts and principles. I say on scripture precepts and *principles*; for it is impossible that the Bible should contain a precept directly and literally covering every particular case, or offense. But the precepts there given must be literally followed in the precise cases to which they are there applied, and the *principles* there established must be followed in all cases, *according as they class with the cases or examples there brought to view.* Here we meet the difficulty of inferring, or rather the danger of mal-discipline from *false inferences.* But there is no escape—we must meet the danger as best we can. Nor are we to imagine that the difficulty grows out of the obscurity of the scripture law and practice, or the weakness of the human perceptions of analogy, but from the fact that in every instance of wrong there is some one, and very frequently a large number, who are *interested* to make *wrong* appear *right.* Here lies the danger—the blinding, the crazing effects of self interest. It often tears whole churches, communities, and even nations, from their moorings in the harbor of truth, justice and peace. But I insist, that the law is to be strictly applied in all cases. I will illustrate this point. Suppose there are in a church two members, A and B. A is to all appearance a man of great benevolence and personal piety, but he is engaged in the slave trade. B, on the other hand, gives no very decided signs of piety, and from a [illegible] of behavior, which, however, does not involve any violation of God's law or Christian principles, he leads persons to doubt his piety, and some think he is a bad man. Now, what I mean by conducting discipline on scripture principles, is, that A shall be excluded from the church, for the sin of *man* stealing, and that B be secured in the rights of membership, notwithstanding he *seems* to be defective in regard to that important grace, namely, piety. All discipline conducted on any other principle, degrades the Word of God, and exalts human judgment, feeling and sympathy, in dishonor and contempt of divine wisdom. All fellowship which transcends this rule bargains justice for gain, and seeks peace by compromising with the enemy. The illusions under the name of liberality or charity—the dread of being called narrow-minded, bigoted, or self-righteous—but more frequently and fatally than all of these put together, self-interest, leads members, ministers, and churches, ruthlessly to trample down God's authority, and hoist sail on the treacherous sea of non-essentialism, or, "It's no matter what a man believes or does, if he is only a Christian." Just as if, with the Bible in his hand, a man can be a Christian and believe or do anything to which his own fancy or interest may incline him! In fact, there is such trifling with religious obligation as staggers all confidence and hope, and fills the reflecting mind with utter and unutterable amazement. The only hope of counteracting the effects of such spiritual wickedness is to take our stand on Bible grounds, and charge the mischief done on those who are so reckless as to transgress that high authority. The measure of one man's goodness, as compared with another, must be his comparative approximation to God's requirements, and not his affected grace of manners, his wealth, or seeming piety. Many things conspire to draw the church aside from her integrity and fidelity to God. The rebukes and condemnation which her faithfulness fixes on the consciences of the ungodly world is always followed by demands that she should abate her censures in order to conciliation, under the delusive pretence that she will in that way better succeed in her mission. Then there is a class of professors of Christianity, whose propensities or interests dispose them always to plead against anything like close and efficient discipline, as being bigotry, illiberality, or cruelty, and likely to injure the cause of religion, or disaffect individuals whose aid is desirable. By such influences churches are often led on, till they become filled with corruption—fall under the criticism and contempt of their seductive advisers, and the wicked world, whose light they ought to be. But may it not be forgotten that the only remedy for all these evils is to stand upon and work by God's plan, come what will, and in spite of all opposition.

DR. PAYSON'S POWER IN PRAYER.

Years ago, when Dr. Payson was the pastor of the second parish church in this city, he instituted "the quarterly church fast." This season is still observed here, by all the orthodox Congregational churches. Being in one of these meetings, not long since, I took occasion to mention the fact that the pastor of a church in western Massachusetts, where I formerly resided, often alluded to these seasons, and the manner in which they were observed by Dr. P., and that, as a consequence, his church afterwards established such a meeting, and regularly attended upon it, with no little interest and profit.

A pious lawyer who was present, remarked, that he was reminded by these statements, of one striking feature in Dr. Payson's Sunday exercises—*his wonderful power in prayer.* Mr. S. was then a child; he felt no special interest about religious things. But when that man of God arose in his place, and poured out his soul in supplication, so filial and tender, so earnest and reverent, so solemn and spiritual, his young heart was completely overwhelmed with emotion. He could not describe the feelings that rushed upon him at that hour, in any better way than by comparing them to the sensation which comes over us when we receive a sudden fright; his blood started quicker in his veins, his whole frame felt a shock, and his spirit was stirred deeply within him. Dr. Payson brought down so much of the presence and power of God, by his near communion at the Throne of Grace, that it was awful to be there. That vast assembly were ready to exclaim, "How dreadful is this place! It is none other than the house of God and the gate of heaven!" He said Dr. Payson owed his remarkable success in the ministry, and his amazing influence, as much to his prevalence in prayer, as to his faithfulness and pungency in preaching the Gospel.

A valuable testimony! In these days, when so much is said about great efforts, about eloquent sermons, about *intellectual preaching*; and so little importance is attached to a high standard of personal piety, to a deep-toned spirituality, as an element of mighty power in the pulpit—may it not be refreshing to turn back to the experience of former times? Few, if any, ministers have wielded a more wide-spread and healthy influence than Dr. Payson. It is felt to the third and fourth generations. Its moulding hand is still pressing warmly upon this whole community.

I never resided in any place where the religious element seemed to be more ascendant, where conversation among professing Christians upon experimental and spiritual things, and those precious truths which cluster so closely around the cross of the Son of God, was more free and natural. This is owing, doubtless, in a good measure, to the fact, that Dr. Payson would never go where he could not take his Saviour with him. In all his visits, in all his intercourse with the people, he claimed the privilege of conversing with them about their salvation, and commending their souls to God in prayer. Such interviews they soon learned to welcome and enjoy.

I know that Dr. Payson possessed a good deal of intellectual acumen, and a peculiar tact in forcibly illustrating truth and happily adapting it to the condition of his hearers; but, be it remembered, *that he also had power with God in prayer, and prevailed.* Would that we had more of this power in prayer, this power of God, in all our churches, in all our social meetings, in all our sanctuaries, in all our pulpits. Then should we not so often mourn the absence of our Divine Comforter, and the diminished efficacy of preaching. Then would the Lord "revive us again, and turn our captivity as the streams in the south."

[N. Y. Observer.

MY LOST YOUTH.

BY HENRY W. LONGFELLOW.

Often I think of the beautiful town
That is seated by the sea;
Often in thought go up and down
The pleasant streets of that dear old town,
And my youth comes back to me.
And a verse of a Lapland song
Is haunting my memory still.
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I can see the shadowy lines of its trees,
And catch, in sudden gleams,
The sheen of far surrounding seas,
And islands that were the Hesperides
Of all my boyish dreams.
And the burden of that old song,
It murmurs and whispers still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I remember the black wharves and the slips,
And the sea-tides tossing free;
And Spanish sailors with bearded lips,
And the beauty and mystery of the ships,
And the magic of the sea.
And the voice of that wayward song
Is singing and saying still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I remember the bulwarks by the shore,
And the fort upon the hill;
The sunrise gun, with its hollow roar,
The drum-beat repeated o'er and o'er,
And the bugle wild and shrill.
And the music of that old song,
Throbs in my memory still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I remember the sea-fight far away,
How it thundered o'er the tide!
And the dead captains as they lay
In their graves o'erlooking the tranquil bay,
Where they in battle died.
And the sound of that mournful song
Goes through me with a thrill,
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I can see the breezy dome of groves,
The shadow's of Deering's Woods;
And the friendships old and the early loves
Come back with a Sabbath sound, as of doves
In quiet neighborhoods.
And the verse of that sweet old song
It flutters and murmurs still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I remember the gleams and glooms that dart
Across the schoolboy's brain,
The song and the silence in the heart,
That in part are prophecies, and in part
Are longings wild and vain.
And the voice of that fitful song
Sings on and is never still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

There are things of which I may not speak,
There are dreams that cannot die;
There are tho'ts that make the strong heart weak
And bring a pallor into the cheek,
And a mist before the eye.
And the words of that fatal song,
Come over me like a chill:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

Strange to me now are the forms I meet
When I visit the dear old town:
But the native air is pure and sweet,
And trees that o'ershadow well-known streets,
As they balance up and down,
Are singing the beautiful song,
And sighing and whispering still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

And Deering's Woods are fresh and fair,
And with joy that is almost pain
My heart goes back to wander there,
And among the dreams of the days that were,
I find my lost youth again.
And the strange and beautiful song,
The groves are repeating it still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

[Putnam's Magazine for August.

UNREASONABLE.

There are few things in which congregations are more thoughtless and unreasonable than in the demands they make upon their pastors. They have but little idea, in many cases, of the amount of time and labor required for his necessary work. His pulpit preparations alone are almost sufficient to occupy his working hours. If he makes conscience of bringing out things new as well as old; of giving to his people the beaten oil of the sanctuary; of instructing and edifying them, so that both himself and they shall grow in knowledge and usefulness, he must devote to this department of his work a large portion of every day. His intellectual labors are greater and more constant than those of almost any other professional man. He must produce a certain amount of matter at a given time, and this must be continued week after week, and year after year, irrespective of interruptions, physical disability, and the various difficulties which interfere with mental application. His discourses and lectures are expected to be of the highest order—but little allowance being made when they fall short of his ordinary standard.

At the same time he is expected to be a not unfrequent visitor in every family. Although his congregation may be so extensive that even to go the rounds once, calling at each house, would require months, his ears are filled with complaints because he allows intervals of such length between his visits. His routine of visitation, too, is liable to be interrupted by the special attention due to the sick, and to families in affliction. These alone often occupy for weeks almost all the time he is able to spare for out-door service.

A pastor, too, is a public character, and liable to be called upon in season and out of season, not only by members of his own flock, who have occasion to see him, but by multitudes of others. Clerical brethren from a distance; the agents of benevolent institutions; parties soliciting public addresses, recommendations, letters of introduction, &c.; the poor in quest of relief; and a vast number of persons whose errands can scarcely be imagined, except by those familiar with a minister's household, claims no small portion of his time and attention. He must take an interest in schools, and perhaps also in lyceums, library associations, &c., and must occupy a prominent position, especially in such societies and organizations as are designed to promote the interests of religion and humanity. Now, to all these claims there are few pastors who would not cheerfully respond, were it in their power to do so. But they are mortal as well as others. They may have willing spirits, but these dwell in frail, fleshy tabernacles, and where the spirit is willing the flesh is often weak. There is no alternative left them, therefore, than either to seem to neglect what some may regard as duty, and thereby incur the censure of the unreasonable and censorious; or to attempt to do what would be full work for two or three men, and, as the result, break down under an overtaxed brain and body. It has been no uncommon thing in late years for ministers to be laid aside in the midst, and even at the outset of their usefulness; indeed, the question not unfrequently been mooted, why ministers are more short-lived now than in former times. The solution, we feel assured, in many cases, on due investigation, would be in the unreasonable amount of labor required of them, and their extreme reluctance to refuse what is put upon them.

We have no disposition to shield pastors from a proper obligation to serve the church with all their powers, and to have a heart and hand, as far as possible, for every good word and work. We do not desire to apologize for him whose face, year after year, is never seen in the families of his congregation; we would not, if we could, make his life one of indolence or elegant leisure But there is reason in all things; and it is but due to the ministry that the people should sometimes be reminded that they cannot perform impossibilities more than other men; and if under a pressure of public opinion which they have not the firmness nor the heart to resist, they should undertake such a task, the end must inevitably be that they will be sent prematurely to join the already large company of invalid ministers, or else to an untimely grave. It surely unwise, if not wicked, to act over again the fable of killing the goose that laid the golden egg, by endeavoring to extort from frail human beings within a few years what is the work of a lifetime.

CHOICE OF PURSUITS IN LIFE.

There is genuine good sense and right feeling expressed in the following paragraph from a late work by Mrs. Sedgwick. The sentiments expressed are in harmony with just views of our republican institutions:—

I do not intend or wish to crowd my boys into the learned professions. If any among them have particular talent or taste for them, they may follow them. They must decide for themselves in a matter more important to them than any one else. But my boys know that I should be mortified if they selected these professions from the vulgar notion that they were more genteel—a vulgar word that ought to be banished from the American vocabulary—more genteel than agriculture or the mechanic arts. I have labored hard to convince my boys that there is nothing vulgar in the mechanic's profession; no particular reason for envying the lawyer or the doctor. They, as much as the farmer and mechanic, are working men. And I should like to know what there is particularly elevating in sitting over a table and writing prescribed forms, or in inquiring into the particulars of disease and doling out physic for them.

It is certainly a false notion in a democratic republic, that a lawyer has any higher claim to respectability—gentility, if you please—than a tanner, a blacksmith, a painter, or a builder. It is the fault of the mechanic, if he takes the place not assigned to him by the government and institutions of his country. He is of the lower orders only when he is self-degraded by the ignorant and coarse man which are associated with manual labor in countries where society is divided into castes, and have, therefore, come to be considered inseparable from it. Rely upon it, it is not so. The old barriers are down. The time has come when, being mechanics, we may appear on laboring days as well as holidays, without the sign of our profession. Talent and worth are the only eternal grounds of distinction. To these the Almighty has affixed his everlasting patent of nobility, and these it is which make bright the immortal name to which our children may aspire as well as others. It will be our own fault if, in our land, society as well as government is not organized upon a new foundation. But we must secure, by our own efforts, the elevations that are now accessible to all."

THE LITTLE RED MOROCCO BOOK.

An English fair is in progress. Wares of many descriptions are for sale. Shows of all kinds attract the curious. A handsomely-dressed little boy, accompanied by an attendant, makes his way to the tent in which a menagerie is exhibited. As he goes toward it, he draws out his pocket handkerchief, and with it a little book prettily bound in red morocco. The book falls to the ground unobserved by its owner. It is seized upon and secreted by that ragged, bad-looking boy behind him. The little book contained a selection of Bible texts, by Elizabeth Fry, the noble woman who made her daily life beautiful, by living according to God's precepts. She wished to make these precepts familiar to her friends, and she desired them daily to learn one of the texts which she had prepared. It was her little grandson who dropped the book. When he discovered his loss he was much distressed. He said: "I am so sorry, for it was my grandmother's present, and she wrote my name in it with her own hand."

But that little book had a mission to perform.

Go with me to a wild and dreary moor in the parish of Lynn Mart. See that weather-beaten hovel on its borders. Does it not look like the dwelling-place of sloth and crime? And so it is. The man who inhabits it is a poacher, or stealer of game, as well as a rat catcher. The wife is a passionate and profane woman. The children are wicked and neglected. One of these children was the boy who picked up the little book. He carried it home to the hovel upon the moor, and gave it to his mother. She read in that book that all sinners would be eternally punished, and she trembled, for she knew that she was a sinner. But she turned the leaf, and she read that "Jesus came into the world to save sinners;" and after a time she believed these words, and received this kind and loving Saviour as her Saviour, and rested in hope upon the atonement which he has made.

So in that lonely hut Jesus came to her with this little book. The dark hovel became "light in the Lord." Some time after this the woman became ill. A physician came to see her who had known her in former days. She asked him to call upon the minister of the parish, and request him to visit her. This the physician did, adding, "I found her strangely altered, sir. The lion has become a lamb."

The minister found this woman, once so wicked and violent, lying meekly and prayerfully upon her dying bed. He asked her the cause of this change. She put her emaciated hand under her pillow, and drew out the little red morocco book. "It is this," she said, "this dear little book, this precious little book," and soon after died trusting in Jesus.

[Bible Society Record.

A WORD FOR PARENTS.

The ignorant nursery maid is an educator; her look, and tone, and gesture, are aids to the development of faculties perhaps of the highest order. Let not the fond parent who trusts her little boy to the temporary care of the servant maid fancy that the girl is "only getting him ready for school." The girl is educating him, morally, mentally, and physically; the cold water which trickles from his head down his healthy, chubby limbs, would provoke him to try the strength of his lungs, to the no small disquietude of the house, were it not that Betty is amusing him "by such a pretty story about a great big black giant eating little boys and girls as if they were herrings." Scarcely a sentence does she utter, but she exercises or develops some moral or mental faculty in such a manner as not only to counteract the good which the morning ablution might do as regards physical development, but also to do a positive injury. Now, had the girl been properly educated and instructed, her influence with the child would not have been less—possibly it might have been greater—and, oh how different would the result have been!

THE POOR MAN BLESSED.

When I compare together different classes, as existing together in the civilized world, I cannot think the difference between the rich and the poor, in regard to mere physical suffering, so great as is sometimes imagined. That some of the indigent among us die of scanty food, is undoubtedly true; but vastly more in this community die from eating too much than from eating too little; vastly more from excess than from starvation. So, as to clothing. Many shiver for want of defences against the cold, but there is vastly more suffering among the rich, from absurd and criminal modes of dress, which fashion has sanctioned, than the poor for deficiency of raiment. Our daughters are oftener brought to the grave by their rich attire, than our beggars by their nakedness. So, the poor are often overworked, but they suffer less than many among the rich, who have no work to do, no interesting object to fill up life, to satisfy the infinite cravings of man for action. According to our present modes of education, how many of our daughters are victims of ennui! a misery unknown to the poor; and more intolerable than the weariness of excessive toil.

The idle young man, spending the day in exhibiting his person in the street, ought not to excite the envy of the overtasked poor; and this cumberer of the ground is found exclusively among the rich.

I AM.

Who can conceive a more beautiful connection of sublime ideas than is found in the following, which we clip from an exchange? The authorship is attributed to Bishop Beveridge:

"I AM." He doth not say, I AM their light, their guide, their strengthening tower, but only I AM. He sets as it were his hand to blank, that his people may write under it what they please that is good for them. As if He said, Are they weak? I AM strength. Are they poor? I AM riches. Are they in trouble? I AM comfort. Are they sick? I AM health. Are they dying? I AM life. Have they nothing? I AM all things. I AM wisdom and power; I AM glory, beauty, holiness, eminency, super-eminency, perfection, all-sufficiency, eternity! JEHOVAH, I AM! Whatsoever is amiable in *itself*, and desirable to them, *that I AM.* Whatsoever is pure and holy, *whatsoever is good* and needful to make men happy, that I AM.

TOBACCO AFTER PRAYER.—The editor of the Norwich *Examiner* thinks it is not clerical to use tobacco. He says:

"Traveling from Hartford to Westerfield the other day, upon a stage coach, we fell in company with a clergyman in high standing in his own ecclesiastical connection, who was returning to his country residence from conducting morning prayers in this city. Passing a field of tobacco, we alluded to some of the evils resulting from its use, when, to our surprise, the dignitary beside us commenced one of the most subtile, earnest arguments in its favor that we have ever listened to. We will not repeat his remarks, only that he concluded by saying that 'cigars were his daily delight, and that after the fatigue of *preaching, praying, &c.*, they were highly indispensable.'"

"FEELING FOR THE PILLARS."—When Luther was at Coburg he wrote to a friend, "I was lately looking out of my window at night, and I saw the stars in the heavens, and God's great beautiful arch over my head, but I could not see any pillars on which the great Builder had fixed this arch; and yet the heavens fell not, and the great arch stood firmly. There are some who are always feeling for the pillars, and longing to touch them. And because they cannot touch them, they stand trembling and fearing lest the heavens should fall. If they could only grap the pillars, then the heavens would stand fast." Thus Luther illustrated the faith of his own soul, and wished to inspirit others with the same strong confidence in God.

OUR ANNIVERSARIES.

The Anniversaries of the Seventh-day Baptist General Conference, and of the Missionary, Tract, and Publishing Societies, were held this year with the 1st Church in Brookfield, Madison Co., N. Y., commencing on Fourth-day, Sept. 5th, and closing on the following First-day. The number of delegates in attendance was large, the provision for their comfort was ample, and the occasion throughout was uncommonly interesting.

The time appropriated to the Conference and the different Societies was not long enough to enable them to complete the business which came before them respectively, without being interrupted by other appointments. In our hasty sketch of the proceedings of the several organizations, it will not be advisable to notice in their place the several adjournments to "the call of the Chair." It must suffice here to say, that the Conference occupied all of Fourth-day, and held short sessions in otherwise unoccupied portions of each of the following business days; that the Missionary Society occupied the forenoon and afternoon of Fifth day, and held a session to complete its business on First-day; that the Tract Society held only one session, on Sixth-day morning; and that the Publishing Society held sessions in the afternoon of Sixth day and First-day. There was preaching nearly every evening in the vicinity of each the three Seventh-day Baptist churches. On Sabbath morning there was preaching in the 1st Church by C. M. Lewis, followed by a collection for the Missionary Society; in the afternoon A. B. Burdick preached; and in connection with the services of the day James C. Rogers, a licentiate of the DeRuyter Church, was ordained to the work of the gospel ministry. On First-day morning a discourse was preached by Nathan V. Hull, followed by a collection for the Tract Society.

The Conference.

The 45th Anniversary of the Seventh-day Baptist General Conference opened on Fourth-day, September 5th, with a discourse by Lucius Crandall, from 1 John 1: 7—"But if we walk in the light, as he is in the light, we have fellowship one with another, and the blood of Jesus Christ his Son cleanseth us from all sin."

At the conclusion of the discourse, James Bailey, the Moderator of the last session, called the Conference to order; prayer was offered by N. V. Hull; and a Committee was appointed to nominate permanent officers, consisting of Isaac D. Titsworth, Nathan H. Langworthy, Ephraim Maxson, B. G. Stillman, and H. P. Burdick; after which a recess of one hour was taken.

On re-assembling, the Committee nominated, and the Conference appointed, A. D. Titsworth, Moderator, and D. E. Maxson and J. B. Wells, Clerks.

Letters were presented and read from the following churches: Newport, Piscataway, 1st Hopkinton, Berlin, Shiloh, Marlboro, 2d Hopkinton, 3d Hopkinton, Westerly, Plainfield, Pawcatuck, Greenmanville, DeRuyter. A letter was also read from a church recently organized at Farmington, Ill., and another from its pastor, Samuel Davison. The letter from Farmington requested recognition and membership in the Conference—a request which was granted, and the hand of fellowship was extended by the Moderator to the delegate of that church, brother Dennis Saunders. The letter of the DeRuyter church requested the examination of brother James C. Rogers, and his ordination if the Conference should think proper—a request which was referred to the ministers in attendance. Several of the letters—among which were those from 1st Hopkinton, Pawcatuck, Shiloh, and 1st Alfred—requested that the next session of the Conference might be held with them. A statement was also made, on behalf of the Central Association, that at the last meeting of that body about forty delegates to this meeting were appointed.

The Moderator, in compliance with a vote of the Conference, appointed the following Committees:—

On the State of Religion—B. F. Langworthy, C. M. Lewis, A. W. Coon.

On Petitions—S. S. Griswold, T. B. Stillman, Joshua Clarke.

On Business—L. Crandall, W B Maxson, N. V. Hull.

On Preaching—Eli S. Bailey, W. B. Maxson, A. B. Burdick.

On Finances—David Dunn, N. H. Langworthy, Randolph Dunham.

The Corresponding Secretary made his report, accompanying it with the statistics of the churches, as drawn from the latest published Minutes of the Associations. The statistics of several feeble churches which had not recently reported were corrected, so far as they could be by information obtained from members of the Conference. The question was raised, whether the Minutes of the Conference could not embody an account, not only of churches, but of societies of Sabbath-keepers located in different parts of the country; and the opinion was expressed that such information would add greatly to the interest and usefulness of the Minutes. Geo. B. Utter, James Bailey, and H. H. Baker were appointed a Committee to consider the subject, and do what they can to carry out the idea.
